#### Item 1.01 Entry into a Material Definitive Agreement.

On July 13, 2005, The Texas - Mexican Railroad, ("Tex-Mex"), a wholly-owned indirect subsidiary of Kansas City Southern ("KCS") entered into an agreement with the Federal Railroad Administration ("FRA") with an effective date of June 28, 2005 to borrow \$50.0 million to be used for safety and infrastructure improvements on the Tex-Mex. The loan was partially funded July 13, 2005. The infrastructure improvements are expected to increase efficiency and capacity in order to accommodate growing freight rail traffic related to the NAFTA corridor. The loan will be used to upgrade 146 miles of track, rehabilitate 26 bridges, construct two new sidings, lengthen another siding and replace 75,000 crossties. Additionally, two rail yards, one in Laredo and a second in Corpus Christi will also be upgraded. The loan will also be used to refinance prior debt incurred for capital investment projects. For additional details, see the discussion in item 2.03 below, which is incorporated herein by reference.

#### Item 2.03 Creation of a Direct Financial Obligation or an Obligation under an Off-Balance Sheet Arrangement of a Registrant.

Tex Mex drew the first \$10.0 million on July 13 to apply to capital projects currently in progress and thus became obligated on this date. Terms of payment are quarterly, begining September 15, 2005 and with subsequent payments due each December 15, March 15, and June 15 with an amortization period and maturity of 25 years at a fixed rate of interest of 4.29%. The loan is guaranteed by Mexrail, Inc. ("Mexrail"), a wholly-owned, indirect subsidiary of KCS. Mexrail has issued a Pledge Agreement in favor of the lender equal to the gross revenues earned by Mexrail on per-car fees charged for traffic crossing the International Rail Bridge located in Laredo, Texas. The loan is being made under the Railroad Rehabilitation and Improvement Financing Program ("RRIF") Administered by the FRA. The program assists short line and regional railroads to acquire, improve and rehabilitate rail equipment and infrastructure. Direct loans can pay up to 100 percent of a project with repayment schedules of 25 years at interest rates equal to the cost of borrowing from the federal government.
