SECTION 7 – REGULATION FD
Item 7.01 Regulation FD Disclosure

ALLETE, Inc. (NYSE:ALE) today initiated its 2019 earnings guidance range of \$3.50 to \$3.80 per share on net income of \$180 million to \$190 million, which includes a gain on the sale of U.S. Water Services estimated at approximately \$10 million after-tax, or \$0.20 per share. This guidance range is comprised of our Regulated Operations segment earnings within a range of \$2.85 to \$3.05 per share, and ALLETE Clean Energy, U.S. Water Services, and Corporate and Other operations earnings within a range of \$0.65 to \$0.75 per share, which includes \$0.20 per share related to the estimated gain on the sale of U.S. Water Services. Our guidance range assumes minimal earnings from U.S. Water Services with the sale transaction closing in the first quarter of 2019. The 2019 guidance also assumes that the proceeds from the sale of U.S. Water Services will be primarily reinvested in growth initiatives at our Regulated Operations and ALLETE Clean Energy. ALLETE will also consider using a portion of the proceeds to implement a common stock repurchase program. We reaffirm our long-term objective of achieving average annual earnings per share growth of five to seven percent.

Key factors, expectations, considerations and assumptions impacting 2019 guidance are summarized below.

Regulated Operations

- Additional cost recovery rider revenue from the Great Northern Transmission Line capital investments, with Minnesota Power's portion of anticipated expenditures estimated at approximately \$127 million in 2019.
- 2019 industrial sales of approximately 7.0 million to 7.5 million megawatt-hours (MWh), which reflects anticipated production from our taconite customers of approximately 39 million tons in 2019.
- Lower revenue due to an expiring municipal customer contract in mid-2019, and the temporary shutdown of an industrial customer.
- Decrease in operating and maintenance expense from 2018 of approximately 10 percent due to expense management efforts.
- Additional investments in the American Transmission Company LLC of approximately \$9 million.
- An effective income tax benefit of approximately 10 percent for our Regulated Operations primarily due to production tax credits (PTCs).
- 2019 guidance assumes that we will achieve reasonable outcomes in regulatory proceedings.
- Minnesota Power anticipates filing a rate case in the fourth quarter of 2019 with a 2020 test year.

ALLETE Clean Energy

- ALLETE Clean Energy expects approximately 1.5 million MWh (1.2 million MWh in 2018) in total wind generation.
- Lower revenue due to the 2018 sale of a wind energy facility to Montana-Dakota Utilities Co., and the renewal of wind energy facility power sales agreements at lower prices.
- Expected investments of approximately \$22 million in 2019 to requalify wind turbine generators (WTGs) at ALLETE Clean Energy's Storm Lake I, Storm Lake II, Lake Benton, and Condon facilities. PTCs related to these WTG projects are estimated to be approximately \$14 million in 2019, \$17 million in 2020, \$17 million to \$22 million in 2021 through 2027, and decreasing thereafter through 2030.
- Higher depreciation and operating expenses compared to 2018.
- Glen Ullin and South Peak wind projects' commercial operation dates anticipated in the fourth quarter of 2019.
- Guidance does not include the impact, if any, of possible acquisitions of renewable energy facilities, additional construction and sale projects, and requalification projects other than those previously disclosed.

Corporate and Other

- Similar results at BNI Energy, Inc. and ALLETE Properties, LLC.

Edgar Filing: ALLETE INC - Form 8-K

A consolidated effective income tax benefit of approximately 10 percent in 2019 primarily due to PTCs as a result of wind generation from our Bison Wind Energy Center and requalification of WTGs at ALLETE Clean Energy.
