UNITED STATES SECURITIES AND EXCHANGE COMMISSION

Washington, DC 20549

Form 10-K

x Annual report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 for the fiscal year ended December 31, 2018
OR

.. Transition report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 for the transition period from to

Commission File Number 1-7293

TENET HEALTHCARE CORPORATION

(Exact name of Registrant as specified in its charter)

Nevada 95-2557091

(State of Incorporation) (IRS Employer Identification No.)

1445 Ross Avenue, Suite 1400

Edgar Filing: TENET HEALTHCARE CORP - Form 10-K

Dallas, TX 75202

(Address of principal executive offices, including zip code)

(469) 893-2200

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Common stock, \$0.05 par value	New York Stock Exchange
6.875% Senior Notes due 2031	New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the Registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the Registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Exchange Act. Yes No

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Exchange Act during the preceding 12 months, and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the Registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T during the preceding 12 months. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of the Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or an emerging growth company (each as defined in Exchange Act Rule 12b-2).

Large accelerated filer Accelerated filer Non-accelerated
filer

Emerging growth

Smaller reporting company company

If an emerging growth company, indicate by check mark if the Registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the Registrant is a shell company (as defined in Exchange Act Rule 12b-2). Yes No

As of June 30, 2018, the aggregate market value of the shares of common stock held by non-affiliates of the Registrant (treating directors, executive officers who were SEC reporting persons, and holders of 10% or more of the common stock outstanding as of that date, for this purpose, as affiliates) was approximately \$2.3 billion based on the closing price of the Registrant's shares on the New York Stock Exchange on Friday, June 29, 2018. As of January 31, 2019, there were 102,667,337 shares of common stock outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Registrant's definitive proxy statement for the 2019 annual meeting of shareholders are incorporated by reference into Part III of this Form 10-K.

PART I.
ITEM 1. BUSINESS

OVERVIEW

Tenet Healthcare Corporation (together with our subsidiaries, referred to herein as “Tenet,” “we” or “us”) is a national, diversified healthcare services company. We operate regionally focused, integrated healthcare delivery networks, primarily in large urban and suburban markets. Through our subsidiaries, partnerships and joint ventures, including USPI Holding Company, Inc. (“USPI”), at December 31, 2018, we operated 68 hospitals (three of which we have since divested), 23 surgical hospitals and approximately 475 outpatient centers throughout the United States. In addition, our Conifer Holdings, Inc. (“Conifer”) subsidiary provides healthcare business process services in the areas of hospital and physician revenue cycle management and value-based care solutions to healthcare systems, as well as individual hospitals, physician practices, self-insured organizations, health plans and other entities. For financial reporting purposes, our business lines are classified into three separate reportable operating segments – Hospital Operations and other, Ambulatory Care and Conifer. Additional information about our business segments is provided below; statistical data for the segments can be found in Item 7, Management’s Discussion and Analysis of Financial Condition and Results of Operations, of Part II of this report.

The healthcare industry, in general, and the acute care hospital business, in particular, have been experiencing significant regulatory uncertainty based, in large part, on administrative, legislative and judicial efforts to significantly modify or repeal and potentially replace the Patient Protection and Affordable Care Act, as amended by the Health Care and Education Reconciliation Act of 2010 (“Affordable Care Act” or “ACA”). It is difficult to predict the full impact of regulatory uncertainty on our future revenues and operations. In addition, we believe that several key trends are shaping the demand for healthcare services: (1) consumers, employers and insurers are actively seeking lower-cost solutions and better value as they focus more on healthcare spending; (2) patient volumes are shifting from inpatient to outpatient settings due to technological advancements and demand for care that is more convenient, affordable and accessible; (3) the industry is migrating to value-based payment models with government and private payers shifting risk to providers; and (4) consolidation continues across the entire healthcare sector. Our ability to execute on our strategies and respond to these trends is subject to a number of risks and uncertainties that may cause actual results to be materially different from expectations. For information about our strategies, see Item 7, Management’s Discussion and Analysis of Financial Condition and Results of Operations, of Part II of this report. For information about risks and uncertainties that could affect our results of operations, see the Forward-Looking Statements and Risk Factors sections in Part I of this report.

We are focused on improving operational effectiveness, increasing capital efficiency and margins, expanding patient access points, enhancing the customer care experience in every part of our operations, and growing our higher-acuity inpatient service lines, as well as aligning service line growth with community demand. We believe our inpatient admissions have been constrained in recent years by increased competition, utilization pressure by managed care organizations, new delivery models that are designed to lower the utilization of acute care hospital services, the effects of higher patient co-pays, co-insurance amounts and deductibles, changing consumer behavior, and adverse economic conditions and demographic trends in certain of our markets. However, we also believe that emphasis on higher-demand clinical service lines (including outpatient services), focus on expanding our ambulatory care business, cultivation of our culture of service, participation in Medicare Advantage health plans that are experiencing higher growth rates than traditional Medicare plans, and contracting strategies that create shared value with payers should help us grow our patient volumes over time.

We continue to exit service lines, businesses and markets that we believe are no longer a core part of our long-term growth strategy. To that end, in 2018 we divested eight hospitals in the United States, as well as all of our operations in the United Kingdom. In addition, in January 2019, we completed the previously announced sale of three hospitals

in the Chicago area that we owned at December 31, 2018. We intend to continue to further refine our portfolio of hospitals and other healthcare facilities when we believe such refinements will help us improve profitability, allocate capital more effectively in areas where we have a stronger presence, deploy proceeds on higher-return investments across our business, enhance cash generation and lower our ratio of debt-to-Adjusted EBITDA.

We also remain focused on opportunities to expand our Ambulatory Care segment through organic growth, building new outpatient centers, corporate development activities and strategic partnerships. We opened eight new outpatient centers in the year ended December 31, 2018, and we acquired 10 outpatient businesses, including two surgical hospitals. We believe USPI's surgery centers and surgical hospitals offer many advantages to patients and physicians, including greater affordability, predictability, flexibility and convenience. Moreover, due in part to advancements in medical technology, and due to the lower cost structure and greater efficiencies that are attainable at a specialized outpatient site, we believe the volume and complexity of surgical cases performed in an outpatient setting will continue to increase. We have also continued to grow our imaging and urgent care businesses through USPI to reflect our broader strategies to (1) offer more services to patients, (2) broaden the

Table of Contents

capabilities we offer to healthcare systems and physicians, and (3) expand into faster-growing, less capital intensive, higher-margin businesses. Historically, our outpatient services have generated significantly higher margins for us than inpatient services.

In addition to providing revenue cycle management services to healthcare systems and physicians, Conifer provides support to both providers and self-insured employers seeking assistance with clinical integration, financial risk management and population health management. At December 31, 2018, Conifer served approximately 750 Tenet and non-Tenet hospital and other clients nationwide. As previously announced, we are exploring strategic alternatives for Conifer. There can be no assurance that this process will result in a consummated transaction.

We have also undertaken enterprise-wide cost reduction initiatives, comprised primarily of workforce reductions (including streamlining corporate overhead and centralized support functions), the renegotiation of contracts with suppliers and vendors, and the consolidation of office locations. In 2019, we are continuing to explore new opportunities to enhance efficiency, including further integration of enterprise-wide centralized support functions, outsourcing certain functions unrelated to direct patient care, and reducing clinical and vendor contract variation.

OPERATIONS

HOSPITAL OPERATIONS AND OTHER SEGMENT

Hospitals, Ancillary Outpatient Facilities and Related Businesses—At December 31, 2018, our subsidiaries operated 68 hospitals, including one children’s hospital, two specialty hospitals and one critical access hospital, serving primarily urban and suburban communities in 10 states. (Following the sale of our Chicago-area hospitals and related operations effective January 28, 2019, our subsidiaries operated 65 hospitals in nine states.) Our subsidiaries had sole ownership of 57 of the hospitals we operated at December 31, 2018, nine were owned or leased by entities that are, in turn, jointly owned by a Tenet subsidiary and a healthcare system partner, and two were owned by third parties and leased by our wholly owned subsidiaries. Our Hospital Operations and other segment also included 165 outpatient centers at December 31, 2018, the majority of which are freestanding urgent care centers, provider-based diagnostic imaging centers, off-campus emergency departments and provider-based ambulatory surgery centers. In addition, at December 31, 2018, our subsidiaries owned or leased and operated: a number of medical office buildings, all of which were located on, or nearby, our hospital campuses; over 740 physician practices; accountable care organizations and clinically integrated networks; and other ancillary healthcare businesses.

Factors that affect service mix, revenue mix, patient volumes and, thereby, the results of operations at our hospitals and related healthcare facilities include, but are not limited to: (1) changes in federal and state healthcare regulations; (2) the business environment, economic conditions and demographics of local communities in which we operate; (3) the number of uninsured and underinsured individuals in local communities treated at our hospitals; (4) seasonal cycles of illness; (5) climate and weather conditions; (6) physician recruitment, retention and attrition; (7) advances in technology and treatments that reduce length of stay; (8) local healthcare competitors; (9) managed care contract negotiations or terminations; (10) the number of patients with high-deductible health insurance plans; (11) hospital performance data on quality measures and patient satisfaction, as well as standard charges for our services; (12) any unfavorable publicity about us, or our joint venture partners, that impacts our relationships with physicians and patients; and (13) the timing of elective procedures.

Each of our general hospitals offers acute care services, operating and recovery rooms, radiology services, respiratory therapy services, clinical laboratories and pharmacies; in addition, most have intensive care, critical care and/or coronary care units, physical therapy, and orthopedic, oncology and outpatient services. Many of our hospitals provide tertiary care services, such as cardiothoracic surgery, neonatal intensive care and neurosurgery, and some also offer quaternary care in areas such as heart, liver, kidney and bone marrow transplants. Our children’s hospital provides

tertiary and quaternary pediatric services, including organ and bone marrow transplants, as well as burn services. Moreover, a number of our hospitals offer advanced treatment options for patients, including limb-salvaging vascular procedures, acute level 1 trauma services, comprehensive intravascular stroke care, minimally invasive cardiac valve replacement, cutting edge imaging technology, and telemedicine access for selected medical specialties.

Each of our hospitals (other than our critical access hospital) is accredited by The Joint Commission. With such accreditation, our hospitals are deemed to meet the Medicare Conditions of Participation and are eligible to participate in government-sponsored provider programs, such as the Medicare and Medicaid programs. Although our critical access hospital has not sought to be accredited, it also participates in the Medicare and Medicaid programs by otherwise meeting the Medicare Conditions of Participation.

Edgar Filing: TENET HEALTHCARE CORP - Form 10-K

(1) Operated by a limited liability company formed as part of a joint venture with Baptist Health System, Inc. (“BHS”), a not-for-profit healthcare system in Alabama; a Tenet subsidiary owned a 60% interest in the entity at December 31, 2018, and BHS owned a 40% interest.

In order to receive certain tax benefits for these hospitals, which were operated as nonprofit hospitals prior to our joint venture with BHS, we have entered into arrangements with the City of Talladega, the City of Birmingham, the City of Alabaster and the City of Jasper such that a Medical Clinic Board owns each of these hospitals, and the hospitals are leased to our joint venture entity. These capital leases expire between November 2025 and September 2036, but contain two optional renewal terms of 10 years each.

(2) Specialty hospital.

(3) Specialty hospital.

(4) Owned by a limited liability company formed as part of a joint venture with Dignity Health and Ascension Arizona, each of which is a not-for-profit healthcare system; a Tenet subsidiary owned a 60% interest in the entity at December 31, 2018, Dignity Health owned a 22.5% interest and Ascension Arizona owned a

Edgar Filing: TENET HEALTHCARE CORP - Form 10-K

17.5% interest.

(5) Designated by the Centers for Medicare and Medicaid Services (“CMS”) as a critical access hospital.

(6) Lease expires in May 2027.

(7) Lease expires in July 2045.

(8) Owned by a limited liability company formed as part of a joint venture with John Muir Health (“JMH”), a not-for-profit healthcare system in the San Francisco Bay area; a Tenet subsidiary owned a 51% interest in the entity at December 31, 2018, and JMH owned a 49% interest.

(9) We sold our Chicago-area hospitals and related operations effective January 28, 2019.

Table of Contents

Information regarding the utilization of licensed beds and other operating statistics at December 31, 2018, 2017 and 2016 can be found in Item 7, Management’s Discussion and Analysis of Financial Condition and Results of Operations, of Part II of this report.

At December 31, 2018, our Hospital Operations and other segment also included 50 diagnostic imaging centers, 12 off-campus emergency departments, 11 ambulatory surgery centers and one urgent care center operated as departments of our hospitals and under the same license, as well as 91 separately licensed, freestanding outpatient centers – typically at locations complementary to our hospitals – consisting of six diagnostic imaging centers, eight emergency facilities (seven of which are licensed as microhospitals), two ambulatory surgery centers and 75 urgent care centers. Nearly all of our freestanding urgent care centers are managed by USPI and operated under our national MedPost brand. Over half of the outpatient centers in our Hospital Operations and other segment at December 31, 2018 were in California, Florida and Texas, the same states where we had the largest concentrations of licensed hospital beds. Strong concentrations of hospital beds and outpatient centers within market areas may help us contract more successfully with managed care payers, reduce management, marketing and other expenses, and more efficiently utilize resources. However, these concentrations increase the risk that, should any adverse economic, regulatory, environmental or other condition occur in these areas, our overall business, financial condition, results of operations or cash flows could be materially adversely affected.

Accountable Care Organizations and Clinically Integrated Networks—We own, control or operate five accountable care organizations (“ACOs”) and 10 clinically integrated networks (“CINs”) – in Alabama, Arizona, California, Florida, Massachusetts, Michigan, Missouri, Tennessee and Texas – and participate in four additional ACOs and CINs with other healthcare providers for select markets in Arizona and Texas. An ACO is a group of providers and suppliers that work together to redesign delivery processes in an effort to achieve high-quality and efficient provision of services under contract with CMS. ACOs that achieve quality performance standards established by the U.S. Department of Health and Human Services (“HHS”) are eligible to share in a portion of the amounts saved by the Medicare program. A CIN coordinates the healthcare needs of the communities served by its network of providers with the purpose of improving the quality and efficiency of healthcare services through collaborative programs, including contracts with managed care payers that create a high degree of interdependence and cooperation among the network providers. Because they promote accountability and coordination of care, ACOs and CINs are intended to produce savings as a result of improved quality and operational efficiencies. Both ACOs and CINs operate using a range of payment and care coordination models.

Health Plans—We previously announced our intention to sell or otherwise dispose of our health plan businesses because they are not a core part of our long-term growth strategy. To that end, we sold, divested the membership of or discontinued four health plans in 2017 and, in 2018, we divested our Chicago-based preferred provider network and our Southern California Medicare Advantage plan. Health plans we have not sold outright are being wound-down; however, during this time, they continue to be subject to numerous federal and state statutes and regulations related to their business operations, and each such health plan continues to be licensed by one or more agencies in the states in which they conduct business. In addition, insurance regulations in the states in which we currently operate have required us to maintain cash reserves in connection with certain health plans throughout the wind-down process.

AMBULATORY CARE SEGMENT

Our Ambulatory Care segment is comprised of the operations of USPI and included nine facilities in the United Kingdom until their divestiture in August 2018. At December 31, 2018, USPI had interests in 255 ambulatory surgery centers, 36 urgent care centers operated under the CareSpot brand, 23 imaging centers and 23 surgical hospitals in 27 states. Of these 337 facilities, 208 are jointly owned with healthcare systems. At December 31, 2018, we owned approximately 95% of USPI, and Baylor University Medical Center (“Baylor”) owned approximately 5%.

Operations of USPI—USPI acquires and develops its facilities primarily through the formation of joint ventures with physicians and healthcare systems. USPI’s subsidiaries hold ownership interests in the facilities directly or indirectly and operate the facilities on a day-to-day basis through management services contracts. We believe that this acquisition and development strategy and operating model will enable USPI to continue to grow because of various industry trends we have seen emerge in recent years, namely that: (1) consumers are increasingly selecting services and providers based on cost and convenience, as well as quality; (2) more procedures are shifting from inpatient to outpatient settings; and (3) healthcare providers are entering into joint ventures to maximize effectiveness, reduce costs and build clinically integrated networks.

USPI’s surgical facilities primarily specialize in non-emergency cases. We believe surgery centers and surgical hospitals offer many advantages to patients and physicians, including greater affordability, predictability and convenience. Medical emergencies at acute care hospitals often demand the unplanned use of operating rooms and result in the postponement or delay of scheduled surgeries, disrupting physicians’ practices and inconveniencing patients. Outpatient facilities generally

Table of Contents

provide physicians with greater scheduling flexibility, more consistent nurse staffing and faster turnaround time between cases. In addition, many physicians choose to perform surgery in outpatient facilities because their patients prefer the comfort of a less institutional atmosphere and the convenience of simplified admissions and discharge procedures.

New surgical techniques and technology, as well as advances in anesthesia, have significantly expanded the types of surgical procedures that are being performed in surgery centers and have helped drive the growth in outpatient surgery. Improved anesthesia has shortened recovery time by minimizing post-operative side effects, such as nausea and drowsiness, thereby avoiding the need for overnight hospitalization in many cases. Furthermore, some states permit surgery centers to keep a patient for up to 23 hours, which allows for more complex surgeries, previously performed only in an inpatient setting, to be performed in a surgery center.

In addition to these technological and other clinical advancements, a changing payer environment has contributed to the growth of outpatient surgery relative to all surgery performed. Government programs, private insurance companies, managed care organizations and self-insured employers have implemented cost-containment measures to limit increases in healthcare expenditures, including procedure reimbursement. Furthermore, as self-funded employers are looking to curb annual increases in their employee health benefits costs, they continue to shift additional financial responsibility to patients through higher co-pays, deductibles and premium contributions. These cost-containment measures have contributed to the shift in the delivery of healthcare services away from traditional inpatient hospitals to more cost-effective alternate sites, including surgical facilities. We believe that surgeries performed at surgical facilities are generally less expensive than hospital-based outpatient surgeries because of lower facility development costs, more efficient staffing and space utilization, and a specialized operating environment focused on quality of care and cost containment.

We operate USPI's facilities, structure our joint ventures, and adopt staffing, scheduling, and clinical systems and protocols with the goal of increasing physician productivity. We believe that this focus on physician satisfaction, combined with providing high-quality healthcare in a friendly and convenient environment for patients, will continue to increase the number of procedures performed at our facilities each year. Our joint ventures also enable healthcare systems to offer patients, physicians and payers the cost advantages, convenience and other benefits of ambulatory care in a freestanding facility and, in certain markets, establish networks needed to manage the full continuum of care for a defined population. Further, these relationships allow the healthcare systems to focus their attention and resources on their core business without the challenge of acquiring, developing and operating these facilities.

CONIFER SEGMENT

Nearly all of the services comprising the operations of our Conifer segment are provided by Conifer Health Solutions, LLC or one of its direct or indirect wholly owned subsidiaries. At December 31, 2018, we owned 76.2% of Conifer Health Solutions, LLC, and Catholic Health Initiatives ("CHI") had a 23.8% ownership position. We have been exploring strategic alternatives for Conifer, including a potential sale or merger, a tax-efficient spin-off or a combination of alternative transactions. There can be no assurance that this process will result in a consummated transaction, and we may ultimately decide to retain all or part of Conifer's business.

Services—Conifer provides healthcare business process services in the areas of hospital and physician revenue cycle management and value-based care solutions to healthcare systems, as well as individual hospitals, physician practices, self-insured organizations, health plans and other entities.

Conifer's revenue cycle management solutions consist of: (1) patient services, including: centralized insurance and benefit verification; financial clearance, pre-certification, registration and check-in services; and financial counseling services, including reviews of eligibility for government healthcare or financial assistance programs, for both insured

and uninsured patients, as well as qualified health plan coverage under the ACA; (2) clinical revenue integrity solutions, including: clinical admission reviews; coding; clinical documentation improvement; coding compliance audits; charge description master management; and health information services; and (3) accounts receivable management solutions, including: third-party billing and collections; denials management; and patient collections. All of these solutions include ongoing measurement and monitoring of key revenue cycle metrics, as well as productivity and quality improvement programs. These revenue cycle management solutions assist hospitals, physician practices and other healthcare organizations in improving cash flow, revenue, and physician and patient satisfaction.

In addition, Conifer offers customized communications and engagement solutions to optimize the relationship between providers and patients. Conifer's trained customer service representatives provide direct, 24-hour, multilingual support for (1) physician referral requests, calls regarding maternity services and other patient inquiries, (2) community education and

Table of Contents

outreach, and (3) scheduling and appointment reminders. Additionally, Conifer coordinates and implements marketing outreach programs to keep patients informed of screenings, seminars and other events and services.

Conifer also offers value-based care solutions, including clinical integration, financial risk management and population health management, all of which assist hospitals, physicians, ACOs, health plans, self-insured employers and government agencies in improving the cost and quality of healthcare delivery, as well as patient outcomes. Conifer helps clients build clinically integrated networks that provide predictive analytics and quality measures across the care continuum. In addition, Conifer helps clients align and manage financial incentives among healthcare stakeholders through risk modeling and administration of various payment models. Furthermore, Conifer offers clients tools and analytics to improve quality of care and provide care management services for patients with chronic diseases by identifying high-risk patients, coordinating with patients and clinicians in managing care, and monitoring clinical outcomes.

Clients—At December 31, 2018, Conifer provided one or more of the business process services described above to approximately 750 clients nationwide. Tenet and CHI facilities represented over 300 of these clients, and the remainder were unaffiliated healthcare systems, hospitals, physician practices, self-insured organizations, health plans and other entities. The agreements documenting the terms and conditions of various services Conifer provides to Tenet hospitals, as well as certain administrative services our Hospital Operations and other segment provides to Conifer, were initially scheduled to expire in December 2018. As we continue to pursue strategic alternatives for Conifer, these agreements were renewed for an additional year with substantially similar pricing terms; however, the pricing or other material terms of such agreements may be modified if any such strategic alternative is consummated. Conifer's agreement with CHI to provide patient access, revenue integrity and patient financial services to CHI's facilities expires in 2032. For the year ended December 31, 2018, approximately 38% of Conifer's net operating revenues were attributable to its relationship with Tenet and approximately 36% were attributable to its relationship with CHI. Additional information about our Conifer operating segment can be found in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, of Part II of this report.

As we explore a sale or other strategic alternatives for Conifer, we are continuing to market Conifer's revenue cycle management, patient communications and engagement services, and value-based care solutions businesses. The uncertainty regarding our plans for Conifer may have an adverse impact on our ability to secure new clients for Conifer. However, we believe that our success in growing Conifer and increasing its profitability depends in part on our success in executing the following strategies: (1) attracting hospitals and other healthcare providers that currently handle their revenue cycle management processes internally as new clients; (2) generating new client relationships through opportunities from USPI and Tenet's acute care hospital acquisition and divestiture activities; (3) expanding revenue cycle management and value-based care service offerings through organic development and small acquisitions; (4) leveraging data from tens of millions of patient interactions for continued enhancement of the value-based care environment to drive competitive differentiation; and (5) developing services for our Ambulatory Care segment, leveraging USPI's capabilities. There can be no assurance that Conifer will be successful in generating new client relationships, particularly with respect to hospitals we or Conifer's other clients sell, as the respective buyers of such hospitals may not continue to use Conifer's services or, if they do, they may not do so under the same contractual terms.

REAL PROPERTY

The locations of our hospitals and the number of licensed beds at each hospital at December 31, 2018 are set forth in the table beginning on page 3. We lease the majority of our outpatient facilities in both our Hospital Operations and other segment and our Ambulatory Care segment. These leases typically have initial terms ranging from five to 20 years, and most of the leases contain options to extend the lease periods. Our subsidiaries also operate a number of medical office buildings, all of which are located on, or nearby, our hospital campuses. We own many of these

medical office buildings; the remainder are owned by third parties and leased by our subsidiaries.

Our corporate headquarters are located in Dallas, Texas. In addition, we maintain administrative offices in markets where we operate hospitals and other businesses, including USPI and Conifer. We typically lease our office space under operating lease agreements. We believe that all of our properties are suitable for their respective uses and are, in general, adequate for our present needs.

INTELLECTUAL PROPERTY

We rely on a combination of trademark, copyright and trade secret laws, as well as contractual terms and conditions, to protect our rights in our intellectual property assets. However, third parties may develop intellectual property that is similar or superior to ours. We also license third-party software, other technology and certain trademarks through agreements that impose certain restrictions on our ability to use the licensed items. We control access to and use of our software and other technology

Table of Contents

through a combination of internal and external controls. Although we do not believe the intellectual property we utilize infringes any intellectual property right held by a third party, we could be prevented from utilizing such property and could be subject to significant damage awards if our use is found to do so.

PHYSICIANS AND EMPLOYEES

Physicians—Our operations depend in significant part on the number, quality, specialties, and admitting and scheduling practices of the licensed physicians who have been admitted to the medical staffs of our hospitals and other facilities, as well as physicians who affiliate with us and use our facilities as an extension of their practices. Under state laws and other licensing standards, medical staffs are generally self-governing organizations subject to ultimate oversight by the facility's local governing board. Members of the medical staffs of our facilities also often serve on the medical staffs of facilities we do not operate, and they are free to terminate their association with our facilities or admit their patients to competing facilities at any time. At December 31, 2018, we owned over 740 physician practices, and we employed (where permitted by state law) or otherwise affiliated with nearly 1,600 physicians; however, we have no contractual relationship with the overwhelming majority of the physicians who practice at our hospitals and outpatient centers. It is essential to our ongoing business that we attract an appropriate number of quality physicians in the specialties required to support our services and that we maintain good relations with those physicians. In some of our markets, physician recruitment and retention are affected by a shortage of physicians in certain specialties and the difficulties that physicians can experience in obtaining affordable malpractice insurance or finding insurers willing to provide such insurance. Moreover, our ability to recruit and employ physicians is closely regulated.

Employees in Our Healthcare Facilities—In addition to physicians, the operations of our facilities are dependent on the efforts, abilities and experience of our facilities management and medical support employees, including nurses, therapists, pharmacists and lab technicians. We compete with other healthcare providers in recruiting and retaining qualified personnel responsible for the day-to-day operations of our facilities. In some markets, there is a limited availability of experienced medical support personnel, which drives up the local wages and benefits required to recruit and retain employees. In particular, like others in the healthcare industry, we continue to experience a shortage of critical-care nurses in certain disciplines and geographic areas. Moreover, we hire many newly licensed nurses in addition to experienced nurses, which requires us to invest in their training.

California is the only state in which we operate that requires minimum nurse-to-patient staffing ratios to be maintained at all times in acute care hospitals. If other states in which we operate adopt mandatory nurse-staffing ratios, it could have a significant effect on our labor costs and have an adverse impact on our net operating revenues if we are required to limit patient volumes in order to meet the required ratios.

Union Activity and Labor Relations—At December 31, 2018, approximately 26% of the employees in our Hospital Operations and other segment were represented by labor unions. Less than 1% of the employees in our Ambulatory Care and Conifer segments belong to a union. Unionized employees – primarily registered nurses and service, technical and maintenance workers – are located at 35 of our hospitals, the majority of which are in California, Florida and Michigan. When negotiating collective bargaining agreements with unions, whether such agreements are renewals or first contracts, there is a possibility that strikes could occur, and our continued operation during any strikes could increase our labor costs and have an adverse effect on our patient volumes and net operating revenues. Organizing activities by labor unions could increase our level of union representation in future periods, which could result in increases in salaries, wages and benefits expense.

Headcount—At December 31, 2018, we employed approximately 115,500 people (of which approximately 22% were part-time employees) in our three business segments, as follows:

Hospital Operations and other	85,010
Ambulatory Care	17,710

Conifer	12,780
Total	115,500

COMPETITION

HEALTHCARE SERVICES

Generally, other hospitals and outpatient centers in the local communities we serve provide services similar to those we offer, and, in some cases, competing facilities are more established or newer than ours. Furthermore, our competitors (1) may offer a broader array of services or more desirable facilities to patients and physicians than ours, (2) may have larger or

8

Table of Contents

more specialized medical staffs to admit and refer patients, (3) may have a better reputation in the community, (4) may be more centrally located with better parking or closer proximity to public transportation or (5) may be able to negotiate more favorable reimbursement rates that they may use to strengthen their competitive position. In the future, we expect to encounter increased competition from system-affiliated hospitals and healthcare companies, as well as health insurers and private equity companies seeking to acquire providers, in specific geographic markets.

We also face competition from specialty hospitals (some of which are physician-owned) and unaffiliated freestanding outpatient centers for market share in high-margin services and for quality physicians and personnel. In recent years, the number of freestanding specialty hospitals, surgery centers, emergency departments, urgent care centers and diagnostic imaging centers in the geographic areas in which we operate has increased significantly. Furthermore, some of the hospitals that compete with our hospitals are owned by government agencies or not-for-profit organizations. These tax-exempt competitors may have certain financial advantages not available to our facilities, such as endowments, charitable contributions, tax-exempt financing, and exemptions from sales, property and income taxes. In addition, in certain markets in which we operate, large teaching hospitals provide highly specialized facilities, equipment and services that may not be available at our hospitals.

Another major factor in the competitive position of a hospital or outpatient facility is the ability to negotiate contracts with managed care plans. Health maintenance organizations (“HMOs”), preferred provider organizations (“PPOs”), third-party administrators, and other third-party payers use managed care contracts to encourage patients to use certain hospitals in exchange for discounts from the hospitals’ established charges. These negotiated discounts generally limit our ability to increase charges in response to increasing costs. Nevertheless, our future success depends, in part, on our ability to retain and renew our managed care contracts and enter into new managed care contracts on competitive terms. Other healthcare providers may affect our ability to enter into acceptable managed care contractual arrangements or negotiate increases in our reimbursement. For example, some of our competitors may negotiate exclusivity provisions with managed care plans or otherwise restrict the ability of managed care companies to contract with us. Furthermore, the ongoing trend toward consolidation among non-government payers tends to increase their bargaining power over fee structures.

In addition, the competitive positions of hospitals and outpatient facilities depend in significant part on the number, quality, specialties, and admitting and scheduling practices of the licensed physicians who have been admitted to the medical staffs of those facilities, as well as physicians who affiliate with and use outpatient centers as an extension of their practices. Members of the medical staffs of our facilities also often serve on the medical staffs of facilities we do not operate, and they are free to terminate their association with our facilities or admit their patients to competing facilities at any time. State laws that require findings of need for construction and expansion of healthcare facilities or services (as described in “Healthcare Regulation and Licensing – Certificate of Need Requirements” below) may also impact competition.

Our strategies are designed to help our hospitals and outpatient facilities remain competitive. We believe emphasis on higher-demand clinical service lines (including outpatient lines) and improved quality metrics will improve our volumes. Furthermore, we have expanded our ambulatory care business, and we have significantly increased our focus on operating our outpatient centers with improved accessibility and more convenient service for patients, increased predictability and efficiency for physicians, and (for most services) lower costs for payers than would be incurred with a hospital visit. We have also sought to include all of our hospitals and other healthcare businesses in the related geographic area or nationally when negotiating new managed care contracts, which may result in additional volumes at facilities that were not previously a part of such managed care networks.

We have made significant investments in equipment, technology, education and operational strategies designed to improve clinical quality at all of our facilities. We believe physicians refer patients to a hospital on the basis of the quality and scope of services it renders to patients and physicians, the quality of other physicians on the medical staff,

the location of the hospital, and the quality of the hospital's facilities, equipment and employees. In addition, we continually collaborate with physicians to implement the most current evidence-based medicine techniques to improve the way we provide care, while using labor management tools and supply chain initiatives to reduce variable costs. We believe the use of these practices will promote the most effective and efficient utilization of resources and result in more appropriate lengths of stay, as well as reductions in readmissions for hospitalized patients. In general, we believe that quality of care improvements may have the effects of: (1) reducing costs; (2) increasing payments from Medicare and certain managed care payers for our services as governmental and private payers move to pay-for-performance models, and the commercial market moves to more narrow networks and other methods designed to encourage covered individuals to use certain facilities over others; and (3) increasing physician and patient satisfaction, which may improve our volumes.

Moreover, in most of our markets, we have formed clinically integrated networks, which are collaborations with independent physicians and hospitals to develop ongoing clinical initiatives designed to control costs and improve the quality of care delivered to patients. Arrangements like these provide a foundation for negotiating with plans under an ACO structure

Table of Contents

or other risk-sharing model. However, we do face competition from other healthcare systems that are implementing similar physician alignment strategies, such as employing physicians, acquiring physician practice groups, and participating in ACOs or other clinical integration models.

REVENUE CYCLE MANAGEMENT SOLUTIONS

Our Conifer subsidiary faces competition from existing participants and new entrants to the revenue cycle management market, some of which may have significantly greater capital resources than Conifer. In addition, the internal revenue cycle management staff of hospitals and other healthcare providers, who have historically performed many of the functions addressed by our services, in effect compete with us. Moreover, providers who have previously made investments in internally developed solutions may choose to continue to rely on their own resources. We also currently compete with several categories of external participants in the revenue cycle market, including:

• software vendors and other technology-supported revenue cycle management business process outsourcing companies;

• traditional consultants, either specialized healthcare consulting firms or healthcare divisions of large accounting firms; and

• large, non-healthcare focused business process and information technology outsourcing firms.

We believe that competition for the revenue cycle management and other services Conifer provides is based primarily on: (1) knowledge and understanding of the complex public and private healthcare payment and reimbursement systems; (2) a track record of delivering revenue improvements and efficiency gains for hospitals and other healthcare providers; (3) the ability to deliver solutions that are fully integrated along each step of the revenue cycle; (4) cost-effectiveness, including the breakdown between up-front costs and pay-for-performance incentive compensation; (5) reliability, simplicity and flexibility of the technology platform; (6) understanding of the healthcare industry's regulatory environment, as well as laws and regulations relating to consumer protection; and (7) financial resources to maintain current technology and other infrastructure.

To be successful, Conifer must respond more quickly and effectively than its competitors to new or changing opportunities, technologies, standards, regulations and client requirements. Existing or new competitors may introduce technologies or services that render Conifer's technologies or services obsolete or less marketable. Even if Conifer's technologies and services are more effective than the offerings of its competitors, current or potential clients might prefer competitive technologies or services to Conifer's technologies and services. Furthermore, increased competition has resulted and may continue to result in pricing pressures, which could negatively impact Conifer's margins, growth rate or market share. In addition, the uncertainty regarding our plans for Conifer may have an adverse impact on Conifer's ability to secure new clients.

HEALTHCARE REGULATION AND LICENSING

HEALTHCARE REFORM

The Affordable Care Act extended health coverage to millions of uninsured legal U.S. residents through a combination of private sector health insurance reforms and public program expansion. To fund the expansion of insurance coverage, the ACA includes measures designed to promote quality and cost efficiency in healthcare delivery and to generate budgetary savings in the Medicare and Medicaid programs. In addition, the ACA contains provisions intended to strengthen fraud and abuse enforcement.

The initial expansion of health insurance coverage under the ACA resulted in an increase in the number of patients using our facilities with either private or public program coverage and a decrease in uninsured and charity care admissions. Although a substantial portion of both our patient volumes and, as result, our revenues has historically been derived from government healthcare programs, reductions to our reimbursement under the Medicare and Medicaid programs as a result of the ACA have been partially offset by increased revenues from providing care to previously uninsured individuals.

The President issued an executive order in January 2017 declaring that it is the official policy of his administration to seek the prompt repeal of the ACA and directing the heads of all executive departments and agencies to minimize the economic and regulatory burdens of the ACA to the maximum extent permitted by law while the ACA remains in effect. The White House also sent a memorandum to federal agencies directing them to freeze any new or pending regulations. In October 2017, the administration announced that reimbursements to insurance companies for ACA cost-sharing

Table of Contents

reduction (“CSR”) plans offered through the health insurance marketplace would be discontinued. CSR payments compensate insurers for subsidizing out-of-pocket costs for low-income enrollees. Without the CSR payments, many insurers increased premiums for plans offered on ACA exchanges and a few withdrew entirely from offering plans on some of the exchanges. In addition, in December 2017, Congress passed and the President signed a tax reform bill into law that, among other things, eliminates the ACA’s individual mandate penalty for not buying health insurance starting in 2019. The Congressional Budget Office and the staff of the Joint Committee on Taxation estimated that eliminating the mandate penalty starting in 2019 – and making no other changes to the then-current law – would cause the number of people with health insurance to decrease by 4 million in 2019 and 13 million in 2027. Members of Congress have also proposed measures that would expand government-sponsored coverage, including single-payer proposals. We cannot predict if or when further modification of the ACA will occur or what action, if any, Congress might take with respect to eventually repealing and possibly replacing the law.

There have also been successful judicial challenges to the ACA, including a December 2018 ruling by the U.S. District Court for the Northern District of Texas that the ACA’s individual mandate is unconstitutional. Because the judge’s order was stayed pending appeal, the decision’s near-term impact on health insurance coverage under the ACA may be limited; however, uncertainty over the future of the ACA has intensified. The ultimate outcome of this decision and other judicial challenges is indeterminate. We are also unable to predict the impact of administrative, regulatory and legislative changes, and market reactions to those changes, on our future revenues and operations. However, if the ultimate impact is that significantly fewer individuals have private or public health coverage, we likely will experience decreased volumes, reduced revenues and an increase in uncompensated care, which would adversely affect our results of operations and cash flows. This negative effect will be exacerbated if the ACA’s reductions in Medicare reimbursement and reductions in Medicare disproportionate share hospital (“DSH”) payments that have already taken effect are not reversed if the law is repealed or if further reductions (including Medicaid DSH reductions scheduled to take effect in federal fiscal years 2020 through 2025) are made.

ANTI-KICKBACK AND SELF-REFERRAL REGULATIONS

Anti-Kickback Statute—Medicare and Medicaid anti-kickback and anti-fraud and abuse amendments codified under Section 1128B(b) of the Social Security Act (the “Anti-kickback Statute”) prohibit certain business practices and relationships that might affect the provision and cost of healthcare services payable under the Medicare and Medicaid programs and other government programs, including the payment or receipt of remuneration for the referral of patients whose care will be paid for by such programs. Specifically, the law prohibits any person or entity from offering, paying, soliciting or receiving anything of value, directly or indirectly, for the referral of patients covered by Medicare, Medicaid and other federal healthcare programs or the leasing, purchasing, ordering or arranging for or recommending the lease, purchase or order of any item, good, facility or service covered by these programs. In addition to addressing other matters, as discussed below, the Health Insurance Portability and Accountability Act of 1996 (“HIPAA”) also amended Title XI (42 U.S.C. Section 1301 et seq.) to broaden the scope of fraud and abuse laws to include all health plans, whether or not payments under such health plans are made pursuant to a federal program. Moreover, the Affordable Care Act amended the Anti-kickback Statute to provide that intent to violate the Anti-kickback Statute is not required; rather, intent to violate the law generally is all that is required.

Sanctions for violating the Anti-kickback Statute include criminal and civil penalties, as well as fines and mandatory exclusion from government programs, such as Medicare and Medicaid. In addition, submission of a claim for services or items generated in violation of the Anti-kickback Statute constitutes a false or fraudulent claim and may be subject to additional penalties under the federal False Claims Act (“FCA”). Furthermore, it is a violation of the federal Civil Monetary Penalties Law to offer or transfer anything of value to Medicare or Medicaid beneficiaries that is likely to influence their decision to obtain covered goods or services from one provider or service over another. Many states have statutes similar to the federal Anti-kickback Statute, except that the state statutes usually apply to referrals for services reimbursed by all third-party payers, not just federal programs.

The federal government has also issued regulations that describe some of the conduct and business relationships that are permissible under the Anti-kickback Statute. These regulations are often referred to as the “Safe Harbor” regulations. Currently, there are safe harbors for various activities, including the following: investment interests; space rental; equipment rental; practitioner recruitment; personal services and management contracts; sales of practices; referral services; warranties; discounts; employees; group purchasing organizations; waivers of beneficiary coinsurance and deductible amounts; managed care arrangements; obstetrical malpractice insurance subsidies; investments in group practices; ambulatory surgery centers; referral agreements for specialty services; cost-sharing waivers for pharmacies and emergency ambulance services; and local transportation. The fact that certain conduct or a given business arrangement does not meet a Safe Harbor does not necessarily render the conduct or business arrangement illegal under the Anti-kickback Statute. Rather, such conduct and business arrangements may be subject to increased scrutiny by government enforcement authorities and should be reviewed on a case-by-case basis.

Table of Contents

Stark Law—The Stark law generally restricts referrals by physicians of Medicare or Medicaid patients to entities with which the physician or an immediate family member has a financial relationship, unless one of several exceptions applies. The referral prohibition applies to a number of statutorily defined “designated health services,” such as clinical laboratory, physical therapy, radiology, and inpatient and outpatient hospital services; the prohibition does not apply to health services provided by an ambulatory surgery center if those services are included in the surgery center’s composite Medicare payment rate. However, if the ambulatory surgery center is separately billing Medicare for designated health services that are not covered under the ambulatory surgery center’s composite Medicare payment rate, or if either the ambulatory surgery center or an affiliated physician is performing (and billing Medicare) for procedures that involve designated health services that Medicare has not designated as an ambulatory surgery center service, the Stark law’s self-referral prohibition would apply and such services could implicate the Stark law. Exceptions to the Stark law’s referral prohibition cover a broad range of common financial relationships. These statutory and the subsequent regulatory exceptions are available to protect certain permitted employment relationships, relocation arrangements, leases, group practice arrangements, medical directorships, and other common relationships between physicians and providers of designated health services, such as hospitals. A violation of the Stark law may result in a denial of payment, required refunds to patients and the Medicare program, civil monetary penalties of up to \$15,000 for each violation, civil monetary penalties of up to \$100,000 for “sham” arrangements, civil monetary penalties of up to \$10,000 for each day that an entity fails to report required information, and exclusion from participation in the Medicare and Medicaid programs and other federal programs. In addition, the submission of a claim for services or items generated in violation of the Stark law may constitute a false or fraudulent claim, and thus be subject to additional penalties under the FCA. Many states have adopted self-referral statutes similar to the Stark law, some of which extend beyond the related state Medicaid program to prohibit the payment or receipt of remuneration for the referral of patients and physician self-referrals regardless of the source of the payment for the care. Our participation in and development of joint ventures and other financial relationships with physicians could be adversely affected by the Stark law and similar state enactments.

The Affordable Care Act also made changes to the “whole hospital” exception in the Stark law, effectively preventing new physician-owned hospitals after March 23, 2010 and limiting the capacity and amount of physician ownership in then-existing physician-owned hospitals. As revised, the Stark law prohibits physicians from referring Medicare patients to a hospital in which they have an ownership or investment interest unless the hospital had physician ownership and a Medicare provider agreement as of March 23, 2010 (or, for those hospitals under development at the time of the ACA’s enactment, as of December 31, 2010). A physician-owned hospital that meets these requirements is still subject to restrictions that limit the hospital’s aggregate physician ownership percentage and, with certain narrow exceptions for hospitals with a high percentage of Medicaid patients, prohibit expansion of the number of operating rooms, procedure rooms or beds. Physician-owned hospitals are also currently subject to reporting requirements and extensive disclosure requirements on the hospital’s website and in any public advertisements.

Implications of Fraud and Abuse Laws—At December 31, 2018, the majority of the facilities that operate as surgical hospitals in our Ambulatory Care segment are owned by joint ventures that include some physician owners and are subject to the limitations and requirements in the Affordable Care Act on physician-owned hospitals. Furthermore, the majority of ambulatory surgery centers in our Ambulatory Care segment, which are owned by joint ventures with physicians or healthcare systems, are subject to the Anti-kickback Statute and, in certain circumstances, may be subject to the Stark law. In addition, we have contracts with physicians and non-physician referral services providing for a variety of financial arrangements, including employment contracts, leases and professional service agreements, such as medical director agreements. We have also provided financial incentives to recruit physicians to relocate to communities served by our hospitals, including income and collection guarantees and reimbursement of relocation costs, and will continue to provide recruitment packages in the future. Furthermore, new payment structures, such as ACOs and other arrangements involving combinations of hospitals, physicians and other providers who share payment savings, could potentially be seen as implicating anti-kickback and self-referral provisions.

Our operations could be adversely affected by the failure of our arrangements to comply with the Anti-kickback Statute, the Stark law, billing requirements, current state laws, or other legislation or regulations in these areas adopted in the future. We are unable to predict whether other legislation or regulations at the federal or state level in any of these areas will be adopted, what form such legislation or regulations may take or how they may impact our operations. For example, we cannot predict whether physicians may ultimately be restricted from holding ownership interests in hospitals or whether the exception relating to services provided by ambulatory surgery centers could be eliminated. We are continuing to enter into new financial arrangements with physicians and other providers in a manner we believe complies with applicable anti-kickback and anti-fraud and abuse laws. However, governmental officials responsible for enforcing these laws may nevertheless assert that we are in violation of these provisions. In addition, these statutes or regulations may be interpreted and enforced by the courts in a manner that is not consistent with our interpretation. An adverse determination could subject us to liabilities under the Social Security Act, including criminal penalties, civil monetary penalties and exclusion from participation in Medicare,

Table of Contents

Medicaid or other federal healthcare programs, any of which could have a material adverse effect on our business, financial condition or results of operations. In addition, any determination by a federal or state agency or court that USPI or its subsidiaries has violated any of these laws could give certain of our healthcare system partners a right to terminate their relationships with us; and any similar determination with respect to Conifer or any of its subsidiaries could give Conifer's clients the right to terminate their services agreements with us. Moreover, any violations by and resulting penalties or exclusions imposed upon USPI's healthcare system partners or Conifer's clients could adversely affect their financial condition and, in turn, have a material adverse effect on our business and results of operations.

Retention of Independent Compliance Monitor—In September 2016, the Company and certain of its subsidiaries, including Tenet HealthSystem Medical, Inc. (“THSMI”), Atlanta Medical Center, Inc. (“AMCI”) and North Fulton Medical Center, Inc. (“NFMCI”), executed agreements with the U.S. Department of Justice (“DOJ”) and others to resolve a civil qui tam action and criminal investigation. In accordance with the terms of the resolution agreements, THSMI entered into a Non-Prosecution Agreement (as amended, the “NPA”) with the Criminal Division, Fraud Section, of the DOJ and the U.S. Attorney's Office for the Northern District of Georgia (together, the “Offices”). The NPA requires, among other things, (1) THSMI and the Company to fully cooperate with the Offices in any matters relating to the conduct described in the NPA and other conduct under investigation by the Offices at any time during the term of the NPA, and (2) the Company to retain an independent compliance monitor to assess, oversee and monitor its compliance with the obligations under the NPA. The powers, duties and responsibilities of the independent compliance monitor are broadly defined. On February 1, 2017, the Company retained two independent co-monitors (the “Monitor”), who are partners in a national law firm.

The Monitor's primary responsibility is to assess, oversee and monitor the Company's compliance with its obligations under the NPA to specifically address and reduce the risk of any recurrence of violations of the Anti-kickback Statute and Stark law by any entity the Company owns, in whole or in part. In doing so, the Monitor reviews and monitors the effectiveness of the Company's compliance with the Anti-kickback Statute and the Stark law, as well as respective implementing regulations, advisories and advisory opinions promulgated thereunder, and makes such recommendations as the Monitor believes are necessary to comply with the NPA. With respect to all entities in which the Company or one of its affiliates owns a direct or indirect equity interest of 50% or less and does not manage or control the day-to-day operations, the Monitor's access to such entities is co-extensive with the Company's access or control and for the purpose of reviewing the conduct. During its term, the Monitor will review and provide recommendations for improving compliance with the Anti-kickback Statute and Stark law, as well as the design, implementation and enforcement of the Company's compliance and ethics programs for the purpose of preventing future criminal and ethical violations by the Company and its subsidiaries, including, but not limited to, violations related to the conduct giving rise to the NPA and the Criminal Information filed in connection with the NPA. If we are alleged or found to have violated the terms of the NPA described above or federal healthcare laws, rules or regulations in the future, our business, financial condition, results of operations or cash flows could be materially adversely affected. For additional information regarding the duties and authorities of the Monitor, reference is made to our Current Report on Form 8-K filed with the U.S. Securities and Exchange Commission (“SEC”) on October 3, 2016.

HEALTH INSURANCE PORTABILITY AND ACCOUNTABILITY ACT

Title II, Subtitle F of the Health Insurance Portability and Accountability Act mandates the adoption of specific standards for electronic transactions and code sets that are used to transmit certain types of health information. HIPAA's objective is to encourage efficiency and reduce the cost of operations within the healthcare industry. To protect the information transmitted using the mandated standards and the patient information used in the daily operations of a covered entity, HIPAA also sets forth federal rules protecting the privacy and security of protected health information (“PHI”). The privacy and security regulations address the use and disclosure of individually identifiable health information and the rights of patients to understand and control how their information is used and disclosed. The law provides both criminal and civil fines and penalties for covered entities that fail to comply with

HIPAA.

To receive reimbursement from CMS for electronic claims, healthcare providers and health plans must use HIPAA's electronic data transmission (transaction and code set) standards when transmitting certain healthcare information electronically. Our electronic data transmissions are compliant with current HHS standards for additional electronic transactions and with HHS' operating rules to promote uniformity in the implementation of each standardized electronic transaction.

Under HIPAA, covered entities must establish administrative, physical and technical safeguards to protect the confidentiality, integrity and availability of electronic PHI maintained or transmitted by them or by others on their behalf. The covered entities we operate are in material compliance with the privacy, security and National Provider Identifier requirements of HIPAA. In addition, most of Conifer's clients are covered entities, and Conifer is a business associate to many of those clients under HIPAA as a result of its contractual obligations to perform certain functions on behalf of and provide certain

Table of Contents

services to those clients. As a business associate, Conifer's use and disclosure of PHI is restricted by HIPAA and the business associate agreements Conifer is required to enter into with its covered entity clients.

The Health Information Technology for Economic and Clinical Health ("HITECH") Act imposed certain of the HIPAA privacy and security requirements directly upon business associates of covered entities and significantly increased the monetary penalties for violations of HIPAA. Regulations also require business associates such as Conifer to notify covered entities, who in turn must notify affected individuals and government authorities, of data security breaches involving unsecured PHI. Since the passage of the HITECH Act, enforcement of HIPAA violations has increased. If Conifer knowingly breaches the HIPAA privacy and security requirements made applicable to business associates by the HITECH Act, it could expose Conifer to criminal liability (as well as contractual liability to the associated covered entity); a breach of safeguards and processes that is not due to reasonable cause or involves willful neglect could expose Conifer to significant civil penalties and the possibility of civil litigation under HIPAA and applicable state law.

We have developed a comprehensive set of policies and procedures in our efforts to comply with HIPAA, and similar state privacy laws, under the guidance of our ethics and compliance department. Our compliance officers and information security officers are responsible for implementing and monitoring compliance with our HIPAA privacy and security policies and procedures throughout our company. We have also created an internal web-based HIPAA training program, which is mandatory for all employees. Based on existing regulations and our experience with HIPAA to this point, we continue to believe that the ongoing costs of complying with HIPAA will not have a material adverse effect on our business, financial condition, results of operations or cash flows.

GOVERNMENT ENFORCEMENT EFFORTS AND QUI TAM LAWSUITS

Both federal and state government agencies continue heightened and coordinated civil and criminal enforcement efforts against the healthcare industry. The Office of Inspector General ("OIG") was established as an independent and objective oversight unit of HHS to carry out the mission of preventing fraud and abuse and promoting economy, efficiency and effectiveness of HHS programs and operations. In furtherance of this mission, the OIG, among other things, conducts audits, evaluations and investigations relating to HHS programs and operations and, when appropriate, imposes civil monetary penalties, assessments and administrative sanctions. Although we have extensive policies and procedures in place to facilitate compliance with the laws, rules and regulations affecting the healthcare industry, these policies and procedures may not be effective.

Healthcare providers are also subject to qui tam or "whistleblower" lawsuits under the FCA, which allows private individuals to bring actions on behalf of the government, alleging that a hospital or healthcare provider has defrauded a government program, such as Medicare or Medicaid. If the government intervenes in the action and prevails, the defendant may be required to pay three times the damages sustained by the government, plus mandatory civil penalties for each false claim submitted to the government. As part of the resolution of a qui tam case, the qui tam plaintiff may share in a portion of any settlement or judgment. If the government does not intervene in the action, the qui tam plaintiff may continue to pursue the action independently. There are many potential bases for liability under the FCA. Liability often arises when an entity knowingly submits a false claim for reimbursement to the federal government. The FCA defines the term "knowingly" broadly. Though simple negligence will not give rise to liability under the FCA, submitting a claim with reckless disregard to its truth or falsity constitutes a "knowing" submission under the FCA and, therefore, will qualify for liability. The Fraud Enforcement and Recovery Act of 2009 expanded the scope of the FCA by, among other things, creating liability for knowingly and improperly avoiding repayment of an overpayment received from the government and broadening protections for whistleblowers. It is a violation of the FCA to knowingly fail to report and return an overpayment within 60 days of identifying the overpayment or by the date a corresponding cost report is due, whichever is later. Qui tam actions can also be filed under certain state false claims laws if the fraud involves Medicaid funds or funding from state and local agencies. We have paid significant

amounts to resolve qui tam matters brought against us in the past, and we are unable to predict the impact of future qui tam actions on our business, financial condition, results of operations or cash flows.

HEALTHCARE FACILITY LICENSING REQUIREMENTS

The operation of healthcare facilities is subject to federal, state and local regulations relating to personnel, operating policies and procedures, fire prevention, rate-setting, the adequacy of medical care, and compliance with building codes and environmental protection laws. Various licenses and permits also are required in order to dispense narcotics, operate pharmacies, handle radioactive materials and operate certain equipment. Our facilities are subject to periodic inspection by governmental and other authorities to assure continued compliance with the various standards necessary for licensing and accreditation. We believe that all of our healthcare facilities hold all required governmental approvals, licenses and permits material to the operation of their business.

Table of Contents

UTILIZATION REVIEW COMPLIANCE AND HOSPITAL GOVERNANCE

In addition to certain statutory coverage limits and exclusions, federal regulations, specifically the Medicare Conditions of Participation, generally require healthcare providers, including hospitals that furnish or order healthcare services that may be paid for under the Medicare program or state healthcare programs, to ensure that claims for reimbursement are for services or items that are (1) provided economically and only when, and to the extent, they are medically reasonable and necessary, (2) of a quality that meets professionally recognized standards of healthcare, and (3) supported by appropriate evidence of medical necessity and quality. The Social Security Act established the Utilization and Quality Control Peer Review Organization program, now known as the Quality Improvement Organization (“QIO”) program, to promote the effectiveness, efficiency, economy and quality of services delivered to Medicare beneficiaries and to ensure that those services are reasonable and necessary. CMS administers the program through a network of QIOs that work with consumers, physicians, hospitals and other caregivers to refine care delivery systems to ensure patients receive the appropriate care at the appropriate time, particularly among underserved populations. The QIO program also safeguards the integrity of the Medicare trust fund by reviewing Medicare patient admissions, treatments and discharges, and ensuring payment is made only for medically necessary services, and investigates beneficiary complaints about quality of care. The QIOs have the authority to deny payment for services provided and recommend to HHS that a provider that is in substantial noncompliance with certain standards be excluded from participating in the Medicare program.

There has been increased scrutiny from outside auditors, government enforcement agencies and others, as well as an increased risk of government investigations and qui tam lawsuits, related to hospitals’ Medicare observation rates and inpatient admission decisions. The term “Medicare observation rate” is defined as total unique observation claims divided by the sum of total unique observation claims and total inpatient short-stay acute care hospital claims. A low rate may raise suspicions that a hospital is inappropriately admitting patients that could be cared for in an observation setting. In addition, CMS has established a concept referred to as the “two-midnight rule” to guide practitioners admitting patients and contractors on when it is appropriate to admit individuals as hospital inpatients. Under the two-midnight rule, a Medicare patient should generally be admitted on an inpatient basis only when there is a reasonable expectation that the patient’s care will cross two midnights; if not, the patient generally should be treated as an outpatient, unless an exception applies. In our affiliated hospitals, we conduct reviews of Medicare inpatient stays of less than two midnights to determine whether a patient qualifies for inpatient admission. Enforcement of the two-midnight rule has not had, and is not expected to have, a material impact on inpatient admission rates at our hospitals.

Medical and surgical services and practices are extensively supervised by committees of staff doctors at each of our healthcare facilities, are overseen by each facility’s local governing board, the members of which primarily are community members and physicians, and are reviewed by our clinical quality personnel. The local governing board also helps maintain standards for quality care, develop short-term and long-range plans, and establish, review and enforce practices and procedures, as well as approves the credentials, disciplining and, if necessary, the termination of privileges of medical staff members.

CERTIFICATE OF NEED REQUIREMENTS

Some states require state approval for construction, acquisition and closure of healthcare facilities, including findings of need for additional or expanded healthcare facilities or services. Certificates or determinations of need, which are issued by governmental agencies with jurisdiction over healthcare facilities, are at times required for capital expenditures exceeding a prescribed amount, changes in bed capacity or services, and certain other matters. Our subsidiaries operate hospitals in six states that require a form of state approval under certificate of need programs applicable to those hospitals. Approximately 71% of our licensed hospital beds are located in these states (namely,

Alabama, Florida, Massachusetts, Michigan, South Carolina and Tennessee). The certificate of need programs in most of these states, along with several others, also apply to ambulatory surgery centers.

Failure to obtain necessary state approval can result in the inability to expand facilities, add services, acquire a facility or change ownership. Further, violation of such laws may result in the imposition of civil sanctions or the revocation of a facility's license. We are unable to predict whether we will be required or able to obtain any additional certificates of need in any jurisdiction where they are required, or if any jurisdiction will eliminate or alter its certificate of need requirements in a manner that will increase competition and, thereby, affect our competitive position. In those states that do not have certificate of need requirements or that do not require review of healthcare capital expenditure amounts below a relatively high threshold, competition in the form of new services, facilities and capital spending is more prevalent.

Table of Contents

ENVIRONMENTAL MATTERS

Our healthcare operations are subject to a number of federal, state and local environmental laws, rules and regulations that govern, among other things, our disposal of solid waste, as well as our use, storage, transportation and disposal of hazardous and toxic materials (including radiological materials). Our operations also generate medical waste that must be disposed of in compliance with statutes and regulations that vary from state to state. In addition, although we are not engaged in manufacturing or other activities that produce meaningful levels of greenhouse gas emissions, our operating expenses could be adversely affected if legal and regulatory developments related to climate change or other initiatives result in increased energy or other costs. We could also be affected by climate change and other environmental issues to the extent such issues adversely affect the general economy or result in severe weather affecting the communities in which our facilities are located. At this time, based on current climate conditions and our assessment of existing and pending environmental rules and regulations, as well as treaties and international accords relating to climate change, we do not believe that the costs of complying with environmental laws, including regulations relating to climate change issues, will have a material adverse effect on our future capital expenditures, results of operations or cash flows. There were no material capital expenditures for environmental matters in the year ended December 31, 2018.

ANTITRUST LAWS

The federal government and most states have enacted antitrust laws that prohibit specific types of anti-competitive conduct, including price fixing, wage fixing, anticompetitive hiring practices, concerted refusals to deal, price discrimination and tying arrangements, as well as monopolization and acquisitions of competitors that have, or may have, a substantial adverse effect on competition. Violations of federal or state antitrust laws can result in various sanctions, including criminal and civil penalties.

Antitrust enforcement in the healthcare industry is currently a priority of the U.S. Federal Trade Commission (“FTC”). In recent years, the FTC has filed multiple administrative complaints and public comments challenging hospital transactions in several states. The FTC has focused its enforcement efforts on preventing hospital mergers that may, in the government’s view, leave insufficient local options for patient services. In addition to hospital merger enforcement, the FTC has given increased attention to the effect of combinations involving other healthcare providers, including physician practices. The FTC has also entered into numerous consent decrees in the past several years settling allegations of price-fixing among providers.

REGULATIONS AFFECTING CONIFER’S OPERATIONS

Conifer and its subsidiaries are subject to civil and criminal statutes and regulations governing consumer finance, medical billing, coding, collections and other operations. In connection with these laws and regulations, Conifer and its subsidiaries have been and expect to continue to be party to various lawsuits, claims, and federal and state regulatory investigations from time to time. Some of these actions may involve large demands, as well as substantial defense costs. We cannot predict the outcome of current or future legal actions against Conifer and its subsidiaries or the effect that judgments, penalties or settlements in such matters may have on Conifer.

BILLING AND COLLECTION ACTIVITIES

The federal Fair Debt Collection Practices Act (“FDCPA”) regulates persons who regularly collect or attempt to collect, directly or indirectly, consumer debts owed or asserted to be owed to another person. Certain of the accounts receivable handled by Conifer’s third-party debt collection vendors are subject to the FDCPA, which establishes specific guidelines and procedures that debt collectors must follow in communicating with consumer debtors, including the time, place and manner of such communications. Conifer audits and monitors its vendors for

compliance, but there can be no assurance that such audits and monitoring will detect all instances of potential non-compliance.

Many states also regulate the billing and collection practices of creditors who collect their own debt, as well as the companies a creditor engages to bill and collect from consumers on the creditor's behalf. These state regulations may be more stringent than the FDCPA. In addition, state regulations may be specific to medical billing and collections or the same or similar to state regulations applicable to third-party collectors. Certain of the accounts receivable Conifer or its billing, servicing and collections subsidiary, PSS Patient Solution Services, LLC, manages for its clients are subject to these state regulations.

Conifer and its subsidiaries are also subject to both federal and state regulatory agencies who have the authority to investigate consumer complaints relating to a variety of consumer protection laws, including but not limited to the Telephone Consumer Protection Act and its state equivalent. These agencies may initiate enforcement actions, including actions to seek

Table of Contents

restitution and monetary penalties from, or to require changes in business practices of, regulated entities. In addition, affected consumers may bring suits, including class action suits, to seek monetary remedies (including statutory damages) for violations of the federal and state provisions discussed above.

PAYMENT ACTIVITY RISKS

Conifer accepts payments from patients of the facilities for which it provides services using a variety of methods, including credit card, debit card, direct debit from a patient's bank account, and physical bank check. For certain payment methods, including credit and debit cards, Conifer pays interchange and other fees, which may increase over time, thereby raising operating costs. Conifer relies on third parties to provide payment processing services, including the processing of credit cards, debit cards and electronic checks, and it could disrupt Conifer's business if these companies become unwilling or unable to provide these services. Conifer is also subject to payment card association operating rules, including data security rules, certification requirements and rules governing electronic funds transfers, which could change or be reinterpreted to make it difficult or impossible for Conifer to comply. If Conifer fails to comply with these rules or requirements, or if its data security systems are breached or compromised, Conifer may be liable for card issuing banks' costs, be subject to fines and higher transaction fees, and lose its ability to accept credit and debit card payments from patients, process electronic funds transfers, or facilitate other types of online payments.

COMPLIANCE AND ETHICS

General—Our ethics and compliance department maintains our values-based ethics and compliance program, which is designed to (1) help staff in our corporate, USPI and Conifer offices, hospitals, outpatient centers and physician practices meet or exceed applicable standards established by federal and state statutes and regulations, as well as industry practice, (2) monitor and raise awareness of ethical issues among employees and others, and stress the importance of understanding and complying with our *Standards of Conduct*, and (3) provide a channel for employees to make confidential ethics and compliance-related reports anonymously if they choose. The ethics and compliance department operates independently – it has its own operating budget; it has the authority to hire outside counsel, access any company document and interview any of our personnel; and our chief compliance officer reports directly to the quality, compliance and ethics committee of our board of directors.

Program Charter—Our *Quality, Compliance and Ethics Program Charter* is the governing document for our ethics and compliance program. Our adherence to the charter is intended to:

• support and maintain our present and future responsibilities with regard to participation in federal healthcare programs; and

further our goals of operating an organization that (1) fosters and maintains the highest ethical standards among all employees, officers and directors, physicians practicing at our facilities and contractors that furnish healthcare items or services, (2) values compliance with all state and federal statutes and regulations as a foundation of its corporate philosophy, and (3) aligns its behaviors and decisions with Tenet's core values of quality, integrity, service, innovation and transparency.

The primary focus of our quality, compliance and ethics program is compliance with the requirements of Medicare, Medicaid and other federally funded healthcare programs. Pursuant to the terms of the charter, our ethics and compliance department is responsible for, among other things, the following activities: (1) ensuring, in collaboration with in-house counsel, facilitation of the Monitor's activities and compliance with the provisions of the NPA and related company policies; (2) assessing, critiquing, and (as appropriate) drafting and distributing company policies and procedures; (3) developing, providing, and tracking ethics and compliance training and other training programs, including job-specific training to those who work in clinical quality, coding, billing, cost reporting and referral source

arrangements, in collaboration with the respective department responsible for oversight of each of these areas; (4) creating and disseminating the Company's *Standards of Conduct* and obtaining certifications of adherence to the *Standards of Conduct* as a condition of employment; (5) maintaining and promoting the Company's Ethics Action Line, a 24-hour, toll-free hotline that allows for confidential reporting of issues on an anonymous basis and emphasizes the Company's no-retaliation policy; and (6) responding to and ensuring resolution of all compliance-related issues that arise from the Ethics Action Line and compliance reports received from facilities and compliance officers (utilizing any compliance reporting software that the Company may employ for this purpose) or any other source that results in a report to the ethics and compliance department.

Standards of Conduct—All of our employees, including our chief executive officer, chief financial officer and principal accounting officer, are required to abide by our *Standards of Conduct* to advance our mission that our business be conducted in a legal and ethical manner. The members of our board of directors and all of our contractors having functional

Table of Contents

roles similar to our employees are also required to abide by our *Standards of Conduct*. The standards reflect our basic values and form the foundation of a comprehensive process that includes compliance with all corporate policies, procedures and practices. Our standards cover such areas as quality patient care, compliance with all applicable statutes and regulations, appropriate use of our assets, protection of patient information and avoidance of conflicts of interest.

As part of the program, we provide training sessions at least annually to every employee, as well as our board of directors and certain physicians and contractors. All employees are required to report incidents that they believe in good faith may be in violation of the *Standards of Conduct* or our policies, and are encouraged to contact our Ethics Action Line when they have questions about the standards or any ethics concerns. All reports to the Ethics Action Line are kept confidential to the extent allowed by law, and employees have the option to remain anonymous. Incidents of alleged financial improprieties reported to the Ethics Action Line or the ethics and compliance department are communicated to the audit committee of our board of directors. Reported cases that involve a possible violation of the law or regulatory policies and procedures are referred to the ethics and compliance department for investigation, although certain matters may be referred out to the law department. Retaliation against employees in connection with reporting ethical concerns is considered a serious violation of our *Standards of Conduct*, and, if it occurs, it will result in discipline, up to and including termination of employment.

Non-Prosecution Agreement—In September 2016, our THSMI subsidiary entered into a Non-Prosecution Agreement with the DOJ’s Criminal Division, Fraud Section, and the U.S. Attorney’s Office for the Northern District of Georgia. The NPA requires, among other things, that we and THSMI (1) fully cooperate with the Offices in any matters relating to the conduct described in the NPA and other conduct under investigation by the Offices at any time during the term of the NPA, (2) retain an independent compliance monitor to assess, oversee and monitor our compliance with the obligations under the NPA, (3) promptly report any evidence or allegations of actual or potential violations of the Anti-kickback Statute, (4) maintain our compliance and ethics program throughout our operations, including those of our subsidiaries, affiliates, agents and joint ventures (to the extent that we manage or control or THSMI manages or controls such joint ventures), and (5) notify the DOJ and undertake certain other obligations specified in the NPA relative to, among other things, any sale, merger or transfer of all or substantially all of our and THSMI’s respective business operations or the business operations of our or its subsidiaries or affiliates, including an obligation to include in any contract for sale, merger, transfer or other change in corporate form a provision binding the purchaser to retain the commitment of us or THSMI, or any successor-in-interest thereto, to comply with the NPA obligations except as may otherwise be agreed by the parties to the NPA in connection with a particular transaction. Except as may otherwise be agreed by the parties in connection with a particular transaction, if, during the term of the NPA, THSMI undertakes or we undertake any change in corporate form that involves business operations that are material to our consolidated operations or to the operations of any subsidiaries or affiliates involved in the conduct described in the NPA, whether such transaction is structured as a sale, asset sale, merger, transfer or other change in corporate form, we are required to provide notice to the Offices at least 30 days prior to undertaking any such change in corporate form.

The NPA was originally scheduled to expire on February 1, 2020 (three years from the date on which the Monitor was retained); however, the DOJ subsequently extended the expiration date of the NPA by nine months to November 1, 2020 following its determination that we had breached certain reporting obligations under the terms of the NPA. In the event the Offices determine, in their sole discretion, that the Company, or any of its subsidiaries or affiliates, has knowingly violated any provision of the NPA, the NPA could be further extended by the Offices, in their sole discretion without prejudice to the Offices’ other rights under the NPA. Conversely, in the event the Offices find, in their sole discretion, that there exists a change in circumstances sufficient to eliminate the need for a monitor, or that the other provisions of the NPA have been satisfied, the oversight of the Monitor or the NPA itself may be terminated early.

If, during the term of the NPA, THSMI commits any felony under federal law, or if the Company commits any felony related to the Anti-kickback Statute, or if THSMI or the Company fails to cooperate or otherwise fails to fulfill the obligations set forth in the NPA, then THSMI, the Company and our affiliates could be subject to prosecution, exclusion from participation in federal healthcare programs, and other substantial costs and penalties. The Offices retain sole discretion over determining whether there has been a breach of the NPA and whether to pursue prosecution. The NPA provides that, in the event the DOJ determines that the Company or THSMI has breached the NPA, the DOJ will provide written notice prior to instituting any prosecution of the Company or THSMI resulting from such breach. Following receipt of such notice, the Company and THSMI have the opportunity to respond to the DOJ to explain the nature and circumstances of the breach, as well as the actions taken to address and remediate the situation, which the DOJ shall consider in determining whether to pursue prosecution of the Company, THSMI or its affiliates. Any liability or consequences associated with a failure to comply with the NPA could have a material adverse effect on our business, financial condition, results of operations or cash flows.

Availability of Documents—The full text of our *Quality, Compliance and Ethics Program Charter*, our *Standards of Conduct*, and a number of our ethics and compliance policies and procedures are published on our website, at www.tenethealth.com, under the “Our Commitment To Compliance” caption in the “About Us” section. A copy of our

Table of Contents

Standards of Conduct is also available upon written request to our corporate secretary. Information about how to contact our corporate secretary is set forth under “Company Information” below. Amendments to the *Standards of Conduct* and any grant of a waiver from a provision of the *Standards of Conduct* requiring disclosure under applicable SEC rules will be disclosed at the same location as the *Standards of Conduct* on our website. A copy of the NPA is attached as an exhibit to our Current Report on Form 8-K filed with the SEC on October 3, 2016, and the letter agreement amending the term of the NPA, which was finalized on June 1, 2018, is attached as an exhibit to our Report on Form 10-Q for the quarter ended June 30, 2018.

INSURANCE

Property Insurance—We have property, business interruption and related insurance coverage to mitigate the financial impact of catastrophic events or perils that is subject to deductible provisions based on the terms of the policies. These policies are on an occurrence basis. For the policy periods April 1, 2017 through March 31, 2018 and April 1, 2018 through March 31, 2019, we have coverage totaling \$850 million per occurrence, after deductibles and exclusions, with annual aggregate sub-limits of \$100 million for floods, \$200 million for earthquakes and a per-occurrence sub-limit of \$200 million for named windstorms with no annual aggregate. With respect to fires and other perils, excluding floods, earthquakes and named windstorms, the total \$850 million limit of coverage per occurrence applies. Deductibles are 5% of insured values up to a maximum of \$25 million for California earthquakes, floods and named windstorms, and 2% of insured values for New Madrid fault earthquakes, with a maximum per claim deductible of \$25 million. Floods and certain other covered losses, including fires and other perils, have a minimum deductible of \$1 million.

Professional and General Liability Insurance—As is typical in the healthcare industry, we are subject to claims and lawsuits in the ordinary course of business. The healthcare industry has seen significant increases in the cost of professional liability insurance due to increased litigation. In response, we maintain captive insurance companies to self-insure a substantial portion of our professional and general liability risk. We also own a captive insurance company that writes professional liability insurance for a small number of physicians, including employed physicians, who are on the medical staffs of certain of our hospitals.

Claims in excess of our self-insurance retentions are insured with commercial insurance companies. If the aggregate limit of any of our professional and general liability policies is exhausted, in whole or in part, it could deplete or reduce the limits available to pay any other material claims applicable to that policy period. Any losses not covered by or in excess of the amounts maintained under insurance policies will be funded from our working capital.

In addition to the reserves recorded by our captive insurance subsidiaries, we maintain reserves, including reserves for incurred but not reported claims, for our self-insured professional liability retentions and claims in excess of the policies’ aggregate limits, based on modeled estimates of losses and related expenses. Also, we provide standby letters of credit to certain of our insurers, which can be drawn upon under certain circumstances, to collateralize the deductible and self-insured retentions under a selected number of our professional and general liability insurance programs.

COMPANY INFORMATION

Tenet Healthcare Corporation was incorporated in the State of Nevada in 1975. We file annual, quarterly and current reports, proxy statements and other documents with the SEC under the Securities Exchange Act of 1934, as amended (the “Exchange Act”). Our reports, proxy statements and other documents filed electronically with the SEC are available at the website maintained by the SEC at www.sec.gov.

Edgar Filing: TENET HEALTHCARE CORP - Form 10-K

Our website, www.tenethealth.com, also offers, free of charge, access to our annual, quarterly and current reports (and amendments to such reports), and other filings made with, or furnished to, the SEC as soon as reasonably practicable after such documents are submitted to the SEC. The information found on our website is not part of this or any other report we file with or furnish to the SEC.

Inquiries directed to our corporate secretary may be sent to Corporate Secretary, Tenet Healthcare Corporation, P.O. Box 139003, Dallas, Texas 75313-9003 or by e-mail at CorporateSecretary@tenethealth.com.

Table of Contents**EXECUTIVE OFFICERS**

Information about our executive officers, as of February 25, 2019, is as follows:

<u>Name</u>	<u>Position</u>	<u>Age</u>
Ronald A. Rittenmeyer	Executive Chairman and Chief Executive Officer	71
Saumya Sutaria, M.D.	Chief Operating Officer	46
Daniel J. Cancelmi	Chief Financial Officer	56
Keith B. Pitts	Vice Chairman	61
Audrey T. Andrews	Senior Vice President and General Counsel	52

Mr. Rittenmeyer was named Tenet's executive chairman in August 2017 and chief executive officer in October 2017. He has served on Tenet's board of directors since 2010, most recently as lead director. He previously served as chairman of the board and chief executive officer of Millennium Health, a health solutions company. He served as the chairman, president and chief executive officer of Expert Global Solutions, Inc., a provider of business process outsourcing services, from 2011 to 2014. From 2005 to 2008, Mr. Rittenmeyer held a number of senior management positions with Electronic Data Systems Corporation, including chairman and chief executive officer from 2007 to 2008, president from 2006 to 2008, chief operating officer from 2005 to 2007 and executive vice president, global service delivery, from 2005 to 2006. Prior to that, he was a managing director of the Cypress Group, a private equity firm, serving from 2004 to 2005. He served as chairman, chief executive officer and president of Safety-Kleen Corp. from 2001 to 2004. Among his other leadership roles, Mr. Rittenmeyer served as chief executive officer and president of AmeriServe Food Distribution Inc. from 2000 to 2001, chairman, chief executive officer and president of RailTex, Inc. from 1998 to 2000, president and chief operating officer of Ryder TRS, Inc. from 1997 to 1998, president and chief operating officer of Merisel, Inc. from 1995 to 1996 and chief operating officer of Burlington Northern Railroad Co. from 1994 to 1995. Mr. Rittenmeyer received his bachelor of science degree in commerce and economics from Wilkes University and his M.B.A. from Rockhurst University. He is chairman of the Federation of American Hospitals' board of directors, and he currently serves on the board of directors of two other public companies: American International Group, Inc. and IQVIA Holdings Inc.

Dr. Sutaria was appointed Tenet's chief operating officer in January 2019. In this role, he oversees all of Tenet's acute care hospitals and hospital-affiliated outpatient facilities and physician practices. He also leads other functions across the enterprise within Tenet, USPI and Conifer. Prior to joining the Company, Dr. Sutaria worked for McKinsey & Company for 18 years, most recently as a Senior Partner providing advisory support for hospitals, healthcare systems, physicians groups, ambulatory care models, integrated delivery, and government-led delivery, while also working with institutional investors in healthcare. He previously held an associate clinical faculty appointment at the University of California at San Francisco, where he also engaged in postgraduate training with a focus in internal medicine and cardiology. Dr. Sutaria received his bachelor's degree in molecular and cellular biology and his bachelor's degree in economics, both from the University of California, Berkeley, as well as his M.D. from the University of California, San Diego.

Mr. Cancelmi was appointed Tenet's chief financial officer in September 2012. He previously served as senior vice president from April 2009, principal accounting officer from April 2007 and controller from September 2004. Mr. Cancelmi was a vice president and assistant controller at Tenet from September 1999 until his promotion to controller. He joined the Company as chief financial officer of Hahnemann University Hospital. Prior to that, he held various positions at PricewaterhouseCoopers, including in the firm's National Accounting and SEC office in New York City. Mr. Cancelmi is a certified public accountant who received his bachelor's degree in accounting from Duquesne University in Pittsburgh. He is also a member of the American Institute of Certified Public Accountants and

the Florida and Pennsylvania Institutes of Certified Public Accountants.

Mr. Pitts was appointed vice chairman following Tenet's acquisition of Vanguard Health Systems, Inc. ("Vanguard") in October 2013. He was Vanguard's vice chairman from May 2001 until the acquisition and an executive vice president from August 1999 until May 2001. Mr. Pitts also served as a director of Vanguard from August 1999 until September 2004. Before joining Vanguard, Mr. Pitts was the chairman and chief executive officer of Mariner Post-Acute Network and its predecessor, Paragon Health Network, a nursing home management company, from November 1997 until June 1999. He served as the executive vice president and chief financial officer for OrNda HealthCorp, prior to its acquisition by Tenet, from August 1992 to January 1997, and, before that, as a consultant to many healthcare organizations, including as a partner in Ernst & Young's healthcare consulting practice. Mr. Pitts is a certified public accountant who received his bachelor's degree in business administration from the University of Florida. He is a member of the American Institute of Certified Public Accountants and the Florida Institute of Certified Public Accountants.

Table of Contents

Ms. Andrews was appointed senior vice president and general counsel in January 2013. In this capacity, she oversees the law department and government relations for Tenet, USPI and Conifer. From July 2008 through December 2012, she served as senior vice president and chief compliance officer and, prior to that, served as vice president and chief compliance officer from November 2006. She joined Tenet in 1998 as hospital operations counsel. Ms. Andrews received her J.D. and her bachelor's degree in government, both from the University of Texas at Austin. She is a member of the American and Texas Bar Associations and the American Health Lawyers Association.

FORWARD-LOOKING STATEMENTS

This report includes “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Exchange Act, each as amended. All statements, other than statements of historical or present facts, that address activities, events, outcomes, business strategies and other matters that we plan, expect, intend, assume, believe, budget, predict, forecast, project, estimate or anticipate (and other similar expressions) will, should or may occur in the future are forward-looking statements, including (but not limited to) disclosure regarding our future earnings, financial position, operational and strategic initiatives, and developments in the healthcare industry. Forward-looking statements represent management's expectations, based on currently available information, as to the outcome and timing of future events, but, by their nature, address matters that are indeterminate. They involve known and unknown risks, uncertainties and other factors, many of which we are unable to predict or control, that may cause our actual results, performance or achievements to be materially different from those expressed or implied by forward-looking statements. Such factors include, but are not limited to, the following:

Our ability to achieve operating and financial targets, attain expected levels of patient volumes, and identify and execute on measures designed to save or control costs or streamline operations, including our ability to realize savings under our cost-reduction initiatives;

The outcome of the process we have undertaken to explore a sale of or other strategic alternatives for Conifer;

Potential disruptions to our business or diverted management attention as a result of the Conifer strategic review process or our cost-reduction efforts, including our plans to outsource certain functions unrelated to direct patient care;

The impact on our business of recent and future modifications of or judicial challenges to the Affordable Care Act and the enactment of, or changes in, other statutes and regulations affecting the healthcare industry generally;

Cuts to Medicare and Medicaid payment rates or changes in reimbursement practices or to Medicaid supplemental payment programs;

Adverse regulatory developments, government investigations or litigation;

Adverse developments with respect to our ability to comply with the terms of the Non-Prosecution Agreement, including any breach of the agreement;

Our ability to enter into or renew managed care provider arrangements on acceptable terms; and changes in service mix, revenue mix and surgical volumes, including potential declines in the population covered under managed care agreements;

The effect that adverse economic conditions, consumer behavior and other factors have on our volumes and our ability to collect outstanding receivables on a timely basis, among other things; and increases in the amount of uninsured accounts and deductibles and copays for insured accounts;

• Our success in completing acquisitions, divestitures and other corporate development transactions; and our success in entering into, and managing the relationships and risks associated with, joint ventures;

• Our success in recruiting and retaining physicians and other healthcare professionals;

• The impact of competition on all aspects of our business;

21

Table of Contents

The impact of our significant indebtedness; the availability and terms of capital to refinance existing debt, fund our operations and expand our business; and our ability to comply with our debt covenants and, over time, reduce leverage;

Potential security threats, catastrophic events and other disruptions affecting our information technology and related systems;

The timing and impact of additional changes in federal tax laws, regulations and policies, and the outcome of pending and any future tax audits, disputes and litigation associated with our tax positions; and

Other factors and risks referenced in this report and our other public filings.

When considering forward-looking statements, you should keep in mind the risk factors and other cautionary statements in this report. Should one or more of the risks and uncertainties described in this report occur, or should underlying assumptions prove incorrect, our actual results and plans could differ materially from those expressed in any forward-looking statement. We specifically disclaim any obligation to update any information contained in a forward-looking statement or any forward-looking statement in its entirety, except as required by law.

All forward-looking statements attributable to us are expressly qualified in their entirety by this cautionary statement.

ITEM 1A. RISK FACTORS

Our business is subject to a number of risks and uncertainties, many of which are beyond our control, that may cause our actual operating results or financial performance to be materially different from our expectations. If one or more of the events discussed in this report were to occur, actual outcomes could differ materially from those expressed in or implied by any forward-looking statements we make in this report or our other filings with the SEC, and our business, financial condition, results of operations or liquidity could be materially adversely affected; furthermore, the trading price of our common stock could decline and our shareholders could lose all or part of their investment. Additional risks and uncertainties not presently known, or currently deemed immaterial, may also constrain our business and operations.

We cannot predict the impact that modifications of the Affordable Care Act may have on our business, financial condition, results of operations or cash flows.

The initial expansion of health insurance coverage under the Affordable Care Act resulted in an increase in the number of patients using our facilities with either private or public program coverage and a decrease in uninsured and charity care admissions. Although a substantial portion of both our patient volumes and, as result, our revenues has historically been derived from government healthcare programs, reductions to our reimbursement under the Medicare and Medicaid programs as a result of the ACA have been partially offset by increased revenues from providing care to previously uninsured individuals.

The President issued an executive order in January 2017 declaring that it is the official policy of his administration to seek the prompt repeal of the ACA and directing the heads of all executive departments and agencies to minimize the economic and regulatory burdens of the ACA to the maximum extent permitted by law while the ACA remains in effect. The White House also sent a memorandum to federal agencies directing them to freeze any new or pending regulations. In October 2017, the administration announced that reimbursements to insurance companies for ACA cost-sharing reduction plans offered through the health insurance marketplace would be discontinued. CSR payments compensate insurers for subsidizing out-of-pocket costs for low-income enrollees. Without the CSR payments, many insurers increased premiums for plans offered on ACA exchanges and a few withdrew entirely from offering plans on

some of the exchanges. In addition, in December 2017, Congress passed and the President signed a tax reform bill into law that, among other things, eliminates the ACA's individual mandate penalty for not buying health insurance starting in 2019. The Congressional Budget Office and the staff of the Joint Committee on Taxation estimated that eliminating the mandate penalty starting in 2019 – and making no other changes to the then-current law – would cause the number of people with health insurance to decrease by 4 million in 2019 and 13 million in 2027. Members of Congress have also proposed measures that would expand government-sponsored coverage, including single-payer proposals. We cannot predict if or when further modification of the ACA will occur or what action, if any, Congress might take with respect to eventually repealing and possibly replacing the law.

Furthermore, there have also been successful judicial challenges to the ACA, including a December 2018 ruling by the U.S. District Court for the Northern District of Texas that the ACA's individual mandate is unconstitutional. Because the judge's order was stayed pending appeal, the decision's near-term impact on health insurance coverage under the ACA may be limited; however, uncertainty over the future of the ACA has intensified. The ultimate outcome of this decision and other

Table of Contents

judicial challenges is indeterminate. We are also unable to predict the impact of administrative, regulatory and legislative changes, and market reactions to those changes, on our future revenues and operations. However, if the ultimate impact is that significantly fewer individuals have private or public health coverage, we likely will experience decreased volumes, reduced revenues and an increase in uncompensated care, which would adversely affect our results of operations and cash flows. This negative effect will be exacerbated if the ACA's reductions in Medicare reimbursement and reductions in Medicare DSH payments that have already taken effect are not reversed if the law is repealed or if further reductions (including Medicaid DSH reductions scheduled to take effect in federal fiscal years 2020 through 2025) are made.

Further changes in the Medicare and Medicaid programs or other government healthcare programs, including reductions in scale and scope, could have an adverse effect on our business.

For the year ended December 31, 2018, approximately 20% and 9% of our net patient service revenues from our hospitals and related outpatient facilities were from the Medicare program and various state Medicaid programs, respectively, in each case excluding Medicare and Medicaid managed care programs. The Medicare and Medicaid programs are subject to: statutory and regulatory changes, administrative rulings, interpretations and determinations concerning patient eligibility requirements, funding levels and the method of calculating payments or reimbursements, among other things; requirements for utilization review; and federal and state funding restrictions, all of which could materially increase or decrease payments from these government programs in the future, as well as affect the cost of providing services to our patients and the timing of payments to our facilities, which could in turn adversely affect our overall business, financial condition, results of operations or cash flows.

Several states in which we operate face budgetary challenges that have resulted, and likely will continue to result, in reduced Medicaid funding levels to hospitals and other providers. Because most states must operate with balanced budgets, and the Medicaid program is generally a significant portion of a state's budget, states can be expected to adopt or consider adopting future legislation designed to reduce or not increase their Medicaid expenditures. In addition, some states delay issuing Medicaid payments to providers to manage state expenditures. As an alternative means of funding provider payments, many of the states in which we operate have adopted provider fee programs or have received federal government waivers allowing them to test new approaches and demonstration projects to improve care. The timing of federal approval of these state-based Medicaid provider fee revenue programs – particularly the California provider fee program – may have an impact on our net operating revenues and cash flows in any given period. Continuing pressure on state budgets and other factors could result in future reductions to Medicaid payments, payment delays, changes to Medicaid supplemental payment programs or additional taxes on hospitals.

In general, we are unable to predict the effect of future government healthcare funding policy changes on our operations. If the rates paid by governmental payers are reduced, if the scope of services covered by governmental payers is limited, or if we or one or more of our subsidiaries' hospitals are excluded from participation in the Medicare or Medicaid program or any other government healthcare program, there could be a material adverse effect on our business, financial condition, results of operations or cash flows.

Our business and financial results could be harmed if we are alleged to have violated existing regulations or if we fail to comply with new or changed regulations.

Our hospitals, outpatient centers and related healthcare businesses are subject to extensive federal, state and local regulation relating to, among other things, licensure, contractual arrangements, conduct of operations, privacy of patient information, ownership of facilities, physician relationships, addition of facilities and services, and reimbursement rates for services. The laws, rules and regulations governing the healthcare industry are extremely complex and, in certain areas, the industry has little or no regulatory or judicial interpretation for guidance. Moreover, under the ACA, the government and its contractors may suspend Medicare and Medicaid payments to providers of

services “pending an investigation of a credible allegation of fraud.” The potential consequences for violating such laws, rules or regulations include reimbursement of government program payments, the assessment of civil monetary penalties, including treble damages, fines, which could be significant, exclusion from participation in federal healthcare programs, or criminal sanctions against current or former employees, any of which could have a material adverse effect on our business, financial condition or cash flows. Even a public announcement that we are being investigated for possible violations of law could have a material adverse effect on the value of our common stock and our business reputation could suffer.

Furthermore, healthcare, as one of the largest industries in the United States, continues to attract much legislative interest and public attention. We are unable to predict the future course of federal, state and local healthcare regulation or legislation, including Medicare and Medicaid statutes and regulations. Further changes in the regulatory framework negatively

Table of Contents

affecting healthcare providers could have a material adverse effect on our business, financial condition, results of operations or cash flows.

As we explore outsourcing and offshoring of certain functions unrelated to direct patient care to enhance efficiency, we must ensure that those operations will be compliant with U.S. healthcare industry-specific requirements. In addition, we are required to comply with various federal and state labor laws, rules and regulations governing a variety of workplace wage and hour issues. From time to time, we have been and expect to continue to be subject to regulatory proceedings and private litigation concerning our application of such laws, rules and regulations.

Conifer and its subsidiaries are subject to numerous federal, state and local consumer protection and other laws governing such topics as privacy, financial services, and billing and collections activities. Regulations governing Conifer's operations are subject to changing interpretations that may be inconsistent among different jurisdictions. In addition, a regulatory determination made by, or a settlement or consent decree entered into with, one regulatory agency may not be binding upon, or preclude, investigations or regulatory actions by other agencies. Conifer's failure to comply with applicable consumer protection and other laws could result in, among other things, the issuance of cease and desist orders (which can include orders for restitution or rescission of contracts, as well as other kinds of affirmative relief), the imposition of fines or refunds, and other civil and criminal penalties, some of which could be significant in the case of knowing or reckless violations. In addition, Conifer's failure to comply with the statutes and regulations applicable to it could result in reduced demand for its services, invalidate all or portions of some of Conifer's services agreements with its clients, give clients the right to terminate Conifer's services agreements with them or give rise to contractual liabilities, among other things, any of which could have a material adverse effect on Conifer's business. Furthermore, if Conifer or its subsidiaries become subject to fines or other penalties, it could harm Conifer's reputation, thereby making it more difficult for Conifer to retain existing clients or attract new clients.

If we breach or otherwise fail to comply with our Non-Prosecution Agreement, we could be subject to criminal prosecution, substantial penalties and exclusion from participation in federal healthcare programs, any of which could adversely impact our business, financial condition, results of operations or cash flows.

In September 2016, one of our subsidiaries, Tenet HealthSystem Medical, Inc., entered into a Non-Prosecution Agreement with the DOJ's Criminal Division, Fraud Section, and the U.S. Attorney's Office for the Northern District of Georgia, as described in "Compliance and Ethics – Non-Prosecution Agreement" above. If, during the term of the NPA, THSMI commits any felony under federal law, or if the Company commits any felony related to the Anti-kickback Statute, or if THSMI or the Company fails to cooperate or otherwise fails to fulfill the obligations set forth in the NPA, then THSMI, the Company and our affiliates could be subject to prosecution, exclusion from participation in federal healthcare programs, and other substantial costs and penalties. The Offices retain sole discretion over determining whether there has been a breach of the NPA and whether to pursue prosecution. Any liability or consequences associated with a failure to comply with the NPA could have a material adverse effect on our business, financial condition, results of operations or cash flows.

We could be subject to substantial uninsured liabilities or increased insurance costs as a result of significant legal actions.

We are subject to medical malpractice lawsuits, antitrust and employment class action lawsuits, and other legal actions in the ordinary course of business. Some of these actions may involve large demands, as well as substantial defense costs. Even in states that have imposed caps on damages, litigants are seeking recoveries under new theories of liability that might not be subject to such caps. Our professional and general liability insurance does not cover all claims against us, and it may not continue to be available at a reasonable cost for us to maintain at adequate levels, as the healthcare industry has seen significant increases in the cost of such insurance due to increased litigation. We cannot predict the outcome of current or future legal actions against us or the effect that judgments or settlements in

such matters may have on us or on our insurance costs. Additionally, all professional and general liability insurance we purchase is subject to policy limitations. If the aggregate limit of any of our professional and general liability policies is exhausted, in whole or in part, it could deplete or reduce the limits available to pay any other material claims applicable to that policy period. Any losses not covered by or in excess of the amounts maintained under insurance policies will be funded from our working capital. Furthermore, one or more of our insurance carriers could become insolvent and unable to fulfill its or their obligations to defend, pay or reimburse us when those obligations become due. In that case or if payments of claims exceed our estimates or are not covered by our insurance, it could have a material adverse effect on our business, financial condition, results of operations or cash flows.

Table of Contents

If we are unable to enter into, maintain and renew managed care contractual arrangements on acceptable terms, if we experience material reductions in the contracted rates we receive from managed care payers or if we have difficulty collecting from managed care payers, our results of operations could be adversely affected.

The amount of our managed care net patient service revenues, including Medicare and Medicaid managed care programs, from our hospitals and related outpatient facilities during the year ended December 31, 2018 was approximately \$9.2 billion, which represented approximately 65% of our total net patient service revenues. In addition, in the year ended December 31, 2018, our commercial managed care net inpatient revenue per admission from the hospitals and related outpatient facilities in our Hospital Operations and other segment was approximately 89% higher than our aggregate yield on a per admission basis from government payers, including managed Medicare and Medicaid insurance plans. Our ability to negotiate favorable contracts with HMOs, insurers offering preferred provider arrangements and other managed care plans, as well as add new facilities to our existing agreements at contracted rates, significantly affects our revenues and operating results. We currently have thousands of managed care contracts with various HMOs and PPOs; however, our top ten managed care payers generated 65% of our managed care net patient service revenues for the year ended December 31, 2018. Because of this concentration, we may experience a short or long-term adverse effect on our net operating revenues if we cannot renew, replace or otherwise mitigate the impact of expired contracts with significant payers. Furthermore, any disputes between us and significant managed care payers could have a material adverse effect on our financial condition, results of operations or cash flows. At December 31, 2018, 61% of our net accounts receivable for our Hospital Operations and other segment was due from managed care payers.

Private payers are increasingly attempting to control healthcare costs through direct contracting with hospitals to provide services on a discounted basis, increased utilization reviews and greater enrollment in managed care programs, such as HMOs and PPOs. Any negotiated discount programs we agree to generally limit our ability to increase charges in response to increasing costs. Furthermore, the ongoing trend toward consolidation among private managed care payers tends to increase their bargaining power over prices and fee structures. Our future success will depend, in part, on our ability to renew existing managed care contracts and enter into new managed care contracts on competitive terms. Other healthcare companies, including some with greater financial resources, greater geographic coverage or a wider range of services, may compete with us for these opportunities. For example, some of our competitors may negotiate exclusivity provisions with managed care plans or otherwise restrict the ability of managed care companies to contract with us. Any material reductions in the contracted rates we receive for our services or any significant difficulties in collecting receivables from managed care payers could have a material adverse effect on our financial condition, results of operations or cash flows.

Our cost-reduction initiatives may not deliver the benefits we expect, and actions taken may adversely affect our business, financial condition and results of operations.

Our future financial performance and level of profitability is dependent, in part, on various cost-reduction initiatives, including a recently announced strategy to explore outsourcing certain functions unrelated to direct patient care. We may encounter challenges in executing our cost-reduction initiatives and not achieve the intended cost savings. In addition, we may face wrongful termination, discrimination or other legal claims from employees affected by any workforce reductions, and we may incur substantial costs defending against such claims, regardless of their merits. Such claims may also significantly increase our severance costs. Workforce reductions, whether as a result of internal restructuring or in connection with outsourcing efforts, may result in the loss of numerous long-term employees, the loss of institutional knowledge and expertise, the reallocation of certain job responsibilities and the disruption of business continuity, all of which could negatively affect operational efficiencies and increase our operating expenses in the short term. Moreover, outsourcing and offshoring may expose us to additional risks, such as reduced control over operational quality and timing, foreign political and economic instability, and compliance and regulatory challenges. Our failure to effectively execute our cost-reduction initiatives may lead to significant volatility, and a

decline, in the price of our common stock. We cannot guarantee that our cost-reduction initiatives will be successful, and we may need to take additional steps in the future to achieve our profitability goals.

We cannot provide any assurances that we will be successful in divesting assets in non-core markets or that we will complete the process we have initiated for the potential divestiture of or other transaction involving Conifer.

We continue to exit service lines, businesses and markets that we believe are no longer strategic to our long-term growth. To that end, in 2018 we divested eight hospitals in the United States, as well as all of our operations in the United Kingdom. In addition, in January 2019, we completed the previously announced sale of three hospitals in the Chicago area that we owned at December 31, 2018. We cannot provide any assurances that completed, planned or future divestitures will achieve their business goals or the cost and service synergies we expect. We also cannot predict the outcome of the process we have been exploring regarding strategic alternatives for Conifer, including a potential sale or merger, a tax-efficient spin-off or a combination of alternative transactions.

Table of Contents

With respect to all proposed divestitures of assets or businesses, we may fail to obtain applicable regulatory approvals for such divestitures, including any approval that may be required under our NPA. Moreover, we may encounter difficulties in finding acquirers or alternative exit strategies on terms that are favorable to us, which could delay the receipt of anticipated proceeds necessary for us to complete our planned strategic objectives. In addition, our divestiture activities have required, and may in the future require, us to retain significant pre-closing liabilities, recognize impairment charges (as discussed below) or agree to contractual restrictions that limit our ability to reenter the applicable market, which may be material. Furthermore, our divestiture or other corporate development activities may present financial and operational risks, including (1) the diversion of management attention from existing core businesses, (2) adverse effects (including a deterioration in the related asset or business and, in Conifer's case, the loss of existing clients and the difficulties associated with securing new clients) from the announcement of the planned or potential divestiture, and (3) the challenges associated with separating personnel and financial and other systems.

A divestiture or other separation of Conifer could adversely affect our earnings and cash flows.

Conifer contributes a significant portion of the Company's earnings and cash flows. We have been engaged in a process to consider a divestiture or other strategic alternatives for Conifer, such as a merger, a tax-efficient spin-off or a combination of alternative transactions. Although there can be no assurance that this process will result in a consummated transaction, any separation of all or a portion of Conifer's business could adversely affect our earnings and cash flows.

Economic factors, consumer behavior and other dynamics have affected, and may continue to impact, our business, financial condition and results of operations.

We believe broad economic factors (including high unemployment rates in some of the markets our facilities serve), instability in consumer spending, uncertainty regarding the future of the Affordable Care Act, and the continued shift of additional financial responsibility to insured patients through higher co-pays, deductibles and premium contributions, among other dynamics, have affected our service mix, revenue mix and volumes, as well as our ability to collect outstanding receivables. Any increase in the amount or deterioration in the collectability of patient accounts receivable will adversely affect our cash flows and results of operations. The U.S. economy remains unpredictable. If industry trends, such as reductions in commercial managed care enrollment and patient decisions to postpone or cancel elective and non-emergency healthcare procedures, worsen or if general economic conditions deteriorate, we may not be able to sustain future profitability, and our liquidity and ability to repay our outstanding debt may be harmed.

Trends affecting our actual or anticipated results may require us to record charges that may negatively impact our results of operations.

As a result of factors that have negatively affected our industry generally and our business specifically, we have been required to record various charges in our results of operations. During the years ended December 31, 2018 and 2017, we recorded impairment charges of \$77 million and \$402 million, respectively. Our impairment tests presume stable, improving or, in some cases, declining operating results in our hospitals, which are based on programs and initiatives being implemented that are designed to achieve the hospitals' most recent projections. If these projections are not met, or negative trends occur that impact our future outlook, future impairments of long-lived assets and goodwill may occur, and we may incur additional restructuring charges, which could be material. Future restructuring of our operating structure that changes our goodwill reporting units could also result in future impairments of our goodwill. Any such charges could negatively impact our results of operations.

When we acquire new assets or businesses, we become subject to various risks and uncertainties that could adversely affect our results of operations and financial condition.

We have completed a number of acquisitions in recent years, and we expect to pursue similar transactions in the future. A key business strategy for USPI, in particular, is the acquisition and development of facilities, primarily through the formation of joint ventures with physicians and healthcare systems. With respect to planned or future transactions, we cannot provide any assurances that we will be able to identify suitable candidates, consummate transactions on terms that are favorable to us, or achieve synergies or other benefits in a timely manner or at all. Furthermore, companies or operations acquired may not be profitable or may not achieve the profitability that justifies the investments made. In addition, we may face significant challenges in integrating personnel and financial and other systems. Future acquisitions could result in potentially dilutive issuances of equity securities, the incurrence of additional debt and contingent liabilities, and increased operating expenses, any of which could adversely affect our results of operations and financial condition.

Table of Contents

USPI and our hospital-based joint ventures depend on existing relationships with key healthcare system partners. If we are unable to maintain historical relationships with these healthcare systems, or enter into new relationships, we may be unable to implement our business strategies successfully.

USPI and our hospital-based joint ventures depend in part on the efforts, reputations and success of healthcare system partners and the strength of our relationships with those healthcare systems. Our joint ventures could be adversely affected by any damage to those healthcare systems' reputations or to our relationships with them. In addition, damage to our business reputation could negatively impact the willingness of healthcare systems to enter into relationships with us or USPI. If we are unable to maintain existing arrangements on favorable terms or enter into relationships with additional healthcare system partners, we may be unable to implement our business strategies for our joint ventures successfully.

The remaining put/call arrangements associated with USPI, if settled in cash, will require us to utilize our cash flow or incur additional indebtedness to satisfy the payment obligations in respect of such arrangements.

As part of the formation of USPI in 2015, we entered into a put/call agreement with respect to the equity interests in USPI held by our joint venture partners at that time. During 2016, 2017 and 2018, we paid \$1.473 billion in the aggregate to purchase additional shares of USPI to increase our ownership interest in USPI to 95%.

We have also entered into a separate put/call agreement (the "Baylor Put/Call Agreement") with respect to the remaining 5% outside ownership interest in USPI held by Baylor University Medical Center. Each year starting in 2021, Baylor may require us to purchase, or "put" to us, up to 33.3% of their total shares in USPI held as of January 1, 2017. In each year that Baylor does not put the full 33.3% of USPI's shares allowable, we may call the difference between the number of shares Baylor put and the maximum number of shares they could have put that year. In addition, the Baylor Put/Call Agreement contains a call option pursuant to which we have the ability to acquire all of Baylor's ownership interest by 2024. In each case, we have the ability to choose whether to settle the purchase price for the Baylor put/call in cash or shares of our common stock.

The put and call arrangements described above, to the extent settled in cash, may require us to dedicate a substantial portion of our cash flow to satisfy our payment obligations in respect of such arrangements, which may reduce the amount of funds available for our operations, capital expenditures and corporate development activities. Similarly, we may be required to incur additional indebtedness to satisfy our payment obligations in respect of such arrangements, which could have important consequences to our business and operations, as described more fully below under "*Our level of indebtedness could, among other things, adversely affect our ability to raise additional capital to fund our operations, limit our ability to react to changes in the economy or our industry, and prevent us from meeting our obligations under the agreements relating to our indebtedness.*"

Our joint venture arrangements are subject to a number of operational risks that could have a material adverse effect on our business, results of operations and financial condition.

We have invested in a number of joint ventures with other entities when circumstances warranted the use of these structures, and we may form additional joint ventures in the future. These joint ventures may not be profitable or may not achieve the profitability that justifies the investments made. Furthermore, the nature of a joint venture requires us to consult with and share certain decision-making powers with unaffiliated third parties, some of which may be not-for-profit healthcare systems. If our joint venture partners do not fulfill their obligations, the affected joint venture may not be able to operate according to its business or strategic plans. In that case, our results could be adversely affected or we may be required to increase our level of financial commitment to the joint venture. Moreover, differences in economic or business interests or goals among joint venture participants could result in delayed decisions, failures to agree on major issues and even litigation. If these differences cause the joint ventures to deviate

from their business or strategic plans, or if our joint venture partners take actions contrary to our policies, objectives or the best interests of the joint venture, our results could be adversely affected. In addition, our relationships with not-for-profit healthcare systems and the joint venture agreements that govern these relationships are intended to be structured to comply with current revenue rulings published by the Internal Revenue Service, as well as case law relevant to joint ventures between for-profit and not-for-profit healthcare entities. Material changes in these authorities could adversely affect our relationships with not-for-profit healthcare systems and related joint venture arrangements.

Our participation in joint ventures is also subject to the risks that:

• We could experience an impasse on certain decisions because we do not have sole decision-making authority, which could require us to expend additional resources on resolving such impasses or potential disputes.

Table of Contents

• We may not be able to maintain good relationships with our joint venture partners (including healthcare systems), which could limit our future growth potential and could have an adverse effect on our business strategies.

• Our joint venture partners could have investment or operational goals that are not consistent with our corporate-wide objectives, including the timing, terms and strategies for investments or future growth opportunities.

Our joint venture partners might become bankrupt, fail to fund their share of required capital contributions or fail to fulfill their other obligations as joint venture partners, which may require us to infuse our own capital into any such venture on behalf of the related joint venture partner or partners despite other competing uses for such capital.

Many of our existing joint ventures require that one of our wholly owned affiliates provide a working capital line of credit to the joint venture, which could require us to allocate substantial financial resources to the joint venture potentially impacting our ability to fund our other short-term obligations.

• Some of our existing joint ventures require mandatory capital expenditures for the benefit of the applicable joint venture, which could limit our ability to expend funds on other corporate opportunities.

Our joint venture partners may have exit rights that would require us to purchase their interests upon the occurrence of certain events or the passage of certain time periods, which could impact our financial condition by requiring us to incur additional indebtedness in order to complete such transactions or, alternatively, in some cases we may have the option to issue shares of our common stock to our joint venture partners to satisfy such obligations, which would dilute the ownership of our existing stockholders.

• Our joint venture partners may have competing interests in our markets that could create conflict of interest issues.

• Any sale or other disposition of our interest in a joint venture or underlying assets of the joint venture may require consents from our joint venture partners, which we may not be able to obtain.

Certain corporate-wide or strategic transactions may also trigger other contractual rights held by a joint venture partner (including termination or liquidation rights) depending on how the transaction is structured, which could impact our ability to complete such transactions.

Our joint venture arrangements that involve financial and ownership relationships with physicians and others who either refer or influence the referral of patients to our hospitals or other healthcare facilities are subject to greater regulatory scrutiny from government enforcement agencies. While we endeavor to comply with the applicable safe harbors under the Anti-kickback Statute, certain of our current arrangements, including joint venture arrangements, do not qualify for safe harbor protection.

It is essential to our ongoing business that we attract an appropriate number of quality physicians in the specialties required to support our services and that we maintain good relations with those physicians.

The success of our business depends in significant part on the number, quality, specialties, and admitting and scheduling practices of the licensed physicians who have been admitted to the medical staffs of our hospitals and other facilities, as well as physicians who affiliate with us and use our facilities as an extension of their practices. Physicians are often not employees of the hospitals or surgery centers at which they practice. Members of the medical staffs of our facilities also often serve on the medical staffs of facilities we do not operate, and they are free to terminate their association with our facilities or admit their patients to competing facilities at any time. In addition, although physicians who own interests in our facilities are generally subject to agreements restricting them from owning an interest in competitive facilities, we may not learn of, or be unsuccessful in preventing, our physician partners from

acquiring interests in competitive facilities.

We expect to encounter increased competition from health insurers and private equity companies seeking to acquire providers in the markets where we operate physician practices and, where permitted by law, employ physicians. In some of our markets, physician recruitment and retention are affected by a shortage of physicians in certain specialties and the difficulties that physicians can experience in obtaining affordable malpractice insurance or finding insurers willing to provide such insurance. Furthermore, our ability to recruit and employ physicians is closely regulated. For example, the types, amount and duration of compensation and assistance we can provide to recruited physicians are limited by the Stark law, the Anti-kickback Statute, state anti-kickback statutes and related regulations. All arrangements with physicians must also be fair market value

28

Table of Contents

and commercially reasonable. If we are unable to attract and retain sufficient numbers of quality physicians by providing adequate support personnel, technologically advanced equipment, and facilities that meet the needs of those physicians and their patients, physicians may choose not to refer patients to our facilities, admissions and outpatient visits may decrease and our operating performance may decline.

Our labor costs could be adversely affected by competition for staffing, the shortage of experienced nurses and labor union activity.

The operations of our facilities are dependent on the efforts, abilities and experience of our management and medical support personnel, including nurses, therapists, pharmacists and lab technicians, as well as our employed physicians. We compete with other healthcare providers in recruiting and retaining employees, and, like others in the healthcare industry, we continue to experience a shortage of critical-care nurses in certain disciplines and geographic areas. As a result, from time to time, we may be required to enhance wages and benefits to recruit and retain experienced employees, make greater investments in education and training for newly licensed medical support personnel, or hire more expensive temporary or contract employees. Furthermore, state-mandated nurse-staffing ratios in California affect not only our labor costs, but, if we are unable to hire the necessary number of experienced nurses to meet the required ratios, they may also cause us to limit volumes, which would have a corresponding adverse effect on our net operating revenues. In general, our failure to recruit and retain qualified management, experienced nurses and other medical support personnel, or to control labor costs, could have a material adverse effect on our business, financial condition, results of operations or cash flows.

Increased labor union activity is another factor that could adversely affect our labor costs. At December 31, 2018, approximately 26% of the employees in our Hospital Operations and other segment were represented by labor unions. Less than 1% of the employees in our Ambulatory Care and Conifer segments belong to a union. Unionized employees – primarily registered nurses and service, technical and maintenance workers – are located at 35 of our hospitals, the majority of which are in California, Florida and Michigan. When negotiating collective bargaining agreements with unions, whether such agreements are renewals or first contracts, there is a possibility that strikes could occur, and our continued operation during any strikes could increase our labor costs and have an adverse effect on our patient volumes and net operating revenues. Organizing activities by labor unions could increase our level of union representation in future periods, which could result in increases in salaries, wages and benefits expense.

Our hospitals, outpatient centers and other healthcare businesses operate in competitive environments, and competition in our markets can adversely affect patient volumes.

The healthcare business is highly competitive, and competition among hospitals and other healthcare providers for patients has intensified in recent years. Generally, other hospitals and outpatient centers in the local communities we serve provide services similar to those we offer, and, in some cases, our competitors (1) are more established or newer than ours, (2) may offer a broader array of services or more desirable facilities to patients and physicians than ours, and (3) may have larger or more specialized medical staffs to admit and refer patients, among other things. Furthermore, healthcare consumers are now able to access hospital performance data on quality measures and patient satisfaction, as well as standard charges for services, to compare competing providers; if any of our hospitals achieve poor results (or results that are lower than our competitors) on quality measures or patient satisfaction surveys, or if our standard charges are or are perceived to be higher than our competitors, we may attract fewer patients. Additional quality measures and trends toward clinical or billing transparency may have an unanticipated impact on our competitive position and patient volumes.

In the future, we expect to encounter increased competition from system-affiliated hospitals and healthcare companies, as well as health insurers and private equity companies seeking to acquire providers, in specific geographic markets. We also face competition from specialty hospitals (some of which are physician-owned) and unaffiliated freestanding

outpatient centers for market share in high margin services and for quality physicians and personnel. In recent years, the number of freestanding specialty hospitals, surgery centers, emergency departments, urgent care centers and diagnostic imaging centers in the geographic areas in which we operate has increased significantly. Furthermore, some of the hospitals that compete with our hospitals are owned by government agencies or not-for-profit organizations supported by endowments and charitable contributions and can finance capital expenditures and operations on a tax-exempt basis. If our competitors are better able to attract patients, recruit physicians, expand services or obtain favorable managed care contracts at their facilities than we are, we may experience an overall decline in patient volumes.

Table of Contents

Conifer operates in a highly competitive industry, and its current or future competitors may be able to compete more effectively than Conifer does, which could have a material adverse effect on Conifer's margins, growth rate and market share.

As we explore a sale or other strategic alternatives for Conifer, we are continuing to market Conifer's revenue cycle management, patient communications and engagement services, and value-based care solutions businesses. The uncertainty regarding our plans for Conifer may have an adverse impact on Conifer's ability to secure new clients. There can be no assurance that Conifer will be successful in generating new client relationships, including with respect to hospitals we or Conifer's other clients sell, as the respective buyers of such hospitals may not continue to use Conifer's services or, if they do, they may not do so under the same contractual terms. The market for Conifer's solutions is highly competitive, and we expect competition may intensify in the future. Conifer faces competition from existing participants and new entrants to the revenue cycle management market, as well as from the staffs of hospitals and other healthcare providers who handle these processes internally. In addition, electronic medical record software vendors may expand into services offerings that compete with Conifer. To be successful, Conifer must respond more quickly and effectively than its competitors to new or changing opportunities, technologies, standards, regulations and client requirements. Moreover, existing or new competitors may introduce technologies or services that render Conifer's technologies or services obsolete or less marketable. Even if Conifer's technologies and services are more effective than the offerings of its competitors, current or potential clients might prefer competitive technologies or services to Conifer's technologies and services. Furthermore, increased competition has resulted and may continue to result in pricing pressures, which could negatively impact Conifer's margins, growth rate or market share.

Our level of indebtedness could, among other things, adversely affect our ability to raise additional capital to fund our operations, limit our ability to react to changes in the economy or our industry, and prevent us from meeting our obligations under the agreements relating to our indebtedness.

At December 31, 2018, we had approximately \$14.8 billion of total long-term debt, as well as \$95 million in standby letters of credit outstanding in the aggregate, under our senior secured revolving credit facility (as amended, "Credit Agreement") and our letter of credit facility agreement (as amended, "LC Facility"). Our Credit Agreement is collateralized by patient accounts receivable of substantially all of our domestic wholly owned acute care and specialty hospitals, and our LC Facility is guaranteed and secured by a first priority pledge of the capital stock and other ownership interests of certain of our hospital subsidiaries on an equal ranking basis with our existing senior secured notes. From time to time, we expect to engage in additional capital market, bank credit and other financing activities, depending on our needs and financing alternatives available at that time.

The interest expense associated with our indebtedness offsets a substantial portion of our operating income. During 2018, our interest expense was \$1.004 billion and represented 61% of our \$1.647 billion of operating income. As a result, relatively small percentage changes in our operating income can result in a relatively large percentage change in our net income and earnings per share, both positively and negatively. In addition:

- Our substantial indebtedness may limit our ability to adjust to changing market conditions and place us at a competitive disadvantage compared to our competitors that have less debt.

We may be more vulnerable in the event of a deterioration in our business, in the healthcare industry or in the economy generally, or if federal or state governments substantially limit or reduce reimbursement under the Medicare or Medicaid programs.

• Our debt service obligations reduce the amount of funds available for our operations, capital expenditures and corporate development activities, and may make it more difficult for us to satisfy our financial obligations.

Our substantial indebtedness could limit our ability to obtain additional financing to fund future capital expenditures, working capital, acquisitions or other needs.

Our significant indebtedness may result in the market value of our stock being more volatile, potentially resulting in larger investment gains or losses for our shareholders, than the market value of the common stock of other companies that have a relatively smaller amount of indebtedness.

A significant portion of our outstanding debt is either subject to early prepayment penalties, such as “make-whole premiums,” or is not currently callable. As a result, it may be costly to pursue debt repayment as a deleveraging strategy.

Table of Contents

Furthermore, our Credit Agreement, our LC Facility and the indentures governing our outstanding notes contain, and any future debt obligations may contain, covenants that, among other things, restrict our ability to pay dividends, incur additional debt and sell assets. See “*Restrictive covenants in the agreements governing our indebtedness may adversely affect us.*”

We may not be able to generate sufficient cash to service all of our indebtedness, and we may be forced to take other actions to satisfy our obligations under our indebtedness, which may not be successful.

Our ability to make scheduled payments on or to refinance our indebtedness depends on our financial and operating performance, which is subject to prevailing economic and competitive conditions and to financial, business and other factors that may be beyond our control. We cannot assure you that we will maintain a level of cash flows from operating activities sufficient to permit us to pay the principal, premium, if any, and interest on our indebtedness.

In addition, our ability to meet our debt service obligations is dependent upon the operating results of our subsidiaries and their ability to pay dividends or make other payments or advances to us. We hold most of our assets at, and conduct substantially all of our operations through, direct and indirect subsidiaries. Moreover, we are dependent on dividends or other intercompany transfers of funds from our subsidiaries to meet our debt service and other obligations, including payment on our outstanding debt. The ability of our subsidiaries to pay dividends or make other payments or advances to us will depend on their operating results and will be subject to applicable laws and restrictions contained in agreements governing the debt of such subsidiaries. Our less than wholly owned subsidiaries may also be subject to restrictions on their ability to distribute cash to us in their financing or other agreements and, as a result, we may not be able to access their cash flows to service their respective debt obligations.

If our cash flows and capital resources are insufficient to fund our debt service obligations, we may be forced to reduce or delay capital expenditures, including those required for operating our existing facilities, for integrating our historical acquisitions or for future corporate development activities, and such reduction or delay could continue for years. We also may be forced to sell assets or operations, seek additional capital, or restructure or refinance our indebtedness. We cannot assure you that we would be able to take any of these actions, that these actions would be successful and permit us to meet our scheduled debt service obligations, or that these actions would be permitted under the terms of our existing or future debt agreements, including our Credit Agreement, our LC Facility and the indentures governing our outstanding notes.

Restrictive covenants in the agreements governing our indebtedness may adversely affect us.

Our Credit Agreement, our LC Facility and the indentures governing our outstanding notes contain various covenants that, among other things, limit our ability and the ability of our subsidiaries to:

• incur, assume or guarantee additional indebtedness;

• incur liens;

• make certain investments;

• provide subsidiary guarantees;

• consummate asset sales;

• redeem debt that is subordinated in right of payment to outstanding indebtedness;

enter into sale and lease-back transactions;

enter into transactions with affiliates; and

consolidate, merge or sell all or substantially all of our assets.

These restrictions are subject to a number of important exceptions and qualifications.

In addition, so long as any obligation or commitment is outstanding under our Credit Agreement and LC Facility, the terms of such facilities require us to maintain a financial ratio relating to our ability to satisfy certain fixed expenses, including interest payments. Our ability to meet these restrictive covenants and financial ratio may be affected by events beyond our

Table of Contents

control, and we cannot assure you that we will meet those tests. These restrictions could limit our ability to obtain future financing, make acquisitions or needed capital expenditures, withstand economic downturns in our business or the economy in general, conduct operations or otherwise take advantage of business opportunities that may arise. In addition, a breach of any of these covenants could cause an event of default, which, if not cured or waived, could require us to repay the indebtedness immediately. Under these conditions, we are not certain whether we would have, or be able to obtain, sufficient funds to make accelerated payments.

Despite current indebtedness levels, we may be able to incur substantially more debt or otherwise increase our leverage. This could further exacerbate the risks described above.

We have the ability to incur additional indebtedness in the future, subject to the restrictions contained in our Credit Agreement, our LC Facility and the indentures governing our outstanding notes. We may decide to incur additional secured or unsecured debt in the future to finance our operations and any judgments or settlements or for other business purposes. Similarly, if we continue to sell assets, including the potential divestiture of or other strategic alternative involving Conifer, and do not use the proceeds to repay debt, this could further increase our financial leverage.

Our Credit Agreement provides for revolving loans in an aggregate principal amount of up to \$1 billion, with a \$300 million subfacility for standby letters of credit. Based on our eligible receivables, \$998 million was available for borrowing under the Credit Agreement at December 31, 2018. Our LC Facility provides for the issuance of standby and documentary letters of credit in an aggregate principal amount of up to \$180 million (subject to increase to up to \$200 million). At December 31, 2018, we had no cash borrowings outstanding under the Credit Agreement, and we had \$95 million of standby letters of credit outstanding in the aggregate under the Credit Agreement and the LC Facility. If new indebtedness is added or our leverage increases, the related risks that we now face could intensify.

Our business could be negatively affected by security threats, catastrophic events and other disruptions affecting our information technology and related systems.

Information technology is a critical component of the day-to-day operation of our business. We rely on our information technology to process, transmit and store sensitive and confidential data, including protected health information, personally identifiable information, and our proprietary and confidential business performance data. We utilize electronic health records and other information technology in connection with all of our operations, including our billing and supply chain and labor management operations. Our systems, in turn, interface with and rely on third-party systems. Although we monitor and routinely test our security systems and processes and have a diversified data network that provides redundancies as well as other measures designed to protect the integrity, security and availability of the data we process, transmit and store, the information technology and infrastructure we use have been, and will likely continue to be, subject to computer viruses, attacks by hackers, or breaches due to employee error or malfeasance. Attacks or breaches could impact the integrity, security or availability of data we process, transmit or store, or they could disrupt our information technology systems, devices or businesses. While we are not aware of having experienced a material breach of our systems, the preventive actions we take to reduce the risk of such incidents and protect our information technology may not be sufficient in the future. As cybersecurity threats continue to evolve, we may not be able to anticipate certain attack methods in order to implement effective protective measures, and we will be required to expend significant additional resources to continue to modify and strengthen our security measures, investigate and remediate any vulnerabilities in our information systems and infrastructure, and invest in new technology designed to mitigate security risks. Furthermore, we have an increased risk of security breaches or compromised intellectual property rights as a result of outsourcing certain functions unrelated to direct patient care. Though we have insurance against some cyber-risks and attacks, it may not offset the impact of a material loss event.

Third parties to whom we outsource certain of our functions, or with whom our systems interface and who may, in some instances, store our sensitive and confidential data, are also subject to the risks outlined above and may not have or use controls effective to protect such information. A breach or attack affecting any of these third parties could similarly harm our business. Further, successful cyber-attacks at other healthcare services companies, whether or not we are impacted, could lead to a general loss of consumer confidence in our industry that could negatively affect us, including harming the market perception of the effectiveness of our security measures or of the healthcare industry in general, which could result in reduced use of our services.

Our networks and technology systems are also subject to disruption due to events such as a major earthquake, fire, hurricane, telecommunications failure, ransomware attack, terrorist attack or other catastrophic event. Any breach or system interruption of our information systems or of third parties with access to our sensitive and confidential data could result in: the unauthorized disclosure, misuse or loss of such data; interruptions and delays in our normal business operations (including the collection of revenues); patient harm; potential liability under privacy, security, consumer protection or other applicable laws;

Table of Contents

regulatory penalties; and negative publicity and damage to our reputation. Any of these could have a material adverse effect on our business, financial position, results of operations or cash flows.

The utilization of our tax losses could be substantially limited if we experience an ownership change as defined in the Internal Revenue Code.

At December 31, 2018, we had federal net operating loss (“NOL”) carryforwards of approximately \$1.0 billion pre-tax available to offset future taxable income. These NOL carryforwards will expire in the years 2027 to 2034. Section 382 of the Internal Revenue Code imposes an annual limitation on the amount of a company’s taxable income that may be offset by the NOL carryforwards if it experiences an “ownership change” as defined in Section 382 of the Code. An ownership change occurs when a company’s “five-percent shareholders” (as defined in Section 382 of the Code) collectively increase their ownership in the company by more than 50 percentage points (by value) over a rolling three-year period. (This is different from a change in beneficial ownership under applicable securities laws.) These ownership changes include purchases of common stock under share repurchase programs, a company’s offering of its stock, the purchase or sale of company stock by five-percent shareholders, or the issuance or exercise of rights to acquire company stock. While we expect to be able to realize our total NOL carryforwards prior to their expiration, if an ownership change occurs, our ability to use the NOL carryforwards to offset future taxable income will be subject to an annual limitation and will depend on the amount of taxable income we generate in future periods. There is no assurance that we will be able to fully utilize the NOL carryforwards. Furthermore, we could be required to record a valuation allowance related to the amount of the NOL carryforwards that may not be realized, which could adversely impact our results of operations.

The industry trend toward value-based purchasing and alternative payment models may negatively impact our revenues.

Value-based purchasing and alternative payment model initiatives of both governmental and private payers tying financial incentives to quality and efficiency of care will increasingly affect the results of operations of our hospitals and other healthcare facilities, and may negatively impact our revenues if we are unable to meet expected quality standards. Medicare now requires providers to report certain quality measures in order to receive full reimbursement increases for inpatient and outpatient procedures that were previously awarded automatically. In addition, hospitals that meet or exceed certain quality performance standards will receive increased reimbursement payments, and hospitals that have “excess readmissions” for specified conditions will receive reduced reimbursement. Furthermore, Medicare no longer pays hospitals additional amounts for the treatment of certain hospital-acquired conditions (“HACs”), unless the conditions were present at admission. Hospitals that rank in the worst 25% of all hospitals nationally for HACs in the previous year receive reduced Medicare reimbursements. Moreover, the ACA prohibits the use of federal funds under the Medicaid program to reimburse providers for treating certain provider-preventable conditions.

The ACA also created the CMS Innovation Center to test innovative payment and service delivery models that have the potential to reduce Medicare, Medicaid or Children’s Health Insurance Program expenditures while preserving or enhancing the quality of care for beneficiaries. Participation in some of these models is voluntary; however, participation in certain bundled payment arrangements is mandatory for providers located in randomly selected geographic locations. Generally, the bundled payment models hold hospitals financially accountable for the quality and costs for an entire episode of care for a specific diagnosis or procedure from the date of the hospital admission or inpatient procedure through 90 days post-discharge, including services not provided by the hospital, such as physician, inpatient rehabilitation, skilled nursing and home health services. Under the mandatory models, hospitals are eligible to receive incentive payments or will be subject to payment reductions within certain corridors based on their performance against quality and spending criteria. In 2015, CMS finalized a five-year bundled payment model, called the Comprehensive Care for Joint Replacement (“CJR”) model, which includes hip and knee replacements, as well as

other major leg procedures. Seventeen hospitals in our Hospital Operations and other segment and four of USPI's surgical hospitals currently participate in the CJR model. In addition, 42 hospitals in our Hospital Operations and other segment and five of USPI's surgical hospitals participate in the CMS Bundled Payments for Care Improvement Advanced ("BPCIA") program that became effective October 1, 2018. USPI also holds the CMS contract for four physician group practices participating in the BPCIA program. We cannot predict what impact, if any, these demonstration programs will have on our inpatient volumes, net revenues or cash flows.

There is also a trend among private payers toward value-based purchasing and alternative payment models for healthcare services. Many large commercial payers expect hospitals to report quality data, and several of these payers will not reimburse hospitals for certain preventable adverse events. We expect value-based purchasing programs, including programs that condition reimbursement on patient outcome measures, to become more common and to involve a higher percentage of reimbursement amounts.

Table of Contents

We are unable at this time to predict how the industry trend toward value-based purchasing and alternative payment models will affect our results of operations, but it could negatively impact our revenues, particularly if we are unable to meet the quality and cost standards established by both governmental and private payers.

Our business and financial results could be harmed by a national or localized outbreak of a highly contagious or epidemic disease.

If an outbreak of an infectious disease, such as the Zika virus or the Ebola virus, were to occur nationally or in one of the regions our hospitals serve, our business and financial results could be adversely affected. The treatment of a highly contagious disease at one of our facilities may result in a temporary shutdown or diversion of patients. In addition, unaffected individuals may decide to defer elective procedures or otherwise avoid medical treatment, resulting in reduced patient volumes and operating revenues. Furthermore, we cannot predict the costs associated with the potential treatment of an infectious disease outbreak by our hospitals or preparation for such treatment.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

The disclosure required under this Item is included in Item 1, Business, of Part I of this report.

ITEM 3. LEGAL PROCEEDINGS

Because we provide healthcare services in a highly regulated industry, we have been and expect to continue to be party to various lawsuits, claims and regulatory investigations from time to time. For information regarding material pending legal proceedings in which we are involved, see Note 16 to our Consolidated Financial Statements, which is incorporated by reference.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II.

**ITEM MARKET FOR REGISTRANT’S COMMON EQUITY, RELATED STOCKHOLDER MATTERS
5. AND ISSUER PURCHASES OF EQUITY SECURITIES**

Common Stock. Our common stock is listed on the New York Stock Exchange (“NYSE”) under the symbol “THC.” As of February 15, 2019, there were holders of record of our common stock. Our transfer agent and registrar is Computershare. Shareholders with questions regarding their stock certificates, including inquiries related to exchanging or replacing certificates or changing an address, should contact the transfer agent at (866) 229-8416.

Equity Compensation. Refer to Item 12, Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters, of Part III of this report, as well as Note 9 to our Consolidated Financial Statements, for information regarding securities authorized for issuance under our equity compensation plans.

Stock Performance Graph. The following graph shows the cumulative, five-year total return for our common stock compared to the following indices:

Standard & Poor’s 500 Stock Index (a broad equity market index in which we are not included);

Standard & Poor’s Health Care Composite Index (a published industry index in which we are not included); and

A group made up of us and our hospital company peers (namely, Community Health Systems, Inc. (CYH), HCA Healthcare, Inc. (HCA), Tenet Healthcare Corporation (THC) and Universal Health Services, Inc. (UHS)), which we refer to as our “Peer Group”. LifePoint Health, Inc. (LPNT), which was a member of our Peer Group index in prior years, is not included because it ceased having publicly traded equity securities in November 2018.

Performance data assumes that \$100.00 was invested on December 31, 2013 in our common stock and each of the indices. The data assumes the reinvestment of all cash dividends and the cash value of other distributions. Moreover, in accordance with U.S. Securities and Exchange Commission (“SEC”) regulations, the returns of each company in our Peer Group have been weighted according to the respective company’s stock market capitalization at the beginning of each period for which a return is indicated. The stock price performance shown in the graph is not necessarily indicative of future stock price performance. The performance graph shall not be deemed “filed” for purposes of Section 18 of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), or incorporated by reference into any of our filings under the Securities Act of 1933, as amended, or the Exchange Act, except as shall be expressly set forth by specific reference in such filing.

Table of Contents**ITEM 6. SELECTED FINANCIAL DATA****OPERATING RESULTS**

The following tables present selected consolidated financial data for Tenet Healthcare Corporation and its wholly owned and majority-owned subsidiaries for the years ended December 31, 2014 through 2018. Effective January 1, 2018, we adopted the Financial Accounting Standards Board (“FASB”) Accounting Standards Update (“ASU”) 2014-09, “Revenue from Contracts with Customers (Topic 606)” (“ASU 2014-09”) using a modified retrospective method of application to all contracts existing on January 1, 2018. For our Hospital and other and Ambulatory Care segments, the adoption of ASU 2014-09 resulted in changes to our presentation of revenue primarily related to uninsured or underinsured patients. Prior to the adoption of ASU 2014-09, a significant portion of our provision for doubtful accounts related to self-pay patients, as well as co-pays, co-insurance amounts and deductibles owed to us by patients with insurance. Under ASU 2014-09, the estimated uncollectable amounts due from these patients are generally considered implicit price concessions that are a direct reduction to net operating revenues, with a corresponding material reduction in the amounts presented separately as provision for doubtful accounts. Effective June 16, 2015, we completed a transaction that combined our freestanding ambulatory surgery and imaging center assets with the surgical facility assets of United Surgical Partners International, Inc. into a new joint venture called USPI Holding Company, Inc. (“USPI”). At December 31, 2018, we owned 95.0% of USPI. The tables below include USPI for the post-acquisition period only. The tables should be read in conjunction with Item 7, Management’s Discussion and Analysis of Financial Condition and Results of Operations, and our Consolidated Financial Statements and notes thereto included in this report.

	Years Ended December 31,

Table of Contents

The operating results data presented above is not necessarily indicative of our future results of operations. Reasons for this include, but are not limited to: overall revenue and cost trends, particularly the timing and magnitude of price changes; fluctuations in contractual allowances and cost report settlements and valuation allowances; managed care contract negotiations, settlements or terminations and payer consolidations; changes in Medicare and Medicaid regulations; Medicaid and other supplemental funding levels set by the states in which we operate; the timing of approval by the Centers for Medicare and Medicaid Services (“CMS”) of Medicaid provider fee revenue programs; trends in patient accounts receivable collectability and associated implicit price concessions; fluctuations in interest rates; levels of malpractice insurance expense and settlement trends; impairment of long-lived assets and goodwill; restructuring charges; losses, costs and insurance recoveries related to natural disasters and other weather-related occurrences; litigation and investigation costs; acquisitions and dispositions of facilities and other assets; gains (losses) on sales, consolidation and deconsolidation of facilities; income tax rates and deferred tax asset valuation allowance activity; changes in estimates of accruals for annual incentive compensation; the timing and amounts of stock option and restricted stock unit grants to employees and directors; gains (losses) from early extinguishment of debt; and changes in occupancy levels and patient volumes. Factors that affect service mix, revenue mix, patient volumes and, thereby, the results of operations at our hospitals and related healthcare facilities include, but are not limited to: changes in federal and state healthcare regulations; the business environment, economic conditions and demographics of local communities in which we operate; the number of uninsured and underinsured individuals in local communities treated at our hospitals; seasonal cycles of illness; climate and weather conditions; physician recruitment, retention and attrition; advances in technology and treatments that reduce length of stay; local healthcare competitors; managed care contract negotiations or terminations; the number of patients with high-deductible health insurance plans; hospital performance data on quality measures and patient satisfaction, as well as standard charges for services; any unfavorable publicity about us, or our joint venture partners, that impacts our relationships with physicians and patients; and the timing of elective procedures.

BALANCE SHEET DATA

ITEM 7. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

INTRODUCTION TO MANAGEMENT’S DISCUSSION AND ANALYSIS

The purpose of this section, Management’s Discussion and Analysis of Financial Condition and Results of Operations (“MD&A”), is to provide a narrative explanation of our financial statements that enables investors to better understand our business, to enhance our overall financial disclosures, to provide the context within which our financial information may be analyzed, and to provide information about the quality of, and potential variability of, our financial condition, results of operations and cash flows. Our Hospital Operations and other segment is comprised of our acute care and specialty hospitals, ancillary outpatient facilities, urgent care centers, microhospitals and physician practices. As described in Note 5 to the accompanying Consolidated Financial Statements, certain of our facilities were classified as held for sale at December 31, 2018. Our Ambulatory Care segment is comprised of the operations of our USPI Holding Company, Inc. (“USPI”), in which we own a 95% interest, and included nine European Surgical Partners Limited (“Aspen”) facilities until their divestiture effective August 17, 2018. At December 31, 2018, USPI had interests in 255 ambulatory surgery centers, 36 urgent care centers, 23 imaging centers and 23 surgical hospitals in 27 states. Our Conifer segment provides healthcare business process services in the areas of hospital and physician revenue cycle management and value-based care solutions to healthcare systems, as well as individual hospitals, physician practices, self-insured organizations, health plans and other entities, through our Conifer Holdings, Inc. (“Conifer”) subsidiary. Nearly all of the services comprising the operations of our Conifer segment are provided directly by Conifer Health Solutions, LLC, in which we owned 76.2% as of December 31, 2018, or by one of its direct or indirect wholly owned subsidiaries. MD&A, which should be read in conjunction with the accompanying Consolidated Financial Statements, includes the following sections:

- Management Overview
- Sources of Revenue for Our Hospital Operations and Other Segment
- Results of Operations
- Liquidity and Capital Resources
- Off-Balance Sheet Arrangements
- Recently Issued Accounting Standards
- Critical Accounting Estimates

Unless otherwise indicated, all financial and statistical information included in MD&A relates to our continuing operations, with dollar amounts expressed in millions (except per admission, per adjusted patient admission, per patient day, per adjusted patient day, per visit and per case amounts). Continuing operations information includes the results of (i) our same 68 hospitals operated throughout the years ended December 31, 2018 and 2017, (ii) three Houston-area hospitals, which we divested effective August 1, 2017, (iii) Abrazo Maryvale Campus, which we closed in December 2017, (iv) two Philadelphia-area hospitals, which we divested effective January 11, 2018, (v) MacNeal Hospital, which we divested effective March 1, 2018 and (vi) Des Peres Hospital, which we divested effective May 1, 2018. The results of our Aspen facilities are included until August 17, 2018, the date of divestiture. Continuing operations information excludes the results of our hospitals and other businesses that have been classified as discontinued operations for accounting purposes. In addition, although we operated four North Texas hospitals throughout the year ended December 31, 2017 and from January 1 through February 28, 2018 as part of a joint venture, we did not consolidate the results of operations of these hospitals because we divested a controlling interest in them effective January 1, 2016.

MANAGEMENT OVERVIEW

RECENT DEVELOPMENTS

Sale of Three Hospitals and Related Operations in Chicago Area—Effective January 28, 2019, we completed the sale of three hospitals and hospital-affiliated operations in the Chicago area. As a result of this transaction, we received net pre-tax cash proceeds of \$42 million.

Debt Refinancing Transactions—On February 5, 2019, we sold \$1.5 billion aggregate principal amount of 6.250% senior secured second lien notes, which will mature on February 1, 2027 (the “2027 Senior Secured Second Lien Notes”). We will pay interest on the 2027 Senior Secured Second Lien Notes semi-annually in arrears on February 1 and August 1 of each year, which payments will commence on August 1, 2019. The proceeds from the sale of the 2027 Senior Secured Second Lien Notes were used, after payment of fees and expenses, together with cash on hand and borrowings under our senior secured revolving credit facility, to fund the redemption of all \$300 million aggregate principal amount of our outstanding 6.750% senior notes due 2020 and all \$750 million aggregate principal amount of our outstanding 7.500% senior

Table of Contents

secured second lien notes due 2022, and will be used to fund the repayment upon maturity of all \$468 million aggregate principal amount of our outstanding 5.500% senior unsecured notes due March 1, 2019. In connection with the redemptions, we expect to record a loss from early extinguishment of debt of approximately \$47 million in the three months ending March 31, 2019, primarily related to the difference between the redemption prices and the par values of the notes, as well as the write-off of the associated unamortized issuance costs.

TRENDS AND STRATEGIES

The healthcare industry, in general, and the acute care hospital business, in particular, have been experiencing significant regulatory uncertainty based, in large part, on administrative, legislative and judicial efforts to significantly modify or repeal and potentially replace the Patient Protection and Affordable Care Act, as amended by the Health Care and Education Reconciliation Act of 2010 (“Affordable Care Act” or “ACA”). It is difficult to predict the full impact of regulatory uncertainty on our future revenues and operations. In addition, we believe that several key trends are shaping the demand for healthcare services: (1) consumers, employers and insurers are actively seeking lower-cost solutions and better value as they focus more on healthcare spending; (2) patient volumes are shifting from inpatient to outpatient settings due to technological advancements and demand for care that is more convenient, affordable and accessible; (3) the industry is migrating to value-based payment models with government and private payers shifting risk to providers; and (4) consolidation continues across the entire healthcare sector.

Driving Growth in Our Hospital Systems—We are committed to better positioning our hospital systems and competing more effectively in the ever-evolving healthcare environment. We are focused on improving operational effectiveness, increasing capital efficiency and margins, enhancing patient satisfaction, growing our higher-acuity inpatient service lines, expanding patient access points, and exiting service lines, businesses and markets that we believe are no longer a core part of our long-term growth strategy. We have undertaken enterprise-wide cost reduction initiatives, comprised primarily of workforce reductions (including streamlining corporate overhead and centralized support functions), the renegotiation of contracts with suppliers and vendors, and the consolidation of office locations. We achieved our targeted savings in 2018, but are continuing to look for additional areas for savings. Most of the savings in 2018 were achieved through actions within both our Hospital Operations and other segment and our Conifer segment. In conjunction with these initiatives, we incurred restructuring charges related to employee severance payments of \$68 million in the year ended December 31, 2018, and we expect to incur additional such restructuring charges in 2019.

Improving the Customer Care Experience—As consumers continue to become more engaged in managing their health, we recognize that understanding what matters most to them and earning their loyalty is imperative to our success. As such, we have enhanced our focus on treating our patients as traditional customers by: (1) establishing networks of physicians and facilities that provide convenient access to services across the care continuum; (2) expanding service lines aligned with growing community demand, including a focus on chronic disease patients; (3) offering greater affordability and predictability, including simplified admissions and discharge procedures, particularly in our outpatient centers; (4) improving our culture of service; and (5) creating health and benefit programs, patient education and health literacy materials that are customized to the needs of the communities we serve. Through these efforts, we intend to improve the customer care experience in every part of our operations.

Expansion of Our Ambulatory Care Segment—We remain focused on opportunities to expand our Ambulatory Care segment through organic growth, building new outpatient centers, corporate development activities and strategic partnerships. We believe USPI’s surgery centers and surgical hospitals offer many advantages to patients and physicians, including greater affordability, predictability, flexibility and convenience. Moreover, due in part to advancements in medical technology, and due to the lower cost structure and greater efficiencies that are attainable at a specialized outpatient site, we believe the volume and complexity of surgical cases performed in an outpatient setting will continue to increase. In addition, we have continued to grow our imaging and urgent care businesses through USPI to reflect our broader strategies to (1) offer more services to patients, (2) broaden the capabilities we

offer to healthcare systems and physicians, and (3) expand into faster-growing, less capital intensive, higher-margin businesses. Historically, our outpatient services have generated significantly higher margins for us than inpatient services.

Exploration of Strategic Alternatives for Conifer While Continuing to Drive Conifer's Growth—We previously announced a number of actions to support our goals of improving financial performance and enhancing shareholder value, including the exploration of a potential sale of Conifer. In addition to a potential sale, we are considering other strategic alternatives for Conifer, such as a merger, a tax efficient spin-off or a combination of alternative transactions. There can be no assurance that this process will result in any transaction.

Table of Contents

Conifer serves approximately 750 Tenet and non-Tenet hospital and other clients nationwide. In addition to providing revenue cycle management services to healthcare systems and physicians, Conifer provides support to both providers and self-insured employers seeking assistance with clinical integration, financial risk management and population health management. Conifer remains focused on driving growth by continuing to market and expand its revenue cycle management and value-based care solutions businesses.

Improving Profitability—We are focused on growing patient volumes and effective cost management as a means to improve profitability. We believe our inpatient admissions have been constrained in recent years by increased competition, utilization pressure by managed care organizations, new delivery models that are designed to lower the utilization of acute care hospital services, the effects of higher patient co-pays, co-insurance amounts and deductibles, changing consumer behavior, and adverse economic conditions and demographic trends in certain of our markets. However, we also believe that emphasis on higher-demand clinical service lines (including outpatient services), focus on expanding our ambulatory care business, cultivation of our culture of service, participation in Medicare Advantage health plans that are experiencing higher growth rates than traditional Medicare plans, and contracting strategies that create shared value with payers should help us grow our patient volumes over time. In 2019, we are continuing to explore new opportunities to enhance efficiency, including further integration of enterprise-wide centralized support functions, outsourcing certain functions unrelated to direct patient care, and reducing clinical and vendor contract variation.

Reducing Our Leverage—All of our outstanding long-term debt has a fixed rate of interest, and the maturity dates of our notes are staggered from 2020 through 2031. Although we believe that our capital structure minimizes the near-term impact of increased interest rates, and the staggered maturities of our debt allow us to refinance our debt over time, it is nonetheless our long-term objective to lower our ratio of debt-to-Adjusted EBITDA, primarily through more efficient capital allocation and Adjusted EBITDA growth, which should lower our refinancing risk and increase the potential for us to continue to use lower rate secured debt to refinance portions of our higher rate unsecured debt.

Our ability to execute on our strategies and respond to the aforementioned trends is subject to a number of risks and uncertainties that may cause actual results to be materially different from expectations. For information about risks and uncertainties that could affect our results of operations, see the Forward-Looking Statements and Risk Factors sections in Part I of this report.

RECENT RESULTS OF OPERATIONS

We believe our results of operations for our most recent fiscal quarter best reflect recent trends we are experiencing with respect to volumes, revenues and expenses; therefore, we have provided below information about these metrics for the three months ended December 31, 2018 and 2017 on a continuing operations basis, which includes the results of (i) our same 68 hospitals operated throughout the three months ended December 31, 2018 and 2017, (ii) three Houston-area hospitals, which we divested effective August 1, 2017, (iii) our Abrazo Maryvale Campus, which we closed in December 2017, (iv) two Philadelphia-area hospitals, which we divested effective January 11, 2018, (v) MacNeal Hospital, which we divested effective March 1, 2018, and (vi) Des Peres Hospital, which we divested effective May 1, 2018. Although we operated four North Texas hospitals throughout the year ended December 31, 2017 and from January 1 through February 28, 2018 as part of a joint venture, we did not consolidate the results of operations of these hospitals because we divested a controlling interest in them effective January 1, 2016. The following tables also show information about facilities in our Ambulatory Care segment that we control and, therefore, consolidate. The results of our Aspen facilities are included until August 17, 2018, the date of divestiture.

Total admissions decreased by 15,778, or 8.5%, in the three months ended December 31, 2018 compared to the three months ended December 31, 2017, and total surgeries decreased by 10,361, or 8.7%, in the 2018 period compared to the 2017 period. Our emergency department visits decreased 8.7% in the three months ended December 31, 2018 compared to the same period in the prior year. Our volumes from continuing operations in the three months ended December 31, 2018 compared to the three months ended December 31, 2017 were negatively affected by the closure of our Abrazo Maryvale Campus in December 2017, the sale of our Philadelphia-area facilities effective January 11, 2018, the sale of MacNeal Hospital and affiliated operations effective March 1, 2018, and the sale of Des Peres Hospital and affiliated operations effective May 1, 2018. Our Ambulatory Care total cases increased 2.4% in the three months ended December 31, 2018 compared to the 2017 period.

Revenues	Continuing Operations Three Months Ended December 31,		
	2018	2017	Increase (Decrease)
Net operating revenues			
Hospital Operations and other prior to inter-segment eliminations	\$3,843	\$4,194	(8.4)%
Ambulatory Care	554	545	1.7 %
Conifer	372	394	(5.6)%
Inter-segment eliminations	(150)	(155)	(3.2)%
Total	\$4,619	\$4,978	(7.2)%

Net operating revenues decreased by \$359 million, or 7.2%, in the three months ended December 31, 2018 compared to the same period in 2017, primarily due to the sale and closure of facilities described above, as well as the decrease in net revenues from the California provider fee program. In the 2018 period, we recognized \$64 million of net revenues from the California provider fee program compared to \$267 million recognized in the 2017 period due to CMS' approval of the 2017 program in December of that year. For our Hospital Operations and other segment, the impact of lower volumes on net operating revenues was partially mitigated by improved managed care pricing.

Our accounts receivable days outstanding ("AR Days") from continuing operations were 56.8 days at December 31, 2018 and 55.8 days at December 31, 2017, compared to our target of less than 55 days. This calculation includes our Hospital Operations and other contract assets subsequent to the adoption of ASU 2014-09 effective January 1, 2018 and the

Table of Contents

accounts receivable of our Chicago-area facilities that have been classified in assets held for sale on our Consolidated Balance Sheet at December 31, 2018, and excludes (i) three Houston-area hospitals, which we divested effective August 1, 2017, (ii) Abrazo Maryvale Campus, which we closed in December 2017, (iii) two Philadelphia-area hospitals, which we divested effective January 11, 2018, (iv) MacNeal Hospital, which we divested effective March 1, 2018, (v) Des Peres Hospital, which we divested effective May 1, 2018, (vi) all nine Aspen facilities, which we divested effective August 17, 2018, (vii) health plan revenues, and (viii) our California provider fee revenues.

Selected Operating Expenses per Adjusted Patient Admission	Continuing Operations		
	Three Months Ended December 31,		
	2018	2017	Increase (Decrease)
Hospital Operations and other			
Salaries, wages and benefits per adjusted patient admission ⁽¹⁾	\$5,791	\$5,662	2.3 %
Supplies per adjusted patient admission ⁽¹⁾	2,079	2,058	1.0 %
Other operating expenses per adjusted patient admission ⁽¹⁾	2,991	2,772	7.9 %
Total per adjusted patient admission	\$10,861	\$10,492	3.5 %

Calculation excludes the expenses from our health plan businesses. Adjusted patient admissions represents actual patient admissions adjusted to include outpatient services provided by facilities in (1) our Hospital Operations and other segment by multiplying actual patient admissions by the sum of gross inpatient revenues and outpatient revenues and dividing the results by gross inpatient revenues.

Salaries, wages and benefits per adjusted patient admission increased 2.3% in the three months ended December 31, 2018 compared to the same period in 2017. This change is primarily due to the effect of lower volumes on operating leverage due to certain fixed staffing costs, annual merit increases for certain of our employees, increased accruals for annual incentive compensation and increased health benefits costs, partially offset by the impact of previously announced workforce reductions as part of our enterprise-wide cost reduction initiatives in the three months ended December 31, 2018 compared to the three months ended December 31, 2017.

Table of Contents

Supplies expense per adjusted patient admission increased 1.0% in the three months ended December 31, 2018 compared to the three months ended December 31, 2017. The change in supplies expense was primarily attributable to growth in our higher acuity supply-intensive surgical services, partially offset by the impact of the group-purchasing strategies and supplies-management services we utilize to reduce costs.

Other operating expenses per adjusted patient admission increased by 7.9% in the three months ended December 31, 2018 compared to the prior-year period. This increase is primarily due to higher medical fees per adjusted patient admission, the effect of lower volumes on operating leverage due to certain fixed costs and increased malpractice expense for our Hospital Operations and other segment, which was \$44 million higher in the 2018 period compared to the 2017 period. The 2018 period included an unfavorable adjustment of approximately \$8 million from a 42 basis point decrease in the interest rate used to estimate the discounted present value of projected future malpractice liabilities compared to a favorable adjustment of approximately \$4 million from a 17 basis point increase in the interest rate in the 2017 period.

LIQUIDITY AND CAPITAL RESOURCES OVERVIEW

Cash and cash equivalents were \$411 million at December 31, 2018 compared to \$500 million at September 30, 2018.

Significant cash flow items in the three months ended December 31, 2018 included:

• Net cash provided by operating activities before interest, taxes, discontinued operations and restructuring charges, acquisition-related costs, and litigation costs and settlements of \$626 million;

• Payments for restructuring charges, acquisition-related costs, and litigation costs and settlements of \$50 million;

• Capital expenditures of \$213 million;

• \$16 million of payments for the purchases of businesses or joint venture interests;

• \$84 million of payments for the purchase of equity investments;

• Proceeds from the sales of facilities and other assets of \$45 million;

• Proceeds from sale of marketable securities, long-term investments and other assets of \$34 million;

• Interest payments of \$324 million;

• \$32 million of payments to purchase \$32 million aggregate principal amount of our 5.500% senior unsecured notes due 2019; and

• \$71 million of distributions paid to noncontrolling interests.

Net cash provided by operating activities was \$1.049 billion in the year ended December 31, 2018 compared to \$1.200 billion in the year ended December 31, 2017. Key factors contributing to the change between the 2018 and 2017 periods include the following:

• An increase of \$38 million in payments on reserves for restructuring charges, acquisition-related costs, and litigation costs and settlements;

Decreased cash receipts of \$31 million related to the California provider fee program;

Additional interest payments of \$37 million in the 2018 period primarily due to the six-month interest payment in January 2018 related to our 7.500% senior secured second lien notes due 2022, which were issued in December 2016, and changes in the timing of certain interest payments as a result of our refinancing transactions in 2017;

Lower income tax payments of \$31 million in the 2018 period;

Table of Contents

Increased cash flows from our health plan businesses of \$101 million due to cash outflows in the 2017 period resulting from the sales and wind-down of these businesses in 2017, compared to negligible cash flows in the 2018 period; and

The timing of other working capital items, including \$129 million of additional payments for professional and general liability claims and expenses in the 2018 period.

SOURCES OF REVENUE FOR OUR HOSPITAL OPERATIONS AND OTHER SEGMENT

We earn revenues for patient services from a variety of sources, primarily managed care payers and the federal Medicare program, as well as state Medicaid programs, indemnity-based health insurance companies and self-pay patients (that is, patients who do not have health insurance and are not covered by some other form of third-party arrangement).

The following table shows the sources of net patient service revenues less implicit price concessions and provision for doubtful accounts for our hospitals and related outpatient facilities, expressed as percentages of net patient service revenues less implicit price concessions and provision for doubtful accounts from all sources:

Net Patient Service Revenues Less Implicit Price Concessions and Provision for Doubtful Accounts from:	Years Ended December 31,		
	2018	2017	2016
Medicare	20.5 %	21.9 %	22.4 %
Medicaid	9.2 %	8.8 %	8.9 %
Managed care ⁽¹⁾	65.4 %	64.6 %	64.3 %
Self-pay	0.7 %	0.6 %	0.4 %
Indemnity and other	4.2 %	4.1 %	4.0 %

Includes Medicare and ⁽¹⁾Medicaid managed care programs.

Our payer mix on an admissions basis for our hospitals and related outpatient facilities, expressed as a percentage of total admissions from all sources, is shown below:

Admissions from:	Years Ended December 31,		
	2018	2017	2016
Medicare	25.4 %	26.0 %	26.1 %
Medicaid	6.3 %	6.5 %	7.0 %
Managed care ⁽¹⁾	59.7 %	59.6 %	59.2 %
Self-pay	6.0 %	5.5 %	5.4 %
Indemnity and other	2.6 %	2.4 %	2.3 %

Includes Medicare and ⁽¹⁾Medicaid managed care programs.

GOVERNMENT PROGRAMS

The Centers for Medicare and Medicaid Services, an agency of the U.S. Department of Health and Human Services (“HHS”), is the single largest payer of healthcare services in the United States. Approximately 58 million individuals rely on healthcare benefits through Medicare, and approximately 73 million individuals are enrolled in Medicaid and the Children’s Health Insurance Program (“CHIP”). These three programs are authorized by federal law and administered by CMS. Medicare is a federally funded health insurance program primarily for individuals 65 years of age and older, as well as certain younger people with certain disabilities and conditions, and is provided without regard to income or assets. Medicaid is administered by the states and is jointly funded by the federal government and state governments. Medicaid is the nation’s main public health insurance program for people with low incomes and is the largest source of health coverage in the United States. The CHIP, which is also administered by the states and jointly funded, provides health coverage to children in families with incomes too high to qualify for Medicaid, but too low to afford private coverage. Unlike Medicaid, the CHIP is limited in duration and requires the enactment of reauthorizing legislation. During the three months ended March 31, 2018, separate pieces of legislation were enacted extending CHIP funding for a total of ten years from federal fiscal year (“FFY”) 2018 (which began on October 1, 2017) through FFY 2027.

Table of Contents**The Affordable Care Act**

The expansion of Medicaid in the 36 states (including four in which we currently operate acute care hospitals) and the District of Columbia that have taken action to do so is financed through:

negative adjustments to the annual market basket updates for the Medicare hospital inpatient and outpatient prospective payment systems, which began in 2010 and under current law expire on September 30, 2019, as well as additional negative “productivity adjustments” to the annual market basket updates, which began in 2011; and

reductions to Medicare and Medicaid disproportionate share hospital (“DSH”) payments, which began for Medicare payments in FFY 2014 and, under current law, are scheduled to commence for Medicaid payments on October 1, 2019.

In December 2017, Congress passed and the President signed a tax reform bill into law that, among other things, eliminates the ACA’s individual mandate penalty for not buying health insurance starting in 2019. The Congressional Budget Office and the staff of the Joint Committee on Taxation estimated that eliminating the mandate penalty starting in 2019 – and making no other changes to the then-current law – would cause the number of people with health insurance to decrease by 4 million in 2019 and 13 million in 2027. Members of Congress have also proposed measures that would expand government-sponsored coverage, including single-payer proposals. We cannot predict if or when further modification of the ACA will occur or what action, if any, Congress might take with respect to eventually repealing and possibly replacing the law. Furthermore, there have also been successful judicial challenges to the ACA, including a December 2018 ruling by the U.S. District Court for the Northern District of Texas that the ACA’s individual mandate is unconstitutional. Because the judge’s order was stayed pending appeal, the decision’s near-term impact on health insurance coverage under the ACA may be limited; however, uncertainty over the future of the ACA has intensified. The ultimate outcome of this decision and other judicial challenges is indeterminate. We are also unable to predict the impact of administrative, regulatory and legislative changes, and market reactions to those changes, on our future revenues and operations. However, if the ultimate impact is that significantly fewer individuals have private or public health coverage, we likely will experience decreased volumes, reduced revenues and an increase in uncompensated care, which would adversely affect our results of operations and cash flows. This negative effect will be exacerbated if the ACA’s reductions in Medicare reimbursement and reductions in Medicare DSH payments that have already taken effect are not reversed if the law is repealed or if further reductions (including Medicaid DSH reductions scheduled to take effect in FFYs 2020 through 2025, as described below) are made.

Medicare

Medicare offers its beneficiaries different ways to obtain their medical benefits. One option, the Original Medicare Plan (which includes “Part A” and “Part B”), is a fee-for-service payment system. The other option, called Medicare Advantage (sometimes called “Part C” or “MA Plans”), includes health maintenance organizations (“HMOs”), preferred provider organizations (“PPOs”), private fee-for-service Medicare special needs plans and Medicare medical savings account plans. The major components of our net patient service revenues from continuing operations of the hospitals and related outpatient facilities in our Hospital Operations and other segment for services provided to patients enrolled in the Original Medicare Plan for the years ended December 31, 2018, 2017 and 2016 are set forth in the following table:

Revenue Descriptions	Years Ended December 31,		
	2018	2017	2016
Medicare severity-adjusted diagnosis-related group — operating	\$ 1,526	\$ 1,659	\$ 1,705
Medicare severity-adjusted diagnosis-related group — capital	137	162	157
Outliers	83	89	77
Outpatient	748	762	787

Disproportionate share	228	265	293
Other ⁽¹⁾	160	306	367
Total Medicare net patient service revenues	\$2,882	\$3,243	\$3,386

The other revenue category includes Medicare Direct Graduate Medical Education (“DGME”) and Indirect Medical Education (“IME”) revenues, IME revenues earned by our children’s hospitals (one of which we divested in 2018) under the Children’s Hospitals Graduate Medical Education Payment (1)Program administered by the Health Resources and Services Administration of HHS, inpatient psychiatric units, inpatient rehabilitation units, one long-term acute care hospital (which was divested in 2017), other revenue adjustments, and adjustments to the estimates for current and prior-year cost reports and related valuation allowances.

Table of Contents

A general description of the types of payments we receive for services provided to patients enrolled in the Original Medicare Plan is provided below. Recent regulatory and legislative updates to the terms of these payment systems and their estimated effect on our revenues can be found under “Regulatory and Legislative Changes” below.

Acute Care Hospital Inpatient Prospective Payment System

Medicare Severity-Adjusted Diagnosis-Related Group Payments—Sections 1886(d) and 1886(g) of the Social Security Act (the “Act”) set forth a system of payments for the operating and capital costs of inpatient acute care hospital admissions based on a prospective payment system (“PPS”). Under the inpatient prospective payment systems (“IPPS”), Medicare payments for hospital inpatient operating services are made at predetermined rates for each hospital discharge. Discharges are classified according to a system of Medicare severity-adjusted diagnosis-related groups (“MS-DRGs”), which categorize patients with similar clinical characteristics that are expected to require similar amounts of hospital resources. CMS assigns to each MS-DRG a relative weight that represents the average resources required to treat cases in that particular MS-DRG, relative to the average resources used to treat cases in all MS-DRGs.

The base payment amount for the operating component of the MS-DRG payment is comprised of an average standardized amount that is divided into a labor-related share and a nonlabor-related share. Both the labor-related share of operating base payments and the base payment amount for capital costs are adjusted for geographic variations in labor and capital costs, respectively. Using diagnosis and procedure information submitted by the hospital, CMS assigns to each discharge an MS-DRG, and the base payments are multiplied by the relative weight of the MS-DRG assigned. The MS-DRG operating and capital base rates, relative weights and geographic adjustment factors are updated annually, with consideration given to: the increased cost of goods and services purchased by hospitals; the relative costs associated with each MS-DRG; and changes in labor data by geographic area. Although these payments are adjusted for area labor and capital cost differentials, the adjustments do not take into consideration an individual hospital’s operating and capital costs.

Outlier Payments—Outlier payments are additional payments made to hospitals on individual claims for treating Medicare patients whose medical conditions are costlier to treat than those of the average patient in the same MS-DRG. To qualify for a cost outlier payment, a hospital’s billed charges, adjusted to cost, must exceed the payment rate for the MS-DRG by a fixed threshold established annually by CMS. A Medicare Administrative Contractor (“MAC”) calculates the cost of a claim by multiplying the billed charges by a cost-to-charge ratio that is typically based on the hospital’s most recently filed cost report. Generally, if the computed cost exceeds the sum of the MS-DRG payment plus the fixed threshold, the hospital receives 80% of the difference as an outlier payment.

Under the Act, CMS must project aggregate annual outlier payments to all PPS hospitals to be not less than 5% or more than 6% of total MS-DRG payments (“Outlier Percentage”). The Outlier Percentage is determined by dividing total outlier payments by the sum of MS-DRG and outlier payments. CMS annually adjusts the fixed threshold to bring projected outlier payments within the mandated limit. A change to the fixed threshold affects total outlier payments by changing: (1) the number of cases that qualify for outlier payments; and (2) the dollar amount hospitals receive for those cases that qualify for outlier payments.

Disproportionate Share Hospital Payments—In addition to making payments for services provided directly to beneficiaries, Medicare makes additional payments to hospitals that treat a disproportionately high share of low-income patients. Prior to October 1, 2013, DSH payments were determined annually based on certain statistical information defined by CMS and calculated as a percentage add-on to the MS-DRG payments. The ACA revised the Medicare DSH adjustment effective for discharges occurring on or after October 1, 2013. Under the revised methodology, hospitals receive 25% of the amount they previously would have received under the pre-ACA formula. This amount is referred to as the “Empirically Justified Amount.”

Hospitals qualifying for the Empirically Justified Amount of DSH payments are also eligible to receive an additional payment for uncompensated care (the “UC DSH Amount”). The UC DSH Amount is a hospital’s share of a pool of funds that the CMS Office of the Actuary estimates would equal 75% of Medicare DSH that otherwise would have been paid under the pre-ACA formula, adjusted for changes in the percentage of individuals that are uninsured. Generally, the factors used to calculate and distribute UC DSH Amounts are set forth in the ACA and are not subject to administrative or judicial review. Although the statute requires that each hospital’s cost of uncompensated care as a percentage of the total uncompensated care cost of all DSH hospitals be used to allocate the pool, CMS previously determined that the available cost data from cost reports was unreliable and for FFYs 2014 through 2017 used low-income days (i.e., Medicaid days) to distribute UC DSH Amounts. Beginning in FFY 2018, CMS commenced a three-year transition to using uncompensated care cost data to distribute the UC DSH Amounts. As of December 31, 2018, 57 of our acute care hospitals in continuing operations, three of which were divested in January 2019, qualified for Medicare DSH payments.

Table of Contents

One of the variables used in the pre-ACA DSH formula is the number of Medicare inpatient days attributable to patients receiving Supplemental Security Income (“SSI”) who are also eligible for Medicare Part A benefits divided by total Medicare inpatient days (the “SSI Ratio”). In an earlier rulemaking, CMS established a policy of including not only days attributable to Original Medicare Plan patients, but also Medicare Advantage patients in the SSI ratio. The statutes and regulations that govern Medicare DSH payments have been the subject of various administrative appeals and lawsuits, and our hospitals have been participating in such appeals, including challenges to the inclusion of the Medicare Advantage days used in the DSH calculation as set forth in the Changes to the Hospital Inpatient Prospective Payment Systems and Fiscal Year 2005 Rates. We are unable to predict what action the Secretary might take with respect to the DSH calculation for prior periods in this regard or the outcome of the pending litigation; however, a favorable outcome of our DSH appeals could have a material impact on our future revenues and cash flows.

Direct Graduate and Indirect Medical Education Payments—The Medicare program provides additional reimbursement to approved teaching hospitals for additional expenses incurred by such institutions. This additional reimbursement, which is subject to certain limits, including intern and resident full-time equivalent (“FTE”) limits, is made in the form of DGME and IME payments. As of December 31, 2018, 24 of our hospitals in continuing operations, three of which were divested in January 2019, were affiliated with academic institutions and were eligible to receive such payments.

IPPS Quality Adjustments—The ACA also authorizes the following quality adjustments to Medicare IPPS payments:

Value Based Purchasing (“VBP”) – Under the VBP program, IPPS operating payments to hospitals are reduced by 2% to fund value-based incentive payments to eligible hospitals based on their overall performance on a set of quality measures;

Hospital Readmission Reduction Program (“HRRP”) – Under the HRRP program, IPPS operating payments to hospitals with excess readmissions are reduced up to a maximum of 3% of base MS-DRG payments; and

Hospital-Acquired Conditions (“HAC”) Reduction Program (“HACRP”) – Under the HACRP, overall inpatient payments are reduced by 1% for hospitals in the worst performing quartile of risk-adjusted quality measures for reasonable preventable HACs.

These adjustments are generally based on a hospital’s performance from prior periods and are updated annually by CMS.

Hospital Outpatient Prospective Payment System

Under the outpatient prospective payment system, hospital outpatient services, except for certain services that are reimbursed on a separate fee schedule, are classified into groups called ambulatory payment classifications (“APCs”). Services in each APC are similar clinically and in terms of the resources they require, and a payment rate is established for each APC. Depending on the services provided, hospitals may be paid for more than one APC for an encounter. CMS annually updates the APCs and the rates paid for each APC.

Inpatient Psychiatric Facility Prospective Payment System

The inpatient psychiatric facility (“IPF”) prospective payment system (“IPF-PPS”) applies to psychiatric hospitals and psychiatric units located within acute care hospitals that have been designated as exempt from the hospital inpatient prospective payment system. The IPF-PPS is based on prospectively determined per-diem rates and includes an outlier policy that authorizes additional payments for extraordinarily costly cases. As of December 31, 2018, 23 of our

general hospitals in continuing operations, two of which were divested in January 2019, operated IPF units.

Inpatient Rehabilitation Prospective Payment System

Rehabilitation hospitals and rehabilitation units in acute care hospitals meeting certain criteria established by CMS are eligible to be paid as an inpatient rehabilitation facility (“IRF”) under the IRF prospective payment system (“IRF-PPS”). Payments under the IRF-PPS are made on a per-discharge basis. The IRF-PPS uses federal prospective payment rates across distinct case-mix groups established by a patient classification system. As of December 31, 2018, we operated one freestanding IRF, and 18 of our general hospitals in continuing operations, two of which were divested in January 2019, operated IRF units.

Table of Contents

Physician and Other Health Professional Services Payment System

Medicare uses a fee schedule to pay for physician and other health professional services based on a list of services and their payment rates referred to as the Medicare Physician Fee Schedule (“MPFS”). In determining payment rates for each service, CMS considers the amount of clinician work required to provide a service, expenses related to maintaining a practice, and professional liability insurance costs. These three factors are adjusted for variation in the input prices in different markets, and the sum is multiplied by the fee schedule’s conversion factor (average payment amount) to produce a total payment amount. The Medicare Access and CHIP Reauthorization Act of 2015 (“MACRA”) established a new set of updates for clinicians billing under the MPFS that set the conversion factor.

Cost Reports

The final determination of certain Medicare payments to our hospitals, such as DSH, DGME, IME and bad debt expense, are retrospectively determined based on our hospitals’ cost reports. The final determination of these payments often takes many years to resolve because of audits by the program representatives, providers’ rights of appeal, and the application of numerous technical reimbursement provisions.

For filed cost reports, we adjust the accrual for estimated cost report settlements based on those cost reports and subsequent activity, and record a valuation allowance against those cost reports based on historical settlement trends. The accrual for estimated cost report settlements for periods for which a cost report is yet to be filed is recorded based on estimates of what we expect to report on the filed cost reports and a corresponding valuation allowance is recorded as previously described. Cost reports must generally be filed within five months after the end of the annual cost report reporting period. After the cost report is filed, the accrual and corresponding valuation allowance may need to be adjusted.

Medicare Claims Reviews

HHS estimates that the overall FFY 2018 Medicare fee-for-service (“FFS”) improper payment rate for the program is approximately 8.1%. The FFY 2018 error rate for Hospital IPPS payments is approximately 4.3%. CMS has identified the FFS program as a program at risk for significant erroneous payments. One of CMS’ stated key goals is to pay claims properly the first time. This means paying the right amount, to legitimate providers, for covered, reasonable and necessary services provided to eligible beneficiaries. According to CMS, paying correctly the first time saves resources required to recover improper payments and ensures the proper expenditure of Medicare Trust Fund dollars. CMS has established several initiatives to prevent or identify improper payments before a claim is paid, and to identify and recover improper payments after paying a claim. The overall goal is to reduce improper payments by identifying and addressing coverage and coding billing errors for all provider types. Under the authority of the Act, CMS employs a variety of contractors (e.g., MACs, Recovery Audit Contractors and Unified Program Integrity Contractors) to process and review claims according to Medicare rules and regulations.

Claims selected for prepayment review are not subject to the normal Medicare FFS payment timeframe. Furthermore, prepayment and post-payment claims denials are subject to administrative and judicial review, and we intend to pursue the reversal of adverse determinations where appropriate. We have established robust protocols to respond to claims reviews and payment denials. In addition to overpayments that are not reversed on appeal, we will incur additional costs to respond to requests for records and pursue the reversal of payment denials. The degree to which our Medicare FFS claims are subjected to prepayment reviews, the extent to which payments are denied, and our success in overturning denials could have a material adverse effect on our cash flows and results of operations.

Medicaid

Medicaid programs and the corresponding reimbursement methodologies are administered by the states and vary from state to state and from year to year. Estimated revenues under various state Medicaid programs, including state-funded managed care Medicaid programs, constituted 19.8%, 20.4% and 20.3% of total net patient service revenues less implicit price concessions and provision for doubtful accounts of our acute care hospitals and related outpatient facilities for the years ended December 31, 2018, 2017 and 2016, respectively. We also receive DSH and other supplemental revenues under various state Medicaid programs. For the years ended December 31, 2018, 2017 and 2016, our total Medicaid revenues attributable to DSH and other supplemental revenues were \$847 million, \$864 million and \$906 million, respectively. The \$847 million of total Medicaid revenues attributable to DSH and other supplemental revenues for the year ended December 31, 2018 was comprised of \$262 million related to the California provider fee program described below, \$286 million related to the Michigan provider fee program, \$136 million related to Medicaid DSH programs in multiple states, \$120 million related to the Texas 1115 waiver program described below, and \$43 million from a number of other state and local programs.

Table of Contents

Several states in which we operate face budgetary challenges that have resulted, and likely will continue to result, in reduced Medicaid funding levels to hospitals and other providers. Because most states must operate with balanced budgets, and the Medicaid program is generally a significant portion of a state's budget, states can be expected to adopt or consider adopting future legislation designed to reduce or not increase their Medicaid expenditures. In addition, some states delay issuing Medicaid payments to providers to manage state expenditures. As an alternative means of funding provider payments, many of the states in which we operate have adopted provider fee programs or received waivers under Section 1115 of the Social Security Act. Under a Medicaid waiver, the federal government waives certain Medicaid requirements, thereby giving states flexibility in the operation of their Medicaid program to allow states to test new approaches and demonstration projects to improve care. Generally the Section 1115 waivers are for a period of five years with an option to extend the waiver for three additional years. Continuing pressure on state budgets and other factors could result in future reductions to Medicaid payments, payment delays or additional taxes on hospitals.

The California Department of Health Care Services implemented its first Hospital Quality Assurance Fee ("HQAF") program in 2010. The HQAF program provides funding for supplemental payments to California hospitals that serve Medi-Cal and uninsured patients. CMS approved the fifth and most recent phase of the program ("HQAF V") covering the period January 2017 through June 2019 in the three months ended December 31, 2017. Our hospitals recognized HQAF revenues, net of provider fees and other expenses, of \$262 million, \$267 million and \$232 million in calendar years 2018, 2017 and 2016, respectively. In November 2016, California voters approved a state constitutional amendment measure that extends indefinitely the statute that imposes fees on hospitals to obtain federal matching funds. Because HQAF funding levels are based in part on Medi-Cal utilization, changes in coverage of individuals under the Medi-Cal program could affect the net revenues and cash flows of our hospitals under HQAF V and subsequent phases of the HQAF program. Also, because funding of the HQAF program is dependent on federal funding, we cannot provide assurances that such funding will continue in future periods.

Certain of our Texas hospitals participate in the Texas 1115 waiver program. The previous waiver term expired on December 31, 2017, and the current waiver extension ("Waiver"), which was approved during the three months ended December 31, 2017, covers the period January 1, 2018 through September 30, 2022. The Waiver is funded by intergovernmental transfer payments from local government entities, and includes two funding pools – Uncompensated Care and Delivery System Reform Payment. In 2018, we recognized \$120 million of revenues from the Texas 1115 waiver program. Separately, during the same period, we incurred \$78 million of expenses related to funding indigent care services by certain of our Texas hospitals. Under the terms of the Waiver, the amount of the funding pool for the period January 1, 2018 through September 30, 2019 is consistent with the latter years of the previous waiver; however, effective October 1, 2019, CMS requires that the funding pool be resized based on aggregate hospital charity cost. The final funding pool amount for the period October 1, 2019 through the end of the current Waiver term has not been determined. We are unable to predict the changes to the funding pool amount or the allocation of the funding pool amount, which could result in an increase or decrease to our net revenues and cash flows. Furthermore, we cannot provide any assurances as to future extensions of the Texas 1115 waiver program, or the ultimate amount of revenues that our hospitals may receive from this program following the expiration of the Waiver.

Because we cannot predict what actions the federal government or the states may take under existing legislation and future legislation to address budget gaps, deficits, Medicaid expansion, provider fee programs or Medicaid Section 1115 waivers, we are unable to assess the effect that any such legislation might have on our business, but the impact on our future financial position, results of operations or cash flows could be material.

Medicaid and Managed Medicaid net patient service revenues from continuing operations recognized by the hospitals and related outpatient facilities in our Hospital Operations and other segment from Medicaid-related programs in the states in which our facilities are (or were, as the case may be) located, as well as from Medicaid programs in neighboring states, for the years ended December 31, 2018, 2017 and 2016 are set forth in the following table.

Table of Contents

Hospital Location	Years Ended December 31,			
	2018	2017	2016	
Alabama	\$91	\$88	\$80	
Arizona	165	177	199	
California	875	862	818	
Florida	231	232	261	
Georgia	—	(3) 19	
Illinois	89	143	106	
Massachusetts	94	83	89	
Michigan	749	710	663	
Missouri	—	2	2	
North Carolina	—	(1) (2)
Pennsylvania	8	285	279	
South Carolina	53	46	50	
Tennessee	35	36	39	
Texas	398	371	466	
	\$2,788	\$3,031	\$3,069	

Medicaid and Managed Medicaid revenues comprised 46% and 54%, respectively, of our Medicaid-related net patient service revenues from continuing operations recognized by the hospitals and related outpatient facilities in our Hospital Operations and other segment for the year ended December 31, 2018.

Regulatory and Legislative Changes

The Medicare and Medicaid programs are subject to statutory and regulatory changes, administrative and judicial rulings, interpretations and determinations, requirements for utilization review, and federal and state funding restrictions, all of which could materially increase or decrease payments from these government programs in the future, as well as affect the cost of providing services to our patients and the timing of payments to our facilities. We are unable to predict the effect of future government healthcare funding policy changes on our operations. If the rates paid or services covered by governmental payers are reduced, or if we or one or more of our subsidiaries' hospitals are excluded from participation in the Medicare or Medicaid program or any other government healthcare program, there could be a material adverse effect on our business, financial condition, results of operations or cash flows. Recent regulatory and legislative updates to the Medicare and Medicaid payment systems are provided below.

Payment and Policy Changes to the Medicare Inpatient Prospective Payment Systems

Under Medicare law, CMS is required to annually update certain rules governing the inpatient prospective payment systems. The updates generally become effective October 1, the beginning of the federal fiscal year. In August 2018, CMS issued Changes to the Hospital Inpatient Prospective Payment Systems for Acute Care Hospitals and Fiscal Year 2019 Rates ("Final IPPS Rule"). The Final IPPS Rule includes the following payment and policy changes:

A market basket increase of 2.9% for MS-DRG operating payments for hospitals reporting specified quality measure data and that are meaningful users of electronic health record ("EHR") technology (hospitals that do not report specified quality measure data and/or are not meaningful users of EHR technology will receive a reduced market basket increase); CMS also made certain adjustments to the 2.9% market basket increase that result in a net operating payment update of 1.85% (before budget neutrality adjustments), including:

-

Market basket index and multifactor productivity reductions required by the ACA of 0.75% and 0.8%, respectively;
and

▲ 0.5% increase required under the 21st Century Cures Act;

Updates to the three factors used to determine the amount and distribution of UC DSH Amounts, including the
continuation of the transition from using low-income days to estimated uncompensated care costs for the distribution
of the UC DSH Amounts;

▲ 1.27% net increase in the capital federal MS-DRG rate;

51

Table of Contents

• A decrease in the cost outlier threshold from \$26,537 to \$25,769;

• The application of the Medicare IPPS post-acute transfer payment policy to “early discharges” from the hospital to hospice care as required by the Bipartisan Budget Act of 2018; and

Effective January 1, 2019, the requirement that hospitals make available to the public a list of their current standard charges via the Internet in a machine-readable format and update this information at least annually or more often as appropriate.

According to CMS, the combined impact of the payment and policy changes in the Final IPPS Rule for operating costs will yield an average 2.4% increase in Medicare operating MS-DRG FFS payments for hospitals in large urban areas (populations over one million), and an average 2.1% increase in operating MS-DRG FFS payments for proprietary hospitals in FFY 2019. We estimate that all of the payment and policy changes affecting operating MS-DRG payments, including those affecting Medicare DSH amounts and the hospice transfer payment policy, will result in an estimated 1.9% increase in our annual Medicare FFS IPPS payments, which yields an estimated increase of approximately \$35 million. Because of the uncertainty associated with various factors that may influence our future IPPS payments by individual hospital, including legislative or legal actions, admission volumes, length of stay and case mix, we cannot provide any assurances regarding our estimate of the impact of the payment and policy changes.

Payment and Policy Changes to the Medicare Outpatient Prospective Payment and Ambulatory Surgery Center Payment Systems

On November 2, 2018, CMS released Changes to the Hospital Outpatient Prospective Payment System (“OPPS”) and Ambulatory Surgical Center (“ASC”) Payment System for calendar year (“CY”) 2019 (“Final OPPS/ASC Rule”). The Final OPPS/ASC Rule includes the following payment and policy changes:

• An estimated net increase of 1.35% for the OPPS rates based on an estimated market basket increase of 2.9% reduced by market basket index and multifactor productivity reductions required by the ACA of 0.75% and 0.8%, respectively;

• A transition over a two year period to the MPFS rates for the payment of clinic/office visits provided at off-campus, hospital-based departments that are currently paid under the OPPS (this payment reduction will not be made in a budget-neutral manner and will result in a reduction of approximately 0.6% to total CY 2019 OPPS payments);

• A 2.1% increase to the ASC payment rates; and

• A revision to the definition of “surgery” in the ASC payment system to account for certain “surgery-like” procedures, and the addition of 12 cardiac catheterization procedures and five related procedures to the ASC covered procedures list.

CMS projects that the combined impact of the payment and policy changes in the Final OPPS/ASC Rule will yield an average 0.6% increase in Medicare FFS OPPS payments for all hospitals, an average 0.7% increase in Medicare FFS OPPS payments for hospitals in large urban areas (populations over one million), and an average 1.0% increase in Medicare FFS OPPS payments for proprietary hospitals. Based on CMS’ estimates, the projected annual impact of the payment and policy changes in the Final OPPS/ASC Rule on our hospitals is an increase to Medicare FFS hospital outpatient revenues of approximately \$7 million, which represents an increase of approximately 1.1%. Because of the uncertainty associated with various factors that may influence our future OPPS payments, including legislative or legal actions, volumes and case mix, we cannot provide any assurances regarding our estimate of the impact of the payment and policy changes.

The 340B program allows certain hospitals (i.e., only nonprofit organizations with specific federal designations and/or funding) to purchase separately-payable drugs at discounted rates from drug manufacturers. In the CY 2018 OPPS Final Rule, CMS reduced the payment for separately payable drugs purchased under the 340B program from average sale price (“ASP”) plus 6% to ASP minus 22.5%, and made a corresponding budget-neutral increase to payments to all hospitals for other drugs and services reimbursed under the OPPS. During the three months ended December 31, 2018, the U.S. District Court for the District of Columbia held that the adoption of the 340B payment adjustment in the CY 2018 OPPS Final Rule exceeded CMS’ statutory authority. Because of the complexity involved in determining equitable relief for the plaintiffs, the court requested the

Table of Contents

parties to submit briefs on the appropriate remedy. CMS may appeal the District Court's decision. The District Court's remedy and/or an unfavorable outcome of any appeal could have an adverse effect on the Company's net revenues and cash flows.

The Medicare Access and CHIP Reauthorization Act of 2015

The MACRA replaced the Medicare Sustainable Growth Rate methodology with a new system for establishing the annual updates to the MPFS that, beginning in 2019, rewards the delivery of high-quality patient care through one of two avenues:

The Merit-Based Incentive Payment System ("MIPS") – MIPS participating providers will be eligible for a payment adjustment of plus or minus 4% in the first payment adjustment year (2019 based on 2017 performance) with the payment adjustment increasing each year until it reaches plus or minus 9% in 2022 and beyond; or

The Advanced Alternative Payment Model ("APM") – Providers that choose to participate in an Advanced APM (defined as certain CMS Innovation Center models and Shared Savings Program tracks that require participants to use certified EHR technology, base payments for services on quality measures comparable to those in MIPS, and require participants to bear more than nominal financial risk for losses) will be exempt from MIPS and from 2019-2024 will be eligible for a 5% upward adjustment to their Medicare payments.

The new system helps to link fee-for-service payments to quality and value with payment incentives and penalties.

Additionally, the MACRA reduced the restoration of the 3.2% coding and document adjustment to hospital inpatient rates that was expected to be effective in FFY 2018 to 3.0%; as modified by the 21st Century Cures Act, the adjustment will be applied at the rate of 0.4588% for FFY 2018 and 0.5% for FFYs 2019 through 2023.

Less than 1% of the net operating revenue generated by our Hospital Operations and other segment during the year ended December 31, 2018 was related to the MPFS. We are unable to estimate the potential impact of the MACRA; however, the maximum incentive and penalty adjustments could result in an increase or decrease in our annual net revenues of approximately \$15 million. Additionally, we cannot predict the effect of the MACRA on our future operations, revenues and cash flows.

Payment and Policy Changes to the Medicare Physician Fee Schedule

On November 23, 2018, the CMS issued a final rule that includes updates to payment policies, payment rates, quality provisions and other policies for services furnished under the MPFS for CY 2019 ("MPFS Final Rule"). With the budget neutrality adjustment to account for changes in Relative Value Units required by law, the final MPFS for 2019 will increase by approximately 0.11%. CMS estimates that the impact of the payment and policy changes in the final rule will result in no change in aggregate payments across all specialties.

The American Recovery and Reinvestment Act of 2009

The American Recovery and Reinvestment Act of 2009 ("ARRA") was enacted to stimulate the U.S. economy. One provision of ARRA provides financial incentives to hospitals and physicians to become "meaningful users" of electronic health records ("EHR"). Hospitals that fail to demonstrate meaningful use of EHR are subject to payment penalties; EHR payment adjustments to physicians automatically terminated effective January 1, 2019. During the year ended December 31, 2018, we recognized \$3 million of EHR incentives related to the Medicare and Medicaid EHR incentive programs as a result of certain of our hospitals, employed physicians and Ambulatory Care segment facilities demonstrating meaningful use of certified EHR technology and meeting the criteria for revenue recognition.

Medicare and Medicaid incentive payment amounts to which a provider is entitled are subject to post-payment audits.

In addition to the expenditures we incur to qualify for these incentive payments, our operating expenses have increased and we anticipate will increase in the future as a result of these information system investments. Eligible hospitals must continue to demonstrate meaningful use of EHR technology every year to avoid payment reductions in subsequent years. These reductions, which are based on the market basket update, will continue until a hospital achieves compliance. Should all of our hospitals fail to become meaningful users or fail to continue to demonstrate meaningful use of EHR technology and fail to submit quality data, the penalties would result in reductions to our annual Medicare traditional inpatient net revenues of up to approximately \$37 million in 2019 and subsequent years.

Table of Contents

The complexity of the changes required to our hospitals' systems and the time required to complete the changes could result in some or all of our facilities not being fully compliant and subject to the payment penalties permitted under ARRA. Because of the uncertainties regarding the implementation of HIT, including CMS' future EHR implementation regulations, our ability to achieve compliance and the associated costs, we cannot provide any assurances regarding the aforementioned estimates of incentives or penalties in future periods.

CMS Innovation Models

The CMS Innovation Center develops new payment and service delivery models in accordance with the requirements of Section 1115A of the Social Security Act. Additionally, Congress has defined – both through the Affordable Care Act and previous legislation – a number of specific demonstrations to be conducted by CMS. The CMS Innovation Center has a growing portfolio testing various payment and service delivery models that aim to achieve better care for patients, better health for communities and lower costs through improvement for our healthcare system. Participation in some of these models is voluntary; however, participation in certain bundled payment arrangements is mandatory for providers located in randomly selected geographic locations. Generally, the bundled payment models hold hospitals financially accountable for the quality and costs for an entire episode of care for a specific diagnosis or procedure from the date of the hospital admission or inpatient procedure through 90 days post-discharge, including services not provided by the hospital, such as physician, inpatient rehabilitation, skilled nursing and home health services. Under the mandatory models, hospitals are eligible to receive incentive payments or will be subject to payment reductions within certain corridors based on their performance against quality and spending criteria.

Bipartisan Budget Act of 2018

In February 2018, the President signed the Bipartisan Budget Act of 2018 (“2018 BBA”), a two-year spending agreement and six-week continuing resolution, into law. The 2018 BBA includes the following measures:

• Four additional years of CHIP funding through FFY 2027, as described above;

- Modifications to the MIPS under the MACRA;

• A reduction to the MPFS conversion factor for CY 2019 from 0.5% to 0.25%; and

• Modifications to the ACA Medicaid DSH payment reductions as follows:

• Elimination of the FFY 2018 and 2019 Medicaid DSH payment reductions;

• Retention of the \$4 billion payment reduction in FFY 2020; and

• An increase to the payment reductions in FFYs 2021 through 2025 to \$8 billion.

The ACA reduced federal funding for Medicaid DSH payments under the assumption that hospital uncompensated care costs would decline as insurance coverage increased. Although the reductions were delayed several times, federal DSH payment reductions were slated to begin with a \$2 billion reduction in FFY 2018, with additional reductions occurring each year through FFY 2025. The amount of federal DSH funds available to each state, referred to as allotments, will vary based on historical state DSH allotments and the methodology that CMS uses to distribute DSH allotment reductions among states. In notices dated November 3, 2017 and July 6, 2018, CMS released the preliminary DSH allotments of approximately \$12 billion for FFYs 2017 and 2018, respectively.

PRIVATE INSURANCE

Managed Care

We currently have thousands of managed care contracts with various HMOs and PPOs. HMOs generally maintain a full-service healthcare delivery network comprised of physician, hospital, pharmacy and ancillary service providers that HMO members must access through an assigned “primary care” physician. The member’s care is then managed by his or her primary care physician and other network providers in accordance with the HMO’s quality assurance and utilization review guidelines so that appropriate healthcare can be efficiently delivered in the most cost-effective manner. HMOs typically provide reduced benefits or reimbursement (or none at all) to their members who use non-contracted healthcare providers for non-emergency care.

Table of Contents

PPOs generally offer limited benefits to members who use non-contracted healthcare providers. PPO members who use contracted healthcare providers receive a preferred benefit, typically in the form of lower co-pays, co-insurance or deductibles. As employers and employees have demanded more choice, managed care plans have developed hybrid products that combine elements of both HMO and PPO plans, including high-deductible healthcare plans that may have limited benefits, but cost the employee less in premiums.

The amount of our managed care net patient service revenues, including Medicare and Medicaid managed care programs, from our hospitals and related outpatient facilities during the years ended December 31, 2018, 2017 and 2016 was \$9.213 billion, \$9.583 billion and \$9.728 billion, respectively. Our top ten managed care payers generated 65% of our managed care net patient service revenues for the year ended December 31, 2018. National payers generated 43% of our managed care net patient service revenues for the year ended December 31, 2018. The remainder comes from regional or local payers. At December 31, 2018 and 2017, 61% and 62%, respectively, of our net accounts receivable for our Hospital Operations and other segment were due from managed care payers.

Revenues under managed care plans are based primarily on payment terms involving predetermined rates per diagnosis, per-diem rates, discounted fee-for-service rates and/or other similar contractual arrangements. These revenues are also subject to review and possible audit by the payers, which can take several years before they are completely resolved. The payers are billed for patient services on an individual patient basis. An individual patient's bill is subject to adjustment on a patient-by-patient basis in the ordinary course of business by the payers following their review and adjudication of each particular bill. We estimate the discounts for contractual allowances at the individual hospital level utilizing billing data on an individual patient basis. At the end of each month, on an individual hospital basis, we estimate our expected reimbursement for patients of managed care plans based on the applicable contract terms. We believe it is reasonably likely for there to be an approximately 3% increase or decrease in the estimated contractual allowances related to managed care plans. Based on reserves at December 31, 2018, a 3% increase or decrease in the estimated contractual allowance would impact the estimated reserves by approximately \$15 million. Some of the factors that can contribute to changes in the contractual allowance estimates include: (1) changes in reimbursement levels for procedures, supplies and drugs when threshold levels are triggered; (2) changes in reimbursement levels when stop-loss or outlier limits are reached; (3) changes in the admission status of a patient due to physician orders subsequent to initial diagnosis or testing; (4) final coding of in-house and discharged-not-final-billed patients that change reimbursement levels; (5) secondary benefits determined after primary insurance payments; and (6) reclassification of patients among insurance plans with different coverage and payment levels. Contractual allowance estimates are periodically reviewed for accuracy by taking into consideration known contract terms, as well as payment history. We believe our estimation and review process enables us to identify instances on a timely basis where such estimates need to be revised. We do not believe there were any adjustments to estimates of patient bills that were material to our revenues. In addition, on a corporate-wide basis, we do not record any general provision for adjustments to estimated contractual allowances for managed care plans. Managed care accounts, net of contractual allowances recorded, are further reduced to their net realizable value through implicit price concessions based on historical collection trends for these payers and other factors that affect the estimation process.

We expect managed care governmental admissions to continue to increase as a percentage of total managed care admissions over the near term. However, the managed Medicare and Medicaid insurance plans typically generate lower yields than commercial managed care plans, which have been experiencing an improved pricing trend. Although we have benefited from solid year-over-year aggregate managed care pricing improvements for several years, we have seen these improvements moderate in recent years, and we believe the moderation could continue in future years. In the year ended December 31, 2018, our commercial managed care net inpatient revenue per admission from the hospitals and related outpatient facilities in our Hospital Operations and other segment was approximately 89% higher than our aggregate yield on a per admission basis from government payers, including managed Medicare

and Medicaid insurance plans.

Indemnity

An indemnity-based agreement generally requires the insurer to reimburse an insured patient for healthcare expenses after those expenses have been incurred by the patient, subject to policy conditions and exclusions. Unlike an HMO member, a patient with indemnity insurance is free to control his or her utilization of healthcare and selection of healthcare providers.

SELF-PAY PATIENTS

Self-pay patients are patients who do not qualify for government programs payments, such as Medicare and Medicaid, do not have some form of private insurance and, therefore, are responsible for their own medical bills. A significant number of

55

Table of Contents

our self-pay patients are admitted through our hospitals' emergency departments and often require high-acuity treatment that is more costly to provide and, therefore, results in higher billings, which are the least collectible of all accounts.

Self-pay accounts pose significant collectability problems. At both December 31, 2018 and 2017, 6% of our net accounts receivable for our Hospital Operations and other segment were due from self-pay patients. Further, a significant portion of our implicit price concessions relates to self-pay patients, as well as co-pays, co-insurance amounts and deductibles owed to us by patients with insurance. We provide revenue cycle management services through Conifer, which is subject to various statutes and regulations regarding consumer protection in areas including finance, debt collection and credit reporting activities. For additional information, see Item 1, Business — Regulations Affecting Conifer's Operations, of Part I of this report.

Conifer has performed systematic analyses to focus our attention on the drivers of bad debt expense for each hospital. While emergency department use is the primary contributor to our implicit price concessions in the aggregate, this is not the case at all hospitals. As a result, we have increased our focus on targeted initiatives that concentrate on non-emergency department patients as well. These initiatives are intended to promote process efficiencies in collecting self-pay accounts, as well as co-pay, co-insurance and deductible amounts owed to us by patients with insurance, that we deem highly collectible. We leverage a statistical-based collections model that aligns our operational capacity to maximize our collections performance. We are dedicated to modifying and refining our processes as needed, enhancing our technology and improving staff training throughout the revenue cycle process in an effort to increase collections and reduce accounts receivable.

Over the longer term, several other initiatives we have previously announced should also help address this challenge. For example, our *Compact with Uninsured Patients* ("*Compact*") is designed to offer managed care-style discounts to certain uninsured patients, which enables us to offer lower rates to those patients who historically had been charged standard gross charges. A significant portion of those charges had previously been written down in our provision for doubtful accounts. Under the *Compact*, the discount offered to uninsured patients is recognized as a contractual allowance, which reduces net operating revenues at the time the self-pay accounts are recorded. The uninsured patient accounts, net of contractual allowances recorded, are further reduced to their net realizable value through implicit price concessions based on historical collection trends for self-pay accounts and other factors that affect the estimation process.

We also provide charity care to patients who are financially unable to pay for the healthcare services they receive. Most patients who qualify for charity care are charged a per-diem amount for services received, subject to a cap. Except for the per-diem amounts, our policy is not to pursue collection of amounts determined to qualify as charity care; therefore, we do not report these amounts in net operating revenues. Most states include an estimate of the cost of charity care in the determination of a hospital's eligibility for Medicaid DSH payments. These payments are intended to mitigate our cost of uncompensated care, as well as reduced Medicaid funding levels. Generally, our method of measuring the estimated costs uses adjusted self-pay/charity patient days multiplied by selected operating expenses (which include salaries, wages and benefits, supplies and other operating expenses and which exclude the costs of our health plan businesses) per adjusted patient day. The adjusted self-pay/charity patient days represents actual self-pay/charity patient days adjusted to include self-pay/charity outpatient services by multiplying actual self-pay/charity patient days by the sum of gross self-pay/charity inpatient revenues and gross self-pay/charity outpatient revenues and dividing the results by gross self-pay/charity inpatient revenues. The following table shows our estimated costs (based on selected operating expenses) of caring for self-pay patients and charity care patients, as well as revenues attributable to Medicaid DSH and other supplemental revenues we recognized, in the years ended December 31, 2018, 2017 and 2016.

Years Ended		
December 31,		
2018	2017	2016

Estimated costs for:

Self-pay patients	\$640	\$648	\$609
Charity care patients	124	121	138
Total	\$764	\$769	\$747
Medicaid DSH and other supplemental revenues	\$847	\$864	\$906

The initial expansion of health insurance coverage resulted in an increase in the number of patients using our facilities with either health insurance exchange or government healthcare insurance program coverage. However, we continue to have to provide uninsured discounts and charity care due to the failure of states to expand Medicaid coverage and for persons living in the country who are not permitted to enroll in a health insurance exchange or government healthcare insurance program. In October 2017, the administration announced that reimbursements to insurance companies for ACA cost-sharing reduction (“CSR”) plans offered through the health insurance marketplace would be discontinued. CSR payments compensate insurers

Table of Contents

for subsidizing out-of-pocket costs for low-income enrollees. Without the CSR payments, many insurers increased premiums for plans offered on ACA exchanges and a few withdrew entirely from offering plans on some of the exchanges.

RESULTS OF OPERATIONS FOR THE YEAR ENDED DECEMBER 31, 2018 COMPARED TO THE YEAR ENDED DECEMBER 31, 2017

The following two tables summarize our consolidated net operating revenues, operating expenses and operating income from continuing operations, both in dollar amounts and as percentages of net operating revenues, for the years ended December 31, 2018 and 2017:

	Years Ended December 31,		
	2018	2017	Increase (Decrease)
Net operating revenues:			
Hospital Operations and other	\$15,285	\$17,656	\$(2,371)
Ambulatory Care	2,085	1,978	107
Conifer	1,533	1,597	(64)

Impairment and restructuring charges, and acquisition-related costs	1.1 %	2.8 %	(1.7)%
Litigation and investigation costs	0.2 %	0.1 %	0.1 %
Net gains on sales, consolidation and deconsolidation of facilities	(0.7)%	(0.7)%	— %
Operating income	9.0 %	5.8 %	3.2 %

Total net operating revenues decreased by \$866 million, or 4.5%, for the year ended December 31, 2018 compared to the year ended December 31, 2017. Hospital Operations and other and Ambulatory Care net operating revenues and provision for doubtful accounts were impacted by our adoption of ASU 2014-09 effective January 1, 2018. Prior to

the adoption of ASU 2014-09, a significant portion of our provision for doubtful accounts related to self-pay patients, as well as co-pays, co-insurance amounts and deductibles owed to us by patients with insurance. Under ASU 2014-09, the estimated uncollectable amounts due from these patients are generally considered implicit price concessions that are a direct reduction to net operating revenues, with a corresponding material reduction in the amounts presented separately as provision for doubtful accounts. Hospital Operations and other net operating revenues net of implicit price concessions and provision for doubtful accounts decreased by \$947 million, or 6.1%, for the year ended December 31, 2018 compared to the same period in 2017, primarily due to the divestiture or closure of eight hospitals since the beginning of the 2017 period. Ambulatory Care net operating revenues net of implicit price concessions and provision for doubtful accounts increased by \$145 million, or 7.5%, for the year ended

Table of Contents

December 31, 2018 compared to the prior-year period. This growth was driven by an increase in same-facility net operating revenues of \$89 million and an increase from acquisitions of \$113 million, partially offset by a decrease of \$57 million due to the sale of Aspen. Conifer net operating revenues decreased by \$64 million, or 4.0%, for the year ended December 31, 2018 compared to the same period in 2017. Conifer revenues from third-party customers, which are not eliminated in consolidation, decreased \$36 million, or 3.7%, for the year ended December 31, 2018 compared to the prior-year period. Conifer revenues from third-party customers were negatively impacted by contract terminations related to the sales of customer hospitals, partially offset by the impact of the divestiture of former Tenet facilities that have now become third-party customers.

The following table shows selected operating expenses of our three reportable business segments. Information for our Hospital Operations and other segment is presented on a same-hospital basis, which includes the results of our same 68 hospitals operated throughout the years ended December 31, 2018 and 2017. Our same-hospital information excludes the results of three Houston-area hospitals, which we divested effective August 1, 2017, Abrazo Maryvale Campus, which we closed in December 2017, two Philadelphia-area hospitals, which we divested effective January 11, 2018, MacNeal Hospital, which we divested effective March 1, 2018 and Des Peres Hospital, which we divested effective May 1, 2018. In addition, although we operated four North Texas hospitals throughout the year ended December 31, 2017 and from January 1 through February 28, 2018 as part of a joint venture, we did not consolidate the results of operations of these hospitals because we divested a controlling interest in them effective January 1, 2016.

Selected Operating Expenses	Years Ended December 31,			
	2018	2017	Increase (Decrease)

RESULTS OF OPERATIONS BY SEGMENT

Our operations are reported in three segments:

Hospital Operations and other, which is comprised of our acute care and specialty hospitals, ancillary outpatient facilities, urgent care centers, microhospitals and physician practices. As described in Note 5 to the accompanying Consolidated Financial Statements, certain of our facilities were classified as held for sale at December 31, 2018.

58

Table of Contents

Ambulatory Care, which is comprised of USPI's ambulatory surgery centers, urgent care centers, imaging centers and surgical hospitals (and also included nine facilities in the United Kingdom until we divested Aspen effective August 17, 2018).

Conifer, which provides healthcare business process services in the areas of hospital and physician revenue cycle management and value-based care solutions to healthcare systems, as well as individual hospitals, physician practices, self-insured organizations, health plans and other entities.

Hospital Operations and Other Segment

The following tables show operating statistics of our continuing operations hospitals and related outpatient facilities on a same-hospital basis, unless otherwise indicated, which includes the results of our same 68 hospitals operated throughout the years ended December 31, 2018 and 2017. Our same-hospital information excludes the results of three Houston-area hospitals, which we divested effective August 1, 2017, Abrazo Maryvale Campus, which we closed in December 2017, two Philadelphia-area hospitals, which we divested effective January 11, 2018, MacNeal Hospital, which we divested effective March 1, 2018, and Des Peres Hospital, which we divested effective May 1, 2018. In addition, although we operated four North Texas hospitals throughout the year ended December 31, 2017 and from January 1 through February 28, 2018 as part of a joint venture, we did not consolidate the results of operations of these hospitals because we divested a controlling interest in them effective January 1, 2016.

	Same-Hospital Continuing Operations Years Ended December 31,		
	2018	2017	Increase (Decrease)
Admissions, Patient Days and Surgeries			
Number of hospitals (at end of period)	68	68	— ⁽¹⁾

Revenues

Same-hospital net operating revenues increased \$505 million, or 3.6%, during the year ended December 31, 2018 compared to the year ended December 31, 2017, primarily due improved terms of our managed care contracts. Same-hospital admissions decreased 1.7% in the year ended December 31, 2018 compared to the prior-year period. Same-hospital outpatient visits decreased 0.9% in the year ended December 31, 2018 compared to the prior-year period.

Table of Contents

The following table shows the consolidated net accounts receivable by payer at December 31, 2018 and the consolidated net accounts receivable and allowance for doubtful accounts by payer at December 31, 2017:

	December 31, 2018	December 31, 2017		
	Accounts Receivable	Accounts Receivable Before Allowance for Doubtful Accounts	Allowance for Doubtful Accounts	Net
Medicare	\$ 229	\$257	\$ —	\$257
Medicaid	74	95	—	95

Total discontinued operations	2	2	—	2
	\$ 2,595	\$3,514	\$ 898	\$2,616

For patient accounts receivable resulting from revenue recognized prior to January 1, 2018, an allowance for doubtful accounts was established to reduce the carrying value of such receivables to their estimated net realizable value. Generally, we estimated this allowance based on the aging of our accounts receivable by hospital, our historical collection experience by hospital and for each type of payer, and other relevant factors. Under the provisions of ASU 2014-09, which we adopted effective January 1, 2018, when we have an unconditional right to payment, subject only to the passage of time, the right is treated as a receivable. Patient accounts receivable, including billed accounts and unbilled accounts for which we have the unconditional right to payment, and estimated amounts due from third-party payers for retroactive adjustments, are receivables if our right to consideration is unconditional and only the passage of time is required before payment of that consideration is due. For patient accounts receivable subsequent to our adoption of ASU 2014-09 on January 1, 2018, the estimated uncollectable amounts are generally considered implicit price concessions that are a direct reduction to patient accounts receivable rather than allowance for doubtful accounts. Under the provisions of ASU 2014-09, amounts related to services provided to patients for which we have not billed and that do not meet the conditions of unconditional right to payment at the end of the reporting period are contract assets. For our Hospital Operations and other segment, our contract assets consist primarily of services that we have provided to patients who are still receiving inpatient care in our facilities at the end of the reporting period. Our Hospital Operations and other segment's contract assets are included in other current assets in the accompanying Consolidated Balance Sheet at December 31, 2018. Prior to January 1, 2018, amounts related to services provided to patients for which we had not billed were included in accounts receivable, less allowance for doubtful accounts, in our consolidated balance sheets.

Collection of accounts receivable has been a key area of focus, particularly over the past several years. At December 31, 2018, our Hospital Operations and other segment collection rate on self-pay accounts was approximately 23.1%. Our self-pay collection rate includes payments made by patients, including co-pays, co-insurance amounts and deductibles paid by patients with insurance. Based on our accounts receivable from self-pay patients and co-pays, co-insurance amounts and deductibles owed to us by patients with insurance at December 31, 2018, a 10% decrease or increase in our self-pay collection rate, or approximately 2%, which we believe could be a reasonably likely change, would result in an unfavorable or favorable adjustment to patient accounts receivable of approximately \$11 million. There are various factors that can impact collection trends, such as

changes in the economy, which in turn have an impact on unemployment rates and the number of uninsured and underinsured patients, the volume of patients through our emergency departments, the increased burden of co-pays and deductibles to be made by patients with insurance, and business practices related to collection efforts. These factors continuously change and can have an impact on collection trends and our estimation process.

Payment pressure from managed care payers also affects the collectability of our accounts receivable. We typically experience ongoing managed care payment delays and disputes; however, we continue to work with these payers to obtain adequate and timely reimbursement for our services. Our estimated Hospital Operations and other segment collection rate from managed care payers was approximately 98.3% at December 31, 2018.

Table of Contents

We manage our implicit price concessions using hospital-specific goals and benchmarks such as (1) total cash collections, (2) point-of-service cash collections, (3) AR Days and (4) accounts receivable by aging category. The following tables present the approximate aging by payer of our net accounts receivable from the continuing operations of our Hospital Operations and other segment of \$2.384 billion and \$2.438 billion at December 31, 2018 and 2017, respectively, excluding cost report settlements receivable and valuation allowances of \$18 million and \$4 million, respectively, at December 31, 2018 and 2017:

December 31, 2018

	Medicare	Medicaid	Managed Care	Indemnity, Self-Pay and Other	Total
0-60 days ⁽¹⁾	89 %	51 %	60 %	29 %	56 %
61-120 days	6 %	24 %	14 %	18 %	15 %
121-180 days	2 %	10 %	8 %	11 %	8 %
Over 180 days	3 %	15 %	18 %	42 %	21 %
Total	100 %	100 %	100 %	100 %	100 %

The 0-60 days aging category has been impacted by the reclassification of certain unbilled accounts to contract assets due to the adoption of (1) ASU 2014-09 effective January 1, 2018. See Notes 1 and 4 to our accompanying Consolidated Financial Statements for additional information.

December 31, 2017

	Medicare	Medicaid	Managed Care	Indemnity, Self-Pay and Other	Total
0-60 days	89 %	66 %	65 %	28 %	60 %
61-120 days	6 %	16 %	14 %	17 %	13 %
121-180 days	2 %	10 %	7 %	9 %	7 %
Over 180 days	3 %	8 %	14 %	46 %	20 %
Total	100 %	100 %	100 %	100 %	100 %

Conifer continues to implement revenue cycle initiatives to improve our cash flow. These initiatives are focused on standardizing and improving patient access processes, including pre-registration, registration, verification of eligibility and benefits, liability identification and collections at point-of-service, and financial counseling. These initiatives are intended to reduce denials, improve service levels to patients and increase the quality of accounts that end up in accounts receivable. Although we continue to focus on improving our methodology for evaluating the collectability of our accounts receivable, we may incur future charges if there are unfavorable changes in the trends affecting the net realizable value of our accounts receivable.

At December 31, 2018, we had a cumulative total of patient account assignments to Conifer of \$2.546 billion related to our continuing operations. These accounts have already been written off and are not included in our receivables or in the allowance for doubtful accounts; however, an estimate of future recoveries from all the accounts assigned to Conifer is determined based on our historical experience and recorded in accounts receivable.

Patient advocates from Conifer's Medicaid Eligibility Program ("MEP") screen patients in the hospital to determine whether those patients meet eligibility requirements for financial assistance programs. They also expedite the process of applying for these government programs. Receivables from patients who are potentially eligible for Medicaid are classified as Medicaid pending, under the MEP, with appropriate contractual allowances recorded. Based on recent trends, approximately 97% of all accounts in the MEP are ultimately approved for benefits under a government program, such as Medicaid. The following table shows the approximate amount of accounts receivable in the MEP still awaiting determination of eligibility under a government program at December 31, 2018 and 2017 by aging category for the hospitals currently in the program:

	December 31,	
	2018	2017
0-60 days	\$72	\$81
61-120 days	16	12
121-180 days	3	3
Over 180 days	5	4
Total	\$96	\$100

Table of Contents

Salaries, Wages and Benefits

Same-hospital salaries, wages and benefits as a percentage of net operating revenues decreased by 90 basis points to 48.7% in the year ended December 31, 2018 compared to the prior-year period. Same-hospital net operating revenues increased 3.6% in the year ended December 31, 2018 compared to the year ended December 31, 2017, and same-hospital salaries, wages and benefits increased by 1.8% in the 2018 period compared to the 2017 period. The change in same-hospital salaries, wages and benefits as a percentage of net operating revenues was primarily due to an increase in same-hospital net operating revenues and the impact of previously announced workforce reductions as part of our enterprise-wide cost reduction initiatives, partially offset by increased health benefits costs and annual merit increases for certain of our employees. Salaries, wages and benefits expense for the years ended December 31, 2018 and 2017 included stock-based compensation expense of \$25 million and \$46 million, respectively.

Supplies

Same-hospital supplies expense as a percentage of net operating revenues increased by 10 basis points to 17.5% in the year ended December 31, 2018 compared to the 2017 period. Supplies expense was impacted by increased costs from certain higher acuity supply-intensive surgical services, partially offset by the benefits of the group-purchasing strategies and supplies-management services we utilize to reduce costs.

We strive to control supplies expense through product standardization, consistent contract terms and end-to-end contract management, improved utilization, bulk purchases, focused spending with a smaller number of vendors and operational improvements. The items of current cost reduction focus continue to be cardiac stents and pacemakers, orthopedics, implants, and high-cost pharmaceuticals.

Other Operating Expenses, Net

Same-hospital other operating expenses as a percentage of net operating revenues increased by 80 basis points to 24.0% in the year ended December 31, 2018 compared to 23.2% in the 2017 period. Same-hospital other operating expenses increased by \$231 million, or 7.1%, for the year ended December 31, 2018 compared to the year ended December 31, 2017. The changes in other operating expenses included:

• increased malpractice expense of \$115 million to settle various claims; and

• increased medical fees of \$89 million, due in part to unfavorable claims experience on risk-based capitated contracts in California, partially offset by

• decreased expenses associated with our health plan businesses of \$95 million due to the sale and wind-down of those businesses in 2017, which decreases were offset by decreased health plan revenues.

Same-hospital malpractice expense in the 2018 period included a favorable adjustment of approximately \$10 million from a 26 basis point increase in the interest rate used to estimate the discounted present value of projected future malpractice liabilities compared to approximately \$3 million from an eight basis point increase in the interest rate in the 2017 period.

Ambulatory Care Segment

Our Ambulatory Care segment is comprised of USPI's ambulatory surgery centers, urgent care centers, imaging centers and surgical hospitals. Our Ambulatory Care segment also included nine facilities in the United Kingdom until we divested Aspen effective August 17, 2018. USPI operates its surgical facilities in partnership with local physicians

and, in many of these facilities, a healthcare system partner. We hold an ownership interest in each facility, with each being operated through a separate legal entity in most cases. USPI operates facilities on a day-to-day basis through management services contracts. Our sources of earnings from each facility consist of:

• management services revenues, computed as a percentage of each facility's net revenues (often net of implicit price concessions); and

- our share of each facility's net income (loss), which is computed by multiplying the facility's net income (loss) times the percentage of each facility's equity interests owned by USPI.

Table of Contents

Our role as an owner and day-to-day manager provides us with significant influence over the operations of each facility. For many of the facilities our Ambulatory Care segment operates (110 of 337 facilities at December 31, 2018), this influence does not represent control of the facility, so we account for our investment in the facility under the equity method for an unconsolidated affiliate. USPI controls 227 of the facilities our Ambulatory Care segment operates, and we account for these investments as consolidated subsidiaries. Our net earnings from a facility are the same under either method, but the classification of those earnings differs. For consolidated subsidiaries, our financial statements reflect 100% of the revenues and expenses of the subsidiaries, after the elimination of intercompany amounts. The net profit attributable to owners other than USPI is classified within “net income available to noncontrolling interests.”

For unconsolidated affiliates, our consolidated statements of operations reflect our earnings in two line items:

equity in earnings of unconsolidated affiliates—our share of the net income (loss) of each facility, which is based on the facility’s net income (loss) and the percentage of the facility’s outstanding equity interests owned by USPI; and

management and administrative services revenues, which is included in our net operating revenues—income we earn in exchange for managing the day-to-day operations of each facility, usually quantified as a percentage of each facility’s net revenues less implicit price concessions.

Our Ambulatory Care segment operating income is driven by the performance of all facilities USPI operates and by USPI’s ownership interests in those facilities, but our individual revenue and expense line items contain only consolidated businesses, which represent 67% of those facilities. This translates to trends in consolidated operating income that often do not correspond with changes in consolidated revenues and expenses, which is why we disclose certain statistical and financial data on a pro forma systemwide basis that includes both consolidated and unconsolidated (equity method) facilities.

Year Ended December 31, 2018 Compared to the Year Ended December 31, 2017

The following table summarizes certain consolidated statements of operations items for the periods indicated:

Ambulatory Care Results of Operations	Years Ended December 31,			Increase (Decrease)	
	2018	2017			
Net operating revenues	\$2,085	\$1,940	7.5	%	
Equity in earnings of unconsolidated affiliates	\$140	\$140	—	%	
Salaries, wages and benefits	\$644	\$623	3.4	%	
Supplies	\$430	\$398	8.0	%	
Other operating expenses, net	\$359	\$360	(0.3)	%	

Our Ambulatory Care net operating revenues increased by \$145 million, or 7.5%, for the year ended December 31, 2018 compared to the year ended December 31, 2017. This growth was driven by an increase in same-facility net operating revenues of \$89 million and an increase from acquisitions of \$113 million, partially offset by a decrease of \$57 million due to the sale of Aspen.

Salaries, wages and benefits expense increased by \$21 million, or 3.4%, for the year ended December 31, 2018 compared to the year ended December 31, 2017. The change was driven by an increase in same-facility salaries, wages and benefits expense of \$20 million and an increase from acquisitions of \$22 million, partially offset by a decrease of \$21 million due to the sale of Aspen.

Supplies expense increased by \$32 million, or 8.0%, for the year ended December 31, 2018 compared to the year ended December 31, 2017. The change was driven by an increase in same-facility supplies expense of \$26 million and

an increase from acquisitions of \$18 million, partially offset by a decrease of \$12 million due to the sale of Aspen.

Other operating expenses decreased by \$1 million, or 0.3%, for the year ended December 31, 2018 compared to the year ended December 31, 2017. Other operating expenses in 2018 were impacted by an increase in same-facility other operating expenses of \$1 million, an increase from acquisitions of \$14 million and a decrease of \$16 million due to the sale of Aspen.

Table of Contents*Facility Growth*

The following table summarizes the changes in our same-facility revenue year-over-year on a pro forma systemwide basis, which includes both consolidated and unconsolidated (equity method) facilities. While we do not record the revenues of unconsolidated facilities, we believe this information is important in understanding the financial performance of our Ambulatory Care segment because these revenues are the basis for calculating our management services revenues and, together with the expenses of our unconsolidated facilities, are the basis for our equity in earnings of unconsolidated affiliates.

Ambulatory Care Facility Growth Year Ended December 31, 2018

Net revenues	5.1%
Cases	3.4%
Net revenue per case	1.6%

Joint Ventures with Healthcare System Partners

USPI's business model is to jointly own its facilities with local physicians and, in many of these facilities, a not-for-profit healthcare system partner. Accordingly, as of December 31, 2018, the majority of facilities in our Ambulatory Care segment are operated in this model.

Ambulatory Care Facilities	Year Ended December 31, 2018
Facilities:	
With a healthcare system partner	208
Without a healthcare system partner	129
Total facilities operated	337
Change from December 31, 2017	
Acquisitions	10
De novo	8
Dispositions/Mergers	(14)
Total increase in number of facilities operated	4

During the year ended December 31, 2018, we sold our nine Aspen facilities in the United Kingdom, and we acquired controlling interests in an ophthalmology surgery center in Pennsylvania, a single-specialty spine surgery center in Georgia, two multi-specialty surgery centers in Florida and one in Texas, and a single specialty gastroenterology center in Florida. We paid cash totaling \$97 million for these acquisitions. We also acquired noncontrolling ownership interests in a multi-specialty surgery center in California and two surgical hospitals in Oklahoma for \$88 million. All nine facilities are jointly owned with local physicians, and four of them have a healthcare system partner.

Also during the year ended December 31, 2018, we acquired controlling interests in four facilities in which we already had an equity method investment. These multi-specialty surgery centers are located in New Jersey and Georgia. We paid cash totaling \$7 million for the additional ownership interests. All four facilities are jointly owned with local physicians and a healthcare system partner. Furthermore, during the year ended December 31, 2018, the Ambulatory Care segment acquired the non-controlling interest in Baylor Scott & White Medical Center – Sunnyvale, a surgical hospital in Texas, previously held by the Hospital Operations and other segment. The facility is jointly owned with local physicians and a healthcare system partner.

We also regularly engage in the purchase of equity interests with respect to our investments in unconsolidated affiliates and consolidated facilities that do not result in a change of control. These transactions are primarily the acquisitions of equity interests in ambulatory care facilities and the investment of additional cash in facilities that need capital for acquisitions, new construction or other business growth opportunities. During the year ended December 31,

2018, we invested approximately \$36 million in such transactions.

Conifer Segment

Our Conifer segment generated net operating revenues of \$1.533 billion and \$1.597 billion during the years ended December 31, 2018 and 2017, respectively, a portion of which was eliminated in consolidation as described in Note 22 to the Consolidated Financial Statements. Conifer revenues from third-party customers, which are not eliminated in consolidation, decreased \$36 million, or 3.7%, for the year ended December 31, 2018 compared to the prior-year period. Conifer revenues

65

Table of Contents

from third-party customers were negatively impacted by contract terminations related to the sales of customer hospitals, partially offset by the impact of the divestiture of former Tenet facilities that have now become third-party customers.

Salaries, wages and benefits expense for Conifer decreased \$99 million, or 10.3%, in the year ended December 31, 2018 compared to the year ended December 31, 2017 primarily due to the impact of previously announced workforce reductions as part of our enterprise-wide cost reduction initiatives.

Other operating expenses for Conifer decreased \$39 million, or 11.2%, in the year ended December 31, 2018 compared to the year ended December 31, 2017 primarily due to our enterprise-wide cost reduction initiatives.

The agreements documenting the terms and conditions of various services Conifer provides to Tenet hospitals, as well as certain administrative services our Hospital Operations and other segment provides to Conifer, were initially scheduled to expire in December 2018. As we continue to pursue strategic alternatives for Conifer, these agreements were renewed for an additional year with substantially similar pricing terms; however, the pricing or other material terms of such agreements may be modified if any such strategic alternative is consummated. Conifer's contract with Tenet represented 38.5% of the net operating revenues Conifer recognized in the year ended December 31, 2018.

Consolidated

Impairment and Restructuring Charges, and Acquisition-Related Costs

During the year ended December 31, 2018, we recorded impairment and restructuring charges and acquisition-related costs of \$209 million, consisting of \$77 million of impairment charges, \$115 million of restructuring charges and \$17 million of acquisition-related costs. Impairment charges included \$40 million for the write-down of buildings and other long-lived assets to their estimated fair values at two hospitals. Material adverse trends in our most recent estimates of future undiscounted cash flows of the hospitals indicated the carrying value of the hospitals' long-lived assets was not recoverable from the estimated future cash flows. We believe the most significant factors contributing to the adverse financial trends included reductions in volumes of insured patients, shifts in payer mix from commercial to governmental payers combined with reductions in reimbursement rates from governmental payers, and high levels of uninsured patients. As a result, we updated the estimate of the fair value of the hospitals' long-lived assets and compared the fair value estimate to the carrying value of the hospitals' long-lived assets. Because the fair value estimates were lower than the carrying value of the long-lived assets, an impairment charge was recorded for the difference in the amounts. The aggregate carrying value of assets held and used of the hospitals for which impairment charges were recorded was \$130 million at December 31, 2018 after recording the impairment charges. We also recorded \$24 million of charges to write-down assets held for sale to their estimated fair value, less estimated costs to sell, for certain of our Chicago-area facilities, \$9 million of charges to write-down assets held for sale to their estimated fair value, less estimated costs to sell, for Aspen and \$4 million of other impairment charges. Restructuring charges consisted of \$68 million of employee severance costs, \$17 million of contract and lease termination fees, and \$30 million of other restructuring costs. Acquisition-related costs consisted of \$10 million of transaction costs and \$7 million of acquisition integration charges. Our impairment and restructuring charges and acquisition-related costs for the year ended December 31, 2018 were comprised of \$141 million from our Hospital Operations and other segment, \$28 million from our Ambulatory Care segment and \$40 million from our Conifer segment.

During the year ended December 31, 2017, we recorded impairment and restructuring charges and acquisition-related costs of \$541 million, consisting of \$402 million of impairment charges, \$117 million of restructuring charges and \$22 million of acquisition-related costs. Impairment charges consisted of \$364 million of charges to write-down assets held for sale to their estimated fair value, less estimated costs to sell, for Aspen, our Philadelphia-area facilities and

certain of our Chicago-area facilities, \$31 million for the impairment of two equity method investments and \$7 million to write-down intangible assets. Restructuring charges consisted of \$82 million of employee severance costs, \$15 million of contract and lease termination fees, and \$20 million of other restructuring costs. Acquisition-related costs consisted of \$6 million of transaction costs and \$16 million of acquisition integration charges. Our impairment and restructuring charges and acquisition-related costs for the year ended December 31, 2017 were comprised of \$446 million from our Hospital Operations and other segment, \$74 million from our Ambulatory Care segment and \$21 million from our Conifer segment.

Our impairment tests presume stable, improving or, in some cases, declining operating results in our hospitals, which are based on programs and initiatives being implemented that are designed to achieve the hospital's most recent projections. If these projections are not met, or if in the future negative trends occur that impact our future outlook, future impairments of long-lived assets and goodwill may occur, and we may incur additional restructuring charges, which could be material.

Table of Contents*Litigation and Investigation Costs*

Litigation and investigation costs for the years ended December 31, 2018 and 2017 were \$38 million and \$23 million, respectively. The increased costs in the 2018 period relate primarily to attorneys' fees associated with internal investigations performed pursuant to our Non-Prosecution Agreement (the "NPA"), as well as attorneys' fees associated with our indemnification obligations with respect to two former employees in connection with criminal charges for conduct described in the NPA.

Net Gains on Sales, Consolidation and Deconsolidation of Facilities

During the year ended December 31, 2018, we recorded net gains on sales, consolidation and deconsolidation of facilities of \$127 million, primarily comprised of gains of \$36 million from the sale of our health plan in California, \$90 million from the sale of MacNeal Hospital and other operations affiliated with the hospital in the Chicago area, \$11 million from the sales of our minority interests in four North Texas hospitals and \$12 million from the sale of Des Peres Hospital, physician practices and other hospital-affiliated operations in St. Louis, Missouri, as well as net gains on sales, consolidation and deconsolidation of \$8 million from our Ambulatory Care segment, partially offset by losses of \$21 million from the sale of our hospitals, physician practices and related assets in Philadelphia, Pennsylvania and the surrounding area, and \$10 million due to post-closing adjustments related to the sale of our hospitals, physician practices and related assets in Houston, Texas and the surrounding area.

During the year ended December 31, 2017, we recorded gains on sales, consolidation and deconsolidation of facilities of \$144 million, primarily comprised of an \$111 million gain from the sale of our hospitals, physician practices and related assets in Houston, Texas and the surrounding area, \$13 million from the sale of the membership of one of our health plans in Arizona, \$10 million from the sale of our health plan membership in Texas, \$3 million from the sale of our health plan in Michigan, and \$9 million of gains related to the consolidation of certain USPI businesses due to ownership changes.

Interest Expense

Interest expense for the year ended December 31, 2018 was \$1.004 billion compared to \$1.028 billion for the year ended December 31, 2017.

Income Tax Expense

During the year ended December 31, 2018, we recorded income tax expense of \$176 million in continuing operations on pre-tax income of \$639 million compared to income tax expense of \$219 million in continuing operations on a pre-tax loss of \$101 million during the year ended December 31, 2017. The reconciliation between the amount of recorded income tax expense (benefit) and the amount calculated at the statutory federal tax rate is shown in the following table:

	Years Ended December 31,	
	2018	2017
Tax expense (benefit) at statutory federal rate of 21% in 2018 (35% in 2017)	\$ 134	\$(35)
State income taxes, net of federal income tax benefit	23	4
Expired state net operating losses, net of federal income tax benefit	9	28
Tax attributable to noncontrolling interests	(70)	(113)
Nondeductible goodwill	8	109
Impact of decrease in federal tax rate on deferred taxes	(1)	246
Reversal of permanent reinvestment assumption and other adjustments related to divestiture of foreign subsidiary	(6)	(30)

Edgar Filing: TENET HEALTHCARE CORP - Form 10-K

Stock-based compensation tax deficiencies	5	15
Changes in valuation allowance (including impact of decrease in federal tax rate)	76	—
Change in tax contingency reserves, including interest	(1)	(6)
Prior-year provision to return adjustments and other changes in deferred taxes	(5)	4
Other items	4	(3)
Income tax expense	\$176	\$219

In December 2017, the President signed into law the Tax Cuts and Jobs Act (the “Tax Act”). The Tax Act amended the Internal Revenue Code to reduce tax rates and modify policies, credits and deductions for individuals and businesses. For businesses, the Tax Act made broad and complex changes to the U.S. tax code, including but not limited to (1) reducing the corporate federal tax rate from a maximum of 35% to a flat 21% rate effective January 1, 2018, (2) repealing the corporate

Table of Contents

alternative minimum tax (“AMT”) and changing how existing AMT credits may be realized, (3) creating a new limitation on the deductibility of interest expense, (4) allowing full expensing of certain capital expenditures, and (5) denying deductions for performance-based compensation paid to certain key executives. International provisions in the Tax Act have not had, and are not expected to have, a material impact on the Company’s taxes.

As a result of the reduction in the corporate income tax rate from 35% to 21% under the Tax Act, we revalued our net deferred tax assets at December 31, 2017, resulting in a reduction in the value of our net deferred tax assets by \$251 million. For the year ended December 31, 2017, we recorded \$252 million as a provisional estimate of the impact of the Tax Act, including the decrease in the corporate income tax rate from 35% to 21%. Approximately \$6 million of the total \$252 million increase in income tax expense is included in the net change in valuation allowance, with the remaining \$246 million shown in the table above. During the year ended December 31, 2018, we recorded \$1 million of tax benefit upon finalizing our accounting for income tax effects of the Tax Act based on actual 2017 federal and state income tax filings.

Net Income Available to Noncontrolling Interests

Net income available to noncontrolling interests was \$355 million for the year ended December 31, 2018 compared to \$384 million for the year ended December 31, 2017. Net income available (loss attributable) to noncontrolling interests in the 2018 period was comprised of \$(17) million related to our Hospital Operations and other segment, \$308 million related to our Ambulatory Care segment and \$64 million related to our Conifer segment. Of the portion related to our Ambulatory Care segment, \$20 million was related to the minority interests in USPI.

ADDITIONAL SUPPLEMENTAL NON-GAAP DISCLOSURES

The financial information provided throughout this report, including our Consolidated Financial Statements and the notes thereto, has been prepared in conformity with accounting principles generally accepted in the United States of America (“GAAP”). However, we use certain non-GAAP financial measures defined below in communications with investors, analysts, rating agencies, banks and others to assist such parties in understanding the impact of various items on our financial statements, some of which are recurring or involve cash payments. We use this information in our analysis of the performance of our business, excluding items we do not consider relevant to the performance of our continuing operations. In addition, we use these measures to define certain performance targets under our compensation programs.

“Adjusted EBITDA” is a non-GAAP measure defined by the Company as net income available (loss attributable) to Tenet Healthcare Corporation common shareholders before (1) the cumulative effect of changes in accounting principle, (2) net loss attributable (income available) to noncontrolling interests, (3) income (loss) from discontinued operations, (4) income tax benefit (expense), (5) gain (loss) from early extinguishment of debt, (6) other non-operating expense, net, (7) interest expense, (8) litigation and investigation (costs) benefit, net of insurance recoveries, (9) net gains (losses) on sales, consolidation and deconsolidation of facilities, (10) impairment and restructuring charges and acquisition-related costs, (11) depreciation and amortization, and (12) income (loss) from divested operations and closed businesses (i.e., our health plan businesses). Litigation and investigation costs do not include ordinary course of business malpractice and other litigation and related expense.

The Company believes the foregoing non-GAAP measure is useful to investors and analysts because it presents additional information about the Company’s financial performance. Investors, analysts, Company management and the Company’s board of directors utilize this non-GAAP measure, in addition to GAAP measures, to track the Company’s financial and operating performance and compare the Company’s performance to peer companies, which utilize similar non-GAAP measures in their presentations. The human resources committee of the Company’s board of directors also uses certain non-GAAP measures to evaluate management’s performance for the purpose of determining incentive

compensation. The Company believes that Adjusted EBITDA is a useful measure, in part, because certain investors and analysts use both historical and projected Adjusted EBITDA, in addition to GAAP and other non-GAAP measures, as factors in determining the estimated fair value of shares of the Company's common stock. Company management also regularly reviews the Adjusted EBITDA performance for each operating segment. The Company does not use Adjusted EBITDA to measure liquidity, but instead to measure operating performance. The non-GAAP Adjusted EBITDA measure the Company utilizes may not be comparable to similarly titled measures reported by other companies. Because this measure excludes many items that are included in our financial statements, it does not provide a complete measure of our operating performance. Accordingly, investors are encouraged to use GAAP measures when evaluating the Company's financial performance.

Table of Contents

The following table shows the reconciliation of Adjusted EBITDA to net income available (loss attributable) to Tenet Healthcare Corporation common shareholders (the most comparable GAAP term) for the years ended December 31, 2018 and 2017:

	Years Ended December 31,	
	2018	2017
Net income available (loss attributable) to Tenet Healthcare Corporation common shareholders	\$111	\$(704)
Less: Net income available to noncontrolling interests	(355)	(384)
Income (loss) from discontinued operations, net of tax	3	—
Income (loss) from continuing operations	463	(320)
Income tax expense	(176)	(219)
Gain (loss) from early extinguishment of debt	1	(164)
Other non-operating expense, net	(5)	(22)
Interest expense	(1,004)	(1,028)
Operating income	1,647	1,113
Litigation and investigation costs	(38)	(23)
Net gains on sales, consolidation and deconsolidation of facilities	127	144
Impairment and restructuring charges, and acquisition-related costs	(209)	(541)
Depreciation and amortization	(802)	(870)
Income (loss) from divested and closed businesses (i.e., the Company's health plan businesses)	9	(41)
Adjusted EBITDA	\$2,560	\$2,444
Net operating revenues	\$18,313	\$19,179
Less: Net operating revenues from health plans	14	110
Adjusted net operating revenues	\$18,299	\$19,069
Net income available (loss attributable) to Tenet Healthcare Corporation common shareholders as a % of net operating revenues	0.6	% (3.7) %
Adjusted EBITDA as % of adjusted net operating revenues (Adjusted EBITDA margin)	14.0	% 12.8 %

Table of Contents**RESULTS OF OPERATIONS FOR THE YEAR ENDED DECEMBER 31, 2017 COMPARED TO THE YEAR ENDED DECEMBER 31, 2016**

The following two tables summarize our consolidated net operating revenues, operating expenses and operating income from continuing operations, both in dollar amounts and as percentages of net operating revenues, for the years ended December 31, 2017 and 2016:

	Years Ended December 31,		
	2017	2016	Increase (Decrease)
Net operating revenues:			
General hospitals	\$ 16,242	\$ 16,488	\$ (246)
Other operations	4,371	4,582	(211)
Net operating revenues before provision for doubtful accounts	20,613	21,070	(457)
Less provision for doubtful accounts	1,434	1,449	(15)
Net operating revenues	19,179	19,621	(442)
Equity in earnings of unconsolidated affiliates	144	131	13
Operating expenses:			
Salaries, wages and benefits	9,274	9,328	(54)
Supplies	3,085	3,124	(39)
Other operating expenses, net	4,570	4,891	(321)
Electronic health record incentives	(9)	(32)	23
Depreciation and amortization	870	850	20
Impairment and restructuring charges, and acquisition-related costs	541	202	339
Litigation and investigation costs	23	293	(270)
Gains on sales, consolidation and deconsolidation of facilities	(144)	(151)	7
Operating income	\$ 1,113	\$ 1,247	\$ (134)
	Years Ended December 31,		
	2017	2016	Increase (Decrease)
Net operating revenues	100.0 %	100.0 %	— %
Equity in earnings of unconsolidated affiliates	0.8 %	0.7 %	0.1 %
Operating expenses:			
Salaries, wages and benefits	48.4 %	47.5 %	0.9 %
Supplies	16.1 %	15.9 %	0.2 %
Other operating expenses, net	23.8 %	25.0 %	(1.2)%
Electronic health record incentives	— %	(0.2)%	0.2 %
Depreciation and amortization	4.5 %	4.3 %	0.2 %
Impairment and restructuring charges, and acquisition-related costs	2.8 %	1.1 %	1.7 %
Litigation and investigation costs	0.1 %	1.5 %	(1.4)%
Gains on sales, consolidation and deconsolidation of facilities	(0.7)%	(0.8)%	0.1 %
Operating income	5.8 %	6.4 %	(0.6)%

Net operating revenues of our general hospitals include inpatient and outpatient revenues for services provided by facilities in our Hospital Operations and other segment, as well as nonpatient revenues (e.g., rental income, management fee revenue, and income from services such as cafeterias, gift shops and parking) and other miscellaneous revenue. Net operating revenues of other operations for the periods presented primarily consist of revenues from (1) physician practices, (2) our Ambulatory Care segment, (3) services provided by Conifer to third parties and (4) our health plans, most of which were sold in 2017. Revenues from our general hospitals represented approximately 79% and 78% of our total net operating revenues before provision for doubtful accounts for the years ended December 31, 2017 and 2016, respectively.

Net operating revenues from our other operations were \$4.371 billion and \$4.582 billion in the years ended December 31, 2017 and 2016, respectively. The decrease in net operating revenues from other operations during 2017 primarily related to the cessation of operations of our health plan businesses in 2017, partially offset by increased revenues from the revenue cycle services provided by Conifer, as well as revenues from USPI. Equity in earnings of unconsolidated affiliates were \$144 million and \$131 million for the years ended December 31, 2017 and 2016, respectively. The increase in equity in earnings of unconsolidated affiliates in the 2017 period compared to the 2016 period primarily related to USPI.

Table of Contents

The following table shows selected operating expenses of our three reportable business segments. Information for our Hospital Operations and other segment is presented on a same-hospital basis, which includes the results of our same 72 hospitals operated throughout the years ended December 31, 2017 and 2016. Our same-hospital information excludes the results of five Georgia hospitals, which we divested effective April 1, 2016, our THOP Transmountain Campus teaching hospital, which we opened in January 2017 in El Paso, and three Houston-area hospitals, which we divested effective August 1, 2017. In addition, although we operated four North Texas hospitals throughout the years ended December 31, 2017 and 2016, we do not consolidate the results of operations of these hospitals because we divested a controlling interest in them effective January 1, 2016.

Selected Operating Expenses	Years Ended December 31,		
	2017	2016	Increase (Decrease)
Hospital Operations and other — Same-Hospital			
Salaries, wages and benefits	\$7,490	\$7,423	0.9 %
Supplies	2,628	2,659	(1.2)%

RESULTS OF OPERATIONS BY SEGMENT

At December 31, 2017, our operations were reported in three segments:

Hospital Operations and other, which was comprised of our acute care hospitals, ancillary outpatient facilities, urgent care centers, microhospitals and physician practices. As described in Note 5 to the accompanying Consolidated Financial Statements, certain of our facilities were classified as held for sale at December 31, 2017.

Ambulatory Care, which was comprised of USPI's ambulatory surgery centers, urgent care centers, imaging centers and surgical hospitals, as well as Aspen's hospitals and clinics, which were classified as held for sale at December 31, 2017 as described in Note 5 to the accompanying Consolidated Financial Statements.

Conifer, which provides healthcare business process services in the areas of hospital and physician revenue cycle management and value-based care solutions to healthcare systems, as well as individual hospitals, physician practices, self-insured organizations, health plans and other entities.

Table of Contents**Hospital Operations and Other Segment**

The following tables show operating statistics of our continuing operations hospitals and related outpatient facilities on a same-hospital basis, unless otherwise indicated, which includes the results of our same 72 hospitals operated throughout the years ended December 31, 2017 and 2016. Our same-hospital information excludes the results of five Georgia hospitals, which we divested effective April 1, 2016, our THOP Transmountain Campus teaching hospital, which we opened in January 2017 in El Paso, and three Houston-area hospitals, which we divested effective August 1, 2017. In addition, although we operated four North Texas hospitals throughout the years ended December 31, 2017 and 2016, we do not consolidate the results of operations of these hospitals because we divested a controlling interest in them effective January 1, 2016.

Revenues

Same-hospital net operating revenues decreased \$281 million, or 1.8%, during the year ended December 31, 2017 compared to the year ended December 31, 2016. The decrease in same-hospital net operating revenues in the 2017 period is primarily due to lower inpatient and outpatient volumes, as well as a decrease in our other operations revenues, partially offset by improved terms of our managed care contracts and incremental net revenues from the California provider fee program of \$35 million. Same-hospital net inpatient revenues decreased \$52 million, or 0.5%, while same-hospital admissions decreased 2.0% in the 2017 period compared to the 2016 period. Same-hospital net inpatient revenue per admission increased 1.5%, primarily due to the improved terms of our managed care contracts and volume growth in higher acuity service lines in the year ended December 31, 2017 compared to the prior year. Same-hospital net outpatient revenues increased \$174 million, or 3.2%, and same-hospital outpatient visits decreased 2.6% in the year ended December 31, 2017 compared to the year ended

Table of Contents

December 31, 2016. Growth in outpatient revenues was primarily driven by improved terms of our managed care contracts, partially offset by decreased outpatient volume levels. Same-hospital net outpatient revenue per visit increased 6.1% primarily due to the improved terms of our managed care contracts.

Provision for Doubtful Accounts

Same-hospital provision for doubtful accounts as a percentage of net operating revenues before provision for doubtful accounts was 7.9% and 7.3% for the years ended December 31, 2017 and 2016, respectively. The increase in the 2017 period compared to the 2016 period was driven by increases in uninsured revenues and volumes, as well as higher patient co-pays and deductibles. The following table shows the net accounts receivable and allowance for doubtful accounts by payer at December 31, 2017 and 2016:

	December 31, 2017			December 31, 2016		
	Accounts Receivable Before Allowance for Doubtful Accounts	Allowance for Doubtful Accounts	Net	Accounts Receivable Before Allowance for Doubtful Accounts	Allowance for Doubtful Accounts	Net
Medicare	\$257	\$ —	\$257	\$294	\$ —	\$294
Medicaid	95	—	95	125	—	125
Net cost report settlements receivable (payable) and valuation allowances	4	—	4	(14)	—	(14)

Total Hospital Operations and other	3,297	855	2,442	3,699	988	2,711
Ambulatory Care	215	43	172	227	43	184
Total discontinued operations	2	—	2	2	—	2
	\$3,514	\$ 898	\$2,616	\$3,928	\$ 1,031	\$2,897

A significant portion of our provision for doubtful accounts related to self-pay patients, as well as co-pays and deductibles owed to us by patients with insurance. Collection of accounts receivable has been a key area of focus, particularly over the past several years. At December 31, 2017, our Hospital Operations and other segment collection rate on self-pay accounts was approximately 24.7%. This self-pay collection rate includes payments made by patients, including co-pays and deductibles paid by patients with insurance. Based on our accounts receivable from self-pay patients and co-pays and deductibles owed to us by patients with insurance at December 31, 2017, a 10% decrease or increase in our self-pay collection rate, or approximately 3%, which we believe could be a reasonably likely change, would result in an unfavorable or favorable adjustment to provision for doubtful accounts of approximately \$9 million. Our estimated Hospital Operations and other segment collection rate from managed care payers was approximately 97.4% at December 31, 2017.

The following tables present the approximate aging by payer of our net accounts receivable from the continuing operations of our Hospital Operations and other segment of \$2.438 billion and \$2.725 billion at December 31, 2017 and 2016, respectively, excluding cost report settlements receivable (payable) and valuation allowances of \$4 million and \$(14) million at December 31, 2017 and 2016, respectively:

Total	100 %	100 %	100 %	100 %	100 %			

At December 31, 2017, we had a cumulative total of patient account assignments to Conifer of approximately \$2.279 billion related to our continuing operations. These accounts have already been written off and are not included in our receivables or in the allowance for doubtful accounts; however, an estimate of future recoveries from all the accounts assigned to Conifer is determined based on our historical experience and recorded in accounts receivable.

The following table shows the approximate amount of accounts receivable in the MEP still awaiting determination of eligibility under a government program at December 31, 2017 and 2016 by aging category for the hospitals currently in the program:

	2017	2016
0-60 days	\$81	\$84
61-120 days	12	13
121-180 days	3	4
Over 180 days	4	4
Total	\$100	\$105

Salaries, Wages and Benefits

Same-hospital salaries, wages and benefits as a percentage of net operating revenues increased by 130 basis points to 49.3% in the year ended December 31, 2017 compared to the same period in 2016. While same-hospital net operating revenues decreased 1.8% in the year ended December 31, 2017 compared to the year ended December 31, 2016, same-hospital salaries, wages and benefits increased by 0.9% in the 2017 period compared to the 2016 period. The increase in same-hospital salaries, wages and benefits as a percentage of net operating revenues was primarily due to annual merit increases for certain of our employees, increased employee health benefits costs and the effect of lower volumes on operating leverage due to certain fixed staffing costs. Salaries, wages and benefits expense for the years ended December 31, 2017 and 2016 included stock-based compensation expense of \$46 million and \$58 million, respectively.

Supplies

Same-hospital supplies expense as a percentage of net operating revenues increased by 10 basis points to 17.3% in the year ended December 31, 2017 compared to the same period in 2016. Supplies expense was impacted by growth in our higher acuity supply-intensive surgical services, partially offset by the benefits of the group-purchasing strategies and supplies-management services we utilize to reduce costs.

Other Operating Expenses, Net

Same-hospital other operating expenses as a percentage of net operating revenues decreased by 120 basis points to 24.2% in the year ended December 31, 2017 compared to 25.4% in the same period in 2016. Same-hospital other operating expenses decreased by \$254 million, or 6.5%, and net operating revenues decreased by \$281 million, or

1.8%, for the year ended December 31, 2017 compared to the year ended December 31, 2016. The changes in other operating expenses included:

• decreased expenses associated with our health plan businesses of \$362 million due to the sale and wind-down of those businesses in 2017, which decreases were offset by decreased health plan revenues; and

• increased gains on sales of fixed assets of \$24 million primarily due to the sale of our home health and hospice assets, partially offset by

• increased costs associated with funding indigent care services by hospitals we operated throughout both periods of \$12 million, which costs were substantially offset by additional net patient revenues;

75

Table of Contents

- increased medical fees of \$54 million;
and
- increased malpractice expense of \$28 million.

Same-hospital malpractice expense in the 2017 period included a favorable adjustment of approximately \$3 million from the eight basis point increase in the interest rate used to estimate the discounted present value of projected future malpractice liabilities compared to a favorable adjustment of approximately \$4 million from the 16 basis point increase in the interest rate in the 2016 period.

Ambulatory Care Segment

Our Ambulatory Care segment is comprised of USPI's ambulatory surgery centers, urgent care centers, imaging centers and surgical hospitals, as well as Aspen's hospitals and clinics.

Year Ended December 31, 2017 Compared to the Year Ended December 31, 2016

The following table summarizes certain consolidated statements of operations items for the periods indicated:

Ambulatory Care Results of Operations	Years Ended December 31,	
	2017	2016
Net operating revenues	\$1,940	\$1,797
Equity in earnings of unconsolidated affiliates	\$140	\$122
Salaries, wages and benefits	\$623	\$594
Supplies	\$398	\$365
Other operating expenses, net	\$360	\$346

Our Ambulatory Care net operating revenues increased by \$143 million, or 8.0%, for the year ended December 31, 2017 compared to the year ended December 31, 2016. The growth in 2017 revenues was primarily driven by increases from acquisitions of \$110 million.

Salaries, wages and benefits expense increased by \$29 million, or 4.9%, for the year ended December 31, 2017 compared to the year ended December 31, 2016. The 2017 increase was primarily driven by salaries, wages and benefits expense from acquisitions of \$26 million.

Supplies expense increased by \$33 million, or 9.0%, for the year ended December 31, 2017 compared to the year ended December 31, 2016. The 2017 increase was primarily due to supplies expense from acquisitions of \$27 million.

Other operating expenses increased by \$14 million, or 4.0%, for the year ended December 31, 2017 compared to the year ended December 31, 2016. The 2017 increase in other operating expenses was driven by other operating expenses from acquisitions of \$18 million, partially offset by decreases in same-facility other operating expenses of \$4 million.

Facility Growth

The following table summarizes the changes in our same-facility revenue year-over-year on a pro forma systemwide basis, which includes both consolidated and unconsolidated (equity method) facilities. While we do not record the revenues of unconsolidated facilities, we believe this information is important in understanding the financial performance of our Ambulatory Care segment because these revenues are the basis for calculating our management

services revenues and, together with the expenses of our unconsolidated facilities, are the basis for our equity in earnings of unconsolidated affiliates.

Ambulatory Care Facility Growth **Year Ended December 31, 2017**

Net revenues	4.6%
Cases	0.6%
Net revenue per case	3.9%

Joint Ventures with Healthcare System Partners

USPI's business model is to jointly own its facilities with local physicians and not-for-profit healthcare systems. Accordingly, as of December 31, 2017, the majority of facilities in our Ambulatory Care segment are operated in this model.

Table of Contents

Ambulatory Care Facilities	Year Ended December 31, 2017
Facilities:	
With a healthcare system partner	193
Without a healthcare system partner	140
Total facilities operated	333
Change from December 31, 2016	
Acquisitions	9
De novo	3
Dispositions/Mergers	(2)
Total increase in number of facilities operated	10

During the year ended December 31, 2017, we acquired controlling interests in a single-specialty gastroenterology surgery center in each of Texas and Arizona, a single-specialty ophthalmology surgery center in each of Florida and Kansas, a single-specialty orthopedics surgery center in Colorado, a multi-specialty surgery center in California and an imaging center in California. We paid cash totaling approximately \$36 million for these acquisitions. All seven facilities are jointly owned with local physicians, and a healthcare system partner has an ownership interest in each of the Arizona, Colorado and Florida surgery centers. During the year ended December 31, 2017, we acquired non-controlling interests in a surgical hospital in Texas and a multi-specialty surgery center in California. We paid cash totaling approximately \$49 million for these ownership interests. Both facilities are jointly owned with local physicians and a healthcare system partner.

Conifer Segment

Conifer generated net operating revenues of approximately \$1.597 billion and \$1.571 billion during the years ended December 31, 2017 and 2016, respectively, a portion of which was eliminated in consolidation as described in Note 22 to the Consolidated Financial Statements. The increase in revenues from third parties of \$59 million, or 6.4%, for the year ended December 31, 2017, which are not eliminated in consolidation, is primarily due to new clients. Conifer's contract with Tenet represented approximately 39% of the net operating revenues Conifer recognized in the year ended December 31, 2017.

Salaries, wages and benefits expense for Conifer increased \$3 million, or 0.3%, in the year ended December 31, 2017 compared to the year ended December 31, 2016 due to an increase in staffing as a result of the growth in Conifer's business primarily attributable to new clients.

Other operating expenses for Conifer increased \$12 million, or 3.6%, in the year ended December 31, 2017 compared to the year ended December 31, 2016 due to the growth in Conifer's business primarily attributable to new clients.

Consolidated*Impairment and Restructuring Charges, and Acquisition-Related Costs*

During the year ended December 31, 2017, we recorded impairment and restructuring charges and acquisition-related costs of \$541 million, consisting of \$402 million of impairment charges, \$117 million of restructuring charges and \$22 million of acquisition-related costs. Impairment charges consisted of \$364 million of charges to write-down assets held for sale to their estimated fair value, less estimated costs to sell, for our Aspen, Philadelphia-area and certain of our Chicago-area facilities, \$31 million for the impairment of two equity method investments and \$7 million to write-down intangible assets. Of the total impairment charges recognized for the year ended December 31, 2017, \$337

million related to our Hospital Operations and other segment, \$63 million related to our Ambulatory Care segment, and \$2 million related to our Conifer segment. Restructuring charges consisted of \$82 million of employee severance costs, \$15 million of contract and lease termination fees, and \$20 million of other restructuring costs. Acquisition-related costs consisted of \$6 million of transaction costs and \$16 million of acquisition integration charges.

During the year ended December 31, 2016, we recorded impairment and restructuring charges and acquisition-related costs of \$202 million. This amount included impairment charges of approximately \$54 million for the write-down of buildings, equipment and other long-lived assets, primarily capitalized software costs classified as other intangible assets, to their estimated fair values at four hospitals. Material adverse trends in our estimates of future undiscounted cash flows of the hospitals at that time indicated the carrying value of the hospitals' long-lived assets was not recoverable from the estimated future cash flows. We believe the most significant factors contributing to the adverse financial trends included reductions in volumes of insured patients, shifts in payer mix from commercial to governmental payers combined with reductions in reimbursement rates from governmental payers, and high levels of uninsured patients. As a result, we updated the estimate of

Table of Contents

the fair value of the hospitals' long-lived assets and compared the fair value estimate to the carrying value of the hospitals' long-lived assets. Because the fair value estimates were lower than the carrying value of the long-lived assets, an impairment charge was recorded for the difference in the amounts. The aggregate carrying value of assets held and used of the hospitals for which impairment charges were recorded was \$163 million at December 31, 2016 after recording the impairment charges. We also recorded \$19 million of impairment charges related to investments and \$14 million related to other intangible assets, primarily contract-related intangibles and capitalized software costs not associated with the hospitals described above. Of the total impairment charges recognized for the year ended December 31, 2016, \$76 million related to our Hospital Operations and other segment, \$8 million related to our Ambulatory Care segment, and \$3 million related to our Conifer segment. We also recorded \$35 million of employee severance costs, \$14 million of restructuring costs, \$14 million of contract and lease termination fees, and \$52 million in acquisition-related costs, which include \$20 million of transaction costs and \$32 million of acquisition integration costs.

Litigation and Investigation Costs

Litigation and investigation costs for the years ended December 31, 2017 and 2016 were \$23 million and \$293 million, respectively. For the year ended December 31, 2016, \$278 million was attributable to accruals for the previously disclosed civil qui tam litigation and parallel criminal investigation of the Company and certain of its subsidiaries.

Gains on Sales, Consolidation and Deconsolidation of Facilities

During the year ended December 31, 2017, we recorded gains on sales, consolidation and deconsolidation of facilities of approximately \$144 million, primarily comprised of an \$111 million gain from the sale of our hospitals, physician practices and related assets in Houston, Texas and the surrounding area, \$13 million from the sale of the membership of one of our health plans in Arizona, \$10 million from the sale of our health plan membership in Texas, \$3 million from the sale of our health plan in Michigan, and \$9 million of gains related to the consolidation of certain businesses of USPI due to ownership changes.

During the year ended December 31, 2016, we recorded gains on sales, consolidation and deconsolidation of facilities of approximately \$151 million, primarily comprised of a \$113 million gain from the sale of our Atlanta-area facilities and \$33 million of gains related to the consolidation of certain businesses of USPI due to ownership changes.

Interest Expense

Interest expense for the year ended December 31, 2017 was \$1.028 billion compared to \$979 million for the year ended December 31, 2016. These increases are attributable to additional senior notes issued in 2017, partially offset by the impact of the redemption of other senior notes since the 2016 period.

Income Tax Expense

During the year ended December 31, 2017, we recorded income tax expense of \$219 million in continuing operations on a pre-tax loss of \$101 million, compared to income tax expense of \$67 million on pre-tax income of \$248 million during the year ended December 31, 2016. The following table shows the reconciliation between the amount of recorded income tax expense (benefit) and the amount calculated at the statutory federal tax rate.

Table of Contents

	Years Ended December 31,	
	2017	2016
Tax expense (benefit) at statutory federal rate of 35%	\$(35)	\$87
State income taxes, net of federal income tax benefit	4	16
Expired state net operating losses, net of federal income tax benefit	28	35
Tax attributable to noncontrolling interests	(113)	(106)
Nondeductible goodwill	109	29
Nontaxable gains	—	(11)
Nondeductible litigation costs	—	37
Nondeductible acquisition costs	1	1
Nondeductible health insurance provider fee	—	2
Impact of decrease in federal tax rate on deferred taxes	246	—
Reversal of permanent reinvestment assumption for foreign subsidiary	(30)	—
Stock based compensation tax deficiencies	15	—
Changes in valuation allowance (including impact of decrease in federal tax rate)	—	(25)
Change in tax contingency reserves, including interest	(6)	(9)
Prior-year provision to return adjustments and other changes in deferred taxes	4	12
Other items	(4)	(1)
	\$219	\$67

As a result of the reduction in the corporate income tax rate from 35% to 21% under the Tax Act, we revalued our net deferred tax assets at December 31, 2017, resulting in a reduction in the value of our net deferred tax assets of approximately \$252 million. The reduction was recorded as additional income tax expense in the accompanying Consolidated Statement of Operations for the year ended December 31, 2017. In the table above, approximately \$6 million of the total \$252 million increase in income tax expense is included in the net change in valuation allowance. Our revaluation of our deferred tax asset was subject to further revision based on our actual 2017 federal and state income tax filings.

Net Income Attributable to Noncontrolling Interests

Net income attributable to noncontrolling interests was \$384 million for the year ended December 31, 2017 compared to \$368 million for the year ended December 31, 2016. Net income attributable to noncontrolling interests in the 2017 period was comprised of \$29 million related to our Hospital Operations and other segment, \$304 million related to our Ambulatory Care segment and \$51 million related to our Conifer segment. Of the portion related to our Ambulatory Care segment, \$60 million was related to the minority interests in USPI, including \$22 million related to the reduction of USPI's deferred tax liabilities as a result of the reduction in the corporate income tax rate from 35% to 21%.

Table of Contents**LIQUIDITY AND CAPITAL RESOURCES*****CASH REQUIREMENTS***

Our obligations to make future cash payments under contracts, such as debt and lease agreements, and under contingent commitments, such as standby letters of credit and minimum revenue guarantees, are summarized in the table below, all as of December 31, 2018:

Total⁽⁴⁾	\$22,133	\$2,601	\$4,039	\$3,110	\$4,347	\$2,355	\$5,681

Includes interest through maturity date/lease termination. Our 5.500% senior unsecured notes due 2019, which are included as 2019 obligations in this table, are

⁽¹⁾ not included in current portion of long-term debt in our Consolidated Balance Sheet at December 31, 2018 because of our intent and ability to refinance them on a long-term basis. See Note 24 to our Consolidated Financial Statements for additional information.

⁽²⁾ Includes minimum revenue guarantees, primarily related to physicians under relocation agreements and physician groups that provide services at our hospitals, and operating lease guarantees.

⁽³⁾ These agreements contain various rights and termination provisions.

Professional liability and workers' compensation reserves, and our obligations under the Baylor Put/Call Agreement, as defined and described in Note 17 to our Consolidated Financial Statements, have been excluded from the table. At December 31, 2018, the current and long-term professional and general liability

⁽⁴⁾ reserves included in our Consolidated Balance Sheet were \$216 million and \$666 million, respectively, and the current and long-term workers' compensation reserves included in our Consolidated Balance Sheet were \$42 million and \$145 million, respectively. Redeemable noncontrolling interests in USPI that are subject to the Baylor Put/Call Agreement totaled \$186 million at December 31, 2018.

Standby letters of credit are required principally by our insurers and various states to collateralize our workers' compensation programs pursuant to statutory requirements and as security to collateralize the deductible and self-insured retentions under certain of our professional and general liability insurance programs. The amount of collateral required is primarily dependent upon the level of claims activity and our creditworthiness. The insurers require the collateral in case we are unable to meet our obligations to claimants within the deductible or self-insured retention layers.

We consummated the following transactions affecting our long-term commitments in the year ended December 31, 2018:

In December 2018 and November 2018, we purchased \$22 million and \$10 million, respectively, of aggregate principal amount of our 5.500% senior unsecured notes due 2019 for \$22 million and \$10 million, respectively.

In August 2018, we purchased \$38 million aggregate principal amount of our 6.875% senior unsecured notes due 2031 for \$36 million, including \$1 million in accrued and unpaid interest through the dates of purchase.

In May 2018, we purchased \$30 million aggregate principal amount of our 6.875% senior unsecured notes due 2031 for \$28 million. In connection with the purchase, we recorded a loss from early extinguishment of debt of \$1 million in the three months ended June 30, 2018, primarily related to the write-off of associated unamortized note discount and issuance costs, partially offset by the difference between the purchase price and the par value of the notes.

In March 2018, we purchased \$28 million aggregate principal amount of our 6.750% senior unsecured notes due 2023 and \$22 million aggregate principal amount of our 7.000% senior unsecured notes due 2025 for \$51 million, including \$1 million in accrued and unpaid interest through the dates of purchase. In connection with these

Table of Contents

purchases, we recorded a loss from early extinguishment of debt of \$1 million in the three months ended March 31, 2018, primarily related to the write-off of associated unamortized issuance costs.

As part of our long-term objective to manage our capital structure, we may from time to time seek to retire, purchase, redeem or refinance some of our outstanding debt or equity securities subject to prevailing market conditions, our liquidity requirements, contractual restrictions and other factors. These actions are part of our strategy to manage our leverage and capital structure over time, which is dependent on our total amount of debt, our cash and our operating results. We continue to seek further initiatives to increase the efficiency of our balance sheet by generating incremental cash, including by means of the sale of underutilized or inefficient assets.

At December 31, 2018, using the last 12 months of Adjusted EBITDA, our ratio of total long-term debt, net of cash and cash equivalent balances, to Adjusted EBITDA was 5.63x. We anticipate this ratio will fluctuate from quarter to quarter based on earnings performance and other factors, including the use of our revolving credit facility as a source of liquidity and acquisitions that involve the assumption of long-term debt. We intend to manage this ratio by following our business plan, managing our cost structure, possible asset divestitures and through other changes in our capital structure, including, if appropriate, the issuance of equity or convertible securities. Our ability to achieve our leverage and capital structure objectives is subject to numerous risks and uncertainties, many of which are described in the Forward-Looking Statements and Risk Factors sections in Part I of this report.

Our capital expenditures primarily relate to the expansion and renovation of existing facilities (including amounts to comply with applicable laws and regulations), equipment and information systems additions and replacements, introduction of new medical technologies, design and construction of new buildings, and various other capital improvements, as well as commitments to make capital expenditures in connection with acquisitions of businesses. Capital expenditures were \$617 million, \$707 million and \$875 million in the years ended December 31, 2018, 2017 and 2016, respectively. We anticipate that our capital expenditures for continuing operations for the year ending December 31, 2019 will total approximately \$650 million to \$700 million, including \$135 million that was accrued as a liability at December 31, 2018. We have been engaged in a series of legal challenges over the Certificate of Need (“CON”) that the South Carolina Department of Health and Environmental Control (“SCDHEC”) initially granted to us in 2005 to construct a new 100-bed acute care hospital in Fort Mill, South Carolina. Following a decision by the South Carolina Supreme Court in February 2019, the opponent to our CON now has one remaining right of appeal. If we ultimately prevail, we expect that we will finalize the design of the hospital soon after resolution and submit it to the SCDHEC for approval. Once construction begins, the hospital is expected to take up to two years to complete at a cost of approximately \$170 million over the construction period.

Interest payments, net of capitalized interest, were \$976 million, \$939 million and \$932 million in the years ended December 31, 2018, 2017 and 2016, respectively. For the year ending December 31, 2019, we expect annual interest payments to be approximately \$980 million to \$990 million.

Income tax payments, net of tax refunds, were \$25 million, \$56 million and \$33 million in the years ended December 31, 2018, 2017 and 2016, respectively. At December 31, 2018, our carryforwards available to offset future taxable income consisted of (1) federal net operating loss (“NOL”) carryforwards of approximately \$1.0 billion pre-tax expiring in 2027 to 2034, (2) general business credit carryforwards of approximately \$26 million expiring in 2023 through 2038, and (3) state NOL carryforwards of approximately \$3.1 billion expiring in 2019 through 2038 for which the associated deferred tax benefit, net of valuation allowance and federal tax impact, is \$22 million. Our ability to utilize NOL carryforwards to reduce future taxable income may be limited under Section 382 of the Internal Revenue Code if certain ownership changes in our company occur during a rolling three-year period. These ownership changes include purchases of common stock under share repurchase programs, the offering of stock by us, the purchase or sale of our stock by 5% shareholders, as defined in the Treasury regulations, or the issuance or exercise of rights to acquire our stock. If such ownership changes by 5% shareholders result in aggregate increases that exceed 50 percentage

points during the three-year period, then Section 382 imposes an annual limitation on the amount of our taxable income that may be offset by the NOL carryforwards or tax credit carryforwards at the time of ownership change.

Periodic examinations of our tax returns by the Internal Revenue Service (“IRS”) or other taxing authorities could result in the payment of additional taxes. The IRS has completed audits of our tax returns for all tax years ended on or before December 31, 2007. All disputed issues with respect to these audits have been resolved and all related tax assessments (including interest) have been paid. Our tax returns for years ended after December 31, 2007 and USPI’s tax returns for years ended after December 31, 2014 remain subject to audit by the IRS.

Table of Contents

SOURCES AND USES OF CASH

Our liquidity for the year ended December 31, 2018 was primarily derived from net cash provided by operating activities, cash on hand and borrowings under our revolving credit facility. We had \$411 million of cash and cash equivalents on hand at December 31, 2018 to fund our operations and capital expenditures, and our borrowing availability under our credit facility was \$998 million based on our borrowing base calculation as of December 31, 2018.

Our primary source of operating cash is the collection of accounts receivable. As such, our operating cash flow is impacted by levels of cash collections, as well as levels of implicit price concessions, due to shifts in payer mix and other factors.

Net cash provided by operating activities was \$1.049 billion for the year ended December 31, 2018 compared to \$1.200 billion for the year ended December 31, 2017. Key factors contributing to the change between the 2018 and 2017 periods include the following:

- An increase of \$38 million in payments on reserves for restructuring charges, acquisition-related costs, and litigation costs and settlements;

• Decreased cash receipts of \$31 million related to the California provider fee program;

• Additional interest payments of \$37 million in the 2018 period primarily due to the six-month interest payment in January 2018 related to our 7.500% senior secured second lien notes due 2022, which were issued in December 2016, and changes in the timing of certain interest payments as a result of our refinancing transactions in 2017;

• Lower income tax payments of \$31 million in the 2018 period;

• Increased cash flows from our health plan businesses of \$101 million due to cash outflows in the 2017 period resulting from the sales and wind-down of these businesses in 2017, compared to negligible cash flows in the 2018 period; and

• The timing of other working capital items, including \$129 million of additional payments for professional and general liability claims and expenses in the 2018 period.

Net cash used in investing activities was \$115 million for the year ended December 31, 2018 compared to \$21 million of net cash provided by investing activities for the year ended December 31, 2017. The primary reason for the decrease was proceeds from sales of facilities and other assets of \$543 million in the 2018 period when we completed the sale of our hospitals, physician practices and related assets in the Philadelphia area, the sale of MacNeal Hospital and other operations affiliated with the hospital in the Chicago area, the sale of Des Peres Hospital in St. Louis, the sale of nine Aspen facilities in the United Kingdom, and the sale of certain assets and the related liabilities of our health plan in California compared to proceeds from sales of facilities and other assets of \$827 million in the 2017 period primarily attributable to the sale of our hospitals, physician practices and related assets in Houston, Texas. There was an increase in proceeds from sales of marketable securities, long-term investments and other assets of \$163 million in the 2018 period compared to the 2017 period primarily due to the sales of our minority interests in four North Texas hospitals. Cash used for acquisitions of businesses and joint venture interests was \$113 million in the 2018 period compared to \$50 million in the 2017 period, primarily related to freestanding outpatient facilities acquired. Cash used for purchases of equity investments was \$127 million in the 2018 period, compared to \$68 million in the 2017 period, both of which were primarily due to acquisition activity from our Ambulatory Care segment. Capital expenditures were \$617 million and \$707 million in the years ended December 31, 2018 and 2017,

respectively.

Net cash used in financing activities was \$1.134 billion for the year ended December 31, 2018 compared to \$1.326 billion for the year ended December 31, 2017. The 2018 amount included \$647 million related to purchases of noncontrolling interests, primarily our purchase of an additional 15% ownership interest in USPI and to settle the adjustment to the price we paid in 2017 based on actual 2017 financial results of USPI, compared to \$729 million related to purchases of noncontrolling interests in the 2017 period, when we increased our ownership interest in USPI from approximately 56.3% to 80%. The 2017 amount also included \$62 million of cash paid for debt issuance costs due to significant debt refinancing activity in the 2017 period further described in Note 7 to our Consolidated Financial Statements. Additionally, the 2017 amount included our purchase of the land and improvements associated with our Palm Beach Gardens Medical Center, which we previously leased under a capital lease, by retiring the lease obligation for \$44 million.

82

Table of Contents

We record our equity securities and our debt securities classified as available-for-sale at fair market value. The majority of our investments are valued based on quoted market prices or other observable inputs. We have no investments that we expect will be negatively affected by the current economic conditions such that they will materially impact our financial condition, results of operations or cash flows.

DEBT INSTRUMENTS, GUARANTEES AND RELATED COVENANTS

Credit Agreement. We have a senior secured revolving credit facility (as amended, the “Credit Agreement”) that provides, subject to borrowing availability, for revolving loans in an aggregate principal amount of up to \$1 billion, with a \$300 million subfacility for standby letters of credit. Obligations under the Credit Agreement, which has a scheduled maturity date of December 4, 2020, are guaranteed by substantially all of our domestic wholly owned hospital subsidiaries and are secured by a first-priority lien on the accounts receivable owned by us and the subsidiary guarantors. At December 31, 2018, we were in compliance with all covenants and conditions in our Credit Agreement. At December 31, 2018, we had no cash borrowings outstanding under the Credit Agreement and we had \$2 million of standby letters of credit outstanding. Based on our eligible receivables, \$998 million was available for borrowing under the Credit Agreement at December 31, 2018.

Letter of Credit Facility. We have a letter of credit facility (as amended, the “LC Facility”) that provides for the issuance of standby and documentary letters of credit, from time to time, in an aggregate principal amount of up to \$180 million (subject to increase to up to \$200 million). The maturity date of the LC Facility is March 7, 2021. Obligations under the LC Facility are guaranteed and secured by a first-priority pledge of the capital stock and other ownership interests of certain of our wholly owned domestic hospital subsidiaries on an equal ranking basis with our senior secured first lien notes. At December 31, 2018, we were in compliance with all covenants and conditions in our LC Facility. At December 31, 2018, we had \$93 million of standby letters of credit outstanding under the LC Facility.

Senior Secured and Senior Unsecured Note Refinancing Transactions. On February 5, 2019, we sold \$1.5 billion aggregate principal amount of 6.250% senior secured second lien notes, which will mature on February 1, 2027 (the “2027 Senior Secured Second Lien Notes”). We will pay interest on the 2027 Senior Secured Second Lien Notes semi-annually in arrears on February 1 and August 1 of each year, which payments will commence on August 1, 2019. The proceeds from the sale of the 2027 Senior Secured Second Lien Notes were used, after payment of fees and expenses, together with cash on hand and borrowings under our Credit Agreement, to fund the redemption of all \$300 million aggregate principal amount of our outstanding 6.750% senior notes due 2020 and all \$750 million aggregate principal amount of our outstanding 7.500% senior secured second lien notes due 2022, and will be used to fund the repayment upon maturity of all \$468 million aggregate principal amount of our outstanding 5.500% senior unsecured notes due March 1, 2019. In connection with the redemptions, we expect to record a loss from early extinguishment of debt of approximately \$47 million in the three months ending March 31, 2019, primarily related to the difference between the redemption prices and the par values of the notes, as well as the write-off of the associated unamortized issuance costs.

In 2018, we purchased \$150 million aggregate principal amount of notes outstanding for \$147 million, including \$2 million in accrued and unpaid interest through the dates of purchase. For additional information regarding our long-term debt and capital lease obligations, see Note 7 to the accompanying Consolidated Financial Statements.

LIQUIDITY

From time to time, we expect to engage in additional capital markets, bank credit and other financing activities depending on our needs and financing alternatives available at that time. We believe our existing debt agreements provide flexibility for future secured or unsecured borrowings.

Our cash on hand fluctuates day-to-day throughout the year based on the timing and levels of routine cash receipts and disbursements, including our book overdrafts, and required cash disbursements, such as interest and income tax payments. These fluctuations result in material intra-quarter net operating and investing uses of cash that have caused, and in the future could cause, us to use our Credit Agreement as a source of liquidity. We believe that existing cash and cash equivalents on hand, availability under our Credit Agreement, anticipated future cash provided by operating activities, and our investments in marketable securities of our captive insurance companies classified as noncurrent investments on our balance sheet should be adequate to meet our current cash needs. These sources of liquidity, in combination with any potential future debt incurrence, should also be adequate to finance planned capital expenditures, payments on the current portion of our long-term debt, payments to joint venture partners, including those related to put and call arrangements, and other presently known operating needs.

Table of Contents

Long-term liquidity for debt service and other purposes will be dependent on the amount of cash provided by operating activities and, subject to favorable market and other conditions, the successful completion of future borrowings and potential refinancings. However, our cash requirements could be materially affected by the use of cash in acquisitions of businesses, repurchases of securities, the exercise of put rights or other exit options by our joint venture partners, and contractual commitments to fund capital expenditures in, or intercompany borrowings to, businesses we own. In addition, liquidity could be adversely affected by a deterioration in our results of operations, including our ability to generate sufficient cash from operations, as well as by the various risks and uncertainties discussed in this section and other sections of this report, including any costs associated with legal proceedings and government investigations.

We do not rely on commercial paper or other short-term financing arrangements nor do we enter into repurchase agreements or other short-term financing arrangements not otherwise reported in our period-end balance sheets. In addition, we do not have significant exposure to floating interest rates given that all of our current long-term indebtedness has fixed rates of interest.

OFF-BALANCE SHEET ARRANGEMENTS

Our consolidated operating results for the year ended December 31, 2016 include \$2 million of net operating revenues and \$7 million of operating loss generated from a hospital operated by us under an operating lease arrangement, which hospital was sold effective March 31, 2016. In accordance with GAAP, the applicable buildings and the future lease obligations under this arrangement were not recorded on our consolidated balance sheet.

We have no other off-balance sheet arrangements that may have a current or future material effect on our financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources, except for \$219 million of standby letters of credit outstanding and guarantees at December 31, 2018.

RECENTLY ISSUED ACCOUNTING STANDARDS

See Note 23 to the accompanying Consolidated Financial Statements for a discussion of recently issued accounting standards.

CRITICAL ACCOUNTING ESTIMATES

In preparing our Consolidated Financial Statements in conformity with GAAP, we must use estimates and assumptions that affect the amounts reported in our Consolidated Financial Statements and accompanying notes. We regularly evaluate the accounting policies and estimates we use. In general, we base the estimates on historical experience and on assumptions that we believe to be reasonable, given the particular circumstances in which we operate. Actual results may vary from those estimates.

We consider our critical accounting estimates to be those that (1) involve significant judgments and uncertainties, (2) require estimates that are more difficult for management to determine, and (3) may produce materially different outcomes under different conditions or when using different assumptions.

Our critical accounting estimates cover the following areas:

• Recognition of net operating revenues, including contractual allowances and implicit price concessions;

• Accruals for general and professional liability risks;

• Impairment of long-lived assets;

• Impairment of goodwill; and

• Accounting for income taxes.

84

Table of Contents

REVENUE RECOGNITION

We report net patient service revenues at the amounts that reflect the consideration to which we expect to be entitled in exchange for providing patient care. These amounts are due from patients, third-party payers (including managed care payers and government programs) and others, and they include variable consideration for retroactive revenue adjustments due to settlement of audits, reviews and investigations. Generally, we bill our patients and third-party payers several days after the services are performed or shortly after discharge. Revenues are recognized as performance obligations are satisfied.

We determine performance obligations based on the nature of the services we provide. We recognize revenues for performance obligations satisfied over time based on actual charges incurred in relation to total expected charges. We believe that this method provides a faithful depiction of the transfer of services over the term of performance obligations based on the inputs needed to satisfy the obligations. Generally, performance obligations satisfied over time relate to patients in our hospitals receiving inpatient acute care services. We measure performance obligations from admission to the point when there are no further services required for the patient, which is generally the time of discharge. We recognize revenues for performance obligations satisfied at a point in time, which generally relate to patients receiving outpatient services, when: (1) services are provided; and (2) we do not believe the patient requires additional services.

We determine the transaction price based on gross charges for services provided, reduced by contractual adjustments provided to third-party payers, discounts provided to uninsured patients in accordance with our *Compact*, and implicit price concessions provided primarily to uninsured patients. We determine our estimates of contractual adjustments and discounts based on contractual agreements, our discount policies and historical experience. We determine our estimate of implicit price concessions based on our historical collection experience with these classes of patients using a portfolio approach as a practical expedient to account for patient contracts as collective groups rather than individually. The financial statement effects of using this practical expedient are not materially different from an individual contract approach.

Revenues under the traditional fee-for-service Medicare and Medicaid programs are based primarily on prospective payment systems. Retrospectively determined cost-based revenues under these programs, which were more prevalent in earlier periods, and certain other payments, such as Indirect Medical Education, Direct Graduate Medical Education, disproportionate share hospital and bad debt expense reimbursement, which are based on our hospitals' cost reports, are estimated using historical trends and current factors. Cost report settlements under these programs are subject to audit by Medicare and Medicaid auditors and administrative and judicial review, and it can take several years until final settlement of such matters is determined and completely resolved. Because the laws, regulations, instructions and rule interpretations governing Medicare and Medicaid reimbursement are complex and change frequently, the estimates we record could change by material amounts.

We have a system and estimation process for recording Medicare net patient service revenue and estimated cost report settlements. As a result, we record accruals to reflect the expected final settlements on our cost reports. For filed cost reports, we record the accrual based on those cost reports and subsequent activity, and record a valuation allowance against those cost reports based on historical settlement trends. The accrual for periods for which a cost report is yet to be filed is recorded based on estimates of what we expect to report on the filed cost reports, and a corresponding valuation allowance is recorded as previously described. Cost reports generally must be filed within five months after the end of the annual cost reporting period. After the cost report is filed, the accrual and corresponding valuation allowance may need to be adjusted.

Revenues under managed care plans are based primarily on payment terms involving predetermined rates per diagnosis, per-diem rates, discounted fee-for-service rates and/or other similar contractual arrangements. These

revenues are also subject to review and possible audit by the payers, which can take several years before they are completely resolved. The payers are billed for patient services on an individual patient basis. An individual patient's bill is subject to adjustment on a patient-by-patient basis in the ordinary course of business by the payers following their review and adjudication of each particular bill. We estimate the discounts for contractual allowances at the individual hospital level utilizing billing data on an individual patient basis. At the end of each month, on an individual hospital basis, we estimate our expected reimbursement for patients of managed care plans based on the applicable contract terms. We believe it is reasonably likely for there to be an approximately 3% increase or decrease in the estimated contractual allowances related to managed care plans. Based on reserves at December 31, 2018, a 3% increase or decrease in the estimated contractual allowance would impact the estimated reserves by approximately \$15 million. Some of the factors that can contribute to changes in the contractual allowance estimates include: (1) changes in reimbursement levels for procedures, supplies and drugs when threshold levels are triggered; (2) changes in reimbursement levels when stop-loss or outlier limits are reached; (3) changes in the admission status of a patient due to physician orders subsequent to initial diagnosis or testing; (4) final coding of in-house and discharged-not-final-billed patients that change reimbursement levels; (5) secondary benefits determined after primary insurance payments; and (6) reclassification of patients among insurance plans with different coverage and payment levels. Contractual allowance estimates are periodically reviewed for accuracy by taking into consideration known contract terms, as well as payment history.

Table of Contents

We believe our estimation and review process enables us to identify instances on a timely basis where such estimates need to be revised. We do not believe there were any adjustments to estimates of patient bills that were material to our revenues. In addition, on a corporate-wide basis, we do not record any general provision for adjustments to estimated contractual allowances for managed care plans. Managed care accounts, net of contractual allowances recorded, are further reduced to their net realizable value through implicit price concessions based on historical collection trends for these payers and other factors that affect the estimation process.

Generally, patients who are covered by third-party payers are responsible for related co-pays, co-insurance and deductibles, which vary in amount. We also provide services to uninsured patients and offer uninsured patients a discount from standard charges. We estimate the transaction price for patients with co-pays, co-insurance and deductibles and for those who are uninsured based on historical collection experience and current market conditions. Under our *Compact* and other uninsured discount programs, the discount offered to certain uninsured patients is recognized as a contractual allowance, which reduces net operating revenues at the time the self-pay accounts are recorded. The uninsured patient accounts, net of contractual allowances recorded, are further reduced to their net realizable value at the time they are recorded through implicit price concessions based on historical collection trends for self-pay accounts and other factors that affect the estimation process. There are various factors that can impact collection trends, such as changes in the economy, which in turn have an impact on unemployment rates and the number of uninsured and underinsured patients, the volume of patients through our emergency departments, the increased burden of co-pays, co-insurance amounts and deductibles to be made by patients with insurance, and business practices related to collection efforts. These factors continuously change and can have an impact on collection trends and our estimation process. Subsequent changes to the estimate of the transaction price are generally recorded as adjustments to net patient service revenues in the period of the change.

We have provided implicit price concessions, primarily to uninsured patients and patients with co-pays, co-insurance and deductibles. The implicit price concessions included in estimating the transaction price represent the difference between amounts billed to patients and the amounts we expect to collect based on our collection history with similar patients. Although outcomes vary, our policy is to attempt to collect amounts due from patients, including co-pays, co-insurance and deductibles due from patients with insurance, at the time of service while complying with all federal and state statutes and regulations, including, but not limited to, the Emergency Medical Treatment and Active Labor Act (“EMTALA”). Generally, as required by EMTALA, patients may not be denied emergency treatment due to inability to pay. Therefore, services, including the legally required medical screening examination and stabilization of the patient, are performed without delaying to obtain insurance information. In non-emergency circumstances or for elective procedures and services, it is our policy to verify insurance prior to a patient being treated; however, there are various exceptions that can occur. Such exceptions can include, for example, instances where (1) we are unable to obtain verification because the patient’s insurance company was unable to be reached or contacted, (2) a determination is made that a patient may be eligible for benefits under various government programs, such as Medicaid or Victims of Crime, and it takes several days or weeks before qualification for such benefits is confirmed or denied, and (3) under physician orders we provide services to patients that require immediate treatment.

Based on our accounts receivable from self-pay patients and co-pays, co-insurance amounts and deductibles owed to us by patients with insurance at December 31, 2018, a 10% decrease or increase in our self-pay collection rate, or approximately 2%, which we believe could be a reasonably likely change, would result in an unfavorable or favorable adjustment to patient accounts receivable of approximately \$11 million.

ACCRUALS FOR GENERAL AND PROFESSIONAL LIABILITY RISKS

We accrue for estimated professional and general liability claims, to the extent not covered by insurance, when they are probable and can be reasonably estimated. We maintain reserves, which are based on modeled estimates for the portion of our professional liability risks, including incurred but not reported claims, to the extent we do not have

insurance coverage. Our liability consists of estimates established based upon discounted calculations using several factors, including the number of expected claims, estimates of losses for these claims based on recent and historical settlement amounts, estimates of incurred but not reported claims based on historical experience, the timing of historical payments, and risk free discount rates used to determine the present value of projected payments. We consider the number of expected claims, average cost per claim and discount rate to be the most significant assumptions in estimating accruals for general and professional liabilities. Our liabilities are adjusted for new claims information in the period such information becomes known. Malpractice expense is recorded within other operating expenses in the accompanying Consolidated Statements of Operations.

Our estimated reserves for professional and general liability claims will change significantly if future trends differ from projected trends. We believe it is reasonably likely for there to be a 500 basis point increase or decrease in our frequency or severity trend. Based on our reserves and other information at December 31, 2018, a 500 basis point increase in our frequency trend would increase the estimated reserves by \$64 million, and a 500 basis point decrease in our frequency trend

Table of Contents

would decrease the estimated reserves by \$39 million. A 500 basis point increase in our severity trend would increase the estimated reserves by \$118 million, and a 500 basis point decrease in our severity trend would decrease the estimated reserves by \$80 million. Because our estimated reserves for future claim payments are discounted to present value, a change in our discount rate assumption could also have a significant impact on our estimated reserves. Our discount rate was 2.59%, 2.33% and 2.25% at December 31, 2018, 2017 and 2016, respectively. A 100 basis point increase or decrease in the discount rate would change the estimated reserves by \$23 million. In addition, because of the complexity of the claims, the extended period of time to settle the claims and the wide range of potential outcomes, our ultimate liability for professional and general liability claims could change materially from our current estimates.

The table below shows the case reserves and incurred but not reported and loss development reserves as of December 31, 2018, 2017 and 2016:

	December 31,		
	2018	2017	2016
Case reserves	\$210	\$194	\$189
Incurred but not reported and loss development reserves	742	720	675
Total undiscounted reserves	\$952	\$914	\$864

Several actuarial methods, including the incurred, paid loss development and Bornhuetter-Ferguson methods, are applied to our historical loss data to produce estimates of ultimate expected losses and the resulting incurred but not reported and loss development reserves. These methods use our specific historical claims data related to paid losses and loss adjustment expenses, historical and current case reserves, reported and closed claim counts, and a variety of hospital census information. These analyses are considered in our determination of our estimate of the professional liability claims, including the incurred but not reported and loss development reserve estimates. The determination of our estimates involves subjective judgment and could result in material changes to our estimates in future periods if our actual experience is materially different than our assumptions.

Malpractice claims generally take up to five years to settle from the time of the initial reporting of the occurrence to the settlement payment. Accordingly, the percentage of undiscounted reserves at December 31, 2018 and 2017 representing unsettled claims was approximately 93% and 98%, respectively.

The following table, which includes both our continuing and discontinued operations, presents the amount of our accruals for professional and general liability claims and the corresponding activity therein:

	Years Ended December 31,		
	2018	2017	2016

⁽¹⁾ Total malpractice expense for continuing operations, including premiums for insured coverage and recoveries from third parties, was \$388 million, \$303 million and \$281 million in the years ended December 31, 2018, 2017 and 2016, respectively.

IMPAIRMENT OF LONG-LIVED ASSETS

We evaluate our long-lived assets for possible impairment annually or whenever events or changes in circumstances indicate that the carrying amount of the asset, or related group of assets, may not be recoverable from estimated future undiscounted cash flows. If the estimated future undiscounted cash flows are less than the carrying value of the assets, we calculate the amount of an impairment charge if the carrying value of the long-lived assets exceeds the fair value of the assets. The fair value of the assets is estimated based on appraisals, established market values of comparable assets or internal estimates of future net cash flows expected to result from the use and ultimate disposition of the asset. The estimates of these future cash flows are based on assumptions and projections we believe to be reasonable and supportable. They require our

87

Table of Contents

subjective judgments and take into account assumptions about revenue and expense growth rates. These assumptions may vary by type of facility and presume stable, improving or, in some cases, declining results at our hospitals, depending on their circumstances. If the presumed level of performance does not occur as expected, impairment may result.

We report long-lived assets to be disposed of at the lower of their carrying amounts or fair values less costs to sell. In such circumstances, our estimates of fair value are based on appraisals, established market prices for comparable assets or internal estimates of future net cash flows

Fair value estimates can change by material amounts in subsequent periods. Many factors and assumptions can impact the estimates, including the following risks:

future financial results of our hospitals, which can be impacted by volumes of insured patients and declines in commercial managed care patients, terms of managed care payer arrangements, our ability to collect accounts due from uninsured and managed care payers, loss of volumes as a result of competition, and our ability to manage costs such as labor costs, which can be adversely impacted by union activity and the shortage of experienced nurses;

changes in payments from governmental healthcare programs and in government regulations such as reductions to Medicare and Medicaid payment rates resulting from government legislation or rule-making or from budgetary challenges of states in which we operate;

how the hospitals are operated in the future; and

the nature of the ultimate disposition of the assets.

During the year ended December 31, 2018, we recorded \$77 million of impairment charges, including \$40 million for the write-down of buildings and other long-lived assets to their estimated fair values at two hospitals. Material adverse trends in our most recent estimates of future undiscounted cash flows of the hospitals indicated the carrying value of the hospitals' long-lived assets was not recoverable from the estimated future cash flows. We believe the most significant factors contributing to the adverse financial trends included reductions in volumes of insured patients, shifts in payer mix from commercial to governmental payers combined with reductions in reimbursement rates from governmental payers, and high levels of uninsured patients. As a result, we updated the estimate of the fair value of the hospitals' long-lived assets and compared the fair value estimate to the carrying value of the hospitals' long-lived assets. Because the fair value estimates were lower than the carrying value of the long-lived assets, an impairment charge was recorded for the difference in the amounts. The aggregate carrying value of assets held and used of the hospitals for which impairment charges were recorded was \$130 million at December 31, 2018 after recording the impairment charges. We also recorded \$24 million of charges to write-down assets held for sale to their estimated fair value, less estimated costs to sell, for certain of our Chicago-area facilities, \$9 million of charges to write-down assets held for sale to their estimated fair value, less estimated costs to sell, for Aspen and \$4 million of other impairment charges. Of the total impairment charges recognized for the year ended December 31, 2018, \$67 million related to our Hospital Operations and other segment, \$9 million related to our Ambulatory Care segment, and \$1 million related to our Conifer segment.

During the year ended December 31, 2017, we recorded \$402 million of impairment charges, consisting of \$364 million of charges to write-down assets held for sale to their estimated fair value, less estimated costs to sell, for Aspen, our Philadelphia-area facilities and certain of our Chicago-area facilities, \$31 million for the impairment of two equity method investments and \$7 million to write-down intangible assets. Of the total impairment charges recognized for the year ended December 31, 2018, \$337 million related to our Hospital Operations and other segment, \$63 million related to our Ambulatory Care segment, and \$2 million related to our Conifer segment.

Table of Contents***IMPAIRMENT OF GOODWILL***

Goodwill represents the excess of costs over the fair value of assets of businesses acquired. Goodwill and other intangible assets acquired in purchase business combinations and determined to have indefinite useful lives are not amortized, but instead are subject to impairment tests performed at least annually. For goodwill, we perform the test at the reporting unit level, as defined by applicable accounting standards, when events occur that require an evaluation to be performed or at least annually. If we determine the carrying value of goodwill is impaired, or if the carrying value of a business that is to be sold or otherwise disposed of exceeds its fair value, then we reduce the carrying value, including any allocated goodwill, to fair value. Estimates of fair value are based on appraisals, established market prices for comparable assets or internal estimates of future net cash flows and presume stable, improving or, in some cases, declining results at our hospitals, depending on their circumstances. If the presumed level of performance does not occur as expected, impairment may result.

At December 31, 2018, our continuing operations consisted of three reportable segments, Hospital Operations and other, Ambulatory Care and Conifer. Our segments are reporting units used to perform our goodwill impairment analysis. We completed our annual impairment tests for goodwill as of October 1, 2018. During the year ended December 31, 2017, we changed our annual quantitative goodwill impairment testing date from December 31 to October 1 of each year. The change in the goodwill impairment test date better aligns the impairment testing procedures with the timing of our long-term planning process, which is a significant input to the testing. Also, during January 2017, our Florida, Northeast and Southern regions and our Detroit market were combined to form our then Eastern region. Subsequent to this change, our Hospital Operations and other segment was comprised of our then Eastern, Texas and Western regions, which were our reporting units used to perform our goodwill impairment analysis. During October 2017, we further reorganized our business such that our regional management layer was eliminated. Due to this reorganization, our previous region reporting units for our Hospital Operations and other segment were combined into one reporting unit. The change in testing date and the change in reporting units did not delay, accelerate or avoid a goodwill impairment charge.

The allocated goodwill balance related to our Hospital Operations and other segment totals \$2.980 billion. In our latest impairment analysis for the year ended December 31, 2018, the estimated fair value of our Hospital Operations and other segment exceeded the carrying value of long-lived assets, including goodwill, by approximately 40%.

The allocated goodwill balance related to our Ambulatory Care segment totals \$3.696 billion. In our latest impairment analysis for the year ended December 31, 2018, the estimated fair value of our Ambulatory Care segment exceeded the carrying value of long-lived assets, including goodwill, by approximately 30%.

The allocated goodwill balance related to our Conifer segment totals \$605 million. For the Conifer segment, we performed a qualitative analysis and concluded that it was more likely than not that the fair value of the reporting unit exceeded its carrying value. Factors considered in the analysis included recent and estimated future operating trends.

ACCOUNTING FOR INCOME TAXES

We account for income taxes using the asset and liability method. This approach requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of temporary differences between the carrying amounts and the tax bases of assets and liabilities. Income tax receivables and liabilities and deferred tax assets and liabilities are recognized based on the amounts that more likely than not will be sustained upon ultimate settlement with taxing authorities.

Developing our provision for income taxes and analysis of uncertain tax positions requires significant judgment and knowledge of federal and state income tax laws, regulations and strategies, including the determination of deferred tax

assets and liabilities and, if necessary, any valuation allowances that may be required for deferred tax assets.

We assess the realization of our deferred tax assets to determine whether an income tax valuation allowance is required. Based on all available evidence, both positive and negative, and the weight of that evidence to the extent such evidence can be objectively verified, we determine whether it is more likely than not that all or a portion of the deferred tax assets will be realized. The main factors that we consider include:

• Cumulative profits/losses in recent years, adjusted for certain nonrecurring items;

• Income/losses expected in future years;

• Unsettled circumstances that, if unfavorably resolved, would adversely affect future operations and profit levels;

Table of Contents

• The availability, or lack thereof, of taxable income in prior carryback periods that would limit realization of tax benefits; and

• The carryforward period associated with the deferred tax assets and liabilities.

During the year ended December 31, 2018, the valuation allowance increased by \$76 million, including an increase of \$89 million due to limitations on deductions of interest expense, a decrease of \$9 million due to the expiration or worthlessness of unutilized state net operating loss carryovers, and a decrease of \$4 million due to changes in expected realizability of deferred tax assets. The balance in the valuation allowance as of December 31, 2018 was \$148 million. During the year ended December 31, 2017, we had no net change in the valuation allowance, but there was a decrease of \$28 million due to the expiration or worthlessness of unutilized state net operating loss carryovers, an increase of \$6 million due to the decrease in the federal tax rate, and an increase of \$22 million due to changes in expected realizability of deferred tax assets. The remaining balance in the valuation allowance at December 31, 2017 was \$72 million.

We consider many factors when evaluating our uncertain tax positions, and such judgments are subject to periodic review. Tax benefits associated with uncertain tax positions are recognized in the period in which one of the following conditions is satisfied: (1) the more likely than not recognition threshold is satisfied; (2) the position is ultimately settled through negotiation or litigation; or (3) the statute of limitations for the taxing authority to examine and challenge the position has expired. Tax benefits associated with an uncertain tax position are derecognized in the period in which the more likely than not recognition threshold is no longer satisfied.

While we believe we have adequately provided for our income tax receivables or liabilities and our deferred tax assets or liabilities, adverse determinations by taxing authorities or changes in tax laws and regulations could have a material adverse effect on our consolidated financial position, results of operations or cash flows.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The following table presents information about certain of our market-sensitive financial instruments at December 31, 2018. The fair values were determined based on quoted market prices for the same or similar instruments. The average effective interest rates presented are based on the rate in effect at the reporting date. The effects of unamortized premiums and discounts are excluded from the table. Our 5.500% senior unsecured notes due 2019, which are included in the 2019 column in the following table, are not included in current portion of long-term debt in our Consolidated Balance Sheet at December 31, 2018 because of our intent and ability to refinance them on a long-term basis. See Note 24 to our Consolidated Financial Statements for additional information.

	Maturity Date, Years Ending December 31,						Thereafter Total	Fair Value
	2019	2020	2021	2022	2023			
Fixed-rate long-term debt	\$650	\$2,697	\$1,958	\$3,588	\$1,894	\$4,223	\$15,010	\$14,598
Average effective interest rates	5.7	%6.2	%4.7	%8.5	%7.3	%5.6	%6.5	%

At December 31, 2018, we had long-term, market-sensitive investments held by our captive insurance subsidiaries. Our market risk associated with our investments in debt securities classified as non-current assets is substantially mitigated by the long-term nature and type of the investments in the portfolio.

We have no affiliation with partnerships, trusts or other entities (sometimes referred to as “special-purpose” or “variable-interest” entities) whose purpose is to facilitate off-balance sheet financial transactions or similar arrangements by us. As a result, we have no exposure to the financing, liquidity, market or credit risks associated with such entities.

We do not hold or issue derivative instruments for trading purposes and are not a party to any instruments with leverage or prepayment features.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

MANAGEMENT REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

To Our Shareholders:

Management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rule 13a-15(f) under the Securities Exchange Act of 1934, as amended. Management assessed the effectiveness of Tenet’s internal control over financial reporting as of December 31, 2018. This assessment was performed under the supervision of and with the participation of management, including the chief executive officer and chief financial officer.

In making this assessment, management used criteria based on the framework in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (“COSO”). Based on the assessment using the COSO framework, management concluded that Tenet’s internal control over financial reporting was effective as of December 31, 2018.

Tenet’s internal control over financial reporting as of December 31, 2018 has been audited by Deloitte & Touche LLP, an independent registered public accounting firm, as stated in their report, which is included herein. Deloitte & Touche LLP has also audited Tenet’s Consolidated Financial Statements as of and for the year ended December 31, 2018, and that firm’s audit report on such Consolidated Financial Statements is also included herein.

Internal control over financial reporting cannot provide absolute assurance of achieving financial reporting objectives because of its inherent limitations. Internal control over financial reporting is a process that involves human diligence and compliance and is subject to lapses in judgment and breakdowns resulting from human failures. Internal control over financial reporting also can be circumvented by collusion or improper management override. Because of such limitations, there is a risk that material misstatements may not be prevented or detected on a timely basis by internal control over financial reporting. However, these inherent limitations are known features of the financial reporting process. Therefore, it is possible to design into the process safeguards to reduce, though not eliminate, this risk.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and the Board of Directors of Tenet Healthcare Corporation

Opinion on Internal Control over Financial Reporting

We have audited the internal control over financial reporting of Tenet Healthcare Corporation and subsidiaries (the “Company”) as of December 31, 2018, based on criteria established in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2018, based on criteria established in *Internal Control — Integrated Framework (2013)* issued by COSO.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated financial statements and financial statement schedule as of and for the year ended December 31, 2018, of the Company and our report dated February 25, 2019, expressed an unqualified opinion on those financial statements.

Basis for Opinion

The Company’s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management’s Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company’s internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB. We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control over Financial Reporting

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and the Board of Directors of Tenet Healthcare Corporation

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of Tenet Healthcare Corporation and subsidiaries (the “Company”) as of December 31, 2018 and 2017, and the related consolidated statements of operations, other comprehensive income (loss), changes in equity, and cash flows for each of the three years in the period ended December 31, 2018, and the related notes and the consolidated financial statement schedule listed in the Index at Item 15 (collectively referred to as the “financial statements”). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2018 and 2017, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2018, in conformity with accounting principles generally accepted in the United States of America.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company’s internal control over financial reporting as of December 31, 2018, based on criteria established in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 25, 2019, expressed an unqualified opinion on the Company’s internal control over financial reporting.

Basis for Opinion

These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on the Company’s financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB. We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****NOTE 1. SIGNIFICANT ACCOUNTING POLICIES*****Description of Business***

Tenet Healthcare Corporation (together with our subsidiaries, referred to herein as “Tenet,” “we” or “us”) is a diversified healthcare services company. At December 31, 2018, we operated 68 hospitals (three of which we have since divested), 23 surgical hospitals and approximately 475 outpatient centers through our subsidiaries, partnerships and joint ventures, including USPI Holding Company, Inc. (“USPI”). We hold noncontrolling interests in 111 of these facilities, which are recorded using the equity method of accounting. Our Conifer Holdings, Inc. (“Conifer”) subsidiary provides healthcare business process services in the areas of hospital and physician revenue cycle management and value-based care solutions to healthcare systems, as well as individual hospitals, physician practices, self-insured organizations, health plans and other entities.

Effective June 16, 2015, we completed a transaction that combined our freestanding ambulatory surgery and imaging center assets with the surgical facility assets of United Surgical Partners International, Inc. into our joint venture, USPI. In April 2016, we paid \$127 million to purchase additional shares, which increased our ownership interest in USPI from 50.1% to approximately 56.3%. In July 2017, we paid \$716 million for the purchase of additional shares and the final adjustment to the 2016 purchase price, which increased our ownership interest in USPI to 80.0%. In April 2018, we paid approximately \$630 million for the purchase of an additional 15% ownership interest in USPI and the final adjustment to the 2017 purchase price, which increased our ownership interest in USPI to 95%.

Basis of Presentation

Our Consolidated Financial Statements include the accounts of Tenet and its wholly owned and majority-owned subsidiaries. We eliminate intercompany accounts and transactions in consolidation, and we include the results of operations of businesses that are newly acquired in purchase transactions from their dates of acquisition. We account for significant investments in other affiliated companies using the equity method. Unless otherwise indicated, all financial and statistical data included in these notes to our Consolidated Financial Statements relate to our continuing operations, with dollar amounts expressed in millions (except per-share amounts).

Effective January 1, 2018, we adopted the Financial Accounting Standards Board (“FASB”) Accounting Standards Update (“ASU”) 2014-09, “Revenue from Contracts with Customers (Topic 606)” (“ASU 2014-09”) using a modified retrospective method of application to all contracts existing on January 1, 2018. The core principle of the guidance in ASU 2014-09 is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. For our Hospital Operations and other and Ambulatory Care segments, the adoption of ASU 2014-09 resulted in changes to our presentation and disclosure of revenue primarily related to uninsured or underinsured patients. Prior to the adoption of ASU 2014-09, a significant portion of our provision for doubtful accounts related to self-pay patients, as well as co-pays, co-insurance amounts and deductibles owed to us by patients with insurance. Under ASU 2014-09, the estimated uncollectable amounts due from these patients are generally considered implicit price concessions that are a direct reduction to net operating revenues, with a corresponding material reduction in the amounts presented separately as provision for doubtful accounts. For the year ended December 31, 2018, we recorded approximately \$1.422 billion of implicit price concessions as a direct reduction of net operating revenues that would have been recorded as provision for doubtful accounts prior to the adoption of ASU 2014-09. At January 1, 2018, we reclassified \$171 million of revenues related to patients who were still receiving inpatient care in our facilities at that date from accounts receivable, less allowance for doubtful accounts, to contract assets, which are included in other current assets in the accompanying Consolidated Balance Sheet at

December 31, 2018. The adoption of ASU 2014-09 also resulted in changes to our presentation and disclosure of customer contract assets and liabilities and the assessment of variable consideration under customer contracts, which are further discussed in Note 4.

Also effective January 1, 2018, we early adopted ASU 2018-02, “Income Statement – Reporting Comprehensive Income (Topic 220)” (“ASU 2018-02”), which allows a reclassification from accumulated other comprehensive income to retained earnings for stranded income tax effects resulting from the Tax Cuts and Jobs Act (the “Tax Act”) and requires certain disclosures about stranded income tax effects. We applied the amendments in ASU 2018-02 in the period of adoption, resulting in a reclassification that decreased accumulated deficit and increased accumulated other comprehensive loss by \$36 million of stranded income tax effects in the year ended December 31, 2018.

Table of Contents

In addition, we adopted ASU 2016-01, “Financial Instruments – Overall (Subtopic 825-10) Recognition and Measurement of Financial Assets and Financial Liabilities” (“ASU 2016-01”) effective January 1, 2018, which supersedes the guidance to classify equity securities with readily determinable fair values into different categories (that is, trading or available-for-sale) and require equity securities (including other ownership interests, such as partnerships, unincorporated joint ventures and limited liability companies) to be measured at fair value with changes in the fair value recognized through net income. Upon adoption of ASU 2016-01 on January 1, 2018, we recorded a cumulative effect adjustment to decrease accumulated deficit by \$7 million for unrealized gains on equity securities.

Effective January 1, 2017, we adopted ASU 2016-09, “Compensation – Stock Compensation (Topic 718) Improvements to Employee Share-Based Payment Accounting” (“ASU 2016-09”), which affects all entities that issue share-based payment awards to their employees. The guidance in ASU 2016-09 simplifies several aspects of the accounting for share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. Upon adoption of ASU 2016-09, we recorded previously unrecognized excess tax benefits of \$56 million as a deferred tax asset and a cumulative effect adjustment to accumulated deficit as of January 1, 2017. Prospectively, all excess tax benefits and deficiencies will be recognized as income tax benefit or expense in our consolidated statement of operations when awards vest.

Also effective January 1, 2017, we early adopted ASU 2017-07, “Compensation – Retirement Benefits (Topic 715) Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost” (“ASU 2017-07”), which the FASB issued in March 2017. The amendments in ASU 2017-07 apply to all employers that offer to their employees defined benefit pension plans, other postretirement benefit plans, or other types of benefits accounted for under Topic 715 of the FASB Accounting Standards Codification (“ASC”). The guidance in ASU 2017-07 requires that an employer report the service cost component in the same line item or items as other compensation costs arising from services rendered by the pertinent employees during the period. The other components of net periodic benefit cost are required to be presented in the statement of operations separately from the service cost component and outside a subtotal of income from operations. The line item or items used in the statement of operations to present the other components of net periodic benefit cost must be disclosed. The amendments in ASU 2017-07 must be applied retrospectively for the presentation of the service cost component and the other components of net periodic pension cost and net periodic postretirement benefit cost in the statement of operations. As a result of the adoption of ASU 2017-07, we reclassified \$28 million of net periodic benefit cost from salaries, wages and benefits expense to other non-operating expense, net, in the accompanying Consolidated Statements of Operations for the year ended December 31, 2016, and \$16 million and \$31 million of other components of net periodic benefit cost are included in other non-operating expense, net, in the accompanying Consolidated Statement of Operations for the years ended December 31, 2018 and 2017, respectively.

Certain prior-year amounts have also been reclassified to conform to current year presentation, primarily related to the format of disclosures in Note 14 that have been revised due to the adoption of ASU 2014-09 and the reclassification of previously held equity method investment changes due to acquisitions presented in Note 21.

Use of Estimates

The preparation of financial statements, in conformity with accounting principles generally accepted in the United States of America (“GAAP”), requires us to make estimates and assumptions that affect the amounts reported in our Consolidated Financial Statements and these accompanying notes. We regularly evaluate the accounting policies and estimates we use. In general, we base the estimates on historical experience and on assumptions that we believe to be reasonable given the particular circumstances in which we operate. Although we believe all adjustments considered necessary for a fair presentation have been included, actual results may vary from those estimates. Financial and statistical information we report to other regulatory agencies may be prepared on a basis other than GAAP or using different assumptions or reporting periods and, therefore, may vary from amounts presented herein. Although we

make every effort to ensure that the information we report to those agencies is accurate, complete and consistent with applicable reporting guidelines, we cannot be responsible for the accuracy of the information they make available to the public.

Translation of Foreign Currencies

We divested European Surgical Partners Limited (“Aspen”) in August 2018; prior to that time, Aspen’s accounts were measured in its local currency (the pound sterling) and then translated into U.S. dollars. All assets and liabilities were translated using the current rate of exchange at the balance sheet date. Results of operations were translated using the average rates prevailing throughout the period of operations. Translation gains or losses resulting from changes in exchange rates were accumulated in shareholders’ equity until we divested Aspen.

Table of Contents***Net Operating Revenues***

ASU 2014-09 was issued to clarify the principles for recognizing revenue, to remove inconsistencies and weaknesses in revenue recognition requirements, and to provide a more robust framework for addressing revenue issues. Our adoption of ASU 2014-09 was accomplished using a modified retrospective method of application, and our accounting policies related to revenues were revised accordingly effective January 1, 2018, as discussed below.

We recognize net operating revenues in the period in which we satisfy our performance obligations under contracts by transferring our services to our customers. Net operating revenues are recognized in the amounts to which we expect to be entitled, which are the transaction prices allocated to the distinct services. Net operating revenues for our Hospital Operations and other and Ambulatory Care segments primarily consist of net patient service revenues, principally for patients covered by Medicare, Medicaid, managed care and other health plans, as well as certain uninsured patients under our *Compact with Uninsured Patients* (“*Compact*”) and other uninsured discount and charity programs. Net operating revenues for our Conifer segment primarily consist of revenues from providing revenue cycle management services to healthcare systems, as well as individual hospitals, physician practices, self-insured organizations, health plans and other entities.

Net Patient Service Revenues—We report net patient service revenues at the amounts that reflect the consideration to which we expect to be entitled in exchange for providing patient care. These amounts are due from patients, third-party payers (including managed care payers and government programs) and others, and they include variable consideration for retroactive revenue adjustments due to settlement of audits, reviews and investigations. Generally, we bill our patients and third-party payers several days after the services are performed or shortly after discharge. Revenues are recognized as performance obligations are satisfied.

We determine performance obligations based on the nature of the services we provide. We recognize revenues for performance obligations satisfied over time based on actual charges incurred in relation to total expected charges. We believe that this method provides a faithful depiction of the transfer of services over the term of performance obligations based on the inputs needed to satisfy the obligations. Generally, performance obligations satisfied over time relate to patients in our hospitals receiving inpatient acute care services. We measure performance obligations from admission to the point when there are no further services required for the patient, which is generally the time of discharge. We recognize revenues for performance obligations satisfied at a point in time, which generally relate to patients receiving outpatient services, when: (1) services are provided; and (2) we do not believe the patient requires additional services.

Because our patient service performance obligations relate to contracts with a duration of less than one year, we have elected to apply the optional exemption provided in ASC 606-10-50-14(a) and, therefore, we are not required to disclose the aggregate amount of the transaction price allocated to performance obligations that are unsatisfied or partially unsatisfied at the end of the reporting period. The unsatisfied or partially unsatisfied performance obligations referred to above are primarily related to inpatient acute care services at the end of the reporting period. The performance obligations for these contracts are generally completed when the patients are discharged, which generally occurs within days or weeks of the end of the reporting period.

We determine the transaction price based on gross charges for services provided, reduced by contractual adjustments provided to third-party payers, discounts provided to uninsured patients in accordance with our *Compact*, and implicit price concessions provided primarily to uninsured patients. We determine our estimates of contractual adjustments and discounts based on contractual agreements, our discount policies and historical experience. We determine our estimate of implicit price concessions based on our historical collection experience with these classes of patients using a portfolio approach as a practical expedient to account for patient contracts as collective groups rather than individually. The financial statement effects of using this practical expedient are not materially different from an

individual contract approach.

Gross charges are retail charges. They are not the same as actual pricing, and they generally do not reflect what a hospital is ultimately paid and, therefore, are not displayed in our consolidated statements of operations. Hospitals are typically paid amounts that are negotiated with insurance companies or are set by the government. Gross charges are used to calculate Medicare outlier payments and to determine certain elements of payment under managed care contracts (such as stop-loss payments). Because Medicare requires that a hospital's gross charges be the same for all patients (regardless of payer category), gross charges are what hospitals charge all patients prior to the application of discounts and allowances.

Revenues under the traditional fee-for-service Medicare and Medicaid programs are based primarily on prospective payment systems. Retrospectively determined cost-based revenues under these programs, which were more prevalent in earlier periods, and certain other payments, such as Indirect Medical Education, Direct Graduate Medical Education, disproportionate share hospital and bad debt expense reimbursement, which are based on our hospitals' cost reports, are estimated using

101

Table of Contents

historical trends and current factors. Cost report settlements under these programs are subject to audit by Medicare and Medicaid auditors and administrative and judicial review, and it can take several years until final settlement of such matters is determined and completely resolved. Because the laws, regulations, instructions and rule interpretations governing Medicare and Medicaid reimbursement are complex and change frequently, the estimates we record could change by material amounts.

We have a system and estimation process for recording Medicare net patient service revenue and estimated cost report settlements. As a result, we record accruals to reflect the expected final settlements on our cost reports. For filed cost reports, we record the accrual based on those cost reports and subsequent activity, and record a valuation allowance against those cost reports based on historical settlement trends. The accrual for periods for which a cost report is yet to be filed is recorded based on estimates of what we expect to report on the filed cost reports, and a corresponding valuation allowance is recorded as previously described. Cost reports generally must be filed within five months after the end of the annual cost reporting period. After the cost report is filed, the accrual and corresponding valuation allowance may need to be adjusted.

Settlements with third-party payers for retroactive revenue adjustments due to audits, reviews or investigations are considered variable consideration and are included in the determination of the estimated transaction price for providing patient care using the most likely outcome method. These settlements are estimated based on the terms of the payment agreement with the payer, correspondence from the payer and our historical settlement activity, including an assessment to ensure that it is probable that a significant reversal in the amount of cumulative revenue recognized will not occur when the uncertainty associated with the retroactive adjustment is subsequently resolved. Estimated settlements are adjusted in future periods as adjustments become known (that is, new information becomes available), or as years are settled or are no longer subject to such audits, reviews and investigations.

Revenues under managed care plans are based primarily on payment terms involving predetermined rates per diagnosis, per-diem rates, discounted fee-for-service rates and/or other similar contractual arrangements. These revenues are also subject to review and possible audit by the payers, which can take several years before they are completely resolved. The payers are billed for patient services on an individual patient basis. An individual patient's bill is subject to adjustment on a patient-by-patient basis in the ordinary course of business by the payers following their review and adjudication of each particular bill. We estimate the discounts for contractual allowances at the individual hospital level utilizing billing data on an individual patient basis. At the end of each month, on an individual hospital basis, we estimate our expected reimbursement for patients of managed care plans based on the applicable contract terms. Contractual allowance estimates are periodically reviewed for accuracy by taking into consideration known contract terms, as well as payment history. We believe our estimation and review process enables us to identify instances on a timely basis where such estimates need to be revised. We do not believe there were any adjustments to estimates of patient bills that were material to our revenues. In addition, on a corporate-wide basis, we do not record any general provision for adjustments to estimated contractual allowances for managed care plans. Managed care accounts, net of contractual allowances recorded, are further reduced to their net realizable value through implicit price concessions based on historical collection trends for these payers and other factors that affect the estimation process.

We know of no claims, disputes or unsettled matters with any payer that would materially affect our revenues for which we have not adequately provided in the accompanying Consolidated Financial Statements.

Generally, patients who are covered by third-party payers are responsible for related co-pays, co-insurance and deductibles, which vary in amount. We also provide services to uninsured patients and offer uninsured patients a discount from standard charges. We estimate the transaction price for patients with co-pays, co-insurance and deductibles and for those who are uninsured based on historical collection experience and current market conditions. Under our *Compact* and other uninsured discount programs, the discount offered to certain uninsured patients is

recognized as a contractual allowance, which reduces net operating revenues at the time the self-pay accounts are recorded. The uninsured patient accounts, net of contractual allowances recorded, are further reduced to their net realizable value at the time they are recorded through implicit price concessions based on historical collection trends for self-pay accounts and other factors that affect the estimation process. There are various factors that can impact collection trends, such as changes in the economy, which in turn have an impact on unemployment rates and the number of uninsured and underinsured patients, the volume of patients through our emergency departments, the increased burden of co-pays, co-insurance amounts and deductibles to be made by patients with insurance, and business practices related to collection efforts. These factors continuously change and can have an impact on collection trends and our estimation process. Subsequent changes to the estimate of the transaction price are generally recorded as adjustments to net patient service revenues in the period of the change.

We have provided implicit price concessions, primarily to uninsured patients and patients with co-pays, co-insurance and deductibles. The implicit price concessions included in estimating the transaction price represent the difference between amounts billed to patients and the amounts we expect to collect based on our collection history with similar patients. Although

Table of Contents

outcomes vary, our policy is to attempt to collect amounts due from patients, including co-pays, co-insurance and deductibles due from patients with insurance, at the time of service while complying with all federal and state statutes and regulations, including, but not limited to, the Emergency Medical Treatment and Active Labor Act (“EMTALA”). Generally, as required by EMTALA, patients may not be denied emergency treatment due to inability to pay. Therefore, services, including the legally required medical screening examination and stabilization of the patient, are performed without delaying to obtain insurance information. In non-emergency circumstances or for elective procedures and services, it is our policy to verify insurance prior to a patient being treated; however, there are various exceptions that can occur. Such exceptions can include, for example, instances where (1) we are unable to obtain verification because the patient’s insurance company was unable to be reached or contacted, (2) a determination is made that a patient may be eligible for benefits under various government programs, such as Medicaid or Victims of Crime, and it takes several days or weeks before qualification for such benefits is confirmed or denied, and (3) under physician orders we provide services to patients that require immediate treatment.

We also provide charity care to patients who are financially unable to pay for the healthcare services they receive. Most patients who qualify for charity care are charged a per-diem amount for services received, subject to a cap. Except for the per-diem amounts, our policy is not to pursue collection of amounts determined to qualify as charity care; therefore, we do not report these amounts in net operating revenues. Patient advocates from Conifer’s Medical Eligibility Program screen patients in the hospital to determine whether those patients meet eligibility requirements for financial assistance programs. They also expedite the process of applying for these government programs.

Conifer Revenues—Our Conifer segment recognizes revenue from its contracts when Conifer’s performance obligations are satisfied, which is generally as services are rendered. Revenue is recognized in an amount that reflects the consideration to which Conifer expects to be entitled.

At contract inception, Conifer assesses the services specified in its contracts with customers and identifies a performance obligation for each distinct contracted service. Conifer identifies the performance obligations and considers all the services provided under the contract. Conifer generally considers the following distinct services as separate performance obligations:

- revenue cycle management services;
- value-based care services;
- patient communication and engagement services;
- consulting services; and
- other client-defined projects.

Conifer’s contracts generally consist of fixed-price, volume-based or contingency-based fees. Conifer’s long-term contracts typically provide for Conifer to deliver recurring monthly services over a multi-year period. The contracts are typically priced such that Conifer’s monthly fee to its customer represents the value obtained by the customer in the month for those services. Such multi-year service contracts may have upfront fees related to transition or integration work performed by Conifer to set up the delivery for the ongoing services. Such transition or integration work typically does not result in a separately identifiable obligation; thus, the fees and expenses related to such work are deferred and recognized over the life of the related contractual service period. Revenue for fixed-priced contracts is typically recognized at the time of billing unless evidence suggests that the revenue is earned or Conifer’s obligations are fulfilled in a different pattern. Revenue for volume-based contracts is typically recognized as the services are being performed at the contractually billable rate, which is generally a percentage of collections or a percentage of client net patient revenue.

Electronic Health Record Incentives

Under certain provisions of the American Recovery and Reinvestment Act of 2009 (“ARRA”), federal incentive payments are available to hospitals, physicians and certain other professionals when they adopt, implement or upgrade

(“AIU”) certified electronic health record (“EHR”) technology or become “meaningful users,” as defined under ARRA, of EHR technology in ways that demonstrate improved quality, safety and effectiveness of care. We recognize Medicaid EHR incentive payments in our consolidated statements of operations for the first payment year when: (1) CMS approves a state’s EHR incentive plan; and (2) our hospital or employed physician acquires certified EHR technology (i.e., when AIU criteria are met). Medicaid EHR incentive payments for subsequent payment years are recognized in the period during which the specified meaningful use criteria are met. We recognize Medicare EHR incentive payments when: (1) the specified meaningful use

Table of Contents

criteria are met; and (2) contingencies in estimating the amount of the incentive payments to be received are resolved. During the years ended December 31, 2018, 2017 and 2016, certain of our hospitals and physicians satisfied the CMS AIU and/or meaningful use criteria. As a result, we recognized \$3 million, \$9 million and \$32 million of Medicare and Medicaid EHR incentive payments as a reduction to expense in the accompanying Consolidated Statement of Operations for the years ended December 31, 2018, 2017 and 2016, respectively.

Cash and Cash Equivalents

We treat highly liquid investments with original maturities of three months or less as cash equivalents. Cash and cash equivalents were \$411 million and \$611 million at December 31, 2018 and 2017, respectively. At December 31, 2018 and 2017, our book overdrafts were \$288 million and \$311 million, respectively, which were classified as accounts payable.

At December 31, 2018 and 2017, \$177 million and \$179 million, respectively, of total cash and cash equivalents in the accompanying Consolidated Balance Sheets were intended for the operations of our captive insurance subsidiaries, and \$8 million and \$30 million, respectively, of total cash and cash equivalents in the accompanying Consolidated Balance Sheets were intended for the operations of our health plan-related businesses.

Also at December 31, 2018 and 2017, we had \$135 million and \$117 million, respectively, of property and equipment purchases accrued for items received but not yet paid. Of these amounts, \$114 million and \$79 million, respectively, were included in accounts payable.

During the years ended December 31, 2018 and 2017, we recorded non-cancellable capital leases of \$149 million and \$162 million, respectively, primarily for equipment.

Investments in Debt and Equity Securities

Prior to the adoption of ASU 2016-01 on January 1, 2018, we classified investments in debt and equity securities as either available-for-sale, held-to-maturity or as part of a trading portfolio. At December 31, 2017, we had no significant investments in securities classified as either held-to-maturity or trading. We carried securities classified as available-for-sale at fair value. We reported their unrealized gains and losses, net of taxes, as accumulated other comprehensive income (loss) unless we determined that a loss was other-than-temporary, at which point we would record a loss in our consolidated statements of operations. We included realized gains or losses in our consolidated statements of operations based on the specific identification method.

Subsequent to the adoption of ASU 2016-01 on January 1, 2018, we classify investments in debt securities as either available-for-sale, held-to-maturity or as part of a trading portfolio, but these classifications are no longer applicable to equity securities. At December 31, 2018, we had no significant investments in debt securities classified as either held-to-maturity or trading. We carry debt securities classified as available-for-sale at fair value. We report their unrealized gains and losses, net of taxes, as accumulated other comprehensive income (loss) unless we determine that a loss is other-than-temporary, at which point we would record a loss in our consolidated statements of operations. We carry equity securities at fair value, and we report their unrealized gains and losses in other non-operating expense, net, in our consolidated statements of operations. We include realized gains or losses in our consolidated statements of operations based on the specific identification method.

Investments in Unconsolidated Affiliates

We control 227 of the facilities within our Ambulatory Care segment and, therefore, consolidate their results. We account for many of the facilities our Ambulatory Care segment operates (110 of 337 at December 31, 2018), as well

as additional companies in which our Hospital Operations and other segment holds ownership interests, under the equity method as investments in unconsolidated affiliates and report only our share of net income as equity in earnings of unconsolidated affiliates in the accompanying Consolidated Statements of Operations. Summarized financial information for these equity method investees is included in the following table; among the equity method investees are four North Texas hospitals in which we held minority interests and that were operated by our Hospital Operations and other segment through the divestiture of these investments effective March 1, 2018. We recorded a gain of \$11 million in the year ended December 31, 2018 due to the sales of our minority interest in these hospitals. For investments acquired during the reported periods, amounts reflect 100% of the investee's results beginning on the date of our acquisition of the investment.

Table of Contents

	December 31, 2018			December 31, 2017			December 31, 2016		
Current assets	\$842	\$	805	\$	943				
Noncurrent assets	\$662	\$	1,223	\$	991				
Current liabilities	\$(313))	\$(354))	\$(320))			
Noncurrent liabilities	\$(430))	\$(389))	\$(345))			
Noncontrolling interests	\$(530))	\$(490))	\$(494))			
	Years Ended December 31,								
	2018			2017			2016		
Net operating revenues	\$2,469	\$	2,907	\$	2,823				
Net income	\$599	\$	558	\$	573				
Net income attributable to the investees	\$372	\$	363	\$	343				

Our equity method investment that contributes the most to our equity in earnings of unconsolidated affiliates is Texas Health Ventures Group, LLC (“THVG”), which is operated by USPI. THVG represented \$70 million of the total \$150 million equity in earnings of unconsolidated affiliates we recognized for the year ended December 31, 2018, \$69 million of the total \$144 million equity in earnings of unconsolidated affiliates we recognized for the year ended December 31, 2017 and \$61 million of the total \$131 million equity in earnings of unconsolidated affiliates we recognized for the year ended December 31, 2016.

Property and Equipment

Additions and improvements to property and equipment exceeding established minimum amounts with a useful life greater than one year are capitalized at cost. Expenditures for maintenance and repairs are charged to expense as incurred. We use the straight-line method of depreciation for buildings, building improvements and equipment. The estimated useful life for buildings and improvements is primarily 15 to 40 years, and for equipment three to 15 years. Newly constructed hospitals are usually depreciated over 50 years. We record capital leases at the beginning of the lease term as assets and liabilities. The value recorded is the lower of either the present value of the minimum lease payments or the fair value of the asset. Such assets, including improvements, are generally amortized over the shorter of either the lease term or their estimated useful life. Interest costs related to construction projects are capitalized. In the years ended December 31, 2018, 2017 and 2016, capitalized interest was \$7 million, \$15 million and \$22 million, respectively.

We evaluate our long-lived assets for possible impairment annually or whenever events or changes in circumstances indicate that the carrying amount of the asset, or related group of assets, may not be recoverable from estimated future undiscounted cash flows. If the estimated future undiscounted cash flows are less than the carrying value of the assets, we calculate the amount of an impairment if the carrying value of the long-lived assets exceeds the fair value of the assets. The fair value of the assets is estimated based on appraisals, established market values of comparable assets or internal estimates of future net cash flows expected to result from the use and ultimate disposition of the asset. The estimates of these future cash flows are based on assumptions and projections we believe to be reasonable and supportable. They require our subjective judgments and take into account assumptions about revenue and expense growth rates. These assumptions may vary by type of facility and presume stable, improving or, in some cases, declining results at our hospitals, depending on their circumstances.

We report long-lived assets to be disposed of at the lower of their carrying amounts or fair values less costs to sell. In such circumstances, our estimates of fair value are based on appraisals, established market prices for comparable assets or internal estimates of future net cash flows.

Goodwill and Other Intangible Assets

Goodwill represents the excess of costs over the fair value of assets of businesses acquired. Goodwill and other intangible assets acquired in purchase business combinations and determined to have indefinite useful lives are not amortized, but instead are subject to impairment tests performed at least annually. For goodwill, we perform the test at the reporting unit level when events occur that require an evaluation to be performed or at least annually. If we determine the carrying value of goodwill is impaired, or if the carrying value of a business that is to be sold or otherwise disposed of exceeds its fair value, we reduce the carrying value, including any allocated goodwill, to fair value. Estimates of fair value are based on appraisals, established market prices for comparable assets or internal estimates of future net cash flows and presume stable, improving or, in some cases, declining results at our hospitals, depending on their circumstances.

Table of Contents

Other intangible assets primarily consist of capitalized software costs, which are amortized on a straight-line basis over the estimated useful life of the software, which ranges from three to 15 years, costs of acquired management and other contract service rights, most of which have indefinite lives, and miscellaneous intangible assets.

Accruals for General and Professional Liability Risks

We accrue for estimated professional and general liability claims, when they are probable and can be reasonably estimated. The accrual, which includes an estimate for incurred but not reported claims, is updated each quarter based on a model of projected payments using case-specific facts and circumstances and our historical loss reporting, development and settlement patterns and is discounted to its net present value using a risk-free discount rate of 2.59% at December 31, 2018 and 2.33% at December 31, 2017. To the extent that subsequent claims information varies from our estimates, the liability is adjusted in the period such information becomes available. Malpractice expense is presented within other operating expenses in the accompanying Consolidated Statements of Operations.

Income Taxes

We account for income taxes using the asset and liability method. This approach requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of temporary differences between the carrying amounts and the tax bases of assets and liabilities. Income tax receivables and liabilities and deferred tax assets and liabilities are recognized based on the amounts that more likely than not will be sustained upon ultimate settlement with taxing authorities.

Developing our provision for income taxes and analysis of uncertain tax positions requires significant judgment and knowledge of federal and state income tax laws, regulations and strategies, including the determination of deferred tax assets and liabilities and, if necessary, any valuation allowances that may be required for deferred tax assets.

We assess the realization of our deferred tax assets to determine whether an income tax valuation allowance is required. Based on all available evidence, both positive and negative, and the weight of that evidence to the extent such evidence can be objectively verified, we determine whether it is more likely than not that all or a portion of the deferred tax assets will be realized. The main factors that we consider include:

• Cumulative profits/losses in recent years, adjusted for certain nonrecurring items;

• Income/losses expected in future years;

• Unsettled circumstances that, if unfavorably resolved, would adversely affect future operations and profit levels;

• The availability, or lack thereof, of taxable income in prior carryback periods that would limit realization of tax benefits; and

• The carryforward period associated with the deferred tax assets and liabilities.

We consider many factors when evaluating our uncertain tax positions, and such judgments are subject to periodic review. Tax benefits associated with uncertain tax positions are recognized in the period in which one of the following conditions is satisfied: (1) the more likely than not recognition threshold is satisfied; (2) the position is ultimately settled through negotiation or litigation; or (3) the statute of limitations for the taxing authority to examine and challenge the position has expired. Tax benefits associated with an uncertain tax position are derecognized in the period in which the more likely than not recognition threshold is no longer satisfied.

Segment Reporting

We primarily operate acute care hospitals and related healthcare facilities. Our Hospital Operations and other segment generated 80%, 82% and 83% of our net operating revenues net of implicit price concessions and provision for doubtful accounts in the years ended December 31, 2018, 2017 and 2016, respectively. At December 31, 2018, each of our markets related to our general hospitals reported directly to our president of hospital operations. Major decisions, including capital resource allocations, are made at the consolidated level, not at the market or hospital level.

Our Hospital Operations and other segment is comprised of our acute care and specialty hospitals, ancillary outpatient facilities, urgent care centers, microhospitals and physician practices. As described in Note 5, certain of our facilities were classified as held for sale in the accompanying Consolidated Balance Sheet at December 31, 2018. Our Ambulatory Care

Table of Contents

segment is comprised of the operations of USPI and included nine Aspen facilities in the United Kingdom until their divestiture effective August 17, 2018. Our Conifer segment provides healthcare business process services in the areas of hospital and physician revenue cycle management and value-based care solutions to healthcare systems, as well as individual hospitals, physician practices, self-insured organizations, health plans and other entities. The factors for determining the reportable segments include the manner in which management evaluates operating performance combined with the nature of the individual business activities.

Costs Associated With Exit or Disposal Activities

We recognize costs associated with exit (including restructuring) or disposal activities when they are incurred and can be measured at fair value, rather than at the date of a commitment to an exit or disposal plan.

NOTE 2. EQUITY***Noncontrolling Interests***

Our noncontrolling interests balances at December 31, 2018 and 2017 in the accompanying Consolidated Statements of Changes in Equity were comprised of \$112 million and \$64 million, respectively, from our Hospital Operations and other segment, and \$694 million and \$622 million, respectively, from our Ambulatory Care segment. Our net income attributable to noncontrolling interests for the years ended December 31, 2018, 2017 and 2016 were comprised of \$8 million, \$11 million and \$11 million, respectively, from our Hospital Operations and other segment, and \$157 million, \$134 million and \$127 million, respectively, from our Ambulatory Care segment.

NOTE 3. ACCOUNTS RECEIVABLE

The principal components of accounts receivable are shown in the table below:

	December 31, 2018	December 31, 2017
Continuing operations:		
Patient accounts receivable	\$ 2,427	\$ 3,376
Allowance for doubtful accounts	—	(898)
Estimated future recoveries	148	132
Net cost reports and settlements payable and valuation allowances	18	4
	2,593	2,614
Discontinued operations	2	2
Accounts receivable, net	\$ 2,595	\$ 2,616

Accounts that are pursued for collection through Conifer's business offices are maintained on our hospitals' books and reflected in patient accounts receivable. For patient accounts receivable resulting from revenue recognized prior to January 1, 2018, an allowance for doubtful accounts was established to reduce the carrying value of such receivables to their estimated net realizable value. Generally, we estimated this allowance based on the aging of our accounts receivable by hospital, our historical collection experience by hospital and for each type of payer, and other relevant factors. At December 31, 2017, our allowance for doubtful accounts was 26.6% of our patient accounts receivable. Under the provisions of ASC 2014-09, which we adopted effective January 1, 2018, when we have an unconditional right to payment, subject only to the passage of time, the right is treated as a receivable. Patient accounts receivable, including billed accounts and unbilled accounts for which we have the unconditional right to payment, and estimated amounts due from third-party payers for retroactive adjustments, are receivables if our right to consideration is unconditional and only the passage of time is required before payment of that consideration is due. For patient accounts receivable subsequent to our adoption of ASU 2014-09 on January 1, 2018, the estimated uncollectable

amounts are generally considered implicit price concessions that are a direct reduction to patient accounts receivable rather than allowance for doubtful accounts.

Accounts assigned to Conifer are written off and excluded from patient accounts receivable; however, an estimate of future recoveries from all accounts at Conifer is determined based on historical experience and recorded on our hospitals' books as a component of accounts receivable in the accompanying Consolidated Balance Sheets.

We also provide charity care to patients who are financially unable to pay for the healthcare services they receive. Most patients who qualify for charity care are charged a per-diem amount for services received, subject to a cap. Except for the per-diem amounts, our policy is not to pursue collection of amounts determined to qualify as charity care; therefore, we do not report these amounts in net operating revenues. Most states include an estimate of the cost of charity care in the determination

Table of Contents

of a hospital's eligibility for Medicaid disproportionate share hospital ("DSH") payments. These payments are intended to mitigate our cost of uncompensated care, as well as reduced Medicaid funding levels. Generally, our method of measuring the estimated costs uses adjusted self-pay/charity patient days multiplied by selected operating expenses (which include salaries, wages and benefits, supplies and other operating expenses and which exclude the costs of our health plan businesses) per adjusted patient day. The adjusted self-pay/charity patient days represents actual self-pay/charity patient days adjusted to include self-pay/charity outpatient services by multiplying actual self-pay/charity patient days by the sum of gross self-pay/charity inpatient revenues and gross self-pay/charity outpatient revenues and dividing the results by gross self-pay/charity inpatient revenues. The table below shows our estimated costs of caring for our self-pay patients and charity care patients, as well as revenues attributable to Medicaid DSH and other supplemental revenues we recognized in the years ended December 31, 2018, 2017 and 2016.

	Years Ended		
	December 31,		
	2018	2017	2016
Estimated costs for:			
Self-pay patients	\$640	\$648	\$609
Charity care patients	124	121	138
Total	\$764	\$769	\$747
Medicaid DSH and other supplemental revenues	\$847	\$864	\$906

We had \$278 million and \$231 million of receivables recorded in other current assets and investments and other assets, respectively, and \$100 million and \$42 million of payables recorded in other current liabilities and other long-term liabilities, respectively, in the accompanying Consolidated Balance Sheet at December 31, 2018 related to California's provider fee program. We had \$312 million and \$266 million of receivables recorded in other current assets and investments and other assets, respectively, and \$159 million and \$49 million of payables recorded in other current liabilities and other long-term liabilities, respectively, in the accompanying Consolidated Balance Sheet at December 31, 2017 related to California's provider fee program.

NOTE 4. CONTRACT BALANCES*Hospital Operations and Other Segment*

Under the provisions of ASU 2014-09, which we adopted effective January 1, 2018, amounts related to services provided to patients for which we have not billed and that do not meet the conditions of unconditional right to payment at the end of the reporting period are contract assets. For our Hospital Operations and other segment, our contract assets consist primarily of services that we have provided to patients who are still receiving inpatient care in our facilities at the end of the reporting period. Our Hospital Operations and other segment's contract assets are included in other current assets in the accompanying Consolidated Balance Sheet at December 31, 2018. The opening and closing balances of contract assets for our Hospital Operations and other segment are as follows:

	2018	2017
January 1,	\$171	\$ —
December 31,	169	—
Increase/(decrease) \$(2)	\$ —	\$ —

The increase in the contract asset balances from the year ended December 31, 2018 compared to the year ended December 31, 2017 is due to the implementation of ASU 2014-09 effective January 1, 2018 using a modified retrospective method of application. Prior to January 1, 2018, amounts related to services provided to patients for which we had not billed were included in accounts receivable, less allowance for doubtful accounts, in our

consolidated balance sheets. Approximately 89% of our Hospital Operations and other segment's contract assets meet the conditions for unconditional right to payment and are reclassified to patient receivables within 90 days.

Conifer Segment

Conifer enters into contracts with customers to sell revenue cycle management and other services, such as value-based care, consulting and project services. The payment terms and conditions in our customer contracts vary. In some cases, customers are invoiced in advance and (for other than fixed-price fee arrangements) a true-up to the actual fee is included on a subsequent invoice. In other cases, payment is due in arrears. In addition, some contracts contain performance incentives, penalties and other forms of variable consideration. When the timing of Conifer's delivery of services is different from the timing of payments made by the customers, Conifer recognizes either unbilled revenue (performance precedes contractual right

Table of Contents

to invoice the customer) or deferred revenue (customer payment precedes Conifer service performance). In the following table, customers that prepay prior to obtaining control/benefit of the service are represented by deferred contract revenue until the performance obligations are satisfied. Unbilled revenue represents arrangements in which Conifer has provided services to and the customer has obtained control/benefit of services prior to the contractual invoice date. Contracts with payment in arrears are recognized as receivables in the month the service is performed.

The opening and closing balances of Conifer's receivables, contract asset, and current and long-term contract liabilities are as follows:

		Contract Asset- Unbilled Revenue	Contract Liability- Current Deferred Revenue	Contract Liability- Long-Term Deferred Revenue
January 1, 2018	\$ 89	\$ 10	\$ 80	\$ 21
December 31, 2018	42	11	61	20
Increase/(decrease)	\$ (47)	\$ 1	\$ (19)	\$ (1)
January 1, 2017	\$ 67	\$ 8	\$ 76	\$ 26
December 31, 2017	89	10	80	21
Increase/(decrease)	\$ 22	\$ 2	\$ 4	\$ (5)

The difference between the opening and closing balances of Conifer's contract assets and contract liabilities are primarily related to prepayments for those customers who are billed in advance, changes in estimates related to metric-based services, and up-front integration services that are typically not distinct and are, therefore, recognized over the performance obligation period to which they relate. Our Conifer segment's receivables and contract assets are reported as part of other current assets in our accompanying Consolidated Balance Sheets, and our Conifer segment's current and long-term contract liabilities are reported as part of other current liabilities and other long-term liabilities, respectively, in our accompanying Consolidated Balance Sheets.

The amount of revenue Conifer recognized in the years ended December 31, 2018 and 2017 that was included in the opening current deferred revenue liability was \$72 million and \$73 million, respectively. This revenue consists primarily of prepayments for those customers who are billed in advance, changes in estimates related to metric-based services, and up-front integration services that are recognized over the services period.

Contract Costs

We have elected to apply the practical expedient provided by ASC 340-40-25-4 and expense as incurred the incremental customer contract acquisition costs for contracts in which the amortization period of the asset that we otherwise would have recognized is one year or less. However, incremental costs incurred to obtain and fulfill customer contracts for which the amortization period of the asset that we otherwise would have recognized is longer than one year, which consist primarily of Conifer deferred contract setup costs, are capitalized and amortized on a straight-line basis over the lesser of their estimated useful lives or the term of the related contract. During the years ended December 31, 2018, 2017 and 2016, we recognized amortization expense of \$11 million, \$10 million and 7 million, respectively. At December 31, 2018 and 2017, the unamortized customer contract costs were \$28 million and \$35 million, respectively, and are presented as part of investments and other assets in the accompanying Consolidated Balance Sheets.

NOTE 5. ASSETS AND LIABILITIES HELD FOR SALE

In the three months ended December 31, 2017, three of our hospitals in the Chicago area, as well as other operations affiliated with the hospitals, met the criteria to be classified as held for sale. As a result, we have classified these assets totaling \$107 million as “assets held for sale” in current assets and the related liabilities of \$43 million as “liabilities held for sale” in current liabilities in the accompanying Consolidated Balance Sheet at December 31, 2018. These assets and liabilities, which were in our Hospital Operations and other segment until their divestiture on January 28, 2019, were recorded at the lower of their carrying amount or their fair value less estimated costs to sell. We recorded impairment charges of \$24 million and \$73 million in the years ended December 31, 2018 and December 31, 2017, respectively, for the write-down of the assets held for sale to their estimated fair value, less estimated costs to sell, as a result of the planned divestiture of these assets.

Table of Contents

Assets and liabilities classified as held for sale at December 31, 2018 were comprised of the following:

Accounts receivable	\$54
Other current assets	13
Investments and other long-term assets	1
Property and equipment	39
Current liabilities	(36)
Long-term liabilities	(7)
Net assets held for sale	\$64

In the three months ended December 31, 2018, we completed the sale of certain assets and the related liabilities of our health plan in California; these assets and the related liabilities were classified as held for sale in the three months ended December 31, 2017. As a result of this transaction, we recorded a gain on sale of \$36 million and received net pre-tax cash proceeds of \$53 million in the year ended December 31, 2018.

In the three months ended September 30, 2018, we completed the sale of our nine Aspen facilities in the United Kingdom for net pre-tax cash proceeds of approximately \$15 million; these assets met the criteria to be classified as held for sale in the three months ended September 30, 2017. We recorded impairment charges related to this transaction of \$9 million and \$59 million in the years ended December 31, 2018 and 2017, respectively, for the write-down of assets held for sale to their estimated fair value, less estimated costs to sell.

In the three months ended June 30, 2018, we completed the sale of our hospital, physician practices and other hospital-affiliated operations in St. Louis, Missouri; these assets met the criteria to be classified as held for sale in the three months ended December 31, 2017. As a result of this transaction, we recorded a gain on sale of \$12 million and received net pre-tax cash proceeds of \$54 million in the three months ended June 30, 2018.

In the three months ended March 31, 2018, we completed the sale of MacNeal Hospital, which is located in a suburb of Chicago, and other operations affiliated with the hospital; these assets met the criteria to be classified as held for sale in the three months ended September 30, 2017. As a result of this transaction, we recorded a gain on sale of \$90 million and received net pre-tax cash proceeds of \$241 million after post-closing adjustments in the year ended December 31, 2018.

Also in the three months ended March 31, 2018, we completed the sale of our hospitals, physician practices and related assets in Philadelphia, Pennsylvania and the surrounding area; these assets met the criteria to be classified as held for sale in the three months ended September 30, 2017. As a result of the transaction, we recorded a loss on sale of \$21 million and received net pre-tax proceeds of \$132 million in cash after post-closing adjustments and a secured promissory note for \$17.5 million in the year ended December 31, 2018. We recorded impairment charges related to this transaction of \$232 million in the year ended December 31, 2017 for the write-down of assets held for sale to their estimated fair value, less estimated costs to sell.

The real estate related to Abrazo Maryvale Hospital in Arizona, which we closed in December 2017, was divested in the three months ended March 31, 2018, resulting in net pre-tax proceeds of \$7 million. The real estate was classified as held for sale in the three months ended December 31, 2017.

In the three months ended September 30, 2017, we completed the sale of our hospitals, physician practices and related assets in Houston, Texas and the surrounding area for net proceeds of approximately \$750 million; these assets met the criteria to be classified as held for sale in the three months ended June 30, 2017. We recognized a gain on sale related to this transaction of \$111 million in the year ended December 31, 2017. We recorded a loss on sale of \$10 million for post-closing adjustments related to this transaction in the year ended December 31, 2018.

Table of Contents

The following table provides information on significant components of our business that have been recently disposed of or are classified as held for sale at December 31, 2018:

	Years Ended December 31,		
	2018	2017	2016
Significant disposals:			
Income (loss) from continuing operations, before income taxes			
Houston (includes a \$111 million gain on sale in the 2017 period)	\$(10)	\$133	\$67
Philadelphia (includes \$232 million of impairment charges in the 2017 period)	\$(29)	\$(255)	\$(75)
MacNeal (includes a \$90 million gain on sale in the 2018 period)	93	27	29
Aspen (includes \$59 million of impairment charges in the 2017 period)	\$(6)	\$(68)	\$(16)
Total	48	(163)	5
Significant planned divestitures classified as held for sale:			
Loss from continuing operations, before income taxes			
Chicago area (includes \$24 million of impairment charges in the 2018 period and \$73 million in the 2017 period)	(41)	(82)	(1)
Total	\$(41)	\$(82)	\$(1)

During the year ended December 31, 2017, we completed the sales of certain of our health plan businesses (or the membership thereof) in Michigan, Arizona and Texas at transaction prices of \$20 million, \$13 million and \$12 million, respectively, and recognized gains on the sales of \$3 million, \$13 million and \$10 million, respectively. These assets met the criteria to be classified as held for sale in the three months ended September 30, 2016.

During the year ended December 31, 2016, we completed the sale of our hospitals, physician practices and related assets in Georgia at a transaction price of approximately \$575 million and recognized a gain on sale of \$113 million. These assets met the criteria to be classified as held for sale in the three months ended June 30, 2015.

NOTE 6. IMPAIRMENT AND RESTRUCTURING CHARGES, AND ACQUISITION-RELATED COSTS

We recognized impairment charges on long-lived assets in 2018, 2017 and 2016 because the fair values of those assets or groups of assets indicated that the carrying amount was not recoverable. The fair value estimates were derived from appraisals, established market values of comparable assets, or internal estimates of future net cash flows. These fair value estimates can change by material amounts in subsequent periods. Many factors and assumptions can impact the estimates, including the future financial results of the hospitals, how the hospitals are operated in the future, changes in healthcare industry trends and regulations, and the nature of the ultimate disposition of the assets. In certain cases, these fair value estimates assume the highest and best use of hospital assets in the future to a market place participant is other than as a hospital. In these cases, the estimates are based on the fair value of the real property and equipment if utilized other than as a hospital. The impairment recognized does not include the costs of closing the hospitals or other future operating costs, which could be substantial. Accordingly, the ultimate net cash realized from the hospitals, should we choose to sell them, could be significantly less than their impaired value.

Our impairment tests presume stable, improving or, in some cases, declining operating results in our facilities, which are based on programs and initiatives being implemented that are designed to achieve the facility's most recent projections. If these projections are not met, or if in the future negative trends occur that impact our future outlook, impairments of long-lived assets and goodwill may occur, and we may incur additional restructuring charges, which could be material.

At December 31, 2018, our continuing operations consisted of three reportable segments, Hospital Operations and other, Ambulatory Care and Conifer. Our segments are reporting units used to perform our goodwill impairment analysis. We completed our annual impairment tests for goodwill as of October 1, 2018. During the year ended December 31, 2017, we changed our annual quantitative goodwill impairment testing date from December 31 to October 1 of each year. The change in the goodwill impairment test date better aligns the impairment testing procedures with the timing of our long-term planning process, which is a significant input to the testing. Also, during January 2017, our Florida, Northeast and Southern regions and our Detroit market were combined to form our then Eastern region. Subsequent to this change, our Hospital Operations and other segment was comprised of our then Eastern, Texas and Western regions, which were our reporting units used to perform our goodwill impairment analysis. During October 2017, we further reorganized our business such that our regional management layer was eliminated. Due to this reorganization, our previous region reporting units for our Hospital Operations

Table of Contents

and other segment were combined into one reporting unit. The change in testing date and the change in reporting units did not delay, accelerate or avoid a goodwill impairment charge.

We periodically incur costs to implement restructuring efforts for specific operations, which are recorded in our statement of operations as they are incurred. Our restructuring plans focus on various aspects of operations, including aligning our operations in the most strategic and cost-effective structure. Certain restructuring and acquisition-related costs are based on estimates. Changes in estimates are recognized as they occur.

Year Ended December 31, 2018

During the year ended December 31, 2018, we recorded impairment and restructuring charges and acquisition-related costs of \$209 million, consisting of \$77 million of impairment charges, \$115 million of restructuring charges and \$17 million of acquisition-related costs. Impairment charges included \$40 million for the write-down of buildings and other long-lived assets to their estimated fair values at two hospitals. Material adverse trends in our most recent estimates of future undiscounted cash flows of the hospitals indicated the carrying value of the hospitals' long-lived assets was not recoverable from the estimated future cash flows. We believe the most significant factors contributing to the adverse financial trends included reductions in volumes of insured patients, shifts in payer mix from commercial to governmental payers combined with reductions in reimbursement rates from governmental payers, and high levels of uninsured patients. As a result, we updated the estimate of the fair value of the hospitals' long-lived assets and compared the fair value estimate to the carrying value of the hospitals' long-lived assets. Because the fair value estimates were lower than the carrying value of the long-lived assets, an impairment charge was recorded for the difference in the amounts. The aggregate carrying value of assets held and used of the hospitals for which impairment charges were recorded was \$130 million at December 31, 2018 after recording the impairment charges. We also recorded \$24 million of charges to write-down assets held for sale to their estimated fair value, less estimated costs to sell, for certain of our Chicago-area facilities, \$9 million of charges to write-down assets held for sale to their estimated fair value, less estimated costs to sell, for Aspen and \$4 million of other impairment charges. Of the total impairment charges recognized for the year ended December 31, 2018, \$67 million related to our Hospital Operations and other segment, \$9 million related to our Ambulatory Care segment, and \$1 million related to our Conifer segment. Restructuring charges consisted of \$68 million of employee severance costs, \$17 million of contract and lease termination fees, and \$30 million of other restructuring costs. Acquisition-related costs consisted of \$10 million of transaction costs and \$7 million of acquisition integration charges.

Year Ended December 31, 2017

During the year ended December 31, 2017, we recorded impairment and restructuring charges and acquisition-related costs of \$541 million, consisting of \$402 million of impairment charges, \$117 million of restructuring charges and \$22 million of acquisition-related costs. Impairment charges consisted of \$364 million of charges to write-down assets held for sale to their estimated fair value, less estimated costs to sell, for Aspen, our Philadelphia-area facilities and certain of our Chicago-area facilities, \$31 million for the impairment of two equity method investments and \$7 million to write-down intangible assets. Of the total impairment charges recognized for the year ended December 31, 2017, \$337 million related to our Hospital Operations and other segment, \$63 million related to our Ambulatory Care segment, and \$2 million related to our Conifer segment. Restructuring charges consisted of \$82 million of employee severance costs, \$15 million of contract and lease termination fees, and \$20 million of other restructuring costs. Acquisition-related costs consisted of \$6 million of transaction costs and \$16 million of acquisition integration charges.

Year Ended December 31, 2016

During the year ended December 31, 2016, we recorded impairment and restructuring charges and acquisition-related costs of \$202 million. This amount included impairment charges of \$54 million for the write-down of buildings, equipment and other long-lived assets, primarily capitalized software costs classified as other intangible assets, to their estimated fair values at four hospitals. Material adverse trends in our estimates of future undiscounted cash flows of the hospitals at that time indicated the carrying value of the hospitals' long-lived assets was not recoverable from the estimated future cash flows. We believe the most significant factors contributing to the adverse financial trends included reductions in volumes of insured patients, shifts in payer mix from commercial to governmental payers combined with reductions in reimbursement rates from governmental payers, and high levels of uninsured patients. As a result, we updated the estimate of the fair value of the hospitals' long-lived assets and compared the fair value estimate to the carrying value of the hospitals' long-lived assets. Because the fair value estimates were lower than the carrying value of the long-lived assets, an impairment charge was recorded for the difference in the amounts. The aggregate carrying value of assets held and used of the hospitals for which impairment charges were recorded was \$163 million at December 31, 2016 after recording the impairment charges. We also recorded \$19 million of impairment charges related to investments and \$14 million related to other intangible assets, primarily contract-related intangibles and

Table of Contents

capitalized software costs not associated with the hospitals described above. Of the total impairment charges recognized for the year ended December 31, 2016, \$76 million related to our Hospital Operations and other segment, \$8 million related to our Ambulatory Care segment, and \$3 million related to our Conifer segment. We also recorded \$35 million of employee severance costs, \$14 million of restructuring costs, \$14 million of contract and lease termination fees, and \$52 million in acquisition-related costs, which include \$20 million of transaction costs and \$32 million of acquisition integration costs.

NOTE 7. LONG-TERM DEBT AND LEASE OBLIGATIONS

The table below shows our long-term debt as of December 31, 2018 and 2017:

	December 31, 2018	December 31, 2017
Senior unsecured notes:		
5.500% due 2019	\$ 468	\$ 500
6.750% due 2020	300	300
8.125% due 2022	2,800	2,800
6.750% due 2023	1,872	1,900
7.000% due 2025	478	500
6.875% due 2031	362	430
Senior secured first lien notes:		
4.750% due 2020	500	500
6.000% due 2020	1,800	1,800
4.500% due 2021	850	850
4.375% due 2021	1,050	1,050
4.625% due 2024	1,870	1,870
Senior secured second lien notes:		
7.500% due 2022	750	750
5.125% due 2025	1,410	1,410
Capital leases	425	431
Mortgage notes	75	77
Unamortized issue costs, note discounts and premiums	(184) (231
Total long-term debt	14,826	14,937
Less current portion	182	146
Long-term debt, net of current portion	\$ 14,644	\$ 14,791

Credit Agreement

We have a senior secured revolving credit facility (as amended, the "Credit Agreement") that provides, subject to borrowing availability, for revolving loans in an aggregate principal amount of up to \$1 billion, with a \$300 million subfacility for standby letters of credit. Obligations under the Credit Agreement, which has a scheduled maturity date of December 4, 2020, are guaranteed by substantially all of our domestic wholly owned hospital subsidiaries and are secured by a first-priority lien on the accounts receivable owned by us and the subsidiary guarantors. Outstanding revolving loans accrue interest at a base rate plus a margin ranging from 0.25% to 0.75% per annum or the London Interbank Offered Rate ("LIBOR") plus a margin ranging from 1.25% to 1.75% per annum, in each case based on available credit. An unused commitment fee payable on the undrawn portion of the revolving loans ranges from 0.25% to 0.375% per annum based on available credit. Our borrowing availability is based on a specified percentage of eligible accounts receivable, including self-pay accounts. At December 31, 2018, we were in compliance with all covenants and conditions in our Credit Agreement. At December 31, 2018, we had no cash borrowings outstanding under the Credit Agreement and we had \$2 million of standby letters of credit outstanding. Based on our eligible

receivables, \$998 million was available for borrowing under the Credit Agreement at December 31, 2018. Our Credit Agreement contains provisions that limit the payment of cash dividends on our common stock if we do not meet certain financial ratios.

Letter of Credit Facility

We have a letter of credit facility (as amended, the “LC Facility”) that provides for the issuance of standby and documentary letters of credit, from time to time, in an aggregate principal amount of up to \$180 million (subject to increase to up to \$200 million). The maturity date of the LC Facility is March 7, 2021. Obligations under the LC Facility are guaranteed and secured by a first-priority pledge of the capital stock and other ownership interests of certain of our wholly owned domestic hospital subsidiaries on an equal ranking basis with our senior secured first lien notes.

Table of Contents

Drawings under any letter of credit issued under the LC Facility that we have not reimbursed within three business days after notice thereof accrue interest at a base rate plus a margin equal to 0.50% per annum. An unused commitment fee is payable at an initial rate of 0.25% per annum with a step up to 0.375% per annum should our secured debt-to-EBITDA ratio equal or exceed 3.00 to 1.00 at the end of any fiscal quarter. A fee on the aggregate outstanding amount of issued but undrawn letters of credit accrues at a rate of 1.50% per annum. An issuance fee equal to 0.125% per annum of the aggregate face amount of each outstanding letter of credit is payable to the account of the issuer of the related letter of credit. At December 31, 2018, we were in compliance with all covenants and conditions in our LC Facility. At December 31, 2018, we had \$93 million of standby letters of credit outstanding under the LC Facility.

Senior Secured Notes and Senior Unsecured Notes

In December 2018 and November 2018, we purchased \$22 million and \$10 million, respectively, of aggregate principal amount of our 5.500% senior unsecured notes due 2019 for \$22 million and \$10 million, respectively.

In August 2018, we purchased \$38 million aggregate principal amount of our 6.875% senior unsecured notes due 2031 for \$36 million, including \$1 million in accrued and unpaid interest through the dates of purchase.

In May 2018, we purchased \$30 million aggregate principal amount of our 6.875% senior unsecured notes due 2031 for \$28 million. In connection with the purchase, we recorded a loss from early extinguishment of debt of \$1 million in the three months ended June 30, 2018, primarily related to the write-off of associated unamortized note discount and issuance costs, partially offset by the difference between the purchase price and the par value of the notes.

In March 2018, we purchased \$28 million aggregate principal amount of our 6.750% senior unsecured notes due 2023 and \$22 million aggregate principal amount of our 7.000% senior unsecured notes due 2025 for \$51 million, including \$1 million in accrued and unpaid interest through the dates of purchase. In connection with these purchases, we recorded a loss from early extinguishment of debt of \$1 million in the three months ended March 31, 2018, primarily related to the write-off of associated unamortized issuance costs.

On June 14, 2017, we sold \$830 million aggregate principal amount of our 4.625% senior secured first lien notes, which will mature on July 15, 2024 (the “2024 Secured First Lien Notes”). We will pay interest on the 2024 Secured First Lien Notes semi-annually in arrears on January 15 and July 15 of each year, which payments commenced on January 15, 2018. The proceeds from the sale of the 2024 Secured First Lien Notes were used, after payment of fees and expenses, together with cash on hand, to deposit with the trustee an amount sufficient to fund the redemption of all \$900 million in aggregate principal amount of our outstanding floating rate senior secured notes due 2020 (the “2020 Floating Rate Notes”) on July 14, 2017, thereby fully discharging the 2020 Floating Rate Notes as of June 14, 2017. In connection with the redemption, we recorded a loss from early extinguishment of debt of \$26 million in the three months ended June 30, 2017, primarily related to the difference between the redemption price and the par value of the notes, as well as the write-off of associated unamortized note discounts and issuance costs.

Also on June 14, 2017, THC Escrow Corporation III (“Escrow Corp.”), a Delaware corporation established for the purpose of issuing the securities referred to in this paragraph, issued \$1.040 billion in aggregate principal amount of 4.625% senior secured first lien notes due 2024 (the “Escrow Secured First Lien Notes”), \$1.410 billion in aggregate principal amount of 5.125% senior secured second lien notes due 2025 (the “Escrow Secured Second Lien Notes”) and \$500 million in aggregate principal amount of 7.000% senior unsecured notes due 2025 (the “Escrow Unsecured Notes”).

On July 14, 2017, we (i) assumed Escrow Corp.’s obligations with respect to the Escrow Secured Second Lien Notes and (ii) effected a mandatory exchange of all outstanding Escrow Secured First Lien Notes for a like principal amount

of our newly issued 2024 Secured First Lien Notes. The proceeds from the sale of the Escrow Secured Second Lien Notes and Escrow Secured First Lien Notes were released from escrow on July 14, 2017 and were used, after payment of fees and expenses, to finance our redemption on July 14, 2017 of \$1.041 billion aggregate principal amount of our outstanding 6.250% senior secured notes due 2018 and \$1.100 billion aggregate principal amount of our outstanding 5.000% senior unsecured notes due 2019.

On August 1, 2017, we assumed Escrow Corp.'s obligations with respect to the Escrow Unsecured Notes. The proceeds from the sale of the Escrow Unsecured Notes were released from escrow on August 1, 2017 and were used, after payment of fees and expenses, to finance our redemption on August 1, 2017 of \$500 million aggregate principal amount of our outstanding 8.000% senior unsecured notes due 2020.

Table of Contents

On September 11, 2017, we redeemed the remaining \$250 million aggregate principal amount of our outstanding 8.000% senior unsecured notes due 2020 using cash on hand.

As a result of the redemption activities in the three months ended September 30, 2017 discussed above, we recorded a loss from early extinguishment of debt of \$138 million in the period, primarily related to the difference between the redemption price and the par value of the notes, as well as the write-off of associated unamortized note discounts and issuance costs.

All of our senior secured notes are guaranteed by certain of our wholly owned domestic hospital company subsidiaries and secured by a pledge of the capital stock and other ownership interests of those subsidiaries on either a first lien or second lien basis, as indicated in the table above. All of our senior secured notes and the related subsidiary guarantees are our and the subsidiary guarantors' senior secured obligations. All of our senior secured notes rank equally in right of payment with all of our other senior secured indebtedness. Our senior secured notes rank senior to any subordinated indebtedness that we or such subsidiary guarantors may incur; they are effectively senior to our and such subsidiary guarantors' existing and future unsecured indebtedness and other liabilities to the extent of the value of the collateral securing the notes and the subsidiary guarantees; they are effectively subordinated to our and such subsidiary guarantors' obligations under our Credit Agreement to the extent of the value of the collateral securing borrowings thereunder; and they are structurally subordinated to all obligations of our non-guarantor subsidiaries.

The indentures setting forth the terms of our senior secured notes contain provisions governing our ability to redeem the notes and the terms by which we may do so. At our option, we may redeem our senior secured notes, in whole or in part, at any time at a redemption price equal to 100% of the principal amount of the notes redeemed plus the make-whole premium set forth in the related indenture, together with accrued and unpaid interest thereon, if any, to the redemption date. Certain series of the senior secured notes may also be redeemed, in whole or in part, at certain redemption prices set forth in the applicable indentures, together with accrued and unpaid interest. In addition, we may be required to purchase for cash all or any part of each series of our senior secured notes upon the occurrence of a change of control (as defined in the applicable indentures) for a cash purchase price of 101% of the aggregate principal amount of the notes, plus accrued and unpaid interest.

All of our senior unsecured notes are general unsecured senior debt obligations that rank equally in right of payment with all of our other unsecured senior indebtedness, but are effectively subordinated to our senior secured notes described above, the obligations of our subsidiaries and any obligations under our Credit Agreement to the extent of the value of the collateral. We may redeem any series of our senior unsecured notes, in whole or in part, at any time at a redemption price equal to 100% of the principal amount of the notes redeemed, plus a make-whole premium specified in the applicable indenture, if any, together with accrued and unpaid interest to the redemption date.

Covenants

Credit Agreement. Our Credit Agreement contains customary covenants for an asset-backed facility, including a minimum fixed charge coverage ratio to be met if the designated excess availability under the revolving credit facility falls below \$100 million, as well as limits on debt, asset sales and prepayments of senior debt. The Credit Agreement also includes a provision, which we believe is customary in receivables-backed credit facilities, that gives our lenders the right to require that proceeds of collections of substantially all of our consolidated accounts receivable be applied directly to repay outstanding loans and other amounts that are due and payable under the Credit Agreement at any time that unused borrowing availability under the revolving credit facility is less than \$100 million for three consecutive business days or if an event of default has occurred and is continuing thereunder. In that event, we would seek to re-borrow under the Credit Agreement to satisfy our operating cash requirements. Our ability to borrow under the Credit Agreement is subject to conditions that we believe are customary in revolving credit facilities, including that no events of default then exist.

Senior Secured Notes. The indentures governing our senior secured notes contain covenants that, among other things, restrict our ability and the ability of our subsidiaries to incur liens, consummate asset sales, enter into sale and lease-back transactions or consolidate, merge or sell all or substantially all of our or their assets, other than in certain transactions between one or more of our wholly owned subsidiaries. These restrictions, however, are subject to a number of exceptions and qualifications. In particular, there are no restrictions on our ability or the ability of our subsidiaries to incur additional indebtedness, make restricted payments, pay dividends or make distributions in respect of capital stock, purchase or redeem capital stock, enter into transactions with affiliates or make advances to, or invest in, other entities (including unaffiliated entities). In addition, the indentures governing our senior secured notes contain a covenant that neither we nor any of our subsidiaries will incur secured debt, unless at the time of and after giving effect to the incurrence of such debt, the aggregate amount of all such secured debt (including the aggregate principal amount of senior secured notes outstanding at such time) does not exceed the amount that would cause the secured debt ratio (as defined in the indentures) to exceed 4.0 to 1.0; and indentures governing certain of our senior secured first lien notes further provide that the aggregate amount of all such debt

Table of Contents

secured by a lien on par to the lien securing the senior secured first lien notes may not exceed the amount that would cause the secured debt ratio to exceed 3.0 to 1.0.

Senior Unsecured Notes. The indentures governing our senior unsecured notes contain covenants and conditions that have, among other requirements, limitations on (1) liens on “principal properties” and (2) sale and lease-back transactions with respect to principal properties. A principal property is defined in the senior unsecured notes indentures as a hospital that has an asset value on our books in excess of 5% of our consolidated net tangible assets, as defined in such indentures. The above limitations do not apply, however, to (1) debt that is not secured by principal properties or (2) debt that is secured by principal properties if the aggregate of such secured debt does not exceed 15% of our consolidated net tangible assets, as further described in the indentures. The senior unsecured notes indentures also prohibit the consolidation, merger or sale of all or substantially all assets unless no event of default would result after giving effect to such transaction.

Future Maturities

Future long-term debt maturities and minimum operating lease payments as of December 31, 2018 are as follows:

	Total	Years Ending December 31,					Later Years
		2019	2020	2021	2022	2023	
Long-term debt, including capital lease obligations	\$15,010	\$182	\$2,697	\$1,958	\$3,588	\$1,894	\$4,691
Long-term non-cancelable operating leases	\$932	\$171	\$151	\$133	\$113	\$92	\$272

Rental expense under operating leases, including short-term leases, was \$326 million, \$340 million and \$335 million in the years ended December 31, 2018, 2017 and 2016, respectively. Included in rental expense for each of these periods was sublease income of \$11 million, \$14 million and \$13 million, respectively, which was recorded as a reduction of rental expense.

NOTE 8. GUARANTEES

Consistent with our policy on physician relocation and recruitment, we provide income guarantee agreements to certain physicians who agree to relocate to fill a community need in the service area of one of our hospitals and commit to remain in practice in the area for a specified period of time. Under such agreements, we are required to make payments to the physicians in excess of the amounts they earn in their practices up to the amount of the income guarantee. The income guarantee periods are typically 12 months. If a physician does not fulfill his or her commitment period to the community, which is typically three years subsequent to the guarantee period, we seek recovery of the income guarantee payments from the physician on a prorated basis. We also provide revenue collection guarantees to hospital-based physician groups providing certain services at our hospitals with terms generally ranging from one to three years.

At December 31, 2018, the maximum potential amount of future payments under our income guarantees to certain physicians who agree to relocate and revenue collection guarantees to hospital-based physician groups providing certain services at our hospitals was \$166 million. We had a total liability of \$123 million recorded for these guarantees included in other current liabilities at December 31, 2018.

At December 31, 2018, we also had issued guarantees of the indebtedness and other obligations of our investees to third parties, the maximum potential amount of future payments under which was approximately \$24 million. Of the total, \$8 million relates to the obligations of consolidated subsidiaries, which obligations are recorded in the accompanying Consolidated Balance Sheet at December 31, 2018.

NOTE 9. EMPLOYEE BENEFIT PLANS

Share-Based Compensation Plans

In recent years, we have granted both options and restricted stock units to certain of our employees and directors pursuant to our 2008 Stock Incentive Plan, as amended. Options have an exercise price equal to the fair market value of the shares on the date of grant and generally expire 10 years from the date of grant. A restricted stock unit is a contractual right to receive one share of our common stock in the future. Typically, options and time-based restricted stock units vest one-third on each of the first three anniversary dates of the grant; however, certain special retention awards may have different vesting terms. In addition, we grant performance-based options and performance-based restricted stock units that vest subject to the achievement of specified performance goals within a specified timeframe. At December 31, 2018, assuming outstanding

Table of Contents

performance-based restricted stock units and options for which performance has not yet been determined will achieve target performance, approximately 5.3 million shares of common stock were available under our 2008 Stock Incentive Plan for future stock option grants and other equity incentive awards, including restricted stock units (4.1 million shares remain available if we assume maximum performance for outstanding performance restricted stock units and options for which performance has not yet been determined).

The accompanying Consolidated Statements of Operations for the years ended December 31, 2018, 2017 and 2016 include \$46 million, \$59 million and \$60 million, respectively, of pre-tax compensation costs related to our stock-based compensation arrangements. The table below shows certain stock option and restricted stock unit grants and other awards that comprise the stock-based compensation expense recorded in the year ended December 31, 2018. Compensation cost is measured by the fair value of the awards on their grant dates and is recognized over the requisite service period of the awards, whether or not the awards had any intrinsic value during the period.

Grant Date	Awards	Exercise Price Per Share	Fair Value Per Share at Grant Date	Stock-Based Compensation Expense for Year Ended December 31, 2018
	(In Thousands)			(In Millions)
Stock Options:				
February 28, 2018	593	\$ 20.60	\$ 8.83	\$ 2
September 29, 2017	409	\$ 16.43	\$ 5.63	2
March 1, 2017	877	\$ 18.99	\$ 8.52	1

USPI Management Equity Plan				18
				\$ 46

Pursuant to the terms of our stock-based compensation plans, awards granted under the plan vest and may be exercised as determined by the human resources committee of our board of directors. In the event of a change in control, the human resources committee of our board of directors may, at its sole discretion without obtaining shareholder approval, accelerate the vesting or performance periods of the awards.

Table of Contents**Stock Options**

The following table summarizes stock option activity during the years ended December 31, 2018, 2017 and 2016:

	Options	Weighted Average Exercise Price Per Share	Aggregate Intrinsic Value (In Millions)	Weighted Average Remaining Life
Outstanding at December 31, 2015	1,606,842	\$ 22.87		
Granted	—	—		
Exercised	(111,715)	17.88		
Forfeited/Expired	(59,206)	18.68		
Outstanding at December 31, 2016	1,435,921	\$ 22.87		
Granted	1,396,307	18.24		
Exercised	(20,400)	4.56		
Forfeited/Expired	(247,006)	24.37		
Outstanding at December 31, 2017	2,564,822	\$ 20.35		
Granted	635,196	21.33		
Exercised	(619,849)	18.19		
Forfeited/Expired	(317,426)	35.30		
Outstanding at December 31, 2018	2,262,743	\$ 19.12	\$ 1	6.7 years
Vested and expected to vest at December 31, 2018	2,262,743	\$ 19.12	\$ 1	6.7 years
Exercisable at December 31, 2018	767,037	\$ 17.47	\$ 1	3.2 years

There were 619,849 stock options exercised during the year ended December 31, 2018 with an aggregated intrinsic value of approximately \$4 million, and 20,400 stock options exercised in 2017 with an aggregate intrinsic value less than \$1 million. There were 635,196 performance-based stock options granted in the year ended December 31, 2018, and 1,396,307 performance-based stock options granted in the year ended December 31, 2017. On May 31, 2018, we granted an aggregate of 31,184 performance-based stock options under our 2008 Stock Incentive Plan to new senior officers. The options will all vest on the third anniversary of the grant date, subject to achieving a closing stock price of at least \$44.29 (a 25% premium above the grant date closing stock price of \$35.43) for at least 20 consecutive trading days within three years of the grant date, and will expire on the tenth anniversary of the grant date. On February 28, 2018, we granted an aggregate of 604,012 performance-based stock options under our 2008 Stock Incentive Plan to certain of our senior officers. The stock options will all vest on the third anniversary of the grant date because, in the three months ended June 30, 2018, the requirement that our stock close at a price of at least \$25.75 (a 25% premium above the grant date closing stock price of \$20.60) for at least 20 consecutive trading days within three years of the grant date was met; these options will expire on the tenth anniversary of the grant date.

On March 1, 2017, we granted 987,781 stock options to certain of our senior officers. These stock options will all vest on the third anniversary of the grant date because, in the three months ended June 30, 2018, the requirement that our stock close at a price of at least \$23.74 (a 25% premium above the grant date closing stock price of \$18.99) for at least 20 consecutive trading days within three years of the grant date was met; these options will expire on the tenth anniversary of the grant date. On September 29, 2017, we granted our executive chairman 408,526 performance-based stock options. The options all vested on the first anniversary of the grant date because, in the three months ended June 30, 2018, the requirement that our stock close at a price of at least \$20.53 (a 25% premium above the grant date closing stock price of \$16.43) for at least 30 consecutive trading days within four years of the grant date was met; these options will expire on the fifth anniversary of the grant date.

The weighted average estimated fair value of stock options we granted during the year ended December 31, 2018 and 2017 was \$9.16 and \$7.64 per share, respectively. These fair values were calculated based on each grant date, using a

Monte Carlo simulation with the following assumptions:

	February 28, 2018	September 29, 2017	March 1, 2017
Expected volatility	46%	46%	49%
Expected dividend yield	0%	0%	0%
Expected life	6.2 years	3.0 years	6.2 years
Expected forfeiture rate	0%	0%	0%
Risk-free interest rate	2.72%	1.92%	2.15%

Table of Contents

The following table summarizes information about our outstanding stock options at December 31, 2018:

Range of Exercise Prices	Options Outstanding		Weighted Average Exercise Price	Options Exercisable	
	Number of Options	Weighted Average Remaining Contractual Life		Number of Options	Weighted Average Exercise Price
\$0.00 to \$4.569	82,409	0.2 years	\$ 4.56	82,409	\$ 4.56
\$4.57 to \$19.759	1,285,795	6.7 years	\$ 18.18	413,960	\$ 16.46
\$19.76 to \$35.430	894,539	7.4 years	\$ 21.83	270,668	\$ 22.94
	2,262,743	6.7 years	\$ 19.12	767,037	\$ 17.47

As of December 31, 2018, 71.5% of all our outstanding options were held by current employees and 28.5% were held by former employees. Of our outstanding options, 21.7% were in-the-money, that is, they had exercise price less than the \$17.14 market price of our common stock on December 31, 2018, and 78.3% were out-of-the-money, that is, they had an exercise price of more than \$17.14 as shown in the table below:

	In-the-Money Options		Out-of-the-Money Options		All Options	
	Outstanding	% of Total	Outstanding	% of Total	Outstanding	% of Total
Current employees	469,849	95.7 %	1,147,105	64.7 %	1,616,954	71.5 %
Former employees	21,086	4.3 %	624,703	35.3 %	645,789	28.5 %
Totals	490,935	100.0 %	1,771,808	100.0 %	2,262,743	100.0 %
% of all outstanding options	21.7 %		78.3 %		100.0 %	

Restricted Stock Units

The following table summarizes restricted stock unit activity during the years ended December 31, 2018, 2017 and 2016:

	Restricted Stock Units	Weighted Average Grant Date Fair Value Per Unit
Unvested at December 31, 2015	3,627,232	\$ 44.69
Granted	1,626,329	30.05
Vested	(1,644,616)	42.95
Forfeited	(434,412)	38.59
Unvested at December 31, 2016	3,174,533	\$ 38.75
Granted	714,018	18.25
Vested	(1,397,953)	35.50
Forfeited	(236,610)	32.13
Unvested at December 31, 2017	2,253,988	\$ 35.20
Granted	765,184	24.74
Vested	(995,331)	32.63
Forfeited	(139,711)	36.01
Unvested at December 31, 2018	1,884,130	\$ 32.25

In the year ended December 31, 2018, we granted 765,184 restricted stock units, of which 288,325 will vest and be settled ratably over a three-year period from the grant date, 339,806 will vest and be settled ratably over two-year period from the grant date, and 60,963 will vest and be settled on the third anniversary of the grant date. In addition, in May 2018, we made an annual grant of 54,198 restricted stock units to our non-employee directors for the 2018-2019 board service year, which units vested immediately and will settle in shares of our common stock on the third anniversary of the date of the grant. Because the Board of Directors appointed two new members in May 2018, we

made initial grants totaling 3,670 restricted stock units to these directors, as well as prorated annual grants totaling 12,154 restricted stock units. Both the initial grants and the annual grants vested immediately; however, the initial grants will not settle until the directors' separation from the Board, while the annual grants settle on the third anniversary of the grant date. In addition, we granted 6,068 performance-based restricted stock units to certain of our senior officers; the vesting of these restricted stock units is contingent on our achievement of specified three-year performance goals for the years 2018 to 2020. Provided the goals are achieved, the performance-based restricted stock units will vest and settle on the third anniversary of the grant date. The actual number of performance-based restricted stock units that could vest will range from 0% to 200% of the 6,068 units granted, depending on our level of achievement with respect to the performance goals.

Table of Contents

In the year ended December 31, 2017, we granted 714,018 restricted stock units of which 518,229 will vest and be settled ratably over a three-year period from the grant date. In addition, in May 2017, we made an annual grant of 145,179 restricted stock units to our non-employee directors for the 2017-2018 board service year, which units vested immediately and will settle in shares of our common stock on the third anniversary of the date of the grant. Because the Board of Directors appointed three new members, one in October 2017 and two in November 2017, we made initial grants totaling 13,772 restricted stock units to these directors, as well as prorated annual grants totaling 23,935 restricted stock units. Both the initial grants and the annual grants vested immediately; however, the initial grants will not settle until the directors' separation from the Board, while the annual grants settle on the third anniversary of the grant date. In addition, we granted 12,903 performance-based restricted stock units to certain of our senior officers; the vesting of these restricted stock units is contingent on our achievement of specified three-year performance goals for the years 2017 to 2019. Provided the goals are achieved, the performance-based restricted stock units will vest and settle on the third anniversary of the grant date. The actual number of performance-based restricted stock units that could vest will range from 0% to 200% of the 12,903 units granted, depending on our level of achievement with respect to the performance goals.

As of December 31, 2018, there were \$18 million of total unrecognized compensation costs related to restricted stock units. These costs are expected to be recognized over a weighted average period of 1.5 years.

USPI Management Equity Plan

USPI maintains a separate management equity plan whereby it has granted non-qualified options to purchase nonvoting shares of USPI's outstanding common stock to eligible plan participants, allowing the recipient to participate in the incremental growth in the value of USPI from the applicable grant date. The total pool of options consists of approximately 10% of USPI's fully diluted outstanding common stock. Options have an exercise price equal to the estimated fair market value of USPI's common stock on the date of grant, and expire upon the earlier of seven years from the date of grant or July 2022. The option awards have been structured such that they have a three or four year vesting period in which half of the award vests in equal pro-rata amounts over the applicable vesting period and the remaining half vests at the end of the applicable three or four year period. Any unvested awards are forfeited upon the recipient's termination of service with USPI and vested options must be exercised within 90 days of termination. Once an award is exercised, the recipient must hold the underlying shares for at least six months plus one day and then is eligible to sell the underlying shares to USPI at their estimated fair market value. USPI is only required to purchase any of these eligible nonvoting common shares during a three months window in the third quarter of each calendar year. In addition, at any time after the earlier of (i) July 2022, or (ii) one year and seven days after all of the options have become exercisable, USPI has the right, but not the obligation, to purchase from each holder of the outstanding shares of nonvoting common stock all or a portion of such shares at their estimated fair market value, provided the shares have been held for the requisite holding period. Payment for USPI's purchase of any eligible nonvoting common shares may be made in cash or in shares of Tenet's common stock. The accompanying Consolidated Statement of Operations for the years ended December 31, 2018, 2017 and 2016 includes \$18 million, \$13 million and \$10 million, respectively, of pre-tax compensation costs related to USPI's management equity plan.

Employee Stock Purchase Plan

We have an employee stock purchase plan under which we are currently authorized to issue up to 5,062,500 shares of common stock to our eligible employees. As of December 31, 2018, there were approximately 3.2 million shares available for issuance under our employee stock purchase plan. Under the terms of the plan, eligible employees may elect to have between 1% and 10% of their base earnings withheld each quarter to purchase shares of our common stock. Shares are purchased at a price equal to 95% of the closing price on the last day of the quarter. The plan requires a one-year holding period for all shares issued. The holding period does not apply upon termination of employment. Under the plan, no individual may purchase, in any year, shares with a fair market value in excess of

\$25,000. The plan is currently not considered to be compensatory.

We sold the following numbers of shares under our employee stock purchase plan in the years ended December 31, 2018, 2017 and 2016:

	Years Ended December 31,		
	2018	2017	2016
Number of shares	228,045	395,957	217,184
Weighted average price	\$22.96	\$ 17.28	\$ 17.21

Table of Contents***Employee Retirement Plans***

Substantially all of our employees, upon qualification, are eligible to participate in one of our defined contribution 401(k) plans. Under the plans, employees may contribute a portion of their eligible compensation, and we match such contributions annually up to a maximum percentage for participants actively employed, as defined by the plan documents. Employer matching contributions will vary by plan. Plan expenses, primarily related to our contributions to the plans, were \$99 million, \$128 million and \$116 million for the years ended December 31, 2018, 2017 and 2016, respectively. Such amounts are reflected in salaries, wages and benefits in the accompanying Consolidated Statements of Operations.

We maintain three frozen non-qualified defined benefit pension plans (“SERPs”) that provide supplemental retirement benefits to certain of our current and former executives. These plans are not funded, and plan obligations for these plans are paid from our working capital. Pension benefits are generally based on years of service and compensation. Upon completing the acquisition of Vanguard Health Systems, Inc. on October 1, 2013, we assumed a frozen qualified defined benefit plan (“DMC Pension Plan”) covering substantially all of the employees of our Detroit market that were hired prior to June 1, 2003. The benefits paid under the DMC Pension Plan are primarily based on years of service and final average earnings. During the years ended December 31, 2018 and 2017, the Society of Actuaries issued new mortality improvement scales (MP-2018 and MP 2017, respectively), which we incorporated into the estimates of our defined benefit plan obligations at December 31, 2018 and 2017. These changes to our mortality assumptions decreased our projected benefit obligations as of December 31, 2018 and 2017 by approximately \$4 million and \$10 million, respectively. The following tables summarize the balance sheet impact, as well as the benefit obligations, funded status and rate assumptions associated with the SERPs and the DMC Pension Plan based on actuarial valuations prepared as of December 31, 2018 and 2017:

	December 31,		
	2018	2017	
Reconciliation of funded status of plans and the amounts included in the Consolidated Balance Sheets:			
Projected benefit obligations ⁽¹⁾			
Beginning obligations	\$(1,455)	\$ (1,475))
Service cost	(2)	(2))
Interest cost	(56)	(62))
Actuarial gain (loss)	90	(31))
Benefits paid	122	120	
Special termination benefit costs	—	(5))
Ending obligations	(1,301)	(1,455))
Fair value of plans assets			
Beginning plan assets	850	786	
Gain (loss) on plan assets	(65)	122	
Employer contribution	47	43	
Benefits paid	(101)	(101))
Ending plan assets	731	850	
Funded status of plans	\$(570)	\$ (605))
Amounts recognized in the Consolidated Balance Sheets consist of:			
Other current liability	\$(49)	\$ (69))
Other long-term liability	\$(521)	\$ (536))
Accumulated other comprehensive loss	\$281	\$ 266	
SERP Assumptions:			
Discount rate	4.50	% 3.75	%
Compensation increase rate	3.00	% 3.00	%

Edgar Filing: TENET HEALTHCARE CORP - Form 10-K

Measurement date	December 31, 2018	December 31, 2017
DMC Pension Plan Assumptions:		
Discount rate	4.62 %	4.00 %
Compensation increase rate	Frozen	Frozen
Measurement date	December 31, 2018	December 31, 2017

(1)The accumulated benefit obligation at December 31, 2018 and 2017 was approximately \$1.299 billion and \$1.448 billion, respectively.

Table of Contents

The components of net periodic benefit costs and related assumptions are as follows:

	Years Ended December 31,			
	2018	2017	2016	
Service costs	\$2	\$ 2	\$ 2	
Interest costs	56	62	69	
Expected return on plan assets	(54)	(50)	(51)	
Amortization of net actuarial loss	14	14	12	
Net periodic benefit cost	\$18	\$ 28	\$ 32	
SERP Assumptions:				
Discount rate	3.75%	4.25 %	4.75 %	
Long-term rate of return on assets	n/a	n/a	n/a	
Compensation increase rate	3.00%	3.00 %	3.00 %	
Measurement date	January 1, 2018	January 1, 2017	January 1, 2016	
Census date	January 1, 2018	January 1, 2017	January 1, 2016	
DMC Pension Plan Assumptions:				
Discount rate	4.00%	4.42 %	4.67 %	
Long-term rate of return on assets	6.50%	6.50 %	6.50 %	
Compensation increase rate	Frozen	Frozen	Frozen	
Measurement date	January 1, 2018	January 1, 2017	January 1, 2016	
Census date	January 1, 2018	January 1, 2017	January 1, 2016	

Net periodic benefit costs for the current year are based on assumptions determined at the valuation date of the prior year for the SERPs and the DMC Pension Plan. As a result of the adoption of ASU 2017-07 discussed in Note 1, we recognized service costs in salaries, wages and benefits expense, and recognized other components of net periodic benefit cost in other non-operating expense, net, in the accompanying Consolidated Statements of Operations.

We recorded gain (loss) adjustments of \$(15) million, \$56 million and \$(61) million in other comprehensive income (loss) in the years ended December 31, 2018, 2017 and 2016, respectively, to recognize changes in the funded status of our SERPs and the DMC Pension Plan. Changes in the funded status are recorded as a direct increase or decrease to shareholders' equity through accumulated other comprehensive loss. Net actuarial gains (losses) of \$(29) million, \$42 million and \$(73) million were recognized during the years ended December 31, 2018, 2017 and 2016, respectively, and the amortization of net actuarial loss of \$14 million, \$14 million and \$12 million for the years ended December 31, 2018, 2017 and 2016, respectively, were recognized in other comprehensive income (loss). Cumulative net actuarial losses of \$281 million, \$266 million and \$322 million as of December 31, 2018, 2017 and 2016, respectively, and unrecognized prior service costs of less than \$1 million as of each of the years ended December 31, 2018, 2017 and 2016 have not yet been recognized as components of net periodic benefit cost.

To develop the expected long-term rate of return on plan assets assumption, the DMC Pension Plan considers the current level of expected returns on risk-free investments (primarily government bonds), the historical level of risk premium associated with the other asset classes in which the portfolio is invested and the expectations for future returns on each asset class. The expected return for each asset class is then weighted based on the target asset allocation to develop the expected long-term rate of return on assets assumption for the portfolio. The weighted-average asset allocations by asset category as of December 31, 2018, were as follows:

Asset Category	Target	Actual
Cash and cash equivalents	2 %	2 %
U.S. government obligations	— %	2 %
Equity securities	64 %	65 %
Debt securities	34 %	31 %

Alternative investments 1 % 1 %

The DMC Pension Plan assets are invested in separately managed portfolios using investment management firms. The objective for all asset categories is to maximize total return without assuming undue risk exposure. The DMC Pension Plan maintains a well-diversified asset allocation that best meets these objectives. The DMC Pension Plan assets are largely comprised of equity securities, which include companies with various market capitalization sizes in addition to international and convertible securities. Cash and cash equivalents are comprised of money market funds. Debt securities include domestic and foreign government obligations, corporate bonds, and mortgage-backed securities. Under the investment policy of the DMC Pension Plan, investments in derivative securities are not permitted for the sole purpose of speculating on the direction of

122

Table of Contents

market interest rates. Included in this prohibition are leveraging, shorting, swaps, futures, options, forwards and similar strategies.

In each investment account, the DMC Pension Plan investment managers are responsible for monitoring and reacting to economic indicators, such as gross domestic product, consumer price index and U.S. monetary policy that may affect the performance of their account. The performance of all managers and the aggregate asset allocation are formally reviewed on a quarterly basis, with a rebalancing of the asset allocation occurring at least once per year. The current asset allocation objective is to maintain a certain percentage with each class allowing for a 10% deviation from the target.

The following tables summarize the DMC Pension Plan assets measured at fair value on a recurring basis as of December 31, 2018 and 2017, aggregated by the level in the fair value hierarchy within which those measurements are determined. In general, fair values determined by Level 1 inputs utilize quoted prices (unadjusted) in active markets for identical assets or liabilities. We consider a security that trades at least weekly to have an active market. Fair values determined by Level 2 inputs utilize data points that are observable, such as quoted prices for similar assets, interest rates and yield curves. Fair values determined by Level 3 inputs are unobservable data points for the asset or liability, and include situations where there is little, if any, market activity for the asset or liability.

	December 31, 2018	Level 1	Level 2	Level 3
Cash and cash equivalents	\$ 33	\$33	\$ —	—
U.S. government obligations	9	9	—	—
Equity securities	423	423	—	—
Fixed income funds	262	262	—	—
Futures contracts	4	4	—	—
	\$ 731	\$731	\$ —	—
	December 31, 2017	Level 1	Level 2	Level 3
Cash and cash equivalents	\$ 49	\$49	\$ —	—
U.S. government obligations	5	5	—	—
Equity securities	488	488	—	—
Fixed income funds	308	308	—	—
	\$ 850	\$850	\$ —	—

The following table presents the estimated future benefit payments to be made from the SERPs and the DMC Pension Plan, a portion of which will be funded from plan assets, for the next five years and in the aggregate for the five years thereafter:

	Years Ending December 31,					Five Years	
	Total	2019	2020	2021	2022	2023	Thereafter
Estimated benefit payments	\$897	\$86	\$89	\$90	\$91	\$91	\$ 450

The SERP and DMC Pension Plan obligations of \$570 million at December 31, 2018 are classified in the accompanying Consolidated Balance Sheet as an other current liability (\$49 million) and defined benefit plan obligations (\$521 million) based on an estimate of the expected payment patterns. We expect to make total contributions to the plans of approximately \$49 million for the year ending December 31, 2019.

NOTE 10. PROPERTY AND EQUIPMENT

The principal components of property and equipment are shown in the table below:

	December 31,	
	2018	2017
Land	\$613	\$602
Buildings and improvements	6,920	6,837
Construction in progress	199	109
Equipment	4,482	4,221
	12,214	11,769
Accumulated depreciation and amortization	(5,221)	(4,739)
Net property and equipment	\$6,993	\$7,030

Table of Contents

Property and equipment is stated at cost, less accumulated depreciation and amortization and impairment write-downs related to assets held and used.

NOTE 11. GOODWILL AND OTHER INTANGIBLE ASSETS

The following table provides information on changes in the carrying amount of goodwill, which is included in the accompanying Consolidated Balance Sheets as of 2018 and 2017:

	2018	2017
Hospital Operations and other		
As of January 1:		
Goodwill	\$5,406	\$5,803
Accumulated impairment losses	(2,430)	(2,430)
Total	2,976	3,373
Goodwill acquired during the year and purchase price allocation adjustments	1	5
Goodwill related to assets held for sale and disposed or deconsolidated facilities	3	(402)
Total	\$2,980	\$2,976

Total	\$3,696	\$3,437

	2018		2017
Conifer			
As of January 1:			
Goodwill	\$ 605		\$ 605
Accumulated impairment losses	—		—
Total	605		605
Goodwill acquired during the year and purchase price allocation adjustments	—		—
Total	\$ 605		\$ 605

As of December 31:

Goodwill	\$	605	\$	605
Accumulated impairment losses	—		—	
Total	\$	605	\$	605

Table of Contents

The following table provides information regarding other intangible assets, which are included in the accompanying Consolidated Balance Sheets as of 2018 and 2017:

	Gross Carrying Amount	Accumulated Amortization	Net Book Value
At December 31, 2018:			
Capitalized software costs	\$1,667	\$(858)) \$809
Trade names	102	—) 102
Contracts	871	(76)) 795
Other	104	(79)) 25
Total	\$2,744	\$(1,013)) \$1,731
At December 31, 2017:			
Capitalized software costs	\$1,582	\$(754)) \$828
Trade Names	102	—) 102
Contracts	859	(60)) 799
Other	106	(69)) 37
Total	\$2,649	\$(883)) \$1,766

Estimated future amortization of intangibles with finite useful lives as of December 31, 2018 is as follows:

Total	Years Ending December 31,					Later Years
	2019	2020	2021	2022	2023	
Amortization of intangible assets	\$1,053	\$147	\$131	\$112	\$99	\$85 \$479

We recognized amortization expense of \$185 million, \$172 million and \$152 million in the accompanying Consolidated Statements of Operations for the years ended December 31, 2018, 2017 and 2016, respectively.

NOTE 12. INVESTMENTS AND OTHER ASSETS

The principal components of investments and other assets in the accompanying Consolidated Balance Sheets are as follows:

	December 31,	
	2018	2017
Marketable securities	\$40	\$56
Equity investments in unconsolidated healthcare entities	956	958
Total investments	996	1,014
Cash surrender value of life insurance policies	30	32
Long-term deposits	44	37
California provider fee program receivables	231	266
Land held for expansion, other long-term receivables and other assets	155	194
Investments and other assets	\$1,456	\$1,543

Our policy is to classify investments in debt securities that may be needed for cash requirements as “available-for-sale.” In doing so, the carrying values of debt instruments are adjusted at the end of each accounting period to their market values through a credit or charge to other comprehensive income (loss), net of taxes.

NOTE 13. ACCUMULATED OTHER COMPREHENSIVE LOSS

Our accumulated other comprehensive loss is comprised of the following:

	December 31,	
	2018	2017
Adjustments for defined benefit plans	\$(223)	\$(170)
Foreign currency translation adjustments	—	(38)
Unrealized gains on investments	\$—	\$4
Accumulated other comprehensive loss	\$(223)	\$(204)

The tax benefits allocated to the adjustments for our defined benefit plans and foreign currency translation adjustments were approximately \$3 million and \$3 million, respectively, for the year ended December 31, 2018, and the tax expense

Table of Contents

allocated to the adjustments for our defined benefit plans, foreign currency translation adjustments and unrealized gains on investments were approximately \$15 million, \$5 million, and \$3 million, respectively, for the year ended December 31, 2017. As discussed in Note 1, we recorded cumulative effect adjustments of \$36 million and \$7 million upon the adoptions of ASU 2018-02 and ASU 2016-01, respectively, effective January 1, 2018.

NOTE 14. NET OPERATING REVENUES

Net operating revenues for our Hospital Operations and other and Ambulatory Care segments primarily consist of net patient service revenues, principally for patients covered by Medicare, Medicaid, managed care and other health plans, as well as certain uninsured patients under our *Compact* and other uninsured discount and charity programs. Net operating revenues for our Conifer segment primarily consist of revenues from providing revenue cycle management services to healthcare systems, as well as individual hospitals, physician practices, self-insured organizations, health plans and other entities.

The table below shows our sources of net operating revenues less provision for doubtful accounts and implicit price concessions from continuing operations:

	Years Ended December 31,		
	2018	2017	2016
Hospital Operations and other:			
Net patient service revenues from hospitals and related outpatient facilities			
Medicare	\$2,882	\$3,243	\$3,386
Medicaid	1,294	1,304	1,346
Managed care	9,213	9,583	9,728
Self-pay	96	91	63
Indemnity and other	596	608	604
Total	14,081	14,829	15,127
Physician practices revenues	1,097	1,209	1,201
Health plans	14	110	482
Revenue from other sources	93	112	94
Hospital Operations and other total prior to inter-segment eliminations	15,285	16,260	16,904
Ambulatory Care	2,085	1,940	1,797
Conifer	1,533	1,597	1,571
Inter-segment eliminations	(590)	(618)	(651)
Net operating revenues	\$18,313	\$19,179	\$19,621

Adjustments for prior-year cost reports and related valuation allowances, principally related to Medicare and Medicaid, increased revenues in the years ended December 31, 2018, 2017 and 2016 by \$24 million, \$35 million and \$54 million, respectively. Estimated cost report settlements and valuation allowances are included in accounts receivable in the accompanying Consolidated Balance Sheets (see Note 3). We believe that we have made adequate provision for any adjustments that may result from final determination of amounts earned under all the above arrangements with Medicare and Medicaid.

The table below shows the composition of net operating revenues less provision for doubtful accounts and implicit price concessions for our Ambulatory Care segment:

Years Ended December 31,		
2018	2017	2016

Net patient service revenues	\$1,965	\$1,816	\$1,684
Management fees	92	93	89
Revenue from other sources	28	31	24
Net operating revenues	\$2,085	\$1,940	\$1,797

Table of Contents

The table below shows the composition of net operating revenues for our Conifer segment:

	Years Ended December 31,		
	2018	2017	2016
Revenue cycle services – Tenet	\$568	\$583	\$596
Revenue cycle services – other customers	855	891	839
Other services – Tenet	22	35	55
Other services – other customers	88	88	81
Total revenues from client contracts	\$1,533	\$1,597	\$1,571

Other services represent 7% of Conifer’s revenue and include value-based care, consulting and project services.

Performance Obligations

The following table includes Conifer’s revenue that is expected to be recognized in the future related to performance obligations that are unsatisfied, or partially unsatisfied, at the end of the reporting period. The amounts in the table primarily consist of revenue cycle management fixed fees, which are typically recognized ratably as the performance obligation is satisfied. The estimated revenue does not include volume or contingency based contracts, performance incentives, penalties or other variable consideration that is considered constrained. Conifer’s contract with Catholic Health Initiatives (“CHI”), a minority interest owner of Conifer Health Solutions, LLC, represents the majority of the fixed-fee revenue related to remaining performance obligations. Conifer’s contract term with CHI ends in 2032.

	Years Ending December 31,					Later Years	
	Total	2019	2020	2021	2022		2023
Performance obligations	\$7,736	\$585	\$584	\$581	\$581	\$581	\$4,824

NOTE 15. PROPERTY AND PROFESSIONAL AND GENERAL LIABILITY INSURANCE***Property Insurance***

We have property, business interruption and related insurance coverage to mitigate the financial impact of catastrophic events or perils that is subject to deductible provisions based on the terms of the policies. These policies are on an occurrence basis. For the policy period April 1, 2018 through March 31, 2019, we have coverage totaling \$850 million per occurrence, after deductibles and exclusions, with annual aggregate sub-limits of \$100 million for floods, \$200 million for earthquakes and a per-occurrence sub-limit of \$200 million for named windstorms with no annual aggregate. With respect to fires and other perils, excluding floods, earthquakes and named windstorms, the total \$850 million limit of coverage per occurrence applies. Deductibles are 5% of insured values up to a maximum of \$25 million for California earthquakes, floods and named windstorms, and 2% of insured values for New Madrid fault earthquakes, with a maximum per claim deductible of \$25 million. Floods and certain other covered losses, including fires and other perils, have a minimum deductible of \$1 million.

Professional and General Liability Reserves

We are self-insured for the majority of our professional and general liability claims and purchase insurance from third-parties to cover catastrophic claims. At December 31, 2018 and 2017, the aggregate current and long-term professional and general liability reserves in the accompanying Consolidated Balance Sheets were \$882 million and \$854 million, respectively. These reserves include the reserves recorded by our captive insurance subsidiaries and our self-insured retention reserves recorded based on modeled estimates for the portion of our professional and general liability risks, including incurred but not reported claims, for which we do not have insurance coverage. We estimated the reserves for losses and related expenses using expected loss-reporting patterns discounted to their present value

under a risk-free rate approach using a Federal Reserve seven-year maturity rate of 2.59%, 2.33% and 2.25% at December 31, 2018, 2017 and 2016, respectively.

If the aggregate limit of any of our professional and general liability policies is exhausted, in whole or in part, it could deplete or reduce the limits available to pay any other material claims applicable to that policy period.

Included in other operating expenses, net, in the accompanying Consolidated Statements of Operations is malpractice expense of \$388 million, \$303 million and \$281 million for the years ended December 31, 2018, 2017 and 2016, respectively.

Table of Contents**NOTE 16. CLAIMS AND LAWSUITS**

We operate in a highly regulated and litigious industry. Healthcare companies are subject to numerous investigations by various governmental agencies. Further, private parties have the right to bring qui tam or “whistleblower” lawsuits against companies that allegedly submit false claims for payments to, or improperly retain overpayments from, the government and, in some states, private payers. We and our subsidiaries have received inquiries in recent years from government agencies, and we may receive similar inquiries in future periods. We are also subject to class action lawsuits, employment-related claims and other legal actions in the ordinary course of business. Some of these actions may involve large demands, as well as substantial defense costs. We cannot predict the outcome of current or future legal actions against us or the effect that judgments or settlements in such matters may have on us.

We are also subject to a non-prosecution agreement (“NPA”). If we fail to comply with this agreement, we could be subject to criminal prosecution, substantial penalties and exclusion from participation in federal healthcare programs, any of which could adversely impact our business, financial condition, results of operations or cash flows.

We record accruals for estimated losses relating to claims and lawsuits when available information indicates that a loss is probable and we can reasonably estimate the amount of the loss or a range of loss. Significant judgment is required in both the determination of the probability of a loss and the determination as to whether a loss is reasonably estimable. These determinations are updated at least quarterly and are adjusted to reflect the effects of negotiations, settlements, rulings, advice of legal counsel and technical experts, and other information and events pertaining to a particular matter, but are subject to significant uncertainty regarding numerous factors that could affect the ultimate loss levels. If a loss on a material matter is reasonably possible and estimable, we disclose an estimate of the loss or a range of loss. In cases where we have not disclosed an estimate, we have concluded that the loss is either not reasonably possible or the loss, or a range of loss, is not reasonably estimable, based on available information. Given the inherent uncertainties involved in these matters, especially those involving governmental agencies, and the indeterminate damages sought in some of these matters, there is significant uncertainty as to the ultimate liability we may incur from these matters, and an adverse outcome in one or more of these matters could be material to our results of operations or cash flows for any particular reporting period.

Shareholder Derivative Litigation

In January 2017, the Dallas County District Court consolidated two previously disclosed shareholder derivative lawsuits filed on behalf of the Company by purported shareholders of the Company’s common stock against current and former officers and directors into a single matter captioned *In re Tenet Healthcare Corporation Shareholder Derivative Litigation*. The plaintiffs filed a consolidated shareholder derivative petition in February 2017. The consolidated shareholder derivative petition alleged that false or misleading statements or omissions concerning the Company’s financial performance and compliance policies, specifically with respect to the previously disclosed civil qui tam litigation and parallel criminal investigation of the Company and certain of its subsidiaries (together, the “Clinica de la Mama matters”), caused the price of the Company’s common stock to be artificially inflated. In addition, the plaintiffs alleged that the defendants violated GAAP by failing to disclose an estimate of the possible loss or a range of loss related to the Clinica de la Mama matters. The plaintiffs claimed that they did not make demand on the Company’s board of directors to bring the lawsuit because such a demand would have been futile. In May 2018, the judge in the consolidated shareholder derivative litigation entered an order lifting the previous year-long stay of the matter and, in July 2018, the defendants filed pleadings seeking dismissal of the lawsuit. In October 2018, the judge granted defendants’ motion to dismiss, but also agreed to give the plaintiffs 30 days to replead their complaint. On January 30, 2019, the court issued a final judgment and order of dismissal after the plaintiffs elected not to replead. The plaintiffs have indicated that they will appeal the court’s ruling that dismissal was appropriate because they failed to adequately plead that a pre-suit demand on Tenet’s Board of Directors, a precondition to their action, should be excused as futile. The plaintiffs have until March 1, 2019 to file an appeal. If necessary, the defendants intend to

continue to vigorously contest the plaintiffs' allegations in this matter.

Antitrust Class Action Lawsuit Filed by Registered Nurses in San Antonio

In *Maderazo, et al. v. VHS San Antonio Partners, L.P. d/b/a Baptist Health Systems, et al.*, filed in June 2006 in the U.S. District Court for the Western District of Texas, a purported class of registered nurses employed by three unaffiliated San Antonio-area hospital systems allege those hospital systems, including our Baptist Health System, and other unidentified San Antonio regional hospitals violated Section §1 of the federal Sherman Act by conspiring to depress nurses' compensation and exchanging compensation-related information among themselves in a manner that reduced competition and suppressed the wages paid to such nurses. The suit seeks unspecified damages (subject to trebling under federal law), interest, costs and attorneys' fees. On January 23, 2019, the district court issued an opinion denying the plaintiffs' motion for class certification.

128

Table of Contents

On February 5, 2019, the plaintiffs appealed the district court's decision to the U.S. Court of Appeals for the Fifth Circuit. We will continue to vigorously defend ourselves against the plaintiffs' allegations.

Government Investigation of Detroit Medical Center

Detroit Medical Center ("DMC") is subject to an ongoing investigation by the U.S. Attorney's Office for the Eastern District of Michigan and the U.S. Department of Justice ("DOJ") for potential violations of the Stark law, the Medicare and Medicaid anti-kickback and anti-fraud and abuse amendments codified under Section 1128B(b) of the Social Security Act (the "Anti-kickback Statute"), and the federal False Claims Act ("FCA") related to DMC's employment of nurse practitioners and physician assistants ("Mid-Level Practitioners") from 2006 through 2017. As previously disclosed, a media report was published in August 2017 alleging that 14 Mid-Level Practitioners were terminated by DMC earlier in 2017 due to compliance concerns. We are cooperating with the investigation and continue to produce documents on a schedule agreed upon with the DOJ. Because the government's review is in its preliminary stages, we are unable to determine the potential exposure, if any, at this time.

Oklahoma Surgical Hospital Qui Tam Action

In September 2016, a relator filed a qui tam lawsuit under seal in the Western District of Oklahoma against, among other parties, (i) Oklahoma Center for Orthopaedic & Multispecialty Surgery ("OCOM"), a surgical hospital jointly owned by USPI, a healthcare system partner and physicians, (ii) Southwest Orthopaedic Specialists ("SOS"), an independent physician practice group, (iii) Tenet, and (iv) other related entities and individuals. The complaint alleges various violations of the FCA, the Anti-kickback Statute, the Stark law and the Oklahoma Medicaid False Claims Act. In May 2018, Tenet and its affiliates learned that they were parties to the suit when the court unsealed the complaint and the DOJ declined to intervene with respect to the issues involving Tenet, USPI, OCOM and individually named employees. In June 2018, the relator filed an amended complaint more fully describing the claims and adding additional defendants. Tenet, USPI, OCOM and individually named employees filed motions to dismiss the case in October 2018, but the court has not yet ruled on the motions. On February 11, 2019, the court granted a motion brought by the SOS defendants and the relator for a four-month stay so that those parties could continue conferring regarding the issues and claims in the case.

Pursuant to the obligations under our NPA, we reported the unsealed qui tam action to the DOJ, and we are investigating the claims contained in the amended complaint and cooperating fully with the DOJ. Because these proceedings and investigations are in preliminary stages, we are unable to predict with any certainty the terms, or potential impact on our business or financial condition, of any potential resolution of these matters.

Ordinary Course Matters

We are also subject to other claims and lawsuits arising in the ordinary course of business, including potential claims related to, among other things, the care and treatment provided at our hospitals and outpatient facilities, the application of various federal and state labor laws, tax audits and other matters. Although the results of these claims and lawsuits cannot be predicted with certainty, we believe that the ultimate resolution of these ordinary course claims and lawsuits will not have a material effect on our business or financial condition.

New claims or inquiries may be initiated against us from time to time. These matters could (1) require us to pay substantial damages or amounts in judgments or settlements, which, individually or in the aggregate, could exceed amounts, if any, that may be recovered under our insurance policies where coverage applies and is available, (2) cause us to incur substantial expenses, (3) require significant time and attention from our management, and (4) cause us to close or sell hospitals or otherwise modify the way we conduct business.

Edgar Filing: TENET HEALTHCARE CORP - Form 10-K

The following table presents reconciliations of the beginning and ending liability balances in connection with legal settlements and related costs recorded in continuing operations during the years ended December 31, 2018, 2017 and 2016. No amounts were recorded in discontinued operations in the 2018, 2017 and 2016 periods.

	Balances at Beginning of Period	Litigation and Investigation Costs	Cash Payments	Other	Balances at End of Period
Year Ended December 31, 2018	\$ 12	\$ 38	\$(41)	\$(1)	\$ 8
Year Ended December 31, 2017	\$ 12	\$ 23	\$(23)	\$—	\$ 12
Year Ended December 31, 2016	\$ 299	\$ 293	\$(582)	\$2	\$ 12

Table of Contents

For the years ended December 31, 2018, 2017 and 2016, we recorded net costs of \$38 million, \$23 million and \$293 million, respectively, in connection with significant legal proceedings and governmental investigations. Of these amounts, \$278 million for the year ended December 31, 2016 was attributable to accruals for the Clinica de la Mama matters.

NOTE 17. REDEEMABLE NONCONTROLLING INTERESTS IN EQUITY OF CONSOLIDATED SUBSIDIARIES

As part of the acquisition of United Surgical Partners International, Inc., we entered into a put/call agreement (the “Put/Call Agreement”) with respect to the equity interests in USPI held by our joint venture partners. In April 2016, we paid \$127 million to purchase shares put to us according to the Put/Call Agreement, which increased our ownership interest in USPI to approximately 56.3%. On May 1, 2017, we amended and restated the Put/Call Agreement to provide for, among other things, the acceleration of our acquisition of certain shares of USPI. Under the terms of the amendment, we paid Welsh Carson, on July 3, 2017, \$716 million for the purchase of these shares, which increased our ownership interest in USPI to 80.0%, as well as the final adjustment to the 2016 purchase price. In April 2018, we paid \$630 million for the purchase of an additional 15% ownership interest in USPI and the final adjustment to the 2017 purchase price, which increased our ownership interest in USPI to 95%.

In addition, we entered into a separate put call agreement (the “Baylor Put/Call Agreement”) with Baylor University Medical Center (“Baylor”) that contains put and call options with respect to the 5% ownership interest in USPI held by Baylor. Each year starting in 2021, Baylor may put up to one-third of their total shares in USPI held as of January 1, 2017. In each year that Baylor does not put the full 33.3% of USPI’s shares allowable, we may call the difference between the number of shares Baylor put and the maximum number of shares they could have put that year. In addition, the Baylor Put/Call Agreement contains a call option pursuant to which we have the ability to acquire all of Baylor’s ownership interest by 2024. We have the ability to choose whether to settle the purchase price for the Baylor put/call in cash or shares of our common stock.

Based on the nature of these put/call structures, the minority shareholders’ interests in USPI are classified as redeemable noncontrolling interests in the accompanying Consolidated Balance Sheets at December 31, 2018 and 2017.

The following table shows the changes in redeemable noncontrolling interests in equity of consolidated subsidiaries during the years ended 2018 and 2017:

	December 31,	
	2018	2017
Balances at beginning of period	\$1,866	\$2,393
Net income	190	239
Distributions paid to noncontrolling interests	(142)	(128)
Accretion of redeemable noncontrolling interests	173	33
Purchases and sales of businesses and noncontrolling interests, net	(667)	(671)
Balances at end of period	\$1,420	\$1,866

Our redeemable noncontrolling interests balances at December 31, 2018 and 2017 in the table above were comprised of \$431 million and \$519 million, respectively, from our Hospital Operations and other segment, \$713 million and \$1.137 billion, respectively, from our Ambulatory Care segment, and \$276 million and \$210 million, respectively, from our Conifer segment. Our net income (loss) attributable to redeemable noncontrolling interests for the years ended December 31, 2018 and 2017 respectively, in the accompanying Consolidated Statements of Operations were comprised of \$(25) million and \$18 million, respectively, from our Hospital Operations and other segment, \$151 million and \$170 million, respectively, from our Ambulatory Care segment, and \$64 million and \$51 million,

respectively, from our Conifer segment.

130

Table of Contents**NOTE 18. INCOME TAXES**

The provision for income taxes for continuing operations for the years ended December 31, 2018, 2017 and 2016 consists of the following:

	Years Ended December 31,		
	2018	2017	2016
Current tax expense (benefit):			
Federal	\$(6)	\$(4)	\$12
State	33	23	14
	27	19	26
Deferred tax expense (benefit):			
Federal	159	202	34
State	(10)	(2)	7
	149	200	41
	\$176	\$219	\$67

A reconciliation between the amount of reported income tax expense and the amount computed by multiplying income (loss) from continuing operations before income taxes by the statutory federal income tax rate is shown below. State income tax expense for the year ended December 31, 2018 includes \$9 million of expense related to the write off of expired or worthless unutilized state net operating loss carryforwards and other deferred tax assets for which a full valuation allowance had been provided in prior years. A corresponding tax benefit of \$9 million is included for the year ended December 31, 2018 to reflect the reduction in the valuation allowance. Foreign pre-tax loss for the years ended December 31, 2018 and 2017 was \$6 million and \$70 million, respectively.

	Years Ended December 31,		
	2018	2017	2016
Tax expense (benefit) at statutory federal rate of 21% in 2018 (35% in 2017 and 2016)	\$134	\$(35)	\$87
State income taxes, net of federal income tax benefit	23	4	16
Expired state net operating losses, net of federal income tax benefit	9	28	35
Tax attributable to noncontrolling interests	(70)	(113)	(106)
Nondeductible goodwill	8	109	29
Nontaxable gains	—	—	(11)
Nondeductible litigation costs	—	—	37
Impact of decrease in federal tax rate on deferred taxes	(1)	246	—
Reversal of permanent reinvestment assumption and other adjustments related to divestiture of foreign subsidiary	(6)	(30)	—
Stock-based compensation tax deficiencies	5	15	—
Changes in valuation allowance (including impact of decrease in federal tax rate)	76	—	(25)
Change in tax contingency reserves, including interest	(1)	(6)	(9)
Prior-year provision to return adjustments and other changes in deferred taxes	(5)	4	12
Other items	4	(3)	2
Income tax expense	\$176	\$219	\$67

In December 2017, the President signed into law the Tax Cuts and Jobs Act (the "Tax Act"). The Tax Act amended the Internal Revenue Code to reduce tax rates and modify policies, credits and deductions for individuals and businesses. For businesses, the Tax Act made broad and complex changes to the U.S. tax code, including but not limited to (1)

reducing the corporate federal tax rate from a maximum of 35% to a flat 21% rate effective January 1, 2018, (2) repealing the corporate alternative minimum tax (“AMT”) and changing how existing AMT credits may be realized, (3) creating a new limitation on the deductibility of interest expense, (4) allowing full expensing of certain capital expenditures, and (5) denying deductions for performance-based compensation paid to certain key executives. International provisions in the Tax Act have not had, and are not expected to have, a material impact on the Company’s taxes.

The staff of the U.S. Securities and Exchange Commission issued Staff Accounting Bulletin No. 118 (“SAB 118”), which provided guidance on accounting for the tax effects of the Tax Act. Pursuant to SAB 118, companies were permitted up to one year from the enactment of the Tax Act to complete the accounting under ASC 740 (“the measurement period”). We completed the accounting for the tax effects of the Tax Act within the measurement period.

Table of Contents

As a result of the reduction in the corporate income tax rate from 35% to 21% under the Tax Act, we revalued our net deferred tax assets at December 31, 2017, resulting in a reduction in the value of our net deferred tax assets by approximately \$251 million. For the year ended December 31, 2017, we recorded \$252 million as a provisional estimate of the impact of the Tax Act, including the decrease in the corporate income tax rate from 35% to 21%. Approximately \$6 million of the total \$252 million increase in income tax expense is included in the net change in valuation allowance, with the remaining \$246 million shown in the table above. During the year ended December 31, 2018, we recorded \$1 million of tax benefit upon finalizing our accounting for the income tax effects of the Tax Act based on actual 2017 federal and state income tax filings.

Deferred income taxes reflect the tax effects of temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and the amount used for income tax purposes. The following table discloses those significant components of our deferred tax assets and liabilities, including any valuation allowance:

	December 31, 2018		December 31, 2017	
	Assets	Liabilities	Assets	Liabilities
Depreciation and fixed-asset differences	\$—	\$ 297	\$—	\$ 411
Reserves related to discontinued operations and restructuring charges	24	—	15	—
Receivables (doubtful accounts and adjustments)	155	—	134	—
Deferred gain on debt exchanges	—	—	—	6
Accruals for retained insurance risks	205	—	225	—
Intangible assets	—	341	—	330
Other long-term liabilities	39	—	97	—
Benefit plans	255	—	268	—
Other accrued liabilities	32	—	42	—
Investments and other assets	—	83	—	79
Interest expense limitation	89	—	—	—
Net operating loss carryforwards	266	—	399	—
Stock-based compensation	24	—	27	—
Other items	88	32	142	32
	1,177	753	1,349	858
Valuation allowance	(148)	—	(72)	—
	\$1,029	\$ 753	\$1,277	\$ 858

Below is a reconciliation of the deferred tax assets and liabilities and the corresponding amounts reported in the accompanying Consolidated Balance Sheets.

	December 31,	
	2018	2017
Deferred income tax assets	\$312	\$455
Deferred tax liabilities	(36)	(36)
Net deferred tax asset	\$276	\$419

During the year ended December 31, 2018, the valuation allowance increased by \$76 million, including an increase of \$89 million due to limitations on deductions of interest expense, a decrease of \$9 million due to the expiration or worthlessness of unutilized state net operating loss carryovers, and a decrease of \$4 million due to changes in expected realizability of deferred tax assets. The balance in the valuation allowance as of December 31, 2018 was \$148 million. During the year ended December 31, 2017, we had no net change in the valuation allowance, but there was a decrease of \$28 million due to the expiration or worthlessness of unutilized state net operating loss carryovers,

an increase of \$6 million due to the decrease in the federal tax rate, and an increase of \$22 million due to changes in expected realizability of deferred tax assets. The remaining balance in the valuation allowance at December 31, 2017 was \$72 million. During the year ended December 31, 2016, the valuation allowance decreased by \$24 million primarily due to the expiration or worthlessness of unutilized state net operating loss carryovers. The balance in the valuation allowance as of December 31, 2016 was \$72 million.

We account for uncertain tax positions in accordance with ASC 740-10-25, which prescribes a comprehensive model for the financial statement recognition, measurement, presentation and disclosure of uncertain tax positions taken or expected to be taken in income tax returns. The following table summarizes the total changes in unrecognized tax benefits in continuing operations during the years ended December 31, 2018, 2017 and 2016. There were no such changes in discontinued operations. The additions and reductions for tax positions include the impact of items for which the ultimate deductibility is highly certain, but for which there is uncertainty about the timing of such deductions. Such amounts include unrecognized tax benefits that have impacted deferred tax assets and liabilities at December 31, 2018, 2017 and 2016.

Table of Contents

	Continuing Operations
Balance At December 31, 2015	\$ 40
Additions for prior-year tax positions	2
Reductions due to a lapse of statute of limitations	(7)
Balance At December 31, 2016	\$ 35
Additions for prior-year tax positions	31
Reductions for tax positions of prior years	(15)
Reductions due to a lapse of statute of limitations	(5)
Balance At December 31, 2017	\$ 46
Reductions due to a lapse of statute of limitations	(1)
Balance At December 31, 2018	\$ 45

The total amount of unrecognized tax benefits as of December 31, 2018 was \$45 million, of which \$43 million, if recognized, would affect our effective tax rate and income tax expense (benefit) from continuing operations. Income tax expense in the year ended December 31, 2018 includes a benefit of \$1 million in continuing operations attributable to a decrease in our estimated liabilities for uncertain tax positions, net of related deferred tax effects. The total amount of unrecognized tax benefits as of December 31, 2017 was \$46 million, of which \$44 million, if recognized, would affect our effective tax rate and income tax expense (benefit) from continuing operations. Income tax expense in the year ended December 31, 2017 includes a benefit of \$5 million in continuing operations attributable to a decrease in our estimated liabilities for uncertain tax positions, net of related deferred tax effects. The total amount of unrecognized tax benefits as of December 31, 2016 was \$35 million, of which \$32 million, if recognized, would affect our effective tax rate and income tax expense (benefit) from continuing operations. Income tax expense in the year ended December 31, 2016 includes a benefit of \$9 million in continuing operations attributable to a decrease in our estimated liabilities for uncertain tax positions, net of related deferred tax effects.

Our practice is to recognize interest and penalties related to income tax matters in income tax expense in our consolidated statements of operations. Approximately \$1 million of interest and penalties related to accrued liabilities for uncertain tax positions related to continuing operations are included in the accompanying Consolidated Statement of Operations for the year ended December 31, 2018. Total accrued interest and penalties on unrecognized tax benefits as of December 31, 2018 were \$3 million, all of which related to continuing operations.

The Internal Revenue Service (“IRS”) has completed audits of our tax returns for all tax years ended on or before December 31, 2007. All disputed issues with respect to these audits have been resolved and all related tax assessments (including interest) have been paid. Our tax returns for years ended after December 31, 2007 and USPI’s tax returns for years ended after December 31, 2014 remain subject to audit by the IRS.

As of December 31, 2018, approximately \$10 million of unrecognized federal and state tax benefits, as well as reserves for interest and penalties, may decrease in the next 12 months as a result of the settlement of audits, the filing of amended tax returns or the expiration of statutes of limitations.

At December 31, 2018, our carryforwards available to offset future taxable income consisted of (1) federal net operating loss (“NOL”) carryforwards of approximately \$1.0 billion pre-tax expiring in 2027 to 2034, (2) general business credit carryforwards of approximately \$26 million expiring in 2023 through 2038, and (3) state NOL carryforwards of approximately \$3.1 billion expiring in 2019 through 2038 for which the associated deferred tax benefit, net of valuation allowance and federal tax impact, is \$22 million. Our ability to utilize NOL carryforwards to reduce future taxable income may be limited under Section 382 of the Internal Revenue Code if certain ownership changes in our company occur during a rolling three-year period. These ownership changes include purchases of common stock under share repurchase programs, the offering of stock by us, the purchase or sale of our stock by

5% shareholders, as defined in the Treasury regulations, or the issuance or exercise of rights to acquire our stock. If such ownership changes by 5% shareholders result in aggregate increases that exceed 50 percentage points during the three-year period, then Section 382 imposes an annual limitation on the amount of our taxable income that may be offset by the NOL carryforwards or tax credit carryforwards at the time of ownership change.

NOTE 19. EARNINGS (LOSS) PER COMMON SHARE

The following table is a reconciliation of the numerators and denominators of our basic and diluted earnings (loss) per common share calculations for our continuing operations for the years ended December 31, 2018, 2017 and 2016. Net earnings available (loss attributable) is expressed in millions and weighted average shares are expressed in thousands.

Effect of dilutive stock options, restricted stock units and deferred compensation units	—	—	—
Net loss attributable to Tenet Healthcare Corporation common shareholders for diluted earnings per share	\$ (187)	99,321	\$(1.88)

All potentially dilutive securities were excluded from the calculation of diluted loss per share for the years ended December 31, 2017 and 2016 because we did not report income from continuing operations available to common shareholders in those periods. In circumstances where we do not have income from continuing operations available to common shareholders, the effect of stock options and other potentially dilutive securities is anti-dilutive, that is, a loss from continuing operations attributable to common shareholders has the effect of making the diluted loss per share less than the basic loss per share. Had we generated income from continuing operations available to common shareholders in the years ended December 31, 2017 and 2016, the effect (in thousands) of employee stock options, restricted stock units and deferred compensation units on the diluted shares calculation would have been an increase in shares of 788 and 1,421 for the years ended December 31, 2017 and 2016, respectively.

NOTE 20. FAIR VALUE MEASUREMENTS

Our non-financial assets and liabilities not permitted or required to be measured at fair value on a recurring basis typically relate to long-lived assets held and used, long-lived assets held for sale and goodwill. We are required to provide additional disclosures about fair value measurements as part of our financial statements for each major category of assets and liabilities measured at fair value on a non-recurring basis. The following tables present this information and indicate the fair value hierarchy of the valuation techniques we utilized to determine such fair values. In general, fair values determined by Level 1 inputs utilize quoted prices (unadjusted) in active markets for identical assets or liabilities, which generally are not applicable to non-financial assets and liabilities. Fair values determined by Level 2 inputs utilize data points that are observable, such as definitive sales agreements, appraisals or established market values of comparable assets. Fair values determined by Level 3 inputs are unobservable data points for the asset or liability and include situations where there is little, if any, market activity for the asset or liability, such as internal estimates of future cash flows.

December 31, 2018 Quoted Prices Significant Other Significant

Edgar Filing: TENET HEALTHCARE CORP - Form 10-K

		in Active Markets for Identical Assets (Level 1)	Observable Inputs (Level 2)	Unobservable Inputs (Level 3)
Long-lived assets held for sale	\$ 39	\$	—\$ 39	\$ —
Long-lived assets held and used	\$ 130	\$	—\$ 130	\$ —

134

Table of Contents

	December 31, 2017	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Long-lived assets held for sale	\$ 456	\$ —	\$ 456	\$ —
Long-lived assets held and used	\$ —	\$ —	\$ —	\$ —
Other than temporarily impaired equity method investments	\$ 113	\$ —	\$ 113	\$ —

As described in Note 6, in the year ended December 31, 2018, we recorded impairment charges in continuing operations of \$40 million for the write-down of buildings and other long-lived assets to their estimated fair values at two hospitals. We also recorded \$24 million to write-down assets held for sale to their estimated fair value, less estimated costs to sell, for certain of our Chicago-area facilities, as well as \$9 million of impairment charges to write-down assets held for sale to their estimated fair value, less estimated costs to sell, for Aspen and \$4 million related to other impairment charges. In the year ended December 31, 2017, we recorded \$364 million for the write-down of assets held for sale to their estimated fair value, less estimated costs to sell, for Aspen, our Philadelphia-area facilities and certain of our Chicago-area facilities, as well as \$31 million of impairment charges related to investments and \$7 million related to other intangible assets, primarily contract-related intangibles and capitalized software costs not associated with the hospitals described above.

The fair value of our long-term debt (except for borrowings under the Credit Agreement) is based on quoted market prices (Level 1). The inputs used to establish the fair value of the borrowings outstanding under the Credit Agreement are considered to be Level 2 inputs, which include inputs other than quoted prices included in Level 1 that are observable, either directly or indirectly. At December 31, 2018 and 2017, the estimated fair value of our long-term debt was approximately 97.3% and 100.2%, respectively, of the carrying value of the debt.

NOTE 21. ACQUISITIONS

During the year ended December 31, 2018, we acquired ten outpatient businesses (all of which are owned by USPI), three off-campus emergency departments and various physician practices. The fair value of the consideration conveyed in the acquisitions (the “purchase price”) was \$113 million.

During the year ended December 31, 2017, we acquired eight outpatient businesses (all of which are owned by USPI) and various physician practices. The fair value of the consideration conveyed in the acquisitions (the “purchase price”) was \$50 million.

During the year ended December 31, 2016, we completed a transaction that allowed us to consolidate five microhospitals that were previously recorded as equity method investments. We also acquired majority interests in 28 ambulatory surgery centers (all of which are owned USPI) and various physician practices. The fair value of the consideration conveyed in the acquisitions (the “purchase price”) was \$117 million.

We are required to allocate the purchase prices of acquired businesses to assets acquired or liabilities assumed and, if applicable, noncontrolling interests based on their fair values. The excess of the purchase price allocated over those fair values is recorded as goodwill. The purchase price allocations for certain acquisitions completed in 2018 is preliminary. We are in process of finalizing the purchase price allocations, including valuations of the acquired property and equipment, other intangible assets and noncontrolling interests for some of our 2018 acquisitions; therefore, those purchase price allocations are subject to adjustment once the valuations are completed.

Table of Contents

Preliminary or final purchase price allocations for all the acquisitions made during the years ended December 31, 2018, 2017 and 2016 are as follows:

	2018	2017	2016
Current assets	\$ 6	\$ 7	\$ 51
Property and equipment	19	9	38
Other intangible assets	9	8	7
Goodwill	220	91	464
Other long-term assets, including previously held equity method investments	(18)	(3)	(56)
Current liabilities	—	(8)	(30)
Long-term liabilities	(15)	(2)	(15)
Redeemable noncontrolling interests in equity of consolidated subsidiaries	(21)	(29)	(190)
Noncontrolling interests	(85)	(18)	(119)
Cash paid, net of cash acquired	(113)	(50)	(117)
Gains on consolidations	\$ 2	\$ 5	\$ 33

The goodwill generated from these transactions, the majority of which will not be deductible for income tax purposes, can be attributed to the benefits that we expect to realize from operating efficiencies and growth strategies. Of the total \$220 million of goodwill recorded for acquisitions completed during the year ended December 31, 2018, \$1 million was recorded in our Hospital Operations and other segment, and \$219 million was recorded in our Ambulatory Care segment. Approximately \$10 million, \$6 million and \$20 million in transaction costs related to prospective and closed acquisitions were expensed during the years ended December 31, 2018, 2017 and 2016, respectively, and are included in impairment and restructuring charges, and acquisition-related costs in the accompanying Consolidated Statements of Operations.

During the years ended December 31, 2018, 2017 and 2016, we recognized gains totaling \$2 million, \$5 million and \$33 million, respectively, associated with stepping up our ownership interests in previously held equity investments, which we began consolidating after we acquired controlling interests.

NOTE 22. SEGMENT INFORMATION

Our business consists of our Hospital Operations and other segment, our Ambulatory Care segment and our Conifer segment. The factors for determining the reportable segments include the manner in which management evaluates operating performance combined with the nature of the individual business activities.

Our Hospital Operations and other segment is comprised of our acute care and specialty hospitals, ancillary outpatient facilities, urgent care centers, microhospitals and physician practices. As described in Note 5, certain of our facilities were classified as held for sale in the accompanying Consolidated Balance Sheet at December 31, 2018. At December 31, 2018, our subsidiaries operated 68 hospitals (three of which have since been divested), primarily serving urban and suburban communities in 10 states.

Our Ambulatory Care segment is comprised of the operations of USPI and included nine Aspen facilities in the United Kingdom until their divestiture effective August 17, 2018. At December 31, 2018, USPI had interests in 255 ambulatory surgery centers, 36 urgent care centers operated under the CareSpot brand, 23 imaging centers and 23 surgical hospitals in 27 states. At December 31, 2018, we owned 95.0% of USPI.

Our Conifer segment provides healthcare business process services in the areas of hospital and physician revenue cycle management and value-based care solutions to healthcare systems, as well as individual hospitals, physician practices, self-insured organizations, health plans and other entities. At December 31, 2018, Conifer provided services

to approximately 750 Tenet and non-Tenet hospitals and other clients nationwide. In 2012, we entered into agreements documenting the terms and conditions of various services Conifer provides to Tenet hospitals, as well as certain administrative services our Hospital Operations and other segment provides to Conifer. The pricing terms for the services provided by each party to the other under these contracts were based on estimated third-party pricing terms in effect at the time the agreements were signed. At December 31, 2018, we owned 76.2% of Conifer Health Solutions, LLC, which is the principal subsidiary of Conifer Holdings, Inc.

Edgar Filing: TENET HEALTHCARE CORP - Form 10-K

Table of Contents**NOTE 23. RECENT ACCOUNTING STANDARDS*****Recently Issued Accounting Standards***

In February 2016, the FASB issued ASU 2016-02, “Leases (Topic 842)” (“ASU 2016-02”), which affects any entity that enters into a lease (as that term is defined in ASU 2016-02), with some specified scope exceptions. The main difference between the guidance in ASU 2016-02 and current GAAP is the recognition of lease assets and lease liabilities by lessees for those leases classified as operating leases under current GAAP. Under ASU 2016-02, lessees and lessors are required to recognize and measure leases at the beginning of the earliest period presented using a modified retrospective approach, which includes a number of optional practical expedients. In July 2018, the FASB issued ASU 2018-11 “Leases (Topic 842) Targeted Improvements,” which allows lessees and lessors to recognize and measure leases at the beginning of the period of adoption without modifying the comparative period financial statements. This guidance will be effective for us beginning in 2019, and we intend to use the retrospective method as of the period of adoption rather than the earliest period presented meaning that our financial statements for periods prior to January 1, 2019 will not be modified for the application of the new lease accounting standard. We will elect the three packaged transition practical expedients under ASC 842-10-65-1(f) and the practical expedient that allows lessees to choose to not separate lease and non-lease components by class of underlying asset. We expect that, as of January 1, 2019, our consolidated assets and liabilities will both increase by approximately \$750 million to \$800 million related to on-balance sheet recognition of right of use assets and liabilities. Right of use assets associated with operating leases will be included as an intangible asset, and liabilities associated with operating leases will be split between our other current liabilities and other long-term liabilities in our consolidated balance sheets. We are still finalizing our calculation of the cumulative effect of accounting change we will recognize upon adoption. We are currently working to complete the implementation of new processes and information technology tools to assist in our ongoing lease data collection and analysis, and updating our accounting policies and internal controls in connection with the adoption of the new standard.

In August 2018, the FASB issued ASU 2018-13, “Fair Value Measurement (Topic 820) Disclosure Framework—Changes to the Disclosure Requirements for Fair Value Measurement” (“ASU 2018-13”), which applies to all entities that are required to make disclosures about recurring or nonrecurring fair value measurements. The amendments in ASU 2018-13, which remove, modify or add certain disclosure requirements as part of the FASB’s disclosure framework project to improve the effectiveness of the notes to the financial statements, are effective for us beginning in 2020. The adoption of this guidance will not impact our financial position, results of operations or cash flows.

Also in August 2018, the FASB issued ASU 2018-14, “Compensation – Retirement Benefits – Defined Benefit Plans –General (Subtopic 715-20) Disclosure Framework—Changes to the Disclosure Requirements for Defined Benefit Plans” (“ASU 2018-14”), which applies to all employers that sponsor defined benefit pension or other postretirement plans. The amendments in ASU 2018-14, which remove, modify or add certain disclosure requirements as part of the FASB’s disclosure framework project to improve the effectiveness of the notes to the financial statements, are effective for us beginning in 2021. The adoption of this guidance will not impact our financial position, results of operations or cash flows.

Additionally, the FASB issued ASU 2018-15, “Intangibles – Goodwill and Other – Internal-Use Software (Subtopic 350-40) Customer’s Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement That Is a Service Contract” (“ASU 2018-14”), which applies to all entities that are a customer in a hosting arrangement that is a service contract. The amendments in ASU 2018-14, which align the requirements for capitalizing implementation costs incurred in a hosting arrangement that is a service contract with the requirements for capitalizing implementation costs incurred to develop or obtain internal-use software, are effective for us beginning in 2020. We do not expect adoption of this guidance to have a material effect on our financial position, results of operations or cash

flows.

Recently Adopted Accounting Standards

Effective January 1, 2018, as further discussed in Note 1, we adopted ASU 2014-09 and ASU 2016-01, and we early adopted ASU 2018-02. Also effective January 1, 2018, we adopted ASU 2016-15, “Statement of Cash Flows (Topic 230) Classification of Certain Cash Receipts and Cash Payments” and ASU 2016-18, “Statement of Cash Flows (Topic 230) Restricted Cash,” both of which were applied using a retrospective transition method to each period presented and did not have any effect on our statements of cash flows.

Effective January 1, 2017, as further discussed in Note 1, we adopted ASU 2016-09 and early adopted ASU 2017-07. We also early adopted ASU 2017-04, “Intangibles – Goodwill and Other (Topic 350)” (“ASU 2017 04”) for our annual goodwill impairment tests for the year ended December 31, 2017. The amendments in ASU 2017-04 modified the concept of impairment from the condition that exists when the carrying amount of goodwill exceeds its implied fair value to the condition that exists when the carrying amount of a reporting unit exceeds its fair value. An entity no longer determines goodwill

138

Table of Contents

impairment by calculating the implied fair value of goodwill by assigning the fair value of a reporting unit to all of its assets and liabilities as if that reporting unit had been acquired in a business combination. Because these amendments eliminate Step 2 from the goodwill impairment test, they should reduce the cost and complexity of evaluating goodwill for impairment. Our adoption of ASU 2017-04 did not affect our financial position, results of operations or cash flows.

NOTE 24. SUBSEQUENT EVENT

On February 5, 2019, we sold \$1.5 billion aggregate principal amount of 6.250% senior secured second lien notes, which will mature on February 1, 2027 (the “2027 Senior Secured Second Lien Notes”). We will pay interest on the 2027 Senior Secured Second Lien Notes semi-annually in arrears on February 1 and August 1 of each year, which payments will commence on August 1, 2019. The proceeds from the sale of the 2027 Senior Secured Second Lien Notes were used, after payment of fees and expenses, together with cash on hand and borrowings under our Credit Agreement, to fund the redemption of all \$300 million aggregate principal amount of our outstanding 6.750% senior notes due 2020 and all \$750 million aggregate principal amount of our outstanding 7.500% senior secured second lien notes due 2022, and will be used to fund the repayment upon maturity of all \$468 million aggregate principal amount of our outstanding 5.500% senior unsecured notes due March 1, 2019. In connection with the redemptions, we expect to record a loss from early extinguishment of debt of approximately \$47 million in the three months ending March 31, 2019, primarily related to the difference between the redemption prices and the par values of the notes, as well as the write-off of the associated unamortized issuance costs. As a result of these refinancing transactions, our 5.500% senior unsecured notes due 2019 are not included in current portion of long-term debt in our Consolidated Balance Sheet at December 31, 2018.

Table of Contents**SUPPLEMENTAL FINANCIAL INFORMATION****SELECTED QUARTERLY FINANCIAL DATA
(UNAUDITED)**

	Year Ended December 31, 2018

Quarterly operating results are not necessarily indicative of the results that may be expected for the full year. Reasons for this include, but are not limited to: overall revenue and cost trends, particularly the timing and magnitude of price changes; fluctuations in contractual allowances and cost report settlements and valuation allowances; managed care contract negotiations, settlements or terminations and payer consolidations; changes in Medicare and Medicaid regulations; Medicaid and other supplemental funding levels set by the states in which we operate; the timing of approval by the Centers for Medicare and Medicaid Services of Medicaid provider fee revenue programs; trends in patient accounts receivable collectability and associated implicit price concessions; fluctuations in interest rates; levels of malpractice insurance expense and settlement trends; impairment of long-lived assets and goodwill; restructuring charges; losses, costs and insurance recoveries related to natural disasters and other weather-related occurrences; litigation and investigation costs; acquisitions and dispositions of facilities and other assets; gains (losses) on sales, consolidation and deconsolidation of facilities; income tax rates and deferred tax asset valuation allowance activity; changes in estimates of accruals for annual incentive compensation; the timing and amounts of stock option and restricted stock unit grants to employees and directors; gains (losses) from early extinguishment of debt; and changes in occupancy levels and patient volumes. Factors that affect service mix, revenue mix, patient volumes and, thereby, the results of operations at our hospitals and related healthcare facilities include, but are not limited to: changes in federal and state healthcare regulations; the business environment, economic conditions and demographics of local communities in which we operate; the number of uninsured and underinsured individuals in local communities treated at our hospitals; seasonal cycles of illness; climate and weather conditions; physician recruitment, retention and attrition; advances in technology and treatments that reduce length of stay; local healthcare competitors; managed care contract negotiations or terminations; the number of patients with high-deductible health insurance plans; hospital performance data on quality measures and patient satisfaction, as well as standard charges for services; any unfavorable publicity about us, or our joint venture partners, that impacts our relationships with physicians and patients; and the timing of elective procedures. These considerations apply to year-to-year comparisons as well.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

We carried out an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures as defined by Rules 13a-15(e) and 15d-15(e) under the Exchange Act, as of the end of the period covered by this report. The

140

Table of Contents

evaluation was performed under the supervision and with the participation of management, including our chief executive officer and chief financial officer. Based upon that evaluation, our chief executive officer and chief financial officer concluded that our disclosure controls and procedures are effective to ensure that material information is recorded, processed, summarized and reported by management on a timely basis in order to comply with our disclosure obligations under the Exchange Act and the SEC rules thereunder.

Management's report on internal control over financial reporting is set forth on page 91 and is incorporated herein by reference. The independent registered public accounting firm that audited the financial statements included in this report has issued an attestation report on our internal control over financial reporting as set forth on page 92 herein.

There were no changes in our internal control over financial reporting during the quarter ended December 31, 2018 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

Report of Independent Auditors

To the Board of Managers of
Texas Health Ventures Group, L.L.C.

We have audited the accompanying consolidated financial statements of Texas Health Ventures Group, L.L.C. and its subsidiaries, which comprise the consolidated balance sheets as of June 30, 2018 and 2017, and the related consolidated statements of income, changes in equity and cash flows for each of the three years in the period ended June 30, 2018.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on the consolidated financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the Company's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Texas Health Ventures Group, L.L.C. and its subsidiaries as of June 30, 2018 and 2017, and the results of their operations and their cash flows for each of the three years in the period ended June 30, 2018 in accordance with accounting principles generally accepted in the United States of America.

Table of Contents**TEXAS HEALTH VENTURES GROUP, L.L.C. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES****Description of Business**

Texas Health Ventures Group, L.L.C. and subsidiaries (THVG or the Company), a Texas limited liability company, was formed on January 21, 1997, for the primary purpose of developing, acquiring, and operating ambulatory surgery centers and related entities. THVG is a joint venture between Baylor University Medical Center (BUMC), an affiliate of Baylor Scott & White Holdings (BSW Holdings), who owns 50.1% of THVG and USP North Texas, Inc. (USP), a Texas corporation and consolidated subsidiary of United Surgical Partners International, Inc. (USPI), who owns 49.9% of THVG. USPI is a subsidiary of Tenet Healthcare Corporation. BSW Holdings and its “controlled” affiliates are referred collectively herein as “BSWH”. THVG’s fiscal year ends June 30. Fiscal years of THVG’s subsidiaries end December 31; however, the financial information of these subsidiaries included in these consolidated financial statements is as of June 30, 2018 and 2017, and for the years ended, June 30, 2018, 2017 and 2016.

THVG owns equity interests in and operates ambulatory surgery centers, surgical hospitals, and related businesses in the Dallas/Fort Worth, Texas, metropolitan area. At June 30, 2018, THVG operated thirty-three facilities (the Facilities) under management contracts, thirty-two of which are consolidated for financial reporting purposes and one of which is accounted for under the equity method. THVG also has an equity method investment in a facility that does not fall under a management contract. In addition, THVG holds an equity method investment in one partnership that owns the real estate used by one of the Facilities.

THVG has been funded by capital contributions from its members and by cash distributions from the Facilities. The board of managers, which is controlled by BSWH, initiates requests for capital contributions. The Facilities’ operating agreements provide that cash flows available for distribution will be distributed, at least quarterly, to THVG and other owners of the Facilities.

THVG’s operating agreement provides that the board of managers determine, on at least a quarterly basis, if THVG should make a cash distribution based on a comparison of THVG’s excess cash on hand versus current and anticipated needs, including, without limitation, needs for operating expenses, debt service, acquisitions, and a reasonable contingency reserve. The terms of THVG’s operating agreement provide that any distributions, whether driven by operating cash flows or by other sources, such as the distribution of noncash assets or distributions in the event THVG liquidates, are to be shared according to each member’s overall ownership level in THVG.

Change in Reporting Entity

From January 1, 2016 to March 1, 2018, BUMC had a 60% controlling interest in Texas Regional Medical Center, LLC (Sunnyvale), through a separate joint venture with Tenet Healthcare Corporation (Tenet). On March 1, 2018, that joint venture was restructured and Sunnyvale was combined with THVG upon contribution by the Company’s members. On March 1, 2018, USP paid BUMC and Tenet approximately \$4,100,000 each for its interest in Sunnyvale resulting in THVG owning a controlling 62% interest.

The transfer of ownership interests in Sunnyvale qualifies as a common control transaction as defined by ASC 250-10-45-21 as BSWH held a controlling interest in the hospital before the transaction and continues to hold a controlling interest subsequent to the transaction. As a result, the commonly controlled entities, inclusive of Sunnyvale, which historically have not been presented together are considered to be a different reporting entity. This change in reporting entity requires retrospective combination of the entities for all periods presented as if the combination had been in effect since inception of common control. For the period prior to Sunnyvale’s contribution into THVG, net income attributable to non-controlling interest was calculated at the percentage used for the previous joint venture, 40%. The Company’s historical consolidated balance sheets and related statements of income, changes in equity, and of cash flows and related disclosures, include Sunnyvale starting with BUMC’s acquisition of Sunnyvale

on January 1, 2016. The effect of the change on Net income attributable to THVG for the years ended 2018, 2017, and 2016 was approximately \$2,900,000, \$1,800,000, and \$5,500,000, respectively.

Basis of Accounting

THVG maintains its books and records on the accrual basis of accounting, and the consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States.

Principles of Consolidation

The consolidated financial statements include the financial statements of THVG and its wholly owned subsidiaries and other entities that THVG controls. All intercompany balances and transactions have been eliminated in consolidation.

F-7

Table of Contents**TEXAS HEALTH VENTURES GROUP, L.L.C. AND SUBSIDIARIES**

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS- continued

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management of THVG to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Actual results could differ from those estimates.

Cash Equivalents

THVG considers all highly liquid instruments with original maturities when purchased of three months or less to be cash equivalents. There were no cash equivalents at June 30, 2018, or 2017. Under the Company's cash management system, checks issued but not presented to the bank may result in book cash overdraft balances for accounting purposes. The company reclassifies book overdrafts to accounts payable reflecting the reinstatement of liabilities cleared in the bookkeeping process. Book overdrafts are non-cash by their nature and as such, changes in accounts payable, including those caused by book overdrafts, are reflected as an adjustment to reconcile net income to net cash provided by operating activities in the consolidated statements of cash flows. Book overdrafts included in accounts payable were approximately \$24,118,000 and \$12,730,000, as of June 30, 2018 and 2017, respectively.

Restricted Cash

THVG holds cash from debt agreements for construction projects that is considered restricted. The funds are restricted for the purpose of completing the construction project or to pay back the related debt, drawn for the project. Restricted cash balances were approximately \$4,439,000 and \$9,960,000 as of June 30, 2018 and 2017, respectively, and are classified as non-current, consistent with the nature of their intended use based on the restrictions.

Patient Receivables

Patient receivables are stated at estimated net realizable value. Significant concentrations of patient receivables at June 30, 2018 and 2017 include:

	2018		2017	
Commercial and managed care providers	48	%	51	%
Government-related programs	32	%	35	%
Self-pay patients	20	%	14	%
	100	%	100	%

Government-related programs (i.e. Medicare and Medicaid) represent the only concentrated groups of payors from which THVG has significant outstanding receivables, and management does not believe there is any significant or unusual level of credit risk associated with these receivables. Commercial and managed care receivables consist of receivables from various payors involved in diverse activities and subject to differing economic conditions, and do not represent any concentrated credit risk to THVG. THVG maintains allowances for uncollectible accounts for estimated losses resulting from the payors' inability to make payments on accounts. THVG assesses the reasonableness of the allowance account based on historic write-offs, cash collections, the aging of the accounts and other current conditions and economic factors. Furthermore, management continually monitors and adjusts the allowances associated with its receivables. Accounts are written off when collection efforts have been exhausted.

Supplies

Supplies, consisting primarily of pharmaceuticals and medical supplies inventories, are stated at the lower of cost or net realizable value, which approximates market value, and are expensed as used.

Property and Equipment

Property and equipment are initially recorded at cost or, when acquired as part of a business combination, at fair value at the date of acquisition. Depreciation is calculated on the straight line method over the estimated useful lives of the

assets. Upon retirement or disposal of assets, the asset and accumulated depreciation accounts are adjusted accordingly, and any gain or loss is reflected in earnings or losses of the respective period. Maintenance costs and repairs are expensed as incurred; significant renewals and betterments are capitalized.

Assets held under capital leases are classified as property and equipment and amortized using the straight line method over the shorter of the useful lives or the lease terms, and the related obligations are recorded as debt. Amortization of property and equipment

F-8

Table of Contents

TEXAS HEALTH VENTURES GROUP, L.L.C. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS- continued

held under capital leases and leasehold improvements is included in depreciation and amortization expense in the consolidated statements of income.

THVG records operating lease expense on a straight-line basis unless another systematic and rational allocation is more representative of the time pattern in which the leased property is physically employed. THVG amortizes leasehold improvements, including amounts funded by landlord incentives or allowances, for which the related deferred rent is amortized as a reduction of lease expense, over the shorter of their economic lives or the lease term.

Investments in Unconsolidated Affiliates

Investments in unconsolidated affiliates in which THVG exerts significant influence, but has less than a controlling ownership, are accounted for under the equity method. THVG exerts significant influence in the operations of its unconsolidated affiliates through representation on the governing bodies of the investees and additionally, with respect to the Facilities, through contracts to manage the operations of the investees.

Equity in earnings of unconsolidated affiliates consists of THVG's share of the profits and losses generated from its noncontrolling equity investments. Because these operations are central to THVG's business strategy, equity in earnings of unconsolidated affiliates is classified as a component of operating income in the accompanying consolidated statements of income.

Goodwill

Goodwill represents the excess purchase price over the estimated fair value of net identifiable assets acquired and liabilities assumed from purchased businesses. Goodwill is not amortized but is instead tested for impairment annually, and between annual tests if an event occurs or circumstances change that would more likely than not reduce the fair value of the reporting unit below its carrying amount. The qualitative assessment includes a determination by management based on qualitative factors as to whether it is more likely than not that the fair value of the reporting unit is less than its carrying amount. If management determines that based on these factors it is more likely than not that the fair value of the reporting unit is less than its carrying value, the Company assesses its goodwill based on the two-step fair value approach.

To measure the amount of an impairment loss, a two-step method is used. In the first step, THVG compares the fair value of each reporting unit to its carrying value. If the fair value of the reporting unit exceeds the carrying value of the net assets assigned to that unit, goodwill is not impaired and THVG is not required to perform further testing. If the carrying value of the net assets assigned to the reporting unit exceeds the fair value of the reporting unit, then THVG must perform the second step of the impairment test in order to determine the implied fair value of the reporting unit's goodwill. If the carrying value of a reporting unit's goodwill exceeds its implied fair value, then THVG records an impairment loss equal to the difference. Any impairment would be recognized by a charge to income from operations and a reduction in the carrying value of goodwill.

We estimate the fair value of the reporting unit using the market and income approaches. Goodwill is required to be reported at the reporting unit level and we have concluded that THVG represents a single reporting unit. To determine the fair value of the reporting unit, we use the income approach (present value of discounted cash flows) with further corroboration from the market approach (evaluation of market multiples and/or data from third-party valuation specialists). We apply judgment in determining the fair value of our reporting unit which is dependent on significant assumptions and estimates regarding expected future cash flows, terminal value, changes in working capital requirements, and discount rates. The factor most sensitive to change with respect to THVG's discounted cash flow analyses is the estimated future cash flows of the reporting unit which is, in turn, sensitive to THVG's estimates of

future revenue growth and margins for these businesses. If actual revenue growth and/or margins are lower than estimated, the impairment test results could differ. Although we believe that our estimates are reasonable and consistent with market participant assumptions, actual results could differ from these estimates.

A qualitative analysis of the goodwill balance was performed in March of 2018 and no such impairments were identified. A quantitative analysis was performed in March 2017 and 2016 and no such impairments were identified.

Impairment of Long-Lived Assets

Long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset, or related groups of assets, may not be fully recoverable from estimated future cash flows. In the event of impairment, measurement of the amount of impairment may be based on appraisal, fair values of similar assets, or estimates of future undiscounted cash flows resulting from use and ultimate disposition of the asset. No such impairment was identified in 2018 or 2017. In June of 2016, THVG determined that Lewisville Surgicare Partners, Ltd. (Lewisville), Baylor Surgicare at Ennis, L.L.C.

F-9

Table of Contents**TEXAS HEALTH VENTURES GROUP, L.L.C. AND SUBSIDIARIES**

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS- continued

(Ennis), and Arlington Surgicare Partners, Ltd. (Arlington) would be closing due to poor operational results and expected negative cash flows. This represented a significant adverse change in the manner in which the facilities' assets were being used, thus triggering the need to test the facilities' long-lived assets for impairment. The assets consisted of office and medical equipment, furniture, and building leases. Management determined the fair value of the furniture and equipment is greater than the total carrying value, using Level 2 inputs, and as such no impairment was recorded for those asset groups. Based on the inability to locate a sublessee to occupy the properties, which are specialized to perform outpatient surgery, and Level 3 inputs, THVG concluded that the three facility building leases, which were classified as capital leases, were impaired and an impairment charge was recorded in June 2016 for approximately \$5,667,000.

Fair Value of Financial Instruments

The fair value of a financial instrument is the amount at which the instrument could be exchanged in an orderly transaction between market participants to sell the asset or transfer the liability. The Company uses fair value measurements based on quoted prices in active markets for identical assets or liabilities (Level 1), significant other observable inputs (Level 2) or unobservable inputs (Level 3), depending on the nature of the item being valued. The Company does not have financial assets or liabilities measured at fair value on a recurring basis at June 30, 2018 and 2017. The carrying amounts of cash, restricted cash, funds due from United Surgical Partners, Inc., accounts receivable, and accounts payable approximate fair value because of the short maturity of these instruments.

The fair value of the Company's long-term debt is determined by Level 2 inputs which are an estimation of the discounted future cash flows of the debt at rates currently quoted or offered to a comparable company for similar debt instruments of comparable maturities by its lenders. At June 30, 2018, the aggregate carrying amount and estimated fair value of long-term debt is approximately \$54,482,000 and \$47,865,000, respectively. At June 30, 2017, the aggregate carrying amount and estimated fair value of long-term debt was approximately \$61,864,000 and \$58,637,000, respectively.

Revenue Recognition

THVG has agreements with third-party payors that provide for payments to THVG at amounts different from its established rates. Payment arrangements include prospectively determined rates per discharge, reimbursed costs, discounted charges, and per diem payments. Net patient service revenue is reported at the estimated net realizable amount from patients, third-party payors, and others for services rendered, including estimated contractual adjustments under reimbursement agreements with third party payors. Contractual adjustments are accrued on an estimated basis in the period the related services are rendered and adjusted in future periods as final settlements are determined. These contractual adjustments are related to the Medicare and Medicaid programs, as well as commercial and managed care contracts. All subsidiaries of THVG, except for Sunnyvale, assess the ability of each patient to pay prior to the performance of the procedure; therefore the estimate of uncollectable amounts related to these entities is presented within the provision for doubtful accounts within the operating expenses section of the income statement. Sunnyvale does not assess ability to pay prior to the performance of the procedure, and as such the related estimate of uncollectable amounts for this entity is presented within the provision for doubtful accounts as a component of total revenues.

Net patient service revenue from the Medicare and Medicaid programs accounted for approximately 19%, 17%, and 15% of total net patient service revenue in 2018, 2017, and 2016, respectively.

Net patient service revenue from commercial and managed care contracts accounted for approximately 75%, 77%, and 78% of net patient service revenue in 2018, 2017, and 2016, respectively.

Net patient service revenue from private payors accounted for approximately 6%, 6%, and 7% of total net patient service revenue in 2018, 2017, and 2016, respectively. For facilities licensed as hospitals, federal regulations require the submission of annual cost reports covering medical costs and expenses associated with services provided to program beneficiaries. Medicare and Medicaid cost report settlements are estimated in the period services are provided to beneficiaries.

Laws and regulations governing the Medicare and Medicaid programs are extremely complex and subject to interpretation. As a result, there is a reasonable possibility that recorded estimates with respect to the ten THVG facilities licensed as hospitals may change as interpretations are clarified. These initial estimates are revised as needed until final cost reports are settled.

The Company provides charity care to patients who are financially unable to pay for the health care services they receive. The determination of charity care is generally made at the time of admission, or shortly thereafter. However, events after discharge could change the ability of patients to pay. The discount amount is generally based on household income compared to the Federal

F-10

Table of Contents

TEXAS HEALTH VENTURES GROUP, L.L.C. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS- continued

Poverty Limit for the year. The Company's charity policy is intended to satisfy the requirements in Section 501(r) of the Internal Revenue Code of 1986, as amended, regarding financial assistance and emergency medical care policies, limitations on charges to persons eligible for financial assistance, and reasonable billing and collection efforts. The Company's policy is not to pursue collection of amounts determined to qualify as charity care; therefore, the Company does not report these amounts in net patient care revenues before provision of doubtful accounts or in provision for doubtful accounts.

The Company's estimated costs (based on the selected operating expenses, which include allocated personnel costs, supplies, other operating expenses, and management fee) of caring for charity care patients for the years ended June 30, 2018, 2017, and 2016, was approximately \$7,800,000, \$6,100,000, and \$3,400,000, respectively.

Income Taxes

No amounts for federal income taxes have been reflected in the accompanying consolidated financial statements because the federal tax effects of THVG's activities accrue to the individual members.

The Texas franchise tax applies to all THVG entities and is reflected in the accompanying consolidated statements of income. The tax is calculated on a margin base and is therefore reflected in THVG's consolidated statements of income for the years ended June 30, 2018, 2017, and 2016 as income tax.

THVG follows the provisions of Accounting Standards Codification (ASC) 740 "Income Taxes" which prescribes a single model to address uncertainty in tax positions and clarifies the accounting for income taxes by prescribing the minimum recognition threshold a tax position is required to meet before being recognized in the financial statements.

As of June 30, 2018 and 2017, THVG had no gross unrecognized tax benefits. THVG files a partnership income tax return in the U.S. federal jurisdiction and a franchise tax return in the state of Texas. THVG is no longer subject to U.S. federal income tax examination for years prior to 2014 and no longer subject to state and local income tax examination for years prior to 2013. THVG has identified Texas as a "major" state taxing jurisdiction. THVG does not expect or anticipate a significant change over the next twelve months in the unrecognized tax benefits.

Commitments and Contingencies

Liabilities for loss contingencies arising from claims, assessments, litigation, fines and penalties, and other sources are recorded when it is probable that a liability has been incurred and the amount can be reasonably estimated.

Reclassifications

Certain amounts related to the prior year have been reclassified to conform to the current year presentation.

Recently Issued Accounting Pronouncements

In February 2016, FASB issued ASU 2016-02, "*Leases (Topic 842)*" ("ASU 2016-02"), which affects any entity that enters into a lease (as that term is defined in ASU 2016-02), with some specified scope exceptions. The main difference between the guidance in ASU 2016-02 and current GAAP is the recognition of lease assets and lease liabilities by lessees for those leases classified as operating leases under current GAAP. Recognition of these assets and liabilities will have a material impact to our consolidated balance sheet upon adoption. In transition, lessees and lessors are required to recognize and measure leases at the beginning of the earliest period presented using a modified retrospective approach, which includes a number of optional practical expedients. The Company is currently evaluating the potential impact of this guidance, which will be effective for fiscal years beginning after December 15, 2018.

In May 2014, August 2015, April 2016, May 2016, December 2016, and February 2017, FASB issued ASU 2014-09, “*Revenue from Contracts with Customers (Topic 606)*”; ASU 2015-14, “*Revenue from Contracts with Customers*”; ASU 2016-10, “*Identifying Performance Obligations and Licensing*”; ASU 2016-12, “*Revenue from Contracts with Customers: Narrow-Scope Improvements and Practical Expedients*”; ASU 2016-20, “*Technical Corrections and Improvements to Topic 606, Revenue from Contracts with Customers*”; and ASU 2017-05, “*Clarifying the Scope of Asset Derecognition Guidance and Accounting for Partial Sales of Nonfinancial Assets*”, respectively, which supersedes the revenue recognition requirements in Accounting Standards Codification (ASC) 605, “*Revenue Recognition*.” These ASU’s address when an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in

F-11

Table of Contents**TEXAS HEALTH VENTURES GROUP, L.L.C. AND SUBSIDIARIES**

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS- continued

exchange for those goods or services. The Company is currently evaluating the potential impact of this guidance, which is effective July 1, 2018.

In August 2016, FASB issued ASU 2016-15, “*Classification of Certain Cash Receipts and Cash Payments.*” This ASU provides cash flow statement classification guidance. These ASU’s are effective for annual reporting periods beginning after December 15, 2017, and may impact the classification of certain items on the statement of income but are not expected to have a material impact on total operating income.

In November 2016, FASB issued ASU 2016-18, “*Restricted Cash: a Consensus of the FASB Emerging Issues Task Force.*” This ASU requires a statement of cash flows to explain the change during the period in the total of cash, cash equivalents, and amounts generally described as restricted cash or restricted cash equivalents. The provisions of ASU 2016-18 are effective for fiscal years beginning after December 15, 2017, and interim periods within those year for public business entities, and December 15, 2018, and interim periods thereafter for all other entities. The Company is currently evaluating the impact of this ASU and believes it will have an immaterial impact on presentation and disclosure.

In January 2017, FASB issued ASU 2017-01, “*Clarifying the Definition of a Business.*” By clarifying the definition of a business, the amendments of this ASU affect all companies and other reporting organizations that must determine whether they have acquired or sold a business. The provisions of ASU 2017-01 are effective for fiscal years beginning after December 15, 2017, and interim periods within those years for public business entities, and December 15, 2018, and interim periods within those years for all other entities. The Company is currently evaluating the impact of this ASU.

In January 2017, FASB issued ASU 2017-04, “*Simplifying the Test for Goodwill Impairment.*” This ASU eliminates Step 2 from the goodwill impairment test. Step 2 measures a goodwill impairment loss by comparing the implied fair value of a reporting unit’s goodwill with the carrying amount of that goodwill. The provisions of ASU 2017-04 are effective for fiscal years beginning after December 15, 2019, and interim periods within those years for public business entities, and December 15, 2021, and interim periods within those years for all other entities. The Company is currently evaluating the impact of this ASU.

2.PROPERTY AND EQUIPMENT

At June 30, 2018 and 2017, property and equipment and related accumulated depreciation and amortization consisted of the following (in thousands):

	Estimated Useful Lives	2018	2017
Land	—	\$1,719	\$1,568
Buildings and leasehold improvements	5-25 years	258,161	193,885
Equipment	3-15 years	203,672	166,194
Furniture and fixtures	5-15 years	10,547	8,495
Construction in progress		6,397	1,367
		480,496	371,509
Less accumulated depreciation		(242,442)	(211,829)
Net property and equipment		\$238,054	\$159,680

At June 30, 2018 and 2017, assets recorded under capital lease arrangements included in property and equipment consisted of the following (in thousands):

Edgar Filing: TENET HEALTHCARE CORP - Form 10-K

	2018	2017
Buildings	\$ 143,139	\$ 112,401
Equipment and furniture	2,060	218
	145,199	112,619
Less accumulated depreciation	(56,162)	(52,629)
Net property and equipment under capital leases	\$ 89,037	\$ 59,990

Fusionetics, LLC	Fusionetics	Frisco	15.8	15.8	—

1. List excludes holding companies, which are wholly-owned by the Company and hold the Company's investments in the Facilities.

2. Partnership that has investment in North Central Surgical Center, Baylor Surgicare, and Baylor Medical Center at Uptown.

3. These entities are not surgical facilities and do not have ownership in any surgical facilities.

On August 2, 2017, Texas Health Venture Texas Spine, LLC, a wholly-owned subsidiary of THVG, completed its acquisition of Texas Spine and Joint Hospital, LLC (Tyler), resulting in a 50.25% controlling interest. The consideration of \$40,900,000 and \$40,700,000 was paid to the sellers by BSWH and USP, respectively. From the date of contribution to June 30, 2018, THVG recognized approximately \$98,600,000 of total revenues and approximately \$5,800,000 of net income from Tyler.

On February 1, 2017, BSWH and USP contributed their respective ownership interests in Centennial ASC, LLC (Centennial) to THVG, resulting in THVG owning a 50.42% controlling interest. The value of the contributions from BSWH and USP was approximately \$6,799,000 and \$6,772,000, respectively. From the date of contribution to June 30, 2017, THVG recognized approximately \$4,400,000 of total revenues and approximately \$1,000,000 of net income from Centennial. For the twelve months ended June 30, 2018, THVG recognized approximately \$10,300,000 of total revenues and approximately \$2,300,000 of net income from Centennial.

Table of Contents**TEXAS HEALTH VENTURES GROUP, L.L.C. AND SUBSIDIARIES**

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS- continued

The following table summarizes the recorded values of the assets and liabilities as of the respective contribution date (in thousands):

	Tyler Hospital	Centennial
Cash and cash equivalents	\$925	\$—
Current assets	15,703	3,690
Long-term assets	18,276	1,079
Goodwill	111,831	19,290
Total assets acquired	146,735	24,059
Current liabilities	10,127	585
Long-term liabilities	4,378	—
Total liabilities assumed	14,505	585
Noncontrolling interests	50,610	9,903
Net assets acquired	\$81,620	\$13,571

The assets and liabilities were accounted for at their respective fair values at the date of acquisition. Noncontrolling interests (NCI) are valued upon acquisition with a discount to reflect lack of control and marketability by the NCI holders. These fair value measurements are determined by Level 2 inputs. The resulting goodwill is attributed to expected synergies from combining operations. The results of these contributed facilities are included in THVG's consolidated financial statements from the respective dates of contribution.

The following table presents the unaudited pro forma results as if THVG had acquired Tyler and Centennial on July 1, 2016 (in thousands). The pro forma results are not necessarily indicative of the results of operations that would have occurred if the acquisitions were completed on the dates indicated, nor is indicative of the future operating results of THVG.

	Year Ended June 30, 2018	Year Ended June 30, 2017	Year Ended June 30, 2016
Total revenues	\$1,178,160	\$1,158,708	\$1,002,041
Net income attributable to THVG	\$143,420	\$133,111	\$122,178

4. NONCONTROLLING INTERESTS

The Company controls and therefore consolidates the results of 32 of its 34 facilities at June 30, 2018. Similar to its investments in unconsolidated affiliates, the Company regularly engages in the purchase and sale of equity interests with respect to its consolidated subsidiaries that do not result in a change of control. These transactions are accounted for as equity transactions, as they are undertaken among the Company, its consolidated subsidiaries, and noncontrolling interests, and their cash flow effects are classified within financing activities.

During the fiscal year ended June 30, 2018, the Company purchased and sold equity interests in various consolidated subsidiaries in the amounts of approximately \$8,215,000 and \$9,609,000, respectively. During the fiscal year ended June 30, 2017, the Company purchased and sold equity interests in various consolidated subsidiaries in the amounts of approximately \$5,447,000 and \$18,445,000, respectively. During the fiscal year ended June 30, 2016, the Company purchased and sold equity interests in various consolidated subsidiaries in the amounts of approximately \$3,861,000 and \$2,272,000, respectively. The basis difference between the Company's carrying amount and the proceeds received or paid in each transaction is recorded as an adjustment to the Company's equity. The impact of these transactions is summarized as follows (in thousands):

Table of Contents

TEXAS HEALTH VENTURES GROUP, L.L.C. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS- continued

	Year Ended June 30, 2018	Year Ended June 30, 2017	Year Ended June 30, 2016
Net income attributable to the Company	\$ 145,037	\$ 127,906	\$ 114,241
Net transfers to the noncontrolling interests:			
Increase/(Decrease) in the Company's equity for gains/losses related to purchases of subsidiaries' equity interests	1,350	(1,438)	(801)
Increase/(Decrease) in the Company's equity for gains/(losses) related to sales of subsidiaries' equity interests	1,269	904	(2,229)
Net transfers to noncontrolling interests	2,619	(534)	(3,030)
Change in equity from net income attributable to the Company and net transfers to noncontrolling interests	\$ 147,656	\$ 127,372	\$ 111,211

As further described in Note 1, upon the occurrence of various fundamental regulatory changes, the Company could be obligated, under the terms of its investees' partnership and operating agreements, to purchase some or all of the noncontrolling interests related to the Company's consolidated subsidiaries. As a result, these noncontrolling interests are not included as part of the Company's equity and are carried as noncontrolling interests-redeemable on the Company's consolidated balance sheets. The activity in noncontrolling interests-redeemable for the years ended June 30, 2018, 2017 and 2016 is summarized below (in thousands):

Balance, June 30, 2015	\$79,590
Net income attributable to noncontrolling interests	117,018
Distributions to noncontrolling interests	(109,768)
Purchases of noncontrolling interests	(3,961)
Sales of noncontrolling interests	3,186
Noncontrolling interests attributable to business acquisition	3,862
Balance, June 30, 2016	89,927
Net income attributable to noncontrolling interests	134,905
Distributions to noncontrolling interests	(137,373)
Purchases of noncontrolling interests	(3,631)
Sales of noncontrolling interests	15,415
Noncontrolling interests attributable to business acquisition	9,904
Balance, June 30, 2017	\$109,147
Net income attributable to noncontrolling interests	143,580
Distributions to noncontrolling interests	(138,245)
Purchases of noncontrolling interests	(2,512)
Sales of noncontrolling interests	9,836
Noncontrolling interests attributable to business acquisition	50,610
Balance, June 30, 2018	\$172,416

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS- continued

5. GOODWILL

The following is a summary of changes in the carrying amount of goodwill for the years ended June 30, 2018 and 2017 (in thousands):

Balance, June 30, 2016	\$301,019
------------------------	-----------

Additions:

Centennial ASC	19,290
----------------	--------

Adjustments:

Acquisition of Precision Surgery Center (532)	
--	--

Balance, June 30, 2017	319,777
------------------------	---------

Additions:

Tyler Spine and Joint	111,831
-----------------------	---------

Balance, June 30, 2018	\$431,608
------------------------	-----------

Goodwill additions resulting from business combinations are recorded and assigned to the parent and noncontrolling interests.

6. LONG-TERM OBLIGATIONS

At June 30, 2018 and 2017, long-term obligations consisted of the following (in thousands):

	2018	2017
Capital lease obligations (Note 7)	\$139,535	\$116,415
Notes payable to financial institutions	54,482	61,864
Total long-term obligations	194,017	178,279
Less current portion	(19,789)	(20,809)
Long-term obligations, less current portion	\$174,228	\$157,470

The aggregate maturities of notes payable for each of the five years subsequent to June 30, 2018 and thereafter are as follows (in thousands):

2019	\$12,032
2020	13,893
2021	9,586
2022	8,823
2023	6,291
Thereafter	3,857
Total long-term obligations	\$54,482

The Facilities have notes payable to financial institutions which mature at various dates through 2025 and accrue interest at fixed and variable rates ranging from 2% to 8%. Each note is collateralized by certain assets of the respective facility.

Capital lease obligations are collateralized by underlying real estate or equipment and have interest rates ranging from 2% to 13%.

7. LEASES

The Facilities lease various office equipment, medical equipment, and office space under a number of operating lease agreements, which expire at various times through the year 2033. Such leases do not involve contingent rentals, nor do they contain significant renewal or escalation clauses. Office leases generally require the Facilities to pay all

executory costs (such as property taxes, maintenance, and insurance).

F-17

Table of Contents**TEXAS HEALTH VENTURES GROUP, L.L.C. AND SUBSIDIARIES**

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS- continued

Minimum future payments under noncancelable leases with remaining terms in excess of one year as of June 30, 2018 are as follows (in thousands):

	Capital Leases	Operating Leases
Year ending June 30:		
2019	\$20,648	\$39,858
2020	20,298	38,123
2021	20,443	35,855
2022	19,800	35,043
2023	19,321	32,901
Thereafter	126,938	193,486
Total minimum lease payments	227,448	\$375,266
Amount representing interest	(87,913)	
Total principal payments	\$139,535	

Total rent expense under operating leases was approximately \$48,190,000, \$39,445,000, and \$34,522,000 for the years ended June 30, 2018, 2017, and 2016, respectively, and is included in other operating expenses in the accompanying consolidated statements of income.

8. RELATED-PARTY TRANSACTIONS

THVG operates the Facilities under management and royalty contracts, and THVG in turn is managed by BSWH and USP, resulting in THVG incurring management and royalty fee expense payable to BSWH and USP in amounts equal to the management and royalty fee income THVG receives from the Facilities. THVG's management and royalty fee income from the facilities it consolidates for financial reporting purposes eliminates in consolidation with the facilities' expense and therefore is not included in THVG's consolidated revenues. THVG's management and royalty fee income from facilities which are not consolidated was \$600,000 for years ended June 30, 2018, 2017, and 2016, and is included in other income in the accompanying consolidated statements of income.

The management and royalty fee expense to BSWH and USP was approximately \$41,973,000, \$38,530,000, and \$35,432,000 for the years ended June 30, 2018, 2017, and 2016, respectively, and is reflected in operating expenses in THVG's consolidated statements of income. Of the total, 64.3% and 1.7% represent management fees payable to USP and BSWH, respectively, and 34% represents royalty fees payable to BSWH.

Under the management and royalty agreements, the Facilities pay THVG an amount ranging from 5.0% to 7.0% of their net patient service revenue less provision for doubtful accounts annually, subject, in some cases, to an annual cap.

In addition, a subsidiary of USPI frequently pays bills on behalf of THVG and has custody of substantially all of THVG's excess cash, paying THVG and the Facilities interest income on the net balance at prevailing market rates. Amounts held by USPI on behalf of THVG and the Facilities, shown in Funds due from United Surgical Partners, Inc. on the accompanying consolidated balance sheets, totaled approximately \$114,408,000 and \$93,848,000 at June 30, 2018 and 2017, respectively. Accrued expenses that USPI paid on behalf of THVG, shown in Accounts payable on the accompanying consolidated balance sheets, totaled approximately \$16,014,000 and \$11,568,000 at June 30, 2018 and 2017, respectively. The interest income amounted to approximately \$334,000, \$233,000, and \$150,000 for the years ended June 30, 2018, 2017, and 2016, respectively.

9. COMMITMENTS AND CONTINGENCIES

Financial Guarantees

THVG guarantees portions of the indebtedness of its investees to third-parties, which could potentially require THVG to make maximum aggregate payments totaling approximately \$3,192,000. Of the total, approximately \$1,800,000 relates to the obligations of a consolidated subsidiary whose capital lease obligation is included in THVG's consolidated balance sheets and related disclosures, and approximately \$1,392,000 relates to obligations of two consolidated subsidiaries whose operating lease obligations are not included in THVG's consolidated balance sheets.

F-18

Table of Contents

TEXAS HEALTH VENTURES GROUP, L.L.C. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS- continued

These arrangements (a) consist of guarantees of real estate and equipment financing, (b) are collateralized by all, or a portion of, the investees' assets, (c) require payments by THVG in the event of a default by the investee primarily obligated under the financing, (d) expire as the underlying debt matures at various dates through 2021, or earlier if certain performance targets are met, and (e) provide no recourse for THVG to recover any amounts from third-parties. The fair value of the guarantee liability was not material to the consolidated financial statements and, therefore, no amounts were recorded at June 30, 2018 related to these guarantees. When THVG incurs guarantee obligations that are disproportionately greater than the guarantees provided by the investee's other owners, THVG charges the investee a fair market value fee based on the value of the contingent liability THVG is assuming.

Litigation and Professional Liability Claims

In their normal course of business, the Facilities are subject to claims and lawsuits relating to patient treatment. THVG believes that its liability for damages resulting from such claims and lawsuits is adequately covered by insurance or is adequately provided for in its consolidated financial statements. USPI, on behalf of THVG and each of the Facilities, maintains professional liability insurance that provides coverage on a claims-made basis of \$1,000,000 per incident and \$15,000,000 in annual aggregate amount with retroactive provisions upon policy renewal. Certain of THVG's insurance policies have deductibles and contingent premium arrangements. THVG believes that the expense recorded through June 30, 2018, which was estimated based on historical claims, adequately provides for its exposure under these arrangements. Additionally, from time to time, THVG may be named as a party to other legal claims and proceedings in the ordinary course of business. THVG is not aware of any such claims or proceedings that have more than a remote chance of having a material adverse impact on THVG.

10. SUBSEQUENT EVENTS

THVG regularly engages in exploratory discussions or enters into letters of intent with various entities regarding possible joint ventures, development, or other transactions. These possible joint ventures, developments of new facilities, or other transactions are in various stages of negotiation.

THVG has performed an evaluation of subsequent events through December 20, 2018, which is the date the consolidated financial statements were available to be issued.
