MERCER INTERNATIONAL INC.

NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

(In thousands of U.S. dollars, except per share data)

Note 1. The Company and Summary of Significant Accounting Policies

Basis of Presentation

The interim consolidated financial statements contained herein include the accounts of Mercer International Inc. (Mercer Inc.) and all of its subsidiaries (collectively the Company). The Company s shares of common stock are quoted and listed for trading on both the NASDAQ Global Market and the Toronto Stock Exchange.

The interim consolidated financial statements have been prepared by the Company pursuant to the rules and regulations of the U.S. Securities and Exchange Commission (the SEC). The year-end Consolidated Balance Sheet data was derived from audited financial statements. The footnote disclosure included herein has been prepared in accordance with accounting principles generally accepted for interim financial statements in the United States (GAAP). The interim consolidated financial statements should be read together with the audited consolidated financial statements and accompanying notes included in the Company s latest annual report on Form 10-K for the fiscal year ended December 31, 2014. In the opinion of the Company, the unaudited interim consolidated financial statements contained herein contain all adjustments necessary for a fair statement of the results of the interim periods included. The results for the periods included herein may not be indicative of the results for the entire year.

The Company has three pulp mills that are aggregated into one reportable business segment, market pulp. Accordingly, the results presented are those of the reportable business segment.

In these interim consolidated financial statements, unless otherwise indicated, all amounts are expressed in United States dollars (U.S. dollars or \$). The symbol € refers to euros and the symbol C\$ refers to Canadian dollars.

Use of Estimates

Preparation of financial statements and related disclosures in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Significant management judgment is required in determining the accounting for, among other things, pensions and other post-retirement benefit obligations, deferred income taxes (valuation allowance), depreciation and amortization, future cash flows associated with impairment testing for long-lived assets, intercompany loans of a long-term investment nature, legal liabilities and contingencies. Actual results could differ materially from these estimates, and changes in these estimates are recorded when known.

New Accounting Standards

In May 2014, the Financial Accounting Standards Board issued Accounting Standards Update 2014-09, Revenue Recognition Revenue from Contracts with Customers (ASU 2014-09) that requires companies to recognize revenue when a customer obtains control rather than when companies have transferred substantially all risks and rewards of a good or service. This update is effective for annual reporting periods beginning on or after December 15, 2017 and

interim periods therein and requires expanded disclosures. The Company is currently assessing the impact the adoption of ASU 2014-09 will have on its consolidated financial statements.

Less: current portion	(10,741)	(12,101)
Debt, less current portion	\$ 673,562	\$ 675,412

As of March 31, 2015, the maturities of debt are as follows:

Matures	Amount
2015	\$ 10,741

2016	-
2017	-
2018	-
2019	273,562
Thereafter	400,000
	\$ 684,303

Certain of the Company's debt instruments were issued under agreements which, among other things, may limit its ability and the ability of its subsidiaries to make certain payments, including dividends. These limitations are subject to specific exceptions. As at March 31, 2015, the Company is in compliance with the terms of its debt agreements.

- (a) On November 26, 2014, the Company completed a private offering of \$250,000 in aggregate principal amount of 7.00% senior notes which mature on December 1, 2019 (2019 Senior Notes) and \$400,000 in aggregate principal amount of 7.75% senior notes which mature on December 1, 2022 (2022 Senior Notes) and collectively with the 2019 Senior Notes, the Senior Notes). The Senior Notes were issued at a price of 100% of their principal amount.

FORM 10-Q

QUARTERLY REPORT - PAGE 9

MERCER INTERNATIONAL INC.

NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

(In thousands of U.S. dollars, except per share data)

Note 3. Debt (continued)

The Senior Notes are general unsecured senior obligations of the Company. They rank equal in right of payment with all existing and future unsecured senior indebtedness of the Company and are senior in right of payment to any current or future subordinated indebtedness of the Company. The Senior Notes are effectively junior in right of payment to all existing and future secured indebtedness, to the extent of the assets securing such indebtedness, and all indebtedness and liabilities of the Company's subsidiaries.

The Company may redeem all or a part of the Senior Notes, upon not less than 30 days or more than 60 days notice, at the redemption prices (expressed as percentages of principal amount) discussed below, plus accrued and unpaid interest to (but not including) the applicable redemption date. The 2019 Senior Notes redemption prices are equal to 103.500% for the twelve month period beginning on December 1, 2016, 101.750% for the twelve month period beginning on December 1, 2017, and 100.000% beginning on December 1, 2018 and at any time thereafter. The 2022 Senior Notes redemption prices are equal to 105.813% for the twelve month period beginning on December 1, 2017, 103.875% for the twelve month period beginning on December 1, 2018, 101.938% for the twelve month period beginning on December 1, 2019, and 100.000% beginning on December 1, 2020 and at any time thereafter.

- (b) A 10.0 million (\$10,741) payment-in-kind note due to the former noncontrolling shareholder of the Stendal mill which matures in October 2015. The payment-in-kind note bears no interest for the six month period beginning on October 1, 2014 and 8.00% thereafter and can be settled in cash or shares of the Company's common stock at the Company's election.

On April 20, 2015, the Company redeemed the payment-in-kind note for a cash payment of 10.0 million.

- (c) A 75.0 million revolving credit facility at the Stendal mill that matures in October 2019. Borrowings under the facility are collateralized by the mill's inventory and receivables and bear interest at Euribor plus 3.50%. As at March 31, 2015, 19.0 million (\$20,408) of this facility was drawn and was accruing interest at a rate of 3.50%, and approximately 56.0 million (\$60,150) was available.

- (d) A C\$40.0 million revolving credit facility at the Celgar mill that matures in May 2019. Borrowings under the facility are collateralized by the mill's inventory and receivables and are restricted by a borrowing base calculated on the mill's inventory and receivables. Canadian dollar denominated amounts bear interest at bankers acceptance

plus 1.50% or Canadian prime. U.S. dollar denominated amounts bear interest at LIBOR plus 1.50% or U.S. base. As at March 31, 2015, approximately C\$4.0 million (\$3,154) of this facility was drawn, C\$1.7 million (\$1,339) was supporting letters of credit and approximately C\$34.3 million (\$27,045) was available.

- (e) A 25.0 million revolving credit facility at the Rosenthal mill that matures in October 2016. Borrowings under the facility are collateralized by the mill's inventory and receivables and bear interest at Euribor plus 3.50%. As at March 31, 2015, approximately 0.4 million (\$430) of this facility was supporting bank guarantees leaving approximately 24.6 million (\$26,423) available.

- (f) A 5.0 million revolving credit facility at the Rosenthal mill that matures in December 2015. Borrowings under this facility bear interest at the rate of the three-month Euribor plus 3.50% and are secured by certain land at the Rosenthal mill. As at March 31, 2015 approximately 1.1 million (\$1,233) of this facility was supporting bank guarantees leaving approximately 3.9 million (\$4,137) available.

FORM 10-Q

QUARTERLY REPORT - PAGE 10

MERCER INTERNATIONAL INC.**NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS****(Unaudited)****(In thousands of U.S. dollars, except per share data)****Note 4. Pension and Other Post-Retirement Benefit Obligations**

Included in pension and other post-retirement benefit obligations are amounts related to the Company's Celgar and Rosenthal mills. The largest component of this obligation is with respect to the Celgar mill which maintains a defined benefit pension plan and post-retirement benefit plans for certain employees (Celgar Plans).

Pension benefits are based on employees' earnings and years of service. The Celgar Plans are funded by contributions from the Company based on actuarial estimates and statutory requirements. Pension contributions during the three month period ended March 31, 2015 totaled \$475 (2014 \$609).

Effective December 31, 2008, the defined benefit plan was closed to new members. In addition, the defined benefit service accrual ceased on December 31, 2008, and members began to receive pension benefits, at a fixed contractual rate, under a new defined contribution plan effective January 1, 2009. During the three month period ended March 31, 2015, the Company made contributions of \$169 (2014 \$215) to this plan.

The components of the net periodic benefit costs relating to the Celgar Plans for the three months ended March 31, 2015 and 2014 were as follows:

	Three Months Ended March 31,			
	2015		2014	
	Pension Benefits	Post- Retirement Benefits	Pension Benefits	Post- Retirement Benefits
Service cost	\$ 31	\$ 205	\$ 30	\$ 181
Interest cost	448	326	459	311
Expected return on plan assets	(529)	-	(557)	-
Amortization of unrecognized items	226	2	197	(3)
Net periodic benefit cost	\$ 176	\$ 533	\$ 129	\$ 489

Multiemployer Plan

The Company participates in a multiemployer plan for the hourly-paid employees at the Celgar mill. The contributions to the plan are determined based on a percentage of pensionable earnings pursuant to a collective bargaining agreement. The Company has no current or future contribution obligations in excess of the contractual contributions. The contributions during the three month period ended March 31, 2015 totaled \$451 (2014 \$507).

Note 5. Stock-Based Compensation

In June 2010, the Company adopted a stock incentive plan (the 2010 Plan) which provides for options, restricted stock rights, restricted shares, performance shares, performance share units (PSUs) and stock appreciation rights to be awarded to employees, consultants and non-employee directors. During the three months ended March 31, 2015, there were no issued and outstanding restricted stock rights, performance shares or stock appreciation rights. As at March 31, 2015, after factoring in all allocated shares, there remain approximately 2.2 million common shares available for grant.

FORM 10-Q

QUARTERLY REPORT - PAGE 11

MERCER INTERNATIONAL INC.**NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS****(Unaudited)****(In thousands of U.S. dollars, except per share data)****Note 5. Stock-Based Compensation (continued)***PSUs*

PSUs comprise rights to receive common shares at a future date that are contingent on the Company and the grantee achieving certain performance objectives. The performance objective periods are generally three years.

For the three month period ended March 31, 2015, the Company recognized an expense of \$501 related to PSUs (2014 reversal of \$419).

The following table summarizes PSU activity during the period:

	Number of PSUs
Outstanding at January 1, 2015	969,544
Granted	401,368
Vested and issued	(160,608)
Forfeited	(24,505)
Outstanding at March 31, 2015	1,185,799

Restricted Shares

Restricted shares generally vest over one year; however, 200,000 restricted shares granted during the year ended December 31, 2011 vest in equal amounts over a five-year period commencing in 2012.

Expense recognized for the three month period ended March 31, 2015 was \$129 (2014 \$150). As at March 31, 2015, the total remaining unrecognized compensation cost related to restricted shares amounted to approximately \$155 (2014 \$361), which will be amortized over the remaining vesting periods.

The following table summarizes restricted share activity during the period:

	Number of Restricted Shares
Outstanding at January 1, 2015	118,000

Vested	(40,000)
Outstanding at March 31, 2015	78,000

Stock Options

During the three month period ended March 31, 2015, 30,000 stock options were exercised (2014 nil) for proceeds of \$219, and 25,000 stock options were cancelled (2014 nil) in exchange for \$149. The Company has no stock options outstanding as at March 31, 2015.

FORM 10-Q

QUARTERLY REPORT - PAGE 12

MERCER INTERNATIONAL INC.**NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS****(Unaudited)****(In thousands of U.S. dollars, except per share data)****Note 6. Net Income Per Share Attributable to Common Shareholders**

	Three Months Ended March 31,	
	2015	2014
Net income attributable to common shareholders:		
Basic and diluted	\$ 13,634	\$ 21,041
Net income per share attributable to common shareholders:		
Basic	\$ 0.21	\$ 0.38
Diluted	\$ 0.21	\$ 0.37
Weighted average number of common shares outstanding:		
Basic ⁽¹⁾	64,276,452	55,709,482
Effect of dilutive instruments:		
PSUs	341,516	544,103
Restricted shares	88,361	70,195
Stock options	-	11,891
Diluted	64,706,329	56,335,671

(1) For the three month period ended March 31, 2015, the basic weighted average number of shares excludes 78,000 restricted shares which have been issued, but have not vested as at March 31, 2015 (2014 118,000 restricted shares).

The calculation of diluted net income per share attributable to common shareholders does not assume the exercise of any instruments that would have an anti-dilutive effect on net income per share. There were no anti-dilutive instruments for the three months ended March 31, 2015 and 2014.

Note 7. Accumulated Other Comprehensive Income (Loss)

Changes in amounts included in accumulated other comprehensive income (loss) by component are as follows:

	Foreign	Defined Benefit	Unrealized	
	Currency	Pension and	Gains on	
	Translation	Post-Retirement	Marketable	
	Adjustments	Benefit Items	Securities	Total
Balance December 31, 2014	\$ (33,268)	\$ (19,287)	\$ 114	\$ (52,441)
Other comprehensive income (loss) before reclassifications	(111,805)	20	(71)	(111,856)

FORM 10-Q

QUARTERLY REPORT - PAGE 13

MERCER INTERNATIONAL INC.**NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS****(Unaudited)****(In thousands of U.S. dollars, except per share data)****Note 8. Derivative Transactions**

The Company is exposed to certain market risks relating to its ongoing business. The Company seeks to manage these risks through internal risk management policies as well as, from time to time, the use of derivatives. The derivatives are measured at fair value with changes in fair value immediately recognized in gain (loss) on derivative instruments in the Interim Consolidated Statement of Operations.

Interest Rate Derivative

During 2002, the Company entered into certain variable-to-fixed interest rate swaps in connection with the Stendal mill with respect to an aggregate maximum amount of approximately 612.6 million of the principal amount of the indebtedness under the Stendal mill's senior project finance facility, which was settled in November 2014. Under the remaining interest rate swaps, the Company pays a fixed rate and receives a floating rate with the interest payments being calculated on a notional amount. As at March 31, 2015, the contract has a fair value of 27.6 million (\$29,608) of which 12.4 million (\$13,283) is classified as current within accounts payable and other and 15.2 million (\$16,325) is classified as a long-term liability in the Interim Consolidated Balance Sheet. The contract has an aggregate notional amount of 251.8 million, a fixed interest rate of 5.28% and matures in October 2017.

The Company has pledged as collateral cash in the amount of 67% of the fair value of the interest rate swap up to 8.5 million to the derivative counterparty. The calculation to determine the collateral is performed semi-annually, with the final calculation in October 2017. As at March 31, 2015, the collateral was 8.5 million (\$9,130). This cash has been classified as restricted cash in the Interim Consolidated Balance Sheet.

The interest rate derivative is with a bank that is part of a banking syndicate that holds the Stendal 75.0 million revolving credit facility and the Company does not anticipate non-performance by the bank.

Note 9. Financial Instruments

The fair value of financial instruments is summarized as follows:

	March 31, 2015		December 31, 2014	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Cash and cash equivalents	\$ 99,843	\$ 99,843	\$ 53,172	\$ 53,172
Restricted cash	\$ 9,130	\$ 9,130	\$ 10,286	\$ 10,286
Marketable securities	\$ 126	\$ 126	\$ 196	\$ 196
Receivables	\$ 135,600	\$ 135,600	\$ 141,088	\$ 141,088
	\$ 106,091	\$ 106,091	\$ 87,393	\$ 87,393

Accounts payable and other -
excluding current portion of
interest rate derivative liability

Debt	\$ 684,303	\$ 717,053	\$ 687,513	\$ 695,013
Interest rate derivative liability	\$ 29,608	\$ 29,608	\$ 32,794	\$ 32,794

The carrying value of cash and cash equivalents, restricted cash and accounts payable and other approximates the fair value due to the immediate or short-term maturity of these financial instruments. The carrying value of receivables approximates the fair value due to their short-term nature and historical collectability. Marketable securities are recorded at fair value based on quoted prices in an active market. See the Fair Value Measurement and Disclosure section below for details on how the fair value of the interest rate derivative and debt was determined.

FORM 10-Q

QUARTERLY REPORT - PAGE 14

MERCER INTERNATIONAL INC.
NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS**(Unaudited)****(In thousands of U.S. dollars, except per share data)****Note 9. Financial Instruments (continued)***Fair Value Measurement and Disclosure*

The Company classified its marketable securities within Level 1 of the valuation hierarchy because quoted prices are available in an active market for the exchange-traded equities.

The Company's interest rate derivative is classified within Level 2 of the valuation hierarchy, as it is valued using internal models that use as their basis readily observable market inputs, such as forward interest rates and yield curves observable at specified intervals. The observable inputs reflect market data obtained from independent sources.

The Company's debt is recognized at amortized cost. The fair value of debt classified as Level 2 reflects recent market transactions. The fair value of debt classified as Level 3 is valued using discounted cash flow models or select comparable transactions, which require significant management estimates. Discounted cash flow models use observable market inputs taking into consideration variables such as interest rate changes, comparative securities, subordination discount and credit rating changes. These estimates are developed using available market, historical, and forecast data, including taking into account variables such as recent financing activities, the capital structure, and the lack of marketability of such debt.

The following table presents a summary of the Company's outstanding financial instruments and their estimated fair values under the fair value hierarchy:

Description	Fair value measurements at March 31, 2015 using:			
	Level 1	Level 2	Level 3	Total
Assets				
Marketable securities	\$ 126	\$ -	\$ -	\$ 126
Liabilities				
Interest rate derivative	\$ -	\$ 29,608	\$ -	\$ 29,608
Debt	-	706,312	10,741	717,053
	\$ -	\$ 735,920	\$ 10,741	\$ 746,661

Description	Fair value measurements at December 31, 2014 using:			
	Level 1	Level 2	Level 3	Total

Assets					
Marketable securities	\$ 196	\$ -	\$ -	\$ 196	
Liabilities					
Interest rate derivative	\$ -	\$ 32,794	\$ -	\$ 32,794	
Debt	-	682,912	12,101	695,013	
	\$ -	\$ 715,706	\$ 12,101	\$ 727,807	

Note 10. Commitments and Contingencies

- (a) The Company is involved in legal actions and claims arising in the ordinary course of business. While the outcome of any legal actions and claims cannot be predicted with certainty, it is the opinion of management that the outcome of any such claim which is pending or threatened, either individually or on a combined basis, will not have a material adverse effect on the consolidated financial condition, results of operations or liquidity of the Company.

FORM 10-Q

QUARTERLY REPORT - PAGE 15

MERCER INTERNATIONAL INC.

NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

(In thousands of U.S. dollars, except per share data)

Note 10. Commitments and Contingencies (continued)

- (b) In 2012, as a result of a regular tax field audit for the Stendal mill, German public authorities commenced a preliminary investigation into past managers of the mill relating to whether certain settlement amounts received by the Stendal mill in 2007, 2010 and 2011 from the main contractor under the Engineering, Procurement and Construction Contract for the construction of the Stendal mill should have reduced the assessment base for the original investment subsidies granted to the mill by German authorities. The payments were made by the contractor to the Stendal mill to settle certain warranty, performance and remediation claims that the Stendal mill made against the contractor after completion of mill construction in 2004. The amounts currently under review aggregate approximately 8.3 million (\$8,915). Investment subsidies received by the Stendal mill were generally based upon a percentage of the assessment base for subsidies of the mill. If the settlement payments received by the Stendal mill result in a reduction of the assessment base for subsidies under applicable German rules there could be a proportionate reduction in the investment subsidies and the difference could be repayable by the Stendal mill. The Stendal mill believes that it has properly recorded the settlement amounts received from the contractor and that the same do not reduce the assessment base for subsidies of the mill. While it is not reasonably possible to predict the outcome of the legal action and claim, it is the opinion of management that the outcome will not have a material adverse effect on the consolidated financial condition, results of operations or liquidity of the Company.
- (c) The Company is subject to regulations that require the handling and disposal of asbestos in a prescribed manner if a property undergoes a major renovation or demolition. Otherwise, the Company is not required to remove asbestos from its facilities. Generally asbestos is found on steam and condensate piping systems as well as certain cladding on buildings and in building insulation throughout older facilities. The Company's obligation for the proper removal and disposal of asbestos products from the Company's mills is a conditional asset retirement obligation. As a result of the longevity of the Company's mills, due in part to the maintenance procedures and the fact that the Company does not have plans for major changes that require the removal of asbestos, the timing of the asbestos removal is indeterminate. As a result, the Company is currently unable to reasonably estimate the fair value of its asbestos removal and disposal obligation. The Company will recognize a liability in the period in which sufficient information is available to reasonably estimate its fair value.

FORM 10-Q

QUARTERLY REPORT - PAGE 16

NON-GAAP FINANCIAL MEASURES

This quarterly report on Form 10-Q contains non-GAAP financial measures, that is, financial measures that either exclude or include amounts that are not excluded or included in the most directly comparable measure calculated and presented in accordance with the generally accepted accounting principles in the United States, referred to as GAAP. Specifically, we make use of the non-GAAP measure Operating EBITDA.

Operating EBITDA is defined as operating income (loss) plus depreciation and amortization and non-recurring capital asset impairment charges. We use Operating EBITDA as a benchmark measurement of our own operating results and as a benchmark relative to our competitors. We consider it to be a meaningful supplement to operating income as a performance measure primarily because depreciation expense and non-recurring capital asset impairment charges are not actual cash costs, and depreciation expense varies widely from company to company in a manner that we consider largely independent of the underlying cost efficiency of our operating facilities. In addition, we believe Operating EBITDA is commonly used by securities analysts, investors and other interested parties to evaluate our financial performance.

Operating EBITDA does not reflect the impact of a number of items that affect our net income (loss) attributable to common shareholders, including financing costs and the effect of derivative instruments. Operating EBITDA is not a measure of financial performance under GAAP, and should not be considered as an alternative to net income (loss) or income (loss) from operations as a measure of performance, or as an alternative to net cash from operating activities as a measure of liquidity.

Operating EBITDA has significant limitations as an analytical tool, and should not be considered in isolation, or as a substitute for analysis of our results as reported under GAAP. Some of these limitations are that Operating EBITDA does not reflect: (i) our cash expenditures, or future requirements, for capital expenditures or contractual commitments; (ii) changes in, or cash requirements for, working capital needs; (iii) the significant interest expense, or the cash requirements necessary to service interest or principal payments, on our outstanding debt; (iv) noncontrolling interests in our Stendal northern bleached softwood kraft, or NBSK, pulp mill operations prior to our acquisition of 100% of the economic interest of Stendal in September 2014; (v) the impact of realized or marked to market changes in our derivative positions, which can be substantial; and (vi) the impact of impairment charges against our investments or assets. Because of these limitations, Operating EBITDA should only be considered as a supplemental performance measure and should not be considered as a measure of liquidity or cash available to us to invest in the growth of our business. Because all companies do not calculate Operating EBITDA in the same manner, Operating EBITDA as calculated by us may differ from Operating EBITDA or EBITDA as calculated by other companies. We compensate for these limitations by using Operating EBITDA as a supplemental measure of our performance and by relying primarily on our GAAP financial statements.

FORM 10-Q

QUARTERLY REPORT - PAGE 17

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

In this document: (i) unless the context otherwise requires, references to we, our, us, the Company or Mercer mean Mercer International Inc. and its subsidiaries; (ii) references to Mercer Inc. mean the Company excluding its subsidiaries; (iii) information is provided as of March 31, 2015, unless otherwise stated; (iv) all references to \$ mean U.S. dollars, which is our reporting currency, unless otherwise stated; (v) € refers to euros and C\$ refers to Canadian dollars; (vi) ADMTs refers to air-dried metric tonnes; and (vii) MWh refers to megawatt hours.

Results of Operations

General

We operate three northern bleached softwood kraft, referred to as NBSK, pulp mills, being our Rosenthal and Stendal mills located in Germany and our Celgar mill located in Western Canada. We have a consolidated annual production capacity of approximately 1.5 million ADMTs.

The following discussion and analysis of our results of operations and financial condition for the three months ended March 31, 2015 should be read in conjunction with our interim consolidated financial statements and related notes included in this quarterly report, as well as our most recent annual report on Form 10-K for the fiscal year ended December 31, 2014 filed with the Securities and Exchange Commission, referred to as the SEC filing.

Current Market Environment

As our operating costs are primarily incurred in euros and Canadian dollars and our principal product, NBSK pulp, is quoted in U.S. dollars, our business and operating margins materially benefit from the recent strengthening of the U.S. dollar. Such benefit is partially offset by the rapid strengthening of the U.S. dollar putting downward pressure on pulp prices, as a stronger U.S. dollar increases costs to our European and Asian customers. Our energy and chemical sales are made in local currencies and, as a result, our realizations decline in U.S. dollar terms when the U.S. dollar strengthens.

During the current quarter of 2015, the U.S. dollar was 18% and 11% stronger against the euro and Canadian dollar, respectively, compared to the same period of 2014. This in large part contributed to a 20% reduction in our costs and expenses in the first quarter of 2015 from the same quarter of 2014.

In the first quarter of 2015, pulp list prices decreased from the end of 2014 and, at the end of the current quarter, list prices in Europe, North America and China were approximately \$860, \$980 and \$650 per ADMT, respectively.

Currently, the NBSK pulp market is generally balanced with world producer inventories at about 33 days supply.

Looking forward, we currently expect increased demand and improved pricing in China in mid-2015, with pricing in Europe remaining essentially flat.

FORM 10-Q

QUARTERLY REPORT - PAGE 19

Three Months Ended March 31, 2015 Compared to Three Months Ended March 31, 2014

Total revenues for the three months ended March 31, 2015 decreased by approximately 16% to \$257.5 million from \$305.7 million in the same quarter in 2014, primarily due to lower pulp and energy and chemical revenues.

Pulp revenues in the three months ended March 31, 2015 decreased by approximately 16% to \$234.7 million from \$278.5 million in the same quarter of 2014, due to lower sales volumes and lower pulp price realizations.

Energy and chemical revenues decreased by approximately 16% to \$22.9 million in the first quarter of 2015 from \$27.2 million in the same quarter of 2014, primarily due to the impact of a stronger U.S. dollar relative to the euro and Canadian dollar.

Pulp production decreased by approximately 5% to 362,629 ADMTs in the current quarter from 381,785 ADMTs in the same quarter of 2014. In the first quarter of 2015, our Celgar mill had 14 days (approximately 19,200 ADMTs) of annual maintenance downtime. We estimate that such maintenance downtime at our Celgar mill adversely impacted our Operating EBITDA by approximately \$18.3 million, comprised of approximately \$11.4 million in direct out-of-pocket expenses and the balance in reduced production. Many of our competitors that report their financial results using International Financial Reporting Standards capitalize their direct costs of maintenance shutdowns.

Our Stendal mill's annual maintenance shutdown is scheduled for ten days in the second quarter of 2015 and an additional two days in the fourth quarter of 2015. Our Rosenthal mill's annual maintenance shutdown is scheduled for 14 days in the third quarter of 2015.

Pulp sales volumes decreased by approximately 8% to 349,691 ADMTs in the current quarter from 381,355 ADMTs in the same quarter of 2014, primarily due to weaker demand from China. Demand in Europe was steady in the current quarter. List prices for NBSK pulp in both Europe and China trended downwards in the first quarter of 2015, largely due to the strengthening of the U.S. dollar and weaker demand in China. In the first quarter of 2015, list prices in China were also negatively affected by the ramp up of a Russian NBSK pulp mill which aggressively priced its pulp in the Chinese market due to the weakness in the Russian ruble.

Average list prices for NBSK pulp in Europe were approximately \$887 per ADMT in the first quarter of 2015, compared to approximately \$920 per ADMT in the same quarter of 2014. Average list prices for NBSK pulp in North America and China were approximately \$995 per ADMT and \$663 per ADMT, respectively, in the first quarter of 2015, compared to approximately \$1,017 per ADMT and \$757 per ADMT, respectively, in the same quarter of 2014.

Average pulp sales realizations decreased by approximately 8% to \$665 per ADMT in the first quarter of 2015 from approximately \$723 per ADMT in the same quarter last year, primarily due to lower list prices.

Costs and expenses in the current quarter decreased by approximately 20% to \$213.6 million from \$266.4 million in the first quarter of 2014, primarily due to the impact of a stronger U.S. dollar on our euro and Canadian dollar denominated expenses and lower sales volumes, partially offset by higher annual maintenance costs.

FORM 10-Q

QUARTERLY REPORT - PAGE 20

In the first quarter of 2015, operating depreciation and amortization decreased by approximately 12% to \$17.3 million from \$19.7 million in the same quarter of 2014, due to the impact of a stronger U.S. dollar relative to the euro and Canadian dollar.

Selling, general and administrative expenses increased to \$11.4 million in the first quarter of 2015 from \$10.4 million in the same quarter of 2014.

Transportation costs decreased by approximately 21% to \$17.3 million in the current quarter from \$21.9 million in the same quarter of 2014 due to the stronger U.S. dollar.

On average, our overall per unit fiber costs in the current quarter decreased by approximately 18% from the same quarter of 2014, primarily as a result of the strengthening of the U.S. dollar versus the euro and the Canadian dollar more than offsetting increases in Celgar's per unit fiber prices. In the current quarter, in euro terms, fiber prices in Germany were marginally lower than the comparative quarter as a result of a balanced wood market in Germany. In the current quarter, in Canadian dollar terms, fiber prices for our Celgar mill were higher than the comparative quarter due to increased demand for chips from coastal mills in the Celgar mill's fiber procurement region.

In the first quarter of 2015, our operating income increased by approximately 12% to \$43.9 million from \$39.2 million in the same quarter of 2014, primarily due to the positive impact of a stronger U.S. dollar relative to the euro and Canadian dollar, partially offset by lower pulp price realizations and costs associated with annual maintenance downtime.

Interest expense in the current quarter decreased to \$13.9 million from \$17.5 million in the same quarter of 2014.

In the current quarter of 2015, as a result of the strengthening of the U.S. dollar versus the euro, we recorded a non-cash loss on the foreign exchange translation of certain intercompany debt between Mercer Inc. and its wholly-owned subsidiaries which reduced our net income by \$6.6 million, or \$0.10 per share.

In the current quarter, we recorded a non-cash derivative loss of \$0.5 million on the mark to market adjustment of our Stendal mill's interest rate derivative, compared to a non-cash derivative gain of \$3.2 million in the same quarter of 2014.

The noncontrolling shareholder's interest in the Stendal mill's net income, which was eliminated in the third quarter of 2014, was \$2.1 million in the first quarter of last year.

During the first quarter of 2015, we recorded an income tax expense of \$9.3 million, compared to an income tax expense of \$1.9 million in the same quarter of 2014 due to higher taxable income for our German mills.

We reported net income attributable to common shareholders of \$13.6 million, or \$0.21 per basic and diluted share, for the first quarter of 2015, compared to \$21.0 million, or \$0.38 per basic and \$0.37 per diluted share, in the same period of 2014.

FORM 10-Q

QUARTERLY REPORT - PAGE 21

In the first quarter of 2015, Operating EBITDA increased by approximately 4% to \$61.3 million from \$59.0 million in the same quarter of 2014, primarily as a result of the strengthening of the U.S. dollar versus the euro and Canadian dollar, partially offset by lower pulp price realizations and higher annual maintenance costs.

Liquidity and Capital Resources

The following table is a summary of selected financial information as at the dates indicated:

	March 31, 2015	December 31, 2014
	(in thousands)	
Financial Position		
Cash and cash equivalents	\$ 99,843	\$ 53,172
Working capital	\$ 271,656	\$ 262,332
Total assets	\$ 1,233,652	\$ 1,326,807
Long-term liabilities	\$ 760,875	\$ 772,424
Total equity	\$ 341,586	\$ 438,880

As at March 31, 2015, our cash and cash equivalents had increased to \$99.8 million from \$53.2 million at the end of 2014 and our working capital had increased to \$271.7 million from \$262.3 million at the end of 2014.

As at March 31, 2015, we had approximately \$117.8 million available under our revolving credit facilities.

During the current quarter, as a result of the strengthening of the U.S. dollar versus the euro and the Canadian dollar, we recorded a non-cash reduction in the carrying value of our net assets, consisting primarily of our fixed assets, denominated in euros and Canadian dollars. This non-cash reduction of approximately \$111.8 million does not affect our net income, Operating EBITDA or cash flows but is reflected in our other comprehensive income (loss) and as a reduction to our total equity.

Sources and Uses of Funds

Our principal sources of funds are cash flows from operations, cash and cash equivalents on hand and our revolving credit facilities. Our principal uses of funds consist of operating expenditures, capital expenditures and interest payments on our outstanding 7.000% Senior Notes due 2019 and 7.750% Senior Notes due 2022.

Debt Covenants

Certain of our long-term obligations contain various financial tests and covenants customary to these types of arrangements. See our annual report on Form 10-K for the year ended December 31, 2014.

As at March 31, 2015, we were in full compliance with all of the covenants of our indebtedness.

FORM 10-Q

QUARTERLY REPORT - PAGE 22

Cash Flow Analysis

Cash Flows from Operating Activities. We operate in a cyclical industry and our operating cash flows vary accordingly. Our principal operating cash expenditures are for labor, fiber and chemicals.

Working capital levels fluctuate throughout the year and are affected by maintenance downtime, changing sales patterns, seasonality and the timing of receivables and the payment of payables and expenses.

Cash provided by operating activities was \$59.8 million in the first quarter of 2015 and \$59.7 million in the comparative period of 2014. An increase in accounts payable and accrued expenses provided cash of \$27.8 million in the first quarter of 2015, compared to \$22.2 million in the same quarter of 2014. An increase in inventories, excluding non-cash items, used cash of \$4.9 million in the first quarter of 2015, compared to a decrease in inventories providing cash of \$18.7 million in the same quarter of 2014. An increase in receivables, excluding non-cash items, used cash of \$9.6 million in the first quarter of 2015, compared to \$17.3 million in the same period of 2014.

Cash Flows from Investing Activities. Investing activities in the first quarter of 2015 used cash of \$7.7 million, compared to \$8.1 million in the same period of 2014. In the three months ended March 31, 2015, capital expenditures and costs associated with the implementation of the enterprise resource planning system used cash of \$7.9 million, compared to \$8.3 million in the same period of 2014.

Cash Flows from Financing Activities. In the first quarter of 2015, financing activities provided cash of \$0.7 million, compared to using cash of \$26.9 million in the same quarter of 2014. In the first quarter of 2014, principal repayments under our Stendal mill's prior credit facilities, which were paid out in the fourth quarter of 2014, used cash of \$29.8 million and proceeds of government grants provided cash of \$3.3 million.

Capital Commitments and Future Liquidity

Based upon the current level of operations and our current expectations for future periods in light of the current economic environment, and in particular, current and expected pulp pricing and foreign exchange rates, we believe that cash flow from operations and available cash, together with available borrowings, will be adequate to meet our liquidity needs in the next 12 months.

We currently have no material commitments to acquire assets or operating businesses. We anticipate that there may be acquisitions or commitments to capital projects in the future. To achieve the long-term goals of expanding our assets and earnings, additional capital resources may be required. Depending on the size of a transaction or project, the capital resources that will be required can be substantial. The necessary resources will be generated from cash flow from operations, cash on hand, borrowing against our assets or the issuance of securities.

Off-Balance Sheet Arrangements

At March 31, 2015, we did not have any off-balance sheet arrangements (as defined in Item 303(a)(4)(ii) of Regulation S-K).

FORM 10-Q

QUARTERLY REPORT - PAGE 23

Contractual Obligations and Commitments

There were no material changes outside the ordinary course to any of our material contractual obligations during the three months ended March 31, 2015.

Foreign Currency

As we hold certain assets and liabilities in euros and Canadian dollars and the majority of our expenditures are denominated in euros or Canadian dollars, our consolidated financial results are subject to foreign currency exchange rate fluctuations.

We translate foreign denominated assets and liabilities into U.S. dollars at the rate of exchange on the balance sheet date. Equity accounts are translated using historical exchange rates. Unrealized gains or losses from these translations are recorded in our consolidated statement of comprehensive income (loss) and do not affect our net earnings.

In the first quarter of 2015, as a result of the strengthening of the U.S. dollar versus the euro and Canadian dollar, we recorded a non-cash reduction in the carrying value of our net assets, consisting primarily of our fixed assets, denominated in euros and Canadian dollars. As a result, our accumulated other comprehensive loss increased to \$164.1 million.

Based upon the exchange rate at March 31, 2015, the U.S. dollar has strengthened by approximately 22% and 13% in value against the euro and the Canadian dollar, respectively, since March 31, 2014. See [Quantitative and Qualitative Disclosures about Market Risk](#) .

Critical Accounting Policies

The preparation of financial statements and related disclosures in conformity with GAAP requires management to make estimates and assumptions that affect both the amount and the timing of the recording of assets, liabilities, revenues, and expenses in the consolidated financial statements and accompanying note disclosures. Our management routinely makes judgments and estimates about the effects of matters that are inherently uncertain. As the number of variables and assumptions affecting the probable future resolution of the uncertainties increases, these judgments become even more subjective and complex.

Our significant accounting policies are disclosed in Note 1 to our annual report on Form 10-K for the fiscal year ended December 31, 2014. While all of the significant accounting policies are important to the consolidated financial statements, some of these policies may be viewed as having a high degree of judgment. On an ongoing basis, using currently available information, management reviews its estimates, including those related to the accounting for, among other things, pensions and other post-retirement benefit obligations, deferred income taxes (valuation allowance), depreciation and amortization, future cash flows associated with impairment testing for long-lived assets, intercompany loans of a long-term investment nature, legal liabilities and contingencies. Actual results could differ materially from these estimates, and changes in these estimates are recorded when known.

We have identified certain accounting policies that are the most important to the portrayal of our current financial condition and results of operations.

For information about both our significant and critical accounting policies, see our annual report on Form 10-K for the fiscal year ended December 31, 2014.

Cautionary Statement Regarding Forward-Looking Information

The statements in this report that are not reported financial results or other historical information are forward-looking statements within the meaning of the *Private Securities Litigation Reform Act of 1995*, as amended.

Generally, forward-looking statements can be identified by the fact that they do not relate strictly to historical or current facts. They often include words such as expects, anticipates, intends, plans, believes, seeks, estimate, words of similar meaning, or future or conditional verbs, such as will, should, could, or may, although not all forward-looking statements contain these identifying words. Forward-looking statements are based on expectations, forecasts and assumptions by our management and involve a number of risks, uncertainties and other factors, many of which are beyond our control, that could cause actual conditions, events or results to differ significantly from those described in the forward-looking statements. These factors include, but are not limited to, the following:

the highly cyclical nature of our business;

our level of indebtedness could negatively impact our financial condition, results of operations and liquidity;

a weakening of the global economy could adversely affect our business and financial results and have a material adverse effect on our liquidity and capital resources;

cyclical fluctuations in the price and supply of our raw materials could adversely affect our business;

we operate in highly competitive markets;

we are exposed to currency exchange rate and interest rate fluctuations;

we periodically use derivatives to manage certain risks which has caused significant fluctuations in our operating results;

we are subject to extensive environmental regulation and we could have environmental liabilities at our facilities;

our business is subject to risks associated with climate change and social and government responses thereto;

our new enterprise resource planning system may cost more than expected, be delayed, fail to perform as planned and interrupt operational transactions during and following the implementation, which could adversely affect our operations and results of operations;

our operations require substantial capital and we may be unable to maintain adequate capital resources to provide for such requirements;

future acquisitions may result in additional risks and uncertainties in our business;

FORM 10-Q

QUARTERLY REPORT - PAGE 25

changes in credit ratings issued by nationally recognized statistical rating organizations could adversely affect our cost of financing and have an adverse effect on the market price of our securities;

we are subject to risks related to our employees;

we rely on German federal and state government grants and participate in German and European statutory energy programs;

we are dependent on key personnel;

we may experience material disruptions to our production (including as a result of, among other things, planned and unplanned maintenance shutdowns);

if our long-lived assets become impaired, we may be required to record non-cash impairment that could have a material impact on our results of operations;

we may incur losses as a result of unforeseen or catastrophic events, including the emergence of a pandemic, terrorist attacks or natural disasters;

our insurance coverage may not be adequate;

we rely on third parties for transportation services;

failures or security breaches of our information technology systems could disrupt our operations and negatively impact our business;

the price of our common stock may be volatile; and

a small number of our shareholders could significantly influence our business.

Given these uncertainties, you should not place undue reliance on our forward-looking statements. The forgoing review of important factors is not exhaustive or necessarily in order of importance and should be read in conjunction with the risks and assumptions including those set forth in reports and other documents we have filed with or furnished to the SEC, including in our annual report on Form 10-K for the fiscal year ended December 31, 2014. We advise you that these cautionary remarks expressly qualify in their entirety all forward-looking statements attributable to us or persons acting on our behalf. Unless required by law, we do not assume any obligation to update forward-looking statements based on unanticipated events or changed expectations. However, you should carefully review the reports and other documents we file from time to time with the SEC.

Cyclical Nature of Business

Revenues

The pulp business is highly cyclical in nature and markets are characterized by periods of supply and demand imbalance, which in turn affects prices. Pulp markets are highly competitive and are sensitive to cyclical changes in the global economy, industry capacity and foreign exchange rates, all of which can have a significant influence on selling prices and our operating results. The length and magnitude of industry cycles have varied over time but generally reflect changes in macro-economic conditions and levels of industry capacity. Pulp is a commodity that is generally available from other producers. Because commodity products have few distinguishing qualities from producer to producer, competition is generally based upon price, which is generally determined by supply relative to demand.

FORM 10-Q

QUARTERLY REPORT - PAGE 26

Industry capacity can fluctuate as changing industry conditions can influence producers to idle production capacity or permanently close mills. In addition, to avoid substantial cash costs in idling or closing a mill, some producers will choose to operate at a loss, sometimes even a cash loss, which can prolong weak pricing environments due to oversupply. Oversupply of our products can also result from producers introducing new capacity in response to favorable pricing trends. Certain integrated pulp and paper producers have the ability to discontinue paper production by idling their paper machines and selling their NBSK pulp production on the market if market conditions, prices and trends warrant such actions.

By the end of 2015, the global supply of bleached hardwood kraft pulp is projected to increase by approximately 0.7 million ADMTs, primarily from South America. This increase in bleached hardwood kraft pulp is largely targeted at the growing demand for pulp in developing markets, particularly in China, by producers of tissues, specialty papers and packaging. If such additional bleached hardwood kraft pulp supply is not absorbed by such demand growth, as a result of generally lower prices for bleached hardwood kraft pulp, this supply increase could put downward pressure on NBSK pulp prices.

Demand for pulp has historically been determined primarily by general global macroeconomic conditions and has been closely tied to overall business activity. NBSK pulp prices can fluctuate widely over time. Between 2005 and 2014, European list prices for NBSK pulp have fluctuated between a low of approximately \$575 per ADMT in 2009 to a high of \$1,030 per ADMT in 2011.

In 2012, pulp prices declined sharply, primarily due to economic uncertainty in Europe and credit tightening in China. Economic uncertainty in Europe and China, respectively, impacted both demand and prices. At the end of 2012, list prices were approximately \$810 per ADMT in Europe, \$870 per ADMT in North America and \$655 per ADMT in China. At the end of 2013, list prices had increased to \$905 per ADMT in Europe, \$990 per ADMT in North America and \$750 per ADMT in China. In 2014, list prices were on average approximately 7% higher than 2013. During the three months ended March 31, 2015, pulp prices decreased from the end of 2014. As at March 31, 2015, list prices for NBSK pulp were approximately \$860 per ADMT in Europe, \$980 per ADMT in North America and \$650 per ADMT in China.

A producer's actual sales price realizations are list prices net of customer discounts, rebates and other selling concessions. Over the last three years, these have increased as producers compete for customers and sales. Our sales price realizations may also be affected by NBSK price movements between the order and shipment dates.

Accordingly, prices for pulp are driven by many factors outside our control and we have little influence over the timing and extent of price changes, which are often volatile. Prices may fall below our cash production costs, requiring us to either incur short-term losses on product sales or cease production at one or more of our mills. Therefore, our profitability depends on managing our cost structure, particularly our costs for raw materials which represent a significant component of our operating costs and can fluctuate based upon factors beyond our control. If the prices of our products decline, or if prices for our raw materials increase, or both, our results of operations and cash flows could be materially adversely affected.

FORM 10-Q

QUARTERLY REPORT - PAGE 27

Costs

Our production costs are influenced by the availability and cost of raw materials, energy and labor and our plant efficiencies and productivity. Our main raw material is fiber in the form of wood chips and pulp logs. Wood chip and pulp log costs are primarily affected by the supply of, and demand for, lumber and pulp, which are both cyclical, and, to a lesser extent, by increasing demand from renewable energy producers. Higher fiber costs could affect our margins if we are unable to pass along price increases to our pulp customers or purchasers of surplus energy. The state of lumber markets affects both the amount of sawmill residuals, such as chips, produced as a by-product of lumber and the level of timber harvesting, which provides us with pulp logs. Production costs also depend on the total volume of production. Lower operating rates during periods of cyclically low demand result in higher average production costs and lower margins.

Currency

The majority of our sales are in products quoted in U.S. dollars while most of our operating costs and expenses, other than those of the Celgar mill, are incurred in euros. In addition, all of the products sold by the Celgar mill are quoted in U.S. dollars and the Celgar mill's costs are primarily incurred in Canadian dollars. Our results of operations and financial condition are reported in U.S. dollars. As a result, our expenses are reduced by an increase in the value of the U.S. dollar relative to the euro and to the Canadian dollar. Such a shift in the U.S. dollar relative to the euro and the Canadian dollar improves our operating margins and the cash flow available to fund our operations. Conversely, a weakening of the U.S. dollar to the euro and the Canadian dollar reduces our operating margins and the cash flow available to fund our operations. This could have a material adverse effect on our business, financial condition, results of operations and cash flows.

FORM 10-Q

QUARTERLY REPORT - PAGE 28

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to market risks from changes in interest rates and foreign currency exchange rates, particularly the exchange rates between the U.S. dollar and each of the euro and the Canadian dollar. Changes in these rates may affect our results of operations and financial condition and, consequently, our fair value. We seek to manage these risks through internal risk management policies as well as the periodic use of derivatives. We may use derivatives to reduce or limit our exposure to interest rate and currency risks. We may also use derivatives to reduce or limit our exposure to fluctuations in pulp prices. We use derivatives to reduce our potential losses or to augment our potential gains, depending on our management's perception of future economic events and developments. These types of derivatives are generally highly speculative in nature. They are also very volatile as they are highly leveraged given that margin requirements are relatively low in proportion to notional amounts.

Many of our strategies, including the use of derivatives, and the types of derivatives selected by us, are based on historical trading patterns and correlations and our management's expectations of future events. However, these strategies may not be effective in all market environments or against all types of risks. Unexpected market developments may affect our risk management strategies during this time and unanticipated developments could impact our risk management strategies in the future. If any of the variety of instruments and strategies we utilize is not effective, we may incur significant losses.

All of our derivatives are marked to market at the end of each reporting period and all unrealized gains and losses are recognized in earnings for a reporting period. We determine market valuations based primarily upon observable inputs, including applicable yield curves.

During the three months ended March 31, 2015, we recorded a non-cash unrealized loss of approximately \$0.5 million on our outstanding interest rate derivative, compared to a non-cash unrealized gain of \$3.2 million in the same quarter of 2014.

We are also subject to some energy price risk, primarily for the natural gas and electricity that our operations purchase. Our electricity price risks are mitigated by the ability of all of our mills to produce renewable energy.

For additional information, please refer to Part II, Item 7A. Quantitative and Qualitative Disclosures about Market Risk included in our annual report on Form 10-K for the fiscal year ended December 31, 2014.

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

Our management, with the participation of our principal executive officer and principal financial officer, has evaluated the effectiveness of our disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the *Securities Exchange Act of 1934*, as amended, referred to as the Exchange Act), as of the end of the period covered by this report. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed in the reports we file or submit under the Exchange Act is accumulated and communicated to management, including our principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required disclosure. Based on such evaluation, our principal executive officer and principal financial officer have concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were effective in recording, processing, summarizing and reporting, on a timely basis, information required to be disclosed by us in the reports that we file or submit under the Exchange Act.

It should be noted that any system of controls is based in part upon certain assumptions designed to obtain reasonable (and not absolute) assurance as to its effectiveness and there can be no assurance that any design will succeed in achieving its stated goals.

Changes in Internal Controls

There have been no changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the period covered by this report that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

QUARTERLY REPORT - PAGE 30

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

We are subject to routine litigation incidental to our business, including that which is described in our latest annual report on Form 10-K for the fiscal year ended December 31, 2014. We do not believe that the outcome of such litigation will have a material adverse effect on our business or financial condition.

ITEM 1A. RISK FACTORS

As of March 31, 2015, there have been no material changes to the factors disclosed in Item 1A. Risk Factors in our latest annual report on Form 10-K for the fiscal year ended December 31, 2014.

ITEM 2. UNREGISTERED SALE OF EQUITY SECURITIES AND USE OF PROCEEDS

None.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. MINE SAFETY DISCLOSURES

None.

ITEM 5. OTHER INFORMATION

None.

QUARTERLY REPORT - PAGE 31

ITEM 6. EXHIBITS

Exhibit No.	Description
10.1	Employment Agreement dated October 20, 2005 between Mercer Pulp Sales GmbH and David Cooper
31.1	Section 302 Certification of Chief Executive Officer
31.2	Section 302 Certification of Chief Financial Officer
32.1*	Section 906 Certification of Chief Executive Officer
32.2*	Section 906 Certification of Chief Financial Officer
101	The following financial statements from the Company's Form 10-Q for the fiscal quarter ended March 31, 2015, formatted in XBRL: (i) Interim Consolidated Balance Sheets; (ii) Interim Consolidated Statements of Operations; (iii) Interim Consolidated Statements of Retained Earnings; (iv) Interim Consolidated Statements of Comprehensive Income (Loss); (v) Interim Consolidated Statements of Cash Flows; and (vi) Notes to Interim Consolidated Financial Statements.

* In accordance with Release No. 33-8212 of the SEC, these Certifications: (i) are furnished to the SEC and are not filed for the purposes of liability under the Securities Exchange Act of 1934, as amended; and (ii) are not to be subject to automatic incorporation by reference into any of the Company's registration statements filed under the Securities Act of 1933, as amended, for the purposes of liability thereunder or any offering memorandum, unless the Company specifically incorporates them by reference therein.
