Report of Independent Registered Public Accounting Firm

To the Participants and Plan Administrator of the
SandRidge Energy, Inc. 401(k) Plan

We have audited the accompanying Statements of Net Assets Available for Benefits of SandRidge Energy, Inc. 401(k) Plan (the "Plan") as of December 31, 2014 and 2013, and the related Statement of Changes in Net Assets Available for Benefits for the year ended December 31, 2014. These financial statements are the responsibility of Plan management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the auditing standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Plan is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on the effectiveness of the Plan's control over financial reporting. Accordingly, we express no such opinion. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by Plan management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets available for benefits of the Plan as of December 31, 2014 and 2013, and the changes in net assets available for benefits for the year ended December 31, 2014 in conformity with accounting principles generally accepted in the United States of America.

The supplemental schedules listed in the Index page have been subjected to the auditing procedures performed in conjunction with the audit of the Plan's financial statements. The supplemental schedules are presented for the purpose of additional analysis and are not a required part of the financial statements but include supplemental information required by the Department of Labor's ("DOL") Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, as amended ("ERISA"). The supplemental schedules are the responsibility of Plan management. Our audit procedures included determining whether the supplementary information reconciles to the financial statements or the underlying accounting and other records, as applicable, and performing procedures to test the completeness and accuracy of the information presented in the supplemental schedules. In forming our opinion on the supplemental schedules, we evaluated whether the supplemental schedules, including their form and content, are presented in conformity with the DOL Rules and Regulations for Reporting and Disclosure under ERISA. In our opinion, the supplemental schedules are fairly stated in all material respects in relation to the financial statements taken as a whole.

SANDRIDGE ENERGY, INC. 401(K) PLAN
NOTES TO FINANCIAL STATEMENTS

1. Description of Plan

The following description of the SandRidge Energy, Inc. 401(k) Plan (the "Plan") provides only general information. For a more complete description of the Plan's provisions, participants in the Plan should refer to the Plan Agreement.

General

The Plan is a defined contribution plan covering all eligible employees of SandRidge Energy, Inc. and its subsidiaries (collectively, the "Company" or "Employer"). Employees must be at least 21 years of age and complete two consecutive months of service with the Company in order to be eligible to participate in the Plan. Eligible employees may begin participating on the first day of the first plan quarter after satisfying the Plan's eligibility requirements. Employees qualifying as eligible rehired participants may begin participating in the Plan immediately. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"), and is qualified under Section 401(a) of the Internal Revenue Code of 1986, as amended (the "Code").

Contributions

Participant Contributions. Eligible employees may contribute a percentage of their pretax compensation to the Plan through a payroll deduction program. The Code and Plan Agreement limit discretionary employee contributions to an annual amount, which is adjusted for inflation under the Code.

Participants may direct contributions into one or more of the available investment options, including a self-directed brokerage account.

Company Contributions. The Company determines the matching contribution to be made to the Plan by the Company for each plan year on the first day of that plan year. For the plan year ended December 31, 2014, the Company made matching contributions to the Plan equal to a dollar for each dollar contributed by the participant up to 10% of the participant's eligible compensation (excluding performance bonuses) for each payroll period. For a participant's performance bonus, the Company made dollar for dollar matching contributions to the Plan up to 15%. Company contributions are deposited with the Plan at least annually. During 2014, the Company's contributions to the Plan were made at the same time as the bi-weekly participant contributions.

Company matching contributions are invested entirely in shares of the Company's common stock. After one year of service, participants may transfer amounts allocated to their accounts from the Company's matching contribution to other investment options available under the Plan and may change their future match allocation to other available investment options. See "Vesting" below.

In addition to Company matching contributions, the Plan permits the Company to make profit sharing contributions at its discretion. Any profit sharing contribution made by the Company shall be allocated to eligible employee accounts in proportion to the employee's compensation as a percentage of total compensation of all eligible employees and will vest based on years of service pursuant to the Plan Agreement. The Company made no profit sharing contributions during 2014.

Payment of Benefits

The Plan provides for payments of benefits to participants or their beneficiaries (i) upon a participant's attainment of age 60, (ii) in the event of a participant's death, (iii) in the event a participant becomes permanently disabled or (iv) in the event a participant age 59 ½ or older elects to receive in-service distributions.

SANDRIDGE ENERGY, INC. 401(K) PLAN
NOTES TO FINANCIAL STATEMENTS - CONTINUED

Vesting

Participants are immediately 100% vested in the discretionary employee contribution portion of their accounts plus earnings thereon. The Company's matching contributions plus earnings thereon vest based on years of service, as shown in the table below, pursuant to the Plan Agreement.

Upon termination of service due to a participant's death, disability or retirement, the participant has a nonforfeitable right to 100% of his or her account balance. Upon termination of service for any other reason, a participant's nonforfeitable interest in the portion of his or her account balance attributable to Company contributions shall be determined in accordance with the following vesting schedule:

Full Years of Credit Service	Vesting Percentage	
One year but less than two	25.00	%
Two years but less than three	50.00	%
Three years but less than four	75.00	%
Four years or more	100.00	%

Forfeitures

Unvested Company matching contributions, if any, are forfeited and remain in the Plan following separation of employment due to reasons other than a participant's death, disability or retirement. At December 31, 2014 there were no unvested forfeitures included in Plan assets. At December 31, 2013 unvested forfeitures of \$18,258 were included in Plan assets. Unvested forfeited amounts may be used to pay Plan expenses that otherwise would be payable by Plan assets or reduce Company matching contributions in accordance with the Plan Agreement. During 2014, forfeitures of \$1,060,633 were used to reduce Company matching contributions.

Termination of the Plan

The Company has the right under the Plan Agreement to discontinue its contributions at any time and to terminate the Plan subject to the provisions of ERISA. If the Plan is terminated, participants' accounts will become 100% vested and the Plan's assets will be distributed in accordance with the terms of the Plan Agreement.

Participant Accounts

Each participant's account is credited with the participant's discretionary contributions and earnings thereon and an allocation of the Company's contributions and earnings thereon. Each participant is entitled to the fully vested portion of the participant's account. The amount of benefits to which a participant is entitled is determined as of the date a participant's distribution is processed.

Notes Receivable from Participants

Participants may obtain loans from the Plan. The minimum amount a participant may borrow from the Plan is \$1,000, and the maximum amount a participant may borrow from the Plan is the lesser of \$50,000 or 50% of the participant's vested account balance. All notes related to such loans are secured by the participant's vested account balance and bear interest at a rate equal to the prime rate at the time the loan is funded. Repayment is made in bi-weekly installments over a period not extending beyond five years from the date of the loan.

Plan Administration

The Plan is administered by designated Company personnel. Reliance Trust Company (the "Trustee") is designated as the Plan's trustee and has delegated responsibility for the custody and management of the Plan's assets to Fidelity Investments (the "Custodian") and The Newport Group (the "Record Keeper"), respectively. The Company has engaged an investment consultant to assist in (i) selecting appropriate and prudent investment options and (ii) monitoring and evaluating performance results of the investment options to assure that the investment objectives applicable to the investment options are being met. The Company provides administrative and managerial services to the Plan at no charge. Investment expenses charged to the Plan are paid out of Plan assets or by the Company.

SANDRIDGE ENERGY, INC. 401(K) PLAN
NOTES TO FINANCIAL STATEMENTS - CONTINUED

2. Summary of Significant Accounting Policies

Basis of Accounting

The accompanying financial statements have been prepared on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America ("GAAP").

The Plan reports investment contracts at fair value in accordance with the Financial Accounting Standards Board's ("FASB") Accounting Standards Codification ("ASC") Topic 325, Investments - Other. However, contract value is the relevant measurement attribute for that portion of net assets available for benefits of a defined contribution plan attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were able to initiate permitted transactions under the terms of the Plan. The accompanying statements of net assets available for benefits present the fair value of fully benefit-responsive investment contracts and an adjustment from fair value to contract value of such investment contracts in order to determine net assets available for benefits. The accompanying statement of changes in net assets available for benefits is prepared on a contract value basis.

Valuation of Investments and Income Recognition

Investments are reported at fair value. Fair value, as defined by ASC Topic 820, "Fair Value Measurements and Disclosures" ("ASC Topic 820") is the price less costs to sell, if significant, that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 4 for further discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. The change in market value of investments is reflected in the statement of changes in net assets available for benefits as appreciation or depreciation in fair value of investments. Investment-related expenses are included in net depreciation of fair value of investments. Dividends are recorded on the ex-dividend date.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires the Plan to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results may differ from those estimates.

Notes Receivable from Participants

Notes receivable from participants are recorded at their unpaid principal balance plus any accrued but unpaid interest. Interest income on notes receivable from participants is recorded when earned. No allowance for credit losses has been recorded as of December 31, 2014 or 2013. If a participant ceases to make loan repayments and the plan administrator deems the participant loan to be a distribution, the participant loan balance is reduced and a benefit payment is recorded.

Payment of Benefits

Benefit payments to Plan participants are recorded when paid.

Risks and Uncertainties

The Plan provides for investment in the Company's common stock, various mutual funds and other investment securities. Investments, in general, are exposed to various risks, such as interest rate, credit and overall market volatility risk. Due to the level of risk associated with certain investments, it is reasonably possible that changes in the value of investments could occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits and participant account balances. Rates of return will vary, and returns will depend on the market value of the Plan's investments.

Recent Accounting Pronouncements

In May 2015, the FASB issued Accounting Standards Update ("ASU") 2015-07, "Disclosures for Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent)". ASU 2015-07 removes the requirement to

categorize within the fair value hierarchy all investments for which fair value is measured using the net asset value per share practical expedient and limits the scope of the disclosure requirements for investments eligible to be measured at net asset value per share to be limited to investments for which the entity has elected to use the practical expedient. The guidance is effective on a retrospective basis for fiscal years beginning after December 15, 2015. As the additional requirements under

8

SANDRIDGE ENERGY, INC. 401(K) PLAN
 NOTES TO FINANCIAL STATEMENTS - CONTINUED

ASU 2015-07, which will be adopted January 1, 2016, pertain to disclosures of investments eligible to be measured at fair value using the net asset value per share practical expedient, no effect on the Plan's financial condition is expected. See Note 4 for fair value measurement disclosures.

3. Investments

The following tables present the fair value of Plan investments representing 5% or more of the net assets available for benefits at December 31, 2014 and 2013:

	December 31,	
	2014	2013
Vanguard Group, Inc. - Vanguard Target Retirement 2020 Fund	\$5,787,673	\$5,517,011
Vanguard Group, Inc. - Vanguard Target Retirement 2030 Fund	5,403,950	4,813,598
Vanguard Group, Inc. - Vanguard Target Retirement 2040 Fund	7,017,795	6,494,430
Vanguard Group, Inc. - Vanguard Target Retirement 2045 Fund*	4,600,289	3,335,466
Vanguard Group, Inc. - Vanguard Target Retirement 2050 Fund*	4,688,434	3,701,257
SandRidge Energy, Inc. common stock**	9,427,679	31,797,586

* Investment did not represent 5% or more of the Plan's net assets available for benefits at December 31, 2013

** Includes participant and nonparticipant-directed investments

The net change in value of Plan investments (including investments bought and sold as well as those held during the year) during 2014 is as follows:

Mutual funds	\$2,195,966
Common stock	(20,714,835)
Net depreciation of investments	\$(18,518,869)

In addition, the Plan reported dividend income from investments of \$1,829,685 for 2014. Accrued interest and dividends receivable were not significant for 2014 or 2013.

Specific investment funds may be added or deleted as investment options under the Plan from time to time. The Plan currently has 33 investment options, including the Company's common stock, and a self-directed brokerage account in which participants have the option to invest their contributions in stocks and bonds.

4. Fair Value Measurements

The Plan measures and reports investments on a fair value basis and has classified and disclosed its fair value measurements using the following levels of the fair value hierarchy in accordance with ASC Topic 820.

Level 1: Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.

Level 2: Quoted prices in markets that are not active, or inputs which are observable, either directly or indirectly, for substantially the full term of the asset or liability.

Level 3: Measurement based on prices or valuation models that require inputs that are both significant to the fair value measurement and less observable for objective sources (i.e., supported by little or no market activity).

Assets and liabilities that are measured at fair value are classified based on the lowest level of input that is significant to the fair value measurement. The Plan's assessment of the significance of a particular input to the fair value measurement requires judgment, which may affect the valuation of the fair value of assets and liabilities and their placement within the fair value hierarchy levels. The determination of the fair values, stated below, takes into account the market for the Plan's assets, the associated credit risk and other factors as required under ASC Topic 820. The Plan considers active markets as those in which transactions for the assets or liabilities occur in sufficient frequency and volume to provide pricing information on an ongoing basis.

SANDRIDGE ENERGY, INC. 401(K) PLAN
 NOTES TO FINANCIAL STATEMENTS - CONTINUED

The Plan has assets classified as Level 1 and Level 2 as of December 31, 2014 and 2013 as described below.

Level 1 Fair Value Measurements

Mutual funds. The fair values of mutual funds that invest principally in actively traded marketable securities are derived from quoted market prices as substantially all of these instruments have active markets.

Common stock. Fair value of Company common stock is based on the market price for a share of such common stock as quoted on the New York Stock Exchange on December 31st (or the preceding business day) of the applicable year.

Self-directed brokerage accounts. Assets held in self-directed brokerage accounts consist of stocks and bonds. The fair values of amounts held in self-directed brokerage accounts are derived from quoted market prices.

Level 2 Fair Value Measurements

Guaranteed investment fund. The fair value of the guaranteed investment fund is the sum of the fair value of the United States treasury securities and the guaranteed investment contracts (the "GICs") held by the guaranteed investment fund as determined by the Putnam Fiduciary Trust Company using a discounted cash flow methodology.

The fair value of the United States treasury securities is based on quoted market prices of those securities that are actively traded and the estimated fair value of the GICs is based on the credit rating of the counterparty, current interest rates and term of the contracts. The guaranteed investment fund may invest in United States treasury securities and GICs of various entities. Because Plan participants transact at contract value, fair value is determined annually for reporting purposes only. See Note 5 for further discussion of the guaranteed investment fund and determination of contract value.

The following tables set forth by level, within the fair value hierarchy, the fair value of the Plan's investments as of December 31, 2014 and 2013:

Description	Investments at Fair Value as of December 31, 2014			
	Level 1	Level 2	Level 3	Total
Mutual funds				
Fixed income	\$ 1,726,442	\$—	\$—	\$ 1,726,442

Total investments at fair value	\$84,669,347	\$3,862,898	\$—	\$88,532,245

The availability of observable market data is monitored to assess the appropriate classification of the Plan's investments within the fair value hierarchy. Changes in economic conditions or valuation techniques may require the transfer of investments from one fair value level to another. Transfers between levels are evaluated for their significance based upon the nature of the investments and size of the transfer relative to the net assets available for benefits. The Plan's policy is to recognize transfers in and/or out of fair value hierarchy levels as of the beginning of the reporting period in which the event or change in circumstances causing the transfer occurred. During 2014 and 2013, the Company did not have any transfers between Level 1, Level 2 or Level 3 fair value measurements.

5. Guaranteed Investment Fund - Fully Benefit-Responsive Investment Contract

The Putnam Investments Stable Value Fund is the Plan's guaranteed investment fund option. The fund may invest in short-term money market instruments and in fully benefit-responsive synthetic GICs with various insurance companies, banks and financial institutions. The fund is credited with earnings on the underlying investments and charged for participant withdrawals and administrative expenses. The GIC issuer is contractually obligated to repay the principal amount of the GIC and an amount of interest that is guaranteed to the Plan.

GICs are carried at contract value, which represents invested principal plus contractual interest earned thereon, less participant withdrawals and administrative expenses. Contract value is the relevant measurement attribute for that portion of the net assets available for benefits of a defined contribution plan attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were able to initiate permitted transactions under the terms of the Plan. The Plan invests in fully benefit-responsive contracts through a common collective trust. The investment contracts are non-transferable, but provide for benefit-responsive withdrawals or transfers by plan participants at contract value. See Note 2 for discussion of the applicable accounting policy.

The fund is designed to preserve principal investment while earning a level of interest income that is consistent with the principal preservation. The fund invests in investment contracts issued by insurance companies and other financial institutions ("wraps"), fixed income securities, and money market funds. Wraps are designed to permit the use of book value accounting to maintain a constant \$1 net asset value. In order to maintain the wrap issuers' promise to pay the participant-initiated withdrawals and exchanges at book value, the wraps impose ongoing contractual commitment on the fund as well as the plans invested in the fund. The Plan is required to provide a redemption notice to liquidate its entire share in the fund; however, the fund may defer honoring the withdrawal request for up to 12 months.

There are no reserves against the contract value for the credit risk of the GIC issuer or otherwise. The interest rate for a GIC is based on a formula agreed upon by the Plan and the issuer of the GIC. In no event shall the interest rate be less than zero percent. The key factors that influence future crediting rates include the following: (i) the level of market interest rates, (ii) the amount and timing of participant contributions, transfers and withdrawals, (iii) the investment returns generated, and (iv) the duration of the underlying investments. As of December 31, 2014, the contract value of the guaranteed investment fund was \$3,307,803 compared to a fair value of \$3,370,320. As of December 31, 2013, the contract value of the guaranteed investment fund was \$3,812,948 compared to a fair value of \$3,862,898.

SANDRIDGE ENERGY, INC. 401(K) PLAN
 NOTES TO FINANCIAL STATEMENTS - CONTINUED

The occurrence of certain events can limit the Plan's ability to transact at contract value with the issuer. Such events include the following: (i) amendments to the Plan Agreement (including complete or partial plan termination or merger with another plan), (ii) changes to the Plan's prohibition on competing investment options or deletion of equity wash provisions, (iii) bankruptcy of the Plan sponsor or other Plan sponsor events (for example, divestitures or spin-offs of a subsidiary) that cause a significant withdrawal from the Plan, or (iv) failure of the Plan's trust to qualify for exemption from federal income taxes or any required prohibited transaction exemption under ERISA. The Company does not believe that any event will occur that would limit the Plan's ability to transact at contract value with participants.

The following table presents the average yield earned by the Plan's fully benefit-responsive investment contracts before and after adjustments to reflect the actual interest rate credited to participants during the plan years ended December 31, 2014 and 2013. The Putnam Investments Stable Value Fund is a dollar par fund with only dividends credited to participants.

	2014		2013	
Average Yields				
Based on actual earnings	1.97	%	1.96	%
Based on interest rate credited to participants	1.95	%	1.94	%

6. Nonparticipant-Directed Investments

Net assets available for benefits as of December 31, 2014 and 2013 included nonparticipant-directed investments in Company common stock of \$230,494 and \$190,397, respectively. The change in net assets related to nonparticipant-directed investments during the 2014 plan year is as follows:

Nonparticipant-directed investment contributions	\$988,080	
Net depreciation in fair value	(394,540)
Benefits paid to participants	(19,669)
Forfeitures	(49,969)
Transfer to participant-directed investments	(483,490)
Administrative expenses	(315)
Net increase	\$40,097	

7. Concentration of Market Risk

The Plan has invested a significant portion of its assets in Company common stock. Investments in Company common stock included participant and nonparticipant-directed investments for the plan years ended December 31, 2014 and 2013 and constituted approximately 12% and 34% of the Plan's net assets available for benefits as of December 31, 2014 and 2013, respectively. As a result of this concentration, any significant fluctuation in the market value of Company common stock could impact the net assets of the Plan as well as individual participant account balances.

8. Plan Tax Status

The Company adopted a pre-approved volume submitter profit sharing plan on December 31, 2014. See Note 11 below for changes to the Plan that are effective on January 1, 2015. The Internal Revenue Service ("IRS") determined that the volume submitter profit sharing plan, by a letter dated March 31, 2014, is designed in accordance with applicable sections of the Internal Revenue Code. The Company believes that the Plan, as amended and restated, and its underlying trust have operated within the terms of the Plan and remain qualified under the applicable provisions of the Code.

GAAP requires Plan management to evaluate uncertain tax positions taken by the Plan. The financial statement effects of a tax position are recognized when the position is more likely than not, based on the technical merits, to be sustained upon examination by the IRS. Plan management has analyzed the tax positions taken by the Plan, and has

concluded that as of December 31, 2014, there are no uncertain positions taken or expected to be taken. The Plan has recognized no interest or penalties related to uncertain tax positions. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. Plan management believes it is no longer subject to income tax examinations for years prior to 2011.

SANDRIDGE ENERGY, INC. 401(K) PLAN
NOTES TO FINANCIAL STATEMENTS - CONTINUED

9. Party-in-Interest Transactions

Parties-in-interest (as defined under Department of Labor regulations) to the Plan include any fiduciary of the Plan, any party rendering service to the Plan, the Company as an employer which has employees covered by the Plan and certain others, including Plan participants. During the plan year ended December 31, 2014, the Plan entered into the following transactions with parties-in-interest that are exempt from the Department of Labor regulations that would otherwise prohibit transactions between the Plan and parties-in-interest.

Certain Plan investments were held by the Custodian. Transactions between the Plan and the Custodian qualify as party-in-interest transactions due to the Custodian's relationship with the Plan. Total assets invested in the funds managed by the Custodian were \$1,894,042 and \$1,316,019 at December 31, 2014 and 2013, respectively.

The Plan incurred \$71,050 in administrative fees in 2014 to the Record Keeper which qualify as party-in-interest transactions.

Transactions involving shares of Company common stock are performed by the Custodian on the open market.

The Plan held investments in Company common stock totaling \$9,427,679 and \$31,797,586 at December 31, 2014 and 2013, respectively.

Other assets held by the Plan include notes receivable from participants totaling \$2,550,997 and \$2,462,172 at December 31, 2014 and 2013, respectively.

10. Excess Contributions

The Company made qualified non-elective contributions during 2015 and 2014 to satisfy relevant nondiscrimination provisions of the Plan for the plan years ended December 31, 2014 and 2013, respectively. Additionally, during 2015 the Plan refunded excess deferral contributions for the plan year ended December 31, 2014 to satisfy the portion of the nondiscrimination provision not satisfied by the qualified non-elective contributions already made in 2015.

11. Subsequent Events

Changes to the Plan

Effective January 1, 2015, the Plan was amended and restated to allow Participants to (i) change deferral rates on a monthly basis and (ii) participate in the Plan the month following two complete months of employment. Additionally, the Plan changed the interest rate on participant loans to prime rate plus two percent from prime rate and implemented an auto-escalate feature whereby deferrals of individuals that were automatically enrolled in the Plan at an initial deferral rate of three percent will be automatically escalated one percent annually up to a maximum deferral rate of six percent.

Partial Plan Termination

The Company has determined that a partial termination of the Plan occurred during 2015 as a result of reductions in the Company's workforce made in order to align workforce size with expected reduced activity levels resulting from lower commodity prices. All affected Participants will be fully vested in their accounts.
