Incorporated in the Republic of South Africa

CERTAIN FORWARD-LOOKING STATEMENTS

Certain statements contained in this document, including without limitation, those concerning the economic outlook for the gold mining industry, expectations regarding gold prices and production, the completion and commencement of commercial operations of certain of the company's exploration and production projects, and the company's liquidity and capital resources and expenditure, contain certain forward-looking statements regarding the company's operations, economic performance and financial condition. Although the company believes that the expectations reflected in such forward-looking statements are reasonable, no assurance can be

given that such expectations will prove to have been correct. Accordingly, results could differ

materially from those set out in the forward-looking statements as a result of, among other factor changes in economic and market conditions, success of business and operating initiatives,

changes in the regulatory environment and other government actions, fluctuations in gold prices and exchange rates, and business and operational risk management.

LETTER FROM THE CHAIRMAN

AND THE CHIEF EXECUTIVE OFFICER

Dear Shareholder

ANGLOGOLD FOURTH QUARTER AND 1999 ANNUAL RESULTS

AngloGold today reports a good set of annual results, but a disappointing fourth quarter.

For the 1999 financial and calendar year, headline earnings (adjusted for a change in the tax rat to R1. 9 billion, gold production has increased by 5%, while both cash costs and total costs have Return on capital employed at 12% and on shareholders' equity at 15% demonstrate that this company returns for its shareholders even in the weakest of gold markets. The company is pleased to annot of R11, for a total dividend of R20 for 1999, 29% up on 1998.

In this fourth quarter, headline earnings (before the deferred tax rate adjustment) declined by 6 (\$79. 5 million), gold produced by 5%, with cash costs increasing to \$223 (7% up), and total cost a received gold price of \$319, 1% higher than the previous quarter.

The reduced production was anticipated in the operations in the Americas, and in Mali. The South decline of 4% quarter on quarter is disappointing and is the focus of management attention at bot division and corporate level. More detailed reasons for this decline are set out elsewhere in this

Looking forward, with the acquisition of Acacia, AngloGold now produces some 1. 5 million ounces shallow mining (approximately 20% of total production). This represents a significant change in toperational risk profile and signals a positive development for all of AngloGold's stakeholders communities and governments. The company will be energetically exploring further opportunities to geographical and mining mix in 2000.

The past year saw an increase in capital expenditure, mainly in the South African operations. Her

projects, all of which have recently been subjected to rigorous technical and financial reviews, produce 25 million ounces of gold, at a projected average cash cost of \$180 per ounce using upgraand modern technology.

The Washington Agreement on the selling, lending and leasing of gold has seen the price rise shar around \$290. The company continues to believe that physical market fundamentals are positive, and

market conditions will lead to renewed investor interest in the metal. In 2000 the company will of innovative ways to expand and deepen these physical markets for our product.

During 1999, the company has intensified its efforts to achieve much safer working conditions at particular at the South African operations. The Board and Management realise that much remains to encouraging to report a 25% reduction in fatalities and an 11% reduction in lost time accidents, respectively by 17% and 5% in each case. The Board has high expectations of continued improvement measures at hopefully even faster rates.

SOUTH AFRICA

Overall performance

Gold production decreased by 10% in 1999 to 178. 7 tonnes (57 million ounces) against a planned of 6%, notwithstanding marginal improvements in both value and volume efficiencies. Rand cash cost R44 161 per kilogram but decreased by 1% to \$225 per ounce as a result of the devaluation of the

For the year. Kopanang, Tau Lekoa, Tshepong and Mponeng posted improved performances over both pand the previous year's results. Ergo maintained a steady performance despite a mid-year problem

elution building. Great Noligwa intersected the Jersey fault earlier than planned, experiencing a

produced. Despite this, it exceeded targeted gold production and operating profit levels.

Events at a number of operations hampered production and operating performance, year on year: Mat

earthquake (2. 3 tonnes), fires at Bambanani (0. 7 tonnes), the Klippan washout at Joel (0. 5 tonshaft failure at Savuka (1. 2 tonnes). TauTona and Deelkraal tabled disappointing results, followseismicity and infrastructural problems.

After a slow start to 1999, operations improved from mid-year through to the third quarter. In th

production fell by 4% to 43 363 kilograms. This was due to the adverse impact on production of in

at TauTona, slower than anticipated start-up at the Matjhabeng's Eland shaft, the impact of the fand the seismic events at West Wits operations. On the cost side, there was unplanned expenditure infrastructure and to counter equipment failure at both Bambanani and TauTona.

Unit cash costs increased by 7% to R46 665 per kilogram and by 6% to \$237 per ounce. Operating pr 27% in the fourth quarter to R463. 8 million. Productivity measured in square metres per employee

4. 28, but the adverse gold production resulted in grams per employee falling to 174.

Capital projects

The shaft sinking at Joe! has reached 129 level (1 293 metres below surface) and station developm

The Mponeng deepening project is progressing well. Sinking operations are complete to 123 level (below surface) and equipping of the SS1 shaft have begun. Development of the top cut in the 81 le

chamber has also started.

The Moab Khotsong project continues to progress well. The work in the rock/ventilation and main s

acceptable rates with no problems envisaged.

The carbon technology project at West Wits is functionally complete with minor work still to be of

residue thickener.

The sub shaft deepening at Elandsrand has been completed. The major remaining components are accedevelopment on 102, 105, 109 and 113 levels (3 000, 3 200, 3 400 and 3 800 metres, respectively) development. A total of 6 014 metres is planned for the 2000 financial year.

OTHER AFRICAN OPERATIONS

AngloGold has a 38% interest in the Sadiola mine in Mali and a 100% interest in the Navachab mine

For the year, Sadiola increased production by 7% over 1998 to 206 000 attributable ounces. This, decrease in cash costs to \$102 per ounce, resulted in a 2% increase in operating profit for the y

As reported previously grades at Sadiola for the fourth quarter were unlikely to be as high as the

the record third quarter. Though throughput increased by 3% to 560 tonnes, a lower average recove

3.7 grams per tonne for the quarter, together with lower metallurgical recoveries, resulted in a production decreasing by 15% to 51~000 ounces. Cash costs increased by 23% to \$108 per ounce large

the fall in gold production.

The feasibility study for Yatela has been completed and the AngloGold Board has approved capital

\$76 million for the development of this mine. The Board's approval is subject to the successful of negotiations with the Mali Government and the completion of financing for the project. Situated 2

Mali-registered company AngloGold Services Mali SA (ANSER).

north of Sadiola, Yatela will be an open-pit operation with an ore treatment rate of 2. 5 million produce 1 2 million ounces of gold over a five-year period at a cash cost of \$175 per ounce. Consto begin in May 2000 with the first gold production during May 2001. AngloGold will hold a 40% sh

venture with IAMGOLD holding 40% and the Mali Government 20%. AngloGold will manage the operation

In 1999, production at Navachab increased by 8% over 1998 to 65 000 ounces. Cash costs decreased \$240 per ounce, although much of this improvement was attributable to the devaluation of the Nami

Navachab had a good quarter with production increasing by 19% to 19 000 ounces, resulting in unit decreasing by 10% to \$217 per ounce.

While the problems reported during the previous quarter may still limit further investment at Nav

been granted for a western extension to the pit that will extend the life of Navachab to the year eastern extension has been delayed until 2001.

NORTH AMERICA

These operations comprise AngloGold's 70% interest in the Jerritt Canyon joint venture and the 67

(100% interest in production ounces, subject to contract obligations by the joint venture partner & Victor joint venture. In their first year as part of AngloGold, these operations have performed by producing 485 000 ounces at a cash cost of \$173 per ounce.

In aggregate, the North American operations had a difficult production quarter. Gold production of

129 000 attributable ounces, despite an excellent performance at Jerritt Canyon. A creditable cost though, ensured that unit cash costs were well maintained at \$162 per ounce, 8% lower than the pr

As a result of higher head grades and plant throughput, Jerritt Canyon enjoyed a much improved for

in terms of gold production and cash costs per ounce. In November 41 300 ounces were produced, a

production for this operation. Cash costs per ounce were \$30 lower than in the previous quarter,

improved production as well as the benefit of cost containment measures.

The long history of surface mining at Jerritt Canyon came to a close with the depletion of reserve pit. Mining is now concentrated at the two underground mines, SSX and Murray, with two new undergound mines, and Smith, under development.

This quarter saw Jerritt Canyon suffer its single minor lost time injury for the year Employee pr

improve, aided by the new underground truck fleet introduced earlier in the year.

At Cripple Creek & Victor, contrary to process model predictions, a substantial dip in process so

experienced during the latter half of the quarter. This resulted in the gold production being les

achieved in the previous quarter.

On the positive side, there were no lost time accidents reported during the fourth quarter and the

single minor lost time accident reported in July. Despite an ongoing cost containment programme, productivity measures declined owing to the relatively low metal production.

Good progress was made with the East Cresson Pit capital project and the synthetic liner was place

Heap Leach Facility Phase 2A extension. Earthworks associated with Phase 3 were completed and, for

installation in mid-2000, first production is expected in the latter months of 2000.

SOUTH AMERICA

These operations comprise AngloGold's 100% interest in the Morro Velho mines and the 50% interest

mines, both in Brazil, as well as the 46. 25% interest in Cerro Vanguardia mine in southern Argentoperations, also in their first year as part of AngloGold, exceeded expectations by producing 425 creditable \$128 per ounce.

Production at each of the three operations decreased from the previous quarter. In aggregate, the declined by 11%. Cash costs, though, were maintained at levels similar to the previous quarter at

During December, modifications to the milling circuit at Serra Grande plant were completed, which

throughput by 17% to 700 000 tonnes per annum.

At Cerro Vanguardia, with the exception of the throughput constraints associated with the primary the other operational problems associated with the plant as previously reported have been overcome a record monthly tonnage treated of 66 297 tonnes for December. Work on the primary crusher sections are considered as the constraints associated with the primary crusher sections.

The Completion Certificates of the Senior Lender Technical Completion Tests as submitted to the laccepted.

Safety performance at the three operations continues to be monitored with five lost time accident compared with seven in the previous quarter.

In addition to the two previously reported exploration joint venture agreements, an agreement has with Conquistador Mines to pursue exploration prospects in Colombia. During November, an exploration opened in Lima. Peru, to take advantage of this region's high gold prospectivity. Other exploration America continues to be centred on the existing mine exploitation areas and in Brazil and Argentia

The gold price rallied in reaction to the announcement on 26 September 1999 by members of the Eur Bank, supported by Great Britain and Switzerland, of a ceiling of 2 000 tonnes of gold sales by t next five years, and no increases to current levels of gold lending by the group. The rally carri recorded high of \$338 per ounce during the final quarter of 1999, This peak was over \$80 or 30% at which the metal traded in mid-September. Inevitably, the market has corrected for this sharp respectively.

quarter trading at around \$290 per ounce. A brief rally above \$300 early in February emphasises t

is underlying investor interest in the metal since the change in sentiment during the final quartaverage spot price of S295 per ounce for the final quarter of the year compares favourably with the \$259 per ounce for the previous quarter, and \$278 for the year as a whole.

The announcement by the European Central Bank members, coming on the heels of arrangements entered

the International Monetary Fund to avoid the sale of a portion of its holdings into the open mark gold market with a most important reassurance of the concern felt by the official sector over neg

the gold market over official sales, and of the official sector's desire to eliminate that distor a considerable degree, this reassurance has been effective in eliminating the kind of scaremonger

affected this market in recent years. New sales of gold by the Dutch Central Bank announced late been accepted by the market and absorbed without negative effect as being part of the announced of

from that sector.

The sharp rise in the spot price of the metal had an unavoidably negative effect on physical dema

major developing markets for the metal, particularly in India and the Middle East, where demand i sensitive. As the spot price returned to \$300 per ounce, so sales of bullion scrap from the Middl and buying interest returned; overall, we expect that final demand figures for gold for 1999 will

encouraging trend.

The volatility in the gold price during the final quarter was increased by uncertainty in the mar

positions of certain gold mining companies with large gold price hedges in proportion to their acgold, and by a degree of disorder in the gold lending market. While the gold lending market has r

there remains concern about those gold mining companies with credit difficulties brought about by size of their hedge positions. The nature of these difficulties has provided important lessons for

gold forward markets, and have caused many gold mining companies to consider the nature and appro

their gold price hedge positions.

The AngloGold net open hedge position as at the end of 1999 shown below reflects a lower level of than that reported at the end of the third quarter of 1999. The additional table of all open positions are considered as the end of the third quarter of 1999.

31 December 1999 provides for the first time the details of both forward and option contracts in

with the net delta of all open positions previously reported by the company. The hedge position fincluded. All gold lease rates in this open position were fixed over the year-end. Going forward,

the forward positions have gold lease rates fixed through to maturity; the gold lease rate is fix

positions.

Net Delta Open Hedge Position as at 31 December 1999

As at 31 December 1999, the company had outstanding the following net forward pricing commitments

production. A portion of these sales consists of US dollar-priced contracts which have been converted at an average annual forward rand values based on a spot rand/dollar rate of 6. 14 available on 3

- 1. The audited financial results have been prepared in accordance with International Accounting Standards. Certain items for the previous quarter have been restated for comparative purposes. The attributable profit previously reported for the September quarter remains unchanged.
- 2. With effect from 7 February 2000, AngloGold acquired 100% of the issued share capital of Acacia Resources Limited (Acacia), a gold company operating in Australia. This followed the close of the offer on 24 December 1999 and the subsequent compulsory acquisition of the shares held by those shareholders who had not accepted the offer.

 The results of Acacia to 31 December 1999 have not been consolidated. However, the Group Balance Sheet as at December 1999 includes the assets and liabilities of Acacia.
- 3. During the quarter, 8 659 379 ordinary shares were allotted to Acacia shareholders at a price of R2.98 per share and 32 050 ordinary shares were allotted in terms of the Share Incentive Scheme, thereby increasing the number of ordinary shares in issue at 31 December 1999 to 106 614 678.

Since the end of the quarter there were allotments of 351 009 ordinary shares at a price of R2.98 per share to complete the acquisition of Acacia and 2 200 ordinary shares in terms of the Share Intensive Scheme. The number of ordinary shares in issue at the date of this report totalled 106 967 887, which includes 9 010 388 shares issued for the acquisition of Acacia and in respect of which application has been made for a listing on the Johannesburg Stock Exchange.

- 4. Earnings per share have been calculated using the weighted average number of shares in issue.
- 5. Orders placed and outstanding on capital contracts as at 31 December 1999 totalled R381.8 million, equivalent to US\$62.0 million at the rate of exchange ruling on that date.
- 6. Year 2000

All operations of the company reported a smooth transition into the year 2000. Costs incurred to end December 1999 to achieve this status, exclusive of expenditure on planned upgrades, internal manpower and certain outsourcing charges, amounted to R15 million.

7. Dividend

The directors have today declared Final Dividend No. 87 of 1 100 (1998; 800) South African cents share for the year ended 31 December 1999 Payment details are as follows:
