Form 10-Q
May 06, 2014

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549
FORM 10-Q

QUARTERLY REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the Quarterly Period ended March 31, 2014

TRANSITION REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
Commission file number: 000-51201
BofI HOLDING, INC.
(Exact name of registrant as specified in its charter)

Delaware 33-0867444
(State or other jurisdiction of (I.R.S. Employer
incorporation or organization) Identification No.)

4350 La Jolla Village Drive, Suite 140, San Diego, CA 92122
(Address of principal executive offices) (Zip Code)

Registrant's telephone number, including area code: (858) 350-6200

Indicate by check mark whether the Registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Website every Interactive Data file required to be submitted and posted pursuant to Rule 405 of Regulation S-T (Section 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Securities Exchange Act of 1934.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company
Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Securities Exchange Act of 1934). Yes No

The number of shares outstanding of the Registrant's common stock on the last practicable date: 14,196,699 shares of common stock, \$0.01 par value per share, as of April 30, 2014.

BOFI HOLDING, INC. AND SUBSIDIARY
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
FOR THE THREE AND NINE MONTHS PERIOD ENDED MARCH 31, 2014 AND 2013
(Dollars in thousands, except per share data)
(Unaudited)

1. BASIS OF PRESENTATION

The condensed consolidated financial statements include the accounts of BofI Holding, Inc. and its wholly owned subsidiary, BofI Federal Bank (formerly Bank of Internet USA, the “Bank” and collectively with BofI Holding, Inc., the “Company”). All significant intercompany balances and transactions have been eliminated in consolidation.

The accompanying interim condensed consolidated financial statements, presented in accordance with accounting principles generally accepted in the United States of America (“GAAP”), are unaudited and reflect all adjustments which, in the opinion of management, are necessary for a fair statement of financial condition and results of operations for the interim periods. All adjustments are of a normal and recurring nature. Results for the nine months ended March 31, 2014 are not necessarily indicative of results that may be expected for any other interim period or for the year as a whole. Certain information and note disclosures normally included in the audited annual financial statements prepared in accordance with GAAP have been condensed or omitted pursuant to the rules and regulations of the Securities and Exchange Commission (“SEC”) with respect to interim financial reporting. The accompanying unaudited condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements and accompanying notes for the year ended June 30, 2013 included in our Annual Report on Form 10-K.

Certain reclassifications have been made to the prior period financial statements to conform to the current period presentation.

2. SIGNIFICANT ACCOUNTING POLICIES

Securities. Debt securities are classified as held-to-maturity and carried at amortized cost when management has both the positive intent and ability to hold them to maturity. Debt securities are classified as available-for-sale when they might be sold before maturity. Trading securities refer to certain types of assets that banks hold for resale at a profit at fair value. Increases or decreases in the fair value of trading securities are recognized in earnings as they occur. Securities available-for-sale are carried at fair value, with unrealized holding gains and losses reported in other comprehensive income, net of tax.

Gains and losses on securities sales are based on a comparison of sales proceeds and the amortized cost of the security sold using the specific identification method. Purchases and sales are recognized on the trade date. Interest income includes amortization of purchase premium or discount. Premiums and discounts on securities are amortized or accreted using the level-yield method without anticipating prepayments, except for mortgage-backed securities where prepayments are anticipated. The Company’s portfolios of held-to-maturity and available-for-sale securities are reviewed quarterly for other-than-temporary impairment. In performing this review, management considers (1) the length of time and extent that fair value has been less than cost, (2) the financial condition and near term prospects of the issuer, (3) the impact of changes in market interest rates on the market value of the security and (4) whether the Company intends to sell or it is more likely than not that it will be required to sell a security in an unrealized loss position before the Company recovers the security’s amortized cost. If either of these criteria for (4) is met, the entire difference between amortized cost and fair value is recognized in earnings. Alternatively, if the criteria for (4) is not met, the amount of impairment recognized in earnings is limited to the amount related to credit losses, while impairment related to other factors is recognized in other comprehensive income. The credit loss is defined as the difference between the present value of the cash flows expected to be collected and the amortized cost basis.

Loans. Loans that management has the intent and ability to hold for the foreseeable future or until maturity or payoff are reported at the principal balance outstanding, net of unearned interest, deferred purchase premiums and discounts, deferred loan origination fees and costs, and an allowance for loan losses. Interest income is accrued on the unpaid

principal balance. Premiums and discounts on loans purchased as well as loan origination fees, net of certain direct origination costs, are deferred and recognized in interest income using the level-yield method.

Recognition of interest income on all portfolio segments is generally discontinued at the time the loan is 90 days delinquent unless the loan is well secured and in process of collection. Past due status is based on the contractual terms of the loan. In all cases, loans are placed on nonaccrual or charged-off at an earlier date if collection of principal or interest is considered doubtful.

All interest accrued but not received for loans placed on nonaccrual, is reversed against interest income. Interest received on such loans is accounted for on the cash-basis or cost recovery method, until qualifying for return to accrual. Loans are returned

Table of Contents

to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured.

Loans Held for Sale. U.S government agency ("agency") loans originated and intended for sale in the secondary market are carried at fair value. Net unrealized gains and losses are recognized through the income statement. The Bank generally sells its loans with the servicing released to the buyer. Gains and losses on loan sales are recorded as mortgage banking income, based on the difference between sales proceeds and carrying value. Non-agency loans held for sale are carried at the lower of cost or fair value.

Loans that were originated with the intent and ability to hold for the foreseeable future (loans held in portfolio) but which have been subsequently designated as being held for sale for risk management or liquidity needs are carried at the lower of cost or fair value calculated on an individual loan by loan basis.

There may be times when loans have been classified as held for sale and for some reason cannot be sold. Loans transferred to a long-term-investment classification from held-for-sale are transferred at the lower of cost or market value on the transfer date. Any difference between the carrying amount of the loan and its outstanding principal balance is recognized as an adjustment to yield by the interest method. A loan cannot be classified as a long-term investment unless the Bank has both the ability and the intent to hold the loan for the foreseeable future or until maturity.

Allowance for Loan Losses. The allowance for loan losses is maintained at a level estimated to provide for probable incurred losses in the loan portfolio. Management determines the adequacy of the allowance based on reviews of individual loans and pools of loans, recent loss experience, current economic conditions, the risk characteristics of the various categories of loans and other pertinent factors. This evaluation is inherently subjective and requires estimates that are susceptible to significant revision as more information becomes available. The allowance is increased by the provision for loan losses, which is charged against current period operating results and recoveries of loans previously charged-off. The allowance is decreased by the amount of charge-offs of loans deemed uncollectible. Allocations of the allowance may be made for specific loans but the entire allowance is available for any loan that, in management's judgment, should be charged off. See Note 5 of these financial statement footnotes and the financial statement footnotes for the year ended June 30, 2013 included in our Annual Report on Form 10-K for further information.

New Accounting Pronouncements. In January 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2014-04, Receivables - Troubled Debt Restructurings by Creditors (Accounting Standards Codification 310-40), which will eliminate diversity in practice regarding the timing of derecognition for residential mortgage loans when a creditor is considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan. Under ASU 2014-04, physical possession of residential real estate property is achieved when either the creditor obtains legal title to the residential real estate property upon completion of a foreclosure or the borrower conveys all interest in the residential real estate property through completion of a deed in lieu of foreclosure in order to satisfy that loan. Once physical possession has been achieved, the loan is derecognized and the property recorded within other assets at the lower of cost or fair value (less estimated costs to sell). In addition, the guidance requires both interim and annual disclosure of both the amount of foreclosed residential real estate property held by the creditor and the recorded investment in consumer mortgage loans collateralized by residential real estate property that are in the process of foreclosure. The amendments in this update are effective for annual reporting periods beginning on or after December 15, 2014, and interim periods within those annual periods with retrospective disclosure necessary for all comparative periods presented. The adoption of this standard will result in additional disclosures but is not expected to have any impact on the Company's condensed consolidated financial statements or results of operations.

3. FAIR VALUE

Fair value is defined as the price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. ASC Topic 820, Fair Value Measurement, also establishes a fair value hierarchy which

requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Quoted prices in active markets for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date. Level 1 assets and liabilities include debt and equity securities that are actively traded in an exchange or over-the-counter market and are highly liquid, such as, among other assets and securities, certain U.S. treasury and other U.S. Government debt.

Observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Level 2 assets include securities with quoted prices that are traded less frequently than exchange-traded instruments and whose value is determined using a pricing

Table of Contents

model with inputs that are observable in the market or can be derived principally from or corroborated by observable market data.

Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of Level the assets or liabilities. Level 3 assets and liabilities include financial instruments whose value is determined 3: using pricing models such as discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation.

When available, the Company generally uses quoted market prices to determine fair value, in which case the items are classified in Level 1. In some cases where a market price is available, the Company will make use of acceptable practical expedients (such as matrix pricing) to calculate fair value, in which case the items are classified in Level 2.

The Company considers relevant and observable market prices in its valuations where possible. The frequency of transactions, the size of the bid-ask spread and the nature of the participants are some of the factors the Company uses to help determine whether a market is active and orderly or inactive and not orderly. Price quotes based upon transactions that are not orderly are not considered to be determinative of fair value and should be given little, if any, weight in measuring fair value.

If quoted market prices are not available, fair value is based upon internally developed valuation techniques that use, where possible, current market-based or independently sourced market parameters, such as interest rates, credit spreads, housing value forecasts, etc. Items valued using such internally generated valuation techniques are classified according to the lowest level input or value driver that is significant to the valuation. Thus, an item may be classified in Level 3 even though there may be some significant inputs that are readily observable.

The following section describes the valuation methodologies used by the Company to measure various financial instruments at fair value, including an indication of the level in the fair value hierarchy in which each instrument is generally classified:

Securities—trading. Trading securities are recorded at fair value. The trading portfolio consists of two different issues of floating-rate debt securities collateralized by pools of bank trust preferred securities. Recent liquidity and economic uncertainty have made the market for collateralized debt obligations less active or inactive. As quoted market prices are not available, the Level 3 fair values for these securities are determined by the Company utilizing industry-standard tools to calculate the net present value of the expected cash flows available to the securities from the underlying assets. The Company's expected cash flows are calculated for each security and include the impact of actual and forecasted bank defaults within each collateral pool as well as structural features of the security's tranche such as lock outs, subordination and overcollateralization. The forecast of underlying bank defaults in each pool is based upon a quarterly financial update including the trend in non-performing assets, the allowance for loan losses and the underlying bank's capital ratios. Also a factor is the Company's loan loss experience in the local economy in which the bank operates. At March 31, 2014, the Company's forecast of cash flows for both securities includes actual and forecasted defaults totaling 24.9% of all banks in the collateral pools, compared to 14.1% of the banks actually in default. The expected cash flows reflect the Company's best estimate of all pool losses which are then applied to the overcollateralization reserve and the subordinated tranches to determine the cash flows. The Company selects a discount rate margin based upon the spread between U.S. Treasury rates and the market rates for active credit grades for financial companies. The discount margin when added to the U.S. Treasury rate determines the discount rate, reflecting primarily market liquidity and interest rate risk since expected credit loss is included in the cash flows. At March 31, 2014, the Company used a weighted average discount margin of 450 basis points above U.S. Treasury rates to calculate the net present value of the expected cash flows and the fair value of its trading securities.

The Level 3 fair values determined by the Company for its trading securities rely heavily on management's assumptions as to the future credit performance of the collateral banks, the impact of the global and regional economic activity, the timing of forecasted defaults and the discount rate applied to cash flows. The fair value of the trading securities at March 31, 2014 is sensitive to an increase or decrease in the discount rate. An increase in the discount margin of 100 basis points would have reduced the total fair value of the trading securities and decreased net income before income tax by \$823. A decrease in the discount margin of 100 basis points would have increased the total fair

value of the trading securities and increased net income before income tax by \$965.

Securities—available-for-sale and held-to-maturity. Available-for-sale securities are recorded at fair value and consist of residential mortgage-backed securities ("RMBS") issued by U.S. agencies, non-agencies, collateralized loan obligations, and municipals. Held-to-maturity securities are recorded at amortized cost and consist of RMBS issued by U.S. agencies, RMBS issued by non-agencies, and municipals. Fair value for U.S. agency securities is generally based on quoted market prices of similar securities used to form a dealer quote or a pricing matrix. There continues to be significant illiquidity in the market for RMBS issued by non-agencies, impacting the availability and reliability of transparent pricing. As orderly quoted market prices are not available, the Level 3 fair values for these securities are determined by the Company utilizing industry-standard tools to calculate the net present value of the expected cash flows available to the securities from the underlying mortgage assets. The Company

Table of Contents

computes Level 3 fair values for each non-agency RMBS in the same manner (as described below) whether available-for-sale or held-to-maturity.

To determine the performance of the underlying mortgage loan pools, the Company estimates prepayments, defaults, and loss severities based on a number of macroeconomic factors, including housing price changes, unemployment rates, interest rates and borrower attributes such as credit score and loan documentation at the time of origination. The Company inputs for each security a projection of monthly default rates, loss severity rates and voluntary prepayment rates for the underlying mortgages for the remaining life of the security to determine the expected cash flows. The projections of default rates are derived by the Company from the historic default rate observed in the pool of loans collateralizing the security, increased by and decreased by the forecasted increase or decrease in the national unemployment rate. The projections of loss severity rates are derived by the Company from the historic loss severity rate observed in the pool of loans, increased by (and decreased by) the forecasted decrease or increase in the national home price appreciation ("HPA") index. The largest factors influencing the Company's modeling of the monthly default rate are unemployment and housing price appreciation. The most updated national unemployment rate announced prior to the end of the period covered by this report (reported in February 2014) was 6.7%, down from the high of 10% in October 2009. Consensus estimates for unemployment are that the rate will continue to decline. Going forward, the Company is projecting lower monthly default rates. The range of loss severity rates applied to each default used in the Company's projections at March 31, 2014 are from 1.6% up to 84.2% based upon individual bond historical performance. The default rates and the severities are projected for every non-agency RMBS security held by the Company and will vary monthly based upon the actual performance of the security and the macroeconomic factors discussed above.

To determine the discount rates used to compute the present value of the expected cash flows for these non-agency RMBS securities, the Company separates the securities by the borrower characteristics in the underlying pool. Specifically, "prime" securities generally have borrowers with higher FICO scores and better documentation of income. "Alt-A" securities generally have borrowers with a little lower FICO and a little less documentation of income. "Pay-option ARMs" are Alt-A securities with borrowers that tend to pay the least amount of principal (or increase their loan balance through negative amortization). The Company calculates separate discount rates for prime, Alt-A and Pay-option ARM non-agency RMBS securities using market-participant assumptions for risk, capital and return on equity. The range of annual default rates used in the Company's projections at March 31, 2014 are from 0.3% up to 14.6% with prime securities tending toward the lower end of the range and Alt-A and Pay-option ARMs tending toward the higher end of the range. The Company applies its discount rates to the projected monthly cash flows which already reflect the full impact of all forecasted losses using the assumptions described above. When calculating present value of the expected cash flows at March 31, 2014, the Company computed its discount rates as a spread between 247 and 841 basis points over the interpolated swap curve with prime securities tending toward the lower end of the range and Alt-A and Pay-option ARMs tending toward the higher end of the range.

Loans Held for Sale. Loans held for sale at fair value are primarily single-family and multifamily residential loans. The fair value of loans held for sale is determined by pricing for comparable assets or by existing forward sales commitment prices with investors.

Impaired Loans. Impaired loans are loans which are inadequately protected by the current net worth and paying capacity of the borrowers or the collateral pledged. The accrual of interest income has been discontinued for impaired loans. The impaired loans are characterized by the distinct possibility that the Bank will sustain some loss if the deficiencies are not corrected. The Company assesses loans individually and identifies impairment when the loan is classified as impaired or has been restructured or management has serious doubts about the future collectibility of principal and interest, even though the loans may currently be performing. The fair value of an impaired loan is determined based on an observable market price or current appraised value of the underlying collateral. The fair value of impaired loans with specific write-offs or allocations of the allowance for loan losses are generally based on recent real estate appraisals or internal valuation analyses consistent with the methodology used in real estate appraisals and include other third-party valuations and analysis of cash flows. These appraisals and analyses are updated at least on an annual basis. The Company primarily obtains real estate appraisals and in the rare cases where an appraisal cannot be obtained, the Company performs an internal valuation analysis. These appraisals and analyses may utilize a single

valuation approach or a combination of approaches including comparable sales and income approaches. The sales comparison approach uses at least three recent similar property sales to help determine the fair value of the property being appraised. The income approach is calculated by taking the net operating income generated by the collateral property of the rent collected and dividing it by an assumed capitalization rate. Adjustments are routinely made in the process by the appraisers to account for differences between the comparable sales and income data available. When measuring the fair value of the impaired loan based upon the projected sale of the underlying collateral, the Company subtracts the costs expected to be incurred for the transfer of the underlying collateral, which includes items such as sales commissions, delinquent taxes and insurance premiums. These adjustments to the estimated fair value of non-performing loans may result in increases or decreases to the provision for loan losses recorded in current earnings. Such adjustments are typically significant and result in a Level 3 classification for the inputs for determining fair value.

Table of Contents

Other Real Estate Owned and Repossessed Vehicles. Non-recurring adjustments to certain commercial and residential real estate properties classified as other real estate owned ("OREO") are measured at the lower of carrying amount or fair value, less estimated costs to sell. Fair values are generally based on third-party appraisals of the property, resulting in a Level 3 classification. In cases where the carrying amount exceeds the fair value, less costs to sell, an impairment loss is recognized.

Mortgage Banking Derivatives. Level 3 fair values for mortgage banking derivatives are either based upon prices in active secondary markets for identical securities or based on quoted market prices of similar assets used to form a dealer quote or a pricing matrix. If no such quoted price exists, the fair value of a commitment is determined by quoted prices for a similar commitment or commitments, adjusted for the specific attributes of each commitment. These fair values are then adjusted for items such as fallout and estimated costs to originate the loan.

The Company's valuation methodologies may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. While management believes the Company's valuation methodologies are appropriate and consistent with or, in some cases, more conservative than other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the relevant reporting date.

Table of Contents

The following table sets forth the Company's financial assets and liabilities measured at fair value on a recurring basis at March 31, 2014 and June 30, 2013. Assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement:

(Dollars in thousands)	March 31, 2014			Total

Table of Contents

The table below summarizes the quantitative information about level 3 fair value measurements at the periods indicated:

		March 31, 2014		
(Dollars in thousands)	Fair Value	Valuation Technique	Unobservable Input	Range (Weighted Average)
Securities - Trading: Collateralized Debt Obligations	\$7,599	Discounted Cash Flow	Total Projected Defaults, Discount Rate over Treasury Constant Prepayment Rate,	19.0 to 30.1% (24.9%) 4.5 to 4.5% (4.5%) 1.6 to 44.5% (9.7%)
Securities - Available-for-Sale: Non-agency RMBS	\$38,585	Discounted Cash Flow	Constant Default Rate, Loss Severity, Discount Rate over LIBOR	0.3 to 14.6% (5.4%) 1.6 to 84.2% (60.9%) 2.5 to 8.4% (5.3%)
Derivative Instruments, net	\$1,007	Sales Comparison Approach	Projected Sales Profit of Underlying Loans	0.5 to 1.5%
		June 30, 2013		
(Dollars in thousands)	Fair Value	Valuation Technique	Unobservable Input	Range (Weighted Average)
Securities - Trading: Collateralized Debt Obligations	\$7,111	Discounted Cash Flow	Total Projected Defaults, Discount Rate over Treasury Constant Prepayment Rate,	26.3 to 31.1% (28.5%) 4.5 to 4.5% (4.5%) 2.5 to 55.4% (15.6%)
Securities - Available-for-Sale: Non-agency RMBS	\$49,284	Discounted Cash Flow	Constant Default Rate, Loss Severity, Discount Rate over LIBOR	0.3 to 22.7% (10.3%) 1.6 to 96.2% (59.9%) 2.4 to 7.9% (5.6%)
Derivative Instruments, net	\$2,222	Sales Comparison Approach	Projected Sales Profit of Underlying Loans	0.5 to 1.5%

The significant unobservable inputs used in the fair value measurement of the Company's residential mortgage-backed securities are prepayment rates, probability of default, and loss severity in the event of default. Significant increases (decreases) in any of those inputs in isolation would result in a significantly lower (higher) fair value measurement. Generally, a change in the assumption used for the probability of default is accompanied by a directionally similar change in the assumption used for the loss severity and a directionally opposite change in the assumption used for prepayment rates.

The table below summarizes changes in unrealized gains and losses and interest income recorded in earnings for level 3 trading assets and liabilities that are still held at the periods indicated:

(Dollars in thousands)	For the Three Months Ended		For the Nine Months Ended	
	March 31, 2014	2013	March 31, 2014	2013
Interest income on investments	\$61	\$58	\$175	\$196
Fair value adjustment	53	459	488	1,356
Total	\$114	\$517	\$663	\$1,552

Table of Contents

The table below summarizes assets measured for impairment on a non-recurring basis was as follows:

(Dollars in thousands)	March 31, 2014			Balance
	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Observable Inputs (Level 2)	Other Significant Unobservable Inputs (Level 3)	
Impaired Loans:

HTM Securities - Non-Agency RMBS	\$—	\$—	\$97,193	\$97,193

Impaired loans measured for impairment on a non-recurring basis using the fair value of the collateral for collateral-dependent loans have a carrying amount of \$21,469, after charge-offs of \$755 for the three months ended March 31, 2014, and charge-offs of \$1,139 for the nine months ended March 31, 2014, and life to date charge-offs of \$4,488. Impaired loans had a related allowance of \$86 at March 31, 2014.

Table of Contents

Other real estate owned and foreclosed assets, which are measured at the lower of carrying value or fair value less costs to sell, had a net carrying amount of \$134 after charge-offs of \$0 for the three months ended March 31, 2014. Our other real estate owned and foreclosed assets had a net carrying amount of \$2,006 after charge-offs of \$152 during the year ended June 30, 2013.

Held-to-maturity securities measured for impairment on a non-recurring basis had a fair value of \$91,514 and a carrying amount of \$94,032 at March 31, 2014, after net impairment charges to income of \$525 and \$1,969 and changes to other comprehensive loss of \$217 and \$216 during the three and nine months ended March 31, 2014, respectively. The Company recognized net impairment charges to income of \$536 and \$2,079 and changes in other comprehensive loss of \$1,598 and \$2,104 for the three and nine month periods ended March 31, 2013, respectively. These held-to-maturity securities are valued using Level 3 inputs.

The Company has elected the fair value option for Agency loans held for sale. These loans are intended for sale and the Company believes that the fair value is the best indicator of the resolution of these loans. Interest income is recorded based on the contractual terms of the loan and in accordance with the Company's policy on loans held for investment. None of these loans are 90 days or more past due nor on nonaccrual as of March 31, 2014 and June 30, 2013.

As of March 31, 2014 and June 30, 2013, the aggregate fair value, contractual balance (including accrued interest), and gain was as follows:

(Dollars in thousands)	March 31, 2014	June 30, 2013
Aggregate fair value	\$11,255	\$36,665
Contractual balance	9,189	36,070
Gain	\$2,066	\$595

The total amount of gains and losses from changes in fair value included in earnings for the period indicated below for loans held for sale were:

(Dollars in thousands)	For the Three Months Ended		For the Nine Months Ended	
	March 31, 2014	2013	March 31, 2014	2013
Interest income	\$48	\$280	\$438	\$1,074
Change in fair value	(383) (720) (2,078) 20
Total	\$(335) \$(440) \$(1,640) \$1,094

Table of Contents

The following table presents quantitative information about level 3 fair value measurements for financial instruments measured at fair value on a non-recurring basis at the periods indicated:

March 31, 2014

(Dollars in thousands)	Fair Value	Valuation Technique(s)	Unobservable Input	Range (Weighted Average) ¹
Impaired loans:				
Single Family real estate secured:				
Mortgage	\$10,251	Sales comparison approach	Adjustment for differences between the comparable sales	-62.6 to 86.5% (-6.2%)
Home Equity	\$37	Sales comparison approach	Adjustment for differences between the comparable sales	-13.9 to 12.0% (3.8%)
Multifamily real estate secured	\$6,180	Sales comparison approach and income approach	Adjustment for differences between the comparable sales and adjustments for differences in net operating income expectations, Capitalization rate	-56.7 to 99.9% (-11.0%)
Commercial real estate secured	\$4,437	Sales comparison approach and income approach	Adjustment for differences between the comparable sales and adjustments for differences in net operating income expectations, Capitalization rate	-51.4 to 82.4% (-23.8%)
Auto and RV secured	\$564	Sales comparison approach	Adjustment for differences between the comparable sales	0.0 to 95.1% (3.6%)
Other real estate owned:				
Single Family real estate secured:				
Mortgage	\$86	Sales comparison approach	Adjustment for differences between the comparable sales	-20.8 to 0.0% (-20.8%)
Auto and RV secured	\$48	Sales comparison approach	Adjustment for differences between the comparable sales	-36.5 to 24.8% (4.8%)
HTM Securities - Non-Agency RMBS	\$91,514	Discounted Cash Flow	Constant Prepayment Rate, Constant Default Rate, Loss Severity, Discount Rate over LIBOR	2.1 to 44.5% (9.6%) 1.5 to 13.3% (5.9%) 3.5 to 76.3% (59.9%) 2.8 to 8.4% (6.2%)

¹ For impaired loans and other real estate owned the ranges shown may vary positively or negatively based on the comparable sales reported in the current appraisal. In certain instances, the range can be significant due to small sample sizes and in some cases the property being valued having limited comparable sales with similar characteristics at the time the current appraisal is conducted.

The methods and assumptions, not previously presented, used to estimate fair value are described as follows: Carrying amount is the estimated fair value for cash and cash equivalents, interest bearing deposits, accrued interest receivable and payable, demand deposits, short-term debt, and variable rate loans or deposits that reprice frequently and fully. For fixed rate loans, deposits, borrowings or subordinated debt and for variable rate loans, deposits, borrowings or subordinated debt with infrequent repricing or repricing limits, fair value is based on discounted cash flows using

current market rates applied to the estimated life and credit risk. A discussion of the methods of valuing trading securities, available for sale securities and loans held for sale can be found earlier in this footnote. The carrying amount of stock of the Federal Home Loan Bank ("FHLB") approximates the estimated fair value of this investment. The fair value of off-balance sheet items is not considered material.

1. U.S. government-backed or government sponsored enterprises including Fannie Mae, Freddie Mac and Ginnie Mae.

2.

Private sponsors of securities collateralized primarily by pools of 1-4 family residential first mortgages. Primarily super senior securities secured by prime, Alt-A or pay-option ARM mortgages.

The Company's non-agency RMBS available-for-sale portfolio with a total fair value of \$38,585 at March 31, 2014 consists of twenty-four different issues of super senior securities with a fair value of \$24,065; one senior structured whole loan security with a fair value of \$14,426 and three mezzanine z-tranche securities with a fair value of \$94 collateralized by seasoned prime and Alt-A first-lien mortgages. The Company acquired its mezzanine z-tranche securities in fiscal 2009 and accounts for them by measuring the excess of cash flows expected at acquisition over the purchase price (accretable yield) and recognizes interest income over the remaining life of the security.

The non-agency RMBS held-to-maturity portfolio with a carrying value of \$168,081 at March 31, 2014 consists of 81 different issues of super senior securities totaling \$165,985 and one senior-support security with a carrying value of \$2,096. Debt securities with evidence of credit quality deterioration since issuance and for which it is probable at purchase that the Company will be unable to collect all of the par value of the security are accounted for under ASC Topic 310, Accounting for Loans and Debt Securities Acquired with Deteriorated Credit Quality ("ASC Topic 310"). Under ASC Topic 310, the excess of cash flows expected at acquisition over the purchase price is referred to as the accretable yield and is recognized in interest income over the remaining life of the security. The Company has one senior support security that it acquired at a significant discount that evidenced credit deterioration at acquisition and is accounted for

Table of Contents

under ASC Topic 310. For a cost of \$17,740 the Company acquired the senior support security with a contractual par value of \$30,560 and accretible and non-accretible discounts that were projected to be \$9,015 and \$3,805, respectively. Since acquisition, repayments from the security have been received more rapidly than projected at acquisition, but expected total payments have declined, resulting in a determination that the security was other-than-temporarily impaired and a charge of \$680 was recorded for the fiscal 2013 year and a charge of \$572 for the nine months ended March 31, 2014 was recorded. At March 31, 2014 the security had a remaining contractual par value of zero and amortizable and non-amortizable premium are currently projected to be zero and \$2,472, respectively.

The current face amounts of debt securities available-for-sale and held-to-maturity that were pledged to secure borrowings at March 31, 2014 and June 30, 2013 were \$70,521 and \$208,826 respectively.

The securities with unrealized losses, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position were as follows:

Table of Contents

There were 34 securities that were in a continuous loss position at March 31, 2014 for a period of more than 12 months. There were 24 securities that were in a continuous loss position at June 30, 2013 for a period of more than 12 months. The following table summarizes amounts of credit loss recognized in the income statement through other-than-temporary impairment charges which reduced non-interest income:

(Dollars in thousands)	For the Three Months Ended		For the Nine Months Ended	
	March 31,		March 31,	
	2014	2013	2014	2013
Beginning balance	\$ (16,782) \$ (13,529) \$ (15,336) \$ (11,835
Additions for the amounts related to credit loss for which an other-than-temporary impairment was not previously recognized	(187) —	(187) (323
Increases to the amount related to the credit loss for which other-than-temporary impairment was previously recognized	(531) (536) (1,977) (1,907
Ending balance	\$ (17,500) \$ (14,065) \$ (17,500) \$ (14,065

At March 31, 2014, 50 non-agency RMBS with a total carrying amount of \$101,573 were determined to have cumulative credit losses of \$17,500 of which \$719 was recognized in earnings during the three months ended March 31, 2014 and \$2,164 was recognized in earnings for the nine months ended March 31, 2014. This quarter's other-than-temporary impairment of \$719 is related to ten non-agency RMBS with a total carrying amount of \$12,899. The Company measures its non-agency RMBS in an unrecognized loss position at the end of the reporting period for other-than-temporary impairment by comparing the present value of the cash flows currently expected to be collected from the security with its amortized cost basis. If the calculated present value is lower than the amortized cost, the difference is the credit component of an other-than-temporary impairment of its debt securities. The excess of present value over the fair value of the security (if any) is the non-credit component only if the Company does not intend to sell the security and will not be required to sell the security before recovery of its amortized cost basis. The credit component of the other-than-temporary impairment is recorded as a loss in earnings and the non-credit component as a charge to other comprehensive income, net of the related income tax benefit.

To determine the cash flow expected to be collected and to calculate the present value for purposes of testing for other-than-temporary impairment, the Company utilizes the same industry-standard tool and the same cash flows as those calculated for Level 3 fair values as discussed in Note 3 - Fair Value. The discount rates used to compute the present value of the expected cash flows for purposes of testing for the credit component of the other-than-temporary impairment are either the implicit rate calculated in each of the Company's securities at acquisition or the last accounting yield. The Company calculates the implicit rate at acquisition based on the contractual terms of the security, considering scheduled payments (and minimum payments in the case of pay-option ARMs) without prepayment assumptions. Once the discount rate (or discount margin in the case of floating rate securities) is calculated as described above, the discount is used in the industry-standard model to calculate the present value of the cash flows.

During the three and nine months ended March 31, 2014, there were no security sales.

Table of Contents

The Company had recorded unrealized gains and unrealized losses in accumulated other comprehensive loss as follows:

(Dollars in thousands)	March 31, 2014	June 30, 2013
Available-for-sale debt securities—net unrealized gains	\$2,897	\$4,061
Held-to-maturity debt securities—non-credit related	(21,850)	(22,067)
Subtotal	(18,953)	(18,006)
Tax benefit	7,584	7,206
Net unrealized loss on investment securities in accumulated other comprehensive loss	\$(11,369)	\$(10,800)

The expected maturity distribution of the Company's mortgage-backed securities and the contractual maturity distribution of the Company's other debt securities classified as available-for-sale and held-to-maturity at March 31, 2014 were:

Table of Contents

5. LOANS & ALLOWANCE FOR LOAN LOSSES

The following table sets forth the composition of the loan portfolio as of the dates indicated:

(Dollars in thousands)	March 31, 2014	June 30, 2013
Single family real estate secured:		
Mortgage	\$1,670,078	\$1,070,668
Home equity	18,716	22,537
Warehouse and other ¹	263,334	204,878
Multifamily real estate secured	906,275	768,023
Commercial real estate secured	24,441	29,000
Auto and RV secured	15,494	18,530
Factoring	108,871	108,144
Commercial & Industrial	146,129	78,721
Other	685	419
Total gross loans	3,154,023	2,300,920
Allowance for loan losses	(15,994)	(14,182)
Unaccreted discounts and loan fees	(36,621)	(29,820)
Total net loans	\$3,101,408	\$2,256,918

¹ The balance of single family warehouse loans was \$54,782 at March 31, 2014 and \$107,806 at June 30, 2013. The remainder of the balance is attributable to single family lender finance loans.

Allowance for Loan Losses. The Company's goal is to maintain the allowance for loan losses (sometimes referred to as the allowance) at a level that is considered to be commensurate with estimated probable incurred credit losses in the portfolio. Although the adequacy of the allowance is reviewed quarterly, management performs an ongoing assessment of the risks inherent in the portfolio. While the Company believes that the allowance for loan losses is adequate at March 31, 2014, future additions to the allowance will be subject to continuing evaluation of estimated and known, as well as inherent, risks in the loan portfolio.

Allowance for Loan Loss Disclosures—The assessment of the adequacy of the Company's allowance for loan losses is based upon a number of quantitative and qualitative factors, including levels and trends of past due and nonaccrual loans, change in volume and mix of loans, collateral values and charge-off history.

The Company provides general loan loss reserves for its recreational vehicle ("RV") and auto loans based upon the borrower credit score at the time of origination and the Company's loss experience to date. The allowance for loan loss for the RV and auto loan portfolio at March 31, 2014 was determined by classifying each outstanding loan according to semi-annually refreshed FICO score and providing loss rates. The Company had \$14,930 of RV and auto loan balances subject to general reserves as follows: FICO greater than or equal to 770: \$3,902; 715 – 769: \$4,832; 700 – 714: \$1,148; 660 – 699: \$2,531 and less than 660: \$2,517.

The Company provides general loan loss reserves for mortgage loans based upon the size and class of the mortgage loan and the loan-to-value ratio (LTV) at date of origination. The allowance for each class is determined by dividing the outstanding unpaid balance for each loan by the loan-to-value and applying a loss rates. The LTV groupings for each significant mortgage class are as follows:

The Company had \$1,659,827 of single family mortgage portfolio loan balances subject to general reserves as follows: LTV less than or equal to 60%: \$1,037,567; 61% – 70%: \$527,072; 71% – 80%: \$80,862; and greater than 80%: \$14,326.

The Company had \$900,095 of multifamily mortgage portfolio loan balances subject to general reserves as follows: LTV less than or equal to 55%: \$430,990; 56% – 65%: \$294,687; 66% – 75%: \$164,865; 76% – 80%: \$7,688 and greater than 80%: \$1,865. The Company divides the LTV analysis into two classes, separating the purchased loans from the loans underwritten directly by the Company. Based on historical performance, the Company concluded that originated multifamily loans require lower estimated loss rates.

The Company had \$20,004 of commercial real estate loan balances subject to general reserves as follows: LTV less than or equal to 50%: \$11,867; 51% – 60%: \$5,779; 61% – 70%: \$1,436; and 71% – 80%: \$922.

The Company's lender finance portfolio consists of business loans well-collateralized by residential real estate. The Company's commercial & industrial portfolio consists of business loans well-collateralized by business assets. The Company's other portfolio consists of receivables factoring and other consumer loans. The Company allocates its allowance for loan loss for these asset types based on qualitative factors which consider the value of the collateral and the financial position of the issuer of the receivables.

Table of Contents

The following table summarizes activity in the allowance for loan losses by portfolio classes for the periods indicated:

Table of Contents

Credit Quality Disclosures. Non-performing loans consisted of the following:

(Dollars in thousands)	March 31, 2014	June 30, 2013	
Single Family Real Estate Secured:			
Mortgage:			
In-house originated	\$1,431	\$2,179	
Purchased	7,824	9,174	
Home Equity:			
In-house originated	—	37	
Multifamily Real Estate Secured:			
In-house originated	2,860	851	
Purchased	3,320	2,031	
Commercial Real Estate Secured:			
Purchased	3,038	3,559	
Total nonaccrual loans secured by real estate	18,473	17,831	
Auto and RV Secured	529	472	
Total non-performing loans	\$19,002	\$18,303	
Non-performing loans to total loans	0.60	% 0.80	%

Approximately 26.58% of our non-performing loans at March 31, 2014 were considered TDRs, compared to 28.86% at June 30, 2013. Borrowers that make timely payments after TDRs are considered non-performing for at least six months. The Bank has no loans over 90 days delinquent that are still accruing at March 31, 2014.

Generally, after six months of timely payments, those TDRs are reclassified from the non-performing loan category to the performing loan category and any previously deferred interest income is recognized. Approximately 48.71% of the Bank's non-performing loans are single family first mortgages already written down to 49.47% in aggregate, of the original appraisal value of the underlying properties. Generally these loans have experienced longer delays completing the foreclosure process due to the poor servicing practices of one of our seller servicers.

The following table provides the outstanding unpaid balance of loans that are performing and non-performing by portfolio class:

The Company's loan modifications primarily included single family, multifamily and commercial loans of which included one or a combination of the following: a reduction of the stated interest rate or delinquent property taxes that were paid by the Bank and either repaid by the borrower over a one year period or capitalized and amortized over the remaining life of the loan. The Company's loan modifications also included RV loans in which borrowers were able to make interest-only payments for a period of six months to a year which then reverted back to fully amortizing.

Table of Contents

Credit Quality Indicators

The Company categorizes loans into risk categories based on relevant information about the ability of borrowers to service their debt such as: current financial information, historical payment experience, credit documentation, public information, and current economic trends, among other factors. The Company analyzes loans individually by classifying the loans as to credit risk. The Company uses the following definitions for risk ratings.

Pass. Loans classified as pass are well protected by the current net worth and paying capacity of the obligor or by the fair value, less cost to acquire and sell, of any underlying collateral in a timely manner.

Special Mention. Loans classified as special mention have a potential weakness that deserves management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or of the institution's credit position at some future date.

Substandard. Loans classified as substandard are inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected.

Doubtful. Loans classified as doubtful have all the weaknesses inherent in those classified as substandard, with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable.

The Company reviews and grades loans following a continuous loan review process, featuring coverage of all loan types and business lines at least quarterly. Continuous reviewing provides more effective risk monitoring because it immediately tests for potential impacts caused by changes in personnel, policy, products or underwriting standards.

6. STOCK-BASED COMPENSATION

The Company has two equity incentive plans, the 2004 Stock Incentive Plan ("2004 Plan") and the 1999 Stock Option Plan (collectively, the "Plans"), which provide for the granting of non-qualified and incentive stock options, restricted stock and restricted stock units, stock appreciation rights and other awards to employees, directors and consultants. 1999 Stock Option Plan. In July 1999, the Company's Board of Directors approved the 1999 Stock Option Plan ("1999 Plan") and in August 2001, the Company's shareholders approved an amendment to the 1999 Plan such that 15% of the outstanding shares of the Company would always be available for grants under the 1999 Plan. The 1999 Plan is designed to encourage selected employees and directors to improve operations and increase profits, and to accept or continue employment or association with the Company through participation in the growth in the value of the common stock. The 1999 Plan requires that option exercise prices be not less than fair market value per share of common stock on the option grant date for incentive and non-qualified options. The options issued under the 1999 Plan generally vest in between three and five years. Option expiration dates are established by the plan administrator but may not be later than 10 years after the date of the grant.

In November 2007, the shareholders of the Company approved the termination of the 1999 Plan. No new option awards will be made under the 1999 Plan and the outstanding awards under the 1999 Plan will continue to be subject to the terms and conditions of the 1999 Plan.

2004 Stock Incentive Plan. In October 2004, the Company's Board of Directors and the stockholders approved the 2004 Plan. In November 2007, the 2004 Plan was amended and approved by the Company's stockholders. The maximum number of shares of common stock available for issuance under the 2004 Plan is 14.8% of the Company's outstanding common stock measured from time to time. In addition, the number of shares of the Company's common stock reserved for issuance will also automatically increase by an additional 1.5% on the first day of each of four fiscal years starting July 1, 2007. At March 31, 2014, there were a maximum of 2,555,356 shares available for issuance under the limits of the 2004 Plan.

Stock Options. At March 31, 2014, expense related to stock option grants has been fully recognized.

A summary of stock option activity under the Plans during the periods indicated is presented below:

	Number of Shares	Weighted-Average Exercise Price Per Share
Outstanding - July 1, 2012	190,117	\$ 8.93
Granted	—	—
Exercised	(27,135) 9.59
Cancelled	(500) 11.00
Outstanding - June 30, 2013	162,482	\$ 8.81
Granted	—	—
Exercised	(26,970) 8.99
Cancelled	—	—
Outstanding - March 31, 2014	135,512	\$ 8.77
Options exercisable - June 30, 2013	162,482	\$ 8.81
Options exercisable - March 31, 2014	135,512	\$ 8.77

Table of Contents

The following table summarizes information as concerning currently outstanding and exercisable options:

As of March 31, 2014

Options Outstanding			Options Exercisable	
Exercise Prices	Number Outstanding	Weighted-Average Remaining Contractual Life (Years)	Number Exercisable	Weighted-Average Exercise Price
\$7.35	43,850	2.32	43,850	\$7.35
8.50	7,500	1.67	7,500	8.50
9.20	7,500	1.40	7,500	9.20
9.50	64,940	1.32	64,940	9.50
10.00	11,722	0.25	11,722	10.00
\$8.77	135,512	1.57	135,512	\$8.77

The aggregate intrinsic value of options outstanding and options exercisable under the Plans at March 31, 2014 was \$10,431.

Restricted Stock and Restricted Stock Units. Under the 2004 Plan, employees and directors are eligible to receive grants of restricted stock and restricted stock units. The Company determines stock-based compensation expense using the fair value method. The fair value of restricted stock and restricted stock units is equal to the closing sale price of the Company's common stock on the date of grant.

During the nine months ended March 31, 2014 and 2013, the Company granted 132,357 and 4,574 restricted stock units respectively, to employees and directors. Restricted stock unit awards ("RSUs") granted during these quarters vest over three years, one-third on each anniversary date, except for any RSUs granted to our CEO, which vest one-fourth on each fiscal year end.

The Company's income before income taxes and net income for the three months ended March 31, 2014 and 2013 included stock award expense was \$1,071 and \$892, with total income tax benefit of \$443 and \$357, respectively. For the nine months ended March 31, 2014 and 2013, stock awards expense was \$3,146 and \$2,435, with total income tax benefit of \$1,272 and \$974 respectively. The Company recognizes compensation expense based upon the grant-date fair value divided by the vesting and the service period between each vesting date. At March 31, 2014, unrecognized compensation expense related to non-vested awards aggregated to \$9,508 and is expected to be recognized in future periods as follows:

(Dollars in thousands)	Stock Award Compensation Expense
For the fiscal year remainder:	
2014	\$1,140
2015	3,867
2016	3,168
2017	1,333
Total	\$9,508

The following table presents the status and changes in restricted stock grants for the periods indicated:

	Restricted Stock and Restricted Stock Unit Shares	Weighted-Average Grant-Date Fair Value
Non-vested balance at July 1, 2012	360,662	\$ 13.20
Granted	181,483	28.83
Vested	(213,355)) 13.32
Cancelled	(30,305)) 18.01
Non-vested balance at June 30, 2013	298,485	\$ 22.13

Edgar Filing: Bofl Holding, Inc. - Form 10-Q

Granted	132,357	59.86
Vested	(89,561) 16.68
Cancelled	(21,089) 33.85
Non-vested balance at March 31, 2014	320,192	\$ 38.48

36

Table of Contents

The total fair value of shares vested for the three and nine months ended March 31, 2014 was \$324 and \$6,229, respectively. The total fair value of shares vested for the three and nine months ended March 31, 2013 was \$132 and \$1,918, respectively.

2004 Employee Stock Purchase Plan. In October 2004, the Company's Board of Directors and stockholders approved the 2004 Employee Stock Purchase Plan, which is intended to qualify as an "Employee Stock Purchase Plan" under Section 423 of the Internal Revenue Code. An aggregate total of 500,000 shares of the Company's common stock has been reserved for issuance and will be available for purchase under the 2004 Employee Stock Purchase Plan. At March 31, 2014, there have been no shares issued under the 2004 Employee Stock Purchase Plan.

7. EARNINGS PER SHARE ("EPS")

Basic EPS excludes dilution and is computed by dividing net income or loss available to common shareholders by the weighted average number of common shares outstanding for the period. Diluted EPS reflects the potential dilution that could occur if stock options or other contracts to issue common stock were exercised or converted to common stock that would then share in the Company's earnings.

The following table presents the calculation of basic and diluted EPS:

(Dollars in thousands, except per share data)	Three Months Ended		Nine Months Ended	
	March 31, 2014	2013	March 31, 2014	2013
Earnings Per Common Share				
Net income	\$14,610	\$10,402	\$39,946	\$29,159
Preferred stock dividends	(77)	(349)	(232)	(758)
Net income attributable to common shareholders	\$14,533	\$10,053	\$39,714	\$28,401
Average common shares issued and outstanding	14,162,760	12,874,371	13,956,612	12,506,745
Average unvested RSU shares	324,413	419,342	332,959	395,855
Total qualifying shares	14,487,173	13,293,713	14,289,571	12,902,600
Earnings per common share	\$1.00	\$0.76	\$2.78	\$2.20
Diluted Earnings Per Common Share				
Net income attributable to common shareholders	\$14,533	\$10,053	\$39,714	\$28,401
Preferred stock dividends to dilutive convertible preferred	—	279	—	532
Dilutive net income attributable to common shareholders	\$14,533	\$10,332	\$39,714	\$28,933
Average common shares issued and outstanding	14,487,173	13,293,713	14,289,571	12,902,600
Dilutive effect of stock options	75,567	48,918	76,827	60,867
Dilutive effect of convertible preferred stock	—	608,855	—	711,634
Total dilutive common shares issued and outstanding	14,562,740	13,951,486	14,366,398	13,675,101
Diluted earnings per common share	\$1.00	\$0.74	\$2.76	\$2.12

8. COMMITMENTS AND CONTINGENCIES

Credit-Related Financial Instruments. The Company is a party to credit-related financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments are commitments to extend credit. Such commitments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the consolidated balance sheets.

The Company's exposure to credit loss is represented by the contractual amount of these commitments. The Company follows the same credit policies in making commitments as it does for on-balance-sheet instruments.

At March 31, 2014, the Company had commitments to originate \$34,936 in fixed rate loans and \$35,294 in variable rate loans, totaling an aggregate outstanding principal balance of \$70,230. Our fixed rate loan commitments to originate had rates ranging from 2.75% to 9.57%. At March 31, 2014, the Company had a commitment to purchase a \$10,000 variable rate structure note. At March 31, 2014, the Company also had commitments to sell \$28,032 in fixed rate loans and \$5,553 in variable rate loans, totaling an aggregate outstanding principal balance of \$33,585.

Commitments to extend credit are agreements to lend to a customer so long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require

37

Table of Contents

payment of a fee. The commitments for equity lines of credit may expire without being drawn upon. Therefore, the total commitment amounts do not necessarily represent future cash requirements. The amount of collateral obtained, if it is deemed necessary by the Company, is based on management's credit evaluation of the customer.

9. RELATED PARTY TRANSACTIONS

In the ordinary course of business, the Company has granted related party loans collateralized by real property to officers, directors and their affiliates that are considered to be insiders by regulation. There were no new related party loans granted under the provisions of the employee loan program and no refinances of existing loans during the nine months ended March 31, 2014, and five refinances of existing loans and two new loans during the nine months ended March 31, 2013.

10. SUBSEQUENT EVENT

On April 10, 2014, the Bank entered into a Purchase and Assumption Agreement (the "Agreement") with H&R Block Bank, a federal savings bank ("HRBB"), and its parent company Block Financial LLC. Block Financial LLC is a wholly-owned subsidiary of H&R Block, Inc.

Pursuant to the Agreement, the Bank agreed to purchase certain assets and assume certain liabilities of HRBB. The assumed liabilities at closing are projected to include approximately \$450 to \$550 million in customer deposits of HRBB and balances on prepaid cards, including HRBB's Emerald Cards, gift cards and incentive cards. The amount is subject to change based on such factors as the timing of the closing. Substantially all of the assets transferred to the Bank will consist of cash equal to the face amount of deposits and other liabilities transferred to the Bank at closing. The Bank will also acquire a de-minimis amount of non-cash assets at zero cost. The consummation of the transaction contemplated by the Agreement is subject to regulatory approvals and waivers and other customary closing conditions.

Upon regulatory approval of the Agreement and concurrent with closing of the transactions contemplated by the Agreement, the Bank also intends to enter into a Program Management Agreement with Emerald Financial Services, LLC, a subsidiary of H&R Block, Inc., under which the Bank will provide H&R Block-branded financial services products through H&R Block's retail and online channels. These products will include Emerald Prepaid MasterCard®, Refund Transfers, and Emerald Advance® lines of credit.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion provides information about the results of operations, financial condition, liquidity, off balance sheet items, contractual obligations and capital resources of BofI Holding, Inc. and subsidiary. This information is intended to facilitate the understanding and assessment of significant changes and trends related to our financial condition and the results of our operations. This discussion and analysis should be read in conjunction with our financial information in our Annual Report on Form 10-K for the year ended June 30, 2013, and the interim unaudited condensed consolidated financial statements and notes thereto contained in this report.

Some matters discussed in this report may constitute forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), and as such, may involve risks and uncertainties. These forward-looking statements can be identified by the use of terminology such as "estimate," "project," "anticipate," "expect," "intend," "believe," "will," or the negative thereof or other variations thereon or comparable terminology or by discussions of strategy that involve risks and uncertainties. These forward-looking statements relate to, among other things, expectations of the environment in which we operate and projections of future performance.

Forward-looking statements are inherently unreliable and actual results may vary. Factors that could cause actual results to differ from these forward-looking statements include economic conditions, changes in the interest rate environment, changes in the competitive marketplace, risks associated with credit quality and other risk factors discussed under the heading "Management's Discussion and Analysis of Financial Condition and Results of Operations – Factors That May Affect Our Performance" in our Annual Report on Form 10-K for the year ended June 30, 2013, which has been filed with the Securities and Exchange Commission. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. All written and oral forward-looking statements made in connection with this report, which are attributable to us or persons acting on our behalf are expressly qualified in their entirety by the foregoing information.

General

Our company, BofI Holding, Inc., is the holding company for BofI Federal Bank, a diversified financial services company with approximately \$3.9 billion in assets that provides consumer and business banking products through its branchless, low-cost distribution channels and affinity partners. The Bank has deposit and loan customers nationwide including consumer and business checking, savings and time deposit accounts and financing for single family and multifamily residential properties, small-to-medium size businesses in target sectors, and selected specialty finance receivables. The Bank generates fee income from consumer and business products including fees from loans originated for sale and transaction fees earned from processing payment activity. BofI Holding, Inc.'s common stock is listed on the NASDAQ Global Select Market and is a component of the Russell 3000 Index and the S&P SmallCap 600 Index.

BofI Federal Bank is a federal savings bank wholly-owned by our company and regulated by the Office of the Comptroller of the Currency ("OCC"). The parent company, BofI Holding, Inc., is a unitary savings and loan holding company regulated by the Board of Governors of the Federal Reserve System.

We distribute our deposit products through a wide range of retail distributions channels, and our deposits consist of demand, savings and time deposits accounts. We distribute our loan products through our retail, correspondent and wholesale channels, and the loans we retain are primarily first mortgages secured by single family real property and by multifamily real property. Our mortgage-backed securities consist primarily of mortgage pass-through securities issued by government-sponsored entities and non-agency collateralized mortgage obligations and pass-through mortgage-backed securities issued by private sponsors. We believe our flexibility to adjust our asset generation channels has been a competitive advantage allowing us to avoid markets and products where credit fundamentals are poor.

Critical Accounting Policies

The following discussion and analysis of our financial condition and results of operations is based upon our consolidated financial statements and the notes thereto, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these consolidated financial statements requires us to make a number of estimates and assumptions that affect the reported amounts and disclosures in the consolidated financial statements. On an ongoing basis, we evaluate our estimates and assumptions based upon historical experience and various factors and circumstances. We believe that our estimates and assumptions are reasonable under the circumstances. However, actual results may differ significantly from these estimates and assumptions that could have a material effect on the carrying value of assets and liabilities at the balance sheet dates and our results of operations for the reporting periods.

Table of Contents

Our significant accounting policies and practices are described in greater detail in Note 1 to our June 30, 2013 audited consolidated financial statements and under the caption “Management’s Discussion and Analysis of Financial Condition and Results of Operations – Critical Accounting Policies” contained in our Annual Report on Form 10-K filed with the Securities and Exchange Commission for the fiscal year end June 30, 2013.

Use of Non-GAAP Financial Measures

In addition to the results presented in accordance with GAAP, this report includes non-GAAP financial measures such as core earnings. We define net income without the after-tax impact of realized and unrealized securities gains and losses as adjusted earnings ("core earnings"), a non-GAAP measurement, which we believe provides useful information about the Bank's operating performance. Excluding the securities gains and losses provides investors with an understanding of our Bank's core lending and mortgage banking business. Non-GAAP financial measures have inherent limitations, are not required to be uniformly applied and are not audited. Readers should be aware of these limitations and should be cautious as their use of such measures. Although we believe the non-GAAP financial measures disclosed in this report enhance investors' understanding of its business and performance, these non-GAAP measures should not be considered in isolation, or as a substitute for GAAP basis financial measures.

SELECTED FINANCIAL DATA

The following tables set forth certain selected financial data concerning the periods indicated:

BOFI HOLDING, INC. AND SUBSIDIARY

SELECTED CONSOLIDATED FINANCIAL INFORMATION

RESULTS OF OPERATIONS

Comparison of the Three and Nine Months Ended March 31, 2014 and 2013

For the three months ended March 31, 2014, we had net income of \$14.6 million compared to net income of \$10.4 million for the three months ended March 31, 2013. Net income attributable to common stockholders was \$14.5 million or \$1.00 per diluted share for the three months ended March 31, 2014 compared to net income attributable to common shareholders of \$10.1 million or \$0.74 per diluted share for the three months ended March 31, 2013. For the nine months ended March 31, 2014, we had net income of \$39.9 million compared to net income of \$29.2 million for the nine months ended March 31, 2013. Net income attributable to common stockholders was \$39.7 million or \$2.76 per diluted share for the nine months ended March 31, 2014 compared to net income attributable to common shareholders of \$28.4 million or \$2.12 per diluted share for the nine months ended March 31, 2013.

Other key comparisons between our operating results for the three and nine months ended March 31, 2014 and 2013 are as follows:

Net interest income increased \$9.5 million and \$23.0 million due to a 30.7% and 25.5% increase in average earning assets in the three and nine months ended March 31, 2014, respectively. These increases were primarily the result of growth in our loan portfolio and a net decrease in the average funding rate of our liabilities. Our net interest margin increased 15 basis points and 17 basis points in the three and nine months ended March 31, 2014 compared to March 31, 2013, respectively. The overall rate on interest earning assets was lower by 1 basis point and 7 basis points for the three and nine months ended March 31, 2014 compared to March 31, 2013, respectively, primarily due to a decrease in market interest rates for new loans and borrower repayments of higher rate loans. This reduction on the asset side was more than offset by a 14 basis point and 22 basis point reduction in average rates paid on interest bearing liabilities for the three and nine months ended March 31, 2014 compared to March 31, 2013, respectively. The reduction was primarily due to a shift in the deposit mix towards interest bearing demand and savings accounts and away from time deposits, as well as a decrease in average rates paid on demand and savings accounts of 7 basis points and 10 basis points for the three and nine months ended March 31, 2014 compared to March 31, 2013, respectively.

Non-interest income decreased \$1.6 million and \$2.1 million for the three and nine months ended March 31, 2014 compared to the three and nine months ended March 31, 2013, respectively, primarily due to the nationwide decrease in mortgage refinance volumes. The decrease in non-interest income for the three months ended March 31, 2014 was the result of a \$3.0 million decrease in mortgage banking income, a \$0.4 million decrease in realized gain on sale of mortgage-backed securities and a \$0.6 million increase in unrealized loss on securities, partially offset by an increase of \$1.9 million in gain on sale - other, primarily resulting from sales of structured settlements and a \$0.5 million increase in banking service fees and other income. The decreases in non-interest income for the nine months ended March 31, 2014 compared to March 31, 2013 was the result of a \$9.9 million decrease in mortgage banking income, a \$0.2 million decrease in realized gain on sale of mortgage-backed securities and a \$0.8 million increase in unrealized loss on securities, partially offset by an increase of \$6.1 million in gain on sale - other from sales of structured settlements, a \$1.7 million increase in banking service fees and other income and a \$1.1 million increase in prepayment penalty fee income.

Non-interest expense increased \$0.4 million and \$5.9 million for the three and nine months ended March 31, 2014 compared to the three and nine months ended March 31, 2013, respectively. For the three months ended March 31, 2014 compared to the three months ended March 31, 2013 salaries and related expenses increased \$0.2 million primarily due to the overall increase in staff, mainly in our loan, deposit and compliance areas to support the overall growth of the Bank. Professional fees increased \$0.5 million due to new business costs. Data processing and internet were up \$0.8 million due to core system updates and increased bank customers. Other general and administrative costs decreased by \$0.9 million as a result of the cost management initiative implemented in the first quarter of fiscal year 2014 to improve the efficiency and effectiveness of people, vendor and other costs. For the nine months ended

March 31, 2014 compared to the nine months ended March 31, 2013 salaries and related expenses increased \$2.6 million primarily due to the overall increase in staff, mainly in our loan and deposit areas to support the overall growth of the Bank. Professional fees increased \$1.8 million due to new business costs. Data processing and internet were up \$2.1 million due to core system updates and increased bank customers. Other general and administrative costs decreased by \$0.9 million as a result of the cost management initiative implemented in the first quarter of fiscal year 2014 to improve the efficiency and effectiveness of people, vendor and other costs. We expect non-interest expense to increase in future periods despite recent cost savings as we plan for future growth initiatives.

Table of Contents

Core earnings for the three months ended March 31, 2014 and 2013, were \$15.0 million and \$10.2 million, respectively. For the nine months ended March 31, 2014 and 2013 core earnings were \$40.8 million and \$29.4 million, respectively.

Below is a reconciliation of net income to core earnings:

(Dollars in thousands)	Three Months Ended		Nine Months Ended	
	March 31,		March 31,	
	2014	2013	2014	2013
Net Income	\$ 14,610	\$ 10,402	\$ 39,946	\$ 29,159
Realized securities gains	—	(420) (208) (420
Unrealized securities losses	666	77	1,676	874
Tax provision	(276) 140	(594) (185
Core earnings	\$ 15,000	\$ 10,199	\$ 40,820	\$ 29,428
Net Interest Income				

Net interest income for the three and nine months ended March 31, 2014 totaled \$35.7 million and \$96.6 million, an increase of 36.1% and 31.2%, compared to net interest income of \$26.2 million and \$73.6 million for the three and nine months ended March 31, 2013, respectively. The growth of net interest income for both the three and nine months ended March 31, 2014 is primarily due to net loan portfolio growth, which increased average earning assets, and due to a net decrease in the average funding rate of our liabilities.

Total interest and dividend income during the three and nine months ended March 31, 2014 increased 30.4% to \$45.2 million and 23.7% to \$122.7 million, respectively, compared to \$34.6 million and \$99.2 million during the three and nine months ended March 31, 2013, respectively. The increase in interest and dividend income for the three and nine months ended March 31, 2014 was primarily attributable to growth in average earning assets from growth in the loan portfolio. The average balance of loans increased 32.8% and 26.9% for the three and nine months ended March 31, 2014 compared to the three and nine months ended 2013, respectively. The increase in interest income on loans was partially offset by lower rates earned on loans and mortgage-backed securities. The net growth in average earning assets for the three and nine months ended March 31, 2014 was funded largely by increased deposits and to a lesser extent borrowings.

Total interest expense was \$9.5 million and \$26.1 million for the three and nine months ended March 31, 2014, an increase of \$1.1 million or 12.7% and of \$0.6 million or 2.2% as compared with the same periods in 2013, respectively. The average funding rate for the three and nine months ended March 31, 2014 compared to the same 2013 periods decreased by 14 basis points and 22 basis points while average interest-bearing liabilities grew 25.9% and 21.3%, respectively. Contributing to the decrease in the average funding rates for the three months ended March 31, 2014 compared to the same period in 2013, were decreases in the average rates for demand and savings deposits of 7 basis points, partially offset by an increase in the rates for FHLB advances of 46 basis points as a result of funding growth with deposits instead of short-term borrowings. Contributing to the decrease in the average funding rates for the nine months ended March 31, 2014 compared to the same period in 2013, were decreases in the average rates for demand and savings deposits of 10 basis points and a decrease in the rates for FHLB advances of 23 basis points as a result of the mix of short and long-term borrowings over the period. Net interest margin, defined as annualized net interest income divided by average earning assets, increased by 15 basis points to 3.89% and 17 basis points to 3.92% for the three and nine months ended March 31, 2014, compared with 3.74% and 3.75% for the three and nine months ended 2013, respectively.

Table of Contents

Average Balances, Net Interest Income, Yields Earned and Rates Paid

The following table sets forth the effects of changing rates and volumes on our net interest income. Information is provided with respect to (i) effects on interest income and interest expense attributable to changes in volume (changes in volume multiplied by prior rate); (ii) effects on interest income and interest expense attributable to changes in rate (changes in rate multiplied by prior volume); and (iii) changes in rate/volume (change in rate multiplied by change in volume) for the three and nine months ended March 31, 2014 and 2013:

(Dollars in thousands)	For the Three Months Ended March 31, 2014 2014 vs 2013 Increase (Decrease) Due to				For the Nine Months Ended March 31, 2014 2014 vs 2013 Increase (Decrease) Due to			
	Volume	Rate	Rate/Volume	Total Increase (Decrease)	Volume	Rate	Rate/Volume	Total Increase (Decrease)
Increase/(decrease) in interest income:

	\$618	\$683	\$(234)	\$1,067	\$2,208	\$(835)	\$(806)	\$567

Provision for Loan Losses

The loan loss provision was \$1.6 million for the three months ended March 31, 2014 and 2013, respectively. The loan loss provision was \$3.1 million for the nine months ended March 31, 2014 compared to \$6.1 million for the same period in 2013. The decrease in the provision for the nine months ended March 31, 2014 is due to a favorable decrease in loan charge-offs partially offset by additions to the allowance for growth of the loan portfolio. Provisions for loan

losses are charged to income to bring the allowance for loan losses to a level deemed appropriate by management based on the factors discussed under “Financial Condition-Asset Quality and Allowance for Loan Losses.”

Net impairment loss recognized in earnings	(719)	(536)	(183)	(2,164)	(2,230)	66
Fair value gain on trading securities	53	459	(406)	488	1,356	(868)
Total unrealized loss on securities	(666)	(77)	(589)	(1,676)	(874)	(802)
Prepayment penalty fee income	458	470	(12)	2,286	1,185	1,101
Gain on sale - other	1,915	—	1,915	6,051	—	6,051
Mortgage banking income	2,358	5,372	(3,014)	7,483	17,407	(9,924)
Banking service fees and other income	1,147	649	498	3,380	1,706	1,674
Total non-interest income	\$5,212	\$6,834	\$(1,622)	\$17,732	\$19,844	\$(2,112)

Non-interest income decreased \$1.6 million to \$5.2 million for the three months ended March 31, 2014. The decrease was primarily the result of a decline of \$3.0 million in mortgage banking income as long-term interest rates increased and the number of loans eligible for refinancing dropped. An additional contributing factor to the decrease in non-interest income was an unrealized loss of \$0.6 million in securities. The decrease was partially offset by a \$1.9 million increase in gain on sale - other, primarily resulting from sales of structured settlements and a \$0.5 million increase in banking service fees and other income due primarily to prepaid card sponsorships. Non-interest income decreased \$2.1 million to \$17.7 million for the nine months ended March 31, 2014. The decrease was primarily the result of a decline of \$9.9 million in mortgage banking income as interest rates increased and the number of loans eligible for refinancing dropped. The decrease in non-interest income was partially offset by a \$6.1 million increase in gain on sale - other, primarily resulting from sales of structured settlements. Other contributions to partially offset the decrease in non-interest income were a \$1.1 million increase in prepayment penalty fee income and a \$1.7 million increase in banking service fees and other income due primarily to prepaid card sponsorships added in fiscal 2014. Included in gain on sale - other are sales of structured settlement annuity receivables. We engage in the wholesale and retail purchase of state lottery prize and structured settlement annuity payments. These payments are high credit quality deferred payment receivables having a state lottery commission or investment grade (top two tiers) insurance company payor. The Bank originates contracts for the retail purchase of such payments and classifies these under the heading of Factoring in the loan portfolio. Factoring yields are typically higher than mortgage loan rates. Typically, the gain received upon sale of these payment streams is greater than the gain received from an equivalent amount of mortgage loan sales. Since 2013, pools of structured settlement receivables have been originated for sale depending upon management's assessment of interest rate risk, liquidity, and offers containing favorable terms and are classified on our balance sheet as loans held for sale.

Table of Contents

Non-Interest Expense

The following table sets forth information regarding our non-interest expense for the periods shown:

(Dollars in thousands)	For the Three Months Ended			For the Nine Months Ended		
	March 31, 2014	2013	Inc (Dec)	March 31, 2014	2013	Inc (Dec)
Salaries and related costs	\$7,721	\$7,510	\$211	\$23,464	\$20,831	\$2,633
Professional services	1,404	860	544	4,325	2,504	1,821
Occupancy and equipment	589	549	40	1,715	1,533	182

Advertising and promotional	670	1,020	(350)	2,473	2,930	(457)
Depreciation and amortization	744	493	251	2,161	1,279	882
Real estate owned and repossessed vehicles	(51)	234	(285)	(146)	347	(493)
FDIC and regulator fees	572	520	52	1,666	1,502	164
Other general and administrative	1,136	2,020	(884)	4,441	5,366	(925)
Total non-interest expenses	\$14,347	\$13,921	\$426	\$44,167	\$38,234	\$5,933

Non-interest expense, which is comprised primarily of compensation, data processing and internet expenses, occupancy, advertising and promotional and other operating expenses, was \$14.3 million for the three months ended March 31, 2014, up from \$13.9 million for the three months ended March 31, 2013. The increase in compensation expense for the three and nine months ended March 31, 2014 is primarily due to the expansion of the Banks' staffing for lending products, strategic partnerships, business banking and regulatory compliance. Non-interest expense was \$44.2 million for the nine months ended March 31, 2014, up from \$38.2 million for the nine months ended March 31, 2013.

Total salaries and related costs increased \$0.2 million to \$7.7 million for the quarter ended March 31, 2014 compared to \$7.5 million for the quarter ended March 31, 2013 due to increased staffing levels to support growth in deposit and lending activities. Total salaries and related costs increased \$2.6 million to \$23.5 million for the nine months ended March 31, 2014 compared to \$20.8 million for the nine months ended March 31, 2013 due to increased staffing levels to support growth in deposit and lending activities. Our staff increased to 339 from 295, or 14.9% between March 31, 2014 and 2013, respectively.

Professional services, which include accounting and legal fees, increased \$0.5 million and \$1.8 million for the three and nine months ended March 31, 2014, compared to the three and nine month periods last year, respectively. The increases were primarily due to legal fees related to acquisition contracts and business expansion costs.

Advertising and promotional expense decreased \$0.4 million for the three months ended March 31, 2014, compared to the three months ended March 31, 2013. Advertising and promotional expense decreased \$0.5 million for the nine months ended March 31, 2014, compared to the nine months ended March 31, 2013. The decreases were primarily due to declines in online, email and direct leads expense primarily related to agency mortgage banking.

Data processing and internet expense increased \$0.8 million and \$2.1 million for the three and nine months ended March 31, 2014, compared to the three and nine month periods in fiscal 2013, respectively. The increase was primarily due to growth in the number of customer accounts and enhancements to the Bank's core processing system. The cost of our Federal Deposit Insurance Corporation ("FDIC") and OCC standard regulatory charges increased \$0.1 million and \$0.2 million for the three and nine months ended March 31, 2014, compared to the three and nine month periods last year, respectively. The increases were due to the overall growth of the Bank's liabilities. As an FDIC-insured institution, the Bank is required to pay deposit insurance premiums to the FDIC.

Other general and administrative costs decreased by \$0.9 million for the three and nine months ended March 31, 2014, compared to the three and nine month periods in fiscal 2013, respectively. These decreases were the result of the cost management initiative implemented in the first quarter of fiscal year 2014 to improve the efficiency and effectiveness of people, vendor and other costs. We expect other general and administrative costs to increase in future periods despite recent cost savings as we plan for future growth initiatives.

Table of Contents

Provision for Income Taxes

Our effective income tax rates (income tax provision divided by net income before income tax) for the three months ended March 31, 2014 and 2013 were 41.39% and 40.78%, respectively. Our effective income tax rates for the nine months ended March 31, 2014 and 2013 were 40.44% and 40.71%, respectively. The changes in the tax rates are the result of changes in state tax allocations.

FINANCIAL CONDITION

Balance Sheet Analysis

Our total assets increased \$760.1 million, or 24.6%, to \$3,850.8 million, as of March 31, 2014, up from \$3,090.8 million at June 30, 2013. The increase in total assets was primarily due to an increase of \$844.5 million in net loans held for investment. Total liabilities increased \$689.5 million, primarily due to an increase in deposits of \$741.0 million, partially offset by a decrease of \$50.0 million of securities sold under agreement to repurchase.

Loans

Net loans held for investment increased 37.4% to \$3,101.4 million at March 31, 2014 from \$2,256.9 million at June 30, 2013. The increase in the loan portfolio was primarily due to loan originations and purchases of \$1,617.5 million, partially offset by loan repayments of \$743.7 million and net transfers to our held for sale portfolio of \$38.3 million during the nine months ended March 31, 2014.

The following table sets forth the composition of the loan portfolio as of the dates indicated:

(Dollars in thousands)	March 31, 2014		June 30, 2013		
	Amount	Percent	Amount	Percent	
Single family real estate secured:					
Mortgage	\$ 1,670,078	52.96	% \$ 1,070,668	46.53	%
Home equity	18,716	0.59	% 22,537	0.98	%
Warehouse and other	263,334	8.35	% 204,878	8.90	%

Factoring	108,871	3.45	% 108,144	4.70	%
Commercial & Industrial	146,129	4.63	% 78,721	3.42	%
Other	685	0.02	% 419	0.02	%
Total gross loans	3,154,023	100.00	% 2,300,920	100.00	%
Allowance for loan losses	(15,994)		(14,182)		
Unaccreted discounts and loan fees	(36,621)		(29,820)		
Net mortgage loans on real estate	\$3,101,408		\$2,256,918		

The Bank originates and purchases mortgage loans with terms that may include repayments that are less than the repayments for fully amortizing loans, including interest only loans, option adjustable-rate mortgages, and other loan types that permit payments that may be smaller than interest accruals. The Bank's lending guidelines for interest only loans are adjusted for the increased credit risk associated with these loans by requiring borrowers with such loans to borrow at LTVs that are lower than standard amortizing ARM loans and by calculating debt to income ratios for qualifying borrowers based upon a fully amortizing payment, not the interest only payment. The Company's Internal Asset Review Committee monitors and performs reviews of interest only loans. Adverse trends reflected in the Company's delinquency statistics, grading and classification of interest only loans would be reported to management and the Board of Directors. As of March 31, 2014, the Company had \$493.2 million of interest only mortgage loans and \$6.5 million of option adjustable-rate mortgage loans. Through March 31, 2014, the net amount of deferred interest on these loan types was not material to the financial position or operating results of the Company.

Table of Contents

Asset Quality and Allowance for Loan Loss

Non-performing Assets

Non-performing loans are comprised of loans past due 90 days or more on nonaccrual status and other nonaccrual loans. Non-performing assets include non-performing loans plus other real estate owned and repossessed vehicles. At March 31, 2014, our non-performing loans totaled \$19.0 million, or 0.60% of total gross loans and our total non-performing assets totaled \$19.1 million, or 0.50% of total assets.

Non-performing loans and foreclosed assets or “non-performing assets” consisted of the following as of the dates indicated:

(Dollars in thousands)	March 31, 2014	June 30, 2013	Inc (Dec)
Non-performing assets:			
Non-accrual loans:			
Single family real estate secured:			
Mortgage	\$9,255	\$11,353	\$(2,098)
Home equity	—	37	(37)
Multifamily real estate secured	6,180	2,882	3,298
Commercial real estate secured	3,038	3,559	(521)
Total non-performing loans secured by real estate	18,473	17,831	642
Auto and RV secured	529	472	57
Total non-performing loans	19,002	18,303	699
Foreclosed real estate	86	1,865	(1,779)
Repossessed—vehicles	48	141	(93)
Total non-performing assets	\$19,136	\$20,309	\$(1,173)
Total non-performing loans as a percentage of total loans	0.60	% 0.80	% (0.20)
Total non-performing assets as a percentage of total assets	0.50	% 0.66	% (0.16)

Total non-performing assets decreased from \$20.3 million at June 30, 2013 to \$19.1 million at March 31, 2014. As a percentage of total assets, non-performing assets decreased from 0.66% at June 30, 2013 to 0.50% at March 31, 2014. The non-performing assets decrease of approximately \$1.2 million, was primarily the result of the removal of a single family loan and commercial real estate loans offset by a net increase in the multifamily segment of our portfolio.

A troubled debt restructuring is a concession made to a borrower experiencing financial difficulties, typically permanent or temporary modifications of principal and interest payments or an extension of maturity dates. When a loan is delinquent and classified as a troubled debt restructuring no interest is accrued until the borrower demonstrates over time (typically six months) that it can make payments. When a loan is considered a troubled debt restructuring and is on nonaccrual, it is considered non-performing and included in the table above. The Bank had performing troubled debt restructurings on mortgage loans and RV loans with outstanding balances totaling \$2.5 million at March 31, 2014 and \$3.5 million at June 30, 2013.

Allowance for Loan Losses

We are committed to maintaining the allowance for loan losses at a level that is considered to be commensurate with estimated and known risks in the portfolio. Although the adequacy of the allowance is reviewed quarterly, our management performs an ongoing assessment of the risks inherent in the portfolio. While we believe that the allowance for loan losses is adequate at March 31, 2014, future additions to the allowance will be subject to continuing evaluation of estimated and known, as well as inherent, risks in the loan portfolio.

The assessment of the adequacy of our allowance for loan losses is based upon a number of quantitative and qualitative factors, including levels and trends of past due and nonaccrual loans, change in volume and mix of loans, collateral values and charge-off history.

We provide general loan loss reserves for our RV and auto loans based upon the borrower credit score at the time of origination and the Company’s loss experience to date. The allowance for loan loss for the RV and auto loan portfolio at March 31, 2014 was determined by classifying each outstanding loan according to the semi-annually refreshed

FICO score and providing loss rates. The Company had \$14,930 (dollars in thousands) of RV and auto loan balances subject to general reserves as follows: FICO greater than or equal to 770: \$3,902; 715 – 769: \$4,832; 700 – 714: \$1,148; 660 – 699: \$2,531 and less than 660: \$2,517.

We experienced increased charge-offs of RV loans in fiscal 2007 through 2011, due to the nationwide recession. Our portfolio of RV loans is expected to decrease in the future because the Bank ceased originating RV loans in fiscal 2009.

Table of Contents

The Company provides general loan loss reserves for mortgage loans based upon the size and class of the mortgage loan and the loan-to-value ratio ("LTV") at date of origination. The allowance for each class is determined by dividing the outstanding unpaid balance for each loan by the loan-to-value and applying quantitative and qualitative loss rates. The LTV groupings for each significant mortgage class are as follows (dollars in thousands):

The Company had \$1,659,827 of single family mortgage portfolio loan balances subject to general reserves as follows: LTV less than or equal to 60%: \$1,037,567; 61% – 70%: \$527,072; 71% – 80%: \$80,862; greater than 80%: \$14,326.

The Company had \$900,095 of multifamily mortgage portfolio loan balances subject to general reserves as follows: LTV less than or equal to 55%: \$430,990; 56% – 65%: \$294,687; 66% – 75%: \$164,865; 76% – 80%: \$7,688 and greater than 80%: \$1,865.

The Company had \$20,004 of commercial real estate loan balances subject to general reserves as follows: LTV less than or equal to 50%: \$11,867; 51% – 60%: \$5,779; 61% – 70%: \$1,436; and 71% – 80%: \$922.

The weighted average LTV percentage for our entire real estate loan portfolio was 55% at March 31, 2014. We believe that this percentage is lower and more conservative than most banks, which results in lower average mortgage loan charge-offs when compared to many other comparable banks.

While we anticipate that such level of charge-offs will continue into the future, given the uncertainties surrounding the improvement of the U.S. economy, we may experience an increase in the relative amount of charge-offs and we may be required to increase our loan loss provisions in the future to provide a larger loss allowance for one or more of our loan types.

The following table summarizes impaired loans as of:

(Dollars in thousands)	March 31, 2014	June 30, 2013
Non-performing loans—90+ days past due plus other non-accrual loans	\$13,951	\$13,020
Troubled debt restructuring loans—non-accrual	5,051	5,283
Troubled debt restructuring loans—performing	2,467	3,538
Total impaired loans	\$21,469	\$21,841

The following table reflects management's allocation of the allowance for loan losses by loan category and the ratio of each loan category to total loans as of the dates indicated:

(Dollars in thousands)	March 31, 2014		June 30, 2013		
	Amount of Allowance	Allocation as a % of Allowance	Amount of Allowance	Allocation as a % of Allowance	
Single family real estate secured:					
Mortgage	6,964	43.54	% 4,812	33.93	%
Home equity	137	0.86	% 183	1.29	%
Warehouse and other	1,021	6.38	% 1,250	8.81	%
Multifamily real estate secured	2,853	17.84	% 3,186	22.47	%
Commercial real estate secured	1,244	7.78	% 1,378	9.72	%
Auto and RV secured	923	5.77	% 1,536	10.83	%
Factoring	261	1.63	% 201	1.42	%
Commercial & Industrial	2,570	16.07	% 1,623	11.44	%
Other	21	0.13	% 13	0.09	%
Total	\$15,994	100.00	% \$14,182	100.00	%

The loan loss provision was \$1.6 million and \$1.6 million for the three months ended March 31, 2014 and March 31, 2013, respectively. The loan loss provision was \$3.1 million and \$6.1 million for the nine months ended March 31, 2014 and March 31, 2013, respectively. The decrease for the nine months ended March 31, 2014 in the loan loss provision was the result of lower charge-offs. We believe that the lower average LTV in the Bank's mortgage loan portfolio will continue to result in future lower average mortgage loan charge-offs when compared to many other comparable banks. Our general loan loss reserves are based upon historical losses and expected future trends. The

resolution of the Bank's existing REO and non-performing loans should not have a significant adverse impact on our operating results.

51

Table of Contents

Investment Securities

Total investment securities were \$467.0 million as of March 31, 2014, compared with \$468.4 million at June 30, 2013. During the nine months ended March 31, 2014, we purchased \$68.0 million in debt securities and received principal repayments of approximately \$46.2 million in our available-for-sale portfolio. In our held-to-maturity portfolio, we received principal repayments of \$22.4 million with the balance of the change attributable to accretion and other activities. We currently classify agency mortgage-backed and debt securities as held-to-maturity or available-for-sale at the time of purchase based upon small issue size and based on issue features, such as callable terms.

Deposits

Deposits increased a net \$741.0 million, or 35.4%, to \$2,833.0 million at March 31, 2014, from \$2,092.0 million at June 30, 2013. Our deposit growth was the result of a 229.0% increase in interest-bearing demand accounts and an 26.1% increase in savings accounts. Our deposit growth was strengthened by our acquisition of approximately \$173 million in deposits from Principal Bank in the first quarter of fiscal 2014, including \$142 million in checking, savings and money market accounts and \$31 million in time deposit accounts. Increases in business banking customers resulted in higher demand and savings account business, which replaced maturing time deposits during the nine months ended March 31, 2014.

The following table sets forth the composition of the deposit portfolio as of the dates indicated:

(Dollars in thousands)	March 31, 2014		June 30, 2013		
	Amount	Rate ¹	Amount	Rate ¹	
Non-interest bearing	\$ 130,989	—	% \$ 81,524	—	%
Interest bearing:					
Demand	1,024,997	0.61	% 311,539	0.50	%
Savings	809,222	0.73	% 641,534	0.67	%
Total demand and savings	1,834,219	0.66	% 953,073	0.61	%
Time deposits:					
Under \$100,000	123,165	1.29	% 183,754	1.36	%
\$100,000 or more	744,603	1.58	% 873,648	1.52	%
Total time deposits ²	867,768	1.54	% 1,057,402	1.50	%
Total interest bearing	2,701,987	0.94	% 2,010,475	1.08	%
Total deposits	\$ 2,832,976	0.99	% \$ 2,091,999	1.04	%

¹ Based on weighted-average stated interest rates at end of period.

² The total includes brokered deposits of \$417.6 million and \$435.6 million as of March 31, 2014 and June 30, 2013, respectively, of which \$281.6 million and \$283.5 million, respectively, are time deposits.

The following table sets forth the number of deposit accounts by type as of the date indicated:

	March 31, 2014	June 30, 2013	March 31, 2013
Checking and savings accounts	30,172	23,569	23,487
Time deposits	8,457	11,103	11,927
Total number of deposit accounts	38,629	34,672	35,414

Table of Contents

Borrowings

The following table sets forth the composition of our borrowings as of the dates indicated:

(Dollars in thousands)	March 31, 2014		June 30, 2013		March 31, 2013			
	Balance	Weighted Average Rate	Balance	Weighted Average Rate	Balance	Weighted Average Rate		
Repurchase agreements	\$60,000	4.47	% \$110,000	4.40	% \$110,000	4.40	%	
FHLB Advances	592,000	1.38	% 590,417	0.92	% 460,000	1.15	%	
Subordinated debentures and other borrowings	5,155	2.64	% 5,155	2.67	% 5,155	2.69	%	
Total Borrowings	\$657,155	1.67	% \$705,572	1.48	% \$575,155	1.79	%	
Weighted average cost of borrowings during the quarter	2.04	%	1.83	%	1.80	%		
Borrowings as a percent of total assets	17.1	%	22.8	%	19.4	%		

At March 31, 2014, total borrowings amounted to \$657.2 million, down from \$705.6 million or 6.9% from June 30, 2013 and up \$82.0 million or 14.3% from March 31, 2013. Total borrowings represented 17.1% of total assets and had a weighted average cost of 2.04% at March 31, 2014, compared with 22.8% of total assets at a weighted average cost of 1.83% at June 30, 2013 and 19.4% of total assets at a weighted average cost of 1.80% at March 31, 2013.

We have sold securities under various agreements to repurchase for total proceeds of \$60.0 million. The repurchase agreements have interest rates between 3.75% and 4.75% and scheduled maturities between April 2014 and December 2017. Under these agreements, we may be required to repay the \$60.0 million and repurchase our securities before the scheduled maturity if the issuer requests repayment on scheduled quarterly call dates. The weighted-average remaining contractual maturity period is 2.09 years and the weighted average remaining period before such repurchase agreements could be called is 0.13 years.

We regularly use advances from the FHLB to manage our interest rate risk and, to a lesser extent, manage our liquidity position. Generally, FHLB advances with terms between three and ten years have been used to fund the purchase of single family and multifamily mortgages and to provide us with interest rate risk protection should rates rise. At March 31, 2014, a total of \$15.0 million of FHLB advances include agreements that allow the FHLB, at its option, to put the advances back to us after specified dates. The weighted-average remaining contractual maturity period of the \$15.0 million in puttable advances is 1.77 years and the weighted average remaining period before such advances could be put to us is 0.15 years.

Stockholders' Equity

Stockholders' equity increased \$70.6 million to \$338.8 million at March 31, 2014 compared to \$268.3 million at June 30, 2013. The increase was the result of our net income for the nine months ended March 31, 2014 of \$39.9 million, sale of common stock of \$27.6 million, vesting and issuance of RSU's and exercise of stock options of \$3.9 million, less a \$0.6 million unrealized loss in other comprehensive income, net of tax, and a reduction of \$0.2 million for dividends declared on preferred stock.

Table of Contents

LIQUIDITY

Cash flow information is as follows:

(Dollars in thousands)	For the Nine Months Ended	
	March 31,	
	2014	2013
Operating Activities	\$73,839	\$(12,993)
Investing Activities	\$(869,876)	\$(420,461)
Financing Activities	\$722,741	\$541,518

During the nine months ended March 31, 2014, we had net cash inflows from operating activities of \$73.8 million compared to outflows of \$13.0 million for the nine months ended March 31, 2013. Net operating cash inflows and outflows fluctuate due to the timing of originations of loans held for sale and proceeds from loan sales.

Net cash outflows from investing activities totaled \$869.9 million for the nine months ended March 31, 2014, while outflows totaled \$420.5 million for the same period in fiscal year 2014. The increase was primarily due to higher loan originations, which were only partially offset by increased repayments of loans in the 2014 period compared to the same period in the prior year.

Our net cash provided by financing activities totaled \$722.7 million for the nine months ended March 31, 2014, while inflows totaled \$541.5 million for the nine months ended March 31, 2013. Net cash provided by financing activities increased primarily from a net increase in deposits for the nine months ended March 31, 2014 compared to March 31, 2013.

During the nine months ended March 31, 2014, the Bank could borrow up to 40.0% of its total assets from the FHLB. Borrowings are collateralized by the pledge of certain mortgage loans and investment securities to the FHLB. At March 31, 2014, the Company had \$972.1 million available immediately and reflects a fully collateralized position. At March 31, 2014, we also had two \$20.0 million unsecured federal funds purchase lines with two different banks, under which no borrowings were outstanding.

The Bank has the ability to borrow short-term from the Federal Reserve Bank of San Francisco Discount Window. At March 31, 2014, the Bank did not have any borrowings outstanding and the amount available from this source was \$19.4 million. The credit line is collateralized by consumer loans and mortgage-backed securities.

In an effort to expand our Bank's liquidity options, we have issued brokered deposits, with \$417.6 million outstanding at March 31, 2014. We believe our liquidity sources to be stable and adequate for our anticipated needs and contingencies. We believe we have the ability to increase our level of deposits and borrowings to address our liquidity needs for the foreseeable future.

AT-THE-MARKET OFFERING

On March 11, 2013, we entered into an At-the-Market (ATM) Equity Distribution Agreement with each of Raymond James & Associates, Inc., JMP Securities LLC, Liquidnet, Inc., and Sandler O'Neill + Partners L.P. (the "Distribution Agents") pursuant to which we may issue and sell through the Distribution Agents from time to time shares of our common stock in at the market offerings with an aggregate offering price of up to \$50,000,000 (the "ATM Offering"). The sales of shares of our common stock under the Equity Distribution Agreement are to be made in "at the market" offerings as defined in Rule 415 of the Securities Act of 1933, as amended, including sales made directly on the NASDAQ Global Select Market (the principal existing trading market for our common stock), or sales made through a market maker or any other trading market for our common stock, or (with our prior consent) in privately negotiated transactions at negotiated prices. The aggregate compensation payable to the Distribution Agents under the Distribution Agreement is 2.5% of the gross sales price of the shares sold under the agreement. We have also agreed to reimburse the Distribution Agents for up to \$125,000 in their expenses and have provided the Distribution Agents with customary indemnification rights.

Table of Contents

In fiscal year 2014, we commenced sales of common stock through the ATM Offering. The details of the shares of common stock sold through the ATM Offering through March 31, 2014 are as follows (dollars in thousands, except per share data, per share price is net of commissions):

Distribution Agent	Month	Weighted Average Per Share Price	Number of Shares Sold	Net Proceeds	Compensation to Distribution Agent
Raymond James & Associates	March 2013	\$35.25	200,000	\$6,874	\$176
Raymond James & Associates	October 2013	\$68.76	49,580	\$3,409	\$87
Raymond James & Associates	November 2013	\$70.56	147,820	\$10,431	\$267
Raymond James & Associates	December 2013	\$77.32	38,599	\$2,984	\$77
Raymond James & Associates	January 2014	\$78.38	90,000	\$7,054	\$181
Raymond James & Associates	February 2014	\$79.47	49,608	\$3,942	\$101

As of March 31, 2014, the total gross sales we completed and the remaining sales we have available under the ATM Offering were \$35,583,642 and \$14,416,358 respectively.

OFF-BALANCE SHEET COMMITMENTS

At March 31, 2014, we had commitments to originate loans with an aggregate outstanding principal balance of \$70.2 million, and commitments to sell loans with an aggregate outstanding principal balance of \$33.6 million. At March 31, 2014, the Company had a commitment to purchase a \$10.0 million variable rate structure note. We have no commitments to purchase loans or any other unused lines of credit.

CONTRACTUAL OBLIGATIONS

The Company enters into contractual obligations in the normal course of business primarily as a source of funds for its asset growth and to meet required capital needs. Our time deposits due within one year of March 31, 2014 totaled \$413.0 million. We believe the large percentage of time deposits that mature within one year reflects customers' hesitancy to invest their funds long term. If these maturing deposits do not remain with us, we may be required to seek other sources of funds, including other time deposits and borrowings. Depending on market conditions, we may be required to pay higher rates on deposits and borrowings than we currently pay on time deposits maturing within one year. However, based on past experience we believe a significant portion of our time deposits will remain with us. We believe we have the ability to attract and retain deposits by adjusting interest rates offered.

The following table presents certain of our contractual obligations as of the period indicated:

(Dollars in thousands)	Total	Payments Due by Period ¹			
		Less Than One Year	One To Three Years	Three To Five Years	More Than Five Years
Long-term debt obligations ²	\$698,386	\$272,401	\$146,169	\$204,235	\$75,581
Time deposits ²	873,399	415,137	223,595	50,433	184,234
Operating lease obligations ³	13,426	2,015	4,061	4,405	2,945
Total	\$1,585,211	\$689,553	\$373,825	\$259,073	\$262,760

1. Our contractual obligations include long-term debt, time deposits and operating leases as shown. We had no capitalized leases or material commitments for capital expenditures at March 31, 2014.

2. Amounts include principal and interest due to recipient.

3. Payments are for leases of real property.

CAPITAL RESOURCES AND REQUIREMENTS

BofI Federal Bank is subject to various regulatory capital requirements set by the federal banking agencies. Failure by our Bank to meet minimum capital requirements could result in certain mandatory and discretionary actions by regulators that could have a material adverse effect on our consolidated financial statements. Under capital adequacy

guidelines and the regulatory framework for prompt corrective action, our Bank must meet specific capital guidelines that involve quantitative measures of our Bank's assets, liabilities and certain off-balance-sheet items as calculated under regulatory accounting practices. Our Bank's capital amounts and classifications are also subject to qualitative judgments by regulators about components, risk weightings and other factors.

Table of Contents

Quantitative measures established by regulation require our Bank to maintain certain minimum capital amounts and ratios. Regulations of the OCC require our Bank to maintain minimum ratios of tangible capital to tangible assets of 1.5%, core capital to tangible assets of 4.0% and total risk-based capital to risk-weighted assets of 8.0%. At March 31, 2014, our Bank met all the capital adequacy requirements to which it was subject. At March 31, 2014, our Bank was “well capitalized” under the regulatory framework for prompt corrective action. To be “well capitalized,” our Bank must maintain minimum leverage, tier 1 risk-based and total risk-based capital ratios of at least 5.0%, 6.0% and 10.0%, respectively. Management believes that no conditions or events have occurred since March 31, 2014 that management believes would materially adversely change the Bank’s capital classification. From time to time, we may need to raise additional capital to support our Bank’s further growth and to maintain its “well capitalized” status.

The Bank’s capital amounts, capital ratios and capital requirements were as follows:

As of March 31, 2014

(Dollars in thousands)	Actual		For Capital Adequacy Purposes		To be “Well Capitalized” Under Prompt Corrective Action Regulations		
	Amount	Ratio	Amount	Ratio	Amount	Ratio	
Tier 1 leverage (core) capital to adjusted tangible assets	\$350,507	9.07	% \$154,622	4.00	% \$193,278	5.00	%
Tier 1 capital (to risk-weighted assets)	350,507	15.10	% N/A	N/A	139,230	6.00	%
Total capital (to risk-weighted assets)	366,500	15.78	% 185,760	8.00	% 232,200	10.00	%
Tangible capital (to tangible assets)	350,507	9.07	% 57,983	1.50	% N/A	N/A	

As of June 30, 2013

(Dollars in thousands)	Actual		For Capital Adequacy Purposes		To be “Well Capitalized” Under Prompt Corrective Action Regulations		
	Amount	Ratio	Amount	Ratio	Amount	Ratio	
Tier 1 leverage (core) capital to adjusted tangible assets	\$268,103	8.63	% \$124,277	4.00	% \$155,346	5.00	%
Tier 1 capital (to risk-weighted assets)	268,103	14.52	% N/A	N/A	110,813	6.00	%
Total capital (to risk-weighted assets)	282,285	15.28	% 147,751	8.00	% 184,689	10.00	%
Tangible capital (to tangible assets)	268,103	8.63	% 46,604	1.50	% N/A	N/A	

QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We measure interest rate sensitivity as the difference between amounts of interest-earning assets and interest-bearing liabilities that mature or contractually re-price within a given period of time. The difference, or the interest rate sensitivity gap, provides an indication of the extent to which an institution’s interest rate spread will be affected by changes in interest rates. A gap is considered positive when the amount of interest rate sensitive assets exceeds the amount of interest rate sensitive liabilities and negative when the amount of interest rate sensitive liabilities exceeds the amount of interest rate sensitive assets. In a rising interest rate environment, an institution with a positive gap would be in a better position than an institution with a negative gap to invest in higher yielding assets or to have its asset yields adjusted upward, which would cause the yield on its assets to increase at a faster pace than the cost of its interest-bearing liabilities. During a period of falling interest rates, however, an institution with a positive gap would tend to have its assets reprice at a faster rate than one with a negative gap, which would tend to reduce the growth in its net interest income.

Table of Contents

The following table sets forth the interest rate sensitivity of our assets and liabilities at March 31, 2014:

(Dollars in thousands)	Term to Repricing, Repayment, or Maturity at March 31, 2014			
	One Year or Less	Over One Year Through Five Years	Over Five Years	Total
Interest-earning assets:				
Cash and cash equivalents	\$ 128,398	\$—	\$—	\$ 128,398
Securities ¹	279,092	14,476	173,473	467,041
Stock of the FHLB, at cost	29,140	—	—	29,140
Loans—net of allowance for loan losses	476,404	2,048,103	576,901	3,101,408
Loans held for sale	64,668	—	—	64,668
Total interest-earning assets	977,702	2,062,579	750,374	3,790,655
Non-interest earning assets	—	—	—	60,170
Total assets	\$ 977,702	\$ 2,062,579	\$ 750,374	\$ 3,850,825
Interest-bearing liabilities:				
Interest-bearing deposits ³	\$ 2,247,207	\$ 272,457	\$ 182,323	\$ 2,701,987
Securities sold under agreements to repurchase	25,000	35,000	—	60,000
Advances from the FHLB ⁴	237,000	290,000	65,000	592,000
Other borrowed funds	5,155	—	—	5,155
Total interest-bearing liabilities	2,514,362	597,457	247,323	3,359,142
Other non-interest-bearing liabilities	—	—	—	152,838
Stockholders' equity	—	—	—	338,845
Total liabilities and equity	\$ 2,514,362	\$ 597,457	\$ 247,323	\$ 3,850,825
Net interest rate sensitivity gap	\$ (1,536,660)	\$ 1,465,122	\$ 503,051	\$ 431,513
Cumulative gap	\$ (1,536,660)	\$ (71,538)	\$ 431,513	\$ 431,513
Net interest rate sensitivity gap—as a % of interest earning assets	(157.17)%	71.03 %	67.04 %	11.38 %
Cumulative gap—as % of cumulative interest earning assets	(157.17)%	(2.35)%	11.38 %	11.38 %

¹. Comprised of U.S. government securities and mortgage-backed securities, which are classified as held-to-maturity, available-for-sale and trading. The table reflects contractual re-pricing dates.

². The table reflects either contractual re-pricing dates or maturities.

³. The table assumes that the principal balances for demand deposit and savings accounts will re-price in the first year.

⁴. The table reflects either contractual repricing dates or maturities and does not estimate prepayments or puts.

Although “gap” analysis is a useful measurement device available to management in determining the existence of interest rate exposure, its static focus as of a particular date makes it necessary to utilize other techniques in measuring exposure to changes in interest rates. For example, gap analysis is limited in its ability to predict trends in future earnings and makes no assumptions about changes in prepayment tendencies, deposit or loan maturity preferences or repricing time lags that may occur in response to a change in the interest rate environment.

Table of Contents

The following table indicates the sensitivity of net interest income movements to parallel instantaneous shocks in interest rates for the 1-12 months and 13-24 months' time periods. For purposes of modeling net interest income sensitivity the Bank assumes no growth in the balance sheet other than for retained earnings:

(Dollars in thousands)	As of March 31, 2014				
	First 12 Months		Next 12 Months		
	Net Interest Income	Percentage Change from Base	Net Interest Income	Percentage Change from Base	
Up 200 basis points	\$ 144,596	1.80	% \$ 131,549	(5.93)%
Base	141,978	—	% 139,263	—	%
Down 200 basis points	149,828	5.49	% 135,974	(2.37)%

We attempt to measure the effect market interest rate changes will have on the net present value of assets and liabilities, which is defined as market value of equity. The market value of equity for these purposes is not intended to refer to the trading pricing of our common stock. We analyze the market value of equity sensitivity to an immediate parallel and sustained shift in interest rates derived from the current treasury and LIBOR yield curves. For rising interest rate scenarios, the industry market interest rate forecast was increased by 100, 200 and 300 basis points.

The following table indicates the sensitivity of market value of equity to the interest rate movement described above:

(Dollars in thousands)	As of March 31, 2014				
	Net Present Value	Percentage Change from Base	Net Present Value as a Percentage of Assets		
Up 300 basis points	\$ 335,588	(23.8)%	9.16	%
Up 200 basis points	377,985	(14.1)%	10.03	%
Up 100 basis points	426,098	(3.2)%	10.97	%
Base	440,269	—	%	11.06	%
Down 100 basis points	434,084	(1.4)%	10.73	%
Down 200 basis points	438,137	(0.5)%	10.73	%

The computation of the prospective effects of hypothetical interest rate changes is based on numerous assumptions, including relative levels of interest rates, asset prepayments, runoffs in deposits and changes in repricing levels of deposits to general market rates, and should not be relied upon as indicative of actual results. Furthermore, these computations do not take into account any actions that we may undertake in response to future changes in interest rates.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISKS

For quantitative and qualitative disclosures regarding market risks in our portfolio, see, "Management's Discussion and Analysis of Financial Condition and Results of Operations—Quantitative and Qualitative Disclosures About Market Risk."

ITEM 4. CONTROLS AND PROCEDURES

The Company's management, with the participation of its Chief Executive Officer and Chief Financial Officer, conducted an evaluation of the effectiveness of the design and operation of the Company's disclosure controls and procedures, pursuant to Exchange Act Rule 13a-15(e). Based upon that evaluation, our Chief Executive Officer along with our Chief Financial Officer concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures were effective to ensure that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the

time periods specified by the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

There were no changes in the Company's internal control over financial reporting that occurred during the quarter ended March 31, 2014 that have materially affected, or are reasonably likely to materially affect our internal control over financial reporting.

Table of Contents

Management, including the Company's Chief Executive Officer and Chief Financial Officer, does not expect that the Company's internal controls will prevent or detect all errors and all fraud. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of internal controls can provide absolute assurance that all control issues and instances of fraud, if any, have been detected. Also, any evaluation of the effectiveness of controls in future periods are subject to the risk that those internal controls may become inadequate because of changes in business conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Table of Contents

PART II—OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

We are not involved in any material legal proceedings. From time to time we may be a party to a claim or litigation that arises in the ordinary course of business, such as claims to enforce liens, claims involving the origination and servicing of loans, and other issues related to the business of the Bank.

ITEM 1A. RISK FACTORS

We face a variety of risks that are inherent in our business and our industry. These risks are described in more detail under “MD&A - Factors That May Affect Our Performance,” in our Annual Report on Form 10-K for the year ended June 30, 2013. We encourage you to read these factors in their entirety. Moreover, other factors may also exist that we cannot anticipate or that we currently do not consider to be significant based on information that is currently available. The following supplements the risk factors in our Annual Report on Form 10-K referenced above:

Our pending transaction with H&R Block Bank may not close as anticipated.

On April 10, 2014, we announced that BofI Federal Bank has entered into a definitive Purchase and Assumption Agreement with H&R Block Bank, a federal savings bank (“HRBB”), and its parent company Block Financial LLC, pursuant to which the Bank agreed to purchase certain assets and assume all of the deposits of HRBB. In addition, we have agreed with HRBB to the terms of a Program Management Agreement (“PMA”) under which the Bank will provide certain H&R Block-branded financial services products to customers of H&R Block, Inc. (“HRB”).

The closing of the pending transactions with HRBB is subject to regulatory approval and other customary closing conditions. We have filed a regulatory application with the Office of the Comptroller of the Currency. HRBB has filed for regulatory approval with the Board of Governors of the Federal Reserve System. Approval of these regulatory applications by these agencies is necessary to complete the HRBB transaction. If the regulatory approvals are not received or the customary closing conditions are not satisfied, the transaction with HRBB will likely not be consummated in its current form, or at all.

We may fail to realize the anticipated benefits of the transaction with HRBB.

The success of our pending transaction with HRBB will depend upon, among other things, our ability to combine and integrate the assumed deposits, our ability to operate the PMA and HRB’s desire and ability to offer financial services products to customers after the closing date. Our objectives with regard to executing the assumption of the deposits and managing our obligations under the PMA are subject to risks that operational and regulatory procedures may change. Under the terms of the PMA there are no minimum transaction levels and the number of transactions that are processed may be more or less than expected due to business changes by HRB, regulatory changes or changes due to competition for HRB’s products. If we are not able to successfully achieve our objectives or if HRB limits, eliminates or fails to realize the expected volumes for one or more of the financial services products described in the PMA, the anticipated benefits of the transaction with HRBB may not be realized fully or at all, or may take longer to realize than expected.

In addition, the transaction with HRBB will require substantial resources and effort from our management. The integration process and other disruptions resulting from the transaction may disrupt our ongoing businesses or cause inconsistencies in our standards, controls, procedures or policies. In addition, difficulties in integrating the functions following completion of the transaction could harm our reputation with customers.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

The table below sets forth our market repurchases of BofI common stock and the BofI common shares retained in connection with net settlement of restricted stock awards during the nine months ended March 31, 2014. Purchases made relate to the stock repurchase plan of 414,991 shares that was originally approved by the Company’s Board of Directors on July 5, 2005, plus an additional 500,000 shares approved on November 20, 2008. Stock repurchased under this plan will be held as treasury shares.

Table of Contents

Period	Number of Shares Purchased	Average Price Paid Per Shares	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet be Purchased Under the Plans or Programs
Stock Repurchases				
Quarter Ended March 31, 2014				
January 1, 2014 to March 31, 2014	—	\$—	—	319,291
Balance at March 31, 2014	595,700	\$5.72	595,700	319,291
Stock Retained in Net Settlement				
Beginning Balance at July 1, 2013	309,204			
July 1, 2013 to July 31, 2013	1,076			
August 1, 2013 to August 31, 2013	18,696			
September 1, 2013 to September 30, 2013	1,317			
October 1, 2013 to October 31, 2013	25			
November 1, 2013 to November 30, 2013	—			
December 1, 2013 to December 31, 2013	7,799			
January 1, 2014 to January 31, 2014	436			
February 1, 2014 to February 28, 2014	566			
March 1, 2014 to March 31, 2014	241			
Ending Balance at March 31, 2014	339,360			
Total Treasury Shares at March 31, 2014	935,060
