## Outlook

- **Strategic priorities:** (i) focus on and strengthening of Food segment, (ii) sales growth above the industry average, supporting market share<sup>(\*)</sup> gains, (iii) continued expansion of Assaí format, and (iv) optimization of the store portfolio;
- **Economic environment and business evolution:** Brazil's high unemployment and weak consumer spending challenge the recovery of the retail industry. However, for the past 18 months, GPA has outperformed the industry average (ABRAS<sup>(4)</sup> and IBGE<sup>(5)</sup>), confirming the market share<sup>(\*)</sup> gains by Extra Hiper and Assaí, as well as the stability in other segments.

*(\*) According to Nielsen data for each segment. (1) Net sales adjusted for the calendar effect. (2) Includes converted stores, which contributed 290 bps in 3Q17. (3) Includes non-discounted credit card receivables of R\$837 million in 3Q17 and R\$402 million in 3Q16. (4) Brazilian Supermarkets Association. (5) Monthly Retail Survey (PMC) conducted by IBGE.*

□ **Guidance for 2017:** (i) Sales: continuity in market share<sup>(\*)</sup> gains at both Multivarejo and Assaí; (ii) EBITDA Margin<sup>(6)</sup>: around 5.5% in the Food segment, supported by higher profitability at Assaí and at Multivarejo; (iii) CAPEX: approximately R\$1.2 billion; and (iv) target to raise more than US\$50 million through synergies in Latin America.

*(\*) According to Nielsen data for each segment. (6) EBITDA adjusted by Other Operating Income and Expenses, excluding non-recurring tax credits.*

*“The results we have been delivering since the end of 2016 are in line with what was planned and we are continuing this positive trend this quarter. Even facing a quarter marked by a complex macroeconomic scenario, with sharp deflation in some of the food categories, we can notice an improvement in operational and financial improvement as a result of the efforts internally carried out by the team. We continue to move forward on our strategic priorities of building a more balanced store portfolio with the successful conversion of hypermarkets into Assaí, the digital transformation of our business through initiatives such as “My Discount”, and growth in market share across all business units.”*

**Ronaldo Iabrudi, CEO of GPA**

## **SALES PERFORMANCE**

**Net sales amounted to R\$10.9 billion, growing 8.1%<sup>(1)</sup> vs. 3Q16, explained by:**

**Strong sales growth at Assaí of 25.2%<sup>(1)</sup> and of 7.7%<sup>(1) (2)</sup> on a same-store basis. Despite the sharp deflation in the period, Assaí posted its strongest combined growth in sales volume and customer traffic of recent quarters;**

**Multivarejo reached same-store sales growth of 0.6%<sup>(1)</sup>. Sales volume recovery at the Pão de Açúcar banner was the highlight. Extra Hiper continued to deliver the best performance among formats, with market share<sup>(\*)</sup> gains;**

**Acceleration of store conversions: 4 stores converted in the quarter, totaling 9 stores since 4Q16, which registered revenue growth of around 3.0x;**

**Multivarejo and Assaí continued to gain market share<sup>(\*)</sup> in the quarter.**

At Multivarejo, net sales reached R\$6.2 billion in the quarter and same-store sales growth was 0.6%<sup>(1)</sup>, with sales performance improving significantly over the quarter. The highlights were: (i) the recovery in performance at the Pão de Açúcar banner, (ii) Extra Hiper maintained the best performance among banners, and (iii) continued market share<sup>(\*)</sup> gains in 2017 in relation to 2016.

Total net sales performance was affected by the closure of 15 hypermarkets since the start of the year for conversion into Assaí stores, which had a negative impact of over 300 bps. Moreover, food at home inflation, which registered inflation of 16.3% in 3Q16, registered deflation of - 4.5% in 3Q17.

The Pão de Açúcar banner posted recoveries in sales and volume, reflecting the initiatives implemented since end-2Q17, such as (i) reinforcing the loyalty program with the “My Discount” program, (ii) the promotional action “Collect & Win”, and (iii) the strengthening of iconic products with more attractive pricing.

In addition, the banner launched a store-renovation plan, with the expectation of renovating around 50 stores by year-end, with 11 full renovations and 39 light renovations.

At Assaí, net sales amounted to R\$4.7 billion, advancing 25.2%<sup>(1)</sup> vs. 3Q16. On a same-store basis, Assaí net sales grew 7.7%<sup>(1)(2)</sup>. Despite the intense food deflation (the food at home component of IPCA inflation went from 16.3% in 3Q16 to -4.5% in 3Q17) in important categories, such as Commodities, Dairy, Meat and Produce, Assaí delivered sales volume growth on the prior-year period and continuous improvement in customer traffic.

The 17 stores opened in the last 12 months added around R\$900 million of gross sales in the quarter, demonstrating the success of the expansion program and the strong and rapid adherence of customers to Assaí's value proposition, especially in regions new to the banner.

Converted stores delivered a better-than-expected sales multiple of around 3.0x, confirming the success of the locations/regions selected under the project to optimize the store portfolio.

In the quarter, Assaí reached 115 stores and accounted for 43.0% of GPA Food's total net sales, an increase of 600 bps on the prior-year period. The Assaí format continued to capture market share<sup>(\*)</sup> gains in the quarter, of around 330 bps compared to the same period last year.

*(\*) According to Nielsen data for each segment. <sup>(1)</sup> Net sales adjusted for the calendar effect.*

*<sup>(2)</sup> Includes converted stores, which contributed 290 bps in 3Q17.*

## OPERATING PERFORMANCE BY BUSINESS

### Multivarejo

**Gross profit** reached R\$1,663 million, with margin of 26.7%, in line with the year-ago period, due to the maintenance of commercial strategies and the stability in shrinkage levels and logistics costs.

**Selling, general and administrative expenses** amounted to R\$1,348 million, decreasing 4.4% compared to 3Q16. The main initiatives explaining the lower expenses were:

- Higher efficiency in headcount due to the multi-functionality, flexibility and process-review initiatives at stores, as well as the variable compensation model, which generated productivity gains;
- Expenses with electricity improved vs. 3Q16 due to the roll out of the energy optimization projects
- The reduction in stores operating and general expenses

Other Operating Income and Expenses, which amounted to R\$130 million, were mainly related to restructuring and the gains/losses from property, plant and equipment, which amounted to R\$80 million. In addition, state tax liabilities of R\$30 million were included in the Special Installment Program (PEP).

**Adjusted EBITDA** amounted to R\$345 million in the period, growing 7.7%, despite the smaller store portfolio (mainly due to the closure of 15 Extra Hiper stores for conversion). Adjusted EBITDA margin stood at 5.5%, expanding 50 bps from 3Q16.

### Assaí

**Gross profit** reached 15.0%, expanding 50 bps from 3Q16, basically explained by:

- Joint commercial actions with suppliers targeting small merchants;
- Development of other categories to offset the deflationary impact;
- Maintenance of low shrinkage levels;
- Maturation of the store park;
- Higher share of individuals customers

**Operating expenses** stood at 10.2%, in line with 1H17, despite the accelerated pace of organic expansion and conversions. The expectation of 11 openings in 4Q17 (of which 8 conversions and 3 organic) impacted 3Q17 with the operational expenses inherent to the expansion.

**Adjusted EBITDA** reached R\$225 million, with increase of 35.9%. Adjusted EBITDA margin stood at 4.8%, expanding 40 bps vs 3Q16, reflecting the gross margin expansion and contention of operating expenses.

## **FINANCIAL PERFORMANCE**

### **Financial result**

The financial result reached R\$154 million, down of 35.0% from the year-ago period. As a percentage of net sales, the result corresponded to 1.4%, improving 90 bps.

The improvement is explained by (i) the gross debt reduction of R\$767million, (ii) the lower interest rates (14.1% in 3Q16, vs. 9.2% in 3Q17), and (iii) the reduction in cost of receivables discount of 20 bps as a percentage of net sales.

### **Net income**

Net income attributable to controlling shareholders, considering continuing and discontinued operations, came to R\$32 million, with margin of 0.3%, an increase of approximately R\$ 150 million compared to 3Q16.

In the Food segment, net income attributable to controlling shareholders from continuing operations, adjusted for other income and expenses, amounted to R\$137 million, increasing four times over 3Q16, with the highest contribution coming from Assaí.

### **Earnings per share**

Diluted EPS was 0.10880 per common share and 0.12006 per preferred share.

### **Net debt**

Net debt, adjusted for non-discounted receivables, amounted to R\$2,604 million, a reduction of R\$532 million from a year earlier. The net debt / adjusted EBITDA ratio stood at 1.0x in 3Q17, down from 1.3x a year earlier.

Gross debt stood at R\$4,708 million, down R\$767 million from 3Q16.

The cash balance was R\$1,266 million and the non-discounted receivables balance was R\$837 million, for total available resources of R\$2.1 billion, as well as the preapproved/confirmed credit facilities of R\$1.1 billion.

The agencies S&P Global Ratings and Fitch Ratings reaffirmed the Company's ratings of 'brAAA stable' and 'AA(bra) stable,' respectively, which reflects the continued prospects for a solid market position and growing cash flow.

### **Capital expenditure**

CAPEX in the Food segment amounted to R\$446 million, increasing R\$107 million from the same period last year, mainly due to the higher investments in projects to convert Extra Hiper stores into Assaí stores.

Four conversions were delivered in the quarter, while another 8 stores are undergoing conversion, with an estimated 15 store conversions to be delivered by the end of 2017. Moreover, in line with its organic growth strategy, the Company opened 1 Assaí store, 1 Pão de Açúcar store, 3 Minuto Pão de Açúcar stores and 2 drugstores in the quarter.

Continuation of the process to capture synergies in Latin America, which includes:

- The new Apparel concept being implemented at the Extra Hiper format. The project has already implemented 24 stores and expectation to reach 40 stores by year end;
- Joint negotiations of equipment and services, which reached R\$21.5 million at GPA by the quarter's end;
- Sharing of good practices in perishables and transfer of know-how to reduce shrinkage;
- The Aliados Compre Bem project, which already has 433 partners, has a goal of reaching 500 by year-end;
- The capture of synergies for Latin America has progressed faster than expected, goal of US\$50 million already surpassed at the end of the quarter.

### **Strategic priorities:**

- 1) Focus on Food segment:** continued investments in formats with the highest returns, such as Assaí and Pão de Açúcar, and intensification of store renovations;
- 2) Portfolio optimization:** focus on conversions of Extra Hiper stores into Assaí stores;
- 3) Continued expansion at Assaí:** total of 15 conversions and other 5 new stores, with an average return of over 20%.

### **Guidance for 2017:**

- 1) Sales: continued market share gains at both Multivarejo and Assaí;
- 2) EBITDA Margin<sup>(\*)</sup>: around 5.5% in the Food segment, supported by higher profitability at Assaí and Multivarejo;
- 3) CAPEX: approximately R\$1.2 billion;
- 4) Target to raise more than US\$50 million through synergies in Latin America.

*(\*) EBITDA adjusted by Other Operating Income and Expenses, excluding non-recurring tax credits*

## Glossary

**Company's Business:** The Company's business is divided into two segments, namely Retail and Cash & Carry, grouped as follows:

**Food Segment:** Represents the combined results of Multivarejo and Assaí, excluding equity income (loss) from Cdiscount, which is not included in the operating segments reported by the Company. It includes retail and wholesale activities of products in general, including - but not limited to - food products, clothing, hygiene, medicines, fuels, furniture, consumer electronics and domestic utilities. Such activities are carried out both in physical and virtual establishments.

**Growth and Changes:** The growth and changes presented in this document refer to variations from the same period last year, except where stated otherwise.

**EBITDA:** EBITDA is calculated in accordance with Instruction 527 issued by the Securities and Exchange Commission of Brazil (CVM) on October 4, 2012.

**Adjusted EBITDA:** Measure of profitability calculated by excluding Other Operating Income and Expenses from EBITDA. Management uses this measure in its analyses as it believes it eliminates nonrecurring expenses and revenues and other nonrecurring items that could compromise the comparability and analysis of results.

**Adjusted Net Income:** Measure of profitability calculated as Net Income from continuing operations excluding Other Operating Income and Expenses and excluding the effects of Income and Social Contribution Taxes. Also excluded are the effects of nonrecurring direct income tax. Management uses this metric in its analyses given its belief that it eliminates any nonrecurring expenses and revenues and other nonrecurring items that could compromise the comparability and analysis of results.

**Earnings per share:** Basic earnings per share are calculated based on the weighted average number of outstanding shares of each category during the year, and treasury shares.

Diluted earnings per share are calculated as follows:

- numerator: profit for the year adjusted by dilutive effects from stock options granted by subsidiaries; and
- denominator: the number of shares of each category adjusted to include potential shares corresponding to dilutive instruments (stock options), less the number of shares that could be bought back at market, if applicable.

Equity instruments that will or may be settled with the Company and its subsidiaries' shares are only included in the calculation when its settlement has a dilutive impact on earnings per share.
