MONMOUTH REAL ESTATE INVESTMENT CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

DECEMBER 31, 2016

NOTE 1 – ORGANIZATION AND ACCOUNTING POLICIES

Monmouth Real Estate Investment Corporation, a Maryland corporation, together with its consolidated subsidiaries (MREIC, the Company, or we), operates as a real estate investment trust (REIT) deriving its income primarily from real estate rental operations. As of December 31, 2016, the Company owned one hundred properties with total square footage of approximately 16,554,000, which is 100.0% occupied, as compared to ninety-nine properties with total square footage of approximately 16,010,000, which was 99.6% occupied as of September 30, 2016. These properties are located in thirty states: Alabama, Arizona, Colorado, Connecticut, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maryland, Michigan, Minnesota, Mississippi, Missouri, Nebraska, New Jersey, New York, North Carolina, Ohio, Oklahoma, Pennsylvania, South Carolina, Tennessee, Texas, Virginia, Washington and Wisconsin. The Company also owns a portfolio of REIT investment securities which the Company generally limits to no more than approximately 10% of its undepreciated assets, (which is the Company's total assets excluding accumulated depreciation).

The Company has elected to be taxed as a REIT under Sections 856-860 of the Internal Revenue Code of 1986, as amended (the Code), and intends to maintain its qualification as a REIT in the future. As a qualified REIT, with limited exceptions, the Company will not be taxed under Federal and certain state income tax laws at the corporate level on taxable income that it distributes to its shareholders. For special tax provisions applicable to REITs, refer to Sections 856-860 of the Code. The Company is subject to franchise taxes in several of the states in which the Company owns property.

The interim Consolidated Financial Statements furnished herein have been prepared in accordance with Accounting Principles Generally Accepted in the United States of America (U.S. GAAP) applicable to interim financial information, the instructions to Form 10-Q, and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three months ended December 31, 2016 are not necessarily indicative of the results that may be expected for the year ending September 30, 2017. For further information, refer to the Consolidated Financial Statements and footnotes thereto included in the Company's annual report on Form 10-K for

the fiscal year ended September 30, 2016.

Use of Estimates

In preparing the financial statements in accordance with U.S. GAAP, management is required to make certain estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods and related disclosure of contingent assets and liabilities. Actual results could differ from these estimates and assumptions.

Reclassification

Certain prior period amounts in the accompanying Consolidated Financial Statements have been reclassified to conform to the current period's presentation.

Lease Termination Income

Lease Termination Income is recognized in operating revenues when there is a signed termination agreement, all of the conditions of the agreement have been met, the tenant is no longer occupying the property and the termination consideration is probable of collection. Lease termination amounts are paid by tenants who want to terminate their lease obligations before the end of the contractual term of the lease by agreement with the Company.

Of the Company's one hundred properties, only three leases contain an early termination provision. These leases with an early termination provision are the 26,340 square foot location in Ridgeland (Jackson), MS, the 83,000 square foot location in Roanoke, VA and the 102,135 square foot location in O'Fallon (St. Louis), MO.

Stock Compensation Plan

The Company has a Stock Option and Stock Award Plan, adopted in 2007 and amended and restated in 2010 (the 2007 Plan), authorizing the grant to officers and key employees of options to purchase up to 1,500,000 shares of common stock, \$0.01 par value per share (common stock) including up to 100,000 shares of restricted stock awarded to any one participant in any one fiscal year.

The Company accounts for awards of stock options and restricted stock in accordance with ASC 718-10, "Compensation-Stock Compensation". ASC 718-10 requires that compensation cost for all stock awards be calculated and amortized over the service period (generally equal to the vesting period). The compensation cost for stock option grants is determined using option pricing models, intended to estimate the fair value of the awards at the grant date less estimated forfeitures. The compensation expense for restricted stock is recognized based on the fair value of the restricted stock awards less estimated forfeitures. The fair value of restricted stock awards is equal to the fair value of the Company's stock on the grant date. The amortization of compensation costs for stock option grants and restricted stock are included in General and Administrative Expenses in the accompanying Consolidated Statements of Income and amounted to \$100,155 and \$104,961 for the three months ended December 31, 2016 and 2015, respectively.

During the three months ended December 31, 2015, no stock options were granted under the Company's 2007 Plan. During the three months ended December 31, 2016, the following stock options, which vest one year after grant date, were granted under the Company's 2007 Plan:

Date of Grant	Number of Employees	Number of Shares	Option Price	Expiration Date
12/9/16	10	215,000	\$14.24	12/9/24

The fair value of each option grant is estimated on the date of grant using the Black-Scholes option pricing model with the following assumptions used for grants in the fiscal year indicated:

Fiscal
2017

Dividend yield	4.49 %
Expected volatility	18.88 %
Risk-free interest rate	2.26 %
Expected lives (years)	8
Estimated forfeitures	-0-

The fair value of options granted during the three months ended December 31, 2016 was \$1.45 per option.

During the three months ended December 31, 2016 and 2015, no shares of restricted stock were granted under the Company's 2007 Plan. During the three months ended December 31, 2015, four participants exercised options to purchase an aggregate of 115,000 shares of common stock at a weighted average exercise price of \$8.04 per share for total proceeds of \$924,300. During the three months ended December 31, 2016, no options were exercised. As of December 31, 2016, a total of 229,878 shares were available to grant as stock options or as restricted stock and there were outstanding options to purchase 670,000 shares under the 2007 Plan. The aggregate intrinsic value of options outstanding as of December 31, 2016 was \$2,846,200.

Recent Accounting Pronouncements

In January 2017, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) 2017-01, “Business Combinations (Topic 805): Clarifying the Definition of a Business.” ASU 2017-01 seeks to clarify the definition of a business with the objective of adding guidance to assist entities with evaluating whether transactions should be accounted for as acquisitions (or disposals) of assets or businesses. The definition of a business affects many areas of accounting including acquisitions, disposals, intangible assets and consolidation. The adoption of ASU 2017-01 is effective for annual periods beginning after December 15, 2017, including interim periods within those periods. The amendments should be applied prospectively on or after the effective dates. The Company is currently evaluating the potential impact this standard may have on the consolidated financial statements and the timing of adoption.

In August 2016, the FASB issued ASU 2016-15, “Statement of Cash Flows (Topic 230), Classification of Certain Cash Receipts and Cash Payments.” ASU 2016-15 will make eight targeted changes to how cash receipts and cash payments are presented and classified in the statement of cash flows. ASU 2016-15 is effective for annual reporting periods, including interim reporting periods within those periods, beginning after December 15, 2017. Early adoption is permitted. The Company is currently evaluating the potential impact this standard may have on the consolidated financial statements and the timing of adoption.

In March 2016, the FASB issued ASU 2016-09 “Compensation – Stock Compensation: Improvements to Employee Share-Based Payment Accounting, which relates to the accounting for employee share-based payments”. ASU 2016-09 addresses several aspects of the accounting for share-based payment award transactions, including: (a) income tax consequences; (b) classification of awards as either equity or liabilities; and (c) classification on the statement of cash flows. This standard will be effective for fiscal years beginning after December 15, 2016, including interim periods within those fiscal years. The Company is currently evaluating the potential impact this standard may have on the consolidated financial statements and the timing of adoption.

In February 2016, the FASB issued ASU 2016-02, “Leases”. ASU 2016-02 amends the existing accounting standards for lease accounting, including requiring lessees to recognize most leases on their balance sheets and making targeted changes to lessor accounting. The standard requires a modified retrospective transition approach for all leases existing at, or entered into after, the date of initial application, with an option to use certain transition relief. ASU 2016-02 will be effective for annual reporting periods beginning after December 15, 2018. Early adoption is permitted. The Company is currently evaluating the potential impact this standard may have on the consolidated financial statements and the timing of adoption.

In January 2016, the FASB issued ASU 2016-01, “Financial Instruments – Overall: Recognition and Measurement of Financial Assets and Financial Liabilities”. ASU 2016-01 requires equity investments (except those accounted for under the equity method of accounting, or those that result in consolidation of the investee) to be measured at fair value with changes in fair value recognized in net income, requires public business entities to use the exit price notion when measuring the fair value of financial instruments for disclosure purposes, requires separate presentation of financial assets and financial liabilities by measurement category and form of financial asset, and eliminates the requirement for public business entities to disclose the method(s) and significant assumptions used to estimate the fair value that is required to be disclosed for financial instruments measured at amortized cost. These changes become effective for the Company’s fiscal year beginning October 1, 2018. The Company is currently in the process of evaluating the impact of the adoption on its consolidated financial statements and has not determined the effects of this update on the Company’s financial position, results of operations or cash flows and disclosures at this time.

In April 2015, the FASB issued ASU 2015-03, “Interest - Imputation of Interest (Topic 835): Simplifying the Presentation of Debt Issuance Costs”. ASU 2015-03 requires debt issuance costs related to a recognized debt liability to be presented in the balance sheet as a direct deduction from the carrying amount of the debt liability. In August 2015, the FASB issued ASU 2015-15, “Presentation and Subsequent Measurement of Debt Issuance Costs Associated with Line-of-Credit Arrangements” (Subtopic 835-30), which clarified that debt issuance costs related to line-of-credit arrangements may be presented as an asset and amortized over the term of the line-of-credit arrangement regardless of whether there are any outstanding borrowings on the line-of-credit arrangement. The Company adopted these standards effective October 1, 2016. As a result, debt issuance costs related to debt liabilities that are not line-of-credit arrangements are included as a direct deduction from the related debt liability and those related to line-of-credit arrangements continue to be included as an asset on the accompanying Consolidated Balance Sheets. The effects of this standard were applied retrospectively to all prior periods presented. The effect of the change in accounting principle was the reduction in the amount of \$6,272,143 of the Fixed Rate Mortgage Notes Payable liability and a corresponding reduction of the Financing Costs asset as of September 30, 2016 and a reclassification of Amortization of Financing Costs of \$234,367 for the three months ended December 31, 2015, to Interest Expense, net of Amortization of Financing Costs in our Consolidated Statement of Income.

Management does not believe that any other recently issued, but not yet effective accounting pronouncements, if adopted, would have a material effect on the accompanying Consolidated Financial Statements.

Segment Reporting & Financial Information

The Company's primary business is the ownership and management of real estate properties. The Company seeks to invest in well-located, modern, single-tenant, industrial buildings leased primarily to investment grade tenants or their subsidiaries on long-term net leases. The Company reviews operating and financial information for each property on an individual basis and, therefore, each property represents an individual operating segment. The Company evaluates financial performance using Net Operating Income ("NOI") from property operations. NOI is defined as recurring Rental and Reimbursement Revenue, less Real Estate Taxes and Operating Expenses, such as insurance, utilities and repairs and maintenance. The Company has aggregated the properties into one reportable segment as the properties share similar long-term economic characteristics and have other similarities, including the fact that they are operated as industrial properties subject to long-term net leases primarily to investment grade tenants or their subsidiaries.

NOTE 2 – NET INCOME PER SHARE

Basic Net Income per Share is calculated by dividing Net Income Attributable to Common Shareholders by the weighted-average number of common shares outstanding during the period. Diluted Net Income per Common Share is calculated by dividing Net Income Attributable to Common Shareholders by the weighted-average number of common shares outstanding plus the weighted-average number of net shares that would be issued upon exercise of stock options pursuant to the treasury stock method.

In addition, common stock equivalents of 143,640 and 81,902 shares are included in the diluted weighted average shares outstanding for the three months ended December 31, 2016 and 2015, respectively. For the diluted weighted average shares outstanding for the three months ended December 31, 2016 and 2015, 215,000 and 130,000 options to purchase shares of common stock, respectively, were antidilutive.

Pro forma information

The following unaudited pro forma condensed financial information has been prepared utilizing the historical financial statements of the Company and the effect of additional revenue and expenses generated from property acquired and expanded during fiscal 2017 and 2016, assuming that the acquisitions and completed expansions had occurred as of October 1, 2015, after giving effect to certain adjustments including (a) Rental Revenue adjustments resulting from the straight-lining of scheduled rent increases, (b) Interest Expense resulting from the assumed increase in Fixed Rate Mortgage Notes Payable and Loans Payable related to the new acquisitions, and (c) Depreciation Expense related to the new acquisitions. In addition, Net Income Attributable to Common Shareholders excludes the operating expenses incurred during fiscal 2017 and 2016 for the one vacant property, located in White Bear Lake, MN, that was sold during the quarter on October 27, 2016. Furthermore, the proceeds raised from the Dividend Reinvestment and Stock Purchase Plan (the DRIP) were used to fund property acquisitions and expansions and therefore, the weighted average shares outstanding used in calculating the Basic and Diluted Net Income per Share Attributable to Common Shareholders has been adjusted to account for the increase in shares raised through the DRIP, as if all the shares raised had occurred on October 1, 2015. The unaudited pro forma condensed financial information is not indicative of the results of operations that would have been achieved had the acquisitions and expansions reflected herein been consummated on the dates indicated or that will be achieved in the future.

NOTE 7 - FAIR VALUE MEASUREMENTS

The Company measures certain financial assets and liabilities at fair value on a recurring basis, including Securities Available for Sale at Fair Value. The Company's financial assets consist mainly of marketable REIT securities. The fair value of these financial assets was determined using the following inputs at December 31, 2016 and September 30, 2016:

Table of Contents

Fair Value Measurements at Reporting Date Using

In addition to the Company's investments in Securities Available for Sale at Fair Value, the Company is required to disclose certain information about fair values of its other financial instruments. Estimates of fair value are made at a specific point in time based upon, where available, relevant market prices and information about the financial instrument. Such estimates do not include any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument. For a portion of the Company's other financial instruments, no quoted market value exists. Therefore, estimates of fair value are necessarily based on a number of significant assumptions (many of which involve events outside the control of management). Such assumptions include assessments of current economic conditions, perceived risks associated with these financial instruments and their counterparties; future expected loss experience and other factors. Given the uncertainties surrounding these assumptions, the reported fair values represent estimates only, and therefore cannot be compared to the historical accounting model. The use of different assumptions or methodologies is likely to result in significantly different fair value estimates.

The fair value of Cash and Cash Equivalents approximates their current carrying amounts since all such items are short-term in nature. The fair value of variable rate Loans Payable approximates their current carrying amounts, since such amounts payable are at approximately a weighted-average current market rate of interest. The estimated fair value of Fixed Rate Mortgage Notes Payable is based on discounting the future cash flows at a year-end risk adjusted borrowing rate currently available to the Company for issuance of debt with similar terms and remaining maturities. These fair value measurements fall within level 2 of the fair value hierarchy. At December 31, 2016, the Fixed Rate

Mortgage Notes Payable fair value (estimated based upon expected cash outflows discounted at current market rates) amounted to approximately \$510,052,000 and the carrying value amounted to \$512,292,137. When the Company acquires a property, it is required to fair value all of the assets and liabilities, including intangible assets and liabilities, relating to the properties acquired lease (See Note 3). Those fair value measurements are estimated based on independent third party appraisals and fall within level 3 of the fair value hierarchy.

NOTE 8 - SUPPLEMENTAL CASH FLOW INFORMATION

Cash paid for interest during the three months ended December 31, 2016 and 2015 was approximately \$5,882,000 and \$5,112,000, respectively.

During the three months ended December 31, 2016 and 2015, the Company had dividend reinvestments of \$2,077,156 and \$2,285,958, respectively, which required no cash transfers.

NOTE 9 – CONTINGENCIES AND COMMITMENTS

From time to time, the Company may be subject to claims and litigation in the ordinary course of business. Management does not believe that any such claim or litigation will have a material adverse effect on the Consolidated Balance Sheets or results of operations.

The Company has entered into agreements to purchase nine new build-to-suit, industrial buildings that are currently being developed in Florida, Michigan, North Carolina, Ohio, Oklahoma, South Carolina and Texas, totaling approximately 2,338,000 square feet with net-leased terms ranging from seven to fifteen years, resulting in a weighted average lease maturity of 13.5 years. The aggregate purchase price for the nine properties is approximately \$250,497,000. Six of the nine purchase commitments consisting of approximately 1,694,000 square feet, or 72%, are leased to investment grade tenants or their subsidiaries. Approximately 1,397,000 square feet, or 60%, is leased to FDX and its subsidiaries. Subject to satisfactory due diligence, we anticipate closing these nine transactions during the remainder of fiscal 2017 and fiscal 2018. In connection with five of the nine properties, the Company has entered into commitments to obtain five mortgages totaling approximately \$100,304,000 at fixed rates ranging from 3.60% to 4.23%, with a weighted average interest rate of 3.86%. a newly constructed facility, which is also located in Ft. Myers, FL. As discussed above, on December 30, 2016, we purchased this newly constructed 213,672 square foot industrial building which is leased for ten years through September 2026. (2) Total and Weighted Average amounts exclude the original Ft. Myers, FL property.

Excluding the eight-month lease renewal at the original Ft. Myers, FL location, the remaining five lease renewals result in a weighted average term of 5.9 years and a U.S. GAAP straight-line weighted average lease rate of \$5.34 per square foot. The renewed weighted average initial cash rent per square foot is \$5.16. This compares to the former weighted average rent of \$5.20 per square foot on a U.S. GAAP straight-line basis and the former weighted average cash rent of \$5.31 per square foot, representing an increase in the weighted average lease rate of 2.7% on a U.S. GAAP straight-line basis and a decrease in the weighted average lease rate of 2.8% on a cash basis. The seven remaining leases that are set to expire during fiscal 2017 are under discussion.

Rental Revenue increased \$4,215,937, or 22%, for the three months ended December 31, 2016 as compared to the three months ended December 31, 2015. The increase was primarily due to the acquisition of six properties purchased during the last three quarters of fiscal 2016 and the two properties purchased during the first three months of fiscal 2017 as well as the 120 basis point increase in the Company's occupancy rate of 98.8% as of December 31, 2015 to 100.0% as of December 31, 2016.

Our single-tenant properties are subject to net-leases which require the tenants to reimburse us for the cost of Real Estate Taxes as well as certain Operating Expenses such as insurance and the majority of repairs and maintenance. For the three months ended December 31, 2016 compared to the three months ended December 31, 2015, Reimbursement Revenue increased \$706,312, or 22%, Real Estate Tax Expense increased \$534,845, or 23%, and Operating Expenses increased \$63,103, or 5%. The increase in Reimbursement Revenue, Real Estate Taxes and Operating Expenses for the three months ended December 31, 2016 was primarily due to our newly acquired properties.

General and Administrative Expense increased \$106,499, or 8%, for the three months ended December 31, 2016 as compared to the three months ended December 31, 2015. The increase in General and Administrative Expense for the three months ended December 31, 2016 was primarily due to an increase in salary and employee benefit expenses.

Acquisition Costs amounted to \$178,526 and \$145,585 for the three months ended December 31, 2016 and 2015, respectively. There were two acquisitions during the three months ended December 31, 2016 with a cost of approximately \$56,102,000 compared to two acquisitions during the three months ended December 31, 2015 with a cost of approximately \$50,386,000.

Furthermore, the Company recognized dividend income on its investment in securities of \$1,292,151 and \$1,184,653 for the three months ended December 31, 2016 and 2015, respectively, representing an increase of 9%. The increase is due to a higher average carrying value of the REIT securities portfolio during the current three month period compared to prior three month period. The REIT securities portfolio's weighted average yield for three months ended December 31, 2016 was approximately 7.4% as compared to 8.4% for the three months ended December 31, 2015.

Interest Expense, including Amortization of Financing Costs, increased \$816,572, or 15%, for the three months ended December 31, 2016 as compared to the three months ended December 31, 2015. This increase is primarily due to an increase in the average balance of Fixed Rate Mortgage Notes Payable due to the newly acquired properties in fiscal 2016 and 2017, which was offset by a decrease in the weighted average interest rate. The weighted average interest rate of Fixed Rate Mortgage Notes Payable has decreased from 4.76% at December 31, 2015 to 4.44% at December 31, 2016, representing a decrease of 32 basis points. Net Real Estate Investments increased \$46,561,330 from September 30, 2016 to December 31, 2016. This increase was due mainly to the purchase of two net-leased industrial properties, located in Hamburg (Buffalo), NY and Ft. Myers, FL totaling approximately \$56,102,000, of which \$55,650,000 was allocated to Net Real Estate Investments. The increase was partially offset by Depreciation Expense for the three months ended December 31, 2016 of \$6,992,495.

Securities Available for Sale increased \$716,602 from September 30, 2016 to December 31, 2016. Fixed Rate Mortgage Notes Payable, net of Unamortized Debt Issuance Costs (Mortgage Notes Payable) increased \$28,098,107 from September 30, 2016 to December 31, 2016. The weighted average interest rate on these two fixed rate mortgages is 4.01%. Details on these two fixed rate mortgages are as follows:

Property	Mortgage amount	Maturity		Interest	
		Date	Rate		
Hamburg (Buffalo), NY	\$23,500,000	11/1/2031	4.03	%	
Ft. Myers, FL	14,500,000	1/1/2032	3.97	%	

The increase in Mortgage Notes Payable was also partially due to the amortization of financing costs associated with the Mortgage Notes Payable of approximately \$188,000. This increase was partially offset by scheduled payments of principal of approximately \$9,456,000, which includes the full repayment of the Company's two mortgages associated with one of its properties located in Jacksonville, FL totaling approximately \$1,356,000. In addition, the increase in

Mortgage Notes Payable was partially offset by the addition of deferred financing costs of approximately \$595,000 associated with the two mortgages obtained in connection with the acquisitions of the two industrial properties purchased in the first quarter of fiscal 2017.

The Company is scheduled to repay a total of approximately \$64,860,000 in mortgage principal payments over the next twelve months. Funds From Operations and Core Funds From Operations

We assess and measure our overall operating results based upon an industry performance measure referred to as Funds From Operations (FFO), which management believes is a useful indicator of our operating performance. FFO is used by industry analysts and investors as a supplemental operating performance measure of a REIT. FFO, as defined by the National Association of Real Estate Investment Trusts (NAREIT), represents net income attributable to common shareholders, as defined by accounting principles generally accepted in the United States of America (U.S. GAAP), excluding extraordinary items, as defined under U.S. GAAP, gains or losses from sales of previously depreciated real estate assets, impairment charges related to depreciable real estate assets, plus certain non-cash items such as real estate asset depreciation and amortization. NAREIT created FFO as a non-U.S. GAAP supplemental measure of REIT operating performance. We define Core Funds From Operations (Core FFO) as FFO, excluding acquisition costs. We define Adjusted Funds from Operations (AFFO) as Core FFO, excluding stock compensation expense, depreciation of corporate office tenant improvements, amortization of financing costs, lease termination income, net gain or loss on sale of securities transactions, effect of non-cash U.S. GAAP straight-line rent adjustments, non-recurring other expenses and less recurring capital expenditures. We define recurring capital expenditures as all capital expenditures, excluding capital expenditures related to expansions at our current locations or capital expenditures that are incurred in conjunction with obtaining a new lease or a lease renewal. We believe that, as widely recognized measures of performance used by other REITs, FFO, Core FFO and AFFO may be considered by investors as supplemental measures to compare our operating performance to those of other REITs. FFO, Core FFO and AFFO exclude historical cost depreciation as an expense and may facilitate the comparison of REITs which have a different cost basis. However, other REITs may use different methodologies to calculate FFO, Core FFO and AFFO and, accordingly, our FFO, Core FFO and AFFO may not be comparable to all other REITs. The items excluded from FFO, Core FFO and AFFO are significant components in understanding the Company's financial performance.

FFO, Core FFO and AFFO (i) do not represent Cash Flow from Operations as defined by U.S. GAAP; (ii) should not be considered as an alternative to Net Income as a measure of operating performance or to Cash Flows from Operating, Investing and Financing Activities; and (iii) are not an alternative to cash flow as a measure of liquidity. FFO, Core FFO and AFFO, as calculated by the Company, may not be comparable to similarly titled measures reported by other REITs.

Forward-looking statements provide the Company's current expectations or forecasts of future events.

Forward-looking statements include statements about the Company's expectations, beliefs, intentions, plans, objectives, goals, strategies, future events, performance and underlying assumptions and other statements that are not historical facts. Forward-looking statements can be identified by their use of forward-looking words, such as "may," "will," "anticipate," "expect," "believe," "intend," "plan," "should," "seek" or comparable terms, or the negative use of those words. The absence of these words does not necessarily mean that a statement is not forward-looking.

The forward-looking statements are based on the Company's beliefs, assumptions and expectations of its future performance, taking into account all information currently available to the Company. Forward-looking statements are not predictions of future events. These beliefs, assumptions and expectations can change as a result of many possible events or factors, not all of which are known to the Company. Some of these factors are described below and are described under the above heading "Management's Discussion and Analysis of Financial Condition and Results of Operations" and the headings "Business", "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" included in the Company's Annual Report on Form 10-K for the fiscal year ended September 30, 2016. Except as required by law, the Company is not obligated to, and does not intend to, update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. Important factors that could cause actual results to differ materially from the Company's expectations include, among others:

the ability of the Company's tenants to make payments under their respective leases, its reliance on certain major tenants and the Company's ability to re-lease properties that are currently vacant or that become vacant;
