UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-Q

(Mark One)

Quarterly report pursuant to section 13 or 15 (d) of the Securities Exchange Act of 1934
For the quarterly period ended September 30, 2012

or
 Transition report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
For the transition period from _____ to _____
Commission File Number: 000-50245

BBCN BANCORP, INC.
(Exact name of registrant as specified in its charter)

Delaware 95-4849715
(State or other jurisdiction of (IRS Employer
incorporation or organization) Identification Number)

3731 Wilshire Boulevard, Suite 1000, Los Angeles, 90010
California (Address of Principal executive offices) (ZIP Code)
(213) 639-1700

(Registrant's telephone number, including area code)
(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer

Non-accelerated filer Smaller Reporting Company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of October 31, 2012, there were 78,041,511 outstanding shares of the issuer's Common Stock, \$0.001 par value.

Forward-Looking Information

Certain matters discussed in this report may constitute forward-looking statements under Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. There can be no assurance that the results described or implied in such forward-looking statements will, in fact, be achieved and actual results, performance, and achievements could differ materially because our business involves inherent risks and uncertainties. The risks and uncertainties include: possible deterioration in economic conditions in our areas of operation; interest rate risk associated with volatile interest rates and related asset-liability matching risk; liquidity risks; risk of significant non-earning assets, and net credit losses that could occur, particularly in times of weak economic conditions or times of rising interest rates; and regulatory risks associated with current and future regulations. For additional information concerning these and other risk factors, see "Part II, Item 1A. Risk Factors" contained herein and "Part I, Item 1A. Risk Factors" contained in our Annual Report on Form 10-K for the year ended December 31, 2011.

BBCN Bancorp, Inc. and Subsidiaries

Notes to Condensed Consolidated Financial Statements (Unaudited)

1. BBCN Bancorp, Inc.

BBCN Bancorp, Inc. ("BBCN Bancorp", on a parent-only basis, and "Company", "we" or "our" on a consolidated basis), formerly named Nara Bancorp, Inc., is a bank holding company headquartered in Los Angeles, California. BBCN Bank ("BBCN Bank" or "the Bank"), formerly named Nara Bank, opened for business in June 1989 under the name "United Citizens National Bank" as a national banking association, was renamed "Nara Bank, National Association" in January 1994 and, in January 2005, became "Nara Bank" upon converting to a California state-chartered bank. On November 30, 2011, we merged with Center Financial Corporation ("Center Financial" or "Center") in a merger of equals transaction. Concurrently with the merger, Nara Bancorp, Inc. ("Nara") changed its name to "BBCN Bancorp, Inc." At the bank level, Nara Bank merged into Center Bank and, concurrently with the merger, Center Bank changed its name to "BBCN Bank." The Bank has branches in California, the New York metropolitan area, New Jersey, the Seattle area of Washington and Chicago, as well as loan production offices in Atlanta, Dallas, Denver and Seattle.

2. Basis of Presentation

Our condensed consolidated financial statements included herein have been prepared without an audit, pursuant to the rules and regulations of the Securities and Exchange Commission ("SEC"). Certain information and footnote disclosures normally included in consolidated financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted pursuant to such SEC rules and regulations. The condensed consolidated financial statements include the accounts of BBCN Bancorp and its wholly-owned subsidiaries, principally BBCN Bank. All intercompany transactions and balances have been eliminated in consolidation.

We believe that we have made all adjustments, consisting solely of normal recurring accruals, necessary to fairly present our financial position at September 30, 2012 and the results of our operations for the three and nine months then ended. Certain reclassifications have been made to prior period amounts to conform to the current year presentation. The results of operations for the interim periods are not necessarily indicative of results to be anticipated for the full year.

The preparation of consolidated financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Material estimates that are susceptible to change in the near term relate to the determination of the allowance and provision for loan losses, the evaluation of other than temporary impairment of investment securities, accounting for derivatives and hedging activities, the determination of the carrying value for cash surrender value of life insurance, the determination of the carrying value of goodwill and other intangible assets, accounting for deferred tax assets and related valuation allowances, the determination of the fair values of investment securities and other financial instruments, accounting for lease arrangements, accounting for incentive compensation, profit sharing and bonus payments and the valuation of servicing assets.

These unaudited condensed consolidated financial statements should be read along with the audited consolidated financial statements and accompanying notes included in our 2011 Annual Report on Form 10-K.

Recent Accounting Pronouncements:

FASB ASC 350 – In September 2011, the FASB issued an update (ASU No. 2011-08, Testing Goodwill for Impairment) impacting FASB ASC 350-20, Intangibles – Goodwill and Other. The amendments in this update permit an entity to first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than the carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test. The more likely than not threshold is defined as having a likelihood of more than

50 percent. If after assessing the totality of events or circumstances, it is not more likely than not that the fair value of the reporting unit is less than its carrying amount, then performing the two-step impairment test is unnecessary. If an entity concludes that it is more likely than not that the fair value of the reporting unit is less than the carrying amount, the entity is required to perform the first step of the two-step impairment. If the carrying amount of a reporting unit exceeds its fair value, then the entity is required to perform the second step of the goodwill impairment test to measure the amount of the impairment loss. This update became effective for the Company for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. The Company has performed an analysis under this approach and it did not have a material impact on the consolidated financial statements.

8

10

Table of Contents

FASB ASC 220 – In December 2011, the FASB issued an update (ASU No. 2011-12, Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05) impacting FASB ASC 220, Comprehensive Income. This update defers the requirement to present items that are reclassified from accumulated other comprehensive income to net income in both the statement where net income is presented and the statement where other comprehensive income is presented. An entity should continue to report reclassifications out of accumulated other comprehensive income consistent with the presentation requirements in effect before ASU No. 2011-05. This update became effective for the Company for interim and annual reporting periods beginning after December 15, 2011 and did not have a material impact on the consolidated financial statements.

FASB ASC 805 – In October 2012, the FASB issued an update (ASU No. 2012-06, Subsequent Accounting for an Indemnification Asset Recognized at the Acquisition Date as a Result of a Government-Assisted Acquisition of a Financial Institution) impacting FASB ASC 805, Business Combinations. This update specifies that when an entity recognizes an indemnification asset as a result of a government-assisted acquisition of a financial institution and subsequently a change in the cash flows expected to be collected on the indemnification asset occurs, the entity should subsequently account for the change in the measurement of the indemnification asset on the same basis as the change in the assets subject to indemnification. Any amortization of changes in value should be limited to the contractual term of the indemnification agreement (the lesser of the term of the indemnification agreement and the remaining life of the indemnified assets). This update becomes effective for interim and annual periods beginning on or after December 15, 2012, and is consistent with the Company's current accounting treatment of changes in expected cash flows and the indemnification asset and will not have a material impact on the consolidated financial statements.

3.Center Merger

On November 30, 2011, the merger of Center and Nara (the "Merger") was completed. Pursuant to the merger agreement, holders of Center common stock received 0.7805 shares of BBCN common stock for each share of Center common stock held immediately prior to the effective time of the merger. The total Company shares issued to each Center shareholder was rounded down to the nearest whole share and cash was paid for any remaining fractional shares. Approximately 31.2 million shares of Company common stock, with a Merger date fair value of \$292 million, were issued to Center shareholders. Outstanding Center stock options and restricted stock awards were converted into stock options with respect to shares of BBCN common stock or shares of BBCN common stock, respectively, with appropriate adjustments to reflect the share exchange ratio.

The Merger was accounted for by BBCN using the acquisition method of accounting under ASC 805, Business Combinations. Accordingly, the assets and liabilities of Center were recorded at their respective fair values and represent management's estimates based on available information. Through the Merger we acquired Center Bank's 21 full-service branch offices, two loan production offices, \$326 million in cash, loans with a fair value of \$1.4 billion, deposits with a fair value of \$1.8 billion and borrowings with a fair value of \$149 million. Goodwill of approximately \$88 million was initially recorded in conjunction with the transaction. The goodwill related to the Merger represents the future economic benefit arising from the acquisition of Center Financial. The future economic benefits include the creation of a platform that can support future operations; strengthening our existing presence in Southern California; expanding our national presence through the addition of offices in Chicago, Seattle and Northern California; and future cost synergies. The results of Center's operations are included in our Consolidated Statements of Income subsequent to the date of the Merger.

The change in goodwill during the three and nine months ended September 30, 2012 and 2011 is as follows:

	Three Months Ended		Nine Months Ended	
	September 30, 2012	2011	September 30, 2012	2011
	(In thousands)			
Beginning of period	\$89,882	\$2,509	\$90,473	\$2,509
Adjustment	0	0	(591) 0

Edgar Filing: BBCN BANCORP INC - Form 10-Q

Impairment	0	0	0	0
End of period	\$89,882	\$2,509	\$89,882	\$2,509

The goodwill arising from the Merger was reduced by a net \$591 thousand to \$87.4 million due to adjustments of certain acquisition date fair value asset and liability estimates during first quarter 2012. Estimates made in the acquisition date accounting are subject to revisions during the subsequent one-year measurement period. Due to the immateriality of the

Table of Contents

revision amount, the Company elected not to retrospectively adjust the acquisition date accounting and instead recorded the adjustments in first quarter 2012. Goodwill is not amortized for book purposes and is not deductible for tax purposes.

Direct costs related to the Merger were expensed as incurred. During the three months ended September 30, 2012, we incurred \$183 thousand in merger and integration expenses, including \$33 thousand in salaries and benefits and \$150 thousand in professional fees. During the three months ended September 30, 2011, we incurred \$574 thousand in merger and integration expenses. During the nine months ended September 30, 2012, we incurred \$3.3 million in merger and integration expenses, including \$1.1 million in salaries and benefits and \$2.2 million in professional fees. During the nine months ended September 30, 2011, we incurred \$1.5 million in merger and integration expenses.

4. Stock-Based Compensation

The Company has a stock-based incentive plan, the 2007 BBCN Bancorp Equity Incentive Plan ("2007 Plan"). The 2007 Plan, approved by our stockholders on May 31, 2007, was amended and restated on July 25, 2007 and again on December 1, 2011. The 2007 Plan provides for grants of stock options, stock appreciation rights ("SARs"), restricted stock, performance shares and performance units (sometimes referred to individually or collectively as "awards") to non-employee directors, officers, employees and consultants of the Company. Stock options may be either "incentive stock options" ("ISOs"), as defined in Section 422 of the Internal Revenue Code of 1986, as amended (the "Code"), or nonqualified stock options ("NQSOs").

The 2007 Plan gives the Company flexibility to (i) attract and retain qualified non-employee directors, executives and other key employees and consultants with appropriate equity-based awards, (ii) motivate high levels of performance, (iii) recognize employee contributions to the Company's success, and (iv) align the interests of Plan participants with those of the Company's stockholders. The exercise price for shares under an ISO may not be less than 100% of fair market value ("FMV") on the date the award is granted under Code Section 422. Similarly, under the terms of the 2007 Plan the exercise price for SARs and NQSOs may not be less than 100% of FMV on the date of grant. Performance units are awarded to a participant at the market price of the Company's common stock on the date of award (after the lapse of the restriction period and the attainment of the performance criteria). No minimum exercise price is prescribed for performance shares and restricted stock awarded under the 2007 Plan.

ISOs, SARs and NQSOs have vesting periods of three to five years and have 10-year contractual terms. Restricted stock, performance shares, and performance units will be granted with a restriction period of not less than one year from the grant date for performance-based awards and not more than three years from the grant date for time-based vesting of grants. Compensation expense for awards is recorded over the vesting period.

Concurrently with the merger, Center's stock-based incentive plan, the Center Financial Corporation 2006 Stock Incentive Plan, adopted April 12, 2006, as amended and restated June 13, 2007 ("2006 Plan"), was assumed by BBCN, with the outstanding share awards of 585,860 shares and the 2,443,513 shares available for future grants at November 30, 2011 being converted at an exchange ratio of 0.7805.

The 2006 Plan provides for the granting of incentive stock options to officers and employees, and non-qualified stock options and restricted stock awards to employees (including officers) and non-employee directors. The option prices of all options granted under the 2006 Plan must be not less than 100% of the fair market value at the date of grant. All options granted generally vest at the rate of 20% per year except that the options granted to the non-employee directors vest at the rate of 33% per year. All options not exercised generally expire ten years after the date of grant. Under the 2007 and 2006 plans 2,630,050 shares were available for future grants as of September 30, 2012.

The total shares reserved for issuance will serve as the underlying value for all equity awards under the 2007 Plan and the 2006 Plan. With the exception of the shares underlying stock options and restricted stock awards, the board of directors may choose to settle the awards by paying the equivalent cash value or by delivering the appropriate number of shares.

The following is a summary of stock option activity under the 2007 and 2006 Plans for the nine months ended September 30, 2012:

12

Table of Contents

	Number of Shares	Weighted- Average Exercise Price Per Share	Weighted- Average Remaining Contractual Life (Years)	Aggregate Intrinsic Value
Outstanding - January 1, 2012	830,011	\$ 16.35		
Granted	0	0		
Exercised	(28,639) 7.11		
Forfeited	0	0		
Outstanding - September 30, 2012	801,372	\$ 16.68	5.68	\$992,000
Options exercisable - September 30, 2012	798,484	\$ 16.68	5.67	\$992,000
Unvested options expected to vest after September 30, 2012	2,888	\$ 15.95	9.17	\$0

The following is a summary of restricted and performance unit activity under the 2007 and 2006 Plans for the nine months ended September 30, 2012:

	Number of Shares	Weighted- Average Grant Date Fair Value	Weighted- Average Remaining Contractual Life (Years)
Outstanding - January 1, 2012	52,480	\$7.42	
Granted	502,710	10.45	
Vested	(9,401) 6.69	
Forfeited	(4,599) 7.46	
Outstanding - September 30, 2012	541,190	\$10.31	9.31

The total fair value of performance units vested for the nine months ended September 30, 2012 and 2011 was \$100 thousand and \$56 thousand, respectively.

The amount charged against income, before income tax benefit of \$328 thousand and \$5 thousand, in relation to the stock-based payment arrangements, was \$818 thousand and \$13 thousand for the three months ended September 30, 2012 and 2011, respectively. The amount charged against income, before income tax benefit of \$805 thousand and \$21 thousand, in relation to the stock-based payment arrangements, was \$2.0 million and \$52 thousand for the nine months ended September 30, 2012 and 2011, respectively. At September 30, 2012, unrecognized compensation expense related to non-vested stock option grants and restricted and performance units aggregated \$3.6 million, and is expected to be recognized over a remaining weighted average vesting period of 1.68 years.

The estimated annual stock-based compensation expense as of September 30, 2012 for each of the succeeding years is indicated in the table below:

	Stock Based Compensation Expense (In thousands)
Remainder of 2012	\$ 751

5. Earnings Per Share (“EPS”)

Basic EPS does not reflect the possibility of dilution that could result from the issuance of additional shares of common stock upon exercise or conversion of outstanding securities, and is computed by dividing net income available to common stockholders by the weighted average number of common shares outstanding for the period. Diluted EPS reflects the potential dilution that could occur if stock options or other contracts to issue common stock were exercised or converted to common stock that would then share in our earnings. For the three months ended September 30, 2012 and 2011, stock options and restricted shares awards for approximately 565 thousand shares and 381 thousand shares of common stock, respectively, were excluded in computing diluted earnings per common share because they were antidilutive. For the nine months ended September 30, 2012 and 2011, stock options and restricted shares awards for approximately 564 thousand and 376 thousand shares of common stock, respectively, were excluded in computing diluted earnings per common share because they were antidilutive. Additionally, warrants to purchase 337,000 shares of common stock (related to the TARP Capital Purchase Plan) were antidilutive and excluded for the three and nine months ended September 30, 2012. Warrants to purchase 521,000 shares of common stock (related to the TARP Capital Purchase Plan) were antidilutive and excluded for the three and nine months ended September 30, 2011.

The following table shows the computation of basic and diluted EPS for the three and six months ended September 30, 2012 and 2011.

	For the three months ended September 30, 2012			2011		
	Net income available to common stockholders (Numerator) (In thousands, except share and per share data)	Shares (Denominator)	Per Share (Amount)	Net income available to common stockholders (Numerator)	Shares (Denominator)	Per Share (Amount)
Net income as reported	\$18,398			\$9,815		
Less: preferred stock dividends and accretion of preferred stock discount	0			(1,077)		
Basic EPS - common stock	\$18,398	78,015,960	\$0.24	\$8,738	38,098,142	\$0.23
Effect of Dilutive Securities:

* Government Sponsored Enterprises (GSE) investments were issued by GNMA, FNMA and FHLMC and are all residential mortgage-backed investments.

As of September 30, 2012 and December 31, 2011, there were no holdings of securities of any one issuer, other than the U.S. Government and its agencies, in an amount greater than 10% of stockholders' equity.

The proceeds from sales of securities and the associated gains are listed below:

	For the three months ended September 30,		For the nine months ended September 30,	
	2012	2011	2012	2011
	(In thousands)			
Proceeds	\$26,563	\$0	\$28,446	\$0
Gross gains	132	0	948	0
Gross losses	0	0	0	0

The amortized cost and estimated fair value of debt securities at September 30, 2012, by contractual maturity, are shown below. Expected maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties. Securities not due at a single maturity date are shown separately.

Table of Contents

	Amortized Cost (In thousands)	Estimated Fair Value
Available for sale:		
Due within one year	\$0	\$0
Due after one year through five years	340	358

We evaluate securities for other-than-temporary-impairment ("OTTI") on at least a quarterly basis, and more frequently when economic or market concerns warrant such evaluation. Consideration is given to the financial condition and near-term prospects of the issuer, the length of time and the extent to which the fair value of the securities has been less than our cost for the securities, and our intention to sell, or whether it is more likely than not that we will be required to sell, a security in an unrealized loss position before recovery of its amortized cost basis. In analyzing an issuer's financial condition, we consider whether the securities are issued by the federal government or its agencies, whether downgrades by bond rating agencies have occurred, and the results of reviews of the issuer's financial condition.

The trust preferred security at September 30, 2012 has an amortized cost of \$4.5 million and an unrealized loss of \$1.0 million at September 30, 2012. The trust preferred security is scheduled to mature in May 2047, and had a first call date option in May 2012. Management determined this unrealized loss did not represent OTTI at September 30, 2012 as the investment is rated investment grade and there are no credit quality concerns with the obligor. The market value decline is deemed to be due to the current market volatility and is not reflective of management's expectations of our ability to fully recover this investment, which may be at maturity. Interest on the trust preferred security been paid as agreed and management believes this will continue in the future and the trust preferred security will be repaid in full as scheduled. For these reasons, no OTTI was recognized on the trust preferred security at September 30, 2012.

We consider the losses on our investments in unrealized loss positions at September 30, 2012 to be temporary based on: 1) the likelihood of recovery; 2) the information relative to the extent and duration of the decline in market value; and 3) the Company's intention not to sell, and our determination that it is more likely than not that we will not be required to sell a security in an unrealized loss position before recovery of its amortized cost basis.

Table of Contents

7. Loans Receivable and Allowance for Loan Losses

The following is a summary of loans receivable by major category:

	September 30, 2012	December 31, 2011
	(In thousands)	
Loan portfolio composition		
Real estate loans:		
Residential	\$3,354	\$2,043
Commercial & industrial	2,881,079	2,631,880
Construction	56,433	44,756
Total real estate loans	2,940,866	2,678,679
Commercial business	898,977	849,576
Trade finance	177,285	146,684
Consumer and other	54,442	66,631
Total loans outstanding	4,071,570	3,741,570
Less: deferred loan fees	(2,076) (2,744
Gross loans receivable	4,069,494	3,738,826
Less: allowance for loan losses	(65,952) (61,952
Loans receivable, net	\$4,003,542	\$3,676,874

Our loan portfolio is made up of four segments: real estate loans, commercial business, trade finance and consumer and other. These segments are further segregated between loans accounted for under the amortized cost method (referred to as "Legacy Loans") and acquired loans that were originally recorded at fair value with no carryover of the related pre-acquisition allowance for loan losses (referred to as "Acquired Loans"). The loans acquired from Center are further segregated between Credit Impaired Loans (loans with credit deterioration at the time of the Merger and accounted for under ASC 310-30) and Performing Loans (loans that were pass graded at the time of the Merger).

The following table presents changes in the accretable discount on the acquired Credit Impaired Loans in the merger for the three and nine months ended September 30, 2012:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2012	2011	2012	2011
	(In thousands)			
Balance at beginning of period	\$22,966	\$0	\$31,999	\$0
Accretion	(3,415) 0	(10,866) 0
Changes in expected cash flows	516	0	(1,066) 0
Balance at end of period	\$20,067	\$0	\$20,067	\$0

On the acquisition date, the amount by which the undiscounted expected cash flows exceed the estimated fair value of the acquired loans is the "accretable yield". The accretable yield is then measured at each financial reporting date and represents the difference between the remaining undiscounted expected cash flows and the current carrying value of the loans. The accretable yield will change from period to period due to the followings: 1) estimates of the remaining life of acquired loans will affect the amount of future interest income, 2) indicies for variable rates of interest on acquired loans may change; and 3) estimates of the amount of the contractual principal and interest that will not be collected (nonaccretable difference) may change.

Table of Contents

The activity in the allowance for loan losses by portfolio segment for the three and nine months ended September 30, 2012 is as follows:

As of September 30, 2012 and December 31, 2011, we had a liability for unfunded commitments of \$802 thousand and \$686 thousand, respectively. For the three months ended September 30, 2012 and 2011, we recognized provision for credit losses related to our unfunded commitments of \$0 and \$0. For the nine months ended September 30, 2012 and 2011, we recognized provision for credit losses related to our unfunded commitments of \$116 thousand and \$0.

Table of Contents

The recorded investment in individually impaired loans was as follows:

	September 30, 2012 (In thousands)	December 31, 2011
With Allocated Allowance		
Without charge-off	\$72,827	\$67,262
With charge-off	448	341
With No Allocated Allowance		
Without charge-off	5,111	19,064
With charge-off	3,933	6,390
Allowance on Impaired Loans	(8,704) (18,035
Impaired Loans, net of allowance	\$73,615	\$75,022

Table of Contents

The following tables detail impaired loans (Legacy and Acquired) as of September 30, 2012 and December 31, 2011 and for the three and nine months ended September 30, 2012 and for the year ended December 31, 2011. Loans with no related allowance for loan losses are believed by management to have adequate collateral securing their carrying value.

*Unpaid contractual principal balance less charge-offs, interest applied to principal and purchase discounts.

The table has been revised to present unpaid contractual principal balances, whereas the Company had previously

**disclosed unpaid contractual principal balances that were net of charge-offs, interest applied to principal and purchase discounts.

Table of Contents

Generally, loans are placed on nonaccrual status if principal or interest payments become 90 days past due and/or management deems the collectibility of the principal and/or interest to be in question, as well as when required by regulatory requirements. Loans to a customer whose financial condition has deteriorated are considered for non-accrual status whether or not the loan is 90 days or more past due. Generally, payments received on non-accrual loans are recorded as principal reductions. Loans are returned to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured. The following tables present the aging of past due loans as of September 30, 2012 and December 31, 2011 by class of loans:

	As of September 30, 2012						
	30-59 Days Past Due	60-89 Days Past Due	Greater than 90 Days Past Due	Total Past Due	Non-accrual loans	Total Delinquent loans	Greater than 90 days and accruing

(1) The acquired loans include Credit Impaired Loans (ASC 310-30 loans) and Performing Loans (loans that were pass graded at the time of the Merger).

We categorize loans into risk categories based on relevant information about the ability of borrowers to service their debt, including, but not limited to, current financial information, historical payment experience, credit documentation, public information, and current economic trends. We analyze loans individually by classifying the loans as to credit risk. This analysis includes all non-homogeneous loans. This analysis is performed at least on a quarterly basis. We use the following definitions for risk ratings:

Pass: Loans that meet a preponderance or more of the Company's underwriting criteria and evidence an acceptable level of risk.

Special Mention: Loans classified as special mention have a potential weakness that deserves management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or of the institution's credit position at some future date.

Substandard: Loans classified as substandard are inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses that

jeopardize the repayment of the debt. They are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected.

• **Doubtful/Loss:** Loans classified as doubtful have all the weaknesses inherent in those classified as substandard, with

Table of Contents

the added characteristic that the weaknesses make collection or repayment in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable.

Loans assigned a risk rating of Special Mention or worse are referred to as Criticized Loans and loans assigned a risk rating of Substandard or worse are referred to as Classified Loans. As of September 30, 2012 and December 31, 2011, Criticized Loans by class of loans were as follows:

	As of September 30, 2012

The adequacy of the allowance for loan losses is determined by management based upon an evaluation and review of the credit quality of the loan portfolio, consideration of historical loan loss experience, relevant internal and external factors that affect the collection of a loan, and other pertinent factors.

Table of Contents

The Migration Analysis is a formula methodology based on the Bank's actual historical net charge-off experience for each loan class (type) pool and risk grade. The migration analysis is centered on the Bank's internal credit risk rating system. Our internal loan review and external contracted credit review examinations are used to determine and validate loan risk grades. This credit review system takes into consideration factors such as: borrower's background and experience; historical and current financial condition; credit history and payment performance; economic conditions and their impact on various industries; type, fair value and volatility of the fair value of collateral; lien position; and the financial strength of any guarantors.

A general loan loss allowance is provided on loans not specifically identified as impaired ("non-impaired loans"). The Bank's general loan loss allowance has two components: quantitative and qualitative risk factors. The quantitative risk factors are based on a historical loss migration methodology. The loans are classified by class and risk grade and the historical loss migration is tracked for the various classes. Loss experience is quantified for the most recent 12 quarters and then weighted to place more significance to the most recent loss history. That loss experience is then applied to the stratified portfolio at each quarter end. For the Performing Loans acquired from Center, a general loan loss allowance is provided to the extent that there has been credit deterioration since the Merger.

The quantitative general loan loss allowance was \$20.7 million (\$20.3 million for legacy loans and \$0.4 million for acquired loans) at September 30, 2012, compared to \$20.4 million at December 31, 2011.

Additionally, in order to systematically quantify the credit risk impact of other trends and changes within the loan portfolio, the Bank utilizes qualitative adjustments to the Migration Analysis within established parameters. The parameters for making adjustments are established under a Credit Risk Matrix that provides seven possible scenarios for each of the factors below. The matrix allows for up to three positive (Major, Moderate, and Minor), three negative (Major, Moderate, and Minor), and one neutral credit risk scenarios within each factor for each loan type pool.

Generally, the factors are considered to have no significant impact (neutral) to our historical migration ratios.

However, if information exists to warrant adjustment to the Migration Analysis, changes are made in accordance with the established parameters supported by narrative and/or statistical analysis. The Credit Risk Matrix and the nine possible scenarios enable the Bank to qualitatively adjust the Loss Migration Ratio by as much as 50 basis points in either direction (positive or negative) for each loan type pool. This matrix considers the following nine factors, which are patterned after the guidelines provided under the FFIEC Interagency Policy Statement on the Allowance for Loan and Lease Losses:

- Changes in lending policies and procedures, including underwriting standards and collection, charge-off, and recovery practices.
- Changes in national and local economic and business conditions and developments, including the condition of various market segments.
- Changes in the nature and volume of the loan portfolio.
- Changes in the experience, ability and depth of lending management and staff.
- Changes in the trends of the volume and severity of past due loans, Classified Loans, non-accrual loans, troubled debt restructurings and other loan modifications.
- Changes in the quality of our loan review system and the degree of oversight by the Directors.
- Changes in the value of underlying collateral for collateral-dependent loans.
- The existence and effect of any concentrations of credit and changes in the level of such concentrations.
- The effect of external factors, such as competition and legal and regulatory requirements, on the level of estimated losses in our loan portfolio.

The qualitative loan loss allowance on the loan portfolio was \$34.1 million at September 30, 2012, compared to \$23.5 million at December 31, 2011.

We also establish specific loss allowances for loans where we have identified potential credit risk conditions or circumstances related to a specific individual credit. The specific allowance amounts are determined by a method prescribed by FASB ASC 310-10-35-22, Measurement of Impairment. The loans identified as impaired will be accounted for in accordance with one of the three acceptable valuation methods: 1) the present value of future cash flows discounted at the loan's effective interest rate; 2) the loan's observable market price; or 3) the fair value of the collateral, if the loan is collateral dependent. For the collateral dependent impaired loans, we obtain a new appraisal to

determine the amount of impairment as of the date that the loan became impaired. The appraisals are based on an “as is” valuation. To ensure that appraised values remain current, we either obtain updated appraisals every twelve months from a qualified independent appraiser or an internal re-valuation of the collateral is performed by qualified personnel. If the third party market data indicates that the value of our collateral property has declined since the most recent valuation date, we adjust the value of the property downward to reflect current market conditions. If the fair value of the collateral, less cost to sell, is less than the recorded amount of the loan, we then recognize

Table of Contents

impairment by creating or adjusting an existing valuation allowance with a corresponding charge to the provision for loan losses. If an impaired loan is expected to be collected through liquidation of the underlying collateral, the loan is deemed to be collateral dependent and the amount of impairment is charged off against the allowance for loan losses. The Bank considers a loan to be impaired when it is probable that not all amounts due (principal and interest) will be collectible in accordance with the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. The significance of payment delays and payment shortfalls is determined on a case-by-case basis by taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record and the amount of the shortfall in relation to the principal and interest owed.

For commercial business loans, real estate loans and certain consumer loans, we base the measurement of loan impairment on the present value of the expected future cash flows, discounted at the loan's effective interest rate or on the fair value of the loan's collateral, less estimated costs to sell, if the loan is collateral dependent. We evaluate most consumer loans for impairment on a collective basis because these loans generally have smaller balances and are homogeneous in the underwriting of terms and conditions and in the type of collateral.

For our Credit Impaired Loans, the allowance for loan losses is based upon expected cash flows for these loans. To the extent that a deterioration in borrower credit quality results in a decrease in expected cash flows subsequent to the acquisition of the loans, an allowance for loan losses would be established based on our estimate of future credit losses over the remaining life of the loans.

The following table presents loans by portfolio segment and impairment method at September 30, 2012 and December 31, 2011:

Under certain circumstances, we provide borrowers relief through loan modifications. These modifications are either temporary in nature (“temporary modifications”) or are more substantive. At September 30, 2012, total modified loans were \$45.1 million, compared to \$32.8 million at December 31, 2011. The temporary modifications generally consist of interest only payments for a three to six month period, whereby principal payments are deferred. At the end of the modification period, the remaining principal balance is re-amortized based on the original maturity date. Loans subject to temporary modifications are generally downgraded to Substandard or Special Mention. At the end of the modification period, the loan either 1) returns to the original contractual terms; 2) is further modified and accounted for as a troubled debt restructuring in accordance with ASC 310-10-35; or 3) is disposed of through foreclosure or liquidation.

Troubled Debt Restructurings (“TDRs”) of loans are defined by ASC 310-40, “Troubled Debt Restructurings by Creditors” and ASC 470-60, “Troubled Debt Restructurings by Debtors” and evaluated for impairment in accordance with ASC 310-10-35. The concessions may be granted in various forms, including reduction in the stated interest rate, reduction in the amount of principal amortization, forgiveness of a portion of a loan balance or accrued interest, or extension of the maturity date. In order to determine whether a borrower is experiencing financial difficulty, an evaluation is performed of the probability that the borrower will be in payment default on any of its debt in the foreseeable future without the modification. This evaluation is performed under our internal underwriting policy. A summary of TDRs on accrual and non-accrual by type of concession as of September 30, 2012 and December 31, 2011 is presented below:

As of September 30, 2012				TDR on non-accrual			TOTAL

TDRs on accrual status are comprised of loans that were accruing at the time of restructuring and for which the Bank anticipates full repayment of both principal and interest under the restructured terms. TDRs that are on non-accrual can be returned to accrual status after a period of sustained performance, generally determined to be six months of timely payments as modified. Sustained performance includes the periods prior to the modification if the prior performance met or exceeded the modified terms. TDRs on accrual status at September 30, 2012 were comprised of 9 commercial real estate loans totaling \$14.8 million and 27 commercial business loans totaling \$7.3 million. TDRs on accrual status at December 31, 2011 were comprised of 6 commercial real estate loans totaling \$13.3 million and 19 commercial business loans totaling \$5.5 million. We expect that the TDRs on accrual status as of September 30, 2012, which were all performing in accordance with their restructured terms, to continue to comply with the restructured terms because of the reduced principal or interest payments on these loans. TDRs that were restructured at market interest rates and had sustained performance as agreed under the modified loan terms may be reclassified as non-TDRs after each year end but are still monitored for potential impairment.

The following table presents loans by class modified as TDRs that occurred during the three and nine months ended September 30, 2012:

Other	0	0	0	0
Commercial Business	1	148	1	148
Subtotal	1	\$148	2	\$6,199
	5	\$1,126	7	\$8,222

A loan is considered to be in payment default once it is 30 days contractually past due under the modified terms. The specific reserves for the TDRs described above as of September 30, 2012 were \$113 thousand and the charge offs for the three and nine months ended September 30, 2012 were \$6 thousand and \$124 thousand, respectively.

We have allocated \$6.1 million and \$6.4 million of specific reserves to TDRs as of September 30, 2012 and December 31, 2011, respectively. As of September 30, 2012 and December 31, 2011, we did not have any outstanding commitments to extend additional funds to these borrowers.

Covered Loans

On April 16, 2010, the Department of Financial Institutions closed Innovative Bank, California, and appointed the FDIC as its receiver. On the same date, Center Bank assumed the banking operations of Innovative Bank from the FDIC under a purchase and assumption agreement and two related loss sharing agreements with the FDIC. Upon the merger between Nara Bancorp and Center Financial, the Company assumed the loss sharing agreements with the FDIC.

Covered nonperforming assets totaled \$2.3 million and \$3.6 million at September 30, 2012 and December 31, 2011, respectively. These covered nonperforming assets are subject to the loss sharing agreements with the FDIC. The covered nonperforming assets at September 30, 2012 and December 31, 2011 were as follows:

	September 30, 2012 (In thousands)	December 31, 2011
Covered loans on non-accrual status	\$476	\$0
Covered other real estate owned	1,821	3,575
Total covered nonperforming assets	\$2,297	\$3,575
Acquired covered loans	\$78,141	\$89,959

Loans accounted for under ASC 310-30 are generally considered accruing and performing loans and the accretible discount is accreted to interest income over the estimate life of the loan when cash flows are reasonably estimable. Accordingly, acquired impaired loans that are contractually past due are still considered to be accruing and performing

loans. The loans may be classified as nonaccrual if the timing and amount of future cash flows is not reasonably estimable.

Table of Contents

8. Borrowings

We maintain a secured credit facility with the Federal Home Loan Bank of San Francisco (“FHLB”) against which the Bank may take advances. The borrowing capacity is limited to the lower of 25% of the Bank’s total assets or the Bank’s collateral capacity, which was \$1.3 billion at September 30, 2012 and December 31, 2011. The terms of this credit facility require the Company to pledge eligible collateral with the FHLB equal to at least 100% of outstanding advances.

At September 30, 2012 and December 31, 2011, real estate secured loans with a carrying amount of approximately \$2.0 billion were pledged as collateral for borrowings from the FHLB. At September 30, 2012 and December 31, 2011, other than FHLB stock, securities totaling \$0 and \$3.0 million, respectively, were pledged as collateral for borrowings from the FHLB.

At September 30, 2012 and December 31, 2011, FHLB borrowings were \$460.8 million and \$344.4 million, had a weighted average interest rate of 1.33% and 1.93%, respectively, and had various maturities through September 2017. At September 30, 2012 and December 31, 2011, \$80.0 million and \$205.0 million, respectively, of the advances were puttable advances with various puttable dates and strike prices. The cost of FHLB borrowings as of September 30, 2012 ranged between 0.28% and 3.93%. At September 30, 2012, the Company had a remaining borrowing capacity of \$836.7 million.

At September 30, 2012, the contractual maturities for FHLB borrowings were as follows:

	Contractual Maturities (In thousands)	Maturity/ Put Date
Due within one year	\$194,000	\$245,815
Due after one year through five years	266,815	215,000
Due after five years through ten years	0	0
	\$460,815	\$460,815

In addition, as a member of the Federal Reserve Bank system, we may also borrow from the Federal Reserve Bank of San Francisco. The maximum amount that we may borrow from the Federal Reserve Bank’s discount window is up to 95% of the outstanding principal balance of the qualifying loans and the fair value of the securities that we pledge. At September 30, 2012, the principal balance of the qualifying loans was \$480.2 million and the collateral value of investment securities were \$0.6 million, and no borrowings were outstanding against this line.

9. Subordinated Debentures

At September 30, 2012, 4 wholly-owned subsidiary grantor trusts established by former Nara Bancorp had issued \$28 million of pooled Trust Preferred Securities (“trust preferred securities”) and 1 wholly-owned subsidiary grantor trust established by former Center Financial Corporation had issued \$18 million of trust preferred securities. Trust preferred securities accrue and pay distributions periodically at specified annual rates as provided in the indentures. The trusts used the net proceeds from the offering to purchase a like amount of subordinated debentures (the “Debentures”) of BBCN Bancorp. The Debentures are the sole assets of the trusts. BBCN Bancorp’s obligations under the subordinated debentures and related documents, taken together, constitute a full and unconditional guarantee by BBCN Bancorp of the obligations of the trusts. The trust preferred securities are mandatorily redeemable upon the maturity of the Debentures, or upon earlier redemption as provided in the indentures. BBCN Bancorp has the right to redeem the Debentures in whole (but not in part) on or after specific dates, at a redemption price specified in the indentures plus any accrued but unpaid interest to the redemption date. BBCN Bancorp also has a right to defer consecutive payments of interest on the debentures for up to five years.

Table of Contents

The following table is a summary of trust preferred securities and debentures at September 30, 2012:

Issuance Trust	Issuance Date	Trust Preferred Security Amount (Dollars in thousands)	Subordinated Debentures Amount	Rate Type	Initial Rate	Coupon Rate at September 30, 2012	Maturity Date
Nara Capital Trust III	6/5/2003	\$5,000	\$5,155	Variable	4.44	% 3.54	% 6/15/2033
Nara Statutory Trust IV	12/22/2003	5,000	5,155	Variable	4.02	% 3.31	% 1/7/2034
Nara Statutory Trust V	12/17/2003	10,000	10,310	Variable	4.12	% 3.34	% 12/17/2033
Nara Statutory Trust VI	3/22/2007	8,000	8,248	Variable	7.00	% 2.04	% 6/15/2037
Center Capital Trust I	12/30/2003	18,000	12,941	Variable	4.01	% 3.31	%* 1/7/2034
TOTAL ISSUANCE		\$46,000	\$41,809				

The Center Capital Trust I trust preferred security was assumed in the Merger. The remaining discount was \$5.6 million at September 30, 2012 and the effective rate of the security, including the effect of the discount accretion, was 6.03% at September 30, 2012.

The Company's investment in the common trust securities of the issuer trusts of \$1.4 million and \$2.0 million at September 30, 2012 and December 31, 2011, respectively, is included in other assets. Although the subordinated debt issued by the trusts are not included as a component of stockholders' equity in the consolidated balance sheets, the debt is treated as capital for regulatory purposes. The trust preferred security debt issuances are includable in Tier I capital up to a maximum of 25% of capital on an aggregate basis. Any amount that exceeds 25% qualifies as Tier 2 capital. At September 30, 2012, all of the \$46 million of the trusts' securities qualified as Tier 1 capital. In July 2010, the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act") was signed into law which, among other things, limits the ability of bank holding companies with total assets of more than \$15 billion to treat trust preferred security debt issuances as Tier 1 capital. Since the Company had less than \$15 billion in assets at September 30, 2012, we will be able to continue to include its existing trust preferred securities in Tier 1 capital under the Dodd-Frank Act.

10. Derivative Financial Instruments and Hedging Activities

As part of our asset and liability management strategy, the Company may enter into derivative financial instruments, such as interest rate swaps, caps and floors, with the overall goal of minimizing the impact of interest rate fluctuations on our net interest margin. Interest rate swaps and caps involve the exchange of fixed-rate and variable-rate interest payment obligations without the exchange of the underlying notional amounts.

During the first quarter of 2010, the Company entered into a three-year interest rate cap agreement with an aggregate notional amount of \$50.0 million. Under this cap agreement, the Company receives quarterly payments from the counterparty when the quarterly resetting 3 Month London-Interbank Offered Rate exceeds the strike level of 2.00%. The upfront fee paid to the counterparty in entering into this interest rate cap agreement was \$890 thousand.

These interest rate cap agreements are considered "free-standing" due to non-designation of a hedge relationship to any of its financial assets or liabilities. Under FASB ASC 815, valuation gains or losses on interest rate caps not designated as hedging instruments are recognized in earnings. At September 30, 2012, the aggregate fair value of the outstanding interest rate caps was \$0, and we recognized mark-to-market losses on valuation of \$0 and \$9 thousand for the three and nine months ended September 30, 2012.

At September 30, 2012 and December 31, 2011, summary information about these interest-rate caps is as follows:

Edgar Filing: BBCN BANCORP INC - Form 10-Q

	September 30, 2012	December 31, 2011
Notional amounts	\$50 million	\$50 million
Weighted average pay rates	N/A	N/A
Weighted average receive rates	N/A	N/A
Weighted average maturity	0.41 years	1.16 years
Fair value of combined interest rate caps	\$0	\$9 thousand

Table of Contents

The effect of derivative instruments on the Consolidated Statement of Income for the three and nine months ended September 30, 2012 and 2011 are as follows:

	Location of Gain or (Loss) Recognized in Income on Derivatives	Three Months Ended September 30, 2012		September 30, 2011		Nine Months Ended September 30, 2012		September 30, 2011	
		Amount of Gain or (Loss) Recognized in Income on Derivatives (In thousands)		Amount of Gain or (Loss) Recognized in Income on Derivatives (In thousands)		Amount of Gain or (Loss) Recognized in Income on Derivatives		Amount of Gain or (Loss) Recognized in Income on Derivatives	
Derivatives not designated as hedging instruments under FASB ASC 815:									
Interest rate contracts (1)	Other income	\$—		\$(14)	\$(9)	\$(153)

(1) Includes amounts representing the net interest payments as stated in the contractual agreements and the valuation gains or (losses) on interest rate contracts not designated as hedging instruments.

11. Income Taxes

The Company and its subsidiaries are subject to U.S. federal income tax as well as state income taxes. The Company had total unrecognized tax benefits of \$734 thousand at September 30, 2012 and \$569 thousand at December 31, 2011 that relate primarily to uncertainties related to California enterprise zone loan interest deductions.

We anticipate an increase of approximately \$220 thousand in the unrecognized tax benefit related to the California enterprise zone loan interest deduction within the next twelve months. The Company is subject to U.S. federal income taxes, California franchise taxes and various other state income and franchise taxes.

The statute of limitations related to the consolidated Federal income tax return is closed for all tax years up to and including 2008. The expiration of the statute of limitations related to the various state income and franchise tax returns varies by state. We were under examination by New York City for the 2007, 2008, and 2009 tax years. New York City tax authority recently closed the examination for the 2007, 2008 and 2009 tax years with an immaterial adjustment.

We recognize interest and penalties related to income tax matters in income tax expense. We had approximately \$58 thousand and \$77 thousand for interest and penalties accrued at September 30, 2012 and December 31, 2011, respectively.

Income tax expense is the total of the current year income tax due or refundable and the change in deferred tax assets and liabilities. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carry forwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion, or all, of the deferred tax asset will not be realized. In assessing the realization of deferred tax assets, management evaluates both positive and negative evidence, including the existence of any cumulative losses in the current year and the prior two years, the amount of taxes paid in available carry-back years, the forecasts of future income, applicable tax planning strategies, and assessments of current and future economic and business conditions. This analysis is updated quarterly and adjusted as necessary. Based on the analysis, the Company has determined that a valuation allowance for deferred tax assets was not required as of September 30, 2012.

12. Fair Value Measurements

FASB ASC 820, Fair Value Measurements and Disclosures, establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.

Level 2: Significant other observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect estimates of assumptions that market participants would use in pricing

Table of Contents

the asset or liability.

Securities Available for Sale

The fair values of securities available for sale are determined by obtaining quoted prices on nationally recognized securities exchanges (Level 1 inputs) or matrix pricing, which is a technique widely used in the industry to value debt securities without relying exclusively on quoted prices for the specific securities but rather by relying on the securities' relationship to other benchmark quoted securities (Level 2 inputs).

Impaired Loans

The fair values of impaired loans are generally measured for impairment using the practical expedients permitted by FASB ASC 310-10-35 including impaired loans measured at an observable market price (if available), or at the fair value of the loan's collateral (if the loan is collateral dependent). Fair value of the loan's collateral, when the loan is dependent on collateral, is determined by appraisals or independent valuation, less costs to sell and result in a Level 2.

Derivatives

The fair value of our derivative financial instruments, including interest rate swaps and caps, is based on derivative valuation models using market data inputs as of the valuation date that can generally be verified and do not typically involve significant management judgments. (Level 2 inputs).

Other Real Estate Owned

Other real estate owned is fair valued at the time the loan is foreclosed upon and the asset is transferred to other real estate owned. The value is based primarily on third party appraisals, less costs to sell and result in a Level 2 classification of the inputs for determining fair value. Other real estate owned is reviewed and evaluated on at least an annual basis for additional impairment and adjusted to lower of cost or market accordingly, based on the same factors identified above.

Loans held for sale

Loans held for sale are carried at the lower of cost or fair value, as determined by outstanding commitments from investors, or based on recent comparable sales (Level 2 inputs), if available, and if not available, are based on discounted cash flows using current market rates applied to the estimated life and credit risk (Level 3 inputs) or may be assessed based upon the fair value of the collateral which is obtained from recent real estate appraisals (Level 3 inputs). These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal process by the appraisers to adjust for differences between the comparable sales and income data available. Such adjustments are typically significant and result in Level 3 classification of the inputs for determining fair value.

Assets and liabilities measured at fair value on a recurring basis are summarized below:

	September 30, 2012	Fair Value Measurements at the End of the Reporting Period Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
(In thousands)				
Assets:				
Securities available for sale:				
GSE collateralized mortgage obligations	\$235,669	\$0	\$235,669	\$0
GSE mortgage-backed securities	427,589	0	427,589	0
Trust preferred security	3,537	0	3,537	0
Municipal bonds	5,139	0	5,139	0
Mutual funds	15,125	15,125	0	0

There were no transfers between Level 1, 2 and 3 during the period ended September 30, 2012.

Table of Contents

	December 31, 2011	Fair Value Measurements at the End of the Reporting Period Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
(In thousands)				
Assets:				
Securities available for sale:

Accrued interest payable	6,519	6,519	
Bank's liabilities on acceptances outstanding	10,515	10,515	

The methods and assumptions used to estimate fair value are described as follows.

Table of Contents

The carrying amount is the estimated fair value for cash and cash equivalents, savings and other interest bearing demand deposits, accrued interest receivable and payable, customer's and Bank's liabilities on acceptances, non-interest-bearing deposits, short-term debt, secured borrowings, and variable rate loans or deposits that reprice frequently and fully. For fixed rate loans or deposits and for variable rate loans or deposits with infrequent repricing or repricing limits, fair value is based on discounted cash flows using current market rates applied to the estimated life and credit risk. The allowance for loan losses is considered to be a reasonable estimate of discount for credit quality concerns. Fair value of SBA loans held for sale is based on market quotes. For fair value of non-SBA loans held for sale, see the measurement method discussed previously. Fair value of time deposits and debt is based on current rates for similar financing. It was not practicable to determine the fair value of Federal Reserve Bank stock or Federal Home Loan Bank stock due to restrictions placed on their transferability. The fair value of commitments to fund loans represents fees currently charged to enter into similar agreements with similar remaining maturities and is not presented herein. The fair value of these financial instruments is not material to the consolidated financial statements.

13. Stockholders' Equity and Regulatory Matters

The Company and the Bank are subject to various regulatory capital requirements administered by the federal and state banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Company's and the Bank's financial statements, such as restrictions on the growth, expansion or the payment of dividends or other capital distributions or management fees. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company and the Bank must meet specific capital guidelines that involve quantitative measures of their assets, liabilities and certain off-balance-sheet items as calculated under regulatory accounting practices. The capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors. Prompt corrective action provisions are not applicable to bank holding companies. Quantitative measures established by regulation to ensure capital adequacy require the Company and the Bank to maintain minimum ratios (set forth in the table below) of total and Tier I capital (as defined in the regulations) to risk-weighted assets (as defined) and of Tier I capital (as defined) to average assets (as defined). Management believes that, as of September 30, 2012 and December 31, 2011, the Company and the Bank met all capital adequacy requirements to which they are subject.

As of September 30, 2012 and December 31, 2011, the most recent regulatory notification categorized the Bank as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, the Bank must maintain minimum total risk-based, Tier I risk-based and Tier I leverage ratios as set forth in the table below. There are no conditions or events since the notification that management believes have changed the Bank's category.

On November 21, 2008, the Company received \$67 million from the U.S. Treasury through its TARP capital purchase plan and issued 67,000 shares of cumulative preferred stock, Series A. The preferred stock paid cumulative dividends at the rate of 5% per year for the first five years and 9% per year thereafter. The shares are callable by the Company at par after three years if the repurchase is made with proceeds of a new offering or placement of common equity or of certain preferred stock treated as Tier 1 capital under applicable Federal banking regulations.

In conjunction with the purchase of the Company's preferred stock, the U.S. Treasury received a warrant to purchase 1,042,531 shares of the Company's common stock at \$9.64 per share. The term of the warrant was ten years. On December 3, 2009, US Treasury approved the Company's request for an adjustment to the Company's warrant share position due to a qualified equity offering in November 2009. The adjusted number of warrant shares is 521,266, which is 50% of original number of warrant shares 1,042,531.

Upon the merger with Center Financial, the Company issued 55,000 shares of a new series of our preferred stock, designated as our Fixed Rate Cumulative Perpetual Preferred Stock, Series B, having substantially the same rights, preferences, privileges and voting powers as our Series A Preferred Stock in exchange for the shares of similar preferred stock issued by Center Financial under the Treasury Department's TARP Capital Purchase Program. The ten-year warrant to purchase Center Financial common stock that was issued in connection with Center Financial's sale of preferred stock to the Treasury Department was converted into a warrant to purchase BBCN Bancorp common

stock upon our merger with Center. Reflecting the merger exchange ratio of 0.7805, the warrant now entitles the holder of the warrant to purchase, in one or more exercises of the warrant, up to 337,480 shares of BBCN Bancorp common stock at a price of \$12.22 per share.

In June 2012, the Company redeemed \$67 million and \$55 million of the aforementioned Series A and Series B Preferred Stock, respectively.

On August 8, 2012, we purchased from the Treasury Department, the outstanding warrant dated November 21, 2008 relating to 521,266 shares of the Company's common stock, at a purchase price of \$2.2 million. We have not reached agreement with the Treasury Department regarding repurchase of the warrant for the purchase of 337,480 shares of of the Company's common stock that we issued in connection with our merger with Center Financial.

Table of Contents

The Company's and the Bank's actual capital amounts and ratios are presented in the table below:

Bank	\$670,855	18.1	% \$148,038	4.0	% \$185,048	5.0	%

Under federal banking law, dividends declared by the Bank in any calendar year may not, without the approval of the regulatory agency, exceed its net income for that year combined with its retained income from the preceding two years. However, the regulatory agency has previously issued a bulletin to all banks outlining guidelines limiting the circumstances under which banks may pay dividends even if the banks are otherwise statutorily authorized to pay dividends. The limitations impose a requirement or in some cases suggest that prior approval of the regulatory agency should be obtained before a dividend is paid if a bank is the subject of administrative action or if the payment could be viewed by the regulatory agency as unsafe or unusual.

Under California Financial Code Section 1133, a bank, or a majority-owned subsidiary of a bank may, with the prior approval of the commissioner, make a distribution to the shareholders of such bank in an amount not exceeding the greatest of: a) the retained earnings of the bank; (b) the net income of the bank for its last fiscal year; or (c) the net income of the bank for its current fiscal year.

Table of Contents

14. Subsequent Event

On October 22, 2012, the Company announced that it has signed a definitive agreement under which Pacific International Bancorp, a Seattle-based company, will merge with the Company. Pacific International has total assets of approximately \$200 million, and its primary subsidiary, Pacific International Bank, a Washington state-chartered bank, has four bank locations in the Seattle metropolitan area. Upon completion of the transaction, which is expected to close during first quarter 2013, the Company will have six branches in the Seattle area.

Under the terms of the merger agreement, the stock-for-stock transaction is valued at approximately \$8.2 million, valuing each outstanding share of Pacific International common stock at \$1.75. As part of the transaction, Pacific International's \$6.5 million in Series A Preferred Stock issued under the U.S. Treasury's TARP Capital Purchase Program will be retired.

The transaction is subject to regulatory approval, the approval of the shareholders of Pacific International, and other customary closing conditions.

(1) Annualized.

(2) Efficiency ratio is defined as non-interest expense divided by the sum of net interest income before provision for loan losses and non-interest income.

(3) Net interest margin is calculated by dividing annualized net interest income by average total interest-earning assets.

(4) The ratios required to meet the definition of a "well-capitalized" institution under certain banking regulations are 5% leverage capital, 6% tier I risk-based capital and 10% total risk-based capital.

(5) Calculations are based on average quarterly asset balances.

(6) Non-performing loans include non-accrual loans, loans past due 90 days or more and still accruing interest, and accruing restructured loans. Loans 90 days or more past due and still accruing consist of acquired loans that were originally recorded at fair value upon acquisitions. These loans are considered to be accruing as we can reasonably

estimate future cash flows on acquired loans and we expect to fully collect the carrying value of these loans.

(7) Non-performing assets include non-accrual loans, loans past due 90 days or more and still accruing interest, other real estate owned, and accruing restructured loans.

(8) Based on net income before effect of dividends and discount accretion on preferred stock.

(9) Excludes TARP preferred stock, net of discount, of \$0 and \$64.9 million and stock warrants of \$378 thousand and \$2.4 million at September 30, 2012 and 2011, respectively.

(10) Legacy loans are those loans accounted for under the amortized cost method and do not include loans acquired from Center Financial Corporation on November 30, 2011. This is a non-GAAP measure that we believe provides investors with information

Table of Contents

that is useful in understanding our financial performance and position. Allowance for loan losses to legacy loans is calculated by dividing the gross legacy loan balance by allowance for loan losses.

Average tangible equity is calculated by subtracting average goodwill and average other intangibles from average (11) stockholders' equity. This is a non-GAAP measure that we believe provides investors with information that is useful in understanding our financial performance and position.

	Three Months Ended September 30, 2012		Nine Months Ended September 30, 2011

Table of Contents

Results of Operations

Overview

Total assets increased \$165.4 million from \$5.17 billion at December 31, 2011 to \$5.33 billion at September 30, 2012. The increase in total assets was primarily due to a \$326.7 million increase in loans receivable, net of allowance for loan losses, from \$3.7 billion at December 31, 2011 to \$4.0 billion at September 30, 2012. This increase was partially offset by a \$70.5 million decrease in cash and cash equivalents from \$300.1 million at December 31, 2011 to \$229.6 million at September 30, 2012, a \$40.0 million decrease in term federal funds sold from \$40.0 million at December 31, 2011 to none at September 30, 2012 and a \$53.9 million decrease in securities available for sale from \$740.9 million at December 31, 2011 to 687.1 million at September 30, 2012. The increase in total assets was funded by a \$111.6 million increase in deposits from \$3.94 billion at December 31, 2011 to \$4.05 billion at September 30, 2012, a \$116.4 million increase in borrowings from the FHLB from \$344.4 million at December 31, 2011 to \$460.8 million at September 30, 2012 and net income available to common stockholders of \$56.1 million. The increases in deposits and net income available to common shareholders were partially offset by the \$122 million redemption of the Series A and Series B Perpetual Preferred Stock issued under the U.S. Treasury's TARP Capital Purchase Program in June 2012. The redemption covered the total combined preferred stock investment by the U.S. Treasury of \$67 million in the former Nara Bancorp, Inc. and \$55 million in the former Center Financial Corporation ("Center").

The net income available to common stockholders for the third quarter of 2012 was \$18.4 million, or \$0.24 per diluted common share, compared to the net income available to common stockholders of \$8.7 million, or \$0.23 per diluted common share, for the same period of 2011, an increase of \$9.7 million, or 111%. The net income available to common stockholders for the nine months ended September 30, 2012 was \$56.1 million, or \$0.72 per diluted common share, compared to the net income available to common stockholders of \$19.7 million, or \$0.52 per diluted common share, for the same period of 2011, an increase of \$36.4 million, or 185%. The merger with Center (the "Merger") impacts the comparability of the operating results for the third quarters of 2012 and 2011 and for the nine month periods ended September 30, 2012 and 2011 because the Merger closed in the fourth quarter of 2011 and resulted in significant increases in interest earning assets, interest bearing liabilities, employees and branch locations. In addition, the assets and liabilities of Center were recorded at fair value and certain acquisition premiums and discounts are being amortized or accreted into income or expense as adjustments to the yield/cost of the related asset or liability. The operating results for the three months ended September 30, 2012 and 2011 and the nine months ended September 30, 2012 and 2011 include the following pre-tax acquisition accounting adjustments and expenses related to the Merger.

	Three Months Ended September 30, 2012		Nine Months Ended September 30, 2012	
	2011		2011	
	(In thousands)			
Accretion of discount on Center loans ⁽¹⁾	\$6,105	\$0	\$23,445	\$0
Amortization of premiums on Center FHLB borrowings ⁽²⁾	307	0	2,442	0
Accretion of discount on Center subordinated debt ⁽³⁾	(37) 0	(108) 0
Amortization of premium on Center time deposits ⁽⁴⁾	650	0	2,712	0
Amortization of core deposit intangibles from Center ⁽⁵⁾	(253) 0	(796) 0
Accretion of discounts on other Center assets ⁽⁶⁾	158	0	272	0
Amortization of unfavorable lease liability ⁽⁷⁾	53	0	168	0
Merger and integration expense ⁽⁸⁾	(183) (574) (3,304) (1,466
Increase (decrease) to pre-tax income	\$6,800	\$(574) \$24,831	\$(1,466

⁽¹⁾ The fair value of the Center loans was estimated to be \$118.0 million below the principal amount of such loans on the Merger date. The accretible portion of the discounts on the loans is being accreted into interest income over the remaining lives of the acquired loans.

⁽²⁾ The fair value of the outstanding FHLB borrowings assumed from Center was estimated to be above the face amount of such debt. The premiums on FHLB borrowings are being amortized into interest expense over the remaining term of the debt.

(3) The fair value of the outstanding subordinated debt assumed from Center was estimated to be below the face amount of such debt. The discounts on the subordinated debt are being accreted into interest expense over the remaining term of the debt.

(4) The fair value of time deposits assumed from Center was estimated to be above the face amount of such deposits. The premiums on certificates of deposits are being amortized into interest expense over the remaining term of the deposits.

Table of Contents

(5) A core deposit intangible arises in an acquisition of a financial institution or a financial institution branch having a deposit base comprised of stable customer relationships. These customer relationships provide a future benefit to the acquiring institution due to their favorable interest rates in comparison to market rates for alternative funding sources with terms similar to the length of time the customer relationships are expected to be retained. The initial value assigned to a core deposit intangible represents the present value of this future economic benefit. The core deposit intangible asset recognized as part of the Merger is being amortized over its estimated useful life of approximately seven years utilizing an accelerated amortization method.

(6) Discounts on other assets primarily relate to servicing assets, investments in affordable housing partnerships and the fair value of the favorable operating leases.

(7) Unfavorable lease liability relates to the Center facility lease contracts which had rental rates that exceeded market rental rates on the Merger date.

(8) Direct costs related to the Center merger were expensed as incurred. During the three months ended September 30, 2012, we incurred \$183 thousand in merger and integration expenses, including \$33 thousand in salaries and benefits and \$150 thousand in professional fees. During the three months ended September 30, 2011, we incurred \$574 thousand in merger and integration expenses. During the nine months ended September 30, 2012, we incurred \$3.3 million in merger and integration expenses, including \$1.1 million in salaries and benefits and \$2.2 million in professional fees. During the nine months ended September 30, 2011, we incurred \$1.5 million in merger and integration expenses.

The annualized return on average assets, before the effect of dividends and discount accretion on preferred stock on average assets, was 1.42% for the third quarter of 2012 compared to 1.31% for the same period of 2011. The annualized return on average stockholders' equity, before the effect of dividends and discount accretion on preferred stock, was 10.11% for the third quarter of 2012 compared to 10.40% for the same period of 2011. The efficiency ratio was 43.66% for the third quarter of 2012 compared to 47.63% for the same period of 2011.

The annualized return on average assets, before the effect of dividends and discount accretion on preferred stock on average assets, was 1.60% for the nine months ended September 30, 2012 compared to 1.03% for the same period of 2011. The annualized return on average stockholders' equity, before the effect of dividends and discount accretion on preferred stock, was 10.47% for the nine months ended September 30, 2012 compared to 8.24% for the same period of 2011. The efficiency ratio was 43.38% for the nine months ended September 30, 2012 compared to 47.67% for the same period of 2011.

Net Interest Income and Net Interest Margin

Net Interest Income and Expense

A principal component of the Company's earnings is net interest income, which is the difference between the interest and fees earned on loans and investments and the interest paid on deposits and borrowed funds. Net interest income expressed as a percentage of average interest-earning assets is referred to as the net interest margin. The net interest spread is the yield on average interest-earning assets less the cost of average interest-bearing liabilities. Net interest income is affected by changes in the balances of interest-earning assets and interest-bearing liabilities and changes in the yields earned on interest-earning assets and the rates paid on interest-bearing liabilities.

Comparison of Three Months Ended September 30, 2012 with the Same Period of 2011

Net interest income before provision for loan losses was \$58.2 million for the third quarter of 2012, an increase of \$27.1 million, or 88%, compared to \$31.1 million for the same period of 2011. The increase was principally attributable to the higher level of interest earning assets and the improvement in the net interest margin following the merger. The net interest margin increased to 4.79% for the third quarter of 2012, compared to 4.29% for the same period of 2011. The increase was principally due to the effect of acquisition accounting adjustments.

Interest income for the third quarter of 2012 was \$65.5 million, an increase of \$26.5 million, or 68%, compared to \$38.9 million for the same period of 2011. The increase resulted from a \$28.2 million increase in interest income due to an increase in average interest-earning assets, which was partially offset by a \$1.7 million decrease in interest income due to a decrease in the yield on average interest-earnings assets.

Interest expense for the third quarter of 2012 was \$7.2 million, a decrease of \$0.7 million, or 8%, compared to interest expense of \$7.9 million for the same period of 2011. The decrease resulted from a \$3.6 million decrease in interest

expense due to a decrease in the rates paid on average interest-bearing liabilities, which was partially offset by a \$2.9 million increase in interest expense due to an increase in average interest-bearing liabilities.

Comparison of Nine Months Ended September 30, 2012 with the Same Period of 2011

Net interest income before provision for loan losses was \$178.6 million for the nine months ended September 30, 2012, an increase of \$89.3 million, or 100%, compared to \$89.3 million for the same period of 2011. The increase was principally due to the higher level of interest earning assets and the improvement in the net interest margin following the merger.

Interest income for the nine months ended September 30, 2012 was \$201.0 million, an increase of \$87.6 million, or 77%,

Table of Contents

compared to \$113.4 million for the same period of 2011. The increase resulted from a \$2.6 million increase in interest income due to an increase in the yield on average interest-earnings assets and a \$85.0 million increase in interest income due to an increase in average interest-earning assets.

Interest expense for the nine months ended September 30, 2012 was \$22.4 million, a decrease of \$1.7 million, or 7%, compared to interest expense of \$24.1 million for the same period of 2011. The decrease resulted from a \$10.1 million decrease in interest expense due to a decrease in the average rates paid on interest-bearing liabilities, which was partially offset by an \$8.4 million increase in interest expense due to an increase in average interest-bearing liabilities.

Net Interest Margin

The net interest margin for the third quarter of 2012 was 4.79%, an increase of 50 basis points from 4.29% for the same period of 2011. Net interest margin for the nine months ended September 30, 2012 was 4.97%, an increase of 77 basis points from 4.20% for the same period of 2011. The improvement in net interest margin was principally due to the effect of acquisition accounting adjustments, as summarized in the following table.

	Three Months Ended September 30,		Nine Months Ended September 30,		
	2012	2011	2012	2011	
Net interest margin, excluding the effect of acquisition accounting adjustments	4.14	% 4.29	% 4.29	% 4.20	%
Acquisition accounting adjustments ⁽¹⁾	0.65	0.00	0.68	0.00	
Reported net interest margin	4.79	% 4.29	% 4.97	% 4.20	%

⁽¹⁾ Acquisition accounting adjustments is calculated by subtracting net interest margin, excluding effect of acquisition accounting adjustments, from reported net interest margin.

Excluding the effect of acquisition accounting adjustments, the net interest margin for the third quarter of 2012 decreased 15 basis points to 4.14% compared to the net interest margin for the same period of 2011. The decrease was primarily due to continued pricing pressure on loan interest rates which was partially offset by decreases in the rates paid on deposits and borrowings. Excluding the effect of acquisition accounting adjustments, the interest margin for the nine months ended September 30, 2012 increased 9 basis points to 4.29% compared to the net interest margin for the same period of 2011. The increase was principally due to the decrease in the weighted average cost of deposits and borrowings.

The weighted average yield on loans decreased to 6.11% for the third quarter of 2012 from 6.16% for the third quarter of 2011. The weighted average yield on loans increased to 6.46% for the nine months ended September 30, 2012 from 6.14% for the same period of 2011. The change in the yield is largely attributable to the accretion of discounts on acquired loans, as summarized in the following table.

	Three Months Ended September 30,		Nine Months Ended September 30,		
	2012	2011	2012	2011	
The weighted average yield on loans, excluding the effect of acquisition accounting adjustments	5.39	% 6.16	% 5.53	% 6.14	%
Acquisition accounting adjustments ⁽¹⁾	0.72	0.00	0.93	0.00	
Reported weighted average yield on loans	6.11	% 6.16	% 6.46	% 6.14	%

⁽¹⁾ Acquisition accounting adjustments is calculated by subtracting the weighted average yield on loans, excluding effect of acquisition accounting adjustments, from reported weighted average yield on loans.

Excluding the accretion of discounts on acquired loans, the weighted average yield on loans for the third quarter of 2012 decreased 77 basis points to 5.39% compared to the weighted average yield on loans for the same period of

2011. Excluding the accretion of discounts on acquired loans, the weighted average yield on loans for the nine months ended September 30, 2012 decreased 61 basis points to 5.53% compared to the weighted average yield on loans for the same period of 2011. These decreases were primarily due to the lower yields on the acquired loan portfolio and, to a lesser extent, continued pricing pressures in the market place. At September 30, 2012, fixed rate loans accounted for 38% of the loan portfolio, compared to 44% at September 30, 2011, reflecting the Company's focus on variable rate business loans. The weighted average yield on the

50

Table of Contents

variable rate and fixed rate loan portfolios (excluding loan discount accretion) at September 30, 2012 was 4.57% and 5.97%, respectively, compared with 4.60% and 6.25% at September 30, 2011.

The weighted average yield on securities available for sale for the third quarter of 2012 was 2.23% compared to 3.16% for the same period of 2011. The weighted average yield on securities available for sale for the nine months ended September 30, 2012 was 2.47% compared to 3.10% for the same period of 2011. The decreases were primarily attributable to the replacement of maturing securities with lower yielding investments as market interest rates declined.

The weighted average cost of deposits for the third quarter of 2012 was 0.52%, a decrease of 36 basis points from 0.88% for the same period of 2011. The weighted average cost of deposits for the nine months ended September 30, 2012 was 0.54%, a decrease of 38 basis points from 0.92% for the same period of 2011. The amortization of premium on time deposits assumed in the Merger positively affected the weighted average cost of deposits, as summarized in the following table.

	Three Months Ended September 30, 2012		2011		Nine Months Ended September 30, 2012		2011	
	The weighted average cost of deposits, excluding effect of acquisition accounting adjustments	0.59	%	0.88	%	0.64	%	0.92
Acquisition accounting adjustments ⁽¹⁾	(0.07)	0.00		(0.10)	0.00	
Reported weighted average cost of deposits	0.52	%	0.88	%	0.54	%	0.92	%

⁽¹⁾ Acquisition accounting adjustments is calculated by subtracting the weighted average cost of deposits, excluding effect of acquisition accounting adjustments, from reported weighted average cost of deposits.

Excluding amortization of premium on time deposits assumed from merger, the weighted average cost of deposits was 0.59% for the third quarter of 2012, compared to 0.88% for the same period of 2011. Excluding amortization of premium on time deposits assumed from merger, the weighted average cost of deposits was 0.64% for the nine months ended September 30, 2012, compared to 0.92% for the same period of 2011. The decreases were due to reductions in the cost of interest-bearing demand deposits and an increase in the proportion of non-interest bearing demand deposits to total deposits. Non-interest bearing demand deposits accounted for 27% of total deposits at September 30, 2012, compared with 20% at September 30, 2011.

The weighted average cost of FHLB advances for the third quarter of 2012 was 1.56%, a decrease of 167 basis points from 3.23% for the same period of 2011. The weighted average cost of FHLB advances for the nine months ended September 30, 2012 was 1.79%, a decrease of 143 basis points from 3.22% for the same period of 2011. The decreases were attributable to decreases in FHLB advance rates and the amortization of premiums on FHLB borrowings assumed in the Merger, as summarized in the following table.

	Three Months Ended September 30, 2012		2011		Nine Months Ended September 30, 2012		2011	
	The weighted average cost on FHLB advances, excluding effect of acquisition accounting adjustments	1.87	%	3.23	%	2.72	%	3.22
Acquisition accounting adjustments	(0.31)	0.00		(0.93)	0.00	
Reported weighted average cost on FHLB advances	1.56	%	3.23	%	1.79	%	3.22	%

⁽¹⁾ Acquisition accounting adjustments is calculated by subtracting the weighted average cost on FHLB advances, excluding effect of acquisition accounting adjustments, from reported weighted average cost on FHLB advances.

Excluding amortization of premiums on FHLB borrowings assumed in the Merger, the weighted average cost of FHLB advances decreased to 1.87% for the third quarter of 2012 from 3.23% for the same period of 2011, reflecting

the addition of \$175.0 million in new FHLB borrowings at a rate of 0.54%, which was substantially lower than the weighted average rate of the rest of the borrowings. The weighted average original maturity of the new borrowings was 2.10 years. In addition, a total of \$85.0 million of FHLB borrowings, with weighted average rates of 1.64%, matured during the quarter.

Excluding amortization of premiums on FHLB borrowings assumed in the Merger, the weighted average cost of FHLB advances decreased to 2.72% for the nine months ended September 30, 2012 compared with 3.22% for the same period of

Table of Contents

2011. The decrease was attributed to decreases in FHLB advance rates.

Prepayment penalty income for the third quarter of 2012 and 2011 was \$119 thousand and \$175 thousand, respectively. Non-accrual interest income (reversed) recognized was (\$44) thousand and \$154 thousand for the third quarter of 2012 and 2011, respectively. Excluding the effects of both non-accrual loan interest income and prepayment penalty income, the net interest margin for third quarter 2012 and 2011 would have been as 4.78% and 4.24%, respectively.

Prepayment penalty income for the nine months ended September 30, 2012 and 2011 was \$433 thousand and \$438 thousand, respectively. Non-accrual interest income reversed was \$793 thousand and \$184 thousand for the nine months ended September 30, 2012 and 2011, respectively. Excluding the effects of both non-accrual loan interest income and prepayment penalty income, the net interest margin for the nine months ended September 30, 2012 and 2011 would have been as 4.98% and 4.18%, respectively.

The following table presents our condensed consolidated average balance sheet information, together with interest rates earned and paid on the various sources and uses of funds for the periods indicated:

Table of Contents

Changes in net interest income are a function of changes in interest rates and volumes of interest-earning assets and interest-bearing liabilities. The following table sets forth information regarding the changes in interest income and interest expense for the periods indicated. The total change for each category of interest-earning assets and interest-bearing liabilities is segmented into the change attributable to variations in volume (changes in volume multiplied by the old rate) and the change attributable to variations in interest rates (changes in rates multiplied by the old volume). Nonaccrual loans are included in average loans used to compute this table.

Provision for Loan Losses

The provision for loan losses reflects our judgment of the current period cost associated with credit risk inherent in our loan portfolio. The loan loss provision for each period is dependent upon many factors, including loan growth, net charge-offs, changes in the composition of the loan portfolio, delinquencies, assessments by management, third parties' and regulators' examination of the loan portfolio, the value of the underlying collateral for problem loans and the general economic conditions

55

Table of Contents

in our market areas. Specifically, the provision for loan losses represents the amount charged against current period earnings to achieve an allowance for loan losses that, in our judgment, is adequate to absorb probable incurred losses inherent in our loan portfolio. Periodic fluctuations in the provision for loan losses result from management's assessment of the adequacy of the allowance for loan losses; however, actual loan losses may vary in material respects from current estimates. If the allowance for loan losses is inadequate, it may have a material adverse effect on our financial condition.

The provision for loan losses for the third quarter of 2012 was \$6.9 million, an increase of \$3.4 million, or 98%, from \$3.5 million for the same period last year. The increase is primarily due to higher net charge-offs, strong loan growth and allowance needs related to increased concentration risk associated with the growth in the CRE portfolio. Net charge-offs increased to \$6.5 million for the three months ended September 30, 2012, compared to \$3.2 million for the same period last year.

The provision for loan losses for the nine months ended September 30, 2012 was \$16.7 million, a decrease of \$2.1 million, or 11%, from \$18.8 million for the same period last year. The decrease primarily due to improvement in the credit quality of the loan portfolio. Net charge-offs decreased to \$12.7 million for the nine months ended September 30, 2012, compared to \$21.1 million for the same period of 2011.

See Note 7 of the Notes to Condensed Consolidated Financial Statements (unaudited) and Financial Condition-Loans Receivable and Allowance for Loan Losses for further discussion.

Non-interest Income

Non-interest income is primarily comprised of service fees on deposit accounts, fees received on trade finance letters of credit and net gains on sales of loans and securities available for sale.

Non-interest income for the third quarter of 2012 was \$7.7 million, compared to \$4.3 million for the same quarter of 2011, an increase of \$3.4 million, or 80%. The increase was principally due to the Merger, which was partially offset by a \$0.8 million reduction in net gains on sale of SBA loans from \$0.8 million for the third quarter of 2011 to none for the third quarter of 2012.

Non-interest income for the nine months ended September 30, 2012 was \$29.5 million, compared to \$16.5 million for the same period of 2011, an increase of \$13.1 million, or 79%. The increase was principally due to the Merger. The \$0.9 million increase in net gains on sales and calls of securities available for sale for the nine months ended September 30, 2012 as compared to the same period of 2011 was primarily due to an \$816 thousand gain on the sale of a Trust Preferred security, which had been marked to market in a prior period.

Non-interest income by category is summarized below:

	Three Months Ended September 30,		Increase (Decrease)		
	2012	2011	Amount	Percent (%)	
	(Dollars in thousands)

Non-interest Expense

Non-interest expense for the third quarter of 2012 was \$28.8 million, an increase of \$12.0 million, or 71%, from \$16.8 million for the same period of 2011. The increase was principally due to the Merger. Salaries and benefits expense increased \$6.0 million, or 78%, to \$13.6 million for the third quarter of 2012, from \$7.7 million for the same period of 2011. The increase was due to an increase in the number of full-time equivalent (FTE) employees, which increased to 684 at September 30, 2012 from 377 at September 30, 2011. The FTE employees as of September 30, 2011 on a pro forma basis was 696. Occupancy expense for the third quarter of 2012 rose 58% to \$3.9 million from \$2.5 million for the same period of 2011, principally due to the increased number branches post-merger. Credit related expenses for the third quarter of 2012 were \$2.5 million, an increase of \$1.6 million, or 188%, from \$0.9 million for the same period of 2011. The increase was primarily due to OREO valuation allowances of \$1.2 million and an increase in the number of OREO properties post-merger. The FDIC assessment for the third quarter of 2012 amounted to \$644 thousand, compared with \$983 thousand for the same period of 2011. This decrease reflects an upgrade of the Company's risk category.

Non-interest expense for the nine months ended September 30, 2012 was \$90.3 million, an increase of \$39.9 million, or 79%, from \$50.4 million for the same period of 2011. The increase was principally due to the Merger. Salaries and benefits expense increased \$19.9 million, or 89%, to \$42.3 million for the the nine months ended September 30, 2012, compared to \$22.4 million for the same period of 2011. The increase was due to an increase in the FTE employees post-merger.

Provision for Income Taxes

Income tax expense was \$11.8 million and \$5.2 million for the third quarter ended September 30, 2012 and 2011, respectively. The effective income tax rate for the quarters ended September 30, 2012 and 2011 was 39.1% and 34.6%, respectively. Income tax expense was \$39.5 million and \$13.7 million for the nine months ended September 30, 2012 and 2011, respectively. The effective income tax rate for the nine months ended September 30, 2012 and 2011 was 39.0% and 37.4%.

Financial Condition

At September 30, 2012, our total assets were \$5.33 billion, an increase of \$165.4 million from \$5.17 billion at December 31, 2011. As previously discussed, the increase was principally due to a \$326.7 million increase in loans receivable, net of allowance for loan losses, which was partially offset by decreases in cash and cash equivalents, term federal funds sold and securities available for sale of \$70.5 million, \$40.0 million and \$53.9 million, respectively. The increase in total assets was funded by a \$111.6 million increase in deposits, a \$116.4 million increase in borrowings from the FHLB and net income available to common stockholders of \$56.1 million. The increases in deposits and net

income available to common shareholders were partially offset by the \$122 million redemption of the Series A and Series B Perpetual Preferred Stock issued under the U.S. Treasury's TARP Capital Purchase Program in June 2012

Table of Contents

Investment Securities Portfolio

As of September 30, 2012, we had \$687.1 million in available-for-sale securities, compared to \$740.9 million at December 31, 2011. The net unrealized gain on the available-for-sale securities at September 30, 2012 was \$18.0 million, compared to a net unrealized gain on such securities of \$15.2 million at December 31, 2011. During the nine months ended September 30, 2012, \$111.7 million in securities were purchased, \$134.7 million in mortgage related securities were paid down, \$1.1 million in securities were either called or matured, and \$27.5 million in securities were sold. We recognized net gains of \$949 thousand on the securities that were sold. No securities were sold during the same period of last year. The weighted average duration (the weighted average of the times of the present values of all the cash flows) of the available-for-sale securities was 3.23 years and 3.54 years at September 30, 2012 and December 31, 2011, respectively. The weighted average life (the weighted average of the times of the principal repayments) of the available-for-sale securities was 3.47 years and 3.91 years at September 30, 2012 and December 31, 2011, respectively.

Loan Portfolio

As of September 30, 2012, gross loans outstanding, net of deferred loan fees and costs and excluding loans held for sale, was \$4.07 billion, an increase of \$330.7 million from \$3.74 billion at December 31, 2011. Total loan originations during the nine months ended September 30, 2012 were \$721.8 million, including SBA loan originations of \$165.4 million, compared to \$319.6 million during the same period of 2011.

The following table summarizes our loan portfolio by amount and percentage of gross loans in each major loan category at the dates indicated:

	September 30, 2012		December 31, 2011		
	Amount	Percent	Amount	Percent	
	(Dollars in thousands)				
Loan portfolio composition					
Real estate loans:					
Residential	\$3,354	0	% \$2,043	0	%
Commercial & industrial	2,881,079	71	% 2,631,880	70	%
Construction	56,433	1	% 44,756	1	%
Total real estate loans	2,940,866	72	% 2,678,679	73	%
Commercial business	898,977	22	% 849,576	23	%
Trade finance	177,285	4	% 146,684	4	%
Consumer and other	54,442	1	% 66,631	2	%
Total loans outstanding	4,071,570	100	% 3,741,570	100	%
Less: deferred loan fees	(2,076))	(2,744))	
Gross loans receivable	4,069,494		3,738,826		
Less: allowance for loan losses	(65,952))	(61,952))	
Loans receivable, net	\$4,003,542		\$3,676,874		

SBA loans, consisting principally of the unguaranteed portion, are included in commercial business loans and commercial and industrial real estate loans. SBA loans included in commercial business loans were \$84.3 million at September 30, 2012 and \$81.6 million at December 31, 2011. SBA loans included in commercial and industrial real estate loans were \$148.7 million at September 30, 2012 and \$152.5 million at December 31, 2011.

We normally do not extend lines of credit or make loan commitments to business customers for periods in excess of one year. We use the same credit policies in making commitments and conditional obligations as we do for providing loan facilities to our customers. We perform annual reviews of such commitments prior to renewal.

Table of Contents

The following table shows our loan commitments and letters of credit outstanding at the dates indicated:

	September 30, 2012	December 31, 2011
	(In thousands)	
Loan commitments	\$571,150	\$458,096
Standby letters of credit	37,599	29,028
Other commercial letters of credit	53,932	49,457
	\$662,681	\$536,581

Nonperforming Assets

Nonperforming assets, which include non-accrual loans, loans past due 90 days or more and accruing, restructured loans, and other real estate owned, were \$78.1 million at September 30, 2012, compared to \$74.9 million at December 31, 2011. The ratio of nonperforming assets to gross loans plus OREO was 1.92% and 2.00% at September 30, 2012 and December 31, 2011, respectively.

The following table summarizes the composition of our nonperforming assets as of the dates indicated.

	September 30, 2012	December 31, 2011		
	(Dollars in thousands)			
Nonaccrual loans	\$29,369	\$31,213		
Delinquent loans 90 days or more on accrual status	22,454	17,265		
Accruing restructured loans	22,175	18,776		
Total Nonperforming Loans	73,998	67,254		
Other real estate owned	4,135	7,625		
Total Nonperforming Assets	\$78,133	\$74,879		
Nonperforming loans to total gross loans, excluding loans held for sale	1.82	% 1.80		%
Nonperforming assets to gross loans plus OREO	1.92	% 2.00		%
Nonperforming assets to total assets	1.47	% 1.45		%
Allowance for loan losses to non-performing loans (excludes delinquent loans 90 days or more on accrual status)	127.95	% 123.93		%
Allowance for loan losses to non-performing assets	84.41	% 82.74		%

Allowance for Loan Losses

The allowance for loan losses was \$66.0 million at September 30, 2012, compared to \$62.0 million at December 31, 2011. We recorded a provision for loan losses of \$16.7 million during the nine months ended September 30, 2012, compared to \$18.8 million for the same period of 2011. The allowance for loan losses was 1.62% of gross loans at September 30, 2012 and 1.66% of gross loans at December 31, 2011. Impaired loans as defined by FASB ASC 310-10-35, "Accounting by Creditors for Impairment of a Loan," totaled \$82.3 million and \$82.0 million as of September 30, 2012 and December 31, 2011, respectively, with specific allowances of \$8.7 million and \$18.0 million, respectively.

Table of Contents

The following table reflects our allocation of the allowance for loan and lease losses ("ALLL") by loan type and the ratio of each loan category to total loans as of the dates indicated:

Loan Type	Allocation of Allowance for Loan Losses				
	September 30, 2012		December 31, 2011		
	Amount of allowance for loan losses	Percent of loans to total loans	Amount of allowance for loan losses	Percent of loans to total loans	
	(Dollars in thousands)				
Real estate - Residential	\$32	0	% \$9	0	%
Real estate - Commercial	43,828	71	% 38,307	70	%
Real estate - Construction	808	1	% 724	1	%
Commercial business	17,647	22	% 20,681	23	%
Trade finance	2,852	5	% 1,786	4	%
Consumer and other	785	1	% 445	2	%
Total	\$65,952	100	% \$61,952	100	%

For a better understanding of the changes in the ALLL, the loan portfolio has been segmented for disclosures purposes between loans, which are accounted for under the amortized cost method (referred to as "Legacy Loans") and loans acquired from Center (referred to as "Acquired Loans"). The Acquired Loans were further segregated between Credit Impaired Loans (loans with credit deterioration at the time of the Merger and accounted for under ASC 310-30) and performing loans (loans that were pass graded at the time of the Merger). The activity in the ALLL for the three and nine months ended September 30, 2012 is as follows:

For three months	Legacy Loans ⁽¹⁾	Acquired Loans ⁽²⁾		Total	
		Credit Impaired Loans	Performing Loans		
	(Dollars in thousands)				
Balance, beginning of period	\$62,396	\$1,914	\$1,195	\$65,505	
Provision for loan losses	5,574	198	1,128	6,900	
Loans charged off	(7,408)	0	(361)	(7,769)	
Recoveries of charged offs	1,272	0	44	1,316	
Balance, end of period	\$61,834	\$2,112	\$2,006	\$65,952	
Gross loans, net of deferred loan fees and costs	\$3,098,496	155,712	817,362	\$4,071,570	
Loss coverage ratio	2.00	% 1.36	% 0.25	% 1.62	%

Table of Contents

For nine months	Legacy Loans ⁽¹⁾	Acquired Loans ⁽²⁾		Total
		Credit Impaired Loans	Performing Loans	
	(Dollars in thousands)			
Balance, beginning of period	\$61,952	\$0	\$0	\$61,952
Provision for loan losses	11,558	2,112	3,012	16,682
Loans charged off	(15,051)	0	(1,710)	(16,761)
Recoveries of charged offs	3,375	0	704	4,079
Balance, end of period	\$61,834	\$2,112	\$2,006	\$65,952

⁽¹⁾ Legacy Loans includes acquired loans that have been renewed or refinanced after the merger.

⁽²⁾ Acquired loans were marked to fair value at the acquisition date, and provisions for loan losses reflect credit deterioration since the acquisition date.

Table of Contents

The following table shows the provisions made for loan losses, the amount of loans charged off and the recoveries on loans previously charged off, together with the balance in the allowance for loan losses at the beginning and end of each period, the amount of average and gross loans outstanding, and certain other ratios as of the dates and for the periods indicated:

	At or for the Nine Months Ended September 30,		
	2012	2011	
	(Dollars in thousands)		
LOANS			
Average gross loans receivable, including loans held for sale (net of deferred fees)	\$3,878,080	\$2,202,535	
Total gross loans receivables, excluding loans held for sale (net of deferred fees)	\$4,069,494	\$2,257,667	
ALLOWANCE:			
Balance-beginning of period	\$61,952	\$62,320	
Less: Loan charge-offs:			
Residential real estate	0	0	
Commercial & industrial real estate	(6,506) (14,938)
Construction	0	(3,254)
Commercial business loans	(9,225) (6,023)
Trade finance	(300) 0	
Consumer and other loans	(729) (256)
Total loans charged off	(16,760) (24,471)
Plus: Loan recoveries			
Commercial & industrial real estate	2,404	1,200	
Commercial business loans	1,287	1,937	
Trade Finance	60	0	
Consumer and other loans	327	231	
Total loans recoveries	4,078	3,368	
Net loan charge-offs	(12,682) (21,103)
Provision for loan losses	16,682	18,792	
Balance-end of period	\$65,952	\$60,009	
Net loan charge-offs to average gross loans, including loans held for sale (net of deferred fees) *	0.44	% 1.28	%
Allowance for loan losses to gross loans at end of period	1.62	% 2.66	%
Net loan charge-offs to beginning allowance *	27.29	% 45.15	%
Net loan charge-offs to provision for loan losses	76.02	% 112.30	%

* Annualized

We believe the allowance for loan losses as of September 30, 2012 is adequate to absorb probable incurred losses in the loan portfolio. However, no assurance can be given that actual losses will not exceed the estimated amounts.

Deposits and Other Borrowings

Deposits. Deposits are our primary source of funds used in our lending and investment activities. At September 30, 2012, deposits increased \$111.6 million, or 3%, to \$4.05 billion from \$3.94 billion at December 31, 2011. Retail deposits totaled \$3.49 billion at September 30, 2012, a decrease of \$67 million from \$3.56 billion at December 31, 2011. Interest-bearing demand deposits, including money market and Super Now accounts, totaled \$1.33 billion at September 30, 2012, a decrease of \$104 million from \$1.44 billion at December 31, 2011. The decrease reflected the deposit mix shift to non-interest bearing deposits, which increased to \$1.11 billion at September 30, 2012, from \$984 million at December 31, 2011.

At September 30, 2012, 27.2% of total deposits were non-interest bearing demand deposits, 39.9% were time deposits and 32.9% were interest bearing demand and savings deposits. By comparison, at December 31, 2011, 25.0% of total

deposits were non-interest bearing demand deposits, 38.6% were time deposits, and 36.4% were interest bearing demand and saving deposits.

At September 30, 2012, we had \$259.2 million in wholesale deposits and \$300.0 million in California State Treasurer

Table of Contents

deposits, compared to \$80.7 million and \$300.0 million of such deposits at December 31, 2011, respectively. The California State Treasurer deposits had three-month maturities with a weighted average interest rate of 0.13% at September 30, 2012 and were collateralized with securities with a carrying value of \$348.4 million. The weighted average interest rate for wholesale deposits was 0.34% at September 30, 2012.

The following is a schedule of CD maturities as of September 30, 2012:

Maturity Schedule of Time Deposits

(Dollars in thousands)

Quarter Ending	Balance	Weighted Average Interest Rate	
December 31, 2012	\$751,628	0.57	%
March 31, 2013	329,130	1.04	%
June 30, 2013	222,070	0.97	%
September 30, 2013	213,164	0.90	%
Total one year or less	1,515,992	0.78	%
Over one year	100,358	1.23	%
Total time deposits	\$1,616,350	0.80	%

Other Borrowings. Advances may be obtained from the FHLB as an alternative source of funds. Advances from the FHLB are typically secured by a pledge of commercial real estate loans and/or securities with a market value at least equal to the outstanding advances plus our investment in FHLB stock.

At September 30, 2012, we had \$460.8 million of FHLB advances with average remaining maturities of 2.0 years, compared to \$344.4 million with average remaining maturities of 1.3 years at December 31, 2011. The weighted average rate, including the acquisition accounting adjustments was 1.33% and 1.93% at September 30, 2012 and at December 31, 2011, respectively.

During the second quarter of 2012, we retired a \$10.0 million Trust Preferred Security (Nara Bancorp Capital Trust I), bearing a 10.18% interest rate. At September 30, 2012, five wholly-owned subsidiary grantor trusts ("Trusts") established by us had issued \$46 million of pooled trust preferred securities ("Trust Preferred Securities"). The Trust Preferred Securities accrue and pay distributions periodically at specified annual rates as provided in the related indentures for the securities. The Trusts used the net proceeds from their respective offerings to purchase a like amount of subordinated debentures (the "Debentures") issued by us. The Debentures are the sole assets of the trusts. Our obligations under the Debentures and related documents, taken together, constitute a full and unconditional guarantee by us of the obligations of the trusts. The Trust Preferred Securities are mandatorily redeemable upon the maturity of the Debentures, or upon earlier redemption as provided in the indentures. We have the right to redeem the Debentures in whole (but not in part) on or after specific dates, at redemption prices specified in the indentures plus any accrued but unpaid interest to the redemption date.

Off-Balance-Sheet Activities and Contractual Obligations

We routinely engage in activities that involve, to varying degrees, elements of risk that are not reflected, in whole or in part, in the consolidated financial statements. These activities are part of our normal course of business and include traditional off-balance-sheet credit-related financial instruments, interest rate swap contracts, operating leases and long-term debt.

Traditional off-balance-sheet credit-related financial instruments are primarily commitments to extend credit and standby letters of credit. These activities could require us to make cash payments to third parties if certain specified future events occur. The contractual amounts represent the extent of our exposure in these off-balance-sheet activities. However, since certain off-balance-sheet commitments, particularly standby letters of credit, are expected to expire or be only partially used, the total amount of commitments does not necessarily represent future cash requirements.

These activities are necessary to meet the financing needs of our customers.

We enter into interest rate swap contracts under which we are required to either receive cash from or pay cash to counterparties depending on changes in interest rates. We also purchase interest rate caps to protect against increases

in market interest rates. We utilize interest rate swap contracts and interest rate caps to help manage the risk of changing interest rates.

We do not anticipate that our current off-balance-sheet activities will have a material impact on our future results of operations or our financial condition. Further information regarding our financial instruments with off-balance-sheet risk can be found in Item 3 “Quantitative and Qualitative Disclosures about Market Risk”.

Table of Contents

Our leased banking facilities and equipment are leased under non-cancelable operating leases under which we must make monthly payments over periods up to 20 years.

Stockholders' Equity and Regulatory Capital

Historically, our primary source of capital has been the retention of earnings, net of dividend payments to shareholders. We seek to maintain capital at a level sufficient to assure our stockholders, our customers, and our regulators that our company and our bank subsidiary are financially sound. For this purpose, we perform ongoing assessments of our components of capital as well as projected sources and uses of capital in conjunction with projected increases in assets and levels of risks.

Total stockholders' equity was \$734.5 million at September 30, 2012 compared to \$795.9 million at December 31, 2011. The decrease was primarily due to the redemption of \$122 million of Series A and Series B Preferred Stock issued under the U.S. Treasury's TARP Capital Purchase Program in June 2012, which was partially offset by the net income to common stockholders of \$56.1 million for the nine months ended September 30, 2012. Our ratio of tangible common equity to tangible assets was 12.23% at September 30, 2012, compared to 11.42% at December 31, 2011. The increase was attributable to the increase in common stockholders' equity.

The federal banking agencies require a minimum ratio of qualifying total capital to risk-weighted assets of 8% and a minimum ratio of Tier I capital to risk-weighted assets of 4%. In addition to the risk-based guidelines, federal banking regulators require banking organizations to maintain a minimum amount of Tier I capital to average total assets, referred to as the leverage ratio. Capital requirements apply to the Company and the Bank separately. In addition to these uniform risk-based capital guidelines and leverage ratios that apply across the industry, the regulators have the discretion to set individual minimum capital requirements for specific institutions at rates significantly above the minimum guidelines and ratios.

At September 30, 2012, our Tier I capital, defined as stockholders' equity less intangible assets, plus proceeds from the trust preferred securities (subject to limitations), was \$668.7 million, compared to \$733.3 million at December 31, 2011, representing an increase of \$64.6 million, or 9%. The decrease was primarily due to the redemption of \$122 million of Series A and Series B Preferred Stock issued under the U.S. Treasury's TARP Capital Purchase Program in June 2012. At September 30, 2012, the total capital to risk-weighted assets ratio was 16.48% and the Tier I capital to risk-weighted assets ratio was 15.22%. The Tier I leverage capital ratio was 13.15%.

As of September 30, 2012 and December 31, 2011, the most recent regulatory notification categorized the Bank as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, the Bank must maintain minimum total risk-based, Tier I risk-based and Tier I leverage capital ratios as set forth in the table below.

	As of September 30, 2012 (Dollars in thousands)						
	Actual Amount	Ratio		To Be Well-Capitalized Amount	Ratio	Excess Amount	Ratio
BBCN Bancorp, Inc

Table of Contents

Liquidity Management

Liquidity risk is the risk of reduction in our earnings or capital that would result if we were not able to meet our obligations when they come due without incurring unacceptable losses. Liquidity risk includes the risk of unplanned decreases or changes in funding sources and changes in market conditions that affect our ability to liquidate assets quickly and with minimum loss of value. Factors considered in liquidity risk management are the stability of the deposit base; the marketability, maturity, and pledging of our investments; the availability of alternative sources of funds; and our demand for credit. The objective of our liquidity management is to have funds available to meet cash flow requirements arising from fluctuations in deposit levels and the demands of daily operations, which include funding of securities purchases, providing for customers' credit needs, and ongoing repayment of borrowings. Our primary sources of liquidity are derived from financing activities, which include customer and broker deposits, federal funds facilities, and borrowings from the Federal Home Loan Bank of San Francisco and the Federal Reserve Bank Discount Window. These funding sources are augmented by payments of principal and interest on loans and securities, proceeds from sale of loans and the liquidation or sale of securities from our available for sale portfolio. Primary uses of funds include withdrawal of and interest payments on deposits, originations of loans, purchases of investment securities, and payment of operating expenses.

At September 30, 2012, our total borrowing capacity from the Federal Home Loan Bank of San Francisco was \$1.3 billion, of which \$837 million was unused and available to borrow. At September 30, 2012, our total borrowing capacity from the Federal Reserve Bank was \$378 million, of which \$378 million was unused and available to borrow. In addition to these lines, our liquid assets, consisting of cash and cash equivalent, interest-bearing cash deposits with other banks, overnight federal funds sold to other banks, liquid investment securities available for sale, and loan repayments within 30 days, were \$634.5 million at September 30, 2012 compared to \$689.8 million at December 31, 2011. Cash and cash equivalents, including federal funds sold were \$229.6 million at September 30, 2012 compared to \$300.1 million at December 31, 2011. We believe our liquidity sources to be stable and adequate to meet our day-to-day cash flow requirements.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The objective of our asset and liability management activities is to improve our earnings by adjusting the type and mix of assets and liabilities to effectively address changing conditions and risks. Through overall management of our balance sheet and by controlling various risks, we seek to optimize our financial returns within safe and sound parameters. Our operating strategies for attaining this objective include managing net interest margin through appropriate risk/return pricing of assets and liabilities and emphasizing growth in retail deposits, as a percentage of interest-bearing liabilities, to reduce our cost of funds. We also seek to improve earnings by controlling non-interest expense, and enhancing non-interest income. We also use risk management instruments to modify interest rate characteristics of certain assets and liabilities to hedge against our exposure to interest rate fluctuations with the objective of, reducing the effects these fluctuations might have on associated cash flows or values. Finally, we perform internal analysis to measure, evaluate and monitor risk.

Interest Rate Risk

Interest rate risk is the most significant market risk impacting us. Interest rate risk occurs when interest rate sensitive assets and liabilities do not reprice simultaneously and in equal volume. A key objective of asset and liability management is to manage interest rate risk associated with changing asset and liability cash flows and values of our assets and liabilities and market interest rate movements. The management of interest rate risk is governed by policies reviewed and approved annually by the Board of Directors. Our Board delegates responsibility for interest rate risk management to the Asset Liability Committee of the Board ("ALCO") and to the Asset and Liability Management Committee ("ALM"), which is composed of BBCN Bank's senior executives and other designated officers. Market risk is the risk of adverse impacts on our future earnings, the fair values of our assets and liabilities, or our future cash flows that may result from changes in the price of a financial instrument. The fundamental objective of our ALM is to manage our exposure to interest rate fluctuations while maintaining adequate levels of liquidity and capital. Our ALM meets regularly to monitor interest rate risk, the sensitivity of our assets and liabilities to interest rate changes, the book and market values of our assets and liabilities, and our investment activities. It also directs changes

in the composition of our assets and liabilities . Our strategy has been to reduce the sensitivity of our earnings to interest rate fluctuations by more closely matching the effective maturities or repricing characteristics of our assets and liabilities. Certain assets and liabilities, however, may react in different degrees to changes in market interest rates. Furthermore, interest rates on certain types of assets and liabilities may fluctuate prior to changes in market interest rates, while interest rates on other types may lag behind. We consider the anticipated effects of these factors when implementing our interest rate risk management objectives.

Interest Rate Sensitivity

Table of Contents

We monitor interest rate risk through the use of a simulation model that provides us with the ability to simulate our net interest income. In order to measure, at September 30, 2012, the sensitivity of our forecasted net interest income to changing interest rates, both rising and falling interest rate scenarios were projected and compared to base market interest rate forecasts. One application of our simulation model measures the impact of market interest rate changes on the net present value of estimated cash flows from our assets and liabilities, defined as our market value of equity. This analysis assesses the changes in market values of interest rate sensitive financial instruments that would occur in response to immediate and parallel changes in market interest rates.

The impacts on our net interest income and market value of equity exposed to immediate and parallel hypothetical changes in market interest rates as projected by the model we use for this purpose are illustrated in the following table.

Simulated Rate Changes	September 30, 2012		December 31, 2011		
	Estimated Net Interest Income Sensitivity	Market Value Of Equity Volatility	Estimated Net Interest Income Sensitivity	Market Value Of Equity Volatility	
+ 200 basis points	6.02	% (0.71))% 5.46	% (4.61))%
+ 100 basis points	2.72	% 0.07	% 2.91	% (1.84))%
- 100 basis points	(0.61))% 2.70	% 0.77	% 4.57	%
- 200 basis points	(0.89))% 4.58	% 0.83	% 8.58	%

The results obtained from using the simulation model are somewhat uncertain as the model does not take into account other impacts or changes and the effect they could have on Company's business or changes in business strategy the Company might make in reaction to changes in the interest rate environment.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

We conducted an evaluation under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934) for the period ended September 30, 2012. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer determined that our disclosure controls and procedures were effective.

Changes in Internal Control over Financial Reporting

There have been no changes in our internal control over financial reporting during the quarter ended September 30, 2012 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

PART II
OTHER INFORMATION

Item 1. Legal Proceedings

BBCN has received communications from the Small Business Administration ("SBA") asserting that the SBA is entitled to receive from BBCN a portion of the amounts to be paid to BBCN by the FDIC in respect of SBA loans that are covered by the FDIC loss share agreements. The amounts claimed by the SBA with respect to covered SBA loans are based on the SBA's guarantee percentage of the individual covered loans referred to in the communications. An aggregate of \$55 million of SBA loans were subject to the loss share agreements at inception. BBCN disagrees with the SBA's position. The discussions with the SBA regarding this matter are at an early stage and BBCN is not presently able to determine the probable outcome.

Item 1A. Risk Factors

There were no material changes from risk factors previously disclosed in our 2011 Annual Report on Form 10-K.
