***Message from the CEO***

**With elections now behind, one would be tempted to simply look forward.** There are challenges ahead indeed: passing much awaited and needed reforms, reorganizing the country to move ahead; ensuring proper regulatory framework to foster investments; increasing productivity and competitiveness; and more. But we are optimistic and remain confident that Cosan will honor its track record of endeavoring Brazilian ups and downs. Our portfolio is prepared to continue growing on a sustainable and efficient way while leveraging upcoming opportunities.

**This was yet another quarter where we performed despite adversities and we reiterate our consolidated guidance for this year.** The trucker's strike of last May charged a toll on fuels distribution results and required an extra-mile from our team. Uncertainties related to definition of diesel subsidy mechanism and consequent delays in payment to distribution companies reduced attractiveness of import changing supply dynamics and requiring logistic reorganization. Otto-cycle volume growth lagged behind expectations. But again we outperformed the street delivering robust results. We managed to increase further ethanol production in our meals reaching record levels, to benefit from higher profitability versus sugar. Comgás delivered volume growth way above GDP, in all business segments. Moove's international expansion continues. Rumo's stellar operational turnaround combined with results of liability management continue to yield growing EBITDA and now consistent profits.

**In attention to shareholders and investor's concerns related to the announcement of possible corporate restructuring, Cosan decided to cancel the proposal.** In line with long-term goal of simplifying corporate structure and reducing the number of listed vehicles, we announced the possible incorporation of RLOG3 by CSAN3. Additional details, however, were required for proper appreciation of the proposal. By cancelling the restructuring, we reiterate our commitment to best practice governance standards and value creation to shareholders.

**We are prepared to look forward!**

***Executive Summary 3Q18***

**Logistics Operator**

**Cosan S.A. (CSAN3):**

**Cosan S/A Proforma:** Cosan S/A presented adjusted pro forma EBITDA of R\$1.2 billion (-25%) in the quarter, due to the impacts in Raízen's results, partially offset by EBITDA expansion in Comgás (normalized) and Moove. Net income came in at R\$44 million (-91%), negatively affected by foreign exchange variation (non-cash) in the unhedged portion of the perpetual bond. The generation of pro forma free cash flow to equity (FCFE) totaled

R\$829 million in 3Q18, driven by higher debt raising at Raízen, versus a cash consumption of R\$519 million in 3Q17, when two mills of Grupo Tonon were acquired by Raízen Energia. Leverage (net debt/pro forma EBITDA, normalized by Comgás regulatory current account) came to 2.0x at the end of 3Q18.

**Raízen Combustíveis:** Adjusted EBITDA fell 24% to R\$683 million in 3Q18, still affected by non-recurring effects as a result of truckers strike, as well as lower demand in Otto cycle. Total volume sold in the period came in 1.5% higher than in 3Q17, sustained by diesel (+5%) and aviation (+9%) growth. Otto cycle fuel sales dropped (-3%), impacted by the World Cup in July, a high level of unemployment and increased fuel prices at the pump due to higher prices in the international market. In gasoline-equivalent, sales shrank 7%, with a strong increase of ethanol in replacement of gasoline. The adjustment to the supply mix following strike-related measures also raised additional logistics challenges.

**Raízen Energia:** Adjusted EBITDA in 3Q18, second quarter of 2018/19 crop was R\$641 million (-54%), reflecting lower sugar prices, and mainly, lower volumes sold of this commodity, in line with crop commercialization strategy. Crushing totaled 24.3 million tons (-14%), affected by higher rainfall volume in the period. Agricultural productivity, measured in kilos of TRS/hectare, came 7% lower than 3Q17, due to off-season drier weather, which increases sucrose concentration in the cane, but reduces density of the sugarcane. Sugar-equivalent production was 12% lower than the previous crop, in line with lower crushing in the period, with a mix of 51% for ethanol (versus 43% in 3Q17), on the back of higher ethanol profitability.

**Comgás:** EBITDA, normalized by regulatory current account effect, increased 14% to R\$546 million, mainly boosted by higher sales volume (+9% versus 3Q17, ex-thermal power) and strict control of operating expenses. Industrial segment volume was 7% higher than the same period last year due to negotiations to increase volumes. New connections (110,000 in the last 12 months), bolstered residential segment consumption (+7%). In the commercial segment, volume was up 13% on the back of the uptake in economic activity and addition of 1,100 clients to the base in 2017.

**Moove:** 3Q18 EBITDA reached R\$60 million (+34%), bolstered by expansion of international operations and improved mix of products sold.

**COSAN LIMITED****Earnings Release  
3rd Quarter of 2018****Cosan Logística S.A. (RLOG3):**

**Rumo** reached R\$ 952 million (+19%) EBITDA in 3Q18. The largest volumes transported (+ 15%, 16 billion TKUs) reflect increased capacity following investment plan and continuous improvement in operational efficiency, allowing market share gains and significant growth in grain transportation. The record soybean crop extended the grain export period and attenuated the lower corn production in some states, causing the transported agricultural volume to grow by 14%, adding to the ramp-up of fertilizer volumes in Northern Operations. Variable cost grew below volume expansion, since the reduction in fuel consumption (liters/TKB:-4.5%) compensated for higher diesel prices. In turn, fixed costs remained stable, allowing an increase of 2.2 p.p. of EBITDA margin (50.7%). Strong EBITDA growth coupled with prepayment of expensive debt lines and reduction in cost of debt resulted in a net profit of R\$229 million in the period.

**Cosan Limited Proforma:**

**Adjusted EBITDA came to R\$2.1 billion (-11 %)**, impacted by the effects previously described in Raízen's results, partially offset by EBITDA expansion in Comgás (normalized), Moove and Rumo. CZZ posted net income of R\$63 million in the quarter, dropping 75% compared to 3Q17, affected by negative foreign exchange variation in the perpetual bond at Cosan S/A, neutralized in part by higher net income at Cosan Logística S/A.

## **Report on Review of Interim Financial Information**

To the Management, Board of Directors and Shareholders of

Cosan Limited

Bermuda

### **Introduction**

We have reviewed the accompanying consolidated interim financial information of Cosan Limited ( Company ) for the quarter ended September 30, 2018, which comprises the statement of financial position as of September 30, 2018, and the respective statements of profit and loss and comprehensive income for the three and nine-month periods then ended and changes in equity and cash flows for the nine-month period then ended, including the explanatory notes.

The Company's management is responsible for the preparation and presentation of this interim financial information in accordance with IAS 34 - Interim Financial Reporting, issued by the International Accounting Standards Board IASB. Our responsibility is to express a conclusion on this consolidated interim financial information based on our review.

### **Scope of review**

We conducted our review in accordance with Brazilian and international standards on review engagements of interim financial information (*NBC TR 2410 - Revisão de Informações Intermediárias Executada pelo Auditor da Entidade* and ISRE 2410 - Review of Interim Financial Information Performed by the Independent Auditor of the Entity, respectively). A review of interim information consists of making inquiries, primarily of persons responsible for the financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with audit standards and, consequently, does not enabled us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

### **Conclusion on the interim information**

Based on our review, nothing has come to our attention that causes us to believe that the accompanying consolidated interim financial information referred to above has not been prepared, in all material respects, in accordance with IAS 34 - Interim Financial Reporting, issued by the International Accounting Standards Board IASB.

## Cosan Limited

### Notes to the consolidated interim financial statements

*(In thousands of Brazilian Reais – R\$, unless otherwise stated)*

#### 1 Operations

Cosan Limited ( Cosan ) was incorporated in Bermuda on April 30, 2007. Cosan's class A common shares are traded on the New York Stock Exchange (NYSE) (ticker CZZ). Mr. Rubens Ometto Silveira Mello is the ultimate controlling shareholder of Cosan. Cosan controls its subsidiaries Cosan S.A. ( Cosan S.A. ) and Cosan Logística S.A. ( Cosan Logística ) through a 60.25% and 72.50% interest, respectively. Cosan, Cosan S.A., Cosan Logística and its subsidiaries are collectively referred to as the Company.

The Company's primary activities are in the following business segments: (i) Piped natural gas distribution to part of the State of São Paulo through its subsidiary Companhia de Gás de São Paulo – Comgás ( Comgás ); (ii) Logistics services including transportation, port loading and storage of sugar, leasing or lending of locomotives, wagons and other railway equipment, through its indirect subsidiaries Rumo S.A. ( Rumo ), logistic segment ( Logistic ); (iii) Production and distribution of lubricants under the Mobil licensed trademark in Brazil, Bolivia, Uruguay, Paraguay, Argentina and Europe market through its indirect subsidiaries Cosan Lubrificantes e Especialidades S.A. ( CLE ), Stanbridge Group Limited ( Stanbridge ), TTA – SAS Techniques & Technologie Appliquees ( TTA ), LubrigrupoII, S.A. ( Lubrigrupo II ), Cosan Lubrificantes S.R.L ( Cosan S.R.L ), and Comma Oil & Chemicals Ltd. ( Comma ) under the Comma's brand to the Europe and Asian market and corporate activities ( Moove ); and (iv) Digital wallet business, other investments, in addition to the corporate structures of the Company ( Cosan Corporate ).

The Company also holds interests in two joint ventures ( JVs ): (i) Raízen Combustíveis S.A. ( Raízen Combustíveis ), a fuel distribution business, and (ii) Raízen Energia S.A. ( Raízen Energia ), which operates in the production and marketing of sugar, ethanol and energy cogeneration, produced from sugar cane bagasse.

On January 31, 2018, the Cosan S.A received the amount of 1,340,000 related to sales of credit rights, as stated in the financial statements as of December 31, 2017.

On March 19, 2018, the Subsidiary Cosan S.A entered into a new agreement with ExxonMobil Lubricants Trading Company which grants our subsidiary Moove the exclusive production, import, distribution and marketing rights in Brazil, Bolivia, Paraguay and Uruguay of lubricants and certain other related products under the Mobil brand until November 30, 2038. This agreement will come into force on December 1, 2018.

On April 20, 2018, the General Meeting approved the merger of Brado Holding S.A., Rumo Malha Norte Holding Ltda. and Tezza Consultoria de Negócios Ltda. by Rumo, so that the merged companies will be extinguished and Rumo will succeed the merged ones. This transaction serves the interest of the parties and their shareholders, generating benefits to the parties by providing administrative efficiency and reducing operating costs. In addition, the incorporation of PGT S.A. was approved by ALL Armazéns Gerais Ltda.

On April 24, 2018, Raízen Combustíveis and its subsidiary Raízen Argentina Holdings S.A.U. entered into a contract for the acquisition of Shell's downstream business in Argentina through the acquisition of 100% of the shares issued

by Shell Compañía Argentina de Petróleo S.A. and Energina Compañía Argentina de Petróleo S.A. ( Shell Argentina ).

Shell Argentina operates in the petroleum refining, fuel distribution, fuel reseller operations, manufacturing and commercialization of automotive and industrial lubricants, and the manufacture and sale of liquefied petroleum gas, among others.

At May 31, 2018, Cosan through its subsidiary Comma, acquired control of the companies TTA and LubrigrupoII, in the preliminary amount of R\$ 43,610 and R\$ 5,933 respectively, generating an additional goodwill in the Lubricants segment of R\$ 22,924 and R\$ 2,383 (Note 14), respectively. The transferred consideration, net of cash received, totaled R\$ 33,543 and R\$ 4,533, respectively.

On June 30, 2018, the Company supplemented the price paid for the acquisition of the full control of Stanbridge Group Limited, due to the fulfillment of certain contractual conditions, which generated an increase in consideration of R\$ 31,726 (Note 14). In addition, after compliance with the contractual conditions and revision of the fair value of the transaction, the remaining balance and the additional consideration were settled in cash in the amount of R\$ 35,869. Additionally, part of the purchase price was allocated in Customer Relationship at the amount of R\$ 136,499 (Note 14).

### Notes to the consolidated interim financial statements

*(In thousands of Brazilian Reais – R\$, unless otherwise stated)*

As announced to the market, on August 2, 2018, the Civil Police of the State of Paraná launched on July 31, 2018, the Operation Controlled Margin, with the objective of collecting statements and obtaining documents from employees of fuel distributors operating in Paraná, including Raízen Combustíveis, on suspicion of possible practices to control the final price of fuel sold at retailers located in that region. On the same date, search and seizure warrants were executed and three of Raízen's employees were temporarily arrested and on August 3, 2018, the court determined the release of them. To this moment, in view of the existing information, no irregular conduct may be attributed to Raízen or its employees. No complaints were filed against any employees of Raízen, and no court order was issued determining the freeze of any assets or funds in its bank accounts.

In addition, also on July 31, 2018, in connection with the so-called *Operação Dubai*, the Prosecution Office of the Federal District filed a complaint against, among other parties, Raízen and one employee on the grounds of alleged anticompetitive practice. In this context, the assessment of Raízen Combustíveis, on the basis of the information available, is that the above claims do not find factual and legal support. In an autonomous action and aiming to obtain indemnification for the damages potentially suffered by the civil society due to these conducts, the Prosecution Office filed a redress action in the face of all those involved, which is in the initial stage of the proceedings. There is an application for the blocking of assets and securities against, among others, Raízen Combustíveis, which was not effected due to guarantees given in court. Both procedures are being defended and appealed to, since Raízen Combustíveis understands that there are no elements that constitute the responsibility of its or its representatives in the investigated practices.

There was no relevant update on this topic in relation to that disclosed in the interim financial statement for the period ended June 30, 2018.

At the present date there is no definitive decision or material impact on the business.

However, if the operations prove to be true in the future, any penalties may have an effect on the future financial position, profit or loss from operation and cash flows of Raízen Combustíveis. Regarding to the financial statements of Raízen Combustíveis, it is currently not practicable to determine whether there is any probable loss arising from a present obligation in view of a past event or a reasonable measure regarding the possible provision for contingencies on this matter in this interim financial information, through interest in earnings of joint ventures.

## 2 Basis of preparation

### 2.1 Statement of compliance

The consolidated interim financial statements have been prepared in accordance with IAS 34 Interim Financial Reporting, as issued by the International Accounting Standards Board (IASB). They do not include all the information required for a complete set of IFRS financial statements. However, selected explanatory notes are included to explain

events and transactions that are significant to an understanding of the changes in the Company's financial position and performance since the last annual consolidated financial statements as at and for the year ended December 31, 2017.

The significant judgments made by management in applying the Company's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the consolidated financial statements as at and for the year ended December 31, 2017, except for the adoption of new standards and interpretations effective as of January 1, 2018. The Company has not early adopted any other standard, interpretation or amendment that has been issued.

All own relevant information of the interim financial statements, and only they, are being highlighted, and these correspond to those used by management in its management.

These consolidated interim financial statements were authorized for issue by the Board of Directors on November 7, 2018.

Certain amounts of the comparative balances in the statements of cash flows and in the notes 3, 5, 6, 10, 20, 21, 26 and 33, were reclassified to improve the level of details of disclosures in these consolidated interim financial statements. These reclassifications had inconsequential impacts on the Company's consolidated interim financial statements.

### **3 Significant accounting policies**

These interim financial information were prepared based on the preparation basis and accounting policies consistent with those adopted in the preparation of the financial statements as of December 31, 2017, except for the adoption of IFRS 15 Customer Contract Revenue and IFRS 9 Financial Instruments, whose effects and changes are disclosed below (Note 3.2) effective as of January 1, 2018. The Company has not adopted in advance any other standard or interpretation issued that is not yet in force.

- (i) Management has concluded that there are no material uncertainties that cast doubt on the continuity of the subsidiaries. Although they had a combined amount of uncovered liabilities of R\$ 182,596 as of September 30, 2018, no events or conditions were identified that individually or collectively could raise significant doubts related to their ability to maintain their operational continuity. The subsidiaries have the financial support of the subsidiary Cosan S.A.
- (ii) As of September 30, 2018, the Company increased its interest, in Comgás to 80.12% due to the capital increase arising from the partial use of the goodwill tax benefit, according to Ordinary / Extraordinary General Meeting of April 25, 2018, of the subsidiary Comgás. As a consequence, a loss in shareholders' equity was recognized in the total amount of R\$ 7,888.
- (iii) As mentioned in Note 1, the merger of Brado Holding S.A., Rumo Malha Norte Holding Ltda. and Tezza Consultoria de Negócios Ltda. ( ALL Serviços Ltda. ) By Rumo. In addition, the incorporation of PGT S.A. by ALL Armazéns Gerais Ltda.
- (iv) Acquisition of control of companies in the Lubricants segment as described in the note 1.

**3.2 New standards, interpretations and changes adopted by the Company**

Although these new standards and amendment below apply for the first time in 2018, they do not have a material impact on the Company's annual or interim consolidated financial statements. The nature and impact of each new standard or change are described below:

**a) IFRS 15 Customer Contract Revenue**

The Company adopted IFRS 15 Revenue from Contracts with Customers as of January 1, 2018, which resulted in changes in accounting policies and adjustments to the amounts recognized in the consolidated financial statements. In accordance with the transitional provisions of IFRS 15, the Company adopted the retrospective method with a cumulative transition effect.

The costs to obtain new contracts, as well as to comply with existing contracts, begin to be recorded as Cost of sales. At September 30, 2018, these costs totaled R\$ 62,971. At September 30, 2017 such costs were recorded as selling expenses in the amount of R\$ 58,625.

**b) IFRS 9 Financial Instruments**

IFRS 9 Financial Instruments replaces IAS 39 Financial Instruments: Recognition and Measurement for annual periods beginning on or after January 1, 2018, bringing together all three aspects of accounting for financial instruments: (i) classification and measurement; (ii) impairment; and (iii) hedge accounting.

The Company applied IFRS 9 with the initial application date of January 1, 2018, retrospectively, except as described below:

The Company has adopted the exception of not re-presenting comparative information from previous periods regarding the classification and measurement requirements (including impairment). Differences in the balances of financial assets and liabilities arising from the adoption of IFRS9 were recorded in retained earnings and reserves on January 1, 2018. Thus, the information presented for 2017 generally does not reflect the requirements of IFRS 9, but the requirements of IAS 39.

Certain definitions were made based on the facts and circumstances existing at the date of initial application: i) determination of the business model in which a financial asset is held; ii) the designation

and revocation of prior designations of certain financial assets and liabilities as measured at fair value through profit or loss.

All hedge relationship designations in accordance with IAS 39 existing as of December 31, 2017 meet the hedging criteria in accordance with IFRS 9 as of January 1, 2018 and are therefore designated as continuing hedge relationships.

The effect of the adoption of IFRS 9 is as follows:

<b>Assets</b>	
Trades receivables	R\$ (11,520)
Investments in joint ventures	R\$ (1,340)
Deferred tax	R\$ 4,172
<b>Equity</b>	
Retained earnings	R\$ 8,688

#### **(a) Classification and measurement**

Except for certain commercial receivables, in accordance with IFRS 9, the Company initially measures a financial asset at its fair value plus, in the case of a financial asset not measured at the fair value through profit or loss, of transaction costs.

Under IFRS 9, debt financial instruments are subsequently measured at fair value through profit or loss (FVPL), amortized cost, or fair value through other comprehensive income (FVOCI).

The classification is based on two criteria: the Group's business model for managing the assets; and whether the instruments' contractual cash flows represent solely payments of principal and interest on the principal amount outstanding (the SPPI criterion).

The Company recognizes its financial assets at amortized cost for financial assets that are kept within a business model with the objective of obtaining contractual cash flows that meet the SPPI criterion. This category includes trade accounts receivable, cash and cash equivalents, restricted cash, receivables from related parties, other financial assets and dividends and interest on shareholders' equity receivable. No new measurement of financial assets was carried out.

The evaluation of the Company's business models was carried out from the date of initial application on January 1, 2018 and retrospectively applied to financial assets that were not derecognized before January 1, 2018. The assessment of whether cash flows contractual debt instruments are solely composed of principal and interest were made based on the facts and circumstances as in the initial recognition of the assets.

The accounting of the Company's financial liabilities remains basically the same as those of IAS 39. Similar to the requirements of IAS 39, IFRS 9 requires contingent consideration to be treated as financial instruments measured at fair value with changes in fair value recognized in profit or loss.

The embedded derivatives are not separated from the related financial asset. Instead, financial assets are classified based on their contractual terms and the Company's business model.

The accounting of embedded derivatives in financial liabilities and in non-financial related contracts did not change from that required by IAS 39.

#### **(b) Impairment**

The adoption of IFRS 9 has fundamentally changed the Company's accounting for impairment losses for financial assets by replacing IAS 39's incurred loss approach with a forward-looking expected credit loss (ECL) approach.

The Company recognizes a provision for expected credit loss for its accounts receivable. The simplified standard approach is applied and the expected credit losses for the entire life of the asset are calculated. The Company has established a provisioning matrix that is based on the historical experience of credit loss of each business segment, adjusted for specific prospective factors for the debtors and for the economic environment.

The adoption of the expected credit loss requirements of IFRS 9 resulted in a rise in the Company's provisions for losses of R\$ 11,520. The rise in the provision resulted in adjustment to retained earnings in the amount of R\$ 8,688.

**(c) Hedge accounting**

The Company applied the changes of hedge accounting prospectively. At the date of initial application, all of the Company's existing hedging relationships were eligible to be treated as continuing hedging relationships. Consistent with previous periods, the Company continued to designate the change in the fair value of the entire forward contract in the Company's cash flow hedge relationships and, as such, the adoption of the hedge accounting requirements of IFRS 9 had no significant impact on the Company's consolidated interim financial statements.

## **Cosan Limited**

### **Notes to the consolidated interim financial statements**

*(In thousands of Brazilian Reais – R\$, unless otherwise stated)*

According to IAS 39, all gains and losses arising from the Company's cash flow hedge relationships were eligible to be subsequently reclassified to income. However, in accordance with IFRS 9, the gains and losses resulting from cash flow hedge of the expected purchases of non-financial assets need to be incorporated into the initial book values of non-financial assets. Therefore, after the adoption of IFRS 9, the net cash flow hedge gain or loss was presented under Other comprehensive income not being reclassified to income. This amendment applies only prospectively from the date of initial application of IFRS 9 and has no impact on the presentation of comparative figures.

In the evaluation of the Company, in terms of hedge accounting, no effects of its adoption were identified in this interim financial statement.

#### **3.3 Non-cash transaction**

During the period ended September 30, 2018, the Company carried out the following transactions that did not involve cash and are therefore not reflected in the statement of cash flows:

Forward purchase of property, plant and equipment in the amount of R\$ 17,300 (R\$ 4.813 on September, 30, 2017)

#### **4 New standards and interpretations not yet effective**

The follow standard is effective for annual periods beginning after January 1, 2019, however The Company has not early adopted it in preparing these consolidated interim financial statements.

##### **a) IFRS 16 Leases**

This standard changes the recognition, measurement, presentation and disclosure of leases. It requires tenants to record all leases in the balance sheet with exemptions available for low-value and short-term leases.

The Company and its subsidiaries lease various properties, equipment and cars. Rental agreements are usually made for fixed periods, but may have extension options as described below. The terms of the lease are negotiated individually and contain a wide variety of different terms and conditions. Lease agreements do not impose any obligation, but leased assets can not be used as collateral for loan purposes. Leases will be recognized as a right of use asset and a corresponding liability on the date the leased asset is made available for use by the Company. Each lease payment will be allocated between the liability and the financial cost. The financial cost will be recognized in profit or loss over the period of the lease, in order to produce a constant periodic rate of interest on the remaining balance of the liability for each period. The asset of the right of use will be depreciated over the shorter useful life of the asset and

the lease term by the straight-line method.

Assets and liabilities arising from leasing will initially be measured based on the present value. Lease liabilities include the net present value of the following rental payments:

- i. fixed payments (including fixed payments in substance), less any lease incentives to be received;
- ii. variable rental payment that is based on an index or a rate;
- iii. amounts expected to be paid by the lessee under residual value guarantees;
- iv. the exercise price of a call option, if it is reasonably certain that the option is exercised by the lessee, and
- v. payment of fines for termination of the lease, if the lease term reflects that the lessee exercising that option.

Lease payments will be discounted using the implied interest rate on the lease, if such rate can be determined, or the incremental loan rate of the Company.

## **Cosan Limited**

### **Notes to the consolidated interim financial statements**

*(In thousands of Brazilian Reais R\$, unless otherwise stated)*

The rights-of-use assets will be measured at cost, including:

- i. the value of the initial measurement of the lease liability;
- ii. any lease payments made before or at the commencement date, less any incentives received;
- iii. any initial direct costs and;
- iv. restoration costs.

Payments associated with short-term leases and leases of low-value assets will continue to be recognized under the straight-line method as expense in the statement of income. Short-term leases are leases with lease term of 12 months or less. Low value assets include computer equipment and small items of office furniture.

The extension and termination options are included in various property and equipment leases throughout the Company. These terms are used to maximize operational flexibility in terms of contract management. Most of the options for extension and termination exercised may be bilateral agreement.

To optimize lease costs during the contract period the Company sometimes provides residual value guarantees in relation to equipment leases.

The Company will adopt IFRS 16 using the modified retrospective approach and therefore the comparative information will not be updated and will continue to be reported under IAS 17 and IFRIC 4. Details of the accounting policies in accordance with IAS 17 and IFRIC 4 will be disclosed separately if they are different from those under IFRS 16.

The Company has not yet finalized the measurement of these leases in the recognition of a right of use asset and a lease liability and as this will affect the profit or loss and the classification of the cash flows. However, it is expected to have a material impact on the jointly-controlled subsidiaries Raízen, mainly in land leases.

The standard is mandatory for periods beginning on or after January 1, 2019.

#### **b) IFRIC 23 Uncertainty over Income Tax Treatments**

The Interpretation addresses the accounting of income taxes when tax treatment involves uncertainties that affect the application of IAS 12 and does not apply to taxes or charges outside the scope of IAS 12, nor does it specifically include requirements relating to interest and penalties associated with taxes uncertain.

The Company records federal income tax returns in Brazil and in foreign jurisdictions, and is subject to examination by the tax authorities in those jurisdictions for the last five fiscal years. The Company has audits in progress at various stages of completion, of which they may be completed within the next fiscal year. The results of the audits and the timing of settlements are subject to significant uncertainties currently.

The unrecognized uncertainties described above will be included in the Company's annual financial statements to the extent that the Company is able to make reliable estimates of settlements with the respective tax authorities.

**c) IFRS 17 Insurance Contracts**

This standard introduces a new model for accounting for insurance contracts. IFRS 17 is effective for years beginning on or after January 1, 2021, with comparative values required. Based on preliminary work, we estimate that the impact will be irrelevant. We are in the process of reviewing our existing agreements to determine the impact on adoption.

There are no other IFRS standards or IFRIC interpretations that have not come into effect and are expected to have a material impact on the Company.

#### 5 Operating segments

The following segment information is used by Cosan's senior management (the Chief Operating Decision Maker) to assess the performance of the operating segments and to make decisions with regards to the allocation of resources. This information is prepared on a basis consistent with the accounting policies used in the preparation of the financial statements. Cosan evaluates the performance of its operating segments based on the measure of Earnings Before Interest Tax, Depreciation and Amortization (EBITDA). A reconciliation of EBITDA to profit (loss) is presented below.

#### Reported segments

- i. **Raízen Energia:** production and marketing of a variety of products derived from sugar cane, including raw sugar (VHP), anhydrous and hydrated ethanol, and activities related to energy cogeneration from sugarcane bagasse. In addition, this segment holds interests in companies engaged in research and development on new technology;
- ii. **Raízen Combustíveis:** distribution and marketing of fuels, mainly through a franchised network of service stations under the brand Shell throughout Brazil;
- iii. **Comgás:** distribution of piped natural gas to part of the State of São Paulo (approximately 180 municipalities, including the region called Greater São Paulo) to customers in the industrial, residential, commercial, automotive, thermo generation and cogeneration sectors;
- iv. **Logistic:** logistics services for transport, storage and port loading of commodities, mainly for sugar products, leasing or lending of locomotives, wagons and other railway equipment; and
- v. **Moove:** production and distribution of lubricants under the Mobil brand in the Latin American and European market, as well as in the European and Asian market under the Comma brand.

#### Reconciliation

vi.

**Cosan Corporate:** digital wallet business, other investments, in addition to the corporate activities of the Company. The Cosan Corporate segment s includes the subsidiaries responsible for raising funds for the group.

Although Raízen Energia and Raízen Combustíveis are equity accounted joint ventures and are no longer proportionally consolidated since adoption of IFRS 11, senior management continues to review segment information. A reconciliation of these segments is presented in the column Deconsolidated effects IFRS 11.

***Civil, labor, regulatory and environmental*****a) Judicial claims deemed to be probable losses, fully accrued**

Civil refers mainly to compensation for material and moral damages, class actions for abstaining from straw burning sugarcane and execution of environmental nature.

Labor represent labor claims filed by former employees and employees of service providers who question, among others, payment of overtime, night and dangerous, job reinstatement, compensation for accidents at work and reimbursement of discounts from payroll, such as confederative and assistance contributions, union dues and other.

Regulatory mainly refers to fines and discussions with National Authority for Terrestrial Transport (ANTT).

Environmental these amounts derive from assessments made by the Environmental Sanitation Technology Company (CETESB-SP), Brazilian Institute of Environment and Natural Resources (IBAMA) and Environment Municipal Departments related to soil contamination and water by the overflow of products and non-compliance with conditions imposed by such operating license. In all cases, measures are being taken to reduce the existing liabilities, as well as repair and prevention measures.

On July 25, 2018, the Company was aware of the filing of an administrative inquiry with CADE for the determination of representation filed by Agrovia. The Company refutes the arguments presented by it and emphasizes that most of the facts have already been analyzed and rejected by the body itself in another administrative proceeding. The Company assesses as possible the risk that an administrative proceeding will be created and will incur loss in this process. Due to the initial stage of the topic, it is not possible to estimate the value at risk.

The non-controlling interests of the indirect subsidiary Brado Logística S.A have the right to exercise a liquidity option provided for in the shareholders' agreement signed on August 5, 2013. This option would exchange all Brado shares held by such minority shareholders by shares of Rumo. The exchange ratio shall take into account the economic value for both Brado and Rumo shares. At the Company's exclusive discretion, an equivalent cash payment

is also possible.

For the nine month period ended at September 30, 2018, 3,264 share options from indirect subsidiary Brado Logística S.A were excluded from the diluted weighted-average number of ordinary shares calculation because their effect would have been anti-dilutive.

For the nine month period ended at September 30, 2018, 656,000 shares related to the share repurchase plan of subsidiary Cosan S.A. have an antidilutive effect, so they were not considered in the diluted earnings per share analysis.

<b>Foreign exchange exposure, net</b>	<b>(1,371,454)</b>	<b>(1,082,946)</b>

(i) These balances are equivalent to the notional amount in U.S. Dollars converted to R\$ at the Dollar rate of September 30, 2018 and December 31, 2017 respectively.

*Sensitivity analysis on changes in foreign exchange rates:*

The probable scenario was defined based on the US dollar market rates projected for September 30, 2019, which determines the fair value of the derivatives at that date. Stressed scenarios (positive and negative effects, before taxes) were defined based on adverse impacts of 25% and 50% on the US dollar exchange rates used in the probable scenario.

Based on the financial instruments denominated in U.S. Dollars at September 30, 2018, the Company performed a sensitivity analysis with a 25% and 50% increase in the exchange rate (US \$ / US \$). The probable scenario considers the Company's projections made by specialized advisory services for 12-month exchange rates for companies with real functional currency (positive and negative, before taxes), as follows:

**Exchange rate sensitivity analysis (R\$/US\$)**

	Scenario					
	September 30, 2018	Probable	25%	50%	-25%	-50%
U.S.\$	4.0039	3.4300	4.2875	5.1450	2.5725	1.7150

The external source used by the company for market projections was a specialized consultant.

Considering the above scenario the profit or loss would be impacted as follows:

Instrument	Risk factor	Variation scenario				
		Probable	25%	50%	-25%	-50%
