X ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
ACT OF 1934

For the fiscal year ended December 31, 2014

or

— TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
ACT OF 1934

For the transition period from to

Commission File No. 001-34400

INGERSOLL-RAND PUBLIC LIMITED COMPANY

(Exact name of registrant as specified in its charter)

Ireland

(State or other jurisdiction of incorporation or
organization)

170/175 Lakeview Dr.

Airside Business Park

Swords, Co. Dublin

Ireland

(Address of principal executive offices)

Registrant's telephone number, including area code: +(353) (0) 18707400

Securities registered pursuant to Section 12(b) of the Act:

Title of each class

Ordinary Shares,

Par Value \$1.00 per Share

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

YES X NO

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the
Act. YES NO X

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the
Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was
required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

YES X NO

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if
any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T
 (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required
to submit and post such files). YES X NO

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this
chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or
information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

CAUTIONARY STATEMENT FOR FORWARD LOOKING STATEMENTS

Certain statements in this report, other than purely historical information, are “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. These forward-looking statements generally are identified by the words “believe,” “project,” “expect,” “anticipate,” “estimate,” “forecast,” “outlook,” “intend,” “strategy,” “plan,” “may,” “should,” “will be,” “will continue,” “will likely result,” or the negative thereof or variations thereon or similar terminology generally intended to identify forward-looking statements.

Forward-looking statements may relate to such matters as projections of revenue, margins, expenses, tax provisions, earnings, cash flows, benefit obligations, share or debt repurchases or other financial items; any statements of the plans, strategies and objectives of management for future operations, including those relating to any statements concerning expected development, performance or market share relating to our products and services; any statements regarding future economic conditions or our performance; any statements regarding pending investigations, claims or disputes, including those relating to the Internal Revenue Service audit of our consolidated subsidiaries' tax filings; any statements of expectation or belief; and any statements of assumptions underlying any of the foregoing. These statements are based on currently available information and our current assumptions, expectations and projections about future events. While we believe that our assumptions, expectations and projections are reasonable in view of the currently available information, you are cautioned not to place undue reliance on our forward-looking statements. You are advised to review any further disclosures we make on related subjects in materials we file with or furnish to the SEC. Forward-looking statements speak only as of the date they are made and are not guarantees of future performance. They are subject to future events, risks and uncertainties - many of which are beyond our control - as well as potentially inaccurate assumptions, that could cause actual results to differ materially from our expectations and projections. We do not undertake to update any forward-looking statements.

Factors that might affect our forward-looking statements include, among other things:

- overall economic, political and business conditions in the markets in which we operate;
- the demand for our products and services;
- competitive factors in the industries in which we compete;
- changes in tax requirements (including tax rate changes, new tax laws and revised tax law interpretations);
- the outcome of any litigation, governmental investigations or proceedings;
- the outcome of any income tax audits or settlements;
- interest rate fluctuations and other changes in borrowing costs;
- other capital market conditions, including availability of funding sources;
- currency exchange rate fluctuations, exchange controls and currency devaluations;
- availability of and fluctuations in the prices of key commodities and the impact of higher energy prices;
- the ability to achieve cost savings in connection with our productivity programs;
- impairment of our goodwill, indefinite-lived intangible assets and/or our long-lived assets;
- climate change, changes in weather patterns and seasonal fluctuations;
- the impact of potential information technology or data security breaches;
- the strategic acquisition of businesses, product lines and joint ventures;
- and
- the possible effects on us of future legislation in the U.S. that may limit or eliminate potential U.S. tax benefits resulting from our incorporation in a non-U.S. jurisdiction, such as Ireland.

Some of the significant risks and uncertainties that could cause actual results to differ materially from our expectations and projections are described more fully in Item 1A “Risk Factors.” You should read that information in conjunction with “Management's Discussion and Analysis of Financial Condition and Results of Operations” in Item 7 of this report and our Consolidated Financial Statements and related notes in Item 8 of this report. We note such information for investors as permitted by the Private Securities Litigation Reform Act of 1995.

Table of Contents

PART I

Item 1. BUSINESS

Overview

Ingersoll-Rand plc (IR-Ireland), a public limited company incorporated in Ireland in 2009, and its consolidated subsidiaries (collectively, we, our, the Company) is a diversified, global company that provides products, services and solutions to enhance the quality and comfort of air in homes and buildings, transport and protect food and perishables, and increase industrial productivity and efficiency. Our business segments consist of Climate and Industrial, both with strong brands and leading positions within their respective markets. We generate revenue and cash primarily through the design, manufacture, sale and service of a diverse portfolio of industrial and commercial products that include well-recognized, premium brand names such as Ingersoll-Rand®, Trane®, Thermo King®, American Standard® and Club Car®.

To achieve our mission of being a world leader in creating comfortable and efficient environments, we continue to focus on increasing our recurring revenue stream from parts, service, used equipment and rentals; and to continuously improve the efficiencies and capabilities of the products and services of our businesses. We also continue to focus on operational excellence strategies as a central theme to improving our earnings and cash flows.

Recent Divestitures

Discontinued Operations

On December 1, 2013, the Company completed the previously announced separation of its commercial and residential security businesses by distributing the related ordinary shares of Allegion, on a pro rata basis, to the Company's shareholders of record as of November 22, 2013. After the Distribution Date, Allegion became an independent publicly traded company.

The results of the commercial and residential security businesses prior to the spin-off are presented as a discontinued operation on the Consolidated Statement of Comprehensive Income and Consolidated Statement of Cash Flows for all periods presented.

See “Discontinued Operations” within Management's Discussion and Analysis of Financial Condition and Results of Operations and also Note 15 to the Consolidated Financial Statements for a further discussion of our discontinued operations.

Business Segments

Our business segments provide products, services and solutions used to increase the efficiency and productivity of both industrial and commercial operations and homes, as well as improve the health and comfort of people around the world.

Our business segments are as follows:

Climate

Our Climate segment delivers energy-efficient solutions globally and includes Trane® and American Standard® Heating & Air Conditioning which provide heating, ventilation and air conditioning (HVAC) systems, and commercial and residential building services, parts, support and controls; and Thermo King® transport temperature control solutions. This segment had 2014 net revenues of \$9.9 billion.

Industrial

Our Industrial segment delivers products and services that enhance energy efficiency, productivity and operations. It includes Ingersoll Rand® compressed air systems and services, power tools, material handling systems, ARO® fluid management equipment, as well as Club Car® golf, utility and rough terrain vehicles. This segment had 2014 net revenues of \$3.0 billion.

Segment Revenue and profit information and additional financial data and commentary on recent financial results for operating segments are provided in the Review of Business Segments section in Part II, Item 7. “Management's Discussion and Analysis of Financial Condition and Results of Operations” and in Note 18 to the Consolidated Financial Statements in Part II, Item 8. “Financial Statements and Supplementary Data” of this Annual Report on Form 10-K.

Table of Contents

Products and Services

Our principal products and services by business segment include the following:

Climate

Aftermarket parts and service	Energy management services
Air cleaners	Facility management services
Air conditioners	Furnaces
Air exchangers	Heat pumps
Air handlers	Humidifiers
Airside and terminal devices	Installation contracting
Auxiliary idle reduction	Package heating and cooling systems
Auxiliary temperature management	Performance contracting
Building management systems	Repair and maintenance services
Bus and rail HVAC systems	Service agreements
Chillers	Temporary heating and cooling systems
Coils and condensers	Thermostats/controls
Container refrigeration systems and gensets	Trailer refrigeration systems
Control systems	Unitary systems
Cryogenic refrigeration systems	Vehicle-powered truck refrigeration systems
Diesel-powered refrigeration systems	

Industrial

Air compressors (centrifugal, reciprocating, and rotary)	Hoists (air, electric, and manual)
Aftermarket parts and accessories	Motion control components
Airends	Power tools (air, cordless, and electric)
Blowers	Precision fastening systems
Dryers	Pumps (diaphragm and piston)
Engine starting systems	Rough terrain (AWD) vehicles
Ergonomic material handling systems	Service contracts and programs
Filters	Utility and low-speed vehicles
Fluid handling systems	Visage® mobile golf information systems
Golf vehicles	Winches (air, electric, and hydraulic)

These products are sold primarily under our name and under other names including American Standard, ARO, Club Car, Thermo King and Trane.

Competitive Conditions

Our products and services are sold in highly competitive markets throughout the world. Due to the diversity of these products and services and the variety of markets served, we encounter a wide variety of competitors that vary by product line and services. They include well-established regional or specialized competitors, as well as larger U.S. and non-U.S. corporations or divisions of larger companies.

The principal methods of competition in these markets relate to price, quality, delivery, service and support, technology and innovation. We believe that we are one of the leading manufacturers in the world of HVAC systems and services, air compression systems, transport temperature control products, air tools, and golf and utility vehicles.

Distribution

Our products are distributed by a number of methods, which we believe are appropriate to the type of product. U.S. sales are made through branch sales offices, distributors and dealers across the country. Non-U.S. sales are made through numerous subsidiary sales and service companies with a supporting chain of distributors throughout the world.

Table of Contents

Customers

We have no customer that accounted for more than 10% of our consolidated net revenues in 2014, 2013 or 2012. No material part of our business is dependent upon a single customer or a small group of customers; therefore, the loss of any one customer would not have a material adverse effect on our results of operations or cash flows.

Raw Materials

We manufacture many of the components included in our products, which requires us to employ a wide variety of commodities. Principal commodities, such as steel, copper and aluminum, are purchased from a large number of independent sources around the world. In the past, variability in prices for some commodities, particularly steel and non-ferrous metals, have caused pricing pressures in some of our businesses. We have historically been able adjust pricing with customers to maintain our margins; however, we may not always be able to offset these cost changes with price changes.

We believe that available sources of supply will generally be sufficient for the foreseeable future. There have been no commodity shortages which have had a material adverse effect on our businesses. However, significant changes in certain material costs may have an adverse impact on our costs and operating margins. To mitigate this potential impact, we enter into long-term supply contracts in order to manage our exposure to potential supply disruptions.

Working Capital

We manufacture products that must be readily available to meet our customers' rapid delivery requirements. Therefore, we maintain an adequate level of working capital to support our business needs and our customers' requirements. Such working capital requirements are not, however, in the opinion of management, materially different from those experienced by our major competitors. We believe our sales and payment terms are competitive in and appropriate for the markets in which we compete.

Seasonality

Demand for certain of our products and services is influenced by weather conditions. For instance, Trane's sales have historically tended to be seasonally higher in the second and third quarters of the year because this represents summer in the U.S. and other northern hemisphere markets, which is the peak season for sales of air conditioning systems and services. Therefore, results of any quarterly period may not be indicative of expected results for a full year and unexpected cool trends or unseasonably warm trends during the summer season could negatively or positively affect certain segments of our business and impact overall results of operations.

Research and Development

We engage in research and development activities in an effort to introduce new products, enhance existing product effectiveness, improve ease of use and reliability as well as expand the various applications for which our products may be appropriate. In addition, we continually evaluate developing technologies in areas that we believe will enhance our business for possible investment or acquisition. We anticipate that we will continue to make significant expenditures for research and development activities as we look to maintain and improve our competitive position. Research and development expenditures were approximately \$212.3 million in 2014, \$218.2 million in 2013 and \$235.4 million in 2012.

Patents and Licenses

We own numerous patents and patent applications, and are licensed under others. Although in aggregate we consider our patents and licenses to be valuable to our operations, we do not believe that our business is materially dependent on a single patent or license or any group of them. In our opinion, engineering, production skills and experience are more responsible for our market position than our patents and/or licenses.

Operations by Geographic Area

Approximately 40% of our net revenues in 2014 were derived outside the U.S. and we sold products in more than 100 countries. Therefore, the attendant risks of manufacturing or selling in a particular country, such as nationalization and establishment of common markets, may have an adverse impact on our non-U.S. operations. For a discussion of risks associated with our non-U.S. operations, see "Risk Factors – Our global operations subject us to economic risks," and "Risk Factors – Currency exchange rate fluctuations and other related risks may adversely affect our results," in Item 1A and "Quantitative and Qualitative Disclosure about Market Risk" in Item 7A. Additional geographic data is provided in Note 18 to the Consolidated Financial Statements.

Table of Contents**Backlog**

Our approximate backlog of orders, believed to be firm, at December 31, was as follows:

In millions	2014	2013
Climate	\$1,499.3	\$1,342.7
Industrial	489.6	517.4
Total	\$1,988.9	\$1,860.1

These backlog figures are based on orders received. While the major portion of our products are built in advance of order and either shipped or assembled from stock, orders for specialized machinery or specific customer application are submitted with extensive lead times and are often subject to revision, deferral, cancellation or termination. We expect to ship substantially all the December 31, 2014 backlog during 2015.

Environmental Matters

We continue to be dedicated to an environmental program to reduce the utilization and generation of hazardous materials during the manufacturing process and to remediate identified environmental concerns. As to the latter, we are currently engaged in site investigations and remediation activities to address environmental cleanup from past operations at current and former manufacturing facilities.

We are sometimes a party to environmental lawsuits and claims and have received notices of potential violations of environmental laws and regulations from the Environmental Protection Agency and similar state authorities. We have also been identified as a potentially responsible party (PRP) for cleanup costs associated with off-site waste disposal at federal Superfund and state remediation sites. For all such sites, there are other PRPs and, in most instances, our involvement is minimal.

In estimating our liability, we have assumed that we will not bear the entire cost of remediation of any site to the exclusion of other PRPs who may be jointly and severally liable. The ability of other PRPs to participate has been taken into account, based on our understanding of the parties' financial condition and probable contributions on a per site basis. Additional lawsuits and claims involving environmental matters are likely to arise from time to time in the future.

We incurred \$5.2 million, \$(0.5) million, and \$3.1 million of expenses during the years ended December 31, 2014, 2013, and 2012, respectively, for environmental remediation at sites presently or formerly owned or leased by us. As of December 31, 2014 and 2013, we have recorded reserves for environmental matters of \$45.2 million and \$47.9 million, respectively. Of these amounts \$36.3 million and \$42.1 million, respectively, relate to remediation of sites previously disposed by us. Our total current environmental reserve at December 31, 2014 and 2013 was \$17.1 million and \$13.5 million, respectively. Given the evolving nature of environmental laws, regulations and technology, the ultimate cost of future compliance is uncertain.

For a further discussion of our potential environmental liabilities, see also Part II, Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, Contingent Liabilities, as well as Note 17 to the Consolidated Financial Statements.

Asbestos Related Matters

Certain of our wholly-owned subsidiaries are named as defendants in asbestos-related lawsuits in state and federal courts. In virtually all of the suits, a large number of other companies have also been named as defendants. The vast majority of those claims have been filed against either Ingersoll-Rand Company (IR-New Jersey) or Trane U.S. Inc. (Trane) and generally allege injury caused by exposure to asbestos contained in certain historical products sold by IR-New Jersey or Trane, primarily pumps, boilers and railroad brake shoes. Neither IR-New Jersey nor Trane was a producer or manufacturer of asbestos, however, some formerly manufactured products utilized asbestos-containing components such as gaskets and packings purchased from third-party suppliers.

We incurred net costs after insurance recoveries of \$(64.9) million, \$56.2 million, and \$7.8 million during the years ended December 31, 2014, 2013, and 2012, respectively, related to the settlement and defense of asbestos-related claims. Our total liability for asbestos-related matters and our total asset for probable asbestos-related insurance recoveries were \$776.6 million and \$335.7 million, respectively, as of December 31, 2014 and \$846.2 million and \$321.8 million, respectively, as of December 31, 2013.

See also the discussion under Part I, Item 3, Legal Proceedings, and Part II, Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, Contingent Liabilities, as well as further detail in Note 17 to the Consolidated Financial Statements.

Table of Contents

Employees

As of December 31, 2014, we employed approximately 43,000 people throughout the world.

Available Information

We file annual, quarterly, and current reports, proxy statements, and other documents with the SEC under the Securities Exchange Act of 1934. The public may read and copy any materials filed with the SEC at the SEC's Public Reference Room at 100 F Street, N.E., Washington, D.C. 20549. The public may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. Also, the SEC maintains an Internet website that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC. The public can obtain any documents that are filed by us at <http://www.sec.gov>.

In addition, this Annual Report on Form 10-K, as well as our quarterly reports on Form 10-Q, current reports on Form 8-K and any amendments to all of the foregoing reports, are made available free of charge on our Internet website (<http://www.ingersollrand.com>) as soon as reasonably practicable after such reports are electronically filed with or furnished to the SEC. The Board of Directors of the Company has also adopted and posted in the Investor Relations section of the Company's website our Corporate Governance Guidelines and charters for each of the Board's standing committees. The contents of the Company's website are not incorporated by reference in this report.

Certifications

New York Stock Exchange Annual Chief Executive Officer Certification

The Company's Chief Executive Officer submitted to the New York Stock Exchange the Annual CEO Certification as the Company's compliance with the New York Stock Exchange's corporate governance listing standards required by Section 303A.12 of the New York Stock Exchange's listing standards.

Sarbanes-Oxley Act Section 302 Certification

The certifications of the Chief Executive Officer and Chief Financial Officer of the Company pursuant to Section 302 of the Sarbanes-Oxley Act of 2002 are filed as exhibits to this Annual Report on Form 10-K.

Item 1A. RISK FACTORS

Our business, financial condition, results of operations, and cash flows are subject to a number of risks that could cause the actual results and conditions to differ materially from those projected in forward-looking statements contained in this Annual Report on Form 10-K. The risks set forth below are those we consider most significant. We face other risks, however, that we do not currently perceive to be material but could cause actual results and conditions to differ materially from our expectations. You should evaluate all risks before you invest in our securities. If any of the risks actually occur, our business, financial condition, results of operations or cash flows could be adversely impacted. In that case, the trading price of our ordinary shares could decline, and you may lose all or part of your investment.

Our global operations subject us to economic risks.

Our global operations are dependent upon products manufactured, purchased and sold in the U.S. and internationally, including Europe, China, Brazil, Venezuela, Africa, India, Argentina, Mexico and Russia. These activities are subject to risks that are inherent in operating globally, including:

- changes in local laws and regulations or imposition of currency restrictions and other restraints;
- limitation of ownership rights, including expropriation of assets by a local government, and limitation on the ability to repatriate earnings;
- sovereign debt crises and currency instability in developed and developing countries;
- imposition of burdensome tariffs and quotas;
- difficulty in staffing and managing global operations;
- difficulty of enforcing agreements, collecting receivables and protecting assets through non-U.S. legal systems;
- national and international conflict, including war, civil disturbances and terrorist acts; and
- economic downturns, slowing economic growth and social and political instability.

These risks could increase our cost of doing business internationally, increase our counterparty risk, disrupt our operations, disrupt the ability of suppliers and customers to fulfill their obligations, limit our ability to sell products in certain markets and have a material adverse impact on our results of operations, financial condition, and cash flows.

Table of Contents

Our growth is dependent, in part, on the development, commercialization and acceptance of new products and services.

We must develop and commercialize new products and services in order to remain competitive in our current and future markets and in order to continue to grow our business. The development and commercialization of new products and services require a significant investment of resources. We cannot provide any assurance that any new product or service will be successfully commercialized in a timely manner, if ever, or, if commercialized, will result in returns greater than our investment. Investment in a product or service could divert our attention and resources from other projects that become more commercially viable in the market. We also cannot provide any assurance that any new product or service will be accepted by the market. Failure to develop new products and services that are accepted by the market could have a material adverse impact on our competitive position, results of operations, financial condition, and cash flows.

The capital and credit markets are important to our business.

Instability in U.S. and global capital and credit markets, including market disruptions, limited liquidity and interest rate volatility, or reductions in the credit ratings assigned to us by independent rating agencies could reduce our access to capital markets or increase the cost of funding our short and long term credit requirements. In particular, if we are unable to access capital and credit markets on terms that are acceptable to us, we may not be able to make certain investments or fully execute our business plans and strategies.

Our suppliers and customers are also dependent upon the capital and credit markets. Limitations on the ability of customers, suppliers or financial counterparties to access credit could lead to insolvencies of key suppliers and customers, limit or prevent customers from obtaining credit to finance purchases of our products and services and cause delays in the delivery of key products from suppliers.

Currency exchange rate fluctuations and other related risks may adversely affect our results.

We are exposed to a variety of market risks, including the effects of changes in currency exchange rates. See Part II Item 7A, Quantitative and Qualitative Disclosure About Market Risk.

We have operations throughout the world that manufacture and sell products in various international markets. As a result, we are exposed to movements in exchange rates of various currencies against the U.S. dollar as well as against other currencies throughout the world.

Our consolidated financial results reported in U.S. dollars are exposed to changes in the exchange rates used to translate certain non-U.S. operations into U.S. dollars. The majority of our Net revenues are denominated in U.S. dollars or Chinese Yuan, which currently has a fixed rate of exchange with the U.S. dollar. The largest concentration of non-U.S. denominated sales is in the Euro functional currency. If the average exchange rate used to translate revenue from Euro-denominated operations into U.S. dollars were to change we are exposed to impacts on Net earnings.

We are also exposed to gains or losses on purchases, sales and other transactions at the operating unit level that are denominated in foreign currencies. We use derivative instruments to hedge those exposures that cannot be naturally offset to an insignificant amount. The instruments utilized are viewed as risk management tools, involve little complexity and are not used for trading or speculative purposes. To minimize the risk of counter party non-performance, derivative instrument agreements are made only through major financial institutions with significant experience in such derivative instruments.

We also face risks arising from the imposition of exchange controls and currency devaluations. Exchange controls may limit our ability to convert foreign currencies into U.S. dollars or to remit dividends and other payments by our foreign subsidiaries or businesses located in or conducted within a country imposing controls. Currency devaluations result in a diminished value of funds denominated in the currency of the country instituting the devaluation. Material adverse legal judgments, fines, penalties or settlements could adversely affect our results of operations or financial condition.

We are currently and may in the future become involved in legal proceedings and disputes incidental to the operation of our business or the business operations of previously-owned entities. Our business may be adversely affected by the outcome of these proceedings and other contingencies (including, without limitation, product liability and asbestos-related matters) that cannot be predicted with certainty. Moreover, any insurance or indemnification rights

that we may have may be insufficient or unavailable to protect us against the total aggregate amount of losses sustained as a result of such proceedings and contingencies. As required by generally accepted accounting principles in the United States, we establish reserves based on our assessment of contingencies. Subsequent developments in legal proceedings and other events could affect our assessment and estimates of the loss contingency recorded as a reserve and we may be required to make additional material payments, which could have a material adverse impact on our liquidity, results of operations, financial condition, and cash flows.

Table of Contents

Our reputation, ability to do business and results of operations could be impaired by improper conduct by any of our employees, agents or business partners.

We are subject to regulation under a wide variety of U.S. federal and state and non-U.S. laws, regulations and policies, including laws related to anti-corruption, export and import compliance, anti-trust and money laundering, due to our global operations. We cannot provide assurance our internal controls will always protect us from the improper conduct of our employees, agents and business partners. Any violations of law or improper conduct could damage our reputation and, depending on the circumstances, subject us to, among other things, civil and criminal penalties, material fines, equitable remedies (including profit disgorgement and injunctions on future conduct), securities litigation and a general loss of investor confidence, any one of which could have a material adverse impact on our business prospects, financial condition, results of operations, cash flows, and the market value of our stock.

We may be subject to risks relating to our information technology systems.

We rely extensively on information technology systems, some of which are supported by third party vendors, to manage and operate our business. We are also investing in new information technology systems that are designed to continue improving our operations. If these systems cease to function properly, if these systems experience security breaches or disruptions or if these systems do not provide the anticipated benefits, our ability to manage our operations could be impaired, which could have a material adverse impact on our results of operations, financial condition, and cash flows.

Security breaches or disruptions of our technology systems, infrastructure or products could negatively impact our business and financial results.

Our information technology systems and infrastructure and technology embedded in certain of our control products may be subject to cyber attacks and unauthorized security intrusions. In addition, hardware, software or applications we develop or obtain from third parties may contain defects in design or manufacture or other problems that could unexpectedly result in security breaches or disruptions. The methods used to obtain unauthorized access, disable or degrade service, or sabotage systems are constantly changing and evolving. Despite having instituted security policies and business continuity plans, and implementing and regularly reviewing and updating processes and procedures to protect against unauthorized access, the ever-evolving threats mean we must continually evaluate and adapt our systems and processes, and there is no guarantee that they will be adequate to safeguard against all data security breaches or misuses of data. Our systems, networks and certain of our control products may be vulnerable to system damage, malicious attacks from hackers, employee errors or misconduct, viruses, power and utility outages, and other catastrophic events that could cause significant harm to our business by negatively impacting our business operations, compromising the security of our proprietary information or the personally identifiable data relating to our customers, employees and business partners and exposing us to litigation that could adversely affect our reputation. Such events could have a material adverse impact on our results of operations, financial condition and cash flows.

Commodity shortages and price increases and higher energy prices could adversely affect our financial results.

We rely on suppliers to secure commodities, particularly steel and non-ferrous metals, required for the manufacture of our products. A disruption in deliveries from our suppliers or decreased availability of commodities could have an adverse effect on our ability to meet our commitments to customers or increase our operating costs. We believe that available sources of supply will generally be sufficient for our needs for the foreseeable future. Nonetheless, the unavailability of some commodities could have a material adverse impact on our results of operations and cash flows. Volatility in the prices of these commodities or the impact of inflationary increases could increase the costs of our products and services. We may not be able to pass on these costs to our customers and this could have a material adverse impact on our results of operations and cash flows. Conversely, in the event there is deflation, the Company may experience pressure from its customers to reduce prices. There can be no assurance that the Company would be able to reduce its costs (through negotiations with suppliers or other measures) to offset any such price concessions which could adversely impact results of operations and cash flows. We do not currently use financial derivatives to hedge against this volatility. While we use fixed price contracts to mitigate this exposure, we expect any future hedging activity to seek to minimize near-term volatility of the commodity prices which would not protect us from long-term commodity price increases.

Additionally, we are exposed to large fluctuations in the price of petroleum-based fuel due to the instability of current market prices. Higher energy costs increase our operating costs and the cost of shipping our products, and supplying services, to customers around the world. Consequently, sharp price increases, the imposition of taxes or an interruption of supply, could cause us to lose the ability to effectively manage the risk of rising fuel prices and may have a material adverse impact on our results of operations and cash flows.

Table of Contents

Our operational excellence efforts may not achieve the improvements we expect.

We utilize a number of tools, such as Lean Six Sigma, to improve operational efficiency and productivity.

Implementation of new processes to our operations could cause disruptions and there is no assurance that all of our planned operational excellence projects will be fully implemented or, if implemented, will realize the expected improvements.

We may be required to recognize impairment charges for our goodwill and other indefinite-lived intangible assets.

At December 31, 2014, the net carrying value of our goodwill and other indefinite-lived intangible assets totaled \$5.4 billion and \$2.6 billion, respectively. In accordance with generally accepted accounting principles, we periodically assess these assets to determine if they are impaired. Significant negative industry or economic trends, disruptions to our business, unexpected significant changes or planned changes in use of the assets, divestitures and market capitalization declines may result in recognition of impairments to goodwill or other indefinite-lived assets. Any charges relating to such impairments could have a material adverse impact on our results of operations in the periods recognized.

Changes in weather patterns and seasonal fluctuations may adversely affect certain segments of the Company's business and impact overall results of operations.

Demand for certain segments of the Company's products and services is influenced by weather conditions. For instance, Trane's sales have historically tended to be seasonally higher in the second and third quarters of the year because, in the U.S. and other northern hemisphere markets, summer is the peak season for sales of air conditioning systems and services. Therefore, results of any quarterly period may not be indicative of expected results for a full year and unexpected cool trends or unseasonably warm trends during the summer season could negatively or positively affect certain segments of the Company's business and impact overall results of operations.

Global climate change could negatively affect our business.

Refrigerants are essential to many of our products and there is a growing awareness and concern regarding global warming potential of such materials. As such, national, regional and international regulations and policies are being considered to curtail their use. As we begin to see regulations impeding the use of the current class of widely used refrigerants we are planning for, and managing transitions to, sustainable solutions. We have committed to increase energy efficiency and reduce our climate impact with operational and product-related climate targets, including among other initiatives: (i) 50 percent reduction in the greenhouse gas refrigerant footprint of our products for customers by 2020 and lower global warming potential alternatives across our portfolio by 2030; (ii) \$500 million investment in product-related research and development over the next five years to fund the long-term reduction of greenhouse gas emissions; and (iii) 35 percent reduction in the greenhouse gas footprint of our office buildings, manufacturing facilities and fleet by 2020. While we are committed to pursuing these sustainable solutions, there can be no assurance that our commitments will be successful, that our products will be accepted by the market or that economic returns will match the investment that we are making in new product development.

Concerns regarding global climate change may result in more international, regional and/or federal requirements to reduce or mitigate global warming and these regulations could mandate even more restrictive standards than the voluntary commitments that we have made or require such changes on a more accelerated timeframe. There continues to be a lack of consistent climate legislation, which creates economic and regulatory uncertainty. Such regulatory uncertainty extends to future incentives for energy efficient buildings and vehicles and costs of compliance, which may impact the demand for our products, obsolescence of our products and our results of operations.

In addition, to the extent climate change influences weather patterns, such changes could also disrupt our operations by causing business interruptions or by impacting the availability and cost of materials needed for manufacturing and could increase insurance and other operating costs. These factors may impact our decisions to construct new facilities or maintain existing facilities in areas most prone to physical climate risks.

Weakness in the commercial and residential construction markets may adversely impact our results of operations and cash flow.

Our commercial and residential HVAC businesses, which collectively represent 60% of our net revenues, provide products and services to a wide range of markets, including significant sales to the commercial and residential construction markets. Weakness in either or both of these construction markets may negatively impact the demand for

our products and services. Decrease in the demand for our products and services could have a material adverse impact on our results of operations and cash flow.

Table of Contents

Our business strategy includes acquiring companies, entering into joint ventures and making investments that complement our existing businesses. We may not identify acquisition or joint venture candidates at the same rate as the past. Acquisition, joint ventures and investments that we identify could be unsuccessful or consume significant resources, which could adversely affect our operating results.

We continue to analyze and evaluate the acquisition of strategic businesses and product lines, joint ventures and investments with the potential to strengthen our industry position, enhance our existing set of product and services offerings or grow revenues, earnings and cash flow. There can be no assurance that we will identify or successfully complete transactions with suitable candidates in the future, that we will consummate these transactions at rates similar to the past or that completed transactions will be successful. Acquisitions, joint ventures and investments may involve significant cash expenditures, debt incurrence, operating losses and expenses that could have a material adverse effect on our business, financial condition, results of operations and cash flows. Such transactions involve numerous other risks, including:

- diversion of management time and attention from daily operations;
 - difficulties integrating acquired businesses, technologies and personnel into our business;
 - difficulties in obtaining and verifying the financial statements and other business information of acquired businesses;
 - inability to obtain required regulatory approvals and/or required financing on favorable terms;
 - potential loss of key employees, key contractual relationships or key customers of acquired businesses or of ours;
 - assumption of the liabilities and exposure to unforeseen liabilities of acquired businesses;
 - dilution of interests of holders of our common shares through the issuance of equity securities or equity-linked securities; and
 - in the case of joint ventures and other investments, interests that diverge from those of our partners without the ability to direct the management and operations of the joint venture or investment in the manner we believe most appropriate.
- It may be difficult for us to complete transactions quickly and to integrate acquired operations efficiently into our business operations. Any acquisitions, joint ventures or investments may ultimately harm our business, financial condition, results of operations and cash flows, as such transactions may not be successful and may ultimately result in impairment charges.

Our operations are subject to regulatory risks.

Our U.S. and non-U.S. operations are subject to a number of laws and regulations, including among others, laws related to the environment and health and safety. We have made, and will be required to continue to make, significant expenditures to comply with these laws and regulations. Changes in current laws and regulations could require us to increase our compliance expenditures, cause us to significantly alter or discontinue offering existing products and services or cause us to develop new products and services. Altering current products and services or developing new products and services to comply with changes in the applicable laws and regulations could require significant research and development investments, increase the cost of providing the products and services and adversely affect the demand for our products and services. The U.S. federal government and various states and municipalities have enacted or may enact legislation intended to deny government contracts to U.S. companies that reincorporate outside of the U.S. or have reincorporated outside of the U.S. or may take other actions negatively impacting such companies. Our failure to comply with applicable laws and regulations could lead to significant penalties, fines or other sanctions. If we are unable to effectively respond to changes to applicable laws and regulations or comply with existing and future laws and regulations, our competitive position, results of operations, financial condition and cash flows could be materially adversely impacted.

Risks Relating to our Past Spin-off Transaction

In December 2013, we completed the spin-off of our former commercial and residential security businesses to our shareholders (the spin-off) pursuant to which each shareholder as of the record date for the spin-off received one ordinary share of Allegion, plc (Allegion) for every three Ingersoll-Rand plc ordinary shares. Allegion is now an independent public company. This spin-off exposed us and our shareholders to the risks described below. In addition, we cannot be assured that all of the anticipated benefits of the spin-off and subsequent to the spin-off will be realized. If the distribution or certain internal transactions undertaken in anticipation of the spin-off are determined to be taxable for U.S. federal income tax purposes, we, our shareholders as of the time of the distribution that are subject to

U.S. federal income tax and/or Allegion could incur significant U.S. federal income tax liabilities.

We received a ruling from the U.S. Internal Revenue Service (the “IRS”) substantially to the effect that, among other things, the distribution of Allegion plc’s ordinary shares, together with certain related transactions, will qualify for tax-free treatment under Sections 355 and 368(a) of the U.S. Internal Revenue Code of 1986, as amended (the “Code”), with the result that we and our shareholders will not recognize any taxable income, gain or loss for U.S. federal income tax purposes as a result of the spin-off,

Table of Contents

except to the extent of cash received in lieu of fractional shares (the “IRS Ruling”). The IRS Ruling also provides that specified internal transactions undertaken in anticipation of the distribution will qualify for favorable treatment under the Code. In addition, we received opinions from the law firm of Simpson Thacher & Bartlett LLP substantially to the effect that specified requirements, including certain requirements that the IRS will not rule on, necessary to obtain tax-free treatment have been satisfied, such that the distribution for U.S. federal income tax purposes and certain other matters relating to the distribution, including certain internal transactions undertaken in anticipation of the distribution, will receive tax-free treatment under Section 355 of the Code. The IRS Ruling and the opinions relied on certain facts and assumptions and certain representations and undertakings from us and Allegion regarding the past and future conduct of our respective businesses and other matters.

Notwithstanding the IRS Ruling and the opinions, the IRS could determine on audit that the distribution or the internal transactions should be treated as taxable transactions if it determines that any of these facts, assumptions, representations or undertakings is not correct or has been violated, or that the distribution or the internal transactions should be taxable for other reasons, including as a result of significant changes in shares or asset ownership after the distribution. A legal opinion represents the tax adviser’s best legal judgment and is not binding on the IRS or the courts, and the IRS or the courts may not agree with the opinion. In addition, the opinion is based on current law and cannot be relied upon if current law changes with retroactive effect. If the distribution, and/or internal transactions, ultimately is determined to be taxable, we or Allegion could incur significant U.S. federal income tax liabilities, which could cause a material adverse impact on our business, financial condition, results of operations and cash flows in future reporting periods.

Furthermore, if, notwithstanding receipt of the IRS Ruling and opinions, the spin-off were determined to be a taxable transaction, each shareholder subject to U.S. federal income tax who received shares of Allegion in the spin-off would generally be treated as receiving a taxable distribution of property in an amount equal to the fair market value of the Allegion shares received. That distribution would be taxable as a dividend to the extent of our then-current and accumulated earnings and profits. Any amount that exceeded our earnings and profits would be treated first as a non-taxable return of capital to the extent of the applicable shareholder's tax basis in our ordinary shares with any remaining amount being taxed as a capital gain.

Under the terms of the Tax Matters Agreement between us and Allegion executed in connection with the spin-off, in the event the distribution or the internal transactions were determined to be taxable as a result of actions taken after the distribution by us or Allegion, the party responsible for such failure would be responsible for all taxes imposed on us or Allegion as a result thereof. If such failure is not the result of actions taken after the distribution by us or Allegion, then Allegion would be responsible for any taxes imposed on us or Allegion as a result of such determination. Such tax amounts could be significant. If Allegion were to default in its obligation to us to pay such taxes, we could be legally liable under applicable tax law for such liabilities and required to make additional tax payments. Accordingly, under certain circumstances, we may be obligated to pay amounts in excess of our agreed-upon share of tax liabilities. To the extent we are responsible for any liability under the Tax Matters Agreement, there could be a material adverse impact on our business, financial condition, results of operations and cash flows in future reporting periods.

We might not be able to engage in desirable strategic transactions and equity issuances as a result of the distribution because of restrictions relating to U.S. federal income tax requirements for tax-free distributions.

We may be deterred from engaging in significant equity transactions in order to preserve, for U.S. federal income tax purposes, the tax-free nature of the distribution. Even if the distribution otherwise qualifies for tax-free treatment under Section 355 of the Code, it may result in corporate-level taxable gain to us and certain of our affiliates under Section 355(e) of the Code if 50% or more, by vote or value, of our shares or Allegion’s shares are acquired or issued as part of a plan or series of related transactions that includes the distribution. Any acquisitions or issuances of our shares or Allegion’s shares within two years after the distribution will generally be presumed to be part of such a plan, although we or Allegion may be able to rebut that presumption. As a result, we may not pursue strategic transactions or engage in new business or other transactions that would otherwise maximize the value of our business.

If the distribution is determined to be taxable for Irish tax purposes, significant Irish tax liabilities may arise.

We received an opinion of the Irish Revenue regarding the Irish tax consequences of the distribution to the effect that certain reliefs and exemptions for corporate reorganizations apply. In addition to obtaining the opinion from Irish Revenue, we also received opinions from the law firm of Arthur Cox confirming the applicability of the relevant exemptions and reliefs to the distribution as well as received opinions from other external advisers that certain internal transactions will not trigger Irish tax costs as well. These opinions relied on certain facts and assumptions and certain representations and undertakings from us and Allegion regarding the past and future conduct of our respective businesses and other matters. Notwithstanding the opinions, Irish Revenue could determine on audit that the distribution or the internal transactions do not qualify for the relevant exemptions or reliefs if it determines that any of these facts, assumptions, representations or undertakings is not correct or has been violated. A legal opinion represents the tax adviser's best legal judgment and is not binding on Irish Revenue or the courts and Irish Revenue or the courts may not agree with the legal opinion. In addition, the legal opinion is based on current law and cannot be relied upon if current law changes with retroactive effect. If the distribution ultimately is determined not to fall within certain exemptions or reliefs, the distribution could result in certain of our shareholders having an Irish tax liability as a result of the distribution, or we or Allegion

Table of Contents

could incur Irish tax liabilities. To the extent we are responsible for any such liability under the Tax Matters Agreement, there could be a material adverse impact on our business, financial condition, results of operations and cash flows in future reporting periods.

Risks Relating to Our Past Reorganizations

We effected a corporate reorganization in December 2001 to become a Bermuda company (the Bermuda Reorganization) and a subsequent corporate reorganization in July 2009 to become an Irish public limited company. These reorganizations exposed us and our shareholders to the risks described below. In addition, we cannot be assured that all of the anticipated benefits of the reorganizations will be realized.

Changes in tax or other laws, regulations or treaties, changes in our status under U.S. or non-U.S. laws or adverse determinations by taxing or other governmental authorities could increase our tax burden or otherwise affect our financial condition or operating results, as well as subject our shareholders to additional taxes.

The realization of any tax benefit related to our reorganizations could be impacted by changes in tax or other laws, treaties or regulations or the interpretation or enforcement thereof by the U.S. or non-U.S. tax or other governmental authorities. From time to time, proposals have been made and/or legislation has been introduced to change the tax laws, regulations or interpretations thereof of various jurisdictions or limit tax treaty benefits that if enacted could materially increase our tax burden and/or effective tax rate and could have a material adverse impact on our financial condition and results of operations. For instance, recent U.S. legislative proposals would broaden the circumstances under which we would be considered a U.S. resident for U.S. tax purposes, which would significantly diminish the realization of any tax benefit related to our reorganizations. There are other recent U.S. legislative proposals that could modify or eliminate the tax deductibility of various currently deductible payments, which could materially and adversely affect our effective tax rate and cash tax position. Moreover, other U.S. legislative proposals could have a material adverse impact on us by overriding certain tax treaties and limiting the treaty benefits on certain payments by our U.S. subsidiaries to our non-U.S. affiliates, which could increase our tax liability. We cannot predict the outcome of any of these potential changes in any jurisdiction.

While we monitor proposals and other developments that would materially impact our tax burden and/or effective tax rate and investigate our options, we could still be subject to increased taxation on a going forward basis no matter what action we undertake if certain legislative proposals or regulatory changes are enacted, certain tax treaties are amended and/or our interpretation of applicable tax or other laws is challenged and determined to be incorrect. In particular, any changes and/or differing interpretations of applicable tax law that have the effect of disregarding the Ireland Reorganization, limiting our ability to take advantage of tax treaties between jurisdictions, modifying or eliminating the deductibility of various currently deductible payments, or increasing the tax burden of operating or being resident in a particular country, could subject us to increased taxation.

While our U.S. operations are subject to U.S. tax, we believe that a significant portion of our non-U.S. operations are generally not subject to U.S. tax other than withholding taxes. The IRS or a court, however, may not concur with our conclusions including our determination that we, and a significant number of our foreign subsidiaries, are not controlled foreign corporations (CFC) within the meaning of the U.S. tax laws. A contrary determination, which could also arise through significant future acquisitions of our stock by U.S. persons, could also potentially cause U.S. holders (direct, indirect or constructive owners) of 10% or more of our stock (or the voting stock of our non-U.S. subsidiaries) to include in their gross income their pro rata share of certain of our and our non-U.S. subsidiary income for the period during which we (and our non-U.S. subsidiaries) were a CFC. In addition, gain (or a portion of such gain) realized on CFC shares sold by such shareholders may be treated as ordinary income depending on certain facts. Treatment of us or any of our non-U.S. subsidiaries as a CFC could have a material adverse impact on our results of operations, financial condition, and cash flows.

As described further in "Legal Proceedings," we have received several notices from the IRS containing proposed adjustments to our tax filings in connection with audits of the 2001-2006 tax years. The IRS has not contested the validity of our reincorporation in Bermuda in any of these notices. We have and intend to continue to vigorously contest all of these proposed adjustments.

Although the outcome of these matters cannot be predicted with certainty, based upon an analysis of the merits of our position, we believe that we are adequately reserved for these matters and do not expect that the ultimate resolution

will have a material adverse impact on our future results of operations, financial condition, or cash flows. As we move forward to resolve these matters with the IRS, the reserves established may be adjusted. Although we continue to contest the IRS's position, there can be no assurance that we will be successful. If the IRS's position with respect to 2002-2006 is ultimately sustained, we would be required to record additional charges and the resulting liability would have a material adverse impact on our future results of operations, financial condition and cash flows. Furthermore, a substantial amount of information has been provided to the IRS in connection with its audit of our 2007-2011 tax years. We expect the IRS to propose similar adjustments with respect to the intercompany debt incurred in connection with our reincorporation in Bermuda, although we do not know how the IRS will apply its position to the different facts presented in these years or whether the IRS will take a similar position with respect to intercompany debt instruments not outstanding in prior years.

Table of Contents

The inability to realize any anticipated tax benefits related to our reorganizations could have a material adverse impact on our results of operations, financial condition, and cash flows.

Irish law differs from the laws in effect in the United States and may afford less protection to holders of our securities.

The United States currently does not have a treaty with Ireland providing for the reciprocal recognition and enforcement of judgments in civil and commercial matters. As such, there is some uncertainty as to whether the courts of Ireland would recognize or enforce judgments of U.S. courts obtained against us or our directors or officers based on U.S. federal or state civil liability laws, including the civil liability provisions of the U.S. federal or state securities laws, or hear actions against us or those persons based on those laws.

As an Irish company, we are governed by the Irish Companies Act, which differs in some material respects from laws generally applicable to U.S. corporations and shareholders, including, among others, differences relating to interested director and officer transactions and shareholder lawsuits. Likewise, the duties of directors and officers of an Irish company generally are owed to the company only. Shareholders of Irish companies generally do not have a personal right of action against directors or officers of the company and may exercise such rights of action on behalf of the company only in limited circumstances. Accordingly, holders of our securities may have more difficulty protecting their interests than would holders of securities of a corporation incorporated in a jurisdiction of the United States.

In addition, Irish law allows shareholders to authorize share capital which then can be issued by a board of directors without shareholder approval. Also, subject to specified exceptions, Irish law grants statutory pre-emptive rights to existing shareholders to subscribe for new issuances of shares for cash, but allows shareholders to authorize the waiver of the statutory pre-emptive rights with respect to any particular allotment of shares. Under Irish law, these authorizations must be renewed by the shareholders every five years and we cannot guarantee that these authorizations will always be approved. Beginning with the 2014 proxy season, Institutional Shareholder Services (ISS) began taking the position that Irish companies should limit these authorizations in terms of the number of authorized but unissued shares that can be issued without shareholder approval to 33% of such company's issued ordinary share capital, the number of shares that can be issued without pre-emptive rights to up to 5% of such company's issued ordinary share capital and the duration of the authorizations to eighteen months. If we are required to conform these authorizations to the ISS standards in order to obtain shareholder approval, we will be limited in our ability to issue shares in ways that U.S. companies are not limited and will need to renew the authorizations even more frequently than the five-year period provided under Irish law.

Dividends received by our shareholders may be subject to Irish dividend withholding tax.

In certain circumstances, we are required to deduct Irish dividend withholding tax (currently at the rate of 20%) from dividends paid to our shareholders. In the majority of cases, shareholders resident in the United States will not be subject to Irish withholding tax, and shareholders resident in a number of other countries will not be subject to Irish withholding tax provided that they complete certain Irish dividend withholding tax forms. However, some shareholders may be subject to withholding tax, which could have an adverse impact on the price of our shares.

Dividends received by our shareholders could be subject to Irish income tax.

Dividends paid in respect of our shares will generally not be subject to Irish income tax where the beneficial owner of these dividends is exempt from dividend withholding tax, unless the beneficial owner of the dividend has some connection with Ireland other than his or her shareholding in IR-Ireland.

Our shareholders who receive their dividends subject to Irish dividend withholding tax will generally have no further liability to Irish income tax on the dividends unless the beneficial owner of the dividend has some connection with Ireland other than his or her shareholding in IR-Ireland.

Item 1B. UNRESOLVED STAFF COMMENTS

None.

Item 2. PROPERTIES

As of December 31, 2014, we owned or leased a total of approximately 14 million square feet of space worldwide. Manufacturing and assembly operations are conducted in 50 plants across the world. We also maintain various warehouses, offices and repair centers throughout the world.

The majority of our plant facilities are owned by us with the remainder under long-term lease arrangements. We believe that our plants have been well maintained, are generally in good condition and are suitable for the conduct of our business.

Table of Contents

The locations by segment of our principal plant facilities at December 31, 2014 were as follows:

Climate

Americas	Europe	Asia Pacific and India
Curitiba, Brazil	Kolin, Czech Republic	Zhong Shan, China
Monterrey, Mexico	Charmes, France	Taicang, China

Southern Pines, North Carolina	Vignate, Italy	Sahibabad, India
West Chester, Pennsylvania	Logatec, Slovenia	
Kent, Washington		

Item 3. LEGAL PROCEEDINGS

In the normal course of business, we are involved in a variety of lawsuits, claims and legal proceedings, including commercial and contract disputes, employment matters, product liability claims, asbestos-related claims, environmental liabilities, intellectual property disputes, and tax-related matters. In our opinion, pending legal matters are not expected to have a material adverse impact on our results of operations, financial condition, liquidity or cash flows.

Tax Related Matters

In 2007, we received a notice from the IRS containing proposed adjustments to our tax filings in connection with an audit of the 2001 and 2002 tax years. The IRS did not contest the validity of our reincorporation in Bermuda. The IRS proposed to ignore the entities that hold the intercompany debt incurred in connection with our reincorporation in Bermuda (the “2001 Debt”) and to which the interest was paid and impose 30% withholding tax on a portion of the interest payments as if they were made directly to a company that was not eligible for reduced U.S. withholding tax under a U.S. income tax treaty. The IRS asserted that we owe additional taxes with respect to 2002 of approximately \$84 million plus interest. In 2010, we received an amended notice from the IRS assessing penalties of 30% on the asserted underpayment of tax described above.

We have so far been unsuccessful in resolving this dispute and in 2013 received a Notice of Deficiency from the IRS for 2002. The Company filed a petition in the United States Tax Court in November 2013 contesting this deficiency. In its January 2014

Table of Contents

answer to our petition, the IRS asserted that we also owe 30% withholding tax on the portion of 2002 interest payments made on the 2001 Debt upon which it did not previously assert withholding tax. This increases the total tax liability proposed for 2002 to \$109.0 million (\$84.0 million referred to in the paragraph above plus an additional \$25.0 million) plus 30% penalties and interest.

In 2013, we received notices from the IRS containing proposed adjustments to the Company's tax filings in connection with an audit of the 2003-2006 tax years. In these notices, the IRS asserts that we owe a total of approximately \$665 million of additional taxes, as described more fully in the two paragraphs below, in connection with our interest payments on the 2001 Debt for the 2003-2006 period, plus penalties and interest on these unpaid taxes.

The IRS continues to take the position on the 2001 Debt, which was retired at the end of 2011, that it previously took for our 2002 tax year and which is described above. As a result of this recharacterization, the IRS asserts that we owe approximately \$455 million of withholding tax for 2003-2006 plus 30% penalties.

The IRS also proposes to extend its position further and to treat all of the interest income from the 2001 Debt as creating earnings and profits at IR-Limited and, as a result, recharacterize the distributions made by IR-Limited during the 2002-2006 tax years as taxable dividends instead of as a return of capital. Consequently the IRS asserts that we owe approximately \$210 million of income tax on these dividends plus penalties of 20%. We strongly disagree with the view of the IRS and filed a protest in January 2014 for the 2003-2006 tax years.

Furthermore, a substantial amount of information has been provided to the IRS in connection with its audit of our 2007-2011 tax years. We expect the IRS to propose similar adjustments with respect to the 2001 Debt, although we do not know how the IRS will apply its position to the different facts presented in these years or whether the IRS will take a similar position with respect to intercompany debt instruments not outstanding in prior years.

We have vigorously contested all of these proposed adjustments and intend to continue to do so. Although the outcome of these matters cannot be predicted with certainty, based upon an analysis of the merits of our position we believe that we are adequately reserved under the applicable accounting standards for these matters and do not expect that the ultimate resolution will have a material adverse impact on our future results of operations, financial condition, or cash flows. As we move forward to resolve these matters with the IRS, the reserves established may be adjusted. Although we continue to contest the IRS's position, there can be no assurance that we will be successful. If the IRS's position with respect to the 2002-2006 tax years is ultimately sustained we would be required to record additional charges and the resulting liability would have a material adverse impact on our future results of operations, financial condition and cash flows.

We believe that we have adequately provided for any reasonably foreseeable resolution of any tax disputes, but will adjust our reserves if events so dictate in accordance with GAAP. To the extent that the ultimate results differ from our original or adjusted estimates, the effect will be recorded in the Provision for income taxes.

For a further discussion of tax matters, see Note 14 to the Consolidated Financial Statements.

Asbestos-Related Matters

Certain wholly-owned subsidiaries of the Company are named as defendants in asbestos-related lawsuits in state and federal courts. In virtually all of the suits, a large number of other companies have also been named as defendants. The vast majority of those claims have been filed against either IR-New Jersey or Trane and generally allege injury caused by exposure to asbestos contained in certain historical products sold by IR-New Jersey or Trane, primarily pumps, boilers and railroad brake shoes. Neither IR-New Jersey nor Trane was a producer or manufacturer of asbestos, however, some formerly manufactured products utilized asbestos-containing components such as gaskets and packings purchased from third-party suppliers.

See also the discussion under Part II, Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, Contingent Liabilities, and also Note 17 to the Consolidated Financial Statements.

Table of Contents

Executive Officers of the Registrant

The following is a list of executive officers of the Company as of February 13, 2015.

Name and Age	Date of Service as an Executive Officer	Principal Occupation and Other Information for Past Five Years
Michael W. Lamach (51)	2/16/2004	Chairman of the Board (since June 2010) and Chief Executive Officer and President (since February 2010); President and Chief Operating Officer (2009-2010); Senior Vice President and President, Trane Commercial Systems (2008-2009); Senior Vice President and President, Security Technologies (2004-2008)
Susan K. Carter (56)	10/2/2013	Senior Vice President and Chief Financial Officer (since October 2013); KBR Inc. (a global engineering, construction and services business), Executive Vice President and Chief Financial Officer (2009-2013); Lennox International Inc. (a heating, air conditioning and refrigeration company), Executive Vice President and Chief Financial Officer (2004 to 2009)
Marcia J. Avedon (53)	2/7/2007	Senior Vice President, Human Resources, Communications and Corporate Affairs (since June 2013); Senior Vice President, Human Resources and Communications (2007 - 2013)
Paul A. Camuti (53)	8/1/2011	Senior Vice President, Innovation and Chief Technology Officer (since August 2011); President, Smart Grid Applications, Siemens Energy, Inc. (an energy technology subsidiary of Siemens Corporation) (2010 -2011); President, Research Division, Siemens Corporation (a diversified global technology company) (2009 - 2010); President and Chief Executive Officer, Siemens Corporate Research, Inc. (the research subsidiary of Siemens Corporation) (2005 - 2009)
Robert L. Katz (52)	11/1/2010	Senior Vice President and General Counsel (since November 2010); Federal- Mogul Corporation (a global automotive supplier), Senior Vice President, General Counsel and Corporate Secretary (2007-2010)
Gary S. Michel (52)	8/1/2011	Senior Vice President and President, Residential HVAC (since December 2013); Senior Vice President and President, Residential Solutions (2011-2013); President and Chief Executive Officer, Club Car (2007 - 2011)
Didier Teirlinck (58)	6/4/2008	Executive Vice President Ingersoll Rand, Climate Segment (since December 2013); Senior Vice President and President, Climate Solutions (2009-2013); President, Climate Control Technologies (2008-2009); President, Climate Control Europe (2005-2008)
Todd D. Wyman (47)	11/16/2009	Senior Vice President, Global Operations and Integrated Supply Chain: (since November 2009); GE Transportation (a unit of General Electric Company), Vice President, Global Supply Chain (2007-2009)

Robert G. Zafari (56)	7/1/2010	Executive Vice President Ingersoll Rand, Industrial Segment (since December 2013); Senior Vice President and President, Industrial Technologies (2010-2013); President, TCS and Climate Solutions EMEA (2009-2010); President, Security Technologies ESA (2007-2008)
Richard J. Weller (58)	9/8/2008	Vice President and Controller (since September 2008); Vice President, Finance (2008); Vice President, Finance, Security Technologies Sector (2005-2008)

No family relationship exists between any of the above-listed executive officers of the Company. All officers are elected to hold office for one year or until their successors are elected and qualified.

Item 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II

Item 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Information regarding the principal market for our ordinary shares and related shareholder matters is as follows:

Our ordinary shares are traded on the New York Stock Exchange under the symbol IR. As of February 2, 2015, the approximate number of record holders of ordinary shares was 3,910.

The high and low sales price per share and the dividend declared per share for the following periods were as follows:

	Ordinary shares		
	High	Low	Dividend
2014			
First quarter	\$62.88	\$55.70	\$0.25
Second quarter	63.99	54.39	0.25
Third quarter	64.50	56.36	0.25
Fourth quarter	64.59	53.57	0.25
2013			
First quarter ^(a)	\$56.77	\$48.06	\$—
Second quarter	58.92	52.03	0.21
Third quarter	66.62	55.32	0.21
Fourth quarter ^(b)	71.75	54.83	0.21

(a) In December 2012, we declared a dividend of \$0.21 per ordinary share payable on March 28, 2013 to shareholders of record on March 12, 2013.

(b) On December 1, 2013, we spun off our commercial and residential security businesses to our shareholders. Each of our shareholders of record as of November 22, 2013 received one ordinary share of Allegion for every three Ingersoll-Rand plc ordinary shares owned.

Future dividends on our ordinary shares, if any, will be at the discretion of our Board of Directors and will depend on, among other things, our results of operations, cash requirements and surplus, financial condition, contractual restrictions and other factors that the Board of Directors may deem relevant, as well as our ability to pay dividends in compliance with the Irish Companies Act. Under the Irish Companies Act, dividends and distributions may only be made from distributable reserves. Distributable reserves, broadly, means the accumulated realized profits of Ingersoll-Rand plc (IR-Ireland). In addition, no distribution or dividend may be made unless the net assets of IR-Ireland are equal to, or in excess of, the aggregate of IR-Ireland's called up share capital plus undistributable reserves and the distribution does not reduce IR-Ireland's net assets below such aggregate.

Information regarding equity compensation plans required to be disclosed pursuant to this Item is incorporated by reference from our definitive proxy statement for the Annual General Meeting of Shareholders.

Table of Contents

Issuer Purchases of Equity Securities

The following table provides information with respect to purchases by the Company of its ordinary shares during the quarter ended December 31, 2014:

Period	Total number of shares purchased (000's) (a) (b)	Average price paid per share (a) (b)	Total number of shares purchased as part of program (000's) (a)	Approximate dollar value of shares still available to be purchased under the program (\$000's) (a)
October 1 - October 31	1,445.5	\$56.74	1,444.5	\$1,036,638
November 1 - November 30	1,238.6	62.64	1,213.2	960,639
December 1 - December 31	702.0	63.04	697.9	916,639
Total	3,386.1	\$60.21	3,355.6	

(a) In February 2014, our Board of Directors authorized the repurchase of up to \$1.5 billion of our ordinary shares under a share repurchase program, which began in April 2014. Based on market conditions, share repurchases will be made from time to time in the open market and in privately negotiated transactions at the discretion of management. The repurchase program does not have a prescribed expiration date.

(b) We may also reacquire shares outside of the repurchase program from time to time in connection with the surrender of shares to cover taxes on vesting of share based awards. We reacquired 1,005 shares in October; 25,442 shares in November; and 4,058 shares in December in transactions outside the repurchase programs.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following Management's Discussion and Analysis of Financial Condition and Results of Operations contains forward-looking statements that involve risks and uncertainties. Our actual results may differ materially from the results discussed in the forward-looking statements. Factors that might cause a difference include, but are not limited to, those discussed under Item 1A. Risk Factors in this Annual Report on Form 10-K. The following section is qualified in its entirety by the more detailed information, including our financial statements and the notes thereto, which appears elsewhere in this Annual Report.

Overview

Organization

We are a diversified, global company that provides products, services and solutions to enhance the quality and comfort of air in homes and buildings, transport and protect food and perishables and increase industrial productivity and efficiency. Our business segments consist of Climate and Industrial, both with strong brands and leading positions within their respective markets. We generate revenue and cash primarily through the design, manufacture, sale and service of a diverse portfolio of industrial and commercial products that include well-recognized, premium brand names such as Ingersoll-Rand®, Trane®, Thermo King®, American Standard® and Club Car®.

To achieve our mission of being a world leader in creating comfortable, sustainable and efficient environments, we continue to focus on increasing our recurring revenue stream from parts, service, used equipment and rentals; and to continuously improve the efficiencies and capabilities of the products and services of our high-potential businesses. Additional emphasis is placed on expanding market coverage in terms of geography or by taking advantage of a particular vertical market or opportunity. We also continue to focus on operational excellence strategies as a central theme to improving our earnings and cash flows.

Trends and Economic Events

We are a global corporation with worldwide operations. As a global business, our operations are affected by worldwide, regional and industry-specific economic factors, as well as political factors, wherever we operate or do business. Our geographic and industry diversity, and the breadth of our product and services portfolios, have helped mitigate the impact of any one industry or the economy of any single country on our consolidated operating results. Given the broad range of products manufactured and geographic markets served, management uses a variety of factors to predict the outlook for the Company. We monitor key competitors and customers in order to gauge relative performance and the outlook for the future. We regularly perform detailed evaluations of the different market segments we are serving to proactively detect trends and to adapt our strategies accordingly. In addition, we believe our order rates are indicative of future revenue and thus a key measure of anticipated performance. In those industry segments where we are a capital equipment provider, revenues depend on the capital expenditure budgets and spending patterns of our customers, who may delay or accelerate purchases in reaction to changes in their businesses and in the economy.

Current market conditions remain challenging across different international markets. Residential and Commercial new construction activity are slowly recovering in the United States. This is impacting the results of our commercial Heating, Ventilation and Air Conditioning (HVAC) business. Non-residential new construction remains sluggish in Europe and is growing at slower pace in Asia. However, HVAC equipment replacement and aftermarket continue to experience steady growth. We have seen slower worldwide industrial equipment and aftermarket activity. As economic conditions stabilize, we expect moderate growth in worldwide construction markets and slow growth in industrial markets, along with benefits from productivity programs for the remainder of the year.

Despite the current market environment, we believe we have a solid foundation of global brands and leading market shares in all of our major product lines. Our growing geographic and industry diversity coupled with our large installed product base provides growth opportunities within our service, parts and replacement revenue streams. In addition, we are investing substantial resources to innovate and develop new products and services which we expect will drive our future growth.

Table of Contents

Significant events in 2014

Announcement to Acquire Cameron International Corporation's Centrifugal Compression Division

On August 18, 2014, the Company announced an agreement to acquire the assets of Cameron International Corporation's Centrifugal Compression division (the Division) for \$850 million. The acquisition was completed on January 1, 2015, and was funded through a combination of cash from operations and debt. The Division provides centrifugal compression equipment and aftermarket parts and services for global industrial applications, air separation, gas transmission and process. The assets acquired and the results of its operations will be reflected in our consolidated financial statements beginning in the first quarter of 2015.

Issuance of Senior Notes due 2020, 2024, and 2044

In October 2014, we issued \$1.1 billion principal amount of Senior Notes in three tranches through a newly-created wholly-owned subsidiary, Ingersoll-Rand Luxembourg Finance S.A. (IR-Lux). The tranches consist of \$300 million of 2.625% Senior Notes due in 2020, \$500 million of 3.55% Senior Notes due 2024, and \$300 million of 4.65% Senior Notes due in 2044. The notes are fully and unconditionally guaranteed by Ingersoll-Rand Plc (IR-Ireland) and certain of our wholly-owned subsidiaries.

The proceeds from the notes were primarily used to (i) fund the October 2014 redemption of the \$200 million of 5.50% Notes due 2015 and \$300 million 4.75% Senior Notes due 2015, and (ii) fund the acquisition of Cameron International Corporation's Centrifugal Compression division on January 1, 2015. Related to the redemption, the Company recognized \$10.2 million of premium expense in Interest expense.

For additional information regarding the terms of the notes and the related guarantees, see Notes 7 and 19 to the Consolidated Financial Statements.

2014 Dividend Increase and Share Repurchase Activity

In February 2015, we announced an increase in our quarterly dividend from \$0.25 to \$0.29 per share beginning with our March 2015 payment.

In February 2014, our Board of Directors authorized the repurchase of up to \$1.5 billion of our ordinary shares under a new share repurchase program. The new share repurchase program began in the second quarter of 2014. During 2014, the Company repurchased 23.0 million shares for \$1.4 billion, of which 9.8 million shares for \$583.4 million were under the 2014 program. Shares repurchased prior to October 2014 were canceled upon repurchase and beginning in October 2014, repurchased shares were held in treasury and recognized at cost.

In December 2012, our Board of Directors authorized the repurchase of up to \$2.0 billion of our ordinary shares under a share repurchase program. The share repurchase program began in April 2013, and during 2013, we repurchased 20.8 million shares for \$1.2 billion, excluding commissions. The remaining \$0.8 billion of repurchases authorized under this program were made during the first and second quarter of 2014.

Venezuela Currency Devaluation

In February 2013, the government of Venezuela announced a devaluation of the Bolivar, from the pre-existing official exchange rate obtained through the National Center of Foreign Trade (CENCOEX, formerly CADIVI through April 2014) of 4.29 Bolivars to the U.S. dollar to 6.3 Bolivars to the U.S. dollar. We have one subsidiary with operations in Venezuela. Due to the designation of Venezuela as highly inflationary, the U.S. dollar was determined to be the functional currency for this subsidiary. As a result of the devaluation, we realized a foreign currency translation loss of approximately \$3.8 million in the year ended December 31, 2013.

In January 2014, the Venezuelan government significantly expanded the use of the Supplementary Foreign Currency Administration System (SICAD) I exchange market and created a third exchange market called SICAD II. These markets have exchange rates significantly less favorable than the CENCOEX rate. The Venezuelan government also indicated that the CENCOEX rate will be reserved for purchases of "essential goods and services." In February 2015, the Venezuelan government announced a new exchange market called the Marginal Currency System (SIMADI), which will replace the SICAD II exchange and allow for trading based on supply and demand. An exchange rate for the SIMADI market has not been published.

The financial position and results of our Venezuelan subsidiary as of December 31, 2014, are reflected in USD utilizing the CENCOEX rate and not the December 31, 2014 SICAD I (12.0 Bolivars to \$1.00), SICAD II (49.98 Bolivars to \$1.00) or SIMADI rates due to our belief that our imports will continue to qualify for the CENCOEX rate

and our intent to continue to pursue this rate for future exchanges. However, we will continue to monitor the evolving Venezuela exchange market, including the establishment of the new SIMADI exchange market.

As of December 31, 2014, we had net monetary assets of approximately 273 million Bolivars. For 2014, annual net revenues of our Venezuela subsidiary were approximately 300 million Bolivars. Further devaluation of the Bolivar, or our inability to convert our net monetary assets denominated in bolivars into US Dollars at certain of the exchange rates discussed above, could negatively impact our results of operations, financial condition, or cash flows.

Table of Contents

IRS Exam Results

In 2007, we received a notice from the IRS containing proposed adjustments to our tax filings in connection with an audit of the 2001 and 2002 tax years. The IRS did not contest the validity of our reincorporation in Bermuda. The IRS proposed to ignore the entities that hold the intercompany debt incurred in connection with our reincorporation in Bermuda (the “2001 Debt”) and to which the interest was paid and impose 30% withholding tax on a portion of the interest payments as if they were made directly to a company that was not eligible for reduced U.S. withholding tax under a U.S. income tax treaty. The IRS asserted that we owe additional taxes with respect to 2002 of approximately \$84 million plus interest. In 2010, we received an amended notice from the IRS assessing penalties of 30% on the asserted underpayment of tax described above.

We have so far been unsuccessful in resolving this dispute and in 2013 received a Notice of Deficiency from the IRS for 2002. The Company filed a petition in the United States Tax Court in November 2013 contesting this deficiency. In its January 2014 answer to our petition, the IRS asserted that we also owe 30% withholding tax on the portion of 2002 interest payments made on the 2001 Debt upon which it did not previously assert withholding tax. This increases the total tax liability proposed for 2002 to \$109.0 million (\$84 million referred to in the paragraph above plus an additional \$25.0 million) plus 30% penalties and interest.

In 2013, we received notices from the IRS containing proposed adjustments to the Company's tax filings in connection with an audit of the 2003-2006 tax years. In these notices, the IRS asserts that we owe a total of approximately \$665.0 million of additional taxes, as described more fully in the two paragraphs below, in connection with our interest payments on the 2001 Debt for the 2003-2006 period, plus penalties and interest on these unpaid taxes.

The IRS continues to take the position on the 2001 Debt, which was retired at the end of 2011, that it previously took for our 2002 tax year and which is described above. As a result of this recharacterization, the IRS asserts that we owe approximately \$455.0 million of withholding tax for 2003-2006 plus 30% penalties.

The IRS also proposes to extend its position further and to treat all of the interest income from the 2001 Debt as creating earnings and profits at IR-Limited and, as a result, recharacterize the distributions made by IR-Limited during the 2002-2006 tax years as taxable dividends instead of as a return of capital. Consequently the IRS asserts that we owe approximately \$210.0 million of income tax on these dividends plus penalties of 20%. We strongly disagree with the view of the IRS and filed a protest in January 2014 for the 2003-2006 tax years.

Furthermore, a substantial amount of information has been provided to the IRS in connection with its audit of our 2007-2011 tax years. We expect the IRS to propose similar adjustments with respect to the 2001 Debt, although we do not know how the IRS will apply its position to the different facts presented in these years or whether the IRS will take a similar position with respect to intercompany debt instruments not outstanding in prior years.

We have vigorously contested all of these proposed adjustments and intend to continue to do so. Although the outcome of these matters cannot be predicted with certainty, based upon an analysis of the merits of our position we believe that we are adequately reserved under the applicable accounting standards for these matters and do not expect that the ultimate resolution will have a material adverse impact on our future results of operations, financial condition, or cash flows. As we move forward to resolve these matters with the IRS, the reserves established may be adjusted. Although we continue to contest the IRS's position, there can be no assurance that we will be successful. If the IRS's position with respect to the 2002-2006 tax years is ultimately sustained we would be required to record additional charges and the resulting liability would have a material adverse impact on our future results of operations, financial condition and cash flows.

We believe that we have adequately provided for any reasonably foreseeable resolution of any tax disputes, but will adjust our reserves if events so dictate in accordance with GAAP. To the extent that the ultimate results differ from our original or adjusted estimates, the effect will be recorded in the Provision for income taxes.

Significant events in 2013

Allegion Spin-Off

On December 1, 2013, the Company completed the previously announced separation of its commercial and residential security businesses by distributing the related ordinary shares of Allegion, on a pro rata basis, to the Company's shareholders of record as of November 22, 2013. Following the spin-off, Allegion became an independent publicly traded company.

We do not beneficially own any ordinary shares of Allegion, and no longer consolidate Allegion into our financial results. Allegion's historical financial results for all periods prior to December 1, 2013 are presented as a discontinued operation in our Consolidated Financial Statements.

See “Discontinued Operations” within Management's Discussion and Analysis of Financial Condition and Results of Operations and also Note 15 to the Consolidated Financial Statements for a further discussion of our discontinued operations.

Issuance of Senior Notes due 2019, 2023, and 2043

In June 2013, we issued \$1.55 billion principal amount of Senior Notes in three tranches through our wholly-owned subsidiary, Ingersoll-Rand Global Holding Company Limited (IR-Global) pursuant to Rule 144A of the U.S. Securities Act of 1933 (Securities

Table of Contents

Act). The tranches consist of \$350 million of 2.875% Senior Notes due in 2019, \$700 million of 4.250% Senior Notes due in 2023, and \$500 million of 5.750% Senior Notes due in 2043. Later in 2013, the notes were modified to include IR-Jersey as a co-obligor. The notes are also fully and unconditionally guaranteed by IR-Ireland and certain of our wholly-owned subsidiaries.

The proceeds from these notes were primarily used to fund the July 2013 redemption of \$600 million of 6.000% Senior Notes due 2013 and \$655 million of 9.500% Senior Notes due 2014 and to fund expenses related to the spin-off of the commercial and residential security businesses. Related to this redemption, the Company recorded \$45.6 million of premium expense in Interest expense.

For additional information regarding the terms of the notes and the related guarantees, see Notes 7 and 19 to the Consolidated Financial Statements.

Net earnings	950.4		653.9		1,044.0	
Less: Net earnings attributable to noncontrolling interests	(18.7)		(35.1)		(25.4)	
Net earnings attributable to Ingersoll-Rand plc	\$931.7		\$618.8		\$1,018.6	
Diluted net earnings (loss) per ordinary share attributable to Ingersoll-Rand plc ordinary shareholders:						
Continuing operations	\$3.27		\$2.08		\$2.49	
Discontinued operations	0.13		(0.01)		0.79	
Net earnings	\$3.40		\$2.07		\$3.28	

Net Revenues

Net revenues for the year ended December 31, 2014 increased by 4.4%, or \$540.9 million, compared with the same period of 2013, which primarily resulted from the following:

Volume/product mix	4.6	%
Pricing	0.5	%
Currency exchange rates	(0.7)	)%
Total	4.4	%

The increase in revenues was primarily driven by volume improvements within the Climate and Industrial segments.

Net revenues for the year ended December 31, 2013 increased by 3.0%, or \$362.2 million, compared with the same period of 2012, which primarily resulted from the following:

Volume/product mix	2.3	%
Pricing	0.7	%
Total	3.0	%

The increase in revenues was primarily driven by higher volumes and improved pricing across both segments.

Operating Income/Margin

Operating margin improved to 10.9% for the year ended December 31, 2014, compared to 8.9% for the same period of 2013. The increase was primarily due to productivity benefits in excess of other inflation (1.1%), favorable product mix and volume (0.6%), improved pricing net of material inflation (0.2%) and decreased restructuring spending (0.6%), partially offset by increased investment (0.5%).

Operating margin remained flat at 8.9% for the years ended December 31, 2013, and 2012. During 2013, we experienced improved pricing in excess of material inflation (0.5%) and productivity benefits in excess of other inflation (0.4%), offset by increased investment and restructuring spending (0.9%). During 2013 and 2012, the Company incurred costs of \$82.3 million and \$23.3

Table of Contents

million, respectively, associated with ongoing restructuring actions. These actions included workforce reductions as well as the closure and consolidation of manufacturing facilities in an effort to improve the Company's cost structure.

Interest Expense

Interest expense for the year ended December 31, 2014 decreased by \$53.5 million compared with the same period of 2013, primarily as a result of lower redemption premium expense from early debt retirements (\$10.2 million in 2014 compared to \$45.6 million in 2013) and lower interest rates on refinanced debt, as discussed in Liquidity and Capital Resources.

Interest expense for the year ended December 31, 2013 increased by \$26.8 million compared with the same period of 2012, primarily as a result of the redemption premium expense incurred during the July 2013 debt redemption.

Other, Net

The components of Other, net, for the year ended December 31 are as follows:

In millions	2014	2013	2012
Interest income	\$13.2	\$12.8	\$16.3
Exchange gain (loss)	(0.1)	) (14.0	) 0.2
Earnings (loss) from equity investments	7.8	(2.6	) (5.9
Other	9.1	7.2	17.5
Other, net	\$30.0	\$3.4	\$28.1

Exchange gain (loss) for the year ended December 31, 2013 includes a loss of approximately \$3.8 million related to the devaluation of the Venezuela Bolivar.

For the years ended December 31, 2014, 2013 and 2012, we recognized equity earnings (loss) of \$7.8 million, \$(2.6) million and \$(5.9) million, respectively, from our 37.2% ownership interest in Hussmann, a refrigeration display case business.

Other activity for the year ended December 31, 2014 includes a \$6.0 million gain on the sale of an investment. Other activity in 2012 includes adjustments to insurance receivables as a result of favorable settlements.

Provision for Income Taxes

The 2014 effective tax rate was 24.3%. The 2014 effective tax rate is lower than the U.S. Statutory rate of 35% primarily due to earnings in non-U.S. jurisdictions, which in aggregate have a lower effective rate partially offset by U.S. State and Local income taxes and U.S. tax on non-U.S. earnings. Revenues from non-U.S. jurisdictions account for approximately 40% of our total revenues, such that a material portion of our pretax income is earned and taxed outside the U.S. at rates ranging from 0% to 38%. When comparing the results of multiple reporting periods, among other factors, the mix of earnings between U.S. and foreign jurisdictions can cause variability on our overall effective tax rate.

The 2013 effective tax rate was 22.8%. The 2013 effective tax rate is lower than the U.S. Statutory rate of 35% primarily due to earnings in non-U.S. jurisdictions, which in aggregate, have a lower effective rate and a \$36 million net reduction in our liability for unrecognized tax benefits primarily due to the settlement of an audit in a major tax jurisdiction, partially offset by a tax charge of \$51 million as a result of a change in assertion in certain subsidiary earnings that the company has previously determined to be permanently reinvested and approximately \$74 million of Allegion spin-off tax charges, primarily related to a net increase in our valuation allowances on certain deferred tax assets.

The 2012 effective tax rate was 6.6%, which included a tax benefit of approximately \$140.0 million resulting from a reduction in valuation allowances on certain Non-U.S. deferred tax assets. The 2012 effective tax rate is lower than the U.S. Statutory rate of 35.0% primarily due to earnings in non-U.S. jurisdictions, which in aggregate, have a lower effective rate and a reduction in valuation allowances mentioned above, partially offset by a net increase in our liability for unrecognized tax benefits.

For a further discussion of tax matters, see Note 14 to the Consolidated Financial Statements.

Review of Business Segments

The segment discussions that follow describe the significant factors contributing to the changes in results for each segment included in continuing operations.

Segment operating income is the measure of profit and loss that our chief operating decision maker uses to evaluate the financial performance of the business and as the basis for performance reviews, compensation and resource allocation. For these reasons, we believe that Segment operating income represents the most relevant measure of segment profit and loss. We may exclude certain charges or gains from Operating income to arrive at a Segment operating income that is a more meaningful measure of

Table of Contents

profit and loss upon which to base our operating decisions. We define Segment operating margin as Segment operating income as a percentage of Net revenues.

Climate

Our Climate segment delivers energy-efficient solutions globally and includes Trane® and American Standard® Heating & Air Conditioning which provide heating, ventilation and air conditioning (HVAC) systems, and commercial and residential building services, parts, support and controls; and Thermo King®, the leader in transport temperature control solutions.

Climate segment results for the years ended December 31 were as follows:

Dollar amounts in millions	2014	% change	2013	% change	2012	
Net revenues	\$9,879.7	4.9%	\$9,414.0	4.1%	\$9,042.5	
Segment operating income	1,195.6	27.7%	936.0	14.5%	817.6	
Segment operating margin	12.1	%	9.9	%	9.0	%

2014 vs 2013

Net revenues for the year ended December 31, 2014 increased by 4.9% or \$465.7 million, compared with the same period of 2013, which primarily resulted from the following:

Volume/product mix	5.0	%
Pricing	0.6	%
Currency exchange rates	(0.7)	)%
Total	4.9	%

Commercial HVAC net revenues increased due to improvements in equipment, parts, services and solutions markets. Residential HVAC net revenues increased due to increased volume in all major product categories. Thermo King refrigerated transport revenues increases in North America were partially offset by declines overseas.

Segment operating margin improved to 12.1% for the year ended December 31, 2014, compared to 9.9% for the same period of 2013. The improvement was primarily driven by productivity benefits in excess of other inflation (1.2%), favorable volume/product mix (0.6%), pricing improvements in excess of material inflation (0.2%) and decreased restructuring spending (0.4%); partially offset by increased investment spending (0.2%).

2013 vs 2012

Net revenues for the year ended December 31, 2013 increased by 4.1% or \$371.5 million, compared with the same period of 2012, which primarily resulted from the following:

Volume/product mix	3.5	%
Pricing	0.8	%
Currency exchange rates	(0.2)	)%
Total	4.1	%

Commercial HVAC business was impacted by weakness in the worldwide commercial building markets. Commercial HVAC revenues increased due to improvements in both equipment and parts, services and solutions markets. Residential HVAC revenues increased due to increased volume in all equipment categories. These improvements were slightly offset by a continued mix shift to lower SEER units. Thermo King refrigerated transport net revenues increased driven by improvements in the Americas and Europe.

Segment operating margin improved to 9.9% for the year ended December 31, 2013, compared to 9.0% for the same period of 2012. The improvement was primarily driven by productivity benefits in excess of other inflation (0.8%), pricing improvements in excess of material inflation (0.6%) and favorable volume/product mix (0.2%). These improvements were partially offset by increased investment and restructure spending (0.7%).

Industrial

Our Industrial segment delivers products and services that enhance energy efficiency, productivity and operations. It includes Ingersoll Rand® compressed air systems and services, power tools and material handling systems, ARO® fluid management equipment, as well as Club Car® golf, utility and rough terrain vehicles.

Table of Contents

Segment results for the years ended December 31 were as follows:

Dollar amounts in millions	2014	% change	2013	% change	2012	
Net revenues	\$3,011.7	2.6	% \$2,936.5	(0.3)%	\$2,945.8	
Segment operating income	443.0	(1.6)%	450.3	(1.2)%	455.8	
Segment operating margin	14.7	%	15.3	%	15.5	%
2014 vs 2013						

2014 vs 2013

Net revenues for the year ended December 31, 2014 increased by 2.6% or \$75.2 million, compared with the same period of 2013, which primarily resulted from the following:

Volume/product mix	3.2	%
Pricing	0.3	%
Currency exchange rates	(0.9	)%
Total	2.6	%

Air compressors and industrial product net revenues increased with gains in Americas. Club Car net revenues increased with growth in both golf car and utility vehicle sales.

Segment operating margin decreased to 14.7% for the year end December 31, 2014 compared to compared to 15.3% for the same period of 2013. The decrease was due to increased investment spending (1.2%), partially offset by lower restructuring spending (0.4%) and favorable volume/product mix (0.2%).

2013 vs 2012

Net revenues for the year ended December 31, 2013 decreased by 0.3%, or \$9.3 million, compared with the same period of 2012, which primarily resulted from the following:

Pricing	0.6	%
Currency exchange rates	0.3	%
Volume/product mix	(1.2	)%
Total	(0.3	)%

Air compressors and industrial net revenues decreased due to declines in equipment sales, partially offset by growth in parts, service and solutions. Club Car revenues increased due to growth in both the golf car and utility vehicle markets.

Segment operating margin remained mostly flat for the year ended December 31, 2013 and 2012. Productivity benefits in excess of other inflation (1.0%) were offset by increased investment and restructuring spending (0.7%) and unfavorable volume/product mix (0.5%).

Discontinued Operations

The components of discontinued operations for the years ended December 31 are as follows:

In millions	2014	2013	2012
Net revenues	\$—	\$1,889.9	\$2,046.6
Pre-tax earnings (loss) from operations	41.2	84.7	379.5
Pre-tax gain (loss) on sale	—	—	2.3
Tax benefit (expense)	(6.5	) (71.4	) (129.8
Discontinued operations, net of tax	\$34.7	\$13.3	\$252.0

Discontinued operations by business for the years ended December 31 are as follows:

In millions	2014	2013	2012
Allegion spin-off, net of tax	\$15.0	\$12.4	\$254.2
Other discontinued operations, net of tax	19.7	0.9	(2.2)
Discontinued operations, net of tax	\$34.7	\$13.3	\$252.0

Table of Contents**Allegion Spin-Off**

On December 1, 2013, (the Distribution Date) we completed the spin-off of our commercial and residential security businesses, now under the name of Allegion, plc (Allegion), to our shareholders (the spin-off). On the Distribution Date, each of our shareholders of record as of the close of business on November 22, 2013 (the Record Date) received one ordinary share of Allegion for every three Ingersoll-Rand plc ordinary shares held as of the Record Date. Allegion is now an independently traded public company.

Net revenues and after-tax earnings of Allegion for the year ended December 31 were as follows:

In millions	2014	2013	2012
Net revenues	\$—	\$1,889.9	\$2,046.6
After-tax earnings (loss) from operations	\$15.0	\$12.4	\$254.2

After-tax earnings from Allegion for the year ended December 31, 2014 primarily represent adjustments for certain tax matters. After-tax earnings from Allegion for the years ended December 31, 2013 and 2012 include spin costs of \$128.0 million and \$5.7 million, respectively. Also, the 2013 results include non-cash goodwill charges and tax of \$111.4 million and \$148.2 million, respectively.

Other Discontinued Operations

The components of other discontinued operations for the years ended December 31 were as follows:

In millions	2014	2013	2012
Retained costs, net of tax	\$19.7	\$0.9	\$(16.2)
Net gain (loss) on disposals, net of tax	—	—	14.0
Discontinued operations, net of tax	\$19.7	\$0.9	\$(2.2)

Other discontinued operations, net of tax for the years ended December 31, 2014, 2013 and 2012 are mainly related to postretirement benefits, product liability, worker's compensation, and legal costs (mostly asbestos-related) from previously sold businesses and tax effects of post-closing purchase price adjustments.

Retained costs recognized in 2012 are primarily related to the settlement of post-closing matters with Doosan Infracore related to its 2007 acquisition of our Bobcat Utility Equipment and Attachments business in 2007.

Liquidity and Capital Resources

We earn a significant amount of our operating income in jurisdictions where it is deemed to be permanently reinvested. Our most prominent jurisdiction of operation is the U.S. We currently do not intend nor foresee a need to repatriate funds to the U.S., and no provision for U.S. income taxes has been made with respect to such earnings. We expect existing cash and cash equivalents available to the U.S., the cash generated by our U.S. operations, our committed credit lines as well as our expected ability to access the capital and debt markets will be sufficient to fund our U.S. operating and capital needs for at least the next twelve months and thereafter for the foreseeable future. In addition, we expect existing non-U.S. cash and cash equivalents and the cash generated by our non-U.S. operations will be sufficient to fund our non-U.S. operating and capital needs for at least the next twelve months and thereafter for the foreseeable future. Should we require more capital in the U.S. than is generated by our U.S. operations, and we determine that repatriation of non-U.S. cash is necessary, such amounts would be subject to U.S. federal income taxes. In February 2015, we announced an increase in our quarterly share dividend from \$0.25 to \$0.29 per share beginning with our March 2015 payment. In February 2014, our Board of Directors authorized the repurchase of up to \$1.5 billion of our ordinary shares under a new share repurchase program upon completion of the current share repurchase program. The new share repurchase program began in April of 2014. During the year ended December 31, 2014, we repurchased 23.0 million shares for \$1.4 billion, of which 9.8 million shares for \$583.4 million were under the 2014 program. We expect our available cash flow, committed credit lines and access to the capital markets will be sufficient to fund the increased dividend and share repurchases.

On August 18, 2014, we announced an agreement to acquire the assets of Cameron International Corporation's Centrifugal Compression division for \$850 million. The acquisition was completed on January 1, 2015, funded through a combination of cash from operations and debt.

Table of Contents**Liquidity**

The following table contains several key measures to gauge our financial condition and liquidity at the periods ended December 31:

In millions	2014	2013	2012
Cash and cash equivalents	\$1,705.2	\$1,937.2	\$708.4
Short-term borrowings and current maturities of long-term debt	482.7	367.7	962.9
Long-term debt	3,741.7	3,153.5	2,266.5
Total debt	4,224.4	3,521.2	3,229.4
Total Ingersoll-Rand plc shareholders' equity	5,987.4	7,068.9	7,147.8
Total equity	6,045.4	7,131.3	7,229.3
Debt-to-total capital ratio	41.1	% 33.1	% 30.9
Short-term borrowings and current maturities of long-term debt at December 31 consisted of the following:			
In millions		2014	2013
Debentures with put feature		\$343.0	\$343.0
Other current maturities of long-term debt		23.6	8.0
Other short-term borrowings		116.1	16.7
Total		\$482.7	\$367.7

Commercial Paper Program

The maximum aggregate amount of unsecured commercial paper notes available to be issued, on a private placement basis, under the commercial paper program is \$2 billion as of December 31, 2014. Under the commercial paper program, the Company may issue notes from time to time through Ingersoll-Rand Global Holding Company Limited (IR-Global) or Ingersoll-Rand Luxembourg Finance S.A. (IR-Lux), and the proceeds of the financing will be used for general corporate purposes. The Company had \$100.0 million of commercial paper outstanding at December 31, 2014. No commercial paper was outstanding at December 31, 2013. See Notes 7 and 19 to the Consolidated Financial Statements for related guarantee information for our commercial paper program.

Debentures with Put Feature

At December 31, 2014 and December 31, 2013, we had outstanding \$343.0 million and \$343.0 million, respectively, of fixed rate debentures which only require early repayment at the option of the holder. These debentures contain a put feature that the holders may exercise on each anniversary of the issuance date, subject to a notice requirement. If exercised, we are obligated to repay in whole or in part, at the holder's option, the outstanding principal amount (plus accrued and unpaid interest) of the debentures held by the holder. If these options are not exercised, the final maturity dates would range between 2027 and 2028.

Holders of these debentures had the option to exercise the put feature on \$37.2 million of the outstanding debentures in February 2014, subject to the notice requirement. No exercises were made. Holders of the remaining \$305.8 million in outstanding debentures had the option to exercise the put feature, subject to the notice requirement, in November 2014. No material exercises were made.

Senior Notes due 2020, 2024, and 2044

In October 2014, we issued \$1.1 billion principal amount of Senior Notes in three tranches through a newly-created wholly-owned subsidiary, Ingersoll-Rand Luxembourg Finance S.A. (IR-Lux). The tranches consist of \$300 million of 2.625% Senior Notes due in 2020, \$500 million of 3.55% Senior Notes due 2024, and \$300 million of 4.65% Senior Notes due in 2044. The notes are fully and unconditionally guaranteed by IR-Ireland and certain of our wholly-owned subsidiaries.

The proceeds from the notes were primarily used to (i) fund the October 2014 redemption of the \$200 million of 5.50% Notes due 2015 and \$300 million 4.75% Senior Notes due 2015, and (ii) fund the previously announced acquisition of Cameron International Corporation's Centrifugal compression division on January 1, 2015. Related to the redemption, the Company recognized \$10.2 million of premium expense in Interest expense.

For additional information regarding the terms of the notes and the related guarantees, see Notes 7 and 19 to the Consolidated Financial Statements.

Table of Contents

Senior Notes due 2019, 2023, and 2043

In June 2013, we issued \$1.55 billion principal amount of Senior Notes in three tranches through our wholly-owned subsidiary, IR-Global pursuant to Rule 144A of the Securities Act. The tranches consist of \$350 million of 2.875% Senior Notes due in 2019, \$700 million of 4.250% Senior Notes due in 2023, and \$500 million of 5.750% Senior Notes due in 2043. Later in 2013, the notes were modified to include IR-Jersey as a co-obligor. The notes are also fully and unconditionally guaranteed by IR-Ireland and certain of our wholly-owned subsidiaries.

The proceeds from these notes were primarily used to fund the July 2013 redemption of \$600 million of 6.000% Senior Notes due 2013 and \$655 million of 9.500% Senior Notes due 2014 and to fund expenses related to the spin-off of the commercial and residential security businesses. Related to this redemption, the Company recorded \$45.6 million of premium expense in Interest expense.

For additional information regarding the terms of the notes and the related guarantees, see Notes 7 and 19 to the Consolidated Financial Statements.

Exchangeable Senior Notes Due 2012

In April 2009, we issued \$345 million of 4.5% Exchangeable Senior Notes (the Notes) through our wholly-owned subsidiary, IR-Global. We settled all remaining outstanding Notes during 2012. As a result, we paid \$357.0 million in cash and issued 10.8 million ordinary shares to settle the principal, interest and equity portion of the Notes.

Other Credit Facilities

On March 20, 2014, the Company entered into an unsecured 5-year, \$1.0 billion revolving credit facility through our wholly-owned subsidiary, IR-Global. The credit facility matures in March 2019. In connection with the entry into this credit facility, the Company's existing 4-year, \$1.0 billion revolving credit facility, due to expire in May 2015, was terminated. The Company also has a 5-year, \$1.0 billion revolving credit facility IR-Global maturing in March 2017. During the fourth quarter of 2014, both credit agreements were amended to include IR-Lux as an additional borrower. The total committed revolving credit facilities of \$2.0 billion are unused and provide support for the Company's commercial paper program, as well as other general corporate purposes.

For additional information regarding guarantees of these revolving credit facilities by certain of our wholly-owned subsidiaries, see Notes 7 and 19 to the Consolidated Financial Statements.

The Company also has various non-U.S. lines of credit that provide an aggregate borrowing capacity of \$847.4 million, of which \$610.2 million was unused at December 31, 2014. These lines provide support for bank guarantees, letters of credit and other general corporate purposes.

Pension Plans

Our investment objective in managing defined benefit plan assets is to ensure that all present and future benefit obligations are met as they come due. We seek to achieve this goal while trying to mitigate volatility in plan funded status, contribution and expense by better matching the characteristics of the plan assets to that of the plan liabilities. We use a dynamic approach to asset allocation whereby a plan's allocation to fixed income assets increases as the plan's funded status improves. We monitor plan funded status and asset allocation regularly in addition to investment manager performance.

We monitor the impact of market conditions on our defined benefit plans on a regular basis. None of our defined benefit pension plans have experienced a significant impact on their liquidity due to the volatility in the markets. For further details on pension plan activity, see Note 9 to the Consolidated Financial Statements.

Cash Flows

The following table reflects the major categories of cash flows for the years ended December 31, respectively. For additional details, please see the Consolidated Statements of Cash Flows in the Consolidated Financial Statements.

In millions	2014	2013	2012
Operating cash flow provided by (used in) continuing operations	\$991.7	\$798.8	\$882.5
Investing cash flow provided by (used in) continuing operations	(197.0)	) (213.2	) (128.2
Financing cash flow provided by (used in) continuing operations	(859.5	) 354.1	(1,295.7

Operating Activities

Net cash provided by operating activities from continuing operations was \$991.7 million for the year ended December 31, 2014 compared with \$798.8 million in 2013. Operating cash flows for 2014 reflect improved earnings

from continuing operations partially offset by rising working capital in 2014.

Table of Contents

Net cash provided by operating activities from continuing operations was \$798.8 million for the year ended December 31, 2013 compared with \$882.5 million in 2012. Operating cash flows for 2013 reflect consistent earnings from continuing operations after taking into account spin-related tax charges with no cash impact in 2013 and favorable changes in working capital.

Investing Activities

Net cash used in investing activities from continuing operations was \$197.0 million for the year ended December 31, 2014 compared with \$213.2 million in 2013. The change in investing activities is primarily attributable to \$30.3 million cash dividend received from equity investments during the year ended December 31, 2014.

Net cash used in investing activities from continuing operations was \$213.2 million for the year ended December 31, 2013 compared with \$128.2 million in 2012. The change in investing activities is primarily attributable to increased capital expenditures and decreased net proceeds from business dispositions and equity investments in 2013 compared to 2012.

Financing Activities

Net cash used in financing activities from continuing operations during the year ended December 31, 2014 was \$859.5 million, compared with net cash provided by financing activities from continuing operations of \$354.1 million in 2013. The change in financing activities is primarily related to a transfer of \$1,274.2 million from Allegion in connection with the spin-off in 2013.

Net cash provided by financing activities from continuing operations during the year ended December 31, 2013 was \$354.1 million, compared with net cash used in financing activities from continuing operations of \$1,295.7 million during 2012. The change in financing activities is primarily related to net proceeds from refinancing of our long term debt in 2013 and a transfer of \$1,274.2 million from Allegion in connection with the spin-off, partially offset by increased repurchases of ordinary shares in 2013.

Capital Resources

Based on historical performance and current expectations, we believe our cash and cash equivalents balance, the cash generated from our operations, our committed credit lines and our expected ability to access capital markets will satisfy our working capital needs, capital expenditures, dividends, share repurchase programs, upcoming debt maturities, and other liquidity requirements associated with our operations for the foreseeable future.

Capital expenditures were \$233.5 million, \$242.2 million and \$243.1 million for 2014, 2013 and 2012, respectively.

Our investments continue to improve manufacturing productivity, reduce costs and provide environmental enhancements and advanced technologies for existing facilities. The capital expenditure program for 2015 is estimated to be approximately \$320 million, including amounts approved in prior periods. Many of these projects are subject to review and cancellation at our option without incurring substantial charges.

For financial market risk impacting the Company, see Item 7A. Quantitative and Qualitative Disclosure About Market Risk.

Capitalization

In addition to cash on hand and operating cash flow, we maintain significant credit availability under our Commercial Paper Program. Our ability to borrow at a cost-effective rate under the Commercial Paper Program is contingent upon maintaining an investment-grade credit rating. As of December 31, 2014, our credit ratings were as follows:

	Short-term	Long-term
Moody's	P-2	Baa2
Standard and Poor's	A-2	BBB

The credit ratings set forth above are not a recommendation to buy, sell or hold securities and may be subject to revision or withdrawal by the assigning rating organization. Each rating should be evaluated independently of any other rating.

Our public debt does not contain financial covenants and our revolving credit lines have a debt-to-total capital covenant of 65%. As of December 31, 2014, our debt-to-total capital ratio was significantly beneath this limit.

Table of Contents

Contractual Obligations

The following table summarizes our contractual cash obligations by required payment periods, in millions:

	Less than 1 year	1 - 3 years	3 - 5 years	More than 5 years	Total
Short-term debt	\$116.1	\$—	\$—	\$—	\$116.1
Long-term debt	366.6	* 15.5	1,115.3	2,619.7	\$4,117.1
Interest payments on long-term debt	209.2	414.3	331.6	1,463.8	2,418.9
Purchase obligations	795.1	36.2	—	—	831.3
Operating leases	114.8	161.4	88.2	59.4	423.8
Total contractual cash obligations	\$1,601.6	\$627.4	\$1,535.1	\$4,142.9	\$7,907.0

* Includes \$343.0 million of debt redeemable at the option of the holder. The scheduled maturities of these bonds range between 2027 and 2028. See Note 7 to the Consolidated Financial Statements for additional information. Future expected obligations under our pension and postretirement benefit plans, income taxes, environmental, asbestos-related, and product liability matters have not been included in the contractual cash obligations table above.

Pensions

At December 31, 2014, we had net obligations of \$701.0 million, which consist of noncurrent pension assets of \$11.5 million and current and non-current pension benefit liabilities of \$712.5 million. It is our objective to contribute to the pension plans to ensure adequate funds are available in the plans to make benefit payments to plan participants and beneficiaries when required. We currently project that we will contribute approximately \$59.9 million to our plans worldwide in 2015. The timing and amounts of future contributions are dependent upon the funding status of the plan, which is expected to vary as a result of changes in interest rates, returns on underlying assets, and other factors. Therefore, pension contributions have been excluded from the preceding table. See Note 9 to the Consolidated Financial Statements for additional information.

Postretirement Benefits Other than Pensions

At December 31, 2014, we had postretirement benefit obligations of \$700.7 million. We fund postretirement benefit costs principally on a pay-as-you-go basis as medical costs are incurred by covered retiree populations. Benefit payments, which are net of expected plan participant contributions and Medicare Part D subsidy, are expected to be approximately \$59.5 million in 2015. Because benefit payments are not required to be funded in advance, and the timing and amounts of future payments for are dependent on the cost of benefits for retirees covered by the plan, they have been excluded from the preceding table. See Note 9 to the Consolidated Financial Statements for additional information.

Income Taxes

At December 31, 2014, we have total unrecognized tax benefits for uncertain tax positions of \$343.8 million and \$69.7 million of related accrued interest and penalties, net of tax. The liability has been excluded from the preceding table as we are unable to reasonably estimate the amount and period in which these liabilities might be paid. See Note 14 to the Consolidated Financial Statements for additional information regarding matters relating to income taxes, including unrecognized tax benefits and Internal Revenue Service (IRS) tax disputes.

Contingent Liabilities

We are involved in various litigations, claims and administrative proceedings, including those related to environmental, asbestos-related, and product liability matters. We believe that these liabilities are subject to the uncertainties inherent in estimating future costs for contingent liabilities, and will likely be resolved over an extended period of time. Because the timing and amounts of potential future cash flows are uncertain, they have been excluded from the preceding table. See Note 17 to the Consolidated Financial Statements for additional information. See Note 7 and Note 17 to the Consolidated Financial Statements for additional information on matters affecting our liquidity.

Critical Accounting Policies

Management's Discussion and Analysis of Financial Condition and Results of Operations are based upon our Consolidated Financial Statements, which have been prepared in accordance with accounting principles generally

accepted in the United States (GAAP). The preparation of financial statements in conformity with those accounting principles requires management to use judgment in making estimates and assumptions based on the relevant information available at the end of each period. These estimates and assumptions have a significant effect on reported amounts of assets and liabilities, revenue and expenses as well as the disclosure of contingent assets and liabilities because they result primarily from the need to make estimates and assumptions on matters that are inherently uncertain. Actual results may differ from estimates. If updated information or actual amounts are different from previous estimates, the revisions are included in our results for the period in which they become known.

Table of Contents

The following is a summary of certain accounting estimates and assumptions made by management that we consider critical.

Allowance for doubtful accounts – We maintain an allowance for doubtful accounts receivable which represents our best estimate of probable loss inherent in our accounts receivable portfolio. This estimate is based upon our two step policy that results in the total recorded allowance for doubtful accounts. The first step is to record a portfolio reserve based on the aging of the outstanding accounts receivable portfolio and the Company's historical experience with our end markets, customer base and products. The second step is to create a specific reserve for significant accounts as to which the customer's ability to satisfy their financial obligation to the Company is in doubt due to circumstances such as bankruptcy, deteriorating operating results or financial position. In these circumstances, management uses its judgment to record an allowance based on the best estimate of probable loss, factoring in such considerations as the market value of collateral, if applicable. Actual results could differ from those estimates. These estimates and assumptions are reviewed periodically, and the effects of changes, if any, are reflected in the statement of operations in the period that they are determined.

Goodwill and indefinite-lived intangible assets – We have significant goodwill and indefinite-lived intangible assets on our balance sheet related to acquisitions. Our goodwill and other indefinite-lived intangible assets are tested and reviewed annually during the fourth quarter for impairment or when there is a significant change in events or circumstances that indicate that the fair value of an asset is more likely than not less than the carrying amount of the asset.

Recoverability of goodwill is measured at the reporting unit level and begins with a qualitative assessment to determine if it is more likely than not that the fair value of each reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test included in U.S. GAAP. For those reporting units where it is required, the first step compares the carrying amount of the reporting unit to its estimated fair value. If the estimated fair value of a reporting unit exceeds its carrying amount, goodwill of the reporting unit is not impaired and the second step of the impairment test is not necessary. To the extent that the carrying value of the reporting unit exceeds its estimated fair value, a second step is performed, wherein the reporting unit's carrying value of goodwill is compared to the implied fair value of goodwill. To the extent that the carrying value exceeds the implied fair value, impairment exists and must be recognized.

As quoted market prices are not available for our reporting units, the calculation of their estimated fair value in step one is determined using three valuation techniques: a discounted cash flow model (an income approach), a market-adjusted multiple of earnings and revenues (a market approach), and a similar transactions method (also a market approach). The discounted cash flow approach relies on the Company's estimates of future cash flows and explicitly addresses factors such as timing, growth and margins, with due consideration given to forecasting risk. The earnings and revenue multiple approach reflects the market's expectations for future growth and risk, with adjustments to account for differences between the guideline publicly traded companies and the subject reporting units. The similar transactions method considers prices paid in transactions that have recently occurred in our industry or in related industries. These methods are weighted 50%, 40% and 10%, respectively.

In step 2, the implied fair value of goodwill is determined in the same manner as the amount of goodwill recognized in a business combination. The estimated fair value of the reporting unit is allocated to all of the assets and liabilities of the reporting unit (including any unrecognized intangible assets) as if the reporting unit had been acquired in a business combination and the fair value of the reporting unit, as determined in the first step of the goodwill impairment test, was the price paid to acquire that reporting unit.

Recoverability of other intangible assets with indefinite useful lives is first assessed using a qualitative assessment to determine whether it is more likely than not that an indefinite-lived intangible asset is impaired. This assessment is used as a basis for determining whether it is necessary to calculate the fair value of an indefinite-lived intangible asset. For those indefinite-lived assets where it is required, a fair value is determined on a relief from royalty methodology (income approach) which is based on the implied royalty paid, at an appropriate discount rate, to license the use of an asset rather than owning the asset. The present value of the after-tax cost savings (i.e. royalty relief) indicates the estimated fair value of the asset. Any excess of the carrying value over the estimated fair value is recognized as an impairment loss equal to that excess.

The determination of the estimated fair value and the implied fair value of goodwill and other indefinite-lived intangible assets requires us to make assumptions about estimated cash flows, including profit margins, long-term forecasts, discount rates and terminal growth rates. We developed these assumptions based on the market and geographic risks unique to each reporting unit.

2014 Impairment Test

For our annual impairment testing performed during the fourth quarter of 2014, we calculated the fair value for each of the reporting units and indefinite-lived intangibles. Based on the results of these calculations, we determined that the fair value of the reporting units and indefinite-lived intangible assets exceeded their respective carrying values. The estimates of fair

Table of Contents

value are based on the best information available as of the date of the assessment, which primarily incorporates management assumptions about expected future cash flows.

Goodwill - Under the income approach, we assumed a forecasted cash flow period of five years with discount rates ranging from 10.5% to 15.0%, near term growth rates ranging from 3.0% to 19.6% and terminal growth rates ranging from 3.0% to 3.5%. Under the market approach, we used an adjusted multiple ranging from 7.0 to 11.5 of projected earnings before interest, taxes, depreciation and amortization (EBITDA) based on the market information of comparable companies. Additionally, we compared the estimated aggregate fair value of our reporting units to our overall market capitalization.

For all reporting units, the excess of the estimated fair value over carrying value (expressed as a percentage of carrying value) was a minimum of 50%. A significant increase in the discount rate, decrease in the long-term growth rate, or substantial reductions in our end markets and volume assumptions could have a negative impact on the estimated fair value of these reporting units.

Other Indefinite-lived intangible assets - In testing our other indefinite-lived intangible assets for impairment, we assumed forecasted revenues for a period of five years with discount rates of 12.5%, terminal growth rate of 3.0%, and royalty rates ranging from 3.0% to 4.5%. For all tradenames, the excess of the estimated fair value over carrying value (expressed as a percentage of carrying value) was a minimum of 36%.

A significant increase in the discount rate, decrease in the long-term growth rate, decrease in the royalty rate or substantial reductions in our end markets and volume assumptions could have a negative impact on the estimated fair values of any of our tradenames.

2013 Impairment Test

For our annual impairment testing performed during the fourth quarter of 2013, we concluded it was necessary to calculate the fair value for each of the reporting units and indefinite-lived intangibles. Based on the results of these calculations, we determined that the fair value of the reporting units and indefinite-lived intangible assets exceeded their respective carrying values. The estimates of fair value are based on the best information available as of the date of the assessment, which primarily incorporates management assumptions about expected future cash flows.

Goodwill - Under the income approach, we assumed a forecasted cash flow period of five years with discount rates ranging from 10.0% to 15.5%, near term growth rates ranging from (0.2)% to 8.7% and terminal growth rates ranging from 3.0% to 4.0%. Under the market approach, we used an adjusted multiple ranging from 7.2 to 9.8 of projected earnings before interest, taxes, depreciation and amortization (EBITDA) and 0.9 to 2.4 of projected revenues based on the market information of comparable companies. Additionally, we compared the estimated aggregate fair value of our reporting units to our overall market capitalization.

For all reporting units, the excess of the estimated fair value over carrying value (expressed as a percentage of carrying value) was a minimum of 15%. A significant increase in the discount rate, decrease in the long-term growth rate, or substantial reductions in our end markets and volume assumptions could have a negative impact on the estimated fair value of these reporting units.

In our 2012 Form 10-K, we disclosed a Security Technologies reporting unit whose excess estimated fair value over carrying value was less than 15%. As a result of the spin-off, beginning in the fourth quarter of 2013, this reporting unit is now presented within discontinued operations. Please see Note 15 to the Consolidated Financial Statements for further discussion of goodwill impairment charges related to discontinued operations.

Other Indefinite-lived intangible assets - In testing our other indefinite-lived intangible assets for impairment, we assumed forecasted revenues for a period of five years with discount rates ranging from 10.5% to 12.0%, terminal growth rate of 3.0%, and royalty rates ranging from 3.0% to 4.5%. For all tradenames, the excess of the estimated fair value over carrying value (expressed as a percentage of carrying value) was a minimum of 15%.

A significant increase in the discount rate, decrease in the long-term growth rate, decrease in the royalty rate or substantial reductions in our end markets and volume assumptions could have a negative impact on the estimated fair values of any of our tradenames.

2012 Impairment Test

For our annual impairment testing performed during the fourth quarter of 2012, we concluded it was necessary to calculate the fair value for each of the reporting units and indefinite-lived intangibles. Based on the results of these

calculations, we determined that the fair value of the reporting units and indefinite-lived intangible assets exceeded their respective carrying values. The estimates of fair value are based on the best information available as of the date of the assessment, which primarily incorporates management assumptions about expected future cash flows.

Table of Contents

Goodwill - Under the income approach, we assumed a forecasted cash flow period of five years with discount rates ranging from 11.0% to 15.5%, near term growth rates ranging from (3.5)% to 14.5% and terminal growth rates ranging from 2.5% to 4.0%. Under the market approach, we used an adjusted multiple ranging from 6.6 to 9.2 of projected earnings before interest, taxes, depreciation and amortization (EBITDA) and 0.8 to 1.8 of projected revenues based on the market information of comparable companies. Additionally, we compared the estimated aggregate fair value of our reporting units to our overall market capitalization.

For all reporting units except one, the excess of the estimated fair value over carrying value (expressed as a percentage of carrying value) was a minimum of 15%. The reporting unit with a percentage of carrying value less than 15%, reported within the Climate segment, exceeded its carrying value by 14.4%. This reporting unit had goodwill of approximately \$599 million at December 31, 2012. A significant increase in the discount rate, decrease in the long-term growth rate, or substantial reductions in our end markets and volume assumptions could have a negative impact on the estimated fair value of these reporting units.

Other Indefinite-lived intangible assets - In testing our other indefinite-lived intangible assets for impairment, we assumed forecasted revenues for a period of five years with discount rates ranging from 12.0% to 12.5%, terminal growth rates ranging from 2.5% to 3.0%, and royalty rates ranging from 3.0% to 4.0%. The fair values of our Trane and American Standard tradenames exceeded their respective carrying amounts by less than 15%. The two tradenames exceeded their carrying value by 10.5% and 13.0%, respectively. The carrying values of these tradenames are approximately \$2,497 million and \$105 million, respectively, at December 31, 2012.

A significant increase in the discount rate, decrease in the long-term growth rate, decrease in the royalty rate or substantial reductions in our end markets and volume assumptions could have a negative impact on the estimated fair values of any of our tradenames.

Long-lived assets and finite-lived intangibles – Long-lived assets and finite-lived intangibles are reviewed for impairment whenever events or changes in business circumstances indicate that the carrying amount of an asset may not be fully recoverable. Assets are grouped with other assets and liabilities at the lowest level for which identifiable cash flows can be generated. Impairment in the carrying value of an asset would be recognized whenever anticipated future undiscounted cash flows from an asset are less than its carrying value. The impairment is measured as the amount by which the carrying value exceeds the fair value of the asset as determined by an estimate of discounted cash flows. We believe that our use of estimates and assumptions are reasonable and comply with generally accepted accounting principles. Changes in business conditions could potentially require future adjustments to these valuations.

Loss contingencies – Liabilities are recorded for various contingencies arising in the normal course of business, including litigation and administrative proceedings, environmental and asbestos matters and product liability, product warranty, worker's compensation and other claims. We have recorded reserves in the financial statements related to these matters, which are developed using input derived from actuarial estimates and historical and anticipated experience data depending on the nature of the reserve, and in certain instances with consultation of legal counsel, internal and external consultants and engineers. Subject to the uncertainties inherent in estimating future costs for these types of liabilities, we believe our estimated reserves are reasonable and do not believe the final determination of the liabilities with respect to these matters would have a material effect on our financial condition, results of operations, liquidity or cash flows for any year.

Asbestos matters – Certain of our wholly-owned subsidiaries are named as defendants in asbestos-related lawsuits in state and federal courts. We record a liability for our actual and anticipated future claims as well as an asset for anticipated insurance settlements. Asbestos related defense costs are excluded from the asbestos claims liability and are recorded separately as services are incurred. Although we were neither a manufacturer nor producer of asbestos, some of our formerly manufactured components from third party suppliers utilized asbestos-related components. As a result, we record certain income and expenses associated with our asbestos liabilities and corresponding insurance recoveries within discontinued operations, net of tax, as they relate to previously divested businesses, except for amounts associated with Trane U.S. Inc.'s asbestos liabilities and corresponding insurance recoveries which are recorded within continuing operations. Refer to Note 17 to the Consolidated Financial Statements for further details of asbestos-related matters.

Revenue recognition – Revenue is recognized and earned when all of the following criteria are satisfied: (a) persuasive evidence of a sales arrangement exists; (b) the price is fixed or determinable; (c) collectability is reasonably assured; and (d) delivery has occurred or service has been rendered. Delivery generally occurs when the title and the risks and rewards of ownership have substantially transferred to the customer. Both the persuasive evidence of a sales arrangement and fixed or determinable price criteria are deemed to be satisfied upon receipt of an executed and legally binding sales agreement or contract that clearly defines the terms and conditions of the transaction including the respective obligations of the parties. If the defined terms and conditions allow variability in all or a component of the price, revenue is not recognized until such time that the price becomes fixed or determinable. At the point of sale, the Company validates that existence of an enforceable claim that requires payment within a reasonable amount of time and assesses the collectability of that claim. If collectability

Table of Contents

is not deemed to be reasonably assured, then revenue recognition is deferred until such time that collectability becomes probable or cash is received. Delivery is not considered to have occurred until the customer has taken title and assumed the risks and rewards of ownership. Service and installation revenue are recognized when earned. In some instances, customer acceptance provisions are included in sales arrangements to give the buyer the ability to ensure the delivered product or service meets the criteria established in the order. In these instances, revenue recognition is deferred until the acceptance terms specified in the arrangement are fulfilled through customer acceptance or a demonstration that established criteria have been satisfied. If uncertainty exists about customer acceptance, revenue is not recognized until acceptance has occurred.

We offer various sales incentive programs to our customers, dealers, and distributors. Sales incentive programs do not preclude revenue recognition, but do require an accrual for the Company's best estimate of expected activity. Examples of the sales incentives that are accrued for as a contra receivable and sales deduction at the point of sale include, but are not limited to, discounts (i.e. net 30 type), coupons, and rebates where the customer does not have to provide any additional requirements to receive the discount. Sales returns and customer disputes involving a question of quantity or price are also accounted for as a reduction in revenue and a contra receivable. At December 31, 2014 and 2013, the Company had a customer claim accrual (contra receivable) of \$4.7 million and \$1.7 million, respectively. All other incentives or incentive programs where the customer is required to reach a certain sales level, remain a customer for a certain period of time, provide a rebate form or is subject to additional requirements are accounted for as a reduction of revenue and establishment of a liability. At December 31, 2014 and 2013, the Company had a sales incentive accrual of \$73.4 million and \$80.1 million, respectively. Each of these accruals represents the best estimate the Company expects to pay related to previously sold units. These estimates are reviewed regularly for accuracy. If updated information or actual amounts are different from previous estimates, the revisions are included in our results for the period in which they become known. Historically, the aggregate differences, if any, between our estimates and actual amounts in any year have not had a material impact on the Consolidated Financial Statements.

The Company enters into maintenance and extended warranty contracts with customers. Revenue related to these services is recognized on a straight-line basis over the life of the contract, unless sufficient historical evidence indicates that the cost of providing these services is incurred on an other than straight-line basis. In these circumstances, revenue is recognized over the contract period in proportion to the costs expected to be incurred in performing the service.

The Company, primarily through its Climate segment, provides equipment (e.g. HVAC, controls), integrated solutions, and installation designed to customer specifications through construction-type contracts. The term of these types of contracts is typically less than one year, but can be as long as three years. Revenues related to these contracts are recognized using the percentage-of-completion method in accordance with GAAP. This measure of progress toward completion, utilized to recognize sales and profits, is based on the proportion of actual cost incurred to date as compared to the total estimate of contract costs at completion. The timing of revenue recognition often differs from the invoicing schedule to the customer, with revenue recognition in advance of customer invoicing recorded to unbilled accounts receivable and invoicing in advance of revenue recognition recorded to deferred revenue. At December 31, 2014, all recorded receivables (billed and unbilled) are due within one year. The Company re-evaluates its contract estimates periodically and reflects changes in estimates in the current period using the cumulative catch-up method. These periodic reviews have not historically resulted in significant adjustments. If estimated contract costs are in excess of contract revenues, then the excess costs are accrued.

We enter into sales arrangements that contain multiple elements, such as equipment, installation and service revenue. For multiple element arrangements, each element is evaluated to determine the separate units of accounting. The total arrangement consideration is then allocated to the separate units of accounting based on their relative selling price at the inception of the arrangement. The relative selling price is determined using vendor specific objective evidence (VSOE) of selling price, if it exists; otherwise, third-party evidence (TPE) of selling price is used. If neither VSOE nor TPE of selling price exists for a deliverable, a best estimate of the selling price is developed for that deliverable. The Company primarily utilizes VSOE to determine its relative selling price. The Company recognizes revenue for delivered elements when the delivered item has stand-alone value to the customer, the basic revenue

recognition criteria have been met, and only customary refund or return rights related to the delivered elements exist.

Income taxes – Deferred tax assets and liabilities are determined based on temporary differences between financial reporting and tax bases of assets and liabilities, applying enacted tax rates expected to be in effect for the year in which the differences are expected to reverse. We recognize future tax benefits, such as net operating losses and non-U.S. tax credits, to the extent that realizing these benefits is considered in our judgment to be more likely than not. We regularly review the recoverability of our deferred tax assets considering our historic profitability, projected future taxable income, timing of the reversals of existing temporary differences and the feasibility of our tax planning strategies. Where appropriate, we record a valuation allowance with respect to a future tax benefit.

The provision for income taxes involves a significant amount of management judgment regarding interpretation of relevant facts and laws in the jurisdictions in which we operate. Future changes in applicable laws, projected levels of taxable income,

Table of Contents

and tax planning could change the effective tax rate and tax balances recorded by us. In addition, tax authorities periodically review income tax returns filed by us and can raise issues regarding our filing positions, timing and amount of income or deductions, and the allocation of income among the jurisdictions in which we operate. A significant period of time may elapse between the filing of an income tax return and the ultimate resolution of an issue raised by a revenue authority with respect to that return. We believe that we have adequately provided for any reasonably foreseeable resolution of these matters. We will adjust our estimate if significant events so dictate. To the extent that the ultimate results differ from our original or adjusted estimates, the effect will be recorded in the provision for income taxes in the period that the matter is finally resolved.

Employee benefit plans – We provide a range of benefits to eligible employees and retirees, including pensions, postretirement and postemployment benefits. Determining the cost associated with such benefits is dependent on various actuarial assumptions including discount rates, expected return on plan assets, compensation increases, employee mortality, turnover rates and healthcare cost trend rates. Actuarial valuations are performed to determine expense in accordance with GAAP. Actual results may differ from the actuarial assumptions and are generally accumulated and amortized into earnings over future periods. We review our actuarial assumptions at each measurement date and make modifications to the assumptions based on current rates and trends, if appropriate. The discount rate, the rate of compensation increase and the expected long-term rates of return on plan assets are determined as of each measurement date. A discount rate reflects a rate at which pension benefits could be effectively settled. Discount rates for all plans are established using hypothetical yield curves based on the yields of corporate bonds rated AA quality. Spot rates are developed from the yield curve and used to discount future benefit payments. The rate of compensation increase is dependent on expected future compensation levels. The expected long-term rate of return on plan assets reflects the average rate of returns expected on the funds invested or to be invested to provide for the benefits included in the projected benefit obligation. The expected long-term rate of return on plan assets is based on what is achievable given the plan's investment policy, the types of assets held and the target asset allocation. The expected long-term rate of return is determined as of each measurement date. We believe that the assumptions utilized in recording our obligations under our plans are reasonable based on input from our actuaries, outside investment advisors and information as to assumptions used by plan sponsors.

Changes in any of the assumptions can have an impact on the net periodic pension cost or postretirement benefit cost. Estimated sensitivities to the expected 2015 net periodic pension cost of a 0.25% rate decline in the two basic assumptions are as follows: the decline in the discount rate would increase expense by approximately \$9.5 million and the decline in the estimated return on assets would increase expense by approximately \$7.3 million. A 0.25% rate decrease in the discount rate for postretirement benefits would increase expected 2015 net periodic postretirement benefit cost by \$0.6 million and a 1.0% increase in the healthcare cost trend rate would increase the service and interest cost by approximately \$1.1 million.

Recent Accounting Pronouncements

Recently Adopted Accounting Pronouncements:

In February 2013, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2013-04, "Obligations Resulting from Joint and Several Liability Arrangements for Which the Total Amount of the Obligation Is Fixed at the Reporting Date." ASU 2013-04 provides guidance for the recognition, measurement, and disclosure of obligations resulting from joint and several liability arrangements where the total obligation is fixed at the reporting date, and for which no specific guidance currently exists. This new guidance became effective for annual reporting periods beginning on or after December 15, 2013 and subsequent interim periods. The revised requirements of ASU 2013-04 did not have an impact on the consolidated financial statements.

In March 2013, the FASB issued ASU 2013-05, "Parent's Accounting for the Cumulative Translation Adjustment upon Derecognition of Certain Subsidiaries or Groups of Assets within a Foreign Entity or of an Investment in a Foreign Entity." ASU 2013-05 clarifies the application of GAAP to the release of cumulative translation adjustments related to changes of ownership in or within foreign entities, including step acquisitions. This new guidance became effective for annual reporting periods beginning on or after December 15, 2013 and subsequent interim periods. The Company will apply the new guidance, as applicable, to future derecognitions of certain subsidiaries or groups of assets within a Foreign Entity or of an Investment in foreign entities.

In July 2013, the FASB issued ASU 2013-11, "Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists." ASU 2013-11 clarifies guidance and eliminates diversity in practice on the presentation of unrecognized tax benefits when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists at the reporting date. This new guidance became effective for annual reporting periods beginning on or after December 15, 2013 and subsequent interim periods. The Company has applied the requirements of ASU 2013-11 prospectively in preparing the December 31, 2014 consolidated balance sheet, which resulted in a decrease to current and noncurrent deferred tax assets of \$21.9 million and \$10.0 million, respectively, an increase to noncurrent deferred tax liabilities of \$114.8 million and a decrease to noncurrent reserves for uncertain tax positions of \$146.7 million. Had the Company applied the requirements of

Table of Contents

ASU 2013-11 retrospectively to the December 31, 2013 consolidated balance sheet, the impact would have been a decrease to current and noncurrent deferred tax assets of \$22.6 million and \$20.7 million, respectively, an increase to noncurrent deferred tax liabilities of \$128.9 million and a decrease to noncurrent reserves for uncertain tax positions of \$172.2 million.

Recently Issued Accounting Pronouncements

In April 2014, the FASB issued ASU 2014-08, "Presentation of Financial Statements and Property, Plant, and Equipment - Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity." ASU 2014-08 provides new guidance related to the definition of a discontinued operation and requires new disclosures of both discontinued operations and certain other disposals that do not meet the definition of a discontinued operation. This new guidance is effective for annual periods beginning on or after December 15, 2014 and interim periods within those years. Beginning in 2015, the Company will apply the new guidance, as applicable, to future disposals of components or classifications as held for sale.

In May 2014, the FASB issued ASU 2014-09, "Revenue from Contracts with Customers." ASU 2014-09 provides new guidance related to how an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. In addition, ASU 2014-08 specifies new accounting for costs associated with obtaining or fulfilling contracts with customers and expands the required disclosures related to revenue and cash flows from contracts with customers. This new guidance is effective for fiscal years, and interim periods within those years, beginning after December 15, 2016, and can be adopted either retrospectively to each prior reporting period presented or as a cumulative-effect adjustment as of the date of adoption, with early application not permitted. The Company is currently determining its implementation approach and assessing the impact on the consolidated financial statements.

In June 2014, the FASB issued ASU 2014-12 "Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period." ASU 2014-12 requires that a performance target that affects vesting, and that could be achieved after the requisite service period, be treated as a performance condition. As such, the performance target should not be reflected in estimating the grant date fair value of the award. This update further clarifies that compensation cost should be recognized in the period in which it becomes probable that the performance target will be achieved and should represent the compensation cost attributable to the period(s) for which the requisite service has already been rendered. The new guidance is effective for annual and interim reporting periods beginning after December 15, 2015, including interim periods within that reporting period. Early application is permitted. Beginning in 2015, the Company will apply the new guidance to future share-based payment arrangements, as applicable.

In August 2014, the FASB issued ASU 2014-15, "Presentation of Financial Statements - Going Concern - Disclosures of Uncertainties about an entity's Ability to Continue as a Going Concern." ASU 2014-15 provides new guidance related to management's responsibility to evaluate whether there is substantial doubt about an entity's ability to continue as a going concern by incorporating and expanding upon certain principles that are currently in U.S. auditing standards and to provide related footnote disclosures. This new guidance is effective for the annual period ending after December 15, 2016, and for annual periods and interim periods thereafter. The requirements of ASU 2014-15 are not expected to have a significant impact on the consolidated financial statements.

Item 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

We are exposed to fluctuations in currency exchange rates, interest rates and commodity prices which could impact our results of operations and financial condition.

Foreign Currency Exposures

We have operations throughout the world that manufacture and sell products in various international markets. As a result, we are exposed to movements in exchange rates of various currencies against the U.S. dollar as well as against other currencies throughout the world.

Our consolidated financial results reported in U.S. dollars are exposed to changes in the exchange rates used to translate certain non-U.S. operations into U.S. dollars. Approximately 63% of Net revenues for the year ended December 31, 2014 were denominated in U.S. dollars and 7% were denominated in Chinese Yuan, which currently has a fixed rate of exchange with the U.S. dollar. The largest concentration of non-U.S. denominated sales is in the

Euro functional currency, which was approximately 10% of Net revenues for year ended December 31, 2014. If the average exchange rate used to translate revenue from Euro-denominated operations into U.S. dollars changed unfavorably by \$0.01 compared to the actual exchange rates used, Net earnings would have been approximately \$2 million lower for the year ended December 31, 2014 (equivalent to a reduction in earnings per share of \$0.01). We are also exposed to gains or losses on purchases, sales and other transactions at the operating unit level that are denominated in foreign currencies. We use derivative instruments to hedge those exposures that cannot be naturally offset to an insignificant amount. The instruments utilized are viewed as risk management tools, involve little complexity and are not used for trading or

Table of Contents

speculative purposes. To minimize the risk of counter party non-performance, derivative instrument agreements are made only through major financial institutions with significant experience in such derivative instruments. We evaluate our exposure to changes in currency exchange rates on our foreign currency derivatives using a sensitivity analysis. The sensitivity analysis is a measurement of the potential loss in fair value based on a percentage change in exchange rates. Based on the firmly committed currency derivative instruments in place at December 31, 2014, a hypothetical change in fair value of those derivative instruments assuming a 10% adverse change in exchange rates would result in an unrealized loss of approximately \$44.2 million, as compared with \$107.8 million at December 31, 2013. These amounts, when realized, would be offset by changes in the fair value of the underlying transactions.

Effective January 1, 2010, Venezuela was determined to be a highly inflationary economy and we changed the functional currency of our operations in Venezuela to the U.S. dollar. On February 8, 2013, the government of Venezuela announced a devaluation of the Bolivar, from the pre-existing official exchange rate obtained through the National Center of Foreign Trade (CENCOEX, formerly CADIVI through April 2014) of 4.29 Bolivars to the U.S. dollar to 6.3 Bolivars to the U.S. dollar. We have one subsidiary with operations in Venezuela. Due to the designation of Venezuela as highly inflationary the U.S. dollar was determined to be the functional currency for this subsidiary. As a result of the devaluation, we realized a foreign currency translation loss of approximately \$3.8 million in the year ended December 31, 2013.

In January 2014, the Venezuelan government significantly expanded the use of the Supplementary Foreign Currency Administration System (SICAD) I exchange market and created a third exchange market called SICAD II. These markets have exchange rates significantly less favorable than the CENCOEX rate. The Venezuelan government also indicated that the CENCOEX rate will be reserved for purchases of “essential goods and services.” In February 2015, the Venezuelan government announced a new exchange market called the Marginal Currency System (SIMADI), which will replace the SICAD II exchange and allow for trading based on supply and demand. An exchange rate for the SIMADI market has not been published.

The financial position and results of our Venezuelan subsidiary as of December 31, 2014, are reflected in USD utilizing the CENCOEX rate and not the December 31, 2014 SICAD I (12.0 Bolivars to \$1.00), SICAD II (49.98 Bolivars to \$1.00) or SIMADI rates due to our belief that our imports will continue to qualify for the CENCOEX rate and our intent to continue to pursue this rate for future exchanges. However, we will continue to monitor the evolving Venezuela exchange market, including the establishment of the new SIMADI exchange market.

As of December 31, 2014, we had net monetary assets of approximately 273 million Bolivars. For 2014, annual net revenues of our Venezuela subsidiary were approximately 300 million Bolivars. Further devaluation of the Bolivar, or our inability to convert our net monetary assets denominated in bolivars into US Dollars at certain of the exchange rates discussed above, could negatively impact our results of operations, financial condition, or cash flows.

Commodity Price Exposures

We are exposed to volatility in the prices of commodities used in some of our products and we use fixed price contracts to manage this exposure. We do not have committed commodity derivative instruments in place at December 31, 2014.

Interest Rate Exposure

Our debt portfolio mainly consists of fixed-rate instruments, and therefore any fluctuation in market interest rates would not have a material effect on our results of operations.

Item 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

Item 9A. CONTROLS AND PROCEDURES

(a) Evaluation of Disclosure Controls and Procedures

The Company's management, including its Chief Executive Officer and Chief Financial Officer, have conducted an evaluation of the effectiveness of the Company's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)), as of the end of the period covered by this Annual Report on Form 10-K. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded as of December 31, 2014, that the Company's disclosure controls and procedures were effective in ensuring that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act has been recorded, processed, summarized and reported, within the time periods specified in the Commission's rules and forms, and that such information has been accumulated and communicated to the Company's management including its Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

(b) Management's Report on Internal Control Over Financial Reporting

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting as such term is defined under Exchange Act Rules 13a-15(f) and 15d-15(f). Internal control over financial reporting is a process designed by, or under the supervision of, the Chief Executive Officer and Chief Financial Officer and effected by the Company's Board of Directors to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies and procedures may deteriorate.

Management has assessed the effectiveness of internal control over financial reporting as of December 31, 2014. In making its assessment, management has utilized the criteria set forth by the Committee of Sponsoring Organizations (COSO) of the Treadway Commission in Internal Control - Integrated Framework (2013). Management concluded that based on its assessment, the Company's internal control over financial reporting was effective as of December 31, 2014.

The effectiveness of the Company's internal control over financial reporting as of December 31, 2014 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report which appears herein.

(c) Changes in Internal Control Over Financial Reporting

There were no changes in internal control over financial reporting (as defined by Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during the quarter ended December 31, 2014 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Item 9B. OTHER INFORMATION

As previously disclosed in a Form 8-K dated December 12, 2014, Mr. Richard Weller, the Company's Vice President and Controller and Principal Accounting Officer, will retire from his positions effective February 15, 2015. Ms. Susan K. Carter, the Company's Chief Financial Officer will also serve as the Company's Principal Accounting Officer effective as of February 15, 2015 until a successor is named.

INGERSOLL-RAND PLC

INDEX TO EXHIBITS

(Item 15(a))

Description

Pursuant to the rules and regulations of the Securities and Exchange Commission (“SEC”), Ingersoll-Rand plc (the “Company”) has filed certain agreements as exhibits to this Annual Report on Form 10-K. These agreements may contain representations and warranties by the parties. These representations and warranties have been made solely for the benefit of the other party or parties to such agreements and (i) may have been qualified by disclosures made to such other party or parties, (ii) were made only as of the date of such agreements or such other date(s) as may be specified in such agreements and are subject to more recent developments, which may not be fully reflected in our public disclosure, (iii) may reflect the allocation of risk among the parties to such agreements and (iv) may apply materiality standards different from what may be viewed as material to investors. Accordingly, these representations and warranties may not describe our actual state of affairs at the date hereof and should not be relied upon.

On July 1, 2009, Ingersoll-Rand Company Limited, a Bermuda company, completed a reorganization to change the jurisdiction of incorporation of the parent company from Bermuda to Ireland. As a result, Ingersoll-Rand plc replaced Ingersoll-Rand Company Limited as the ultimate parent company effective July 1, 2009. All references related to the Company prior to July 1, 2009 relate to Ingersoll-Rand Company Limited.

(a) Exhibits

Exhibit No.	Description	Method of Filing

Report of Independent Registered Public Accounting Firm

To the Shareholders and Board of Directors of Ingersoll-Rand plc:

In our opinion, the Consolidated Financial Statements listed in the accompanying index present fairly, in all material respects, the financial position of Ingersoll-Rand plc and its subsidiaries (the “Company”) at December 31, 2014 and 2013, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2014 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the accompanying index presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2014, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements and financial statement schedule, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying “Management’s Report on Internal Control over Financial Reporting.” Our responsibility is to express opinions on these financial statements, on the financial statement schedule, and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 – DESCRIPTION OF COMPANY

Ingersoll-Rand plc (IR-Ireland), a public limited company incorporated in Ireland in 2009, and its consolidated subsidiaries (collectively, we, our, the Company) is a diversified, global company that provides products, services and solutions to enhance the quality and comfort of air in homes and buildings, transport and protect food and perishables, and increase industrial productivity and efficiency. Our business segments consist of Climate and Industrial, each with strong brands and leading positions within their respective markets. We generate revenue and cash primarily through the design, manufacture, sale and service of a diverse portfolio of industrial and commercial products that include well-recognized, premium brand names such as Ingersoll-Rand®, Trane®, American Standard®, Thermo King® and Club Car®.

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of significant accounting policies used in the preparation of the accompanying Consolidated Financial Statements follows:

Basis of Presentation: The accompanying Consolidated Financial Statements reflect the consolidated operations of the Company and have been prepared in accordance with U.S. Generally Accepted Accounting Principles (GAAP) as defined by the Financial Accounting Standards Board (FASB) within the FASB Accounting Standards Codification (ASC).

Certain reclassifications of amounts reported in prior periods have been made to conform to the 2014 classification. The Company made certain changes in classification of global integrated supply chain costs within Operating income. This change in classification resulted in a \$48.0 million increase to Cost of goods sold with a corresponding decrease to Selling and administrative expenses for the year ended 2013.

On January 1, 2015, the Company completed the previously announced acquisition of the assets of Cameron International Corporation's Centrifugal Compression division (the Division) for \$850 million, funded through a combination of cash from operations and debt. The Division provides centrifugal compression equipment and aftermarket parts and services for global industrial applications, air separation, gas transmission and process gas. The assets acquired and the results of its operations will be reflected in our consolidated financial statements beginning in the first quarter of 2015.

The Consolidated Financial Statements include all majority-owned subsidiaries of the Company. A noncontrolling interest in a subsidiary is considered an ownership interest in a majority-owned subsidiary that is not attributable to the parent. The Company includes Noncontrolling interest as a component of Total equity in the Consolidated Balance Sheet and the Net earnings attributable to noncontrolling interests are presented as an adjustment from Net earnings used to arrive at Net earnings attributable to Ingersoll-Rand plc in the Consolidated Statement of Comprehensive Income.

Partially-owned equity affiliates represent 20-50% ownership interests in investments where we demonstrate significant influence, but do not have a controlling financial interest. Partially-owned equity affiliates are accounted for under the equity method. The Company is also required to consolidate variable interest entities in which it bears a majority of the risk to the entities' potential losses or stands to gain from a majority of the entities' expected returns. Intercompany accounts and transactions have been eliminated. The assets, liabilities, results of operations and cash flows of all discontinued operations have been separately reported as discontinued operations and held for spin-off for all periods presented.

The Company received cash dividends of \$30.3 million and \$44.3 million from its equity investment in Hussmann during 2014 and 2012, respectively. These dividends are classified in investing activities within the Consolidated Statement of Cash Flows due to the cumulative negative equity earnings to date from Hussmann Parent.

As previously disclosed in the notes to our Form 10-Q for the third quarter of 2014, the Company revised its consolidated statements of cash flows for the years ended December 31, 2013 and 2012 to correct errors in the calculation and classification of the effect of exchange rate changes on cash and cash equivalents. The impact of this error for the year ended December 31, 2013 was an overstatement of Net cash provided by continuing operating activities of \$78.9 million with an offsetting understatement to the Effect of exchange rate changes on cash and cash equivalents. The impact of this error for the year ended December 31, 2012 was an understatement of Net cash

provided by continuing operating activities of \$14.4 million with an offsetting overstatement to the Effect of exchange rate changes on cash and cash equivalents. These adjustments were not considered to be material individually or in the aggregate to the previously issued financial statements. The adjustments had no impact on the total net increase (decrease) in cash and cash equivalents, or total cash and cash equivalents amounts in any period.

Use of Estimates: The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosures of contingent assets and liabilities at the date of the financial statements as well as the reported amounts of revenues and expenses during the reporting period. Estimates are based on several factors including the facts and circumstances available at the time the estimates are made, historical experience, risk of loss, general economic conditions and trends, and the assessment of the probable future outcome. Some of the more

F-9

Table of Contents

significant estimates include accounting for doubtful accounts, useful lives of property, plant and equipment and intangible assets, purchase price allocations of acquired businesses, valuation of assets including goodwill and other intangible assets, product warranties, sales allowances, pension plans, postretirement benefits other than pensions, taxes, environmental costs, product liability, asbestos matters and other contingencies. Actual results could differ from those estimates. Estimates and assumptions are reviewed periodically, and the effects of changes, if any, are reflected in the statement of operations in the period that they are determined.

Currency Translation: Assets and liabilities of non-U.S. subsidiaries, where the functional currency is not the U.S. dollar, have been translated at year-end exchange rates, and income and expense accounts have been translated using average exchange rates throughout the year. Adjustments resulting from the process of translating an entity's financial statements into the U.S. dollar have been recorded in the Equity section of the Consolidated Balance Sheet within Accumulated other comprehensive income (loss). Transactions that are denominated in a currency other than an entity's functional currency are subject to changes in exchange rates with the resulting gains and losses recorded within Net earnings.

Cash and Cash Equivalents: Cash and cash equivalents include cash on hand, demand deposits and all highly liquid investments with original maturities at the time of purchase of three months or less.

Inventories: Depending on the business, U.S. inventories are stated at the lower of cost or market using the last-in, first-out (LIFO) method or the lower of cost or market using the first-in, first-out (FIFO) method. Non-U.S. inventories are primarily stated at the lower of cost or market using the FIFO method. At December 31, 2014 and 2013, approximately 52% and 45%, respectively, of all inventory utilized the LIFO method.

Allowance for Doubtful Accounts: The Company maintains an allowance for doubtful accounts receivable which represents the best estimate of probable loss inherent in the Company's accounts receivable portfolio. This estimate is based upon a two-step policy that results in the total recorded allowance for doubtful accounts. The first step is to record a portfolio reserve based on the aging of the outstanding accounts receivable portfolio and the Company's historical experience with our end markets, customer base and products. The second step is to create a specific reserve for significant accounts as to which the customer's ability to satisfy their financial obligation to the Company is in doubt due to circumstances such as bankruptcy, deteriorating operating results or financial position. In these circumstances, management uses its judgment to record an allowance based on the best estimate of probable loss, factoring in such considerations as the market value of collateral, if applicable. Actual results could differ from those estimates. These estimates and assumptions are reviewed periodically, and the effects of changes, if any, are reflected in the Consolidated Statement of Comprehensive Income in the period that they are determined. The Company reserved \$34.1 million and \$35.4 million for doubtful accounts as of December 31, 2014 and 2013, respectively.

Property, Plant and Equipment: Property, plant and equipment are stated at cost, less accumulated depreciation. Assets placed in service are recorded at cost and depreciated using the straight-line method over the estimated useful life of the asset except for leasehold improvements, which are depreciated over the shorter of their economic useful life or their lease term. The range of useful lives used to depreciate property, plant and equipment is as follows:

Buildings	10	to	50	years
Machinery and equipment	2	to	12	years
Software	2	to	7	years

Repair and maintenance costs that do not extend the useful life of the asset are charged against earnings as incurred. Major replacements and significant improvements that increase asset values and extend useful lives are capitalized. The Company assesses the recoverability of the carrying value of its property, plant and equipment whenever events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable. Recoverability is measured by a comparison of the carrying amount of an asset to the future net undiscounted cash flows expected to be generated by the asset. If the undiscounted cash flows are less than the carrying amount of the asset, an impairment loss is recognized for the amount by which the carrying value of the asset exceeds the fair value of the assets.

Goodwill and Intangible Assets: The Company records as goodwill the excess of the purchase price over the fair value of the net assets acquired.

In accordance with GAAP, goodwill and other indefinite-lived intangible assets are tested and reviewed annually for impairment during the fourth quarter or whenever there is a significant change in events or circumstances that indicate

that the fair value of the asset is more likely than not less than the carrying amount of the asset.

Recoverability of goodwill is measured at the reporting unit level and begins with a qualitative assessment to determine if it is more likely than not that the fair value of each reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test included in U.S. GAAP. For those reporting units where it is required, the first step compares the carrying amount of the reporting unit to its estimated fair value. If the estimated fair value of

F-10

Table of Contents

a reporting unit exceeds its carrying amount, goodwill of the reporting unit is not impaired and the second step of the impairment test is not necessary. To the extent that the carrying value of the reporting unit exceeds its estimated fair value, a second step is performed, wherein the reporting unit's carrying value of goodwill is compared to the implied fair value of goodwill. To the extent that the carrying value exceeds the implied fair value, impairment exists and must be recognized.

The calculation of estimated fair value is based on two valuation techniques, a discounted cash flow model (income approach) and a market adjusted multiple of earnings and revenues (market approach), with each method being equally weighted in the calculation. The implied fair value of goodwill is determined in the same manner as the amount of goodwill recognized in a business combination. The estimated fair value of the reporting unit is allocated to all of the assets and liabilities of the reporting unit (including any unrecognized intangible assets) as if the reporting unit had been acquired in a business combination and the fair value of the reporting unit, as determined in the first step of the goodwill impairment test, was the price paid to acquire that reporting unit.

Recoverability of other intangible assets with indefinite useful lives (i.e. Tradenames) is first assessed using a qualitative assessment to determine whether it is more likely than not that an indefinite-lived intangible asset is impaired. This assessment is used as a basis for determining whether it is necessary to calculate the fair value of an indefinite-lived intangible asset. For those indefinite-lived assets where it is required, a fair value is determined on a relief from royalty methodology (income approach) which is based on the implied royalty paid, at an appropriate discount rate, to license the use of an asset rather than owning the asset. The present value of the after-tax cost savings (i.e. royalty relief) indicates the estimated fair value of the asset. Any excess of the carrying value over the estimated fair value is recognized as an impairment loss equal to that excess.

Intangible assets such as patents, customer-related intangible assets and other intangible assets with finite useful lives are amortized on a straight-line basis over their estimated economic lives. The weighted-average useful lives approximate the following:

Customer relationships	20	years
Completed technology/patents	10	years
Other	20	years

Recoverability of intangible assets with finite useful lives is assessed in the same manner as property, plant and equipment as described above.

Income Taxes: Deferred tax assets and liabilities are determined based on temporary differences between financial reporting and tax bases of assets and liabilities, applying enacted tax rates expected to be in effect for the year in which the differences are expected to reverse. The Company recognizes future tax benefits, such as net operating losses and non-U.S. tax credits, to the extent that realizing these benefits is considered in its judgment to be more likely than not. The Company regularly reviews the recoverability of its deferred tax assets considering its historic profitability, projected future taxable income, timing of the reversals of existing temporary differences and the feasibility of its tax planning strategies. Where appropriate, the Company records a valuation allowance with respect to a future tax benefit.

Product Warranties: Standard product warranty accruals are recorded at the time of sale and are estimated based upon product warranty terms and historical experience. The Company assesses the adequacy of its liabilities and will make adjustments as necessary based on known or anticipated warranty claims, or as new information becomes available.

The Company's extended warranty liability represents the deferred revenue associated with its extended warranty contracts and is amortized into Revenue on a straight-line basis over the life of the contract, unless another method is more representative of the costs incurred. The Company assesses the adequacy of its liability by evaluating the expected costs under its existing contracts to ensure these expected costs do not exceed the extended warranty liability.

Treasury Stock: The Company, through one of its consolidated subsidiaries, has repurchased its common shares from time to time as authorized by the Board of Directors. These repurchases are at the discretion of management subject to market conditions, regulatory requirements and other considerations. Amounts are recorded at cost and included within the Equity section of the Consolidated Balance Sheet.

Revenue Recognition: Revenue is recognized and earned when all of the following criteria are satisfied: (a) persuasive evidence of a sales arrangement exists; (b) the price is fixed or determinable; (c) collectability is reasonably assured; and (d) delivery has occurred or service has been rendered. Delivery generally occurs when the title and the risks and rewards of ownership have substantially transferred to the customer. Both the persuasive evidence of a sales arrangement and fixed or determinable price criteria are deemed to be satisfied upon receipt of an executed and legally binding sales agreement or contract that clearly defines the terms and conditions of the transaction including the respective obligations of the parties. If the defined terms and conditions allow variability in all or a component of the price, revenue is not recognized until such time that the price becomes fixed or determinable. At the point of sale, the Company validates that existence of an enforceable claim that requires payment within a reasonable amount of time and assesses the collectability of that claim. If collectability is not deemed to be reasonably assured,

F-11

Table of Contents

then revenue recognition is deferred until such time that collectability becomes probable or cash is received. Delivery is not considered to have occurred until the customer has taken title and assumed the risks and rewards of ownership. Service and installation revenue are recognized when earned. In some instances, customer acceptance provisions are included in sales arrangements to give the buyer the ability to ensure the delivered product or service meets the criteria established in the order. In these instances, revenue recognition is deferred until the acceptance terms specified in the arrangement are fulfilled through customer acceptance or a demonstration that established criteria have been satisfied. If uncertainty exists about customer acceptance, revenue is not recognized until acceptance has occurred. The Company offers various sales incentive programs to customers, dealers, and distributors. Sales incentive programs do not preclude revenue recognition, but do require an accrual for the Company's best estimate of expected activity. Examples of the sales incentives that are accrued for as a contra receivable and sales deduction at the point of sale include, but are not limited to, discounts (i.e. net 30 type), coupons, and rebates where the customer does not have to provide any additional requirements to receive the discount. Sales returns and customer disputes involving a question of quantity or price are also accounted for as a reduction in revenue and a contra receivable. At December 31, 2014 and 2013, the Company had a customer claim accrual (contra receivable) of \$4.7 million and \$1.7 million, respectively. All other incentives or incentive programs where the customer is required to reach a certain sales level, remain a customer for a certain period of time, provide a rebate form or is subject to additional requirements are accounted for as a reduction of revenue and establishment of a liability. At December 31, 2014 and 2013, the Company had a sales incentive accrual of \$73.4 million and \$80.1 million, respectively. Each of these accruals represents the best estimate the Company expects to pay related to previously sold units. These estimates are reviewed regularly for appropriateness. If updated information or actual amounts are different from previous estimates, the revisions are included in the results for the period in which they become known. Historically, the aggregate differences, if any, between our estimates and actual amounts in any year have not had a material impact on the Consolidated Financial Statements.

The Company enters into maintenance and extended warranty contracts with customers. Revenue related to these services is recognized on a straight-line basis over the life of the contract, unless sufficient historical evidence indicates that the cost of providing these services is incurred on an other than straight-line basis. In these circumstances, revenue is recognized over the contract period in proportion to the costs expected to be incurred in performing the service.

The Company, primarily through its Climate segment, provides equipment (e.g. HVAC, controls), integrated solutions, and installation designed to customer specifications through construction-type contracts. The term of these types of contracts is typically less than one year, but can be as long as three years. Revenues related to these contracts are recognized using the percentage-of-completion method in accordance with GAAP. This measure of progress toward completion, utilized to recognize sales and profits, is based on the proportion of actual cost incurred to date as compared to the total estimate of contract costs at completion. The timing of revenue recognition often differs from the invoicing schedule to the customer, with revenue recognition in advance of customer invoicing recorded to unbilled accounts receivable and invoicing in advance of revenue recognition recorded to deferred revenue. At December 31, 2014, all recorded receivables (billed and unbilled) are due within one year. The Company re-evaluates its contract estimates periodically and reflects changes in estimates in the current period using the cumulative catch-up method. These periodic reviews have not historically resulted in significant adjustments. If estimated contract costs are in excess of contract revenues, then the excess costs are accrued.

The Company enters into sales arrangements that contain multiple elements, such as equipment, installation and service revenue. For multiple element arrangements, each element is evaluated to determine the separate units of accounting. The total arrangement consideration is then allocated to the separate units of accounting based on their relative selling price at the inception of the arrangement. The relative selling price is determined using vendor specific objective evidence (VSOE) of selling price, if it exists; otherwise, third-party evidence (TPE) of selling price is used. If neither VSOE nor TPE of selling price exists for a deliverable, a best estimate of the selling price is developed for that deliverable. The Company primarily utilizes VSOE to determine its relative selling price. The Company recognizes revenue for delivered elements when the delivered item has stand-alone value to the customer, the basic revenue recognition criteria have been met, and only customary refund or return rights related to the delivered

elements exist.

Environmental Costs: The Company is subject to laws and regulations relating to protecting the environment.

Environmental expenditures relating to current operations are expensed or capitalized as appropriate. Expenditures relating to existing conditions caused by past operations, which do not contribute to current or future revenues, are expensed. Liabilities for remediation costs are recorded when they are probable and can be reasonably estimated, generally no later than the completion of feasibility studies or the Company's commitment to a plan of action. The assessment of this liability, which is calculated based on existing technology, does not reflect any offset for possible recoveries from insurance companies, and is not discounted. Refer to Note 17 for further details of environmental matters.

Asbestos Matters: Certain wholly-owned subsidiaries of the Company are named as defendants in asbestos-related lawsuits in state and federal courts. The Company records a liability for its actual and anticipated future claims as well as an asset for anticipated insurance settlements. Asbestos related defense costs are excluded from the asbestos claims liability and are recorded separately as services are incurred. Although the Company was neither a manufacturer nor producer of asbestos, some of its formerly

F-12

Table of Contents

manufactured components from third party suppliers utilized asbestos-related components. As a result, amounts related to asbestos are recorded within Discontinued operations, net of tax, except for amounts related to Trane U.S. Inc. asbestos liabilities, which are recorded in Earnings from continuing operations. Refer to Note 17 for further details of asbestos-related matters.

Research and Development Costs: The Company conducts research and development activities for the purpose of developing and improving new products and services. These expenditures are expensed when incurred. For the years ended December 31, 2014, 2013 and 2012, these expenditures amounted to approximately \$212.3 million, \$218.2 million and \$235.4 million, respectively.

Software Costs: The Company capitalizes certain qualified internal-use software costs during the application development stage and subsequently amortizes those costs over the software's useful life, which ranges from 2 to 7 years. Refer to Note 4 for further details on software.

Employee Benefit Plans: The Company provides a range of benefits, including pensions, postretirement and postemployment benefits to eligible current and former employees. Determining the cost associated with such benefits is dependent on various actuarial assumptions, including discount rates, expected return on plan assets, compensation increases, employee mortality, turnover rates, and healthcare cost trend rates. Actuaries perform the required calculations to determine expense in accordance with GAAP. Actual results may differ from the actuarial assumptions and are generally accumulated into Accumulated other comprehensive income (loss) and amortized into Net earnings over future periods. The Company reviews its actuarial assumptions at each measurement date and makes modifications to the assumptions based on current rates and trends, if appropriate. Refer to Note 9 for further details on employee benefit plans.

Loss Contingencies: Liabilities are recorded for various contingencies arising in the normal course of business, including litigation and administrative proceedings, environmental matters, product liability, product warranty, worker's compensation and other claims. The Company has recorded reserves in the financial statements related to these matters, which are developed using input derived from actuarial estimates and historical and anticipated experience data depending on the nature of the reserve, and in certain instances with consultation of legal counsel, internal and external consultants and engineers. Subject to the uncertainties inherent in estimating future costs for these types of liabilities, the Company believes its estimated reserves are reasonable and does not believe the final determination of the liabilities with respect to these matters would have a material effect on the financial condition, results of operations, liquidity or cash flows of the Company for any year. Refer to Note 17 for further details on loss contingencies.

Derivative Instruments: The Company periodically enters into cash flow and other derivative transactions to specifically hedge exposure to various risks related to interest rates and currency rates. The Company recognizes all derivatives on the Consolidated Balance Sheet at their fair value as either assets or liabilities. For cash flow designated hedges, the effective portion of the changes in fair value of the derivative contract are recorded in Accumulated other comprehensive income (loss), net of taxes, and are recognized in Net earnings at the time earnings are affected by the hedged transaction. For other derivative transactions, the changes in the fair value of the derivative contract are immediately recognized in Net earnings. Refer to Note 8 for further details on derivative instruments.

Recent Accounting Pronouncements

Recently Adopted Accounting Pronouncements:

In February 2013, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2013-04, "Obligations Resulting from Joint and Several Liability Arrangements for Which the Total Amount of the Obligation Is Fixed at the Reporting Date." ASU 2013-04 provides guidance for the recognition, measurement, and disclosure of obligations resulting from joint and several liability arrangements where the total obligation is fixed at the reporting date, and for which no specific guidance currently exists. This new guidance became effective for annual reporting periods beginning on or after December 15, 2013 and subsequent interim periods. The revised requirements of ASU 2013-04 did not have an impact on the consolidated financial statements.

In March 2013, the FASB issued ASU 2013-05, "Parent's Accounting for the Cumulative Translation Adjustment upon Derecognition of Certain Subsidiaries or Groups of Assets within a Foreign Entity or of an Investment in a Foreign Entity." ASU 2013-05 clarifies the application of GAAP to the release of cumulative translation adjustments related to

changes of ownership in or within foreign entities, including step acquisitions. This new guidance became effective for annual reporting periods beginning on or after December 15, 2013 and subsequent interim periods. The Company will apply the new guidance, as applicable, to future derecognitions of certain subsidiaries or groups of assets within a Foreign Entity or of an Investment in foreign entities.

In July 2013, the FASB issued ASU 2013-11, "Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists." ASU 2013-11 clarifies guidance and eliminates diversity in practice on the presentation of unrecognized tax benefits when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists at the reporting date. This new guidance became effective for annual reporting periods beginning on or

Table of Contents

after December 15, 2013 and subsequent interim periods. The Company has applied the requirements of ASU 2013-11 prospectively in preparing the December 31, 2014 consolidated balance sheet, which resulted in a decrease to current and noncurrent deferred tax assets of \$21.9 million and \$10.0 million, respectively, an increase to noncurrent deferred tax liabilities of \$114.8 million and a decrease to noncurrent reserves for uncertain tax positions of \$146.7 million. Had the Company applied the requirements of ASU 2013-11 retrospectively to the December 31, 2013 consolidated balance sheet, the impact would have been a decrease to current and noncurrent deferred tax assets of \$22.6 million and \$20.7 million, respectively, an increase to noncurrent deferred tax liabilities of \$128.9 million and a decrease to noncurrent reserves for uncertain tax positions of \$172.2 million.

Recently Issued Accounting Pronouncements

In April 2014, the FASB issued ASU 2014-08, "Presentation of Financial Statements and Property, Plant, and Equipment - Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity." ASU 2014-08 provides new guidance related to the definition of a discontinued operation and requires new disclosures of both discontinued operations and certain other disposals that do not meet the definition of a discontinued operation. This new guidance is effective for annual periods beginning on or after December 15, 2014 and interim periods within those years. Beginning in 2015, the Company will apply the new guidance, as applicable, to future disposals of components or classifications as held for sale.

In May 2014, the FASB issued ASU 2014-09, "Revenue from Contracts with Customers." ASU 2014-09 provides new guidance related to how an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. In addition, ASU 2014-08 specifies new accounting for costs associated with obtaining or fulfilling contracts with customers and expands the required disclosures related to revenue and cash flows from contracts with customers. This new guidance is effective for fiscal years, and interim periods within those years, beginning after December 15, 2016, and can be adopted either retrospectively to each prior reporting period presented or as a cumulative-effect adjustment as of the date of adoption, with early application not permitted. The Company is currently determining its implementation approach and assessing the impact on the consolidated financial statements. In June 2014, the FASB issued ASU 2014-12 "Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period." ASU 2014-12 requires that a performance target that affects vesting, and that could be achieved after the requisite service period, be treated as a performance condition. As such, the performance target should not be reflected in estimating the grant date fair value of the award. This update further clarifies that compensation cost should be recognized in the period in which it becomes probable that the performance target will be achieved and should represent the compensation cost attributable to the period(s) for which the requisite service has already been rendered. The new guidance is effective for annual and interim reporting periods beginning after December 15, 2015, including interim periods within that reporting period. Early application is permitted. Beginning in 2015, the Company will apply the new guidance to future share-based payment arrangements, as applicable, and is not expected to have a significant impact on the consolidated financial statements.

In August 2014, the FASB issued ASU 2014-15, "Presentation of Financial Statements - Going Concern - Disclosures of Uncertainties about an entity's Ability to Continue as a Going Concern." ASU 2014-15 provides new guidance related to management's responsibility to evaluate whether there is substantial doubt about an entity's ability to continue as a going concern by incorporating and expanding upon certain principles that are currently in U.S. auditing standards and to provide related footnote disclosures. This new guidance is effective for the annual period ending after December 15, 2016, and for annual periods and interim periods thereafter. The requirements of ASU 2014-15 are not expected to have a significant impact on the consolidated financial statements.

NOTE 3 – INVENTORIES

At December 31, the major classes of inventory were as follows:

In millions	2014	2013
Raw materials	\$487.9	\$378.0
Work-in-process	118.2	100.7
Finished goods	823.1	760.2

	1,429.2	1,238.9	
LIFO reserve	(70.3	) (72.8	)
Total	\$1,358.9	\$1,166.1	

F-14

Table of Contents**NOTE 4 – PROPERTY, PLANT AND EQUIPMENT**

At December 31, the major classes of property, plant and equipment were as follows:

In millions	2014	2013
Land	\$62.9	\$64.2
Buildings	674.8	654.8
Machinery and equipment	1,647.8	1,612.0
Software	618.7	511.3
	3,004.2	2,842.3
Accumulated depreciation	(1,527.2	) (1,373.9
Total	\$1,477.0	\$1,468.4

Depreciation expense for the years ended December 31, 2014, 2013 and 2012 was \$199.9 million, \$199.5 million and \$194.5 million, which include amounts for software amortization of \$40.1 million, \$44.3 million and \$48.5 million, respectively.

NOTE 5 – GOODWILL

The changes in the carrying amount of Goodwill are as follows:

In millions	Climate	Industrial	Total
December 31, 2012 (gross)	\$7,619.9	\$368.7	\$7,988.6
Acquisitions and adjustments	(1.1	) 1.1	—
Currency translation	44.8	3.2	48.0
December 31, 2013 (gross)	7,663.6	373.0	8,036.6
Acquisitions and adjustments *	13.8	2.7	16.5
Currency translation	(158.5	) (8.8	) (167.3
December 31, 2014 (gross)	7,518.9	366.9	7,885.8
Accumulated impairment **	(2,496.0	) —	(2,496.0
Goodwill (net)	\$5,022.9	\$366.9	\$5,389.8

* Increase is primarily related to a \$15.0 million acquisition in March of 2014 within the Climate segment and a \$3.0 million acquisition in August of 2014 within the Industrial segment.

** Accumulated impairment relates to a charge of \$2,496.0 million recorded in the fourth quarter of 2008 as a result of the Company's annual impairment testing.

The Company records as goodwill the excess of the purchase price over the fair value of the net assets acquired.

In accordance with the Company's goodwill impairment testing policy outlined in Note 2, the Company performed its annual impairment test on goodwill in the fourth quarter of each 2014, 2013, and 2012. In each year, the Company determined that the fair values of all identified reporting units exceeded their respective carrying values. Therefore, no impairment charges were recorded during 2014, 2013, and 2012.

Table of Contents

NOTE 6 – INTANGIBLE ASSETS

The following table sets forth the gross amount and related accumulated amortization of the Company's intangible assets at December 31:

In millions	2014 Gross carrying amount	Accumulated amortization	Net carrying amount	2013 Gross carrying amount	Accumulated amortization	Net carrying amount
Completed technologies/patents	\$172.2	\$(146.8)	) \$25.4	\$174.1	\$(128.7)	) \$45.4
Customer relationships	1,850.6	(699.8)	) 1,150.8	1,865.9	(599.5)	) 1,266.4
Other	55.9	(50.2)	) 5.7	60.4	(52.2)	) 8.2
Total finite-lived intangible assets	2,078.7	\$(896.8)	) 1,181.9	2,100.4	\$(780.4)	) 1,320.0
Trademarks (indefinite-lived)	2,602.0		2,602.0	2,602.0		2,602.0
Total	\$4,680.7		\$3,783.9	\$4,702.4		\$3,922.0

The Company amortizes intangible assets with finite useful lives on a straight-line basis over their estimated economic lives in accordance with GAAP. Indefinite-lived intangible assets are not subject to amortization, but instead, are tested for impairment at least annually (more frequently if certain indicators are present).

Intangible asset amortization expense for 2014, 2013 and 2012 was \$128.3 million, \$128.9 million and \$129.2 million, respectively. Future estimated amortization expense on existing intangible assets in each of the next five years amounts to approximately \$116 million for 2015, \$101 million for 2016, \$101 million for 2017, \$100 million for 2018, and \$99 million for 2019.

In accordance with the Company's indefinite-lived intangible asset impairment testing policy outlined in Note 2, the Company performed its annual impairment test in the fourth quarter of each 2014, 2013 and 2012. In each year, the Company determined the fair value of all indefinite-lived intangible assets to exceed their respective carrying values. Therefore, no impairment charges were recorded during 2014, 2013 and 2012.

NOTE 7 – DEBT AND CREDIT FACILITIES

At December 31, short-term borrowings and current maturities of long-term debt consisted of the following:

In millions	2014	2013
Debentures with put feature	\$343.0	\$343.0
Other current maturities of long-term debt	23.6	8.0
Short-term borrowings	116.1	16.7
Total	\$482.7	\$367.7

The weighted-average interest rate for total short-term borrowings and current maturities of long-term debt at December 31, 2014 and 2013 was 5.2% and 6.5%, respectively.

Table of Contents

At December 31, long-term debt excluding current maturities consisted of:

In millions	2014	2013
5.500% Senior notes due 2015	\$—	\$198.1
4.750% Senior notes due 2015	—	299.8
6.875% Senior notes due 2018	749.6	749.5
2.875% Senior notes due 2019	349.6	349.5
2.625% Senior notes due 2020	299.8	—
9.000% Debentures due 2021	125.0	125.0
4.250% Senior notes due 2023	698.9	698.8
7.200% Debentures due 2014-2025	75.0	82.5
3.550% Senior notes due 2024	497.2	—
6.48% Debentures due 2025	149.7	149.7
5.750% Senior notes due 2043	498.0	498.0
4.650% Senior notes due 2044	298.2	—
Other loans and notes, at end-of-year average interest rates of 1.08% in 2014 and 3.01% in 2013, maturing in various amounts to 2019	0.7	2.6
Total	\$3,741.7	\$3,153.5

At December 31, 2014, long-term debt retirements are as follows:

In millions	
2015	\$366.6
2016	7.8
2017	7.7
2018	757.3
2019	357.2
Thereafter	2,611.7
Total	\$4,108.3

Commercial Paper Program

The maximum aggregate amount of unsecured commercial paper notes available to be issued, on a private placement basis, under the commercial paper program is \$2 billion as of December 31, 2014. Under the commercial paper program, the Company may issue notes from time to time through Ingersoll-Rand Global Holding Company Limited (IR-Global) or Ingersoll-Rand Luxembourg Finance S.A. (IR-Lux), and the proceeds of the financing will be used for general corporate purposes. Each of IR-Ireland, Ingersoll-Rand Company Limited (IR-Limited), Ingersoll-Rand International Holding Limited (IR-International), Ingersoll-Rand Global Holding Company Limited (IR-Global) and Ingersoll-Rand New Jersey (IR-New Jersey) provided irrevocable and unconditional guarantees for the notes issued under the commercial paper program. The Company had \$100.0 million of commercial paper outstanding at December 31, 2014. No commercial paper was outstanding at December 31, 2013.

Debentures with Put Feature

At December 31, 2014 and December 31, 2013, the Company had outstanding \$343.0 million of fixed rate debentures which only require early repayment at the option of the holder. These debentures contain a put feature that the holders may exercise on each anniversary of the issuance date. If exercised, the Company is obligated to repay in whole or in part, at the holder's option, the outstanding principal amount (plus accrued and unpaid interest) of the debentures held by the holder. If these options are not exercised, the final maturity dates would range between 2027 and 2028.

Holders of these debentures had the option to exercise the put feature on \$37.2 million of the outstanding debentures in February 2014, subject to the notice requirement. No exercises were made. Holders of the remaining \$305.8 million in outstanding debentures had the option to exercise the put feature, subject to the notice requirement, in November 2014. No material exercises were made.

Senior Notes due 2020, 2024, and 2044

In October 2014, we issued \$1.1 billion principal amount of Senior Notes in three tranches through a newly-created wholly-owned subsidiary, Ingersoll-Rand Luxembourg Finance S.A. (IR-Lux). The tranches consist of \$300 million

of 2.625% Senior Notes due in 2020, \$500 million of 3.55% Senior Notes due 2024, and \$300 million of 4.65% Senior Notes due in 2044. The notes are fully

F-17

Table of Contents

and unconditionally guaranteed by each of IR-Ireland, Ingersoll-Rand Company Limited (IR-Limited), Ingersoll-Rand International Holding Limited (IR-International), Ingersoll-Rand New Jersey (IR-New Jersey) and Ingersoll-Rand Global Holding Company Limited (IR-Global). The Company has the option to redeem the notes in whole or in part at any time, prior to their stated maturity date at redemption prices set forth in the indenture agreement. The notes are subject to certain customary covenants, however, none of these covenants are considered restrictive to the Company's operations.

The proceeds from the notes were primarily used to (i) fund the October 2014 redemption of the \$200 million of 5.50% Notes due 2015 and \$300 million 4.75% Senior Notes due 2015, and (ii) fund the previously announced acquisition of Cameron International Corporation's Centrifugal compression division on January 1, 2015. Related to the redemption, the Company recognized \$10.2 million of premium expense in Interest expense.

Senior Notes due 2019, 2023, and 2043

In June 2013, we issued \$1.55 billion principal amount of Senior Notes in three tranches through our wholly-owned subsidiary, IR-Global pursuant to Rule 144A of the Securities Act. The tranches consist of \$350 million of 2.875% Senior Notes due in 2019, \$700 million of 4.250% Senior Notes due in 2023, and \$500 million of 5.750% Senior Notes due in 2043. The notes are fully and unconditionally guaranteed by each of IR-Ireland, IR-Limited, IR-International and IR-Lux. Later in 2013, the notes were modified to include IR-New Jersey as co-obligor. Interest on the notes is paid twice a year in arrears. The Company has the option to redeem the notes in whole or in part at any time, prior to their stated maturity date at redemption prices set forth in the indenture agreement. The notes are subject to certain customary covenants, however, none of these covenants are considered restrictive to the Company's operations.

The proceeds from these notes were primarily used to fund the July 2013 redemption of \$600 million of 6.000% Senior Notes due 2013 and \$655 million of 9.500% Senior Notes due 2014 and to fund expenses related to the spin-off of the commercial and residential security businesses. The July 2013 redemption resulted in \$45.6 million of premium expense, which was recorded in 2013 in Interest expense.

In connection with the issuance of each series of notes, IR-Global, the Guarantors and the initial purchasers of the notes entered into a Registration Rights Agreement. Each Registration Rights Agreement required IR-Global and the Guarantors to use their commercially reasonable efforts to execute an effective exchange offer registration statement with the SEC no later than 365 days after the closing date of the notes offering and to complete an exchange offer within 30 business days of such effective date. The Company filed its exchange offer in April 2014, and in June 2014, completed the exchange of the notes for registered notes having terms identical in all material respects to the private notes, except that the registered notes do not contain terms with respect to transfer restrictions, registration rights or additional interest for failure to observe certain obligations in the applicable registration rights agreement.

Other Credit Facilities

On March 20, 2014, the Company entered into an unsecured 5-year, \$1.0 billion revolving credit facility through our wholly-owned subsidiary, IR-Global. The credit facility matures in March 2019. In connection with the entry into this credit facility, the Company's existing 4-year, \$1.0 billion revolving credit facility, due to expire in May 2015, was terminated. The Company also has a 5-year, \$1.0 billion revolving credit facility through IR-Global that matures in March 2017. During the fourth quarter of 2014, both credit agreements were amended to include IR-Lux as an additional borrower.

IR-Ireland, IR-Limited, IR-International, IR-New Jersey, IR-Global and IR-Lux have each provided irrevocable and unconditional guarantees for these credit facilities. The total committed revolving credit facilities of \$2.0 billion are unused and provide support for the Company's commercial paper program, as well as other general corporate purposes.

The Company also has various non-U.S. lines of credit that provide aggregate borrowing capacity of \$847.4 million, of which \$610.2 million was unused at December 31, 2014. These lines provide support for bank guarantees, letters of credit and other general corporate purposes.

Fair Value of Debt

The carrying value of the Company's short-term borrowings is a reasonable estimate of fair value due to the short-term nature of the instruments. The Company measures the fair value of its long-term debt instruments based upon

observable market prices quoted on public exchanges for similar assets. These fair value inputs are considered Level 2 within the fair value hierarchy discussed in Note 9. The methodologies used by the Company to determine the fair value of its long-term debt instruments at December 31, 2014 are the same as those used at December 31, 2013. There have been no transfers between levels of the fair value hierarchy. The fair value of the Company's debt instruments at December 31, 2014 and December 31, 2013 was \$4,661.4 million and \$3,803.8 million, respectively.

Guarantees

Along with IR-Ireland, certain of our 100% directly or indirectly owned subsidiaries have fully and unconditionally guaranteed, on a joint and several basis, public debt issued by other 100% directly or indirectly owned subsidiaries. Refer to Note 19 for our current guarantor structure.

Table of Contents

NOTE 8 – FINANCIAL INSTRUMENTS

In the normal course of business, the Company may use various financial instruments, including derivative instruments, to manage the risks associated with interest rate and currency rate exposures. These financial instruments are not used for trading or speculative purposes.

On the date a derivative contract is entered into, the Company designates the derivative instrument as a cash flow hedge of a forecasted transaction or as an undesignated derivative. The Company formally documents its hedge relationships, including identification of the derivative instruments and the hedged items, as well as its risk management objectives and strategies for undertaking the hedge transaction. This process includes linking derivative instruments that are designated as hedges to specific assets, liabilities or forecasted transactions.

The fair market value of derivative instruments is determined through market-based valuations and may not be representative of the actual gains or losses that will be recorded when these instruments mature due to future fluctuations in the markets in which they are traded.

The Company assesses at inception and at least quarterly thereafter, whether the derivatives used in cash flow hedging transactions are highly effective in offsetting the changes in the cash flows of the hedged item. To the extent the derivative is deemed to be a highly effective hedge, the fair market value changes of the instrument are recorded to Accumulated other comprehensive income (AOCI).

Any ineffective portion of a derivative instrument's change in fair value is recorded in Net earnings in the period of change. If the hedging relationship ceases to be highly effective, or it becomes probable that a forecasted transaction is no longer expected to occur, the hedging relationship will be undesignated and any future gains and losses on the derivative instrument will be recorded in Net earnings.

Currency Hedging Instruments

The notional amount of the Company's currency derivatives was \$776.7 million and \$1,510.0 million at December 31, 2014 and 2013, respectively. At December 31, 2014 and 2013, a loss of \$1.9 million and \$3.1 million, net of tax, respectively, was included in AOCI related to the fair value of the Company's currency derivatives designated as accounting hedges. The amount expected to be reclassified into Net earnings over the next twelve months is a loss of \$1.9 million. The actual amounts that will be reclassified to Net earnings may vary from this amount as a result of changes in market conditions. Gains and losses associated with the Company's currency derivatives not designated as hedges are recorded in Net earnings as changes in fair value occur. At December 31, 2014, the maximum term of the Company's currency derivatives was approximately 12 months.

Other Derivative Instruments

The Company has utilized forward-starting interest rate swaps and interest rate locks to manage interest rate exposure in periods prior to the anticipated issuance of fixed-rate debt. These instruments have been designated as cash flow hedges. Consequently, when the contracts were settled upon the issuance of the underlying debt, any realized gains or losses in the fair values of the instruments were initially deferred into Accumulated other comprehensive income. These deferred gains or losses are subsequently recognized into Interest expense over the term of the related notes. The net unrecognized gain in AOCI was \$4.9 million and \$2.7 million at December 31, 2014 and 2013. The deferred gain at December 31, 2014 will be amortized over the term of notes with maturities ranging from 2018 to 2044. The amount expected to be amortized over the next twelve months is \$0.5 million. There were no forward-starting interest rate swaps or interest rate lock contracts outstanding at December 31, 2014 or 2013.

Fair Value Measurements

The Company measures the fair value of its derivative instruments on a recurring basis using a pricing model that employs spot rates and forward prices from actively quoted currency markets that are readily accessible and observable. These fair value inputs are considered Level 2 within the fair value hierarchy discussed in Note 9. The methodologies used by the Company to determine the fair value of its derivative instruments at December 31, 2014 are the same as those used at December 31, 2013. There have been no transfers between levels of the fair value hierarchy.

Table of Contents

The fair values of derivative instruments included within the Consolidated Balance Sheet as of December 31 were as follows:

In millions	Asset derivatives		Liability derivatives	
	2014	2013	2014	2013
Derivatives designated as hedges:				
Currency derivatives	\$0.3	\$0.1	\$3.2	\$3.4
Derivatives not designated as hedges:				
Currency derivatives	1.3	3.1	10.1	13.6
Total derivatives	\$1.6	\$3.2	\$13.3	\$17.0

Asset and liability derivatives included in the table above are recorded within Other current assets and Accrued expenses and other current liabilities, respectively.

The amounts associated with derivatives designated as hedges affecting Net earnings and AOCI for the years ended December 31 were as follows:

In millions	Amount of gain (loss) recognized in AOCI			Location of gain (loss) reclassified from AOCI and recognized into Net earnings	Amount of gain (loss) reclassified from AOCI and recognized into Net earnings		
	2014	2013	2012		2014	2013	2012
Currency derivatives - continuing	\$(3.0)	\$(9.8)	\$(6.1)	Cost of goods sold	\$(3.4)	\$(10.8)	\$0.4
Currency derivatives - discontinued	—	2.0	(1.1)	Discontinued operations	—	1.1	(0.2)
Interest rate swaps & locks	(0.1)	10.5	—	Interest expense	(2.3)	(2.4)	(3.0)
Total	\$(3.1)	\$2.7	\$(7.2)		\$(5.7)	\$(12.1)	\$(2.8)

The amounts associated with derivatives not designated as hedges affecting Net earnings for the years ended December 31 were as follows:

In millions	Location of gain (loss) recognized in Net earnings	Amount of gain (loss) recognized in Net earnings		
		2014	2013	2012
Currency derivatives	Other, net	\$(31.5)	\$(42.2)	\$28.5
Total		\$(31.5)	\$(42.2)	\$28.5

The gains and losses associated with the Company's undesignated currency derivatives are materially offset in Net earnings by changes in the fair value of the underlying transactions.

Concentration of Credit Risk

The counterparties to the Company's forward contracts consist of a number of investment grade major international financial institutions. The Company could be exposed to losses in the event of nonperformance by the counterparties. However, the credit ratings and the concentration of risk in these financial institutions are monitored on a continuous basis and present no significant credit risk to the Company.

Fair Value of Other Financial Instruments

The carrying value of cash and cash equivalents, accounts receivable and accounts payable are a reasonable estimate of their fair value due to the short-term nature of these instruments. See Note 7 for a discussion of the fair value measurement of the Company's debt instruments and Note 9 for a discussion of the fair value measurement of the Company's pension assets and liabilities.

NOTE 9 – PENSIONS AND POSTRETIREMENT BENEFITS OTHER THAN PENSIONS

The Company sponsors several U.S. defined benefit and defined contribution plans covering substantially all of our U.S. employees. Additionally, the Company has many non-U.S. defined benefit and defined contribution plans covering eligible non-U.S. employees. Postretirement benefits, other than pensions, provide healthcare benefits, and in some instances, life insurance benefits for certain eligible employees.

Pension Plans

The noncontributory defined benefit pension plans covering non-collectively bargained U.S. employees provide benefits on a final average pay formula while plans for most collectively bargained U.S. employees provide benefits on a flat dollar benefit formula or a percentage of pay formula. The non-U.S. pension plans generally provide benefits based on earnings and years of service. The Company also maintains additional other supplemental plans for officers and other key or highly compensated employees.

F-20

Table of Contents

In connection with the 2013 spin-off, the Company transferred its obligations for pension benefits for all current and former employees of the commercial and residential security businesses to Allegion. The transfer of these obligations reduced our pension liabilities by \$631.1 million, pension assets by \$543.5 million, and accumulated other comprehensive losses by \$164.8 million.

On June 8, 2012, the Board of Directors approved amendments to the Company's retirement plans for certain U.S. and Puerto Rico non-bargained employees. Eligible non-bargained employees hired prior to July 1, 2012 were given a choice of remaining in their respective defined benefit plan until the plan freezes on December 31, 2022 or freezing their accrued benefits in their respective defined benefit plan as of December 31, 2012 and receiving an additional 2% non-matching Company contribution into the Company's applicable defined contribution plan. Eligible employees hired or rehired on or after July 1, 2012 will automatically receive the 2% non-matching Company contribution into the applicable defined contribution plan in lieu of participating in the defined benefit plan. Beginning January 1, 2023, all eligible employees will receive the 2% non-matching contribution into the applicable defined contribution plan.

As a result of these changes, the Company's projected benefit obligations for the amended plans were remeasured as of June 8, 2012, which included updating the discount rate assumption to 4.00% from the 4.25% assumed at December 31, 2011. The amendments resulted in a 2012 curtailment loss of \$4.0 million. The amendment and remeasurement resulted in an increase of \$1.0 million to the projected benefit obligation, an increase of \$29.4 million to the plan assets, an actuarial gain of \$28.4 million and a credit of \$4.0 million to prior service cost during 2012.

The following table details information regarding the Company's pension plans at December 31:

In millions	2014	2013
Change in benefit obligations:		
Benefit obligation at beginning of year	\$3,333.2	\$4,228.6
Service cost	68.7	88.5
Interest cost	147.2	156.9
Employee contributions	1.2	1.5
Amendments	9.2	1.2
Actuarial (gains) losses	448.3	(314.4)
Benefits paid	(215.3)	(211.6)
Currency translation	(57.8)	19.5
Curtailments and settlements	(4.1)	(3.7)
Impact of spin-off	—	(631.1)
Other, including expenses paid	(11.0)	(2.2)
Benefit obligation at end of year	\$3,719.6	\$3,333.2
Change in plan assets:		
Fair value at beginning of year	\$2,779.2	\$3,310.2
Actual return on assets	395.2	98.9
Company contributions	116.5	109.7
Employee contributions	1.2	1.5
Benefits paid	(215.3)	(211.6)
Currency translation	(43.1)	17.7
Settlements	(4.1)	(1.6)
Impact of spin-off	—	(543.5)
Other, including expenses paid	(11.0)	(2.1)
Fair value of assets end of year	\$3,018.6	\$2,779.2
Net unfunded liability	\$(701.0)	\$(554.0)
Amounts included in the balance sheet:		
Other noncurrent assets	\$11.5	\$4.3
Accrued compensation and benefits	(11.3)	(30.8)
Postemployment and other benefit liabilities	(701.2)	(527.5)
Net amount recognized	\$(701.0)	\$(554.0)

It is the Company's objective to contribute to the pension plans to ensure adequate funds, and no less than required by law, are available in the plans to make benefit payments to plan participants and beneficiaries when required. However, certain plans are

F-21

Table of Contents

not or cannot be funded due to either legal, accounting, or tax requirements in certain jurisdictions. As of December 31, 2014, approximately six percent of our projected benefit obligation relates to plans that cannot be funded.

The pretax amounts recognized in Accumulated other comprehensive income (loss) are as follows:

In millions	Prior service cost	Net actuarial losses	Total
December 31, 2013	\$(17.7	) \$(849.1	) \$(866.8)
Current year changes recorded to Accumulated other comprehensive income (loss)	(9.2	) (209.2	) (218.4)
Amortization reclassified to earnings	4.4	36.1	40.5
Settlements/curtailments reclassified to earnings	—	7.1	7.1
Currency translation and other	0.2	15.7	15.9
December 31, 2014	\$(22.3	) \$(999.4	) \$(1,021.7)

Weighted-average assumptions used to determine the benefit obligation at December 31 are as follows:

	2014	2013
Discount rate:		
U.S. plans	3.75	% 4.75 %
Non-U.S. plans	3.25	% 4.25 %
Rate of compensation increase:		
U.S. plans	4.00	% 4.00 %
Non-U.S. plans	4.00	% 4.25 %

The accumulated benefit obligation for all defined benefit pension plans was \$3,568.5 million and \$3,194.8 million at December 31, 2014 and 2013, respectively. The projected benefit obligation, accumulated benefit obligation, and fair value of plan assets for pension plans with accumulated benefit obligations more than plan assets were \$3,244.3 million, \$3,115.2 million and \$2,536.2 million, respectively, as of December 31, 2014, and \$3,291.3 million, \$3,159.3 million and \$2,735.5 million, respectively, as of December 31, 2013.

Pension benefit payments are expected to be paid as follows:

In millions	
2015	\$207.8
2016	208.4
2017	212.4
2018	222.2
2019	222.4
2020 — 2024	1,164.6

Table of Contents

The components of the Company's net periodic pension benefit costs for the years ended December 31 include the following:

In millions	2014	2013	2012
Service cost	\$68.7	\$88.5	\$96.8
Interest cost	147.2	156.9	163.6
Expected return on plan assets	(156.1	) (166.3	) (173.6
Net amortization of:			
Prior service costs	4.4	4.7	5.1
Plan net actuarial losses	36.1	63.0	60.6
Net periodic pension benefit cost	100.3	146.8	152.5
Net curtailment and settlement (gains) losses	7.1	0.7	4.9
Net periodic pension benefit cost after net curtailment and settlement (gains) losses	\$107.4	\$147.5	\$157.4
Amounts recorded in continuing operations	\$100.2	\$119.2	\$125.5
Amounts recorded in discontinued operations	7.2	28.3	31.9
Total	\$107.4	\$147.5	\$157.4

The curtailment and settlement losses in 2014 are associated with lump sum distributions under supplemental benefit plans for officers and other key employees. The curtailment and settlement losses in 2012 are associated with the amendments to the pension plans and lump sum distributions under the supplemental benefit plans for officers and other key employees.

Pension expense for 2015 is projected to be approximately \$113.5 million, utilizing the assumptions for calculating the pension benefit obligations at the end of 2014. The amounts expected to be recognized in net periodic pension cost during the year ended 2015 for prior service cost and plan net actuarial losses are \$3.3 million and \$62.1 million, respectively.

Weighted-average assumptions used to determine net periodic pension cost for the years ended December 31 are as follows:

	2014	2013	2012
Discount rate:			
U.S. plans			
For the period January 1 to June 7	4.75	% 3.75	% 4.25
For the period June 8 to November 30	4.75	% 3.75	% 4.00
For the period December 1 to December 31	4.75	% 4.50	% 4.00
Non-U.S. plans	4.25	% 4.25	% 5.00
Rate of compensation increase:			
U.S. plans	4.00	% 4.00	% 4.00
Non-U.S. plans	4.25	% 4.00	% 4.00
Expected return on plan assets:			
U.S. plans	6.00	% 5.25	% 5.75
Non-U.S. plans	5.00	% 5.00	% 5.75

The expected long-term rate of return on plan assets reflects the average rate of returns expected on the funds invested or to be invested to provide for the benefits included in the projected benefit obligation. The expected long-term rate of return on plan assets is based on what is achievable given the plan's investment policy, the types of assets held and target asset allocations. The expected long-term rate of return is determined as of the measurement date. The Company reviews each plan and its historical returns and target asset allocations to determine the appropriate expected long-term rate of return on plan assets to be used.

The Company's objective in managing its defined benefit plan assets is to ensure that all present and future benefit obligations are met as they come due. It seeks to achieve this goal while trying to mitigate volatility in plan funded status, contribution, and expense by better matching the characteristics of the plan assets to that of the plan liabilities. The Company utilizes a dynamic approach to asset allocation whereby a plan's allocation to fixed income assets

increases as the plan's funded status improves. The Company monitors plan funded status and asset allocation regularly in addition to investment manager performance.

F-23

Table of Contents

Fair Value Measurements

Fair value is defined as the exchange price that would be received to sell an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Fair value measurements are based on a framework that utilizes the inputs market participants use to determine the fair value of an asset or liability and establishes a fair value hierarchy to prioritize those inputs. The fair value hierarchy is comprised of three levels that are described below:

Level 1 - Inputs based on quoted prices in active markets for identical assets or liabilities.

Level 2 - Inputs other than Level 1 quoted prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the asset or liability.

Level 3 - Unobservable inputs based on little or no market activity and that are significant to the fair value of the assets and liabilities.

The fair value hierarchy requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. Observable inputs are obtained from independent sources and can be validated by a third party, whereas unobservable inputs reflect assumptions regarding what a third party would use in pricing an asset or liability based on the best information available under the circumstances. A financial instrument's categorization within the fair value hierarchy is based upon the lowest level of input that is significant to the fair value measurement.

F-24

Table of Contents

The fair values of the Company's pension plan assets at December 31, 2014 by asset category are as follows:

In millions	Fair value measurements			Total fair value

(g) Includes an estimated \$20.0 million payable to Allegion in accordance with the terms of the Employee Matters Agreement.

Table of Contents

Cash equivalents are valued using a market approach with inputs including quoted market prices for either identical or similar instruments. Fixed income securities are valued through a market approach with inputs including, but not limited to, benchmark yields, reported trades, broker quotes and issuer spreads. Commingled funds are valued at their daily net asset value (NAV) per share or the equivalent. NAV per share or the equivalent is used for fair value purposes as a practical expedient. NAVs are calculated by the investment manager or sponsor of the fund. Private real estate fund values are reported by the fund manager and are based on valuation or appraisal of the underlying investments.

The methodologies used by the Company to determine the fair value of its financial assets and liabilities at December 31, 2014 are the same as those used at December 31, 2013. There have been no significant transfers between levels of the fair value hierarchy.

The Company made required and discretionary contributions to its pension plans of \$116.5 million in 2014, \$109.7 million in 2013, and \$89.1 million in 2012. The Company currently projects that it will contribute approximately \$59.9 million to its plans worldwide in 2015. The Company's policy allows it to fund an amount, which could be in excess of or less than the pension cost expensed, subject to the limitations imposed by current tax regulations. The Company anticipates funding the plans in 2015 in accordance with contributions required by funding regulations or the laws of each jurisdiction.

Most of the Company's U.S. employees are covered by defined contribution plans. Employer contributions are determined based on criteria specific to the individual plans and amounted to approximately \$88.7 million, \$89.0 million, and \$76.8 million in 2014, 2013 and 2012, respectively. The Company's contributions relating to non-U.S. defined contribution plans and other non-U.S. benefit plans were \$32.1 million, \$33.8 million and \$27.1 million in 2014, 2013 and 2012, respectively.

Multiemployer Pension Plans

The Company also participates in a number of multiemployer defined benefit pension plans related to collectively bargained U.S. employees of Trane. The Company's contributions, and the administration of the fixed retirement payments, are determined by the terms of the related collective-bargaining agreements. These multiemployer plans pose different risks to the Company than single-employer plans, including:

1. The Company's contributions to multiemployer plans may be used to provide benefits to all participating employees of the program, including employees of other employers.
2. In the event that another participating employer ceases contributions to a plan, the Company may be responsible for any unfunded obligations along with the remaining participating employers.
3. If the Company chooses to withdraw from any of the multiemployer plans, the Company may be required to pay a withdrawal liability, based on the underfunded status of the plan.

As of December 31, 2014, the Company does not participate in any plans that are individually significant, nor is the Company an individually significant participant to any of these plans. Total contributions to multiemployer plans for the years ended December 31 were as follows:

In millions	2014	2013	2012
Total contributions	\$6.3	\$5.4	\$5.4

Contributions to these plans may increase in the event that any of these plans are underfunded.

Postretirement Benefits Other Than Pensions

The Company sponsors several postretirement plans that provide for healthcare benefits, and in some instances, life insurance benefits that cover certain eligible employees. These plans are unfunded and have no plan assets, but are instead funded by the Company on a pay-as-you-go basis in the form of direct benefit payments. Generally, postretirement health benefits are contributory with contributions adjusted annually. Life insurance plans for retirees are primarily noncontributory.

In connection with the 2013 spin-off, the Company transferred its obligations for post retirement benefits other than pension for all current and former employees of the commercial and residential security businesses to Allegion. The transfer of these obligations reduced our post retirement plan liabilities by \$14.1 million, and increased our accumulated other comprehensive income by \$5.6 million.

The Board of Directors approved amendments on February 1, 2012 to its postretirement medical plan with respect to post-65 retiree medical coverage. Effective January 1, 2013, the Company discontinued offering company-sponsored retiree medical coverage for certain individuals age 65 and older. The Company transitioned affected individuals to coverage through the individual Medicare market and will provide a tax-advantaged subsidy to those retirees eligible for subsidized company coverage that can be used toward reimbursing premiums and other qualified medical expenses for individual Medicare supplemental coverage that is purchased through our third-party Medicare coordinator. As a result of these changes, the Company's projected benefit obligations were remeasured as of February 1, 2012, which included updating the discount rate assumption to 3.75% from the 4.00% assumed at December 31, 2011. The remeasurement resulted in a decrease of \$40.5 million to the projected benefit obligation, an actuarial loss of \$21.3 million and a credit of \$61.8 million to prior service cost.

F-27

Table of Contents

The following table details changes in the Company's postretirement plan benefit obligations for the years ended December 31:

In millions	2014	2013
Benefit obligation at beginning of year	\$713.3	\$851.4
Service cost	5.1	6.6
Interest cost	28.1	26.0
Plan participants' contributions	11.4	11.2
Actuarial (gains) losses	11.7	(109.8)
Benefits paid, net of Medicare Part D subsidy *	(67.8)	(56.4)
Impact of spin-off	—	(14.1)
Other	(1.1)	(1.6)
Benefit obligations at end of year	\$700.7	\$713.3

* Amounts are net of Medicare Part D subsidy of \$0.1 million and \$12.8 million in 2014 and 2013, respectively

The benefit plan obligations are reflected in the Consolidated Balance Sheets as follows:

In millions	December 31, 2014	December 31, 2013
Accrued compensation and benefits	\$(58.5)	\$(65.2)
Postemployment and other benefit liabilities	(642.2)	(648.1)
Total	\$(700.7)	\$(713.3)

The pre-tax amounts recognized in Accumulated other comprehensive income (loss) were as follows:

In millions	Prior service gains	Net actuarial losses	Total
Balance at December 31, 2013	\$39.4	\$(62.3)	\$(22.9)
Gain (loss) in current period	—	(11.7)	(11.7)
Amortization reclassified to earnings	(8.9)	—	(8.9)
Currency translation and other	—	0.2	0.2
Balance at December 31, 2014	\$30.5	\$(73.8)	\$(43.3)

The components of net periodic postretirement benefit (income) cost for the years ended December 31 were as follows:

In millions	2014	2013	2012
Service cost	\$5.1	\$6.6	\$7.3
Interest cost	28.1	26.0	30.8
Net amortization of:			
Prior service gains	(8.9)	(10.3)	(10.3)
Net actuarial losses	—	6.5	7.3
Net periodic postretirement benefit cost	\$24.3	\$28.8	\$35.1
Amounts recorded in continuing operations	\$16.2	\$19.8	\$22.2
Amounts recorded in discontinued operations	8.1	9.0	12.9
Total	\$24.3	\$28.8	\$35.1

Postretirement cost for 2015 is projected to be \$19.8 million. The amount expected to be recognized in net periodic postretirement benefits cost in 2015 for prior service gains is \$8.9 million.

Table of Contents

Weighted-average assumptions used to determine net periodic benefit cost for the years ended December 31 are as follows:

	2014	2013	2012	
Discount rate:				
Benefit obligations at December 31	3.50	% 4.25	% 3.25	%
Net periodic benefit cost				
For the period January 1 to January 31	4.25	% 3.25	% 4.00	%
For the period February 1 to November 30	4.25	% 3.25	% 3.75	%
For the period November 30 to December 31	4.25	% 4.00	% 3.75	%
Assumed health-care cost trend rates at December 31:				
Current year medical inflation	7.25	% 7.65	% 8.05	%
Ultimate inflation rate	5.00	% 5.00	% 5.00	%
Year that the rate reaches the ultimate trend rate	2021	2021	2021	

A 1% change in the assumed medical trend rate would have the following effects as of and for the year ended December 31, 2014:

In millions	1% Increase	1% Decrease	
Effect on total of service and interest cost components of current year benefit cost	\$1.1	\$(0.8	)
Effect on benefit obligation at year-end	31.8	(27.4	)

Benefit payments for postretirement benefits, which are net of expected plan participant contributions and Medicare Part D subsidy, are expected to be paid as follows:

In millions	
2015	\$59.5
2016	58.4
2017	57.4
2018	55.9
2019	53.7
2020 — 2024	236.8

NOTE 10 – EQUITY

Ordinary Shares

The changes in ordinary shares and treasury shares for the year ended December 31, 2014 are as follows:

In millions	Ordinary shares issued	Ordinary shares held in treasury
December 31, 2013	282.7	—
Shares issued under incentive plans	3.2	—
Repurchase of ordinary shares	(19.6	) 3.4
December 31, 2014	266.3	3.4

During 2014, the Company repurchased 23.0 million shares for \$1.4 billion. Shares repurchased prior to October 2014 were canceled upon repurchase and accounted for as a reduction of Ordinary shares and Capital in excess of par value, or Retained earnings to the extent Capital in excess of par value was exhausted. Beginning in October 2014, repurchased shares were held in treasury and recognized at cost. Ordinary shares held in treasury are presented separately on the balance sheet as a reduction to Equity.

The authorized share capital of IR-Ireland is 1,185,040,000 shares, consisting of (1) 1,175,000,000 ordinary shares, par value \$1.00 per share, (2) 40,000 ordinary shares, par value EUR 1.00 and (3) 10,000,000 preference shares, par value \$0.001 per share. There were no Euro-denominated ordinary shares or preference shares outstanding at December 31, 2014 or 2013.

Table of Contents

Other Comprehensive Income (Loss)

The changes in Accumulated other comprehensive income (loss) are as follows:

In millions	Cash flow hedges	Pension and OPEB Items	Foreign Currency Items	Total
December 31, 2012	\$(1.4	) \$(964.2	) \$444.6	\$(521.0)
Other comprehensive income (loss) attributable to Ingersoll-Rand plc	19.7	263.3	11.7	294.7
Impact of spin-off and other activities	\$(17.9	) \$138.1	\$(60.6	) \$59.6
December 31, 2013	\$0.4	\$(562.8	) \$395.7	\$(166.7)
Other comprehensive income (loss) attributable to Ingersoll-Rand plc	2.7	(102.3	) (448.0	) (547.6)
December 31, 2014	\$3.1	\$(665.1	) \$(52.3	) \$(714.3)

The amounts of Other comprehensive income (loss) attributable to noncontrolling interests are as follows:

In millions	2014	2013	2012
Pension and OPEB adjustments	\$—	\$—	\$(1.3)
Currency translation	(2.2	) 3.3	(11.1)
Other comprehensive income (loss) attributable to noncontrolling interests	\$(2.2	) \$3.3	\$(12.4)

NOTE 11 – SHARE-BASED COMPENSATION

The Company records share-based compensation awards using a fair value method and recognizes compensation expense for an amount equal to the fair value of the share-based payment issued in its financial statements. The Company's share-based compensation plans include programs for stock options, restricted stock units (RSUs), performance share units (PSUs), and deferred compensation.

In connection with the spin-off of the commercial and residential security businesses, the provisions of our existing compensation plans required adjustments to the number and terms of outstanding employee stock options, stock appreciation rights (SARs), RSUs and PSUs to preserve the intrinsic value of the awards immediately before and after the spin-off. The outstanding awards will continue to vest over the original vesting period, which is generally three years from the grant date.

The stock awards held as of December 1, 2013 were adjusted as follows:

Stock options and SARs: Holders of Ingersoll Rand vested stock option and SARs awards received one stock option of Allegion for every three Ingersoll Rand vested and exercisable stock options held. The exercise price for each award was also adjusted to preserve the overall intrinsic value of the awards. Unvested stock options held at the time of the spin-off were converted into stock options of the holder's employer following the spin-off, with the number of underlying shares and the exercise price adjusted accordingly to preserve the overall intrinsic value of the awards.

Restricted stock units: Ingersoll Rand restricted stock units were converted into restricted stock units of the holder's employer following the spin-off with adjustments to the number of underlying shares as appropriate to preserve the intrinsic value of such awards immediately prior to the spin-off.

Performance share units: Participants with active and outstanding performance share units had the number of units held adjusted for the change in Ingersoll Rand stock price before and after the spin-off. A corresponding adjustment was made to the calculation of earnings per share and total shareholder return to appropriately reflect the spin-off.

Under the Company's incentive stock plan, the total number of ordinary shares authorized by the shareholders is 20.0 million, of which 16.3 million remains available as of December 31, 2014 for future incentive awards.

Compensation Expense

Share-based compensation expense related to continuing operations is included in Selling and administrative expenses. The following table summarizes the expenses recognized:

Table of Contents

In millions	2014	2013	2012
Stock options	\$16.4	\$23.0	\$5.7
RSUs	24.6	29.9	22.0
PSUs	24.2	20.2	22.5
Deferred compensation	1.9	1.9	0.1
Other	0.6	2.9	2.3
Pre-tax expense	67.7	77.9	52.6
Tax benefit	25.9	29.8	20.1
After-tax expense	\$41.8	\$48.1	\$32.5
Amounts recorded in continuing operations	\$41.8	\$43.4	\$28.6
Amounts recorded in discontinued operations	—	4.7	3.9
Total	\$41.8	\$48.1	\$32.5

During 2012, the Company recorded a correcting adjustment resulting in the reversal of \$13.5 million (\$8.3 million after tax) of previously charged compensation expense related to the accounting for stock option forfeitures. The Company does not believe the correcting adjustment is material to 2012 or to any of its previously issued annual or interim financial statements.

Stock Options / RSUs

Eligible participants may receive (i) stock options, (ii) RSUs or (iii) a combination of both stock options and RSUs.

The fair value of each of the Company's stock option and RSU awards is expensed on a straight-line basis over the required service period, which is generally the 3-year vesting period. However, for stock options and RSUs granted to retirement eligible employees, the Company recognizes expense for the fair value at the grant date.

The average fair value of the stock options granted for the year ended December 31, 2014 and 2013 was estimated to be \$14.29 per share and \$16.55 per share, respectively, using the Black-Scholes option-pricing model. The following assumptions were used:

	2014	2013	
Dividend yield	1.67	% 1.60	%
Volatility	31.43	% 42.15	%
Risk-free rate of return	1.46	% 0.85	%
Expected life	4.9	5.1	

Table of Contents

Expected volatility -- The expected volatility is based on a weighted average of the Company's implied volatility and the most recent historical volatility of the Company's stock commensurate with the expected life.

Risk-free interest rate -- The Company applies a yield curve of continuous risk-free rates based upon the published US Treasury spot rates on the grant date.

Expected life -- The expected life of the Company's stock option awards represents the weighted-average of the actual period since the grant date for all exercised or cancelled options and an expected period for all outstanding options.

Dividend yield -- The Company determines the dividend yield based upon the expected quarterly dividend payments as of the grant date and the current fair market value of the Company's stock.

Forfeiture Rate -- The Company analyzes historical data of forfeited options to develop a reasonable expectation of the number of options to forfeit prior to vesting per year. This expected forfeiture rate is applied to the Company's ongoing compensation expense; however, all expense is adjusted to reflect actual vestings and forfeitures.

For stock options granted prior to the spin-off, the weighted-average exercise prices in the table below reflect the historical exercise prices. Changes in options outstanding under the plans for the years 2014, 2013 and 2012 are as follows:

	Shares subject to option	Weighted- average exercise price	Aggregate intrinsic value (millions)	Weighted- average remaining life
December 31, 2011	18,615,276	\$33.97		
Granted	1,463,352	40.67		
Exercised	(5,578,783)	) 28.87		
Cancelled	(408,883)	) 41.30		
December 31, 2012	14,090,962	36.47		
Granted	1,341,602	52.71		
Exercised	(6,994,024)	) 35.33		
Cancelled	(110,496)	) 44.57		
Impact of Spin-off	371,984	****		
December 31, 2013	8,700,028	31.87		
Granted	1,160,057	59.82		
Exercised	(2,253,094)	) 31.04		
Cancelled	(104,378)	) 47.85		
Outstanding December 31, 2014	7,502,613	\$36.21	\$203.9	5.5
Exercisable December 31, 2014	5,127,891	\$30.47	\$168.8	4.3

The following table summarizes information concerning currently outstanding and exercisable options as adjusted for the spin-off as discussed above:

			Options outstanding			Options exercisable		
Range of exercise price			Number outstanding at December 31, 2014	Weighted- average remaining life	Weighted- average exercise price	Number outstanding at December 31, 2014	Weighted- average remaining life	Weighted- average exercise price
10.01	—	20.00	610,934	2.7	15.03	610,934	2.7	15.03
20.01	—	30.00	1,303,401	4.4	25.60	1,302,062	4.4	25.60
30.01	—	40.00	3,164,061	4.6	33.98	2,746,192	4.2	34.22
40.01	—	50.00	1,306,079	7.4	41.95	460,016	6.3	41.88
50.01	—	60.00	1,118,138	9.1	59.79	8,687	3.5	59.83
\$15.03	—	\$59.83	7,502,613	5.5	\$36.21	5,127,891	4.3	\$30.47

At December 31, 2014, there was \$12.7 million of total unrecognized compensation cost from stock option arrangements granted under the plan, which is primarily related to unvested shares of non-retirement eligible employees. The aggregate intrinsic value of options exercised during the year ended December 31, 2014 and 2013 was \$67.4 million and \$155.5 million, respectively. Generally, stock options expire ten years from their date of grant.

F-32

Table of Contents

For restricted stock awarded prior to the spin-off, grant price information in the table below reflects historical market prices. The following table summarizes RSU activity for the years 2014, 2013 and 2012:

	RSUs	Weighted- average grant date fair value
Outstanding and unvested at December 31, 2011	1,307,173	\$35.00
Granted	643,822	40.74
Vested	(575,214	) 30.05
Cancelled	(91,089	) 38.92
Outstanding and unvested at December 31, 2012	1,284,692	\$39.81
Granted	685,441	53.78
Vested	(669,079	) 38.44
Cancelled	(63,954	) 43.98
Impact of Spin-off	103,882	****
Outstanding and unvested at December 31, 2013	1,340,982	\$38.49
Granted	378,873	59.79
Vested	(630,185	) 35.73
Cancelled	(41,921	) 45.14
Outstanding and unvested at December 31, 2014	1,047,749	\$47.60

At December 31, 2014, there was \$19.4 million of total unrecognized compensation cost from RSU arrangements granted under the plan, which is related to unvested shares of non-retirement eligible employees.

Performance Shares

The Company has a Performance Share Program (PSP) for key employees. The program provides awards in the form of PSUs based on performance against pre-established objectives. The annual target award level is expressed as a number of the Company's ordinary shares. All PSUs are settled in the form of ordinary shares.

Awards granted prior to 2012 are earned based upon the Company's relative earnings-per-share (EPS) growth as compared to the industrial group of companies in the S&P 500 Index over the 3-year performance period.

Beginning with the 2012 grant year, PSU awards are earned based 50% upon a performance condition, measured at each reporting period by relative EPS growth to the industrial group of companies in the S&P 500 Index and the fair market value of the Company's stock on the date of grant, and 50% upon a market condition, measured by the Company's relative total shareholder return (TSR) as compared to the TSR of the industrial group of companies in the S&P 500 Index over the 3-year performance period. The fair value of the market condition is estimated using a Monte Carlo Simulation approach in a risk-neutral framework based upon historical volatility, risk-free rates and correlation matrix.

Table of Contents

The grant price information for performance share units awarded prior to the spin-off reflects historical market prices which were not adjusted to reflect the spin-off. The following table summarizes PSU activity for the maximum number of shares that may be issued for the years 2014, 2013 and 2012:

	PSUs	Weighted-average grant date fair value
Outstanding and unvested at December 31, 2011	2,632,996	\$27.76
Granted	649,668	50.75
Vested	—	—
Forfeited	(1,423,028)	) 18.68
Outstanding and unvested at December 31, 2012	1,859,636	\$40.30
Granted	580,910	61.24
Vested	(718,040)	) 34.94
Forfeited	(150,636)	) 51.43
Impact of spin-off	380,780	****
Outstanding and unvested at December 31, 2013	1,952,650	\$39.20
Granted	473,988	66.22
Vested	(604,649)	) 27.84
Forfeited	(36,991)	) 44.33
Outstanding and unvested at December 31, 2014	1,784,998	\$50.12

At December 31, 2014, there was \$16.8 million of total unrecognized compensation cost from the PSP based on current performance, which is related to unvested shares. This compensation will be recognized over the required service period, which is generally the three-year vesting period.

Deferred Compensation

The Company allows key employees to defer a portion of their eligible compensation into a number of investment choices, including its ordinary share equivalents. Any amounts invested in ordinary share equivalents will be settled in ordinary shares of the Company at the time of distribution.

Other Plans

The Company has not granted SARs since 2006 and does not anticipate additional grants in the future. As of December 31, 2014, there were 55,000 SARs outstanding, all of which are vested and expire 10 years from the date of grant. All SARs exercised are settled with the Company's ordinary shares.

NOTE 12 – RESTRUCTURING ACTIVITIES

Restructuring charges recorded during the years ended December 31 were as follows:

In millions	2014	2013	2012
Climate	\$5.2	\$47.5	\$12.9
Industrial	4.0	14.5	7.6
Corporate and Other	3.3	20.3	2.8
Total	\$12.5	\$82.3	\$23.3
Cost of goods sold	\$2.7	\$15.2	\$10.3
Selling and administrative expenses	9.8	67.1	13.0
Total	\$12.5	\$82.3	\$23.3

Table of Contents

The changes in the restructuring reserve were as follows:

In millions	Climate	Industrial	Corporate and Other	Total
December 31, 2012	\$4.7	\$2.1	\$1.9	\$8.7
Additions, net of reversals	47.5	14.5	20.3	82.3
Cash paid	(34.2	) (7.1	) (17.2	) (58.5
December 31, 2013	18.0	9.5	5.0	32.5
Additions, net of reversals	5.2	4.0	3.3	12.5
Cash paid	(20.3	) (12.6	) (7.7	) (40.6
December 31, 2014	\$2.9	\$0.9	\$0.6	\$4.4

During 2014, 2013, and 2012, the Company incurred costs of \$12.5 million, \$82.3 million, and \$23.3 million respectively, associated with ongoing restructuring actions. These actions included workforce reductions as well as the closure and consolidation of manufacturing facilities in an effort to improve the Company's cost structure. As of December 31, 2014, the Company had \$4.4 million accrued for costs associated with its ongoing restructuring actions, of which a majority is expected to be paid within one year.

NOTE 13 – OTHER, NET

The components of Other, net for the years ended December 31, 2014, 2013 and 2012 are as follows:

In millions	2014	2013	2012
Interest income	\$13.2	\$12.8	\$16.3
Exchange gain (loss)	(0.1	) (14.0	) 0.2
Earnings (loss) from equity investments	7.8	(2.6	) (5.9
Other	9.1	7.2	17.5
Other, net	\$30.0	\$3.4	\$28.1

Exchange gain (loss) for the year ended December 31, 2013 includes a loss of approximately \$3.8 million related to the devaluation of the Venezuela Bolivar.

For the years ended December 31, 2014, 2013 and 2012, we recognized equity earnings (loss) of \$7.8 million, \$(2.6) million and \$(5.9) million, respectively, from our 37.2% ownership interest in Hussmann, a refrigeration display case business.

Other activity for the year ended December 31, 2014 includes a \$6.0 million gain on the sale of an investment. Other activity in 2012 includes adjustments to insurance receivables as a result of favorable settlements.

Table of Contents

NOTE 14 – INCOME TAXES

Earnings before income taxes for the years ended December 31 were taxed within the following jurisdictions:

In millions	2014	2013	2012
United States	\$276.5	\$(147.4)	\$(49.3)
Non-U.S.	932.9	977.0	897.3
Total	\$1,209.4	\$829.6	\$848.0

The components of the Provision for income taxes for the years ended December 31 were as follows:

In millions	2014	2013	2012
Current tax expense (benefit):			
United States	\$168.4	\$2.1	\$(70.1)
Non-U.S.	148.7	157.5	174.0
Total:	317.1	159.6	103.9
Deferred tax expense (benefit):			
United States	(21.4)	19.2	116.9
Non-U.S.	(2.0)	10.2	(164.8)
Total:	(23.4)	29.4	(47.9)
Total tax expense (benefit):			
United States	147.0	21.3	46.8
Non-U.S.	146.7	167.7	9.2
Total	\$293.7	\$189.0	\$56.0

The Provision for income taxes differs from the amount of income taxes determined by applying the applicable U.S. statutory income tax rate to pretax income, as a result of the following differences:

	Percent of pretax income			
	2014	2013	2012	
Statutory U.S. rate	35.0 %	35.0 %	35.0 %	
Increase (decrease) in rates resulting from:				
Non-U.S. tax rate differential	(14.8)	(26.8)	(22.5)	
Tax on U.S. subsidiaries on non-U.S. earnings	1.7	2.0	4.1	
State and local income taxes (1)	1.6	6.3	0.3	
Valuation allowances	(1.0)	2.5	(16.6)	
Change in permanent reinvestment assertion (2)	0.9	6.2	—	
Reserves for uncertain tax positions	0.3	(2.9)	2.4	
Impact of change in taxation of retiree drugs subsidy	—	—	1.9	
Provision to return and other true-up adjustments	0.1	(0.7)	(0.1)	
Other adjustments	0.5	1.2	2.1	
Effective tax rate	24.3 %	22.8 %	6.6 %	

(1) Net of changes in valuation allowances

(2) Net of foreign tax credits

Tax incentives, in the form of tax holidays, have been granted to the Company in certain jurisdictions to encourage industrial development. The expiration of these tax holidays varies by country. The tax holidays are conditional on the Company meeting certain employment and investment thresholds. The most significant tax holidays relate to the Company's qualifying locations in China, Puerto Rico, and Belgium. The benefit for the tax holidays for the years ended December 31, 2014, 2013 and 2012 was \$24.7 million, \$25.3 million and \$13.7 million, respectively.

Table of Contents

A summary of the deferred tax accounts at December 31 are as follows:

In millions	2014	2013
Deferred tax assets:		
Inventory and accounts receivable	\$ 19.2	\$ 19.7
Fixed assets and intangibles	8.6	3.3
Postemployment and other benefit liabilities	702.5	643.1
Product liability	191.0	221.7
Other reserves and accruals	190.5	198.5
Net operating losses and credit carryforwards	505.9	707.1
Other	77.3	59.2
Gross deferred tax assets	1,695.0	1,852.6
Less: deferred tax valuation allowances	(210.7)	(218.5)
Deferred tax assets net of valuation allowances	\$ 1,484.3	\$ 1,634.1
Deferred tax liabilities:		
Inventory and accounts receivable	\$(42.8)	\$(46.8)
Fixed assets and intangibles	(1,999.6)	(2,046.8)
Postemployment and other benefit liabilities	(3.3)	(3.3)
Other reserves and accruals	(14.1)	(6.0)
Other	(20.3)	(49.1)
Gross deferred tax liabilities	(2,080.1)	(2,152.0)
Net deferred tax assets (liabilities)	\$(595.8)	\$(517.9)

At December 31, 2014, no deferred taxes have been provided for any portion of the approximately \$11.1 billion of undistributed earnings of the Company's subsidiaries, since these earnings have been, and under current plans will continue to be, permanently reinvested in these subsidiaries. Due to the number of legal entities and jurisdictions involved and the complexity of the legal entity structure of the Company, the complexity of the tax laws in the relevant jurisdictions, including, but not limited to the rules pertaining to the utilization of foreign tax credits in the United States and the impact of projections of income for future years to any calculations, the Company believes it is not practicable to estimate, within any reasonable range, the amount of additional taxes which may be payable upon distribution of these earnings.

As a result of the Allegion spin-off and certain internal restructurings, the Company believed it to be advantageous to fully repay an intercompany debt obligation between two of its subsidiaries. In order to facilitate the repayment of this intercompany debt, in the fourth quarter of 2013, the Company decided to change its permanent reinvestment assertion as it relates to approximately \$740 million of earnings primarily related to subsidiaries in Hong Kong, Australia and Canada. The Company recorded the tax effects of this change in the fourth quarter of 2013, which resulted in a charge of approximately \$51 million.

At December 31, 2014, the Company had the following operating loss and tax credit carryforwards available to offset taxable income in prior and future years:

In millions	Amount	Expiration Period
U.S. Federal net operating loss carryforwards	\$ 696.3	2022-2034
U.S. Federal credit carryforwards	45.2	2024-Unlimited
U.S. State net operating loss carryforwards	2,966.8	2015-2034
U.S. State credit carryforwards	36.6	2015-Unlimited
Non-U.S. net operating loss carryforwards	867.8	2015-Unlimited
Non-U.S. credit carryforwards	2.2	Unlimited

The amount of net operating loss carryforwards for which a benefit would be recorded in additional paid in capital when realized is \$38.2 million.

The U.S. state net operating loss carryforwards were incurred in various jurisdictions. The non-U.S. net operating loss carryforwards were incurred in various jurisdictions, predominantly in Belgium, Brazil, Ireland, India, Luxembourg,

Spain, and the United Kingdom.

F-37

Table of Contents

Activity associated with the Company's valuation allowance is as follows:

In millions	2014	2013	2012
Beginning balance	\$218.5	\$156.2	\$308.4
Increase to valuation allowance	35.2	89.3	44.5
Decrease to valuation allowance	(38.8)	(26.3)	(192.4)
Accumulated other comprehensive income (loss)	(4.2)	(0.7)	(4.3)
Ending balance	\$210.7	\$218.5	\$156.2

The Company has total unrecognized tax benefits of \$343.8 million and \$363.3 million as of December 31, 2014, and December 31, 2013, respectively. The amount of unrecognized tax benefits that, if recognized, would affect the continuing operations effective tax rate are \$266.5 million as of December 31, 2014. A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows:

In millions	2014	2013	2012
Beginning balance	\$363.3	\$497.5	\$503.4
Additions based on tax positions related to the current year	6.7	19.9	8.5
Additions based on tax positions related to prior years	49.8	152.9	88.2
Reductions based on tax positions related to prior years	(52.4)	(215.3)	(24.1)
Reductions related to settlements with tax authorities	(8.0)	(84.7)	(50.6)
Reductions related to lapses of statute of limitations	(7.1)	(8.4)	(29.5)
Translation (gain) loss	(8.5)	1.4	1.6
Ending balance	\$343.8	\$363.3	\$497.5

In connection with the Company's spin-off of Allegion, the Company and Allegion entered into a tax sharing agreement for the allocation of taxes. Of the total unrecognized tax benefit of \$343.8 million at December 31, 2014, Allegion has agreed to indemnify Ingersoll Rand for \$1.9 million, which is reflected in an other long-term receivable account. Additionally, included in this other long-term receivable account is an indemnity receivable from Allegion in the amount of \$58.2 million related to a filing for competent authority relief in connection with an unrecognized tax benefit included in the table above. The \$58.2 million is exclusive of interest and penalties in the amount of \$9.7 million. The Company also has an indemnity payable to Allegion in the amount of \$7.0 million of tax and interest primarily related to competent authority relief filings.

The Company records interest and penalties associated with the uncertain tax positions within its Provision for income taxes. The Company had reserves associated with interest and penalties, net of tax, of \$69.7 million and \$71.9 million at December 31, 2014 and December 31, 2013, respectively. For the year ended December 31, 2014 and December 31, 2013, the Company recognized \$2.5 million and \$(5.9) million, respectively, in interest and penalties net of tax in continuing operations related to these uncertain tax positions.

The total amount of unrecognized tax benefits relating to the Company's tax positions is subject to change based on future events including, but not limited to, the settlements of ongoing audits and/or the expiration of applicable statutes of limitations. Although the outcomes and timing of such events are highly uncertain, it is reasonably possible that the balance of gross unrecognized tax benefits, excluding interest and penalties, could potentially be reduced by up to approximately \$5.9 million during the next 12 months.

The provision for income taxes involves a significant amount of management judgment regarding interpretation of relevant facts and laws in the jurisdictions in which the Company operates. Future changes in applicable laws, projected levels of taxable income and tax planning could change the effective tax rate and tax balances recorded by the Company. In addition, tax authorities periodically review income tax returns filed by the Company and can raise issues regarding its filing positions, timing and amount of income or deductions, and the allocation of income among the jurisdictions in which the Company operates. A significant period of time may elapse between the filing of an income tax return and the ultimate resolution of an issue raised by a revenue authority with respect to that return. In the normal course of business the Company is subject to examination by taxing authorities throughout the world, including such major jurisdictions as Brazil, Canada, China, France, Germany, Ireland, Italy, Mexico, Switzerland, the Netherlands and the United States. In general, the examination of the Company's material tax returns is complete for the years prior to 2001, with certain matters being resolved through appeals and litigation.

In 2007, the Company received a notice from the IRS containing proposed adjustments to the Company's tax filings in connection with an audit of the 2001 and 2002 tax years. The IRS did not contest the validity of the Company's reincorporation in Bermuda. The IRS proposed to ignore the entities that hold the intercompany debt incurred in connection with the Company's reincorporation

F-38

Table of Contents

in Bermuda (2001 Debt) and to which the interest was paid and impose 30% withholding tax on a portion of the interest payments as if they were made directly to a company that was not eligible for reduced U.S. withholding tax under a U.S. income tax treaty. The IRS asserted that the Company owed additional taxes with respect to 2002 of approximately \$84 million plus interest. In 2010, the Company received an amended notice from the IRS assessing penalties of 30% on the asserted underpayment of tax described above.

The Company has so far been unsuccessful in resolving this dispute, and in 2013, received a Notice of Deficiency from the IRS for 2002. The Company filed a petition in the United States Tax Court in November 2013 contesting this deficiency. In its January 2014 answer to the Company's petition, the IRS asserted that the Company also owes 30% withholding tax on the portion of 2002 interest payments made on the 2001 Debt upon which it did not previously assert withholding tax. This increases the total tax liability proposed for 2002 to \$109.0 million (\$84 million referred to in the paragraph above plus an additional \$25.0 million) plus 30% penalties and interest.

In 2013, the Company received notices from the IRS containing proposed adjustments to the Company's tax filings in connection with an audit of the 2003-2006 tax years. In these notices, the IRS asserts that the Company owes a total of approximately \$665.0 million of additional taxes, as described more fully in the two paragraphs below, in connection with the Company's interest payments on the 2001 Debt for the 2003-2006 period, plus penalties and interest on these unpaid taxes.

The IRS continues to take the position on the 2001 Debt, which was retired at the end of 2011, that it previously took for the Company's 2002 tax year and which is described above. As a result of this recharacterization, the IRS asserts that the Company owes approximately \$455.0 million of withholding tax for 2003-2006 plus 30% penalties.

The IRS also proposes to extend its position further and to treat all of the interest income from the 2001 Debt as creating earnings and profits at IR-Limited and, as a result, recharacterize the distributions made by IR-Limited during the 2002-2006 tax years as taxable dividends instead of as a return of capital. Consequently the IRS asserts that the Company owes approximately \$210.0 million of income tax on these dividends plus penalties of 20%. The Company strongly disagrees with the view of the IRS and filed a protest in January 2014 for the 2003-2006 tax years.

Furthermore, a substantial amount of information has been provided to the IRS in connection with its audit of our 2007-2011 tax years. We expect the IRS to propose similar adjustments with respect to the 2001 Debt, although the Company does not know how the IRS will apply its position to the different facts presented in these years or whether the IRS will take a similar position with respect to intercompany debt instruments not outstanding in prior years.

The Company has vigorously contested all of these proposed adjustments and intends to continue to do so. Although the outcome of these matters cannot be predicted with certainty, based upon an analysis of the merits of the Company's position, the Company believes that it is adequately reserved under the applicable accounting standards for these matters and does not expect that the ultimate resolution will have a material adverse impact on its future results of operations, financial condition, or cash flows. As the Company moves forward to resolve these matters with the IRS, the reserves established may be adjusted. Although the Company continues to contest the IRS's position, there can be no assurance that it will be successful. If the IRS's position with respect to the 2002-2006 tax years is ultimately sustained, the Company would be required to record additional charges and the resulting liability would have a material adverse impact on its future results of operations, financial condition and cash flows.

The Company believes that it has adequately provided for any reasonably foreseeable resolution of any tax disputes, but will adjust its reserves if events so dictate in accordance with GAAP. To the extent that the ultimate results differ from the original or adjusted estimates of the Company, the effect will be recorded in the Provision for income taxes. During 2013, the Company recorded to continuing operations a tax charge of approximately \$74.3 million as result of increases to its deferred tax asset valuation allowance for non-U.S. and U.S. state and local net operating losses and other net deferred tax assets. During 2013, the Company also recorded to continuing operations a net tax benefit of \$36.0 million related to its liability for unrecognized tax benefits primarily driven by a tax benefit of \$75.0 million as a result of the settlement of an audit in a major tax jurisdiction, partially offset by an increase in our liability for unrecognized tax benefits in non-U.S. tax jurisdictions.

During 2012 the Company recorded to continuing operations a tax benefit of approximately \$140.0 million as a result of reducing its deferred tax asset valuation allowance for state net operating losses.

Table of Contents

NOTE 15 – DISCONTINUED OPERATIONS

The components of discontinued operations for the years ended December 31 are as follows:

In millions	2014	2013	2012
Net revenues	\$—	\$1,889.9	\$2,046.6
Pre-tax earnings (loss) from operations	\$41.2	\$84.7	\$379.5
Pre-tax gain (loss) on sale	—	—	2.3
Tax benefit (expense)	(6.5	) (71.4	) (129.8
Discontinued operations, net of tax	\$34.7	\$13.3	\$252.0

Discontinued operations by business for the years ended December 31 are as follows:

In millions	2014	2013	2012
Allegion, net of tax	\$15.0	\$12.4	\$254.2
Other discontinued operations, net of tax	19.7	0.9	(2.2
Discontinued operations, net of tax	\$34.7	\$13.3	\$252.0

Allegion Spin-Off

On December 1, 2013, the Company completed the previously announced separation of its commercial and residential security businesses by distributing the related ordinary shares of Allegion, on a pro rata basis, to the Company's shareholders of record as of November 22, 2013. Allegion is now an independently traded publicly company.

The results of the commercial and residential security businesses prior to the spin-off are presented as a discontinued operation on the Consolidated Statement of Comprehensive Income and Consolidated Statement of Cash Flows for all periods presented.

In connection with the spin-off, the Company and Allegion entered into several agreements covering administrative and tax matters to provide or obtain services on a transitional basis, as needed, for varying periods after the spin-off.

As of December 31, 2014, all services provided under these agreements were substantially complete.

Net revenues and after-tax earnings of Allegion for the year ended December 31 are as follows:

In millions	2014	2013	2012
Net revenues	\$—	\$1,889.9	\$2,046.6
Discontinued operations, net of tax	\$15.0	\$12.4	\$254.2

After-tax earnings from Allegion for the year ended December 31, 2014 primarily represent adjustments for certain tax matters. After-tax earnings from Allegion for the years ended December 31, 2013 and 2012 include spin costs of \$128.0 million and \$5.7 million, respectively. Also, the 2013 results include non-cash goodwill charges and tax of \$111.4 million and \$148.2 million, respectively. See below for further discussion of the impairment.

During the third quarter of 2013, prior to the spin-off, the Company recorded a non-cash, pre-tax goodwill impairment charge of \$111.4 million (\$106.2 million after-tax) related to Europe, Middle East, India and Africa (EMEIA) reporting unit of Allegion. This charge is reflected within Discontinue operations, net of tax, for the year ended December 31, 2013.

Other Discontinued Operations

The components of other discontinued operations for the years ended December 31 are as follows:

In millions	2014	2013	2012
Retained costs, net of tax	\$19.7	\$0.9	\$(16.2
Net gain (loss) on disposals, net of tax	—	—	14.0
Discontinued operations, net of tax	\$19.7	\$0.9	\$(2.2

Other discontinued operations, net of tax for the years ended December 31, 2014 and 2013 is mainly related to postretirement benefits, product liability, worker's compensation, and legal costs (mostly asbestos-related) from previously sold businesses and tax effects of post-closing purchase price adjustments.

Retained costs recognized in 2012 are primarily related to the settlement of post-closing matters with Doosan Infracore related to its 2007 acquisition of our Bobcat Utility Equipment and Attachments business in 2007.

Table of Contents**NOTE 16 – EARNINGS PER SHARE (EPS)**

Basic EPS is calculated by dividing Net earnings attributable to Ingersoll-Rand plc by the weighted-average number of ordinary shares outstanding for the applicable period. Diluted EPS is calculated after adjusting the denominator of the basic EPS calculation for the effect of all potentially dilutive ordinary shares, which in the Company's case, includes shares issuable under share-based compensation plans and the effects of the Exchangeable Senior Notes settled in 2012. The following table summarizes the weighted-average number of ordinary shares outstanding for basic and diluted earnings per share calculations:

In millions	2014	2013	2012
Weighted-average number of basic shares outstanding	270.5	294.1	303.9
Shares issuable under incentive stock plans	3.8	4.2	3.7
Exchangeable Senior Notes	—	—	3.0
Weighted-average number of diluted shares outstanding	274.3	298.3	310.6
Anti-dilutive shares	1.1	19.1	5.2

NOTE 17 – COMMITMENTS AND CONTINGENCIES

The Company is involved in various litigations, claims and administrative proceedings, including those related to environmental, asbestos, and product liability matters. Amounts recorded for identified contingent liabilities are estimates, which are reviewed periodically and adjusted to reflect additional information when it becomes available. Subject to the uncertainties inherent in estimating future costs for contingent liabilities, except as expressly set forth in this note, management believes that any liability which may result from these legal matters would not have a material adverse effect on the financial condition, results of operations, liquidity or cash flows of the Company.

Environmental Matters

The Company continues to be dedicated to an environmental program to reduce the utilization and generation of hazardous materials during the manufacturing process and to remediate identified environmental concerns. As to the latter, the Company is currently engaged in site investigations and remediation activities to address environmental cleanup from past operations at current and former manufacturing facilities.

The Company is sometimes a party to environmental lawsuits and claims and has received notices of potential violations of environmental laws and regulations from the Environmental Protection Agency and similar state authorities. It has also been identified as a potentially responsible party (PRP) for cleanup costs associated with off-site waste disposal at federal Superfund and state remediation sites. For all such sites, there are other PRPs and, in most instances, the Company's involvement is minimal.

In estimating its liability, the Company has assumed it will not bear the entire cost of remediation of any site to the exclusion of other PRPs who may be jointly and severally liable. The ability of other PRPs to participate has been taken into account, based on our understanding of the parties' financial condition and probable contributions on a per site basis. Additional lawsuits and claims involving environmental matters are likely to arise from time to time in the future.

The Company incurred \$5.2 million, \$(0.5) million, and \$3.1 million of expenses during the years ended December 31, 2014, 2013 and 2012, respectively, for environmental remediation at sites presently or formerly owned or leased by us. As of December 31, 2014 and 2013, the Company has recorded reserves for environmental matters of \$45.2 million and \$47.9 million, respectively. Of these amounts \$36.3 million and \$42.1 million, respectively, relate to remediation of sites previously disposed by the Company. Environmental reserves are classified as Accrued expenses and other current liabilities, or Other noncurrent liabilities based on their expected term. The Company's total current environmental reserve at December 31, 2014 and 2013 was \$17.1 million and \$13.5 million, respectively. Given the evolving nature of environmental laws, regulations and technology, the ultimate cost of future compliance is uncertain.

Asbestos-Related Matters

Certain wholly-owned subsidiaries of the Company are named as defendants in asbestos-related lawsuits in state and federal courts. In virtually all of the suits, a large number of other companies have also been named as defendants. The vast majority of those claims have been filed against either Ingersoll-Rand Company (IR-New Jersey) or Trane U.S. Inc. (Trane) and generally allege injury caused by exposure to asbestos contained in certain historical products sold by

IR-New Jersey or Trane, primarily pumps, boilers and railroad brake shoes. Neither IR-New Jersey nor Trane was a producer or manufacturer of asbestos, however, some formerly manufactured products utilized asbestos-containing components such as gaskets and packings purchased from third-party suppliers.

The Company engages an outside expert to assist in calculating an estimate of the Company's total liability for pending and unasserted future asbestos-related claims and annually performs a detailed analysis with the assistance of an outside expert to

F-41

Table of Contents

update its estimated asbestos-related assets and liabilities. The methodology used to project the Company's total liability for pending and unasserted potential future asbestos-related claims relied upon and included the following factors, among others:

- the outside expert's interpretation of a widely accepted forecast of the population likely to have been occupationally exposed to asbestos;
- epidemiological studies estimating the number of people likely to develop asbestos-related diseases such as mesothelioma and lung cancer;
- the Company's historical experience with the filing of non-malignancy claims and claims alleging other types of malignant diseases filed against the Company relative to the number of lung cancer claims filed against the Company;
- the outside expert's analysis of the number of people likely to file an asbestos-related personal injury claim against the Company based on such epidemiological and historical data and the Company's most recent three-year claims history;
- an analysis of the Company's pending cases, by type of disease claimed and by year filed;
- an analysis of the Company's most recent three-year history to determine the average settlement and resolution value of claims, by type of disease claimed;
- an adjustment for inflation in the future average settlement value of claims, at a 2.5% annual inflation rate, adjusted downward to 1.5% to take account of the declining value of claims resulting from the aging of the claimant population; and
- an analysis of the period over which the Company has and is likely to resolve asbestos-related claims against it in the future.

At December 31, 2014, over 80 percent of the open claims against the Company are non-malignancy or unspecified disease claims, many of which have been placed on inactive or deferral dockets and the vast majority of which have little or no settlement value against the Company, particularly in light of recent changes in the legal and judicial treatment of such claims.

The Company's liability for asbestos-related matters and the asset for probable asbestos-related insurance recoveries are included in the following balance sheet accounts:

In millions	December 31, 2014	December 31, 2013
Accrued expenses and other current liabilities	\$67.6	\$69.1
Other noncurrent liabilities	709.0	777.1
Total asbestos-related liabilities	\$776.6	\$846.2
Other current assets	\$57.2	\$22.3
Other noncurrent assets	278.5	299.5
Total asset for probable asbestos-related insurance recoveries	\$335.7	\$321.8

The Company's asbestos insurance receivable related to IR-New Jersey and Trane was \$176.8 million and \$158.9 million at December 31, 2014, and \$137.4 million and \$184.4 million at December 31, 2013, respectively.

The (costs) income associated with the settlement and defense of asbestos-related claims after insurance recoveries, for the years ended December 31, were as follows:

In millions	2014	2013	2012
Continuing operations	\$1.7	\$(0.4)	) \$10.1
Discontinued operations	63.2	(55.8)	) (17.9)
Total	\$64.9	\$(56.2)	) \$(7.8)

Income and expense associated with IR-New Jersey's asbestos liabilities and corresponding insurance recoveries are recorded within discontinued operations, as they relate to previously divested businesses, primarily Ingersoll-Dresser Pump, which was sold in 2000. Income and expenses associated with Trane's asbestos liabilities and corresponding insurance recoveries are recorded within continuing operations.

Trane has now settled claims regarding asbestos coverage with most of its insurers. The settlements collectively account for approximately 95% of its recorded asbestos-related insurance receivable as of December 31, 2014. Most of Trane's settlement agreements constitute "coverage-in-place" arrangements, in which the insurer signatories agree to reimburse Trane for specified portions of its costs for asbestos bodily injury claims and Trane agrees to certain

claims-handling protocols and grants to the insurer signatories certain releases and indemnifications. Trane remains in litigation in an action that Trane filed in November 2010 in

F-42

Table of Contents

the Circuit Court for La Crosse County, Wisconsin, relating to claims for insurance coverage for a subset of Trane's historical asbestos-related liabilities.

On January 12, 2012, IR-New Jersey filed an action in the Superior Court of New Jersey, Middlesex County, seeking a declaratory judgment and other relief regarding the Company's rights to defense and indemnity for asbestos claims. The defendants are several dozen solvent insurance companies, including companies that have been paying a portion of IR-New Jersey's asbestos claim defense and indemnity costs. The action involves certain of IR-New Jersey's unexhausted insurance policies applicable to the asbestos claims that are not subject to any settlement agreement. The responding defendants generally challenged the Company's right to recovery, and raised various coverage defenses. In December 2013, IR-New Jersey filed a similar action in the same court against an insurer that was not a party to the 2012 action.

The Company continually monitors the status of pending litigation that could impact the allocation of asbestos claims against the Company's various insurance policies. The Company has concluded that its IR-New Jersey insurance receivable is probable of recovery because of the following factors:

- in the fourth quarter of 2014, IR-New Jersey reached favorable settlements regarding asbestos coverage claims for the majority of its recorded asbestos-related insurance receivable at December 31, 2014;

- a review of other companies in circumstances comparable to IR-New Jersey, including Trane, and the success of other companies in recovering under their insurance policies, including Trane's favorable settlement discussed above;

- the Company's confidence in its right to recovery under the terms of its policies and pursuant to applicable law; and

- the Company's history of receiving payments under the IR-New Jersey insurance program, including under policies that had been the subject of prior litigation.

The amounts recorded by the Company for asbestos-related liabilities and insurance-related assets are based on currently available information. The Company's actual liabilities or insurance recoveries could be significantly higher or lower than those recorded if assumptions used in the calculations vary significantly from actual results. Key variables in these assumptions include the number and type of new claims to be filed each year, the average cost of resolution of each such new claim, the resolution of coverage issues with insurance carriers, and the solvency risk with respect to the Company's insurance carriers. Furthermore, predictions with respect to these variables are subject to greater uncertainty as the projection period lengthens. Other factors that may affect the Company's liability include uncertainties surrounding the litigation process from jurisdiction to jurisdiction and from case to case, reforms that may be made by state and federal courts, and the passage of state or federal tort reform legislation.

The aggregate amount of the stated limits in insurance policies available to the Company for asbestos-related claims acquired over many years and from many different carriers, is substantial. However, limitations in that coverage, primarily due to the considerations described above, are expected to result in the projected total liability to claimants substantially exceeding the probable insurance recovery.

Warranty Liability

Standard product warranty accruals are recorded at the time of sale and are estimated based upon product warranty terms and historical experience. The Company assesses the adequacy of its liabilities and will make adjustments as necessary based on known or anticipated warranty claims, or as new information becomes available.

The changes in the standard product warranty liability for the year ended December 31, were as follows:

In millions	2014	2013
Balance at beginning of period	\$246.9	\$253.4
Reductions for payments	(146.6)	(156.7)
Accruals for warranties issued during the current period	168.0	153.9
Changes to accruals related to preexisting warranties	(9.8)	(4.3)
Translation	(4.9)	0.6
Balance at end of period	\$253.6	\$246.9

Standard product warranty liabilities are classified as Accrued expenses and other current liabilities, or Other noncurrent liabilities based on their expected term. The Company's total current standard product warranty reserve at December 31, 2014 and December 31, 2013 was \$147.8 million and \$127.9 million, respectively.

The Company's extended warranty liability represents the deferred revenue associated with its extended warranty contracts and is amortized into Revenue on a straight-line basis over the life of the contract, unless another method is more representative of the costs incurred. The Company assesses the adequacy of its liability by evaluating the expected costs under its existing contracts to ensure these expected costs do not exceed the extended warranty liability.

F-43

Table of Contents

The changes in the extended warranty liability for the year ended December 31, were as follows:

In millions	2014	2013
Balance at beginning of period	\$357.9	\$375.1
Amortization of deferred revenue for the period	(104.8	) (105.6
Additions for extended warranties issued during the period	81.5	87.1
Changes to accruals related to preexisting warranties	(2.6	) 1.8
Translation	(1.9	) (0.5
Balance at end of period	\$330.1	\$357.9

The extended warranty liability is classified as Accrued expenses and other current liabilities or Other noncurrent liabilities based on the timing of when the deferred revenue is expected to be amortized into Revenue. The Company's total current extended warranty liability at December 31, 2014 and December 31, 2013 was \$97.2 million. For the years ended December 31, 2014 and 2013, the Company incurred costs of \$63.5 million and \$61.6 million, respectively, related to extended warranties.

Other Commitments and Contingencies

Certain office and warehouse facilities, transportation vehicles and data processing equipment are leased by the Company. Total rental expense was \$171.6 million in 2014, \$165.0 million in 2013 and \$167.0 million in 2012. Minimum lease payments required under non-cancelable operating leases with terms in excess of one year for the next five years are as follows: \$114.8 million in 2015, \$91.0 million in 2016, \$70.4 million in 2017, \$50.0 million in 2018, and \$38.3 million in 2019.

Trane has commitments and performance guarantees, including energy savings guarantees, totaling \$426.3 million extending from 2014-2032. These guarantees are provided under long-term service and maintenance contracts related to its air conditioning equipment and system controls. Through 2014, the Company has experienced no significant losses under such arrangements and considers the probability of any significant future losses to be remote.

NOTE 18 – BUSINESS SEGMENT INFORMATION

The accounting policies of the operating segments are the same as those described in the summary of significant accounting policies except that the operating segments' results are prepared on a management basis that is consistent with the manner in which the Company prepares financial information for internal review and decision making. The Company largely evaluates performance based on Segment operating income and Segment operating margins. Intercompany sales between segments are considered immaterial.

Our Climate segment delivers energy-efficient solutions globally and includes Trane® and American Standard® Heating & Air Conditioning which provide heating, ventilation and air conditioning (HVAC) systems, and commercial and residential building services, parts, support and controls; and Thermo King® transport temperature control solutions.

Our Industrial segment delivers products and services that enhance energy efficiency, productivity and operations. It includes Ingersoll Rand® compressed air systems and services, power tools, material handling systems, ARO® fluid management equipment, as well as Club Car® golf, utility and rough terrain vehicles.

Segment operating income is the measure of profit and loss that the Company's chief operating decision maker uses to evaluate the financial performance of the business and as the basis for performance reviews, compensation and resource allocation. For these reasons, the Company believes that Segment operating income represents the most relevant measure of segment profit and loss. The Company may exclude certain charges or gains from Operating income to arrive at a Segment operating income that is a more meaningful measure of profit and loss upon which to base its operating decisions.

Table of Contents

A summary of operations by reportable segments for the years ended December 31 were as follows:

Dollar amounts in millions	2014	2013	2012

Non-U.S.	537.7	571.6
Total	\$2,658.9	\$2,788.4

NOTE 19 – GUARANTOR FINANCIAL INFORMATION

Ingersoll-Rand plc (IR-Ireland), a public limited company incorporated in Ireland in 2009, is the successor to Ingersoll-Rand Company Limited, a Bermuda company (IR-Limited), following a corporate reorganization that became effective on July 1, 2009 (the Ireland Reorganization). IR-Limited is the successor to Ingersoll-Rand Company, a New Jersey corporation (IR-New Jersey), following a corporate reorganization that occurred on December 31, 2001 (the Bermuda Reorganization).

As part of the Bermuda Reorganization, IR-Limited fully and unconditionally guaranteed all of the issued public debt securities of IR-New Jersey. IR-New Jersey unconditionally guaranteed IR-Limited's 4.75% Senior Notes due in 2015 in the aggregate principal amount of \$300 million. See Note 7 for a discussion of the 2014 financing activities that included the repayment of these 2015 Senior Notes. The guarantee was unsecured and provided on an unsubordinated basis. The guarantee ranked equally in right of payment with all of the existing and future unsecured and unsubordinated debt of IR-New Jersey.

As part of the Ireland Reorganization, IR-Ireland became the ultimate parent company and Ingersoll-Rand International Holding Limited (IR-International) became its stand-alone subsidiary. In addition, (i) IR-International assumed the obligations of IR-Limited as issuer or guarantor, as the case may be, and (ii) IR-Ireland and IR-Limited fully and unconditionally guaranteed the obligations under the various indentures covering the currently outstanding public debt of IR-International, Ingersoll-Rand Global Holding Company Limited (IR-Global), and IR-New Jersey. Also as part of the Ireland Reorganization, IR-Limited transferred all the shares of IR-Global to IR-International in exchange for a note payable that initially approximated \$15 billion, which was then immediately reduced by the settlement of net intercompany payables of \$4.1 billion. In the fourth quarter of 2013, this note payable was fully repaid by IR-International.

In the fourth quarter of 2013, Class B common shares issued by IR-Limited to IR-New Jersey as part of the Bermuda Reorganization were redeemed. Also in 2013, the public outstanding indentures of IR-Global and IR-International were modified to include IR-New Jersey as a co-obligor.

In the fourth quarter of 2014, the Company issued \$1.1 billion of public debt through a newly incorporated, wholly-owned subsidiary, Ingersoll-Rand Luxembourg Finance S.A.. This debt was guaranteed fully and unconditionally by each of the existing guarantors (IR-Ireland, IR-Limited, IR-International and IR-New Jersey) as well as IR-Global. Also in 2014, the public indentures of IR-Global and IR-New Jersey were modified to include IR-Lux as a guarantor.

Our current guarantor structure is as follows:

• IR-Ireland, IR-Limited, IR-International and IR-Lux fully and unconditionally guarantee the outstanding public debt of IR-Global and IR-New Jersey;

• IR-Ireland, IR-Limited, IR-International, IR-Global and IR-New Jersey fully and unconditionally guarantee the outstanding public debt of IR-Lux;

• IR-Ireland, IR-Limited, IR-International and IR-New Jersey fully and unconditionally guarantee the revolving credit facilities of IR-Global and IR-Lux (as an additional borrower), and each of IR-Global and IR-Lux guarantee any revolving credit facility borrowings of the other;

• IR-Ireland, IR-Limited, IR-International and IR-New Jersey fully and unconditionally guarantee any commercial paper borrowings of IR-Global or IR-Lux, and IR-Global guarantees any such borrowings of IR-Lux;

• IR-New Jersey is a co-obligor of the outstanding public debt issued by IR-Global.

See Note 7 for a further discussion of public debt issuances and related guarantees.

The Condensed Consolidating Financial Statements present the investments of IR-Ireland, IR-Limited, IR-Global, IR-International, IR-New Jersey and IR-Lux and their subsidiaries using the equity method of accounting.

Intercompany investments in the non-voting Class B common shares were accounted for on the cost method and are reduced by intercompany dividends. In accordance with generally accepted accounting principles, the amounts related to the issuance of the Class B shares were recorded as a reduction

F-46

Table of Contents

of Total equity. The Notes payable affiliate continues to be reflected on the Condensed Consolidating Balance Sheet of IR-International and is enforceable in accordance with their terms.

The following condensed consolidating financial information for IR-Ireland, IR-Limited, IR-Global, IR-International, IR-New Jersey, IR-Lux, and all their other subsidiaries is included so that separate financial statements of IR-Ireland, IR-Limited, IR-Global, IR-International, IR-New Jersey, and IR-Lux are not required to be filed with the U.S.

Securities and Exchange Commission. IR-Ireland's subsidiary debt issuers and guarantors are directly or indirectly 100% owned by IR-Ireland and the guarantees are full and unconditional and joint and several.

As discussed in Note 2, the Company revised its December 31, 2013 and 2012 Consolidated Statements of Cash Flows to correct errors in the calculation of the effect of exchange rate changes on cash and cash equivalents. The revisions impacted only the Other Subsidiaries column of the Condensed Consolidating Statement of Cash Flows for each of the periods noted above. These adjustments were not considered to be material individually or in the aggregate to the previously issued financial statements. The adjustments had no impact on the total net increase (decrease) in cash and cash equivalents, or total cash and cash equivalents amounts in any period.

During the first quarter of 2014 the Company revised its Condensed Consolidating Financial Statements to correct the presentation of certain subsidiaries and tax obligations between the IR-New Jersey and Other Subsidiaries columns of the Condensed Consolidating Balance Sheet as of December 31, 2013 and the Condensed Consolidating Statements of Comprehensive Income and Cash Flows for the year ended December 31, 2013. The changes had no impact on the Consolidated Financial Statements as of and for the year ended December 31, 2013 and were not material to the previously issued Condensed Consolidating Financial Statements.
