Private Securities Litigation Reform Act Safe Harbor Statement

In addition to historical information, this report contains statements by us with regard to our expectations as to financial results and other aspects of our business that involve risks and uncertainties and may constitute forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934.

Forward-looking statements are presented for illustrative purposes only and reflect our current expectations concerning future results and events. All statements other than statements of historical fact are forward-looking statements for purposes of federal and state securities laws, including, without limitation, any projections of earnings, revenues or other financial items; any statements of the plans, strategies and objectives of management for future operations; any statements concerning proposed new services or developments; any statements regarding future economic conditions or performance; any statements of belief; and any statements of assumptions underlying any of the foregoing.

You can identify forward-looking statements by our use of words such as anticipates, believes, continues, expects, intends, likely, may, opportunity, plans, potential, project, will, could, would, should, seeks, similar expressions which identify forward-looking statements, whether in the negative or the affirmative. We cannot guarantee that we actually will achieve these plans, intentions or expectations. These forward-looking statements are subject to risks, uncertainties and other factors, some of which are beyond our control, which could cause actual

results to differ materially from those forecasted or anticipated in such forward-looking statements. You should not place undue reliance on these forward-looking statements, which reflect our view only as of the date of this report. We undertake no obligation to update these statements or publicly release the result of any revision(s) to these statements to reflect events or circumstances after the date of this report or to reflect the occurrence of unanticipated events.

Key risks to our company are described in our Annual Report on Form 10-K filed with the Securities and Exchange Commission on February 26, 2016 and as may be supplemented by the risks described under Part II, Item 1A, of our quarterly reports on Form 10-Q and in our Current Reports on Form 8-K.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

THREE MONTHS ENDED MARCH 31, 2016 AND 2015

1. BASIS OF PRESENTATION AND SIGNIFICANT POLICIES

The condensed consolidated interim unaudited financial statements included herein have been prepared by Entercom Communications Corp. and its subsidiaries (collectively, the Company) in accordance with: (i) generally accepted accounting principles (U.S. GAAP) for interim financial information; and (ii) the instructions of the Securities and Exchange Commission (the SEC) for Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for annual financial statements. In the opinion of management, the financial statements reflect all adjustments considered necessary for a fair statement of the results of operations and financial position for the interim periods presented. All such adjustments are of a normal and recurring nature. The Company's results are subject to seasonal fluctuations and, therefore, the results shown on an interim basis are not necessarily indicative of results for a full year.

This Form 10-Q should be read in conjunction with the financial statements and related notes included in the Company's audited financial statements as of and for the year ended December 31, 2015 and filed with the SEC on February 26, 2016, as part of the Company's Annual Report on Form 10-K. Certain information and footnote disclosures normally included in financial statements prepared in accordance with U.S. GAAP have been condensed or omitted pursuant to such rules and regulations.

There have been no material changes from Note 2, Significant Accounting Policies, as described in the notes to the Company's financial statements contained in its Form 10-K for the year ended December 31, 2015 that was filed with the SEC on February 26, 2016.

Recent Accounting Pronouncements

All new accounting pronouncements that are in effect that may impact the Company's financial statements have been implemented. The Company does not believe that there are any other new accounting pronouncements that have been issued, other than a few of the ones listed below or those included in the notes to the Company's financial statements contained in its Form 10-K for the year ended December 31, 2015 that was filed with the SEC on February 26, 2016, that might have a material impact on the Company's financial position, results of operations or cash flows.

Stock-Based Compensation Simplification

In March 2016, the accounting guidance for stock-based compensation was simplified to require the recognition of the income tax effects of awards in the income statement when stock-based awards vest. The guidance on employers accounting for an employee's use of shares to satisfy the employer's statutory income tax withholding obligation and for forfeitures is also changing. This guidance is effective for the Company as of January 1, 2017. The Company is currently evaluating the impact this guidance will have on the Company's results of operations, cash flows or financial position.

Leasing Transactions

In February 2016, the accounting guidance was modified to require that all leases with a term of more than one year, covering leased assets such as real estate, broadcasting towers and equipment, be reflected on the balance sheet as assets and liabilities for the rights and obligations created by these leases. While the Company is currently reviewing the effects of this guidance, the Company believes that this would result in: (1) an increase in the assets and liabilities reflected on the Company's consolidated balance sheets; and (2) an increase in the Company's interest expense and depreciation and amortization expense and a decrease to the Company's station operating expense reflected on its consolidated statements of operations. This guidance is effective for the Company as of January 1, 2019.

Table of Contents

Revenue Recognition

In May 2014 the accounting guidance for revenue recognition was modified. Under the guidance, an entity should recognize revenue to depict the transfer of goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The guidance also requires additional disclosure about the nature, amount, timing and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments and assets recognized from costs incurred to obtain or fulfill a contract. The guidance will be applied using one of two retrospective methods. The guidance is effective for the Company as of January 1, 2018. The Company has not determined the potential effects of this guidance on its financial statements.

The following accounting pronouncements were effective for the Company as of January 1, 2016.

Business Combinations

In September 2015, the accounting guidance for business combinations was modified to reflect measurement period adjustments to be recorded prospectively rather than retroactively to the assets and liabilities initially recorded under purchase price accounting. This guidance was effective for the Company as of January 1, 2016. This guidance did not have an impact on the Company's financial position and results of operations, but could have an impact in a future period when an adjustment is recorded for a previously reported business combination. There should be no material impact to the Company's cash flows.

Cloud Computing Costs

In April 2015, the accounting guidance was revised to identify when a cloud computing service includes a software license that is to be capitalized and treated consistently with the acquisition of other software licenses. This guidance was effective for the Company as of January 1, 2016. The adoption of this accounting guidance did not have any material effect on the Company's results of operations, cash flows or financial condition.

Debt Issuance Costs

In April 2015, the accounting guidance was amended to modify the presentation of debt issuance costs on the balance sheet by requiring that all costs, including incremental third-party costs, be reflected as an offset to the associated debt liability rather than as a deferred charge. This guidance was effective for the Company as of January 1, 2016. The impact of this guidance was to reclassify debt issuance costs (other than for line-of credit arrangements) from other assets to the respective long-term debt liability for balance sheet presentation purposes only and had no impact on the Company's results of operations, cash flows or financial condition. In addition, certain reclassifications were recorded to the prior year's balance sheet to conform to the presentation in the current year, which did not have a material impact on the Company's previously reported financial statements.

Consolidation

In February 2015, the accounting guidance for consolidation was amended which revises the analysis of and reduces the need to consolidate certain entities. This guidance was effective for the Company as of January 1, 2016. This accounting guidance did not have any material effect on the Company's results of operations, cash flows or financial condition.

Extraordinary Items

In January 2015, the accounting guidance was updated to eliminate the concept of an extraordinary item and the requirement to consider whether an underlying event or transaction is extraordinary. If an item is considered extraordinary, it is presented in the income statement net of tax, after income from continuing operations. Eliminating the concept of extraordinary removes the uncertainty for the preparer as to whether the item had been treated properly. This guidance was effective for the Company as of January 1, 2016. The Company will apply this guidance prospectively to all applicable transactions. When applied, this guidance should have no impact to the Company's cash flows or financial condition as this only impacts the Company's presentation on the Company's results of operations.

Table of Contents

Derivatives And Hedging

In November 2014, the accounting guidance was updated for determining whether the host contract in a hybrid financial instrument issued in the form of a share is more akin to debt or to equity. This update does not change the current criteria for determining when separation of certain embedded derivative features in a hybrid financial instrument is required, but clarifies how current accounting guidance should be interpreted in the evaluation of the economic characteristics and risks of a host contract in a hybrid financial instrument that is issued in the form of a share, reducing existing diversity in practice. This guidance was effective for the Company as of January 1, 2016. The adoption of this accounting guidance did not have any material effect on the Company's results of operations, cash flows or financial condition.

Stock-Based Performance Awards

In June 2014, the accounting guidance was updated for stock-based awards when the terms of an award provide that a performance target that affects vesting could be achieved after the requisite service period. The current accounting standard for stock-based compensation as it applies to awards with performance conditions should be applied. This guidance was effective for the Company as of January 1, 2016. The adoption of this accounting guidance did not have any material effect on the Company's results of operations, cash flows or financial condition.

Reclassifications

Certain reclassifications have been made to the prior year's financial statements to conform to the presentation in the current year (see accounting pronouncement on debt issuance costs).

2. INTANGIBLE ASSETS AND GOODWILL

Goodwill and certain intangible assets are not amortized for book purposes. They may be, however, amortized for tax purposes. The Company accounts for its acquired broadcasting licenses as indefinite-lived intangible assets and, similar to goodwill, these assets are reviewed at least annually for impairment. At the time of each review, if the fair value is less than the carrying value of goodwill and certain intangibles (such as broadcasting licenses), then a charge is recorded to the results of operations.

There was no material change in the carrying value of broadcasting licenses or goodwill since the year ended December 31, 2015.

Broadcasting Licenses Impairment Test

The Company performs its annual broadcasting license impairment test during the second quarter of each year by evaluating its broadcasting licenses for impairment at the market level using the direct method.

There were no events or circumstances since the Company's prior year second quarter annual broadcasting licenses test that required the Company to re-test the carrying value of its broadcasting licenses.

Goodwill Impairment Test

The Company performs its annual goodwill impairment test during the second quarter of each year by assessing goodwill in each of the Company's markets after determining that a radio market is a reporting unit.

There were no events or circumstances since the Company's prior year second quarter annual goodwill test that required the Company to re-test the carrying value of its goodwill.

4. LONG-TERM DEBT**(A) Senior Debt****The Credit Facility**

As of March 31, 2016, the amount outstanding under the term loan component (the Term B Loan) of the Company's senior secured credit facility (the Credit Facility) was \$236.9 million and the amount outstanding under the revolving credit facility (the Revolver) of the Credit Facility was \$13.5 million. The amount available under the Revolver, which includes the impact of outstanding letters of credit, was \$25.8 million as of March 31, 2016.

On November 23, 2011, the Company entered into a credit agreement with a syndicate of lenders for a \$425 million Credit Facility that was initially comprised of: (a) a \$50 million Revolver (reduced to \$40 million in December 2015) that matures on November 23, 2016; and (b) a \$375 million Term B Loan that matures on November 23, 2018.

Long-term debt, excluding deferred financing expense on the Revolver, was comprised of the following:

	Long-Term Debt

Outstanding standby letter of credit	\$ 670	\$ 670

The Term B Loan requires mandatory prepayments equal to a percentage of Excess Cash Flow, which is defined within the agreement and is subject to incremental step-downs depending on the Consolidated Leverage

Table of Contents

Ratio. The payment, which is currently estimated at 25% of Excess Cash Flow, is due in the first quarter of each year for the prior year and is included under the current portion of long-term debt, net of any prepayments made through March 31, 2016. The Company expects to fund the payment using cash from operating activities.

As of March 31, 2016, the Company is in compliance with all financial covenants and all other terms of the Credit Facility in all material respects. The Company's ability to maintain compliance with its covenants under the Credit Facility is highly dependent on its results of operations. Management believes that over the next 12 months the Company can continue to maintain compliance. The Company's operating cash flow is positive, and management believes that it is adequate to fund the Company's operating needs. Management believes that the Company can meet its liquidity requirements over the next 12 months, including its debt repayments.

Failure to comply with the Company's financial covenants or other terms of its Credit Facility and any subsequent failure to negotiate and obtain any required relief from its lenders could result in a default under the Company's Credit Facility. Any event of default could have a material adverse effect on the Company's business and financial condition. In addition, a default under either the Company's Credit Facility or the indenture governing the Company's 10.5% senior unsecured notes (the "Senior Notes") could cause a cross default in the other and result in the acceleration of the maturity of all outstanding debt. The acceleration of the Company's debt could have a material adverse effect on its business. The Company may seek from time to time to amend its Credit Facility or obtain other funding or additional funding, which may result in higher interest rates on its debt.

As of March 31, 2016, the Company's Consolidated Leverage Ratio was 4.0 times versus a covenant limit of 4.50 times and the Consolidated Interest Coverage Ratio was 3.2 times versus a covenant minimum of 2.0 times.

(B) Senior Unsecured Debt

The Senior Notes

The Senior Notes may be redeemed at any time at a redemption price of 105.25% of the principal amount plus accrued interest. The redemption price decreases December 1, 2016 and December 1, 2017 to 102.625% and 100.0%, respectively.

On November 23, 2011, the Company issued \$220.0 million of 10.5% unsecured Senior Notes which mature on December 1, 2019. The Company received net proceeds of \$212.7 million, which included a discount of \$2.9 million, and incurred deferred financing costs of \$6.1 million. These amounts are amortized over the term under the effective interest rate method. Interest on the Senior Notes is payable semi-annually in arrears on June 1 and December 1 of each year.

RSUs With Service And Market Conditions

The Company issued RSUs with service and market conditions that are included in the table above. These shares vest if: (1) the Company's stock achieves certain shareholder performance targets over a defined measurement period; and (2) the employee fulfills a minimum service period. The compensation expense is recognized even if the market conditions are not satisfied and are only reversed in the event the service period is not met, as all of the conditions need to be satisfied. These RSUs are amortized over the longest of the explicit, implicit or derived service periods, which range from one to three years.

Table of Contents

The following table presents the changes in outstanding RSUs with market conditions:

	Three Months Ended March 31, 2016	Year Ended December 31, 2015
(amounts in thousands, except per share data)		
<u>Reconciliation Of RSUs With Market Conditions</u>

End of period balance	185	390
Average fair value of RSUs granted with market conditions	\$ 5.45	\$ 8.39

The fair value of RSUs with service conditions is estimated using the Company's closing stock price on the date of the grant. To determine the fair value of RSUs with service and market conditions, the Company used the Monte Carlo simulation lattice model. The Company's determination of the fair value was based on the number of shares granted, the Company's stock price on the date of grant and certain assumptions regarding a number of highly complex and subjective variables. If other reasonable assumptions were used, the results could differ.

The specific assumptions used for these valuations are as follows:

	Three Months Ended March 31, 2016	Year Ended December 31, 2015
Expected Volatility Term Structure ⁽¹⁾	36% to 45%	34% to 39%
Risk-Free Interest Rate ⁽²⁾	0.5% to 1.1%	0.1% to 1.1%
Dividend Yield ⁽³⁾	0.0%	0.0%

(1) Expected Volatility Term Structure - The Company estimated the volatility term structure using: (1) the historical volatility of its stock; and (2) the implied volatility provided by its traded options from a trailing month's average of the closing bid-ask price quotes.

(2) Risk-Free Interest Rate - The Company estimated the risk-free interest rate based upon the implied yield available on U.S. Treasury issues using the Treasury bond rate as of the date of grant.

- (3) Dividend Yield - The Company calculated the dividend yield at the time of grant based upon the Company's most recent history of not paying a dividend on its common stock.

RSUs With Service And Performance Conditions

In addition to the RSUs included in the table above summarizing the activity in RSUs under the Plan, the Company issued RSUs with both service and performance conditions. Vesting of performance-based awards, if any, is dependent upon the achievement of certain performance targets. If the performance standards are not achieved, all unvested shares will expire and any accrued expense will be reversed. The Company determines the requisite service period on a case-by-case basis to determine the expense recognition period for non-vested performance based RSUs. The fair value is determined based upon the closing price of the Company's common stock on the date of grant. The Company applies a quarterly probability assessment in computing its non-cash compensation expense and any change in the estimate is reflected as a cumulative adjustment to expense in the quarter of the change.

Table of Contents

The following table reflects the activity of RSUs with service and performance conditions:

Table of Contents**7. INCOME TAXES****Tax Rate For The Three Months Ended March 31, 2016**

The effective income tax rate was 17.6% for the three months ended March 31, 2016, which was impacted by discrete income tax benefits from recent legislation in certain single member states that allowed for: (1) the reversal of partial valuation allowances; and (2) a retroactive decrease in deferred tax liabilities associated with non-amortizable assets such as broadcasting licenses and goodwill. The income tax rate was also impacted by income tax expense from: (i) an increase in deferred tax liabilities associated with non-amortizable assets such as broadcasting licenses and goodwill; (ii) an adjustment for expenses that are not deductible for tax purposes; and (iii) a tax benefit shortfall associated with share-based awards.

Tax Rate For The Three Months Ended March 31, 2015

The effective income tax rate was not a meaningful number for the three months ended March 31, 2015, and was impacted by discrete tax expense from: (1) legislation that increased the deferred tax liabilities associated with non-amortizable assets such as broadcasting licenses and goodwill; and (2) a tax benefit shortfall associated with share-based awards. The impact of discrete items to the income tax rate is typically substantially greater in the first quarter of the year as income before taxes is the lowest as compared to subsequent quarters.

Net Deferred Tax Assets And Liabilities

As of March 31, 2016 and December 31, 2015, net deferred tax liabilities were \$79.0 million and \$78.2 million, respectively. The income tax accounting process to determine the deferred tax liabilities involves estimating all temporary differences between the tax and financial reporting bases of the Company's assets and liabilities, based on enacted tax laws and statutory tax rates applicable to the period in which the differences are expected to affect taxable income. The Company estimated the current exposure by assessing the temporary differences and computing the provision for income taxes by applying the estimated effective tax rate to income.

8. FAIR VALUE OF FINANCIAL INSTRUMENTS**Fair Value Of Financial Instruments Subject To Fair Value Measurements****Recurring Fair Value Measurements**

The following table sets forth the Company's financial assets and/or liabilities that were accounted for at fair value on a recurring basis and are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. The Company's assessment of the significance of a particular input to the fair value measurement requires judgment and may affect the valuation of fair value and its placement within the fair value hierarchy levels.

Description	Value Measurements At Reporting Date	
	March 31, 2016	December 31, 2015
	(amounts in thousands)	
Liabilities		
Deferred compensation - Level 1 ⁽¹⁾	\$ 9,851	\$ 10,137

- (1) The Company's deferred compensation liability, which is included in other long-term liabilities, is recorded at fair value on a recurring basis. The unfunded plan allows participants to hypothetically invest in various specified investment options. The deferred compensation plan liability is valued at Level 1 as it is based on quoted market prices of the underlying investments.

Table of Contents**Fair Value Of Financial Instruments Subject To Disclosures**

The carrying amount of the following assets and liabilities approximates fair value due to the short maturity of these instruments: (1) cash and cash equivalents; (2) accounts receivable; and (3) accounts payable, including accrued liabilities.

The following table presents the carrying value of financial instruments and, where practicable, the fair value as of the periods indicated:

	March 31, 2016		December 31, 2015	
	Carrying Value	Fair Value	Carrying Value	Fair Value
	(amounts in thousands)			
Term B Loan ⁽¹⁾	\$ 236,918	\$ 237,214	\$ 242,750	\$ 242,447
Revolver ⁽²⁾	\$ 13,500	\$ 13,500	\$ 26,000	\$ 26,000
Senior Notes ⁽³⁾	\$ 218,360	\$ 227,094	\$ 218,269	\$ 227,000
Other debt ⁽⁴⁾	\$ 97		\$	
Letters of credit ⁽⁵⁾	\$ 670		\$ 670	

The following methods and assumptions were used to estimate the fair value of financial instruments:

- (1) The Company's determination of the fair value of the Term B Loan was based on quoted prices for this instrument and is considered a Level 2 measurement as the pricing inputs are other than quoted prices in active markets.
- (2) The fair value of the Revolver is considered to approximate the carrying value as the interest payments are based on LIBOR rates that reset periodically. The Revolver is considered a Level 2 measurement as the pricing inputs are other than quoted prices in active markets.
- (3) The Company utilizes a Level 2 valuation input based upon the market trading prices of the Senior Notes to compute the fair value as these Senior Notes are traded in the debt securities market. The Senior Notes are considered a Level 2 measurement as the pricing inputs are other than quoted prices in active markets.
- (4) The Company does not believe it is practicable to estimate the fair value of the other debt.
- (5) The Company does not believe it is practicable to estimate the fair value of the outstanding standby letters of credit.

9. BUSINESS COMBINATIONS

The Company consummated acquisitions under the purchase method of accounting, and the purchase price was allocated to the assets and liabilities based upon their respective fair values as determined as of the acquisition date. Merger and acquisition costs are excluded from the purchase price as these costs are expensed for book purposes and amortized for tax purposes.

There were no acquisitions during the three months ended March 31, 2016.

Table of Contents**Disposition**

In March 2016, the Company sold certain assets of KRWZ AM in Denver, Colorado, for \$3.8 million in cash. The agreement was entered into in December 2015. The Company believes that the sale of this station, with a marginal market share, will not alter the Company's competitive position in the market. The Company reported a gain, net of expenses, of \$0.3 million on the disposition of these assets.

Merger And Acquisition Costs And Restructuring Charges

Merger and acquisition costs and restructuring charges were expensed as a separate line item in the statement of operations. These costs consisted primarily of legal, professional, advisory services and restructuring costs (as identified below) related to the Company's integration of its acquisitions in 2015.

The restructuring plan included: (1) costs associated with exiting contractual vendor obligations as these obligations were duplicative; (2) a workforce reduction and realignment charges that included one-time termination benefits and related costs; and (3) lease abandonment costs. The lease abandonment costs are longer-term as the lease expires in June 2026. The estimated amount of unpaid restructuring charges as of March 31, 2016, after excluding the lease abandonment liability as of March 31, 2016, was included in accrued expenses as most expenses are expected to be paid within one year.

Unaudited Pro Forma Summary Of Financial Information

The following pro forma information presents the consolidated results of operations as if the business combinations in 2015 had occurred as of January 1, 2014, after giving effect to certain adjustments, including: (1) depreciation and amortization of assets; (2) amortization of unfavorable contracts related to the fair value adjustments of the assets acquired; (3) change in the effective tax rate; (4) interest expense on any debt incurred; (5) merger and acquisition costs and restructuring charges; and (6) accrued dividends on perpetual cumulative convertible preferred stock. For purposes of this presentation, the pro forma data: (a) excludes certain radio stations that were acquired and immediately disposed as the Company never operated these stations and does not expect to

10. ASSETS HELD FOR SALE

Long-lived assets to be sold are classified as held for sale in the period in which they meet all the criteria for the disposal of long-lived assets. The Company measures assets held for sale at the lower of their carrying amount or fair value less cost to sell. Additionally, the Company determined that these assets comprise operations and cash flows that can be clearly distinguished, operationally and for financial reporting purposes, from the rest of the Company. As of March 31, 2016, the Company classified assets held for sale, which primarily reflect: (1) land, building and a tower at a tower/antenna site to be sold to a government agency; and (2) land and a building that the Company formerly used as its main studio facility in one of its markets and a co-located tower/antenna structure for two of its AM radio stations that the Company plans to relocate to other suitable sites.

The major categories of these assets are as follows:

11. CONTINGENCIES AND COMMITMENTS

Contingencies

The Company is subject to various outstanding claims which arise in the ordinary course of business and to other legal proceedings. Management anticipates that any potential liability of the Company, which may arise out of or with respect to these matters, will not materially affect the Company's financial position, results of operations or cash flows. There were no material changes from the contingencies listed in the Company's Form 10-K, filed with the SEC on February 26, 2016.

12. SUBSEQUENT EVENTS

Events occurring after March 31, 2016 and through the date that these consolidated financial statements were issued were evaluated to ensure that any subsequent events that met the criteria for recognition have been included.

The Company's Board of Directors approved a \$0.075 per share dividend payable on June 15, 2016 for those shareholders of record as of May 25, 2016.

ITEM 2. Management's Discussion And Analysis Of Financial Condition And Results Of Operations

In preparing the discussion and analysis contained in this Item 2, we presume that readers have read or have access to the discussion and analysis contained in our Annual Report on Form 10-K filed with the Securities and Exchange Commission (the SEC) on February 26, 2016. In addition, you should read the following discussion and analysis of our financial condition and results of operations in conjunction with our consolidated financial statements and related notes included elsewhere in this report. Our results of operations during the relevant periods represent the operations of the radio stations owned or operated by us.

Results Of Operations For The Year-To-Date

The following significant factors affected our results of operations for the three months ended March 31, 2016 as compared to the three months ended March 31, 2015:

On July 16, 2015, we acquired the stock of Lincoln Financial Media Company (Lincoln), which operated radio stations serving the Atlanta, Denver, Miami and San Diego markets (the Lincoln Acquisition). The Lincoln Acquisition (other than certain of the Denver stations operated by Bonneville International Corporation (Bonneville) as described below) increased our net revenues, station operating expenses, depreciation and amortization and interest expense.

We agreed with Bonneville to exchange certain radio stations in Denver for a radio station in Los Angeles (the Bonneville Exchange). Pursuant to a time brokerage agreement (TBA), on July 17, 2015, we commenced operations of a radio station in Los Angeles, which increased our net revenues and station operating expenses. That same day, Bonneville commenced operations of certain of our Denver radio stations. This resulted in a decrease to our net revenues and station operating expenses and an increase to our TBA income.

On July 16, 2015, we issued \$27.5 million in perpetual cumulative convertible preferred stock (Preferred) to Lincoln as partial consideration to complete the Lincoln Acquisition, which resulted in an increase in preferred dividends in the current year.

Net Revenues

Net revenues increased across most of our markets. For our core stations, which excludes the new stations acquired/disposed of through the Lincoln Acquisition and Bonneville Exchange, net revenues were up in the mid-single digits. Comparing our performance for the new stations to the prior owners' performance, net revenues also increased mid-single digits. Net revenues from the new stations together with our core stations contributed to overall double digit growth over prior year results.

Excluding the benefit of the net revenues associated with the new stations, net revenues increased the most for our stations located in the San Francisco and Seattle markets.

Station Operating Expenses

For our core stations, station operating expenses were up in the low single digits. This increase primarily correlates to the increase in the variable expenses associated with the increase in net revenues. Comparing our performance for the new stations to the prior owners' performance, station operating expenses decreased in the low double digits. Station operating expenses from the new stations together with our core stations contributed to the overall expense increase over prior year results.

Depreciation And Amortization Expense

Depreciation and amortization expense increased primarily as a result of the depreciation and amortization associated with the assets included in the Lincoln Acquisition.

Table of Contents

Corporate General And Administrative Expenses

Corporate general and administrative expenses increased primarily due to an increase in non-cash compensation expense and an increase in payroll taxes associated from the vesting of equity awards.

Operating Income

Operating income in the current period benefited from an increase in net revenues, net of station operating expenses, that included the operation of the new stations and the disposition of one station that was effective July 17, 2015.

Interest Expense

The increase in interest expense was primarily due to the higher outstanding debt upon which interest is computed as we borrowed \$42.0 million under the revolving credit facility to partially fund the Lincoln Acquisition. Our variable interest rates remained flat year over year as our Term B Loan includes a LIBOR floor of 1%.

Income Before Income Taxes (Benefit)

The increase was largely attributable to the positive impact of the Lincoln Acquisition and Bonneville Exchange on operating income as well as an increase in the core stations' operating results. This was offset by the increase in interest expense on the borrowing of \$42.0 million under the revolving credit facility needed to partially fund closing on the Lincoln Acquisition.

Income Taxes

Tax Rate For The Three Months Ended March 31, 2016

The effective income tax rate was 17.6%, which was impacted by discrete income tax benefits from recent legislation in certain single member states that allowed for: (1) the reversal of partial valuation allowances; and (2) a retroactive decrease in deferred tax liabilities associated with non-amortizable assets such as broadcasting licenses and goodwill. The impact of discrete items to the income tax rate is typically substantially greater in the first quarter of the year as income before income taxes is the lowest as compared to subsequent quarters. We estimate that our 2016 annual tax rate before discrete items, which may fluctuate from quarter to quarter, will be about 40%.

Tax Rate For The Three Months Ended March 31, 2015

The effective income tax rate was not a meaningful percentage, and was impacted by discrete tax expense from: (1) a recent state legislative change that increased the deferred tax liabilities associated with non-amortizable assets such as broadcasting licenses and goodwill; and (2) a tax benefit shortfall associated with share-based awards.

Net Deferred Tax Liabilities

As of March 31, 2016 and December 31, 2015, our net deferred tax liabilities were \$79.0 million and \$78.2 million, respectively. The deferred tax liabilities primarily relate to differences between the book and tax bases of our broadcasting licenses and goodwill.

Net Income (Loss) Available To The Company

The increase was primarily attributable to the reasons described above under Income Before Income Taxes, net of income tax expense.

Liquidity And Capital Resources

Liquidity

As of March 31, 2016, we had \$250.4 million outstanding under our senior secured credit facility (the *Credit Facility*), which includes an outstanding term loan (the *Term B Loan*) of \$236.9 million and an outstanding revolving credit (the *Revolver*) of \$13.5 million. In addition, we had outstanding \$220.0 million in principal for our 10.5% senior unsecured notes (the *Senior Notes*) and \$0.7 million in outstanding letters of credit. As of March 31, 2016, we had \$14.6 million in cash and cash equivalents. For the three months ended March 31, 2016, we decreased our outstanding debt by \$18.2 million.

Table of Contents

The Credit Facility

On November 23, 2011, we entered into a credit agreement with a syndicate of lenders for a \$425 million Credit Facility, which was initially comprised of: (a) a \$50 million Revolver (reduced to \$40.0 million in December 2015) that matures on November 23, 2016; and (b) a \$375 million Term B Loan that matures on November 23, 2018.

The undrawn amount of the Revolver was \$25.8 million as of March 31, 2016. The amount of the Revolver available to us is a function of covenant compliance at the time of borrowing.

The Term B Loan requires mandatory prepayments equal to a percentage of Excess Cash Flow, which is defined within the agreement and is subject to incremental step-downs depending on the Consolidated Leverage Ratio. The payment, which is currently estimated at 25% of Excess Cash Flow, is due in the first quarter of each year. An estimate of this payment that is due next year, net of any prepayments made through March 31, 2016, is included under the current portion of long-term debt. We expect to fund the payments using cash from operating activities.

As of March 31, 2016, we are in compliance with all financial covenants and all other terms of the Credit Facility in all material respects. Our ability to maintain compliance with our covenants will be highly dependent on our results of operations. A default under our Credit Facility or the indenture governing our Senior Notes could cause a cross default in the other. Any event of default could have a material adverse effect on our business and financial condition.

We believe that over the next 12 months we can continue to maintain our compliance with these covenants. Our operating cash flow remains positive, and we believe that cash on hand and cash from operating activities will be sufficient to permit us to meet our liquidity requirements over the next 12 months, including our debt repayments.

Failure to comply with our financial covenants or other terms of our Credit Facility and any subsequent failure to negotiate and obtain any required relief from our lenders could result in the acceleration of the maturity of all outstanding debt. Under these circumstances, the acceleration of our debt could have a material adverse effect on our business. We may seek from time to time to amend our Credit Facility or obtain other funding or additional financing, which may result in higher interest rates.

Credit Facility's Financial Covenants

As of March 31, 2016, our Consolidated Leverage Ratio was 4.0 times versus a covenant maximum of 4.50 times and our Consolidated Interest Coverage Ratio was 3.2 times versus a covenant minimum of 2.0 times.

The Senior Notes

The Senior Notes may be redeemed at any time prior to December 1, 2016 at 105.25% of the principal amount plus accrued interest. The redemption price decreases over time.

Simultaneously with entering into the Credit Facility on November 23, 2011, we issued the Senior Notes which mature on December 1, 2019 in the amount of \$220.0 million. Interest on the Senior Notes is payable semi-annually in arrears on June 1 and December 1 of each year.

In addition to the parent, Entercom Communications Corp., all of our existing subsidiaries (other than Entercom Radio, LLC, which is a finance subsidiary and is the issuer of the Senior Notes), jointly and severally guaranteed the Senior Notes. Under certain covenants, our subsidiary guarantors are restricted from paying dividends or distributions in excess of amounts defined under the Senior Notes, and the subsidiary guarantors are limited in their ability to incur

additional indebtedness under certain restrictive covenants.

A default under our Senior Notes could cause a default under our Credit Facility. Any event of default could have a material adverse effect on our business and financial condition.

Perpetual Cumulative Convertible Preferred Stock

Upon closing on the Lincoln Acquisition, we issued Preferred that ranks senior to common stock in our capital structure. The Preferred is convertible by Lincoln into a fixed number of shares after a three-year waiting period, subject to customary anti-dilution provisions. At certain times (including the first three years after issuance), we can redeem the Preferred in cash at a price of 100%. The dividend rate on the Preferred increases over time from 6% to 12%. We declared and paid a \$0.4 million dividend on our Preferred in October 2015, in January 2016 and in April 2016.

Operating Activities

Net cash flows provided by operating activities were \$23.7 million and \$19.3 million for the three months ended March 31, 2016 and 2015, respectively. The cash flows from operating activities increased primarily due to the increase in net revenues, net of station operating expenses, from the Lincoln Acquisition and Bonneville Exchange.

Investing Activities

Net cash flows provided by investing activities were \$2.7 million for the three months ended March 31, 2016 and net cash flows used in investing activities were \$2.2 million for the three months ended March 31, 2015.

For the three months ended March 31, 2016, the cash provided by investing activities primarily reflects the proceeds from the sale of a Denver AM station, offset by additions to property and equipment of \$1.0 million. For the three months ended March 31, 2015, the cash used in investing activities primarily reflects the additions to property and equipment of \$2.0 million.

Financing Activities

Net cash flows used in financing activities were \$20.9 million and \$2.1 million for the three months ended March 31, 2016 and 2015, respectively.

For the three months ended March 31, 2016 the cash flows used in financing activities primarily reflect the reduction of our net borrowings of \$18.2 million. For the three months ended March 31, 2015, the cash flows used in financing activities primarily reflect \$1.3 million for the purchase of vested restricted stock units to satisfy employees' tax obligations and a reduction of our net borrowings of \$0.8 million.

Dividends

The Company's Board of Directors approved a \$0.075 per share dividend payable on June 15, 2016 for those shareholders of record as of May 25, 2016. Any future dividends will be at the discretion of the Board of Directors based upon the relevant factors at the time of such consideration, including, without limitation, compliance with the restrictions set forth in our Credit Facility, the indenture governing the Senior Notes and our Preferred. A dividend on our Preferred of \$0.4 million was declared and paid in October 2015, January 2016 and April 2016.

Income Taxes

During the three months ended March 31, 2016, we paid \$0.1 million in federal and state income taxes. The payment is primarily for a federal alternative minimum tax, which is a credit available to offset income tax liabilities in future years. We anticipate that it will not be necessary to make any quarterly estimated federal or state income tax payments

for the remainder of 2016 based upon available net operating loss carryovers, existing prepayments and expected quarterly income subject to tax.

Capital Expenditures

Capital expenditures for the three months ended March 31, 2016 were \$1.0 million. We anticipate that total capital expenditures in 2016 will be between \$7 million and \$8 million. Higher anticipated capital expenditures are attributable to an expected move of studio facilities in several markets with costs spread over this year and next.

Table of Contents

Contractual Obligations

As of March 31, 2016, there have been no net material changes in the total amount from the contractual obligations listed in our Form 10-K for the year ended December 31, 2015, filed with the SEC on February 26, 2016.

Off-Balance Sheet Arrangements

As of March 31, 2016, we did not have any material off-balance sheet transactions, arrangements or obligations, including contingent obligations.

Future Impairments

We may find it necessary to take impairment charges in future periods based on conditions at that time. Any such impairment could be material.

Critical Accounting Policies

There have been no material changes to our critical accounting policies from the information provided in Part II, Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, under the heading Critical Accounting Policies in our Annual Report on Form 10-K for the year ended December 31, 2015 and filed with the SEC on February 26, 2016.

ITEM 3. Quantitative And Qualitative Disclosures About Market Risk

We are exposed to market risk from changes in interest rates on our variable rate senior debt (the Term B Loan and Revolver). If the borrowing rates under London Interbank Offered Rate (LIBOR) were to increase 1% above the current rates as of March 31, 2016, our interest expense on: (1) our Term B Loan would increase \$1.0 million on an annual basis as our Term B Loan provides for a minimum LIBOR floor; and (2) our Revolver would increase by \$0.4 million, assuming our entire Revolver was outstanding as of March 31, 2016. From time to time, we may seek to limit our exposure to interest rate volatility through the use of interest rate hedging instruments.

Assuming LIBOR remains flat, interest expense is expected to be lower due to the decrease in our outstanding debt upon which interest is computed.

As of March 31, 2016, there were no interest rate hedging transactions outstanding.

From time to time, we invest in cash equivalents that are money market instruments consisting of short-term government securities and repurchase agreements that are fully collateralized by government securities. When such investments are made, we do not believe that we have any material credit exposure with respect to these assets. As of March 31, 2016, we did not have any investments in money market instruments.

Our credit exposure related to our accounts receivable does not represent a significant concentration of credit risk due to the quantity of advertisers, the minimal reliance on any one advertiser, the multiple markets in which we operate and the wide variety of industries in which our advertisers compete.

See also additional disclosures regarding liquidity and capital resources made under Liquidity and Capital Resources in Part 1, Item 2, above.

ITEM 4. Controls And Procedures
Evaluation Of Controls And Procedures

We maintain disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Exchange Act) that are designed to ensure that: (i) information required to be disclosed in our Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms; and (ii) such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow for timely decisions regarding required disclosure. In designing and evaluating our disclosure controls and procedures, our management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and our management is required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

Table of Contents

We carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures as of the end of the period covered by this report. Based on the foregoing, our President/Chief Executive Officer and Executive Vice President/Chief Financial Officer concluded that our disclosure controls and procedures were effective at the reasonable assurance level.

Changes In Internal Control Over Financial Reporting

There has been no change in our internal control over financial reporting during our most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.
