WASHINGTON TRUST BANCORP, INC. AND SUBSIDIARIES
CONDENSED NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

(1) General Information

Washington Trust Bancorp, Inc. (the “Bancorp”) is a publicly-owned registered bank holding company and financial holding company. The Bancorp owns all of the outstanding common stock of The Washington Trust Company (the “Bank”), a Rhode Island chartered commercial bank founded in 1800. Through its subsidiaries, the Bancorp offers a complete product line of financial services including commercial, residential and consumer lending, retail and commercial deposit products, and wealth management services through its offices in Rhode Island, eastern Massachusetts and Connecticut.

The consolidated financial statements include the accounts of the Bancorp and its subsidiaries (collectively, the “Corporation” or “Washington Trust”). All significant intercompany transactions have been eliminated.

The accounting and reporting policies of the Corporation conform to accounting principles generally accepted in the United States of America (“GAAP”) and to general practices of the banking industry. In preparing the financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the balance sheet and revenues and expenses for the period. Actual results could differ from those estimates. Material estimates that are particularly susceptible to change are the determination of the allowance for loan losses and the review of goodwill, other intangible assets and investments for impairment. The current economic environment has increased the degree of uncertainty inherent in such estimates and assumptions.

The unaudited consolidated financial statements of the Corporation presented herein have been prepared pursuant to the rules of the Securities and Exchange Commission (“SEC”) for quarterly reports on Form 10-Q and do not include all of the information and note disclosures required by GAAP. In the opinion of management, all adjustments (consisting of normal recurring adjustments) and disclosures considered necessary for the fair presentation of the accompanying consolidated financial statements have been included. Interim results are not necessarily reflective of the results of the entire year. The accompanying unaudited consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto included in the Annual Report on Form 10-K for the fiscal year ended December 31, 2012.

(2) Recently Issued Accounting Pronouncements

Balance Sheet - Topic 210

Accounting Standards Update No. 2011-11, “Disclosures about Offsetting Assets and Liabilities” (“ASU 2011-11”), was issued in December 2011 and was intended to enhance current disclosure requirements on offsetting financial assets and liabilities. The requirements of ASU 2011-11 enable users to compare balance sheets prepared under U.S. GAAP and International Financial Reporting Standards (“IFRS”), which are subject to different offsetting models. The requirements affect all entities that have financial instruments that are either offset in the balance sheet or subject to an enforceable master netting arrangement or similar agreement. Accounting Standards Update No. 2013-01, “Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities” (“ASU 2013-01”), was issued in January 2013 to address implementation issues about the scope of ASU 2011-11. Both ASU 2011-11 and ASU 2013-01 were effective for annual reporting periods beginning on or after January 1, 2013, and interim periods within those annual periods. The required disclosures were effective retrospectively for all comparative periods presented. The adoption of ASU 2011-11 and ASU 2013-01 did not have a material impact on the Corporation’s consolidated financial statements.

Comprehensive Income - Topic 220

Accounting Standards Update No. 2013-02, “Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income” (“ASU 2013-02”) was issued in February 2013 and requires additional disclosure of the effects of reclassifications out of accumulated other comprehensive income (“AOCI”) in a single location, either on the face of

the financial statement that reports net income or in the notes to the financial statements. ASU 2013-02 does not change the current requirements and carries forward the existing requirements that reclassifications out of AOCI be separately presented for each component of other comprehensive income. For items reclassified out of AOCI and into net income in their entirety, the effect of the reclassification on each affected net income line must be disclosed. For AOCI reclassification items that are not reclassified in their entirety into net income, a cross reference to other required disclosures is required. The amendments were effective prospectively for reporting periods beginning after December 15, 2012. The adoption of this standard did not have a material impact on the Corporation's consolidated financial statements, see Note 15.

(3)Cash and Due from Banks

The Bank maintains certain average reserve balances to meet the requirements of the Board of Governors of the Federal Reserve System ("FRB"). Some or all of these reserve requirements may be satisfied with vault cash. Reserve balances amounted to

WASHINGTON TRUST BANCORP, INC. AND SUBSIDIARIES
 CONDENSED NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

\$6.7 million at June 30, 2013 and \$5.5 million at December 31, 2012 and were included in cash and due from banks in the Consolidated Balance Sheets.

As of June 30, 2013 and December 31, 2012, cash and due from banks included interest-bearing deposits in other banks of \$31.1 million and \$32.2 million, respectively.

WASHINGTON TRUST BANCORP, INC. AND SUBSIDIARIES
 CONDENSED NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

At June 30, 2013 and December 31, 2012, securities available for sale and held to maturity with a fair value of \$333.2 million and \$386.5 million, respectively, were pledged as collateral for Federal Home Loan Bank of Boston ("FHLBB") borrowings and letters of credit, potential borrowings with the FRB, certain public deposits and for other purposes.

The schedule of maturities of debt securities available for sale and held to maturity as of June 30, 2013 is presented below. Mortgage backed securities are included based on weighted average maturities, adjusted for anticipated prepayments. All other debt securities are included based on contractual maturities. Actual maturities may differ from amounts presented because certain issuers have the right to call or prepay obligations with or without call or prepayment penalties. Yields on tax exempt obligations are not computed on a tax equivalent basis.

Weighted average yield	2.40	% 2.27	% 2.11	% 0.80	% 2.23
Fair value	\$8,982	\$17,788	\$5,833	\$1,159	\$33,762

Included in the securities were debt securities with an amortized cost balance of \$86.4 million and a fair value of \$82.1 million that are callable at the discretion of the issuers. Final maturities of the callable securities range from two to twenty-four years, with call features ranging from one month to four years.

Other-Than-Temporary Impairment Assessment

The Corporation assesses whether the decline in fair value of investment securities is other-than-temporary on a regular basis. Unrealized losses on debt securities may occur from current market conditions, increases in interest rates

since the time of purchase, a structural change in an investment, volatility of earnings of a specific issuer, or deterioration in credit quality of the issuer. Management evaluates impairments in value both qualitatively and quantitatively to assess whether they are other-than-temporary.

WASHINGTON TRUST BANCORP, INC. AND SUBSIDIARIES
 CONDENSED NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The following tables summarize temporarily impaired securities, segregated by length of time the securities have been in a continuous unrealized loss position:

(Dollars in thousands)	Less than 12 Months			12 Months or Longer			Total		
	#	Fair Value	Unrealized Losses	#	Fair Value	Unrealized Losses	#	Fair Value	Unrealized Losses
June 30, 2013

(Dollars in thousands)	Less than 12 Months			12 Months or Longer			Total		
	#	Fair Value	Unrealized Losses	#	Fair Value	Unrealized Losses	#	Fair Value	Unrealized Losses
December 31, 2012									
Trust preferred securities:									
Individual name issuers	—	\$—	\$—	11	\$24,751	(\$5,926)	11	\$24,751	(\$5,926)
Collateralized debt obligations	—	—	—	2	843	(3,193)	2	843	(3,193)
Total temporarily impaired securities	—	\$—	\$—	13	\$25,594	(\$9,119)	13	\$25,594	(\$9,119)

Further deterioration in credit quality of the underlying issuers of the securities, further deterioration in the condition of the financial services industry, a continuation or worsening of the current economic downturn, or additional declines in real estate values, among other things, may further affect the fair value of these securities and increase the potential that certain unrealized losses be designated as other-than-temporary in future periods, and the Corporation may incur additional write-downs.

Trust Preferred Debt Securities of Individual Name Issuers

Included in debt securities in an unrealized loss position at June 30, 2013 and December 31, 2012 were 11 trust preferred security holdings issued by seven individual companies in the financial services industry, specifically, the banking sector. Management believes the decline in fair value of these trust preferred securities primarily reflects investor concerns about global economic growth and how it will affect the recent and potential future losses in the financial services industry. These concerns resulted in increased risk premiums for securities in this sector. Based on the information available through the filing date of this report, all individual name trust preferred debt securities held in our portfolio continue to accrue and make payments as expected with no payment deferrals or defaults on the part of the issuers. As of June 30, 2013, trust preferred debt securities with an amortized cost of \$11.9 million and unrealized losses of \$2.2 million were rated below investment grade by Standard & Poors, Inc. ("S&P"). Management reviewed the collectibility of these securities taking into consideration such factors as the financial condition of the issuers, reported regulatory capital ratios of the issuers, credit ratings including ratings in effect as of the reporting period date as well as credit rating changes between the reporting period date and the filing date of this report and other information. We noted no additional downgrades to below investment grade between the reporting period date and the filing date of this report. Based on these analyses, management concluded that it expects to recover the entire amortized cost basis of these securities. Furthermore, Washington Trust does not intend to sell these securities and its

is not more likely than not that Washington Trust will be required to sell these securities before recovery of their cost basis, which may be at maturity. Therefore, management does not consider these investments to be other-than-temporarily impaired at June 30, 2013.

Trust Preferred Debt Securities in the Form of Collateralized Debt Obligations (“CDO”)

Washington Trust has pooled trust preferred holdings in the form of collateralized debt obligations. The pooled trust preferred holdings consist of trust preferred obligations of banking industry companies and, to a lesser extent, insurance industry companies.

Valuations of pooled trust preferred holdings is dependent in part on cash flows from underlying issuers. Unexpected cash flow disruptions could have an adverse impact on the fair value and performance of pooled trust preferred securities. Management believes the unrealized losses primarily reflect investor concerns about global economic growth and how it will affect the recent and potential future losses in the financial services industry and the possibility of further incremental deferrals of or defaults on

WASHINGTON TRUST BANCORP, INC. AND SUBSIDIARIES
 CONDENSED NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

interest payments on trust preferred debentures by financial institutions participating in these pools. These concerns have resulted in a substantial decrease in market liquidity and increased risk premiums for securities in this sector. Credit spreads for issuers in this sector have remained wide during recent months, causing prices to remain at low levels.

The following table summarizes Washington Trust's pooled trust preferred holdings:

Deal Name	June 30, 2013			December 31, 2012		
	Amortized Cost (1)	Fair Value	Unrealized Losses	Amortized Cost (1)	Fair Value	Unrealized Losses
Tropic CDO 1, tranche A4L Preferred Term Securities [PreTSL] XXV, tranche C1	\$—	\$—	\$—	\$2,772	\$613	(\$2,159)
Totals	1,264	397	(867)	1,264	230	(1,034)
	\$1,264	\$397	(\$867)	\$4,036	\$843	(\$3,193)

(1) Net of other-than-temporary impairment losses recognized in earnings.

The carrying value of Washington Trust's investment in the Tropic CDO 1, tranche A4L ("Tropic") was zero at June 30, 2013, compared to \$2.8 million at December 31, 2012. This investment security had been classified in nonaccruing status with no interest recognition since 2009. In the first quarter of 2013, Washington Trust recognized an other-than-temporary impairment charge of \$2.8 million on the Tropic security due to an announcement of liquidation by the trustee. On March 22, 2013, the trustee for the Tropic security issued a notice that a liquidation of the CDO entity, Tropic CDO I, Ltd., would take place at the direction of holders of the CDO tranches that are senior to certain subordinate tranches, of which Washington Trust is a note holder. The estimated proceeds from the liquidation event are expected to be insufficient to satisfy the amount owed to the note holders of the CDO's subordinate tranches. The Corporation had recognized other-than-temporary losses amounting to \$2.1 million on this security in years prior to 2013; however, prior to the March 2013 announcement of the liquidation event, the expected future cash flows through the maturity of the CDO in the year 2033 were considered to be sufficient to recover the Corporation's remaining \$2.8 million amortized cost.

Washington Trust's investment in the PreTSL XXV, tranche C1 ("PreTSL") is subordinate to two senior tranche levels. This investment security has been on nonaccrual status and has been deferring interest payments since December 2008. The June 30, 2013 amortized cost was net of \$1.2 million of credit-related impairment losses previously recognized in earnings reflective of payment deferrals and credit deterioration of the underlying collateral. As of June 30, 2013, this security had unrealized losses of \$867 thousand and a below investment grade rating of "C" by Moody's. Through the filing date of this report, there have been no additional rating changes on this security. This credit rating status has been considered by management in its assessment of the impairment status of this security. Based on information available through the filing date of this report, there have been no additional adverse changes in deferral or default status of the underlying issuer institutions. Based on cash flow forecasts for this security, management expects to recover the remaining amortized cost of this security. Furthermore, Washington Trust does not intend to sell this security and it is not more likely than not that Washington Trust will be required to sell this security before recovery of its cost basis, which may be at maturity. Therefore, management does not consider the unrealized losses on this security to be other-than-temporary at June 30, 2013.

Credit-Related Impairment Losses Recognized on Debt Securities

The following table presents a roll forward of the balance of cumulative credit-related impairment losses recognized on debt securities for the periods indicated:

Periods ended June 30,	Three months		Six months	
	2013	2012	2013	2012
Balance at beginning of period	\$6,097	\$3,313	\$3,325	\$3,104

Credit-related impairment loss on debt securities for which an other-than-temporary impairment was not previously recognized	—	—	—	—
Additional increases to the amount of credit-related impairment loss on debt securities for which an other-than-temporary impairment was previously recognized	—	—	2,772	209
Balance at end of period	\$6,097	\$3,313	\$6,097	\$3,313

WASHINGTON TRUST BANCORP, INC. AND SUBSIDIARIES
 CONDENSED NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The anticipated cash flows expected to be collected from pooled trust preferred debt securities were discounted at the rate equal to the yield used to accrete the current and prospective beneficial interest for each security. Significant inputs included estimated cash flows and prospective defaults and recoveries. Estimated cash flows were generated based on the underlying seniority status and subordination structure of the pooled trust preferred debt tranche at the time of measurement. Prospective default and recovery estimates affecting projected cash flows were based on analysis of the underlying financial condition of individual issuers, and took into account capital adequacy, credit quality, lending concentrations, and other factors.

All cash flow estimates were based on the underlying security's tranche structure and contractual rate and maturity terms. The present value of the expected cash flows was compared to the current outstanding balance of the tranche to determine the ratio of the estimated present value of expected cash flows to the total current balance for the tranche. This ratio was then multiplied by the principal balance of Washington Trust's holding to determine the credit-related impairment loss. The estimates used in the determination of the present value of the expected cash flows are susceptible to changes in future periods, which could result in additional credit-related impairment losses.

(5)Loans

The following is a summary of loans:

(Dollars in thousands)

	June 30, 2013		December 31, 2012	
	Amount	%	Amount	%
Commercial:

Total consumer	325,995	14	323,903	14
Total loans (7)	\$2,384,980	100 %	\$2,294,003	100 %

Amortizing mortgages and lines of credit, primarily secured by income producing property. As of June 30, 2013 (1) and December 31, 2012, \$213.9 million and \$238.6 million, respectively, were pledged as collateral for FHLBB borrowings and letters of credit.

(2) Loans for construction of residential and commercial properties and for land development.

Loans to businesses and individuals, a substantial portion of which are fully or partially collateralized by real estate. As of June 30, 2013, \$48.1 million and \$24.9 million, respectively, were pledged as collateral for FHLBB (3) borrowings and letters of credit and were collateralized for the discount window at the Federal Reserve Bank. Comparable amounts for December 31, 2012 were \$51.8 million and \$29.5 million, respectively.

(4) As of June 30, 2013 and December 31, 2012, \$658.6 million and \$627.4 million, respectively, were pledged as collateral for FHLBB borrowings and letters of credit.

(5) As of June 30, 2013 and December 31, 2012, \$190.8 million and \$189.4 million, respectively, were pledged as collateral for FHLBB borrowings and letters of credit.

(6) Fixed-rate consumer installment loans.

(7)

Includes net unamortized loan origination costs of \$439 thousand and \$39 thousand, respectively, and net unamortized premiums on purchased loans of \$97 thousand and \$83 thousand, respectively, at June 30, 2013 and December 31, 2012.

WASHINGTON TRUST BANCORP, INC. AND SUBSIDIARIES
 CONDENSED NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Nonaccrual Loans

Loans, with the exception of certain well-secured loans that are in the process of collection, are placed on nonaccrual status and interest recognition is suspended when such loans are 90 days or more overdue with respect to principal and/or interest or sooner if considered appropriate by management. Well-secured loans are permitted to remain on accrual status provided that full collection of principal and interest is assured and the loan is in the process of collection. Loans are also placed on nonaccrual status when, in the opinion of management, full collection of principal and interest is doubtful. Interest previously accrued but not collected on such loans is reversed against current period income. Subsequent interest payments received on nonaccrual loans are applied to the outstanding principal balance of the loan or recognized as interest income depending on management's assessment of the ultimate collectability of the loan. Loans are removed from nonaccrual status when they have been current as to principal and interest for a period of time, the borrower has demonstrated an ability to comply with repayment terms, and when, in management's opinion, the loans are considered to be fully collectible.

The following is a summary of nonaccrual loans, segregated by class of loans, as of the dates indicated:

(Dollars in thousands)	Jun 30, 2013	Dec 31, 2012
Commercial:		
Mortgages	\$9,976	\$10,681
Construction and development	—	—
Other	1,400	4,412

 CONDENSED NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Impaired Loans

Impaired loans are loans for which it is probable that the Corporation will not be able to collect all amounts due according to the contractual terms of the loan agreements and loans restructured in a troubled debt restructuring. Impaired loans do not include large groups of smaller-balance homogeneous loans that are collectively evaluated for impairment, which consist of most residential mortgage loans and consumer loans.

The following is a summary of impaired loans, as of the dates indicated:

(Dollars in thousands)	Recorded Investment (1)		Unpaid Principal		Related Allowance	
	Jun 30, 2013	Dec 31, 2012	Jun 30, 2013	Dec 31, 2012	Jun 30, 2013	Dec 31, 2012

Total impaired loans	\$37,278	\$35,562	\$43,126	\$38,658	\$2,126	\$2,880

The recorded investment in impaired loans consists of unpaid principal balance, net of charge-offs, interest payments received applied to principal and unamortized deferred loan origination fees and costs. For impaired (1) accruing loans (troubled debt restructurings for which management has concluded that the collectibility of the loan is not in doubt), the recorded investment also includes accrued interest.

At June 30, 2013, there were no significant commitments to lend additional funds to borrowers whose loans were on nonaccrual status or had been restructured.

Troubled Debt Restructurings

Loans are considered restructured in a troubled debt restructuring when the Corporation has granted concessions to a borrower due to the borrower's financial condition that it otherwise would not have considered. These concessions may include modifications of the terms of the debt such as deferral of payments, extension of maturity, reduction of principal balance, reduction of the stated interest rate other than normal market rate adjustments, or a combination of these concessions. Debt may be bifurcated with separate terms for each tranche of the restructured debt. Restructuring a loan in lieu of aggressively enforcing the collection of the loan may benefit the Corporation by increasing the ultimate probability of collection.

Restructured loans are classified as accruing or non-accruing based on management's assessment of the collectibility of the loan. Loans which are already on nonaccrual status at the time of the restructuring generally remain on nonaccrual

status for approximately six months before management considers such loans for return to accruing status. Accruing restructured loans

WASHINGTON TRUST BANCORP, INC. AND SUBSIDIARIES
 CONDENSED NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

are placed into nonaccrual status if and when the borrower fails to comply with the restructured terms and management deems it unlikely that the borrower will return to a status of compliance in the near term.

Troubled debt restructurings are reported as such for at least one year from the date of the restructuring. In years after the restructuring, troubled debt restructured loans are removed from this classification if the restructuring did not involve a below market rate concession and the loan is not deemed to be impaired based on the terms specified in the restructuring agreement.

Troubled debt restructurings are classified as impaired loans. The Corporation identifies loss allocations for impaired loans on an individual loan basis. The recorded investment in troubled debt restructurings was \$23.6 million and \$20.2 million, respectively, at June 30, 2013 and December 31, 2012. These amounts included accrued interest of \$60 thousand and \$13 thousand, respectively. The allowance for loan losses included specific reserves for these troubled debt restructurings of \$649 thousand and \$898 thousand, respectively, at June 30, 2013 and December 31, 2012. As of June 30, 2013, there were no significant commitments to lend additional funds to borrowers whose loans had been restructured.

The following tables present loans modified as a troubled debt restructuring during the periods indicated:
 (Dollars in thousands)

Credit Quality Indicators

Commercial

The Corporation utilizes an internal rating system to assign a risk to each of its commercial loans. Loans are rated on a scale of 1 to 10. This scale can be assigned to three broad categories including “pass” for ratings 1 through 6, “special mention” for 7-rated loans, and “classified” for loans rated 8, 9 or 10. The loan rating system takes into consideration parameters including the borrower’s financial condition, the borrower’s performance with respect to loan terms, and the adequacy of collateral. As of June 30, 2013 and December 31, 2012, the weighted average risk rating of the Corporation’s commercial loan portfolio was 4.67 and 4.77, respectively.

For non-impaired loans, the Corporation assigns a loss allocation factor to each loan, based on its risk rating for purposes of establishing an appropriate allowance for loan losses. See Note 6 for additional information.

Descriptions of the commercial loan categories are as follows:

Pass - Loans with acceptable credit quality, defined as ranging from superior or very strong to a status of lesser stature. Superior or very strong credit quality is characterized by a high degree of cash collateralization or strong balance sheet liquidity. Lesser stature loans have an acceptable level of credit quality but exhibit some weakness in various credit metrics such as collateral adequacy, cash flow, or performance inconsistency or may be in an industry or of a loan type known to have a higher degree of risk.

Special Mention - Loans with potential weaknesses that deserve management’s close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the asset or in the Bank’s position as creditor at some future date. Special Mention assets are not adversely classified and do not expose the Bank to sufficient risk to warrant adverse classification. Examples of these conditions include but are not limited to outdated or poor quality financial data, strains on liquidity and leverage, losses or negative trends in operating results, marginal cash flow, weaknesses in occupancy rates or trends in the case of commercial real estate and frequent delinquencies.

Classified - Loans identified as “substandard”, “doubtful” or “loss” based on criteria consistent with guidelines provided by banking regulators. A “substandard” loan has defined weaknesses which make payment default or principal exposure

likely, but not yet certain. Such loans are apt to be dependent upon collateral liquidation, a secondary source of repayment or an event outside of the normal course of business. The loans are closely watched and are either already on nonaccrual status or may be placed on nonaccrual status when management determines there is uncertainty of collectibility. A “doubtful” loan is placed on non-accrual status and has a high probability of loss, but the extent of the loss is difficult to quantify due to dependency upon collateral having a value that is difficult to determine or upon some near-term event which lacks certainty. A loan in the “loss”

WASHINGTON TRUST BANCORP, INC. AND SUBSIDIARIES
 CONDENSED NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

category is considered generally uncollectible or the timing or amount of payments cannot be determined. "Loss" is not intended to imply that the loan has no recovery value but rather it is not practical or desirable to continue to carry the asset.

The Corporation's procedures call for loan ratings and classifications to be revised whenever information becomes available that indicates a change is warranted. The criticized loan portfolio, which consists of commercial and commercial real estate loans that are risk rated special mention or worse, are reviewed by management on a quarterly basis, focusing on the current status and strategies to improve the credit. An annual loan review program is conducted by a third party to provide an independent evaluation of the creditworthiness of the commercial loan portfolio, the quality of the underwriting and credit risk management practices and the appropriateness of the risk rating classifications. This review is supplemented with selected targeted internal reviews of the commercial loan portfolio.

The following table presents the commercial loan portfolio, segregated by category of credit quality indicator:
 (Dollars in thousands)

	Pass		Special Mention		Classified	
	Jun 30, 2013	Dec 31, 2012	Jun 30, 2013	Dec 31, 2012	Jun 30, 2013	Dec 31, 2012
Mortgages	\$725,186	\$669,220	\$19,406	\$21,649	\$13,845	\$19,944

Total commercial loans	\$1,254,920	\$1,180,433	\$38,807	\$46,042	\$16,387	\$25,944

Residential and Consumer

The residential and consumer portfolios are monitored on an ongoing basis by the Corporation using delinquency information and loan type as credit quality indicators. These credit quality indicators are assessed on an aggregate basis in these relatively homogeneous portfolios.

For non-impaired loans, the Corporation assigns loss allocation factors to each respective loan type and delinquency status. See Note 6 for additional information.

Various other techniques are utilized to monitor indicators of credit deterioration in the portfolios of residential real estate mortgages and home equity lines and loans. Among these techniques is the periodic tracking of loans with an updated FICO score and an estimated loan to value ("LTV") ratio. LTV is determined via statistical modeling analyses. The indicated LTV levels are estimated based on such factors as the location, the original LTV, and the date of origination of the loan and do not reflect actual appraisal amounts. The results of these analyses are taken into consideration in the determination of loss allocation factors for residential mortgage and home equity consumer credits. See Note 6 for additional information.

The following table presents the residential and consumer loan portfolios, segregated by category of credit quality indicator:

(Dollars in thousands)	Under 90 Days Past Due		Over 90 Days Past Due

(6) Allowance for Loan Losses

The allowance for loan losses is management's best estimate of inherent risk of loss in the loan portfolio as of the balance sheet date. The allowance is increased by provisions charged to earnings and by recoveries of amounts previously charged off, and is reduced by charge-offs on loans. The Corporation uses a methodology to systematically measure the amount of estimated loan loss exposure inherent in the loan portfolio for purposes of establishing a sufficient allowance for loan losses. The methodology includes three elements: (1) identification of loss allocations for individual loans deemed to be impaired, (2) loss allocation factors for non-impaired loans based on credit grade, loss experience, delinquency factors and other similar economic indicators, and (3) general loss allocations for other environmental factors, which is classified as "unallocated."

Periodic assessments and revisions to the loss allocation factors used in the assignment of loss exposure are made to appropriately reflect the analysis of migrational loss experience. The Corporation analyzes historical loss experience in the various portfolios over periods deemed to be relevant to the inherent risk of loss in the respective portfolios as of the balance sheet date. The Corporation adjusts the loss allocations for various factors it believes are not adequately presented in historical loss experience, including trends in real estate values, trends in rental rates on commercial real estate, consideration of general economic conditions and our assessments of credit risk associated with certain industries and an ongoing trend toward larger credit relationships. These factors are also evaluated taking into account the geographic location of the underlying loans. Revisions to loss allocation factors are not retroactively applied.

Loss allocations for loans deemed to be impaired are measured on a discounted cash flow method based upon the loan's contractual effective interest rate, or at the loan's observable market price, or, if the loan is collateral dependent, at the fair value of the collateral less costs to sell. For collateral dependent loans, management may adjust appraised values to reflect estimated market value declines or apply other discounts to appraised values for unobservable factors resulting from its knowledge of circumstances associated with the property.

Loss allocation factors are used for non-impaired loans based on credit grade, loss experience, delinquency factors and other similar credit quality indicators. Individual commercial loans and commercial mortgage loans not deemed to be impaired are evaluated using the internal rating system described in Note 5 under the caption "Credit Quality Indicators" and the application of loss allocation factors. The loan rating system and the related loss allocation factors take into consideration parameters including the borrower's financial condition, the borrower's performance with respect to loan terms, and the adequacy of collateral. Portfolios of more homogeneous populations of loans including the various categories of residential mortgages and consumer loans are analyzed as groups, taking into account delinquency ratios and other indicators and our historical loss experience for each type of credit product.

An additional unallocated allowance is maintained to allow for measurement imprecision attributable to uncertainty in the economic environment and ever changing conditions and to reflect management's consideration of qualitative and quantitative assessments of other environmental factors, including, but not limited to, conditions that may affect the collateral position such as environmental matters, tax liens, and regulatory changes affecting the foreclosure process, as well as conditions that may affect the ability of borrowers to meet debt service requirements.

Because the methodology is based upon historical experience and trends, current economic data as well as management's judgment, factors may arise that result in different estimations. Significant factors that could give rise to changes in these estimates may include, but are not limited to, changes in economic conditions in our market area, concentration of risk, and declines in local property values. Adversely different conditions or assumptions could lead to increases in the allowance. In addition, various regulatory agencies periodically review the allowance for loan losses. Such agencies may require additions to the allowance based on their judgments about information available to them at the time of their examination.

2017	40,017	1.58	%
Thereafter	19,794	1.18	%
	\$811,299		

The following table represents the amount of certificates of deposit of \$100 thousand or more at June 30, 2013 maturing during the periods indicated:

(Dollars in thousands)	Scheduled Maturity
July 1, 2013 to September 30, 2013	\$166,708
October 1, 2013 to December 31, 2013	49,418
January 1, 2014 to June 30, 2014	40,118
July 1, 2014 and beyond	125,513
	\$381,757

(8) Borrowings

Federal Home Loan Bank Advances

Advances payable to the FHLBB amounted to \$373.3 million and \$361.2 million, respectively, at June 30, 2013 and December 31, 2012. The Bank also has access to an unused line of credit with the FHLBB amounting to \$8.0 million. In addition, the FHLBB has issued standby letters of credit to depositor customers of the Bank to collateralize public deposits. The Bank's FHLBB borrowings, line of credit and letters of credit are collateralized by a blanket pledge agreement on the Bank's FHLBB stock, certain qualified investment securities and loans, as well as amounts maintained on deposit at the FHLBB. The Bank's unused remaining available borrowing capacity at the FHLBB was approximately \$470.5 million and \$536.2 million, respectively, at June 30, 2013 and December 31, 2012.

Redemption of Certain Trust Preferred Securities and Related Junior Subordinated Debentures

The Bancorp is the sponsor of the Washington Preferred Capital Trust, a statutory trust created for the sole purpose of the April 7, 2008 issuance of trust preferred securities, the proceeds of which were invested in junior subordinated debentures of the Bancorp. On June 17, 2013, the Bancorp redeemed in whole at par the outstanding trust preferred securities and related subordinated debentures totaling \$10.0 million in trust preferred securities at an interest rate of three-month LIBOR plus 3.50%. The source of funds used for the redemption was made available from our balance sheet liquidity. The Bancorp also had a related interest rate swap contract designated as a cash flow hedge, which matured at redemption on June 17, 2013. As a result of the redemption, unamortized debit issuance costs of \$244 thousand were expensed and classified as interest expense in June 2013.

(1) Leverage ratio

(10) Derivative Financial Instruments

The Corporation's derivative financial instruments are used to manage differences in the amount, timing, and duration of the Corporation's known or expected cash receipts and its known or expected cash payments principally to manage the Corporation's interest rate risk. Additionally, the Corporation enters into interest rate derivatives to accommodate the business requirements of its customers. All derivatives are recognized as either assets or liabilities on the balance sheet and are measured at fair value. The accounting for changes in the fair value of derivatives depends on the intended use of the derivative and resulting designation.

Interest Rate Risk Management Agreements

Interest rate swaps are used from time to time as part of the Corporation's interest rate risk management strategy. Swaps are agreements in which the Corporation and another party agree to exchange interest payments (e.g., fixed-rate for variable-rate payments) computed on a notional principal amount. The credit risk associated with swap transactions is the risk of default by the counterparty. To minimize this risk, the Corporation enters into interest rate agreements only with highly rated counterparties that management believes to be creditworthy. The notional amounts

of these agreements do not represent amounts exchanged by the parties and, thus, are not a measure of the potential loss exposure.

Cash Flow Hedging Instruments

As of June 30, 2013, the Bancorp had two interest rate swap contracts designated as cash flow hedges to hedge the interest rate associated with \$23 million of variable rate junior subordinated debentures, compared to three interest rate swap contracts designated as cash flow hedges to hedge the interest rate associated with \$33 million of variable rate junior subordinated debentures as of December 31, 2012. See additional disclosure in Note 8 regarding the June 2013 redemption of junior subordinated debentures. The effective portion of the changes in fair value of derivatives designated as cash flow hedges is recorded in other comprehensive income and subsequently reclassified to earnings when gains or losses are realized. The ineffective portion of changes in fair value of the derivatives is recognized directly in earnings as interest expense. The Bancorp

WASHINGTON TRUST BANCORP, INC. AND SUBSIDIARIES
 CONDENSED NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

has pledged collateral to derivative counterparties in the form of cash totaling \$2.0 million at June 30, 2013 and December 31, 2012. The Bancorp may need to post additional collateral in the future in proportion to potential increases in unrealized loss positions.

Customer Related Derivative Contracts

The Corporation has entered into interest rate swap contracts to help commercial loan borrowers manage their interest rate risk. The interest rate swap contracts with commercial loan borrowers allow them to convert floating rate loan payments to fixed-rate loan payments. When we enter into an interest rate swap contract with a commercial loan borrower, we simultaneously enter into a “mirror” swap contract with a third party. The third party exchanges the client’s fixed-rate loan payments for floating rate loan payments. We retain the risk that is associated with the potential failure of counterparties and the risk inherent in making loans. As of June 30, 2013 and December 31, 2012, Washington Trust had interest rate swap contracts with commercial loan borrowers with notional amounts of \$65.3 million and \$70.5 million, respectively, and equal amounts of “mirror” swap contracts with third-party financial institutions. These derivatives are not designated as hedges and therefore, changes in fair value are recognized in earnings.

Loan Commitments

Interest rate lock commitments are extended to borrowers that relate to the origination of residential real estate mortgage loans held for sale. To mitigate the interest rate risk inherent in these rate locks, as well as closed residential real estate mortgage loans held for sale, best efforts forward commitments are established to sell individual residential real estate mortgage loans. Both interest rate lock commitments and commitments to sell fixed-rate residential real estate mortgage loans are derivative financial instruments but do not meet criteria for hedge accounting and as such are treated as derivatives not designated as hedging instruments. These derivative financial instruments are recorded at fair value and changes in fair value of these commitments are reflected in earnings in the period of change. The Corporation has elected to carry newly originated closed residential real estate mortgage loans held for sale at fair value, as changes in fair value in these loans held for sale generally offset changes in interest rate lock and forward sale commitments.

The following table presents the fair values of derivative instruments in the Corporation’s Consolidated Balance Sheets as of the dates indicated:

(Dollars in thousands)	Asset Derivatives			Liability Derivatives		
	Balance Sheet Location	Fair Value Jun 30, 2013	Dec 31, 2012	Balance Sheet Location	Fair Value Jun 30, 2013	Dec 31, 2012

(11) Fair Value Measurements

The Corporation uses fair value measurements to record fair value adjustments to certain assets and liabilities and to determine fair value disclosures. As of June 30, 2013 and December 31, 2012, securities available for sale, residential real estate mortgage loans held for sale and derivatives were recorded at fair value on a recurring basis. Additionally, from time to time, we may be required to record at fair value other assets on a nonrecurring basis, such as collateral dependent impaired loans, property acquired through foreclosure or repossession and mortgage servicing rights. These nonrecurring fair value adjustments typically involve the application of lower of cost or market

accounting or write-downs of individual assets.

Fair value is a market-based measurement, not an entity-specific measurement. Fair value measurements are determined based on the assumptions the market participants would use in pricing the asset or liability. In addition, GAAP specifies a hierarchy of valuation techniques based on whether the types of valuation information (“inputs”) are observable or unobservable. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect the Corporation’s market assumptions. These two types of inputs have created the following fair value hierarchy:

Level 1 – Quoted prices for identical assets or liabilities in active markets.

Level 2 – Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in inactive markets; and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets.

Level 3 – Valuations derived from valuation techniques in which one or more significant inputs or significant value drivers are unobservable in the markets and which reflect the Corporation’s market assumptions.

WASHINGTON TRUST BANCORP, INC. AND SUBSIDIARIES
CONDENSED NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Determination of Fair Value

Fair values are based on the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. When available, the Corporation uses quoted market prices to determine fair value. If quoted prices are not available, fair value is based upon valuation techniques such as matrix pricing or other models that use, where possible, current market-based or independently sourced market parameters, such as interest rates. If observable market-based inputs are not available, the Corporation uses unobservable inputs to determine appropriate valuation adjustments using methodologies applied consistently over time.

The following is a description of valuation methodologies for assets and liabilities recorded at fair value, including the general classification of such assets and liabilities pursuant to the valuation hierarchy.

Items Measured at Fair Value on a Recurring Basis
Securities

Level 2 securities include debt securities with quoted prices, which are traded less frequently than exchange-traded instruments, whose value is determined using matrix pricing with inputs that are observable in the market or can be derived principally from or corroborated by observable market data. This category generally includes obligations of U.S. government-sponsored enterprises, mortgage-backed securities issued by U.S. government agencies and U.S. government-sponsored enterprises, municipal bonds, trust preferred securities and corporate bonds.

In certain cases where there is limited activity or less transparency around inputs to the valuation, securities may be classified as Level 3. Level 3 securities were comprised of pooled trust preferred debt securities, in the form of collateralized debt obligations, which were not actively traded. In the first quarter of 2013, Washington Trust recognized an other-than-temporary impairment charge on one of its pooled trust preferred debt securities, reducing its carrying value to zero. See Note 4 for additional disclosure regarding pooled trust preferred debt securities. As of June 30, 2013 and December 31, 2012, the Corporation concluded that the low level of activity for its Level 3 pooled trust preferred debt securities continued to indicate that quoted market prices are not indicative of fair value. The Corporation obtained valuations including broker quotes and cash flow scenario analyses prepared by a third party valuation consultant. The cash flow scenarios (Level 3) were given substantially more weight than the broker quotes (Level 2) as management believed that the broker quotes reflected highly limited sales evidenced by an inactive market. The cash flow scenarios were prepared using discounted cash flow methodologies based on detailed cash flow and credit analysis of the security. The weighting was then used to determine an overall fair value. Management believes that this approach is most representative of fair value for such securities in current market conditions.

Our internal review procedures have confirmed that the fair value provided by the aforementioned third party valuation sources utilized by the Corporation are consistent with GAAP. Our fair value assumed liquidation in an orderly market and not under distressed circumstances. Due to the continued market illiquidity and credit risk for securities in the financial sector, the fair value of such securities is highly sensitive to assumption changes and market volatility.

Mortgage Loans Held for Sale

Washington Trust has elected to carry newly originated closed residential real estate mortgage loans held for sale at fair value pursuant to Accounting Standards Codification ("ASC") 825, "Financial Instruments." Level 2 mortgage loans held for sale fair values are estimated based on what secondary markets are currently offering for loans with similar characteristics. In certain cases when quoted market prices are not available, fair value is determined by utilizing a discounted cash flow analysis and these assets are classified as Level 3. Any change in the valuation of mortgage loans held for sale is based upon the change in market interest rates between closing the loan and the measurement date and an immaterial portion attributable to changes in instrument-specific credit risk.

The aggregate principal amount of its portfolio of residential real estate mortgage loans held for sale was \$29.2 million and \$48.4 million, respectively, at June 30, 2013 and December 31, 2012. The aggregate fair value of this portfolio as of the same dates was \$28.9 million and \$50.1 million, respectively. As of June 30, 2013, the aggregate fair value of mortgage loans held for sale was less than the aggregate principal amount by \$274 thousand. As of December 31, 2012, the aggregate fair value of mortgage loans held for sale exceeded the aggregate principal amount by \$1.7 million. There were no mortgage loans held for sale 90 days or more past due as of June 30, 2013 and December 31, 2012.

Derivatives

Interest rate swap contracts are traded in over-the-counter markets where quoted market prices are not readily available. Fair value measurements are determined using independent pricing models that utilize primarily market observable inputs, such as swap rates of different maturities and LIBOR rates and, accordingly, are classified as Level 2. Our internal review procedures have confirmed that the fair values determined with independent pricing models and utilized by the Corporation are consistent with GAAP. For purposes of potential valuation adjustments to its interest rate swap contracts, the Corporation evaluates the credit risk of its counterparties as well as that of the Corporation. Accordingly, Washington Trust considers factors such as the likelihood of default by the Corporation and its counterparties, its net exposures and remaining contractual life, among other factors, in determining if any fair value adjustments related to credit risk are required. Counterparty exposure is evaluated by netting positions that are subject to master netting agreements, as well as considering the amount of collateral securing the position. Additionally, in accordance with fair value measurement guidance in ASU 2011-04, Washington Trust has made an accounting policy election to measure the credit risk of its derivative financial instruments that are subject to master netting agreements on a net basis by counterparty portfolio.

Level 2 fair value measurements of forward loan commitments (interest rate lock commitments and commitments to sell fixed-rate residential mortgages) are estimated using the anticipated market price based on pricing indications provided from syndicate banks. In certain cases when quoted market prices are not available, fair value is determined by utilizing a discounted cash flow analysis and these assets are classified as Level 3.

Items Measured at Fair Value on a Nonrecurring Basis

Collateral Dependent Impaired Loans

Collateral dependent loans that are deemed to be impaired are valued based upon the fair value of the underlying collateral less costs to sell. Such collateral primarily consists of real estate and, to a lesser extent, other business assets. Management may adjust appraised values to reflect estimated market value declines or apply other discounts to appraised values resulting from its knowledge of the property. Internal valuations are utilized to determine the fair value of other business assets. Collateral dependent impaired loans are categorized as Level 3.

Property Acquired Through Foreclosure or Repossession

Property acquired through foreclosure or repossession included in other assets in the Consolidated Balance Sheets is adjusted to fair value less costs to sell upon transfer out of loans through a charge to allowance for loan losses. Subsequently, it is carried at the lower of carrying value or fair value less costs to sell. Such subsequent valuation charges are charged through earnings. Fair value is generally based upon appraised values of the collateral. Management adjusts appraised values to reflect estimated market value declines or apply other discounts to appraised values for unobservable factors resulting from its knowledge of the property, and such property is categorized as Level 3.

 CONDENSED NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The following tables present additional quantitative information about assets measured at fair value on a recurring basis for which the Corporation has utilized Level 3 inputs to determine fair value as of the dates indicated.

(Dollars in thousands)	June 30, 2013			
	Fair Value	Valuation Technique	Unobservable Input	Range of Inputs Utilized (Weighted Average)
Trust preferred securities:				
Collateralized debt obligations	\$397	Discounted Cash Flow	Discount Rate	16.50%
			Cumulative Default %	3.0% - 100% (19.1%)
			Loss Given Default %	85% - 100% (91.0%)

(Dollars in thousands)	December 31, 2012			
	Fair Value	Valuation Technique	Unobservable Input	Range of Inputs Utilized (Weighted Average)
Trust preferred securities:				
Collateralized debt obligations	\$843	Discounted Cash Flow	Discount Rate	16.75%
			Cumulative Default %	3.3% - 100% (25.7%)
			Loss Given Default %	85% - 100% (90.9%)
Mortgage loans held for sale	\$9,813	Discounted Cash Flow	Interest Rate	2.875% - 4.95% (3.71%)
			Credit Risk Adjustment	0.25%
Forward loan commitments - assets	\$44	Discounted Cash Flow	Interest Rate	3.25% - 3.875% (3.56%)
			Credit Risk Adjustment	0.25%
Forward loan commitments - liabilities	(\$186)	Discounted Cash Flow	Interest Rate	3.25% - 3.875% (3.69%)
			Credit Risk Adjustment	0.25%

Trust Preferred Debt Securities in the Form of Collateralized Debt Obligations

Given the low level of market activity for trust preferred securities in the form of collateralized debt obligations, the discount rate utilized in the fair value measurement was derived by analyzing current market yields for trust preferred securities of individual name issuers in the financial services industry. Adjustments were then made for credit and structural differences between these types of securities. There is an inverse correlation between the discount rate and the fair value measurement. When the discount rate increases, the fair value decreases.

Other significant unobservable inputs to the fair value measurement of collateralized debt obligations included prospective defaults and recoveries. The cumulative default percentage represents the lifetime defaults assumed, excluding currently defaulted collateral and including all performing and currently deferring collateral. As a result, the cumulative default percentage also reflects assumptions of the possibility of currently deferring collateral curing and becoming current. The loss given default percentage represents the percentage of current and projected defaults assumed to be lost. There is an inverse correlation between the cumulative default and loss given default percentages and the fair value measurement. When the default percentages increase, the fair value decreases.

Mortgage Loans Held for Sale and Derivative Assets / Liabilities

Significant unobservable inputs to the fair market value measurement for certain mortgage loans held for sale and certain forward loan commitments include interest rate and credit risk. Interest rates approximate the Corporation's current origination rates for similar loans. Credit risk approximates the Corporation's current loss exposure factor for

similar loans.

Items Recorded at Fair Value on a Nonrecurring Basis

Certain assets are measured at fair value on a nonrecurring basis in accordance with GAAP. These adjustments to fair value usually result from the application of lower of cost or market accounting or write-downs of individual assets. The valuation methodologies used to measure these fair value adjustments are described above.

The following tables present the carrying value of certain assets measured at fair value on a nonrecurring basis as of the dates indicated:

(Dollars in thousands)	June 30, 2013			
	Level 1	Level 2	Level 3	Total
Collateral dependent impaired loans	\$—	\$—	\$10,533	\$10,533
Property acquired through foreclosure or repossession	—	—	811	811
Total assets at fair value on a nonrecurring basis	\$—	\$—	\$11,344	\$11,344

The allowance for loan losses on collateral dependent impaired loans amounted to \$442 thousand at June 30, 2013.

(Dollars in thousands)	December 31, 2012			
	Level 1	Level 2	Level 3	Total
Collateral dependent impaired loans	\$—	\$—	\$9,550	\$9,550
Property acquired through foreclosure or repossession	—	—	1,073	1,073
Total assets at fair value on a nonrecurring basis	\$—	\$—	\$10,623	\$10,623

The allowance for loan losses allocation on collateral dependent impaired loans amounted to \$2.0 million at December 31, 2012.

The following tables present additional quantitative information about assets measured at fair value on a nonrecurring basis for which the Corporation has utilized Level 3 inputs to determine fair value for the dates indicated.

(Dollars in thousands)	June 30, 2013			
	Fair Value	Valuation Technique	Unobservable Input	Range of Inputs Utilized (Weighted Average)
Collateral dependent impaired loans	\$10,533	Appraisals of collateral	Discount for costs to sell	1% - 50% (10%)
				Appraisal adjustments
Property acquired through foreclosure or repossession	\$811	Appraisals of collateral	Discount for costs to sell	0% - 10% (7%)
				Appraisal adjustments
(Dollars in thousands)	December 31, 2012			
	Fair Value	Valuation Technique	Unobservable Input	Range of Inputs Utilized (Weighted Average)
Collateral dependent impaired loans	\$9,550	Appraisals of collateral	Discount for costs to sell	0% - 50% (11%)
				Appraisal adjustments
Property acquired through foreclosure or repossession	\$1,073	Appraisals of collateral	Discount for costs to sell	0% - 10% (5%)
				Appraisal adjustments

(1)

Management may adjust appraisal values to reflect market value declines or other discounts resulting from its knowledge of the property.

Valuation of Other Financial Instruments

The methodologies for estimating the fair value of financial instruments that are measured at fair value on a recurring or nonrecurring basis are discussed above. The methodologies for other financial instruments are discussed below.

WASHINGTON TRUST BANCORP, INC. AND SUBSIDIARIES
 CONDENSED NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Loans

Fair values are estimated for categories of loans with similar financial characteristics. Loans are segregated by type and are then further segmented into fixed-rate and adjustable rate interest terms to determine their fair value. The fair value of fixed-rate commercial and consumer loans is calculated by discounting scheduled cash flows through the estimated maturity of the loan using interest rates offered at June 30, 2013 and December 31, 2012 that reflect the credit and interest rate risk inherent in the loan. The estimate of maturity is based on the Corporation's historical repayment experience. For residential mortgages, fair value is estimated by using quoted market prices for sales of similar loans on the secondary market. The fair value of floating rate commercial and consumer loans approximates carrying value. Fair value for impaired loans is estimated using a discounted cash flow method based upon the loan's contractual effective interest rate, or at the loan's observable market price, or if the loan is collateral dependent, at the fair value of the collateral less costs to sell. Loans are classified within Level 3 of the fair value hierarchy.

Time Deposits

The discounted values of cash flows using the rates currently offered for deposits of similar remaining maturities were used to estimate the fair value of time deposits. Time deposits are classified within Level 2 of the fair value hierarchy.

Federal Home Loan Bank Advances

Rates currently available to the Corporation for advances with similar terms and remaining maturities are used to estimate fair value of existing advances. FHLBB advances are categorized as Level 2.

Junior Subordinated Debentures

The fair value of the junior subordinated debentures is estimated using rates currently available to the Corporation for debentures with similar terms and maturities. Junior subordinated debentures are categorized as Level 2.

The following tables present the carrying amount, estimated fair value and placement in the fair value hierarchy of the Corporation's financial instruments as of June 30, 2013 and December 31, 2012. The tables exclude financial instruments for which the carrying value approximates fair value. Financial assets for which the fair value approximates carrying value include cash and cash equivalents, FHLBB stock, accrued interest receivable and bank-owned life insurance. Financial liabilities for which the fair value approximates carrying value include non-maturity deposits, other borrowings and accrued interest payable.

(Dollars in thousands)

June 30, 2013	Carrying Amount	Estimated Fair Value	Fair Value Measurements		
			Level 1	Level 2	Level 3
Financial Assets:					
Securities held to maturity	\$33,803	\$33,762	\$—	\$33,762	\$—
Loans, net of allowance for loan losses	2,357,096	2,415,177	—	—	2,415,177
Loan servicing rights (1)	1,759	1,890	—	—	1,890
Financial Liabilities:					
Time deposits	\$811,299	\$819,816	\$—	\$819,816	\$—
FHLBB advances	373,341	395,409	—	395,409	—
Junior subordinated debentures	22,681	14,689	—	14,689	—

(1) The carrying value of loan servicing rights is net of \$131 thousand in reserves as of June 30, 2013. The estimated fair value does not include such adjustment.

(1) The carrying value of loan servicing rights is net of \$165 thousand in reserves as of December 31, 2012. The estimated fair value does not include such adjustment.

(12) Defined Benefit Pension Plans

The Corporation offers a tax-qualified defined benefit pension plan for the benefit of certain eligible employees who were hired prior to October 1, 2007 and continue to accrue benefits under the plan. Benefits are based on an employee's years of service and compensation earned during the years of service. The plan is funded on a current basis, in compliance with the requirements of ERISA. The Corporation also has non-qualified retirement plans to provide supplemental retirement benefits to certain employees, as defined in the plans. The supplemental retirement plans provide eligible participants with an additional retirement benefit.

The composition of net periodic benefit cost was as follows for the periods indicated:

(Dollars in thousands)	Qualified Pension Plan				Non-Qualified Retirement Plans			
	Three months		Six months		Three months		Six months	
	2013	2012	2013	2012	2013	2012	2013	2012
Periods ended June 30,

Net periodic benefit cost	\$931	\$840	\$1,861	\$1,680	\$213	\$193	\$427	\$386

(13) Share-Based Compensation Arrangements

On April 23, 2013, Bancorp's shareholders approved the 2013 Stock Option and Incentive Plan ("2013 Plan"). Under the 2013 Plan, the maximum number of shares of the Bancorp's common stock to be issued is 1,748,250. Under the 2013 Plan, the Corporation is permitted to issue various incentive awards, such as stock options (both incentive and non-qualified options), stock appreciation rights, restricted stock, restricted stock units, unrestricted stock, performance shares, dividend equivalent rights and cash-based awards. The Corporation also has two other share-based compensation plans, the 2003 Stock Incentive Plan, as amended, and the 1997 Equity Incentive Plan, as amended. See our Annual Report on Form 10-K for the fiscal year ended December 31, 2012.

WASHINGTON TRUST BANCORP, INC. AND SUBSIDIARIES
 CONDENSED NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Nonvested Share Units

During the six months ended June 30, 2013, the Corporation granted the following nonvested share units to directors.

Date	Units Granted	Fair Value	Plan	Vesting Period
4/23/2013	12,000	\$26.79	2013 Plan	3 year cliff vesting

The nonvested share units awarded were valued at the fair market value as of the award date.

Nonvested Performance Shares

During the six months ended June 30, 2013, the Corporation granted the following performance share award to certain executive officers.

Date	Share Range	Fair Value	Plan	Vesting Period
1/22/2013	0 to 60,300	\$26.05	2003 Stock Incentive Plan	3 year performance period

The performance shares awarded were valued at the fair market value as of the award date. The number of shares earned will range from zero to 200% of the target number of shares dependent upon the Corporation's core return on equity and core earnings per share growth ranking compared to an industry peer group. The current assumption based on the most recent peer group information available results in shares earned at 150% of the target, or 45,225 shares.

(14) Business Segments

Washington Trust segregates financial information in assessing its results among two operating segments:

Commercial Banking and Wealth Management Services. The amounts in the Corporate column include activity not related to the segments, such as the investment securities portfolio, wholesale funding activities and administrative units. The Corporate column is not considered to be an operating segment. The methodologies and organizational hierarchies that define the business segments are periodically reviewed and revised. Results may be restated, when necessary, to reflect changes in organizational structure or allocation methodology. Any changes in estimates and allocations that may affect the reported results of any business segment will not affect the consolidated financial position or results of operations of Washington Trust as a whole.

Management uses certain methodologies to allocate income and expenses to the business lines. A funds transfer pricing methodology is used to assign interest income and interest expense to each interest-earning asset and interest-bearing liability on a matched maturity funding basis. Certain indirect expenses are allocated to segments. These include support unit expenses such as technology and processing operations and other support functions.

Commercial Banking

The Commercial Banking segment includes commercial, commercial real estate, residential and consumer lending activities; equity in losses of unconsolidated investments in real estate limited partnerships, mortgage banking, secondary market and loan servicing activities; deposit generation; merchant credit card services; cash management activities; and direct banking activities, which include the operation of ATMs, telephone and Internet banking services and customer support and sales.

Wealth Management Services

Wealth Management Services includes asset management services provided for individuals, institutions and mutual funds; personal trust services, including services as executor, trustee, administrator, custodian and guardian; institutional trust services, including services as trustee for pension and profit sharing plans; and other financial planning and advisory services.

Corporate

Corporate includes the Treasury Unit, which is responsible for managing the wholesale investment portfolio and wholesale funding needs. It also includes income from bank-owned life insurance as well as administrative and executive expenses not allocated to the business lines and the residual impact of methodology allocations such as funds transfer pricing offsets.

Balance at June 30, 2012	\$12,547	(\$1,982)	(\$1,108)	(\$11,493)	(\$2,036)

(16) Earnings Per Common Share

Washington Trust utilizes the two-class method earnings allocation formula to determine earnings per share of each class of stock according to dividends and participation rights in undistributed earnings. Share-based payments that entitle holders to receive non-forfeitable dividends before vesting are considered participating securities and included in earnings allocation for computing basic earnings per share under this method. Undistributed income is allocated to common shareholders and participating securities under the two-class method based upon the proportion of each to the total weighted average shares available.

The calculation of earnings per common share is presented below.

(Dollars and shares in thousands, except per share amounts)

Periods ended June 30,	Three Months		Six months	
	2013	2012	2013	2012
Net income	\$8,983	\$8,713	\$16,404	\$17,151
Less dividends and undistributed earnings allocated to participating securities	(39)	(40)	(78)	(74)
Net income applicable to common shareholders	\$8,944	\$8,673	\$16,326	\$17,077
Weighted average basic common shares	16,454	16,358	16,428	16,344
Dilutive effect of common stock equivalents	127	34	130	37
Weighted average diluted common shares	16,581	16,392	16,558	16,381

Earnings per common share:

Basic	\$0.54	\$0.53	\$0.99	\$1.04
Diluted	\$0.54	\$0.53	\$0.99	\$1.04

WASHINGTON TRUST BANCORP, INC. AND SUBSIDIARIES
 CONDENSED NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Weighted average common stock equivalents, not included in common stock equivalents above because they were anti-dilutive, totaled 241 thousand and 394 thousand, respectively, for the three months ended June 30, 2013 and 2012. These amounts totaled 394 thousand and 393 thousand, respectively, for the six months ended June 30, 2013 and 2012.

(17) Commitments and Contingencies

Financial Instruments with Off-Balance Sheet Risk

The Corporation is a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers and to manage the Corporation's exposure to fluctuations in interest rates. These financial instruments include commitments to extend credit, standby letters of credit, interest rate swap agreements and commitments to originate and commitments to sell fixed-rate mortgage loans. These instruments involve, to varying degrees, elements of credit risk in excess of the amount recognized in the Corporation's Consolidated Balance Sheets. The contract or notional amounts of these instruments reflect the extent of involvement the Corporation has in particular classes of financial instruments. The Corporation's credit policies with respect to interest rate swap agreements with commercial borrowers, commitments to extend credit, and financial guarantees are similar to those used for loans. The interest rate swaps with other counterparties are generally subject to bilateral collateralization terms.

The contractual and notional amounts of financial instruments with off-balance sheet risk are as follows:

(Dollars in thousands)	Jun 30, 2013	Dec 31, 2012
Financial instruments whose contract amounts represent credit risk:		
Commitments to extend credit:		
Commercial loans	\$225,599	\$223,426
Home equity lines	195,981	184,941
Other loans	29,152	30,504
Standby letters of credit	1,222	1,039
Financial instruments whose notional amounts exceed the amount of credit risk:		
Forward loan commitments:		
Commitments to originate fixed-rate mortgage loans to be sold	51,435	67,792
Commitments to sell fixed-rate mortgage loans	80,598	116,162
Customer related derivative contracts:		
Interest rate swaps with customers	65,334	70,493
Mirror swaps with counterparties	65,334	70,493
Interest rate risk management contract:		
Interest rate swap	22,681	32,991

Commitments to Extend Credit

Commitments to extend credit are agreements to lend to a customer as long as there are no violations of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since some of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. Each borrower's creditworthiness is evaluated on a case-by-case basis. The amount of collateral obtained is based on management's credit evaluation of the borrower.

Standby Letters of Credit

Standby letters of credit are conditional commitments issued to guarantee the performance of a customer to a third party. These standby letters of credit are primarily issued to support the financing needs of the Bank's commercial

customers. The credit risk involved in issuing standby letters of credit is essentially the same as that involved in extending loan facilities to customers. The collateral supporting those commitments is essentially the same as for other commitments. Most standby letters of credit extend for one year. As of June 30, 2013 and December 31, 2012, the maximum potential amount of undiscounted future payments, not reduced by amounts that may be recovered, totaled \$1.2 million and \$1.0 million, respectively. At June 30, 2013 and December 31, 2012, there were no liabilities to beneficiaries resulting from standby letters of credit. Fee income on standby letters of credit for the three and six months ended June 30, 2013 and 2012 was immaterial.

WASHINGTON TRUST BANCORP, INC. AND SUBSIDIARIES
 CONDENSED NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Forward Loan Commitments

Interest rate lock commitments are extended to borrowers that relate to the origination of residential real estate mortgage loans held for sale. To mitigate the interest rate risk inherent in these rate locks, as well as closed residential real estate mortgage loans held for sale, best efforts forward commitments are established to sell individual residential real estate mortgage loans. Both interest rate lock commitments and commitments to sell fixed-rate residential real estate mortgage loans are derivative financial instruments.

Leases

As of June 30, 2013 and December 31, 2012, the Corporation was obligated under various non-cancellable operating leases for properties used as banking offices and other office facilities. Rental expense under the operating leases amounted to \$672 thousand and \$1.3 million, respectively, for the three and six months ended June 30, 2013, compared to \$770 thousand and \$1.4 million, respectively, for the same periods in 2012. Rental expense is recorded as a component of net occupancy expense in the accompanying Consolidated Statements of Income.

As of June 30, 2013, the minimum annual lease payments under the terms of these leases, exclusive of renewal provisions, are as follows:

(Dollars in thousands)

July 1, 2013 to December 31, 2013	\$1,176
2014	2,407
2015	1,895
2016	1,618
2017	1,450
Thereafter	14,612
Total minimum lease payments	\$23,158

Lease expiration date ranges have not changed significantly since December 31, 2012.

Other Contingencies

Litigation

The Corporation is involved in various claims and legal proceedings arising out of the ordinary course of business. Management is of the opinion, based on its review with counsel of the development of such matters to date, that the ultimate disposition of such matters will not materially affect the consolidated financial position or results of operations of the Corporation.

Other

When selling a residential real estate mortgage loan or acting as originating agent on behalf of a third party, Washington Trust generally makes various representations and warranties. The specific representations and warranties depend on the nature of the transaction and the requirements of the buyer. Contractual liability may arise when the representations and warranties are breached. In the event of a breach of these representations and warranties, Washington Trust may be required to either repurchase the residential real estate mortgage loan (generally at unpaid principal balance plus accrued interest) with the identified defects or indemnify (“make-whole”) the investor for its losses.

In the case of a repurchase, Washington Trust will bear any subsequent credit loss on the residential real estate mortgage loan. Washington Trust has experienced an insignificant number of repurchase demands over a period of many years. As of June 30, 2013 and December 31, 2012, the unpaid principal balance of loans repurchased due to representation and warranty claims was \$685 thousand and \$843 thousand, respectively. Washington Trust has recorded a reserve for its exposure to losses from the obligation to repurchase previously sold residential real estate

mortgage loans. The reserve balance amounted to \$250 thousand at June 30, 2013 and December 31, 2012 and is included in other liabilities in the Consolidated Balance Sheets. Any change in the estimate is recorded in net gains on loan sales and commissions on loans originated for others in the Consolidated Statements of Income.

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion should be read in conjunction with the Corporation's consolidated financial statements, and notes thereto, included in the Annual Report on Form 10-K for the year ended December 31, 2012, and in conjunction with the condensed unaudited consolidated financial statements and notes thereto included in Item 1 of this report. Operating results for the three and six months ended June 30, 2013 are not necessarily indicative of the results for the full-year ended December 31, 2013 or any future period.

Forward-Looking Statements

This report contains statements that are "forward-looking statements." We may also make written or oral forward-looking statements in other documents we file with the SEC, in our annual reports to shareholders, in press releases and other written materials, and in oral statements made by our officers, directors or employees. You can identify forward-looking statements by the use of the words "believe," "expect," "anticipate," "intend," "estimate," "assume," "outlook," "will," "should," and other expressions that predict or indicate future events and trends and which do not relate to historical matters. You should not rely on forward-looking statements, because they involve known and unknown risks, uncertainties and other factors, some of which are beyond the control of the Corporation. These risks, uncertainties and other factors may cause the actual results, performance or achievements of the Corporation to be materially different from the anticipated future results, performance or achievements expressed or implied by the forward-looking statements.

Some of the factors that might cause these differences include the following: continued weakness in national, regional or international economic conditions or conditions affecting the banking or financial services industries or financial capital markets, volatility and disruption in national and international financial markets, additional government intervention in the U.S. financial system, reductions in net interest income resulting from interest rate volatility as well as changes in the balance and mix of loans and deposits, reductions in the market value of wealth management assets under administration, changes in the value of securities and other assets, reductions in loan demand, changes in loan collectibility, default and charge-off rates, changes in the size and nature of the Corporation's competition, changes in legislation or regulation and accounting principles, policies and guidelines and changes in the assumptions used in making such forward-looking statements. In addition, the factors described under "Risk Factors" in Item 1A of our Annual Report on Form 10-K for the fiscal year ended December 31, 2012, as updated by our Quarterly Reports on Form 10-Q and other filings submitted to the SEC, may result in these differences. You should carefully review all of these factors and you should be aware that there may be other factors that could cause these differences. These forward-looking statements were based on information, plans and estimates at the date of this report, and we assume no obligation to update any forward-looking statements to reflect changes in underlying assumptions or factors, new information, future events or other changes.

Critical Accounting Policies and Estimates

Accounting policies involving significant judgments, estimates and assumptions by management, which have, or could have, a material impact on the carrying value of certain assets and impact income are considered critical accounting policies. The Corporation considers the following to be its critical accounting policies: allowance for loan losses, review of goodwill and intangible assets for impairment and valuation of investment securities for impairment. There have been no significant changes in the Corporation's critical accounting policies and estimates from those disclosed in our Annual Report on Form 10-K for the fiscal year ended December 31, 2012.

Recently Issued Accounting Pronouncements

See Note 2 to the Unaudited Consolidated Financial Statements for details of recently issued accounting pronouncements and their expected impact on the Corporation's consolidated financial position, results of operations or cash flows.

Overview

Washington Trust offers a comprehensive product line of financial services to individuals and businesses including commercial, residential and consumer lending, retail and commercial deposit products, and wealth management services through its offices in Rhode Island, eastern Massachusetts and Connecticut, ATMs, and its Internet website at www.washtrust.com.

Our largest source of operating income is net interest income, the difference between interest earned on loans and securities and interest paid on deposits and other borrowings. In addition, we generate noninterest income from a number of sources, including wealth management services, loan sales and commissions on loans originated for others, merchant credit card processing and deposit services and bank-owned life insurance (“BOLI”). Our principal noninterest expenses include salaries and employee benefits, occupancy and facility-related costs, merchant processing costs, technology and other administrative expenses.

Our financial results are affected by interest rate volatility, changes in economic and market conditions, competitive conditions within our market area and changes in legislation, regulation and/or accounting principles. While the regional economic climate has been improving in recent quarters, uncertainty surrounding future economic growth, consumer confidence, credit availability and corporate earnings remains. Management believes that overall credit quality continues to be affected by weaknesses in national and regional economic conditions, including high unemployment levels, particularly in Rhode Island.

Washington Trust opened its fourth mortgage lending office in March 2012 and a new full-service branch in July 2012. We believe the Corporation's financial strength and stability, capital resources and reputation as the largest independent bank headquartered in Rhode Island, were key factors in the expansion of our retail and mortgage banking business and in delivering solid results in the second quarter of 2013. We will continue to leverage our strong, statewide brand to build market share in Rhode Island whenever possible and bring select business lines to new markets with high-growth potential while remaining steadfast in our commitment to provide superior service. In the first quarter of 2014, Washington Trust plans to open a new full-service branch in Johnston, Rhode Island, in Providence County. This branch will be the Washington Trust's nineteenth branch office and its first in Johnston.

Composition of Earnings

Net income for the second quarter of 2013 amounted to \$9.0 million or 54 cents per diluted share, compared to \$8.7 million, or 53 cents per diluted share, reported for the second quarter of 2012. The returns on average equity and average assets for the second quarter of 2013 were 11.84% and 1.18%, respectively, compared to 11.98% and 1.16%, respectively, for the same quarter in 2012.

For the six months ended June 30, 2013, net income amounted to \$16.4 million, or 99 cents per diluted share, compared to \$17.2 million, or \$1.04 per diluted share, reported for the same period in 2012. The returns on average equity and average assets for the first six months of 2013 were 10.88% and 1.08%, respectively, compared to 11.92% and 1.13%, respectively, for the same period in 2012.

2013 results included the following transactions, which resulted in a reduction of 2 cents and 13 cents per diluted share in the three and six months ended June 30, 2013, respectively:

During the second quarter of 2013, certain junior subordinated debentures were redeemed and as a result, unamortized debt issuance costs of \$244 thousand were expensed and classified as interest expense.

Expense of \$270 thousand, classified in salaries and employee benefits expense, was recognized in the second quarter of 2013 for executive severance related matters.

Other-than-temporary impairment ("OTTI") charges of \$2.8 million were recognized in the first quarter of 2013. There were no such charges recognized in the second quarter of 2013. See additional discussion in the "Financial Condition" section under the caption "Securities" below.

2012 results included the following transactions, which resulted in a reduction of 2 cents and 5 cents per diluted share in the three and six months ended June 30, 2012, respectively:

Balance sheet management transactions were executed in the second quarter of 2012, consisting of the sale of mortgage backed securities and the prepayment of FHLBB advances. As a result, net realized gains on securities of \$217 thousand and debt prepayment penalty expense of \$961 thousand were recognized in the second quarter of 2012. A gain of \$348 thousand was recognized on the sale of bank property in the second quarter of 2012 and was classified in other income.

OTTI charges of \$209 thousand were recognized in the first quarter of 2012. There were no such charges recognized in the second quarter of 2012.

A charge of \$131 thousand, classified in net occupancy expense, was recognized in the second quarter of 2012 due to the termination of an operating lease associated with the closure of a branch in September 2012.

Excluding the above mentioned transactions, results for the first six months of 2013 primarily reflected continued solid mortgage banking results (net gains on loan sales and commissions on loans originated for others), higher wealth management revenues and a lower provision for loan losses, partially offset by increases in salaries and employee benefit costs.

Net interest income for the three and six months ended June 30, 2013 amounted to \$22.4 million and \$44.9 million, respectively, essentially level with the amounts recognized in the same periods in 2012. The net interest margin (fully taxable equivalent net interest income as a percentage of average interest-earnings assets) for the three and six months ended June 30, 2013 was 3.26% and 3.29%, respectively, compared to 3.30% and 3.28% for the same periods a year earlier. The above mentioned debt issuance costs expensed and classified as interest expense resulted in a reduction of 4 basis points and 2 basis points, respectively, in the

net interest margin for the three and six months ended June 30, 2013. See additional discussion in the “Results of Operations” section under the caption “Net Interest Income” below.

The loan loss provision charged to earnings for the three and six months ended June 30, 2013 amounted to \$700 thousand and \$1.3 million, respectively. Comparable amounts for the same periods in 2012 amounted to \$600 thousand and \$1.5 million, respectively. Net charge-offs for second quarter and first half of 2013 totaled \$4.0 million and \$4.3 million, respectively, compared to \$197 thousand and \$854 thousand, respectively, for the same periods a year earlier. The higher level of net charge offs in 2013 was due to a \$4.0 million charge-off recognized in the second quarter on one commercial mortgage loan. See additional discussion in the “Results of Operations” section under the caption “Provisions and Allowance for Loan Losses” below.

Revenue from wealth management services is our largest source of noninterest income. For the three and six months ended June 30, 2013, wealth management revenues totaled \$7.9 million and \$15.4 million, respectively, up by 6% and 5%, respectively, from the same periods in 2012 due to an increase in asset based wealth management revenues. Wealth management assets under administration totaled \$4.43 billion at June 30, 2013, compared to \$4.20 billion at December 31, 2012 and \$4.08 billion at June 30, 2012, largely reflecting net investment appreciation and income.

Mortgage banking revenues, which are dependent on mortgage origination volume and are sensitive to interest rates and the condition of the housing markets, amounted to \$3.5 million and \$7.7 million, respectively, for the three and six months ended June 30, 2013, up by 16% and 25%, respectively, from the same periods in 2012. Residential real estate loans sold to the secondary market, including brokered loans, totaled \$132.2 million and \$285.0 million, respectively, for the three and six months ended June 30, 2013. Comparable amounts for the same periods in 2012 were \$118.7 million and \$244.4 million, respectively. While these amounts have increased year over year, in the latter portion of the second quarter of 2013 mortgage loan refinancing activity declined due to an increase in market interest rates.

Noninterest expenses for the three and six months ended June 30, 2013 amounted to \$25.0 million and \$49.2 million, respectively, down by 1% and up by 1%, respectively, from the comparable 2012 periods. Included in noninterest expenses were the above mentioned executive severance expenses in 2013 and the debt prepayment penalty expense and lease termination charge in 2012. See additional discussion in the “Results of Operations” section under the caption “Noninterest Expenses” below.

Income tax expense amounted to \$4.1 million and \$7.5 million, respectively, for the three and six months ended June 30, 2013. Comparable amounts for the same periods a year earlier were \$4.0 million and \$7.9 million, respectively. The effective tax rate for the second quarter of 2013 was 31.4%, down from 31.7% for the the second quarter of 2012. For the first six months of 2013 the effective tax rate was 31.5%, down slightly from 31.6% for the same period in 2012.

Results of Operations

Segment Reporting

Washington Trust manages its operations through two business segments, Commercial Banking and Wealth Management Services. Activity not related to the segments, such as the investment securities portfolio, wholesale funding activities, income from BOLI and administrative expenses not allocated to the business lines are considered Corporate. The Corporate unit also includes the residual impact of methodology allocations such as funds transfer pricing offsets. Methodologies used to allocate income and expenses to business lines are periodically reviewed and revised. See Note 14 to the Unaudited Consolidated Financial Statements for additional disclosure related to business segments. The Corporate unit’s net income for the three and six months ended June 30, 2013 decreased by \$13 thousand and \$982 thousand, respectively, compared to the same periods a year ago. Included in the Corporate unit’s results were the the write-off of unamortized debt issuance cost in connection with the redemption of junior subordinated debentures, the net realized gains on securities and debt prepayment penalties associated with balance

sheet management transactions and the OTTI charges recognized on investment securities. See additional disclosure in the “Overview” section under the caption “Composition of Earnings.”

The Commercial Banking segment reported net income of \$6.7 million and \$13.3 million, respectively, for the three and six months ended June 30, 2013, compared to \$6.6 million and \$13.2 million for the same periods in 2012. Net interest income for this segment for the three and six months ended June 30, 2013 increased by \$179 thousand and \$62 thousand, respectively, from the same periods in 2012. The provision for loan losses for the second quarter of 2013 increased by \$100 thousand, compared to the same quarter a year ago. For the six months ended June 30, 2013, the provision for loan losses declined by \$200 thousand from the comparable 2012 period. Noninterest income derived from the Commercial Banking segment totaled \$8.0 million and \$15.9 million, respectively, for the three and six months ended June 30, 2013, up by \$411 thousand or 5%, and \$1.7 million, or 12%, from the comparable 2012 periods, reflecting higher mortgage banking revenues. Commercial Banking noninterest

expenses for the three and six months ended June 30, 2013 were up by \$410 thousand, or 3%, and \$780 thousand, or 3%, respectively, from the same periods in 2012, with increases in salaries and employee benefit expenses, largely due to higher staffing levels to support growth and higher levels of business development based compensation in mortgage banking.

The Wealth Management Services segment reported net income of \$1.6 million and \$2.8 million, respectively, for the three and six months ended June 30, 2013, compared to \$1.5 million and \$2.6 million, respectively, for the same periods in 2012. Noninterest income derived from the Wealth Management Services segment was \$7.9 million and \$15.4 million for the three and six months ended June 30, 2013, up by 6% and 5%, respectively, compared to the same periods in 2012, primarily due to an increase in asset-based wealth management revenues. Noninterest expenses for the Wealth Management Services segment totaled \$5.3 million and \$10.8 million, respectively, for the three and six months ended June 30, 2013, up by \$189 thousand, or 4%, and \$354 thousand, or 3%, respectively, from the same periods a year ago, largely reflecting an increase in salaries and employee benefit expenses due to higher levels of business development based compensation.

Net Interest Income

Net interest income continues to be the primary source of Washington Trust's operating income. Net interest income is affected by the level of interest rates, changes in interest rates and changes in the amount and composition of interest-earning assets and interest-bearing liabilities. Included in interest income are loan prepayment fees and certain other fees, such as late charges. The following discussion presents net interest income on a fully taxable equivalent ("FTE") basis by adjusting income and yields on tax-exempt loans and securities to be comparable to taxable loans and securities. For more information, see the section entitled "Average Balances / Net Interest Margin - Fully Taxable Equivalent (FTE) Basis" below.

FTE net interest income for the three and six months ended June 30, 2013 amounted to \$22.9 million and \$45.9 million, respectively, compared to \$22.9 million and \$45.8 million, respectively, for the same periods in 2012. The net interest margin was 3.26% and 3.29%, respectively, for the three and six months ended June 30, 2013, compared to 3.30% and 3.28%, respectively, for the same periods in 2012. During the second quarter of 2013, \$10.3 million of junior subordinated debentures were redeemed and as a result, unamortized debt issuance costs of \$244 thousand were expensed and classified as interest expense in the quarter. The impact of this item was an increase of 4 basis points and 2 basis points, respectively, in the cost of funds and a reduction of 4 basis points and 2 basis points, respectively, in the net interest margin for the three and six months ended June 30, 2013. The rate on this debt was approximately 5.69% at the time of redemption, which included the cost of a related interest rate swap that matured upon the redemption event.

While there has been growth in average loan balances, in the current historically low interest rate environment, market yields on new loan originations are below the average yield of the existing loan portfolio. Due to the combined effect of new loan growth and the runoff of higher yielding loan balances, we anticipate that interest rates on total earning assets will continue to decline. The impact of this trend is likely to exceed the benefit to be realized in reduced funding costs, with the resulting effect of modestly lower net interest margin results in the remaining quarters of 2013.

Average interest-earning assets for the three and six months ended June 30, 2013 were up by \$26.5 million and \$8.7 million, respectively, from the average balances for the same periods in 2012. Total average loans for the three and six months ended June 30, 2013 increased by \$178.0 million and \$168.9 million, respectively, compared to the average balances for the comparable 2012 periods, led by growth in the commercial loan portfolio. The yield on total loans for the three and six months ended June 30, 2013 decreased by 31 basis points and 30 basis points, respectively, from the comparable 2012 periods. These declines reflect the impact of a sustained low interest rate environment on loan yields.

Total average securities for the three and six months ended June 30, 2013 decreased by \$163.4 million and \$166.0 million, respectively, from the average balances for the same periods a year earlier, primarily due to principal payments received on mortgage-backed securities which were not reinvested in the securities portfolio. The FTE rate of return on securities for the three and six months ended June 30, 2013 increased slightly compared to the same periods in 2012, primarily reflecting maturities and pay-downs of lower yielding mortgage-backed securities.

Average interest-bearing liabilities for the three and six months ended June 30, 2013 decreased by \$38.7 million and \$49.9 million, respectively, from the comparable periods in 2012, reflecting declines in average FHLBB advance balances and average time deposits, offset in part by growth in balances of lower-cost deposit categories. The weighted average cost of funds for the three and six months ended June 30, 2013 declined by 22 basis points and 25 basis points, respectively, compared to the same periods in 2012, largely reflecting declines in the rate paid on time deposits. See additional discussion above regarding the impact of the second quarter 2013 redemption of \$10.3 million of junior subordinated debentures.

The average balances of FHLBB advances for the three and six months ended June 30, 2013 were down by \$167.4 million and \$173.0 million, respectively, compared to the average balances for the same periods in 2012. The average rate paid on such advances for the three and six months ended June 30, 2013 increased slightly from the comparable periods in 2012. See additional discussion under “Sources of Funds” below.

Total average interest-bearing deposits for the three and six months ended June 30, 2013 increased by \$131.1 million and \$133.1 million, respectively, compared to the average balances for the same periods in 2012. This increase reflected growth in lower-cost deposit balances, partially offset by a decrease in time deposits. The average rate paid on interest-bearing deposits for the three and six months ended June 30, 2013 decreased by 11 basis points compared to the same periods in 2012, primarily due to declines in the rate paid on time deposits. The average balance of noninterest-bearing demand deposits for the three and six months ended June 30, 2013 increased by \$44.7 million, or 14%, and \$37.2 million, or 11%, respectively, compared to the average balances for the same period in 2012.

Average Balances / Net Interest Margin - Fully Taxable Equivalent (FTE) Basis

The following tables present average balance and interest rate information. Tax-exempt income is converted to a FTE basis using the statutory federal income tax rate adjusted for applicable state income taxes net of the related federal tax benefit. For dividends on corporate stocks, the 70% federal dividends received deduction is also used in the calculation of tax equivalency. Average balances and yields for securities available for sale are based on amortized cost. Nonaccrual and renegotiated loans, as well as interest earned on these loans (to the extent recognized in the Consolidated Statements of Income) are included in amounts presented for loans.

Edgar Filing: WASHINGTON TRUST BANCORP INC - Form 10-Q

Three months ended June 30, (Dollars in thousands)	2013			2012		
	Average Balance	Interest	Yield/ Rate	Average Balance	Interest	Yield/ Rate

Provision and Allowance for Loan Losses

The provision for loan losses is based on management's periodic assessment of the adequacy of the allowance for loan losses which, in turn, is based on such interrelated factors as the composition of the loan portfolio and its inherent risk characteristics; the level of nonperforming loans and net charge-offs, both current and historic; local economic and credit conditions; the direction of real estate values; and regulatory guidelines. The provision for loan losses is charged against earnings in order to maintain an allowance for loan losses that reflects management's best estimate of probable losses inherent in the loan portfolio at the balance sheet date.

The provision for loan losses charged to earnings for the three and six months ended June 30, 2013 amounted to \$700 thousand and \$1.3 million, compared to \$600 thousand and \$1.5 million for the same periods in June 30, 2012. Net charge offs for the three and six months ended June 30, 2013 totaled \$4.0 million and \$4.3 million, respectively, compared to \$197 thousand and \$854 thousand, respectively, for the same periods a year earlier. Net charge offs in 2013 included a \$4.0 million charge-off recognized in the second quarter on one commercial mortgage loan. The remaining carrying value of this loan was \$1.0 million at June 30, 2013.

The allowance for loan losses was \$27.9 million, or 1.17% of total loans, at June 30, 2013, compared to \$30.9 million, or 1.35% of total loans, at December 31, 2012. The decline in the ratio of the allowance for loan losses to total loans

reflects charge offs and a decrease in specific reserves on impaired loans. The decline in this ratio also reflects a decrease in estimated loss exposure on loans collectively evaluated for impairment, as evidenced by improvement in commercial loan portfolio credit quality indicators. See additional discussion under the caption "Asset Quality" below for further information on the Allowance for Loan Losses.

Edgar Filing: WASHINGTON TRUST BANCORP INC - Form 10-Q

Periods ended June 30,	2013	2012	2013	2012
Balance at the beginning of period	\$4,420,076	\$4,196,447	\$4,199,640	\$3,900,061
Net investment (depreciation) appreciation & income	(20,956)	(131,896)	193,023	166,259
Net client cash flows	34,454	15,362	40,911	13,593
Balance at the end of period	\$4,433,574	\$4,079,913	\$4,433,574	\$4,079,913

Noninterest Income Analysis

Wealth management revenues for the three and six months ended June 30, 2013 increased by \$439 thousand, or 6%, and \$728 thousand, or 5%, respectively, from the comparable periods in 2012, reflecting increases in asset-based wealth management revenues. Wealth management assets under administration totaled \$4.43 billion at June 30, 2013, up by \$233.9 million, or 6%, from December 31, 2012, largely due to net investment appreciation and income.

Net gains on loan sales and commissions on loans originated for others are dependent on mortgage origination volume and are sensitive to interest rates and the condition of housing markets. For the three and six months ended June 30, 2013, this revenue source increased by \$470 thousand, or 16%, and \$1.5 million, or 25%, respectively, compared to the same periods in 2012. Residential real estate loans sold to the secondary market, including brokered loans, totaled \$132.2 million and \$285.0 million, respectively, for the three and six months ended June 30, 2013. Comparable amounts for the same periods in 2012 were \$118.7 million and \$244.4 million, respectively.

Net realized gains on securities of \$299 thousand were recognized in the second quarter of 2012, primarily due to the sale of mortgage-backed securities associated with the balance sheet management transaction described above in the “Overview” section under the caption “Composition of Earnings.” There were no sales of securities in 2013.

Net gains on interest rate swap contracts for the three and six months ended June 30, 2013 increased by \$156 thousand and \$147 thousand, respectively, from the comparable periods in 2012, largely due to new customer-related interest rate swap contracts executed in 2013.

For the three and six months ended June 30, 2013, equity in losses of unconsolidated subsidiaries (primarily generated by two real estate limited partnerships) amounted to \$57 thousand and \$18 thousand, respectively, compared to equity in earnings of \$124 thousand and \$87 thousand, respectively, for the same periods in 2012. Washington Trust has investments in two real estate limited partnerships that renovate, own and operate two low-income housing complexes. These investments are accounted for under the equity method of accounting and tax credits generated by the partnerships are recorded as a reduction of income tax expense.

Other income for the three and six months ended June 30, 2013 decreased by \$313 thousand and \$299 thousand, respectively, from the same periods in 2012, largely due to a gain of \$348 thousand recognized on the sale of bank property in the second quarter of 2012. There were no such sales in 2013.

For the six months ended June 30, 2013 and 2012, net impairment losses recognized in earnings on investment securities totaled \$2.8 million and \$209 thousand, respectively. There were no impairment losses recognized in the quarters ended June 30, 2013 and 2012. See additional discussion in the “Financial Condition” section under the caption “Securities” below.

Noninterest Expense

Noninterest Expense Analysis

For the three and six months ended June 30, 2013, salaries and employee benefit expense, the largest component of noninterest expense, increased by \$1.1 million, or 8%, and \$2.1 million, or 7%, respectively, compared to the same periods in 2012. Included

in salaries and employee benefit expense in the second quarter of 2013 was \$270 thousand for executive severance related matters. Excluding this item, salaries and employee benefit expense for the three and six months ended June 30, 2013 increased by \$821 thousand, or 6%, and \$1.8 million, or 6%, respectively, from the comparable periods in 2012. The year over year increase largely reflects higher staffing levels to support growth and higher levels of business development based compensation in mortgage banking and other areas.

Net occupancy expense for the three and six months ended June 30, 2013 decreased by \$163 thousand and \$175 thousand, respectively, compared to the same periods in 2012, largely due to a second quarter 2012 charge of \$131 thousand for the termination of an operating lease associated with a branch closure in September 2012.

Equipment expense for the three and six months ended June 30, 2013 increased by \$49 thousand and \$186 thousand, respectively, compared to the same periods a year earlier, due to additional investments in technology and other equipment.

For the three and six months ended June 30, 2013 legal, audit and professional fees increased by \$35 thousand and \$161 thousand, respectively, compared to same periods in 2012. The year over year increase in the year-to-date amounts included approximately \$130 thousand of legal and consulting expenses associated with product development and review.

Foreclosed property costs for the three and six months ended June 30, 2013 decreased by \$33 thousand and \$284 thousand, respectively, from the same periods in 2012, reflecting declines in foreclosure activity.

Debt prepayment penalties totaled \$961 thousand for the three and six months ended June 30, 2012, due to the prepayment of higher cost FHLBB advances associated with the second quarter 2012 balance sheet management transaction described above in the "Overview" section under the caption "Composition of Earnings." There were no prepayments of FHLBB advances in 2013.

Other noninterest expense for the three and six months ended June 30, 2013 decreased by \$118 thousand and \$188 thousand, respectively, compared to same periods in 2012, largely due to declines in credit and collection costs.

Income Taxes

Income tax expense amounted to \$4.1 million and \$7.5 million, respectively, for the three and six months ended June 30, 2013, compared to \$4.0 million and \$7.9 million, respectively, for the same periods in 2012. The Corporation's effective tax rate for the three and six months ended June 30, 2013 was 31.4% and 31.5%, respectively, compared to 31.7% and 31.6%, respectively, for the comparable 2012 periods. The effective tax rates differed from the federal rate of 35%, due largely to the benefits of tax-exempt income, income from bank-owned life insurance and federal tax credits.

Financial Condition

Summary

Total assets amounted to \$3.06 billion at June 30, 2013, a decrease of \$10.6 million from the end of 2012, reflecting the maturity of \$15.0 million in short-term investments, a \$21.2 million decrease in mortgage loans held for sale and a \$65.4 million decrease in the investment securities portfolio; all of which was offset, in part, by loan growth of \$91.0 million.

Nonperforming assets as a percent of total assets amounted to 0.71% at June 30, 2013, down by 12 basis points from the end of 2012, largely due to charge-offs and payoffs on commercial loans. Overall credit quality continues to be affected by relatively weak economic conditions.

Total liabilities decreased by \$18.3 million from the balance at December 31, 2012. Included in this decrease was the June 2013 redemption of \$10.3 million of junior subordinated debentures. See additional discussion regarding this redemption in the “Results of Operations section under the caption “Net Interest Income.” Total deposits amounted to \$2.30 billion at June 30, 2013, a modest decrease of \$8.0 million in the first six months of 2013.

Shareholders’ equity totaled \$303.4 million at June 30, 2013, up by \$7.7 million from the balance at the end of 2012. Capital levels continue to exceed the regulatory minimum levels to be considered well-capitalized, with a total risk-based capital ratio of 13.06% at June 30, 2013, compared to 13.26% at December 31, 2012. The decline in the total risk-based capital ratio reflected the redemption of junior subordinated debentures, which were included in Tier 1 capital.

Securities

Washington Trust's securities portfolio is managed to generate interest income, to implement interest rate risk management strategies, and to provide a readily available source of liquidity for balance sheet management. Securities are designated as either available for sale, held to maturity or trading at the time of purchase. The Corporation does not currently maintain a portfolio of trading securities. Securities available for sale may be sold in response to changes in market conditions, prepayment risk, rate fluctuations, liquidity, or capital requirements. Securities available for sale are reported at fair value, with any unrealized gains and losses excluded from earnings and reported as a separate component of shareholders' equity, net of tax, until realized. Securities held to maturity are reported at amortized cost.

Determination of Fair Value

The Corporation uses an independent pricing service to obtain quoted prices. The prices provided by the independent pricing service are generally based on observable market data in active markets. The determination of whether markets are active or inactive is based upon the level of trading activity for a particular security class. The Corporation reviews the independent pricing service's documentation to gain an understanding of the appropriateness of the pricing methodologies. The Corporation also reviews the prices provided by the independent pricing service for reasonableness based upon current trading levels for similar securities. If the prices appear unusual they are re-examined and the value is either confirmed or revised. In addition, the Corporation periodically performs independent price tests of a sample of securities to ensure proper valuation and to verify our understanding of how securities are priced. As of June 30, 2013 and December 31, 2012, the Corporation did not make any adjustments to the prices provided by the pricing service.

A majority of our fair value measurements utilize Level 2 inputs, which utilize quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in inactive markets, and model-derived valuations in which all significant input assumptions are observable in active markets. Our Level 2 financial instruments consist primarily of available for sale debt securities.

Level 3 financial instruments utilize valuation techniques in which one or more significant input assumptions are unobservable in the markets and which reflect the Corporation's market assumptions. As of June 30, 2013 and December 31, 2012, our Level 3 financial instruments consisted of available for sale pooled trust preferred securities, which were not actively traded.

See Notes 4 and 11 to the Unaudited Consolidated Financial Statements for additional information regarding the determination of fair value of investment securities.

Securities Portfolio

The carrying amounts of securities as of the dates indicated are presented in the following tables:

(Dollars in thousands)	June 30, 2013		December 31, 2012	
	Amount	%	Amount	%
Securities Available for Sale:				
Obligations of U.S. government-sponsored enterprises	\$30,938	10 %	\$31,670	8 %
Mortgage-backed securities issued by U.S. government agencies and U.S. government-sponsored enterprises	181,225	57	231,233	62
States and political subdivisions	67,688	21	72,620	19
Trust preferred securities:				
Individual name issuers	25,077	8	24,751	7
Collateralized debt obligations	397	—	843	—
Corporate bonds	11,389	4	14,381	4
Total securities available for sale	\$316,714	100 %	\$375,498	100 %

Edgar Filing: WASHINGTON TRUST BANCORP INC - Form 10-Q

(Dollars in thousands)	June 30, 2013		December 31, 2012	
	Amount	%	Amount	%
Securities Held to Maturity:				
Mortgage-backed securities issued by U.S. government agencies and U.S. government-sponsored enterprises	\$33,803	100 %	\$40,381	100 %
Total securities held to maturity	\$33,803	100 %	\$40,381	100 %

As of June 30, 2013, the investment portfolio totaled \$350.5 million, down by \$65.4 million from the balance at December 31, 2012, reflecting maturities and principal payments received on mortgage-backed securities which were not reinvested in the securities portfolio.

At June 30, 2013 and December 31, 2012, the net unrealized gain position on securities available for sale and held to maturity amounted to \$7.3 million and \$13.1 million, respectively, and included gross unrealized losses of \$6.6 million and \$9.1 million, respectively. These gross unrealized losses were temporary in nature and concentrated in variable rate trust preferred securities issued by financial services companies.

State and Political Subdivision Holdings

The carrying amount of state and political subdivision holdings included in our securities portfolio at June 30, 2013 totaled \$67.7 million. The following table presents state and political subdivision holdings by geographic location.

(Dollars in thousands)

June 30, 2013	Amortized Cost	Unrealized Gains	Unrealized Losses	Fair Value
New Jersey	\$30,867	\$1,623	\$—	\$32,490
New York	11,441	514	—	11,955
Pennsylvania	7,459	243	—	7,702
Illinois	9,453	223	—	9,676
Other	5,618	247	—	5,865
Total	\$64,838	\$2,850	\$—	\$67,688

The following table presents state and political subdivision holdings by category.

(Dollars in thousands)

June 30, 2013	Amortized Cost	Unrealized Gains	Unrealized Losses	Fair Value
School districts	\$23,184	\$989	\$—	\$24,173
General obligation	34,569	1,634	—	36,203
Revenue obligations (a)	7,085	227	—	7,312
Total	\$64,838	\$2,850	\$—	\$67,688

(a) Includes water and sewer districts, tax revenue obligations and other.

The Bank owns trust preferred security holdings of seven individual name issuers in the financial industry and two pooled trust preferred securities in the form of collateralized debt obligations. The pooled trust preferred holdings consist of trust preferred obligations of banking industry companies and, to a lesser extent, insurance industry companies. The following tables present information concerning the individual named issuers and pooled trust preferred obligations, including credit ratings. The Corporation's Investment Policy contains rating standards that specifically reference ratings issued by Moody's and S&P.

Individual Issuer Trust Preferred Securities

(Dollars in thousands) June 30, 2013

Named Issuer (parent holding company)	(a)	Amortized Cost	Fair Value	Unrealized Loss	Credit Ratings June 30, 2013		Form 10-Q Filing Date

Totals	11	\$30,696	\$25,077	(\$5,619)				

(a) Number of separate issuances, including issuances of acquired institutions.

(b) Rating is below investment grade.

The Corporation's evaluation of the impairment status of individual name trust preferred securities includes various considerations in addition to the degree of impairment and the duration of impairment. We review the reported regulatory capital ratios of the issuer and, in all cases, the regulatory capital ratios were deemed to be in excess of the regulatory minimums. Credit ratings were also taken into consideration, including ratings in effect as of the reporting period date as well as credit rating changes between the reporting period date and the filing date of this report. We noted no additional downgrades to below investment grade between the reporting period date and the filing date of this report. Where available, credit ratings from multiple rating agencies are obtained and rating downgrades are specifically analyzed. Our review process for these credit-sensitive holdings also includes a periodic review of relevant financial information for each issuer, such as quarterly financial reports, press releases and analyst reports. This information is used to evaluate the current and prospective financial condition of the issuer in order to assess the issuer's ability to meet its debt obligations. Through the filing date of this report, each of the individual name issuer securities was current with respect to interest payments. Based on our evaluation of the facts and circumstances relating to each issuer, management concluded that all principal and interest payments for these individual issuer trust preferred securities would be collected according to their contractual terms and it expects to recover the entire amortized cost basis of these securities. Furthermore, Washington Trust does not intend to sell these securities and it is not more likely than not that Washington Trust will be required to sell these securities before recovery of their cost basis, which may be at maturity. Therefore, management does not consider these investments to be other-than-temporarily impaired at June 30, 2013.

Pooled Trust Preferred Obligations

The Bank has investments in two pooled trust preferred securities, Tropic CDO 1, tranche A4L ("Tropic") and PreTSL XXV, tranche C1 ("PreTSL").

Valuations of pooled trust preferred holdings is dependent in part on cash flows from underlying issuers. Unexpected cash flow disruptions could have an adverse impact on the fair value and performance of pooled trust preferred securities. Management believes the unrealized losses on its pooled trust preferred holdings primarily reflects investor

concerns about global economic growth and how it will affect the recent and potential future losses in the financial services industry and the possibility of further incremental deferrals of or defaults on interest payments on trust preferred debentures by financial institutions participating in these pools. These concerns have resulted in a substantial decrease in market liquidity and increased risk premiums for securities in this sector. Credit spreads for issuers in this sector have remained wide during recent months, causing prices to remain at low levels.

The carrying value of Washington Trust's investment in the Tropic security was zero at June 30, 2013, compared to \$2.8 million at December 31, 2012. This investment security had been classified in nonaccruing status with no interest recognition since 2009. In the first quarter of 2013, Washington Trust recognized an other-than-temporary impairment charge of \$2.8 million on the Tropic security due to an announcement of liquidation by the trustee. On March 22, 2013, the trustee for the Tropic security issued a notice that a liquidation of the CDO entity, Tropic CDO I, Ltd., would take place at the direction of holders of the CDO tranches that are senior to certain subordinate tranches, of which Washington Trust is a note holder. The estimated proceeds from the liquidation event are expected to be insufficient to satisfy the amount owed to the note holders of the CDO's subordinate

tranches. The Corporation had recognized other-than-temporary losses amounting to \$2.1 million on this security in years prior to 2013; however, prior to the March 2013 announcement of the liquidation event, the expected future cash flows through the maturity of the CDO in the year 2033 were considered to be sufficient to recover the Corporation's remaining \$2.8 million amortized cost. The recognition of the first quarter 2013 impairment charge and related reduction of fair value to zero resulted in an after-tax charge to earnings of \$1.9 million, or 11 cents per diluted share, and a modest reduction to equity capital of approximately \$400 thousand, which was a reduction of two cents in book value per share.

The following table provides information regarding the PreTSL pooled trust preferred security:

Deal Name	June 30, 2013			No. of Cos. in Issuance	Deferrals & Defaults (a)	Credit Ratings		Form 10-Q Filing Date	
	Amortized Cost	Fair Value	Unrealized Loss			June 30, 2013	Moody's	S&P	Moody's
Preferred Term Securities [PreTSL] XXV, tranche C1	\$1,264	\$397	(\$867)	68	33%	C	(c) (b)	C	(c) (b)
Totals	\$1,264	\$397	(\$867)						

(a) Percentage of pool collateral in deferral or default status.

(b) Not rated by S&P.

(c) Rating is below investment grade.

Washington Trust's investment in PreTSL is subordinate to two senior tranche levels. This investment security has been on nonaccrual status and has been deferring interest payments since December 2008. The June 30, 2013 amortized cost was net of \$1.2 million of credit-related impairment losses previously recognized in earnings reflective of payment deferrals and credit deterioration of the underlying collateral. As of June 30, 2013, this security had unrealized losses of \$867 thousand and a below investment grade rating of "C" by Moody's. Through the filing date of this report, there have been no additional rating changes on this security. This credit rating status has been considered by management in its assessment of the impairment status of this security. Based on information available through the filing date of this report, there have been no additional adverse changes in deferral or default status of the underlying issuer institutions. Based on cash flow forecasts for this security, management expects to recover the remaining amortized cost of this security. Furthermore, Washington Trust does not intend to sell this security and it is not more likely than not that Washington Trust will be required to sell this security before recovery of its cost basis, which may be at maturity. Therefore, management does not consider the unrealized losses on this security to be other-than-temporary at June 30, 2013.

Further deterioration in credit quality of the companies backing the trust preferred securities, further deterioration in the condition of the financial services industry, a continuation or worsening of the current economic downturn, or additional declines in real estate values may further affect the fair value of these securities and increase the potential that certain unrealized losses be designated as other-than-temporary in future periods and the Corporation may incur additional write-downs.

Loans

Total loans amounted to \$2.38 billion at June 30, 2013, up by \$91.0 million, or 4%, in the first six months of 2013, due primarily to growth in the commercial loan and residential mortgage portfolios.

Commercial Loans

Commercial loans fall into two major categories, commercial real estate and other commercial loans (commercial and industrial). A significant portion of the Bank's commercial and industrial loans are also collateralized by real estate,

but are not classified as commercial real estate loans because such loans are not made for the purpose of acquiring, developing, constructing, improving or refinancing the real estate securing the loan, nor is the repayment source income generated directly from such real property.

Commercial Real Estate Loans

Commercial real estate loans amounted to \$797.9 million at June 30, 2013, an increase of \$59.2 million, or 8%, from the \$738.7 million balance at December 31, 2012. Included in these amounts were commercial construction loans of \$39.4 million and \$27.8 million, respectively. The growth in commercial real estate loans was in large part due to enhanced business development efforts with new borrowers.

Commercial real estate loans are secured by a variety of property types, with approximately 82% of the total composed of retail facilities, office buildings, commercial mixed use, lodging, multi-family dwellings and industrial and warehouse properties.

The following table presents a geographic summary of commercial real estate loans, including commercial construction, by property location.

(Dollars in thousands)

	June 30, 2013			December 31, 2012

Other Commercial Loans

Commercial and industrial loans amounted to \$512.2 million at June 30, 2013, a decrease of \$1.5 million from the balance at December 31, 2012. This portfolio includes loans to a variety of business types. Approximately 71% of the total is composed of health care/social assistance, owner occupied and other real estate, retail trade, manufacturing, accommodation and food services, public administration, entertainment and recreation and construction businesses.

Residential Real Estate Loans

The residential real estate loan portfolio amounted to \$748.9 million at June 30, 2013, up by \$31.2 million, or 4.3%, from the balance at December 31, 2012. Washington Trust originates residential real estate mortgages within our general market area of Southern New England for portfolio and for sale in the secondary market. Loans originated for sale are sold with servicing retained or released. Washington Trust also originates residential real estate mortgages for various investors in a broker capacity, including conventional mortgages and reverse mortgages.

Total residential real estate loan originations for retention in portfolio were \$132.6 million and \$101.2 million, respectively, for the six months ended June 30, 2013 and 2012. Total residential real estate loan originations for sale into the secondary market, including loans originated in a broker capacity, were \$268.9 million and \$247.5 million, respectively, for the six months ended June 30, 2013 and 2012.

Prior to March 2009, Washington Trust had periodically purchased one- to four-family residential mortgages originated in other states as well as southern New England from other financial institutions. All residential mortgage loans purchased from other financial institutions were individually underwritten using standards similar to those employed for Washington Trust's self originated loans. Purchased residential mortgage balances totaled \$50.9 million and \$56.0 million, respectively, as of June 30, 2013 and December 31, 2012.

Edgar Filing: WASHINGTON TRUST BANCORP INC - Form 10-Q

The following is a geographic summary of residential mortgages by property location.

(Dollars in thousands)	June 30, 2013			December 31, 2012		
	Amount	% of Total	%	Amount	% of Total	%
Rhode Island, Connecticut, Massachusetts	\$728,067	97.1	%	\$697,814	97.2	%

Ohio	2,748	0.4	%	2,953	0.4	%
Washington and Oregon	1,365	0.2	%	1,379	0.2	%
Georgia	1,092	0.1	%	1,101	0.2	%
New Mexico	472	0.1	%	476	0.1	%
Other	459	0.1	%	464	0.1	%
Total residential mortgages	\$748,871	100.0	%	\$717,681	100.0	%

Consumer Loans

Consumer loans amounted to \$326.0 million at June 30, 2013, an increase of \$2.1 million, or 0.6%, from December 31, 2012. Our consumer portfolio is predominantly home equity lines and home equity loans, representing 83% of the total consumer portfolio at June 30, 2013. Consumer loans also include personal installment loans and loans to individuals secured by general aviation aircraft and automobiles.

Asset Quality

Nonperforming Assets

Nonperforming assets include nonaccrual loans, nonaccrual investment securities and property acquired through foreclosure or repossession.

The following table presents nonperforming assets and additional asset quality data for the dates indicated:

(Dollars in thousands)	Jun 30, 2013	Dec 31, 2012		
Nonaccrual loans:				
Commercial mortgages	\$9,976	\$10,681		
Commercial construction and development	—	—		
Other commercial	1,400	4,412		
Residential real estate mortgages	7,526	6,158		
Consumer	1,124	1,292		
Total nonaccrual loans	20,026	22,543		
Nonaccrual investment securities	397	843		
Property acquired through foreclosure or repossession, net	1,230	2,047		
Total nonperforming assets	\$21,653	\$25,433		
Nonperforming assets to total assets	0.71	%	0.83	%
Nonperforming loans to total loans	0.84	%	0.98	%
Total past due loans to total loans	1.09	%	1.22	%
Accruing loans 90 days or more past due	\$2,431		\$—	

Nonperforming assets decreased to \$21.7 million, or 0.71% of total assets, at June 30, 2013, from \$25.4 million, or 0.83% of total assets, at December 31, 2012. The decrease in nonperforming assets reflects charge-offs and payoffs on commercial loans, as well as dispositions of properties acquired through foreclosure in the six months ended June 30, 2013.

Nonaccrual loans totaled \$20.0 million at June 30, 2013, down by \$2.5 million from the balance at December 31, 2012. Property acquired through foreclosure or repossession amounted to \$1.2 million at June 30, 2013, compared to \$2.0 million at December 31, 2012. The balance at June 30, 2013 consisted of seven commercial properties and three residential properties.

Nonaccrual investment securities at June 30, 2013 and December 31, 2012 were comprised of pooled trust preferred securities. See additional information herein under the caption "Securities" above.

Nonaccrual Loans

During the six months ended June 30, 2013, the Corporation made no changes in its practices or policies concerning the placement of loans or investment securities into nonaccrual status. There were no significant commitments to lend additional funds to borrowers whose loans were on nonaccrual status at June 30, 2013.

The following table presents additional detail on nonaccrual loans as of the dates indicated:

(Dollars in thousands)	June 30, 2013				December 31, 2012				
	Days Past Due		Total	% (1)	Days Past Due		Total	% (1)	
	Over 90	Under 90			Over 90	Under 90

Total nonaccrual loans	\$14,573	\$5,453	\$20,026	0.84 %	\$18,449	\$4,094	\$22,543	0.98 %	

(1) Percentage of nonaccrual loans to the total loans outstanding within the respective category.

Commercial mortgage loans in nonaccrual status decreased by a net \$705 thousand from the balance at the end of 2012. As of June 30, 2013, 87% of nonaccrual commercial mortgage loans consisted of three relationships. The June 30, 2013 balance of nonaccrual commercial mortgage loans is net of charge-offs of \$4.8 million and has a remaining loss allocation of \$700 thousand. All of the nonaccrual commercial mortgage loans were located in Rhode Island, Massachusetts and Connecticut.

The largest nonaccrual relationship in the commercial mortgage category totaled \$4.9 million at June 30, 2013, down from \$5.9 million at December 31, 2012, due to a payoff received in the second quarter of 2013 on one of the loans in this relationship. This relationship is secured by several properties, including office, light industrial and retail space and is collateral dependent. Based on the estimated fair value of the underlying collateral, a \$420 thousand loss allocation was deemed necessary at June 30, 2013. The Bank has additional accruing residential mortgage loans, which are related to the borrower by common guarantor, totaling \$1.0 million at June 30, 2013. These additional loans have performed in accordance with the terms of the loans and were not past due at June 30, 2013. The second largest nonaccrual relationship in the commercial mortgage category totaled \$2.7 million at June 30, 2013 and is secured by an office building. This relationship is collateral dependent and based on the estimated fair value of the underlying collateral, a \$204 thousand loss allocation on this relationship was deemed necessary at June 30, 2013. The third largest commercial mortgage nonaccrual relationship at June 30, 2013 is a commercial mortgage loan with a carrying value of \$1.0 million, down from \$5.1 million at December 31, 2012, reflecting a \$4.0 million charge-off recognized in the second quarter of 2013. This loan is secured by a distribution facility and is collateral dependent. This loan had

been identified as a potential problem loan prior to 2013 and was placed on nonaccrual status in the first quarter of 2013. This loan was current with respect to contractual payment terms as of June 30, 2013.

Other commercial loans (commercial and industrial loans) in nonaccrual status amounted to \$1.4 million at June 30, 2013, down by a net \$3.0 million from the balance at December 31, 2012, reflecting the payoff of \$2.0 million received in the second quarter of 2013 on a commercial and industrial loan relationship. The loss allocation on the balance of nonaccrual commercial and industrial loans was \$330 thousand at June 30, 2013.

Nonaccrual residential mortgage loans increased by \$1.4 million from the balance at the end of 2012. As of June 30, 2013, the \$7.5 million balance of nonaccrual residential mortgage loans consisted of 34 loans, with \$7.0 million located in Rhode Island and Massachusetts. The loss allocation on total nonaccrual residential mortgages was \$1.5 million at June 30, 2013. Included in total nonaccrual residential mortgages at June 30, 2013 were 14 loans purchased for portfolio and serviced by others amounting to \$3.5 million. Management monitors the collection efforts of its third party servicers as part of its assessment of the collectibility of nonperforming loans.

Nonaccrual consumer loans decreased by \$168 thousand from the balance at the end of 2012.

Past Due Loans

The following table presents past due loans by category as of the dates indicated:

(Dollars in thousands)	June 30, 2013		December 31, 2012		
	Amount	% (1)	Amount	% (1)	
Commercial:					
Mortgages	\$9,431	1.18	% \$11,081	1.50	%
Construction and development	—	—	% —	—	%
Other commercial loans	3,967	0.77	% 4,203	0.82	%
Residential real estate mortgages	10,014	1.34	% 10,449	1.46	%
Consumer loans	2,692	0.83	% 2,363	0.73	%
Total past due loans	\$26,104	1.09	% \$28,096	1.22	%

(1)Percentage of past due loans to the total loans outstanding within the respective category.

As of June 30, 2013, total past due loans amounted to \$26.1 million, or 1.09% of total loans, down by \$2.0 million from December 31, 2012.

Included in past due loans as of June 30, 2013 were nonaccrual loans of \$17.2 million. Accruing loans 90 days or more past due amounted to \$2.4 million at June 30, 2013, consisting of one well-secured commercial and industrial loan. This loan was current with respect to interest payments; however, it was past maturity. This loan was renewed in July of 2013 and is no longer past due. All loans 90 days or more past due at December 31, 2012 were classified as nonaccrual.

Troubled Debt Restructurings

Loans are considered restructured in a troubled debt restructuring when the Corporation has granted concessions to a borrower due to the borrower's financial condition that it otherwise would not have considered. These concessions include modifications of the terms of the debt such as reduction of the stated interest rate other than normal market rate adjustments, extension of maturity dates, or reduction of principal balance or accrued interest. The decision to restructure a loan, versus aggressively enforcing the collection of the loan, may benefit the Corporation by increasing the ultimate probability of collection.

Restructured loans are classified as accruing or non-accruing based on management's assessment of the collectibility of the loan. Loans which are already on nonaccrual status at the time of the restructuring generally remain on nonaccrual status for approximately six months before management considers such loans for return to accruing status. Accruing restructured loans are placed into nonaccrual status if and when the borrower fails to comply with the restructured terms and management deems it unlikely that the borrower will return to a status of compliance in the near term.

Troubled debt restructurings are reported as such for at least one year from the date of the restructuring. In years after the restructuring, troubled debt restructured loans are removed from this classification if the restructuring did not involve a below market rate concession and the loan is not deemed to be impaired based on the terms specified in the restructuring agreement. As of June 30, 2013, there were no significant commitments to lend additional funds to borrowers whose loans had been restructured.

The following table sets forth information on troubled debt restructured loans as of the dates indicated. The carrying amounts below consist of unpaid principal balance, net of charge-offs and unamortized deferred loan origination fees and costs. Accrued interest is not included in the carrying amounts set forth below.

(Dollars in thousands)	Jun 30, 2013	Dec 31, 2012
Accruing troubled debt restructured loans:		
Commercial mortgages	\$19,018	\$9,569
Other commercial	2,602	6,577
Residential real estate mortgages	876	1,123
Consumer	242	154
Accruing troubled debt restructured loans	22,738	17,423
Nonaccrual troubled debt restructured loans:		
Commercial mortgages	—	—
Other commercial	590	2,063
Residential real estate mortgages	144	688
Consumer	42	44
Nonaccrual troubled debt restructured loans	776	2,795
Total troubled debt restructured loans	\$23,514	\$20,218

As of June 30, 2013, loans classified as troubled debt restructurings totaled \$23.5 million, up by \$3.3 million from the balance at December 31, 2012.

The largest troubled debt restructured relationship at June 30, 2013 consisted of an accruing commercial mortgage relationship with a carrying value of \$9.5 million, secured by mixed use properties. The restructuring took place in the second quarter of 2013 and included a modification of certain payment terms and a below market rate concession for a temporary period. At June 30, 2013, the second largest troubled debt restructured relationship consisted of an accruing commercial mortgage relationship with a carrying value of \$8.1 million, secured by a hotel industry property. The restructuring took place in the third quarter of 2012 and included a modification of certain payment terms and a below market interest rate reduction for a temporary period on approximately \$3.1 million of the total balance. In connection with this restructuring, additional collateral was also provided by the borrower during the third quarter of 2012.

During the second quarter of 2013, a payoff was received on an accruing troubled debt restructured commercial and industrial loan relationship with a carrying value of \$4.7 million at December 31, 2012.

Potential Problem Loans

The Corporation classifies certain loans as “substandard,” “doubtful,” or “loss” based on criteria consistent with guidelines provided by banking regulators. Potential problem loans consist of classified accruing commercial loans that were less than 90 days past due at June 30, 2013 and other loans for which known information about possible credit problems of the related borrowers causes management to have doubts as to the ability of such borrowers to comply with the present loan repayment terms and which may result in disclosure of such loans as nonperforming at some time in the future. These loans are not included in the amounts of nonaccrual or restructured loans presented above. Management cannot predict the extent to which economic conditions or other factors may impact borrowers and the potential problem loans. Accordingly, there can be no assurance that other loans will not become 90 days or more past due, be placed on nonaccrual, become restructured, or require increased allowance coverage and provision for loan losses. The Corporation has identified approximately \$973 thousand in potential problem loans at June 30, 2013, compared to \$6.4 million at December 31, 2012. The decrease from the end of 2012 is attributable to the reclassification to nonaccrual status in 2013 of the third largest nonaccrual commercial mortgage relationship described above under the caption “Nonaccrual loans.” Potential problem loans are assessed for loss exposure using the methods described in Note 5 to the Unaudited Consolidated Financial Statements under the caption “Credit Quality Indicators.”

Allowance for Loan Losses

Establishing an appropriate level of allowance for loan losses necessarily involves a high degree of judgment. The Corporation uses a methodology to systematically measure the amount of estimated loan loss exposure inherent in the loan portfolio for

purposes of establishing a sufficient allowance for loan losses. For a more detailed discussion on the allowance for loan losses, see additional information in Item 7 under the caption “Critical Accounting Policies and Estimates” of Washington Trust’s Annual Report on Form 10-K for the fiscal year ended December 31, 2012.

The allowance for loan losses is management’s best estimate of probable loan losses inherent in the loan portfolio as of the balance sheet date. The allowance is increased by provisions charged to earnings and by recoveries of amounts previously charged off, and is reduced by charge-offs on loans. The status of nonaccrual loans, delinquent loans and performing loans were all taken into consideration in the assessment of the adequacy of the allowance for loans losses. In addition, the balance and trends of credit quality indicators, including the commercial loan categories of Pass, Special Mention and Classified, are integrated into the process used to determine the allocation of loss exposure. See Note 5 to the Unaudited Consolidated Financial Statements for additional information under the caption “Credit Quality Indicators.” While management believes that the level of allowance for loan losses at June 30, 2013 is adequate and consistent with asset quality and delinquency indicators, management will continue to assess the adequacy of the allowance for loan losses in accordance with its established policies.

The Bank’s general practice is to identify problem credits early and recognize full or partial charge-offs as promptly as practicable when it is determined that the collection of loan principal is unlikely. The Bank recognizes full or partial charge-offs on collateral dependent impaired loans when the collateral is deemed to be insufficient to support the carrying value of the loan. The Bank does not recognize a recovery when an updated appraisal indicates a subsequent increase in value.

The estimation of loan loss exposure inherent in the loan portfolio includes, among other procedures, (1) identification of loss allocations for individual loans deemed to be impaired in accordance with GAAP, (2) loss allocation factors for non-impaired loans based on credit grade, loss experience, delinquency factors and other similar economic indicators, and (3) general loss allocations, classified as an “unallocated” portion of the total allowance, for measurement imprecision attributable to uncertainty in the economic environment and ever changing conditions, as well as qualitative and quantitative assessments of other environmental factors. We periodically reassess and revise the loss allocation factors used in the assignment of loss exposure to appropriately reflect our analysis of migrational loss experience. We analyze historical loss experience in the various portfolios over periods deemed to be relevant to the inherent risk of loss in the respective portfolios as of the balance sheet date. Revisions to loss allocation factors are not retroactively applied.

The methodology to measure the amount of estimated loan loss exposure includes an analysis of individual loans deemed to be impaired. Impaired loans are loans for which it is probable that the Bank will not be able to collect all amounts due according to the contractual terms of the loan agreements and all loans restructured in a troubled debt restructuring. Impaired loans do not include large groups of smaller-balance homogeneous loans that are collectively evaluated for impairment, which consist of most residential mortgage loans and consumer loans. Impairment is measured on a discounted cash flow method based upon the loan’s contractual effective interest rate, or at the loan’s observable market price, or if the loan is collateral dependent, at the fair value of the collateral less costs to sell. For collateral dependent loans, management may adjust appraised values to reflect estimated market value declines or apply other discounts to appraised values for unobservable factors resulting from its knowledge of circumstances associated with the property.

The following is a summary of impaired loans by measurement type:

(Dollars in thousands)	Jun 30, 2013	Dec 31, 2012
Collateral dependent impaired loans (1)	\$25,124	\$23,359
Impaired loans measured on discounted cash flow method (2)	12,093	12,188
Total impaired loans	\$37,217	\$35,547

(1) Net of partial charge-offs of \$5.2 million and \$2.3 million, respectively, at June 30, 2013 and December 31, 2012.

(2) Net of partial charge-offs of \$119 thousand and \$92 thousand, respectively, at June 30, 2013 and December 31, 2012.

Impaired loans consist of nonaccrual commercial loans, troubled debt restructured loans and other loans classified as impaired. The loss allocation on impaired loans amounted to \$2.1 million and \$2.9 million, respectively, at June 30, 2013 and December 31, 2012. Various loan loss allowance coverage ratios are affected by the timing and extent of charge-offs, particularly with respect to impaired collateral dependent loans. For such loans, the Bank generally recognizes a partial charge-off equal to the identified loss exposure; therefore, the remaining allocation of loss is minimal.

Other individual commercial loans and commercial mortgage loans not deemed to be impaired are evaluated using the internal rating system and the application of loss allocation factors. The loan rating system is described under the caption "Credit Quality Indicators" in Note 5 to the Unaudited Consolidated Financial Statements. The loan rating system and the related loss allocation factors take into consideration parameters including the borrower's financial condition, the borrower's performance with respect to loan terms, and the adequacy of collateral. Portfolios of more homogeneous populations of loans including residential mortgages and consumer loans are analyzed as groups taking into account delinquency ratios and other indicators, as well as our historical loss experience for each type of credit product. We continue to periodically reassess and revise the loss allocation factors and estimates used in the assignment of loss exposure to appropriately reflect our analysis of migrational loss experience.

Appraisals are generally obtained with values determined on an "as is" basis from independent appraisal firms for real estate collateral dependent commercial loans in the process of collection or when warranted by other deterioration in the borrower's credit status. Updates to appraisals are generally obtained for troubled or nonaccrual loans or when management believes it is warranted. The Corporation has continued to maintain appropriate professional standards regarding the professional qualifications of appraisers and has an internal review process to monitor the quality of appraisals.

For residential mortgages and real estate collateral dependent consumer loans that are in the process of collection, valuations are obtained from independent appraisal firms with values determined on an "as is" basis.

The provision for loan losses charged to earnings for the three and six months ended June 30, 2013 amounted to \$700 thousand and \$1.3 million, compared to \$600 thousand and \$1.5 million for the same periods in 2012. Net charge offs for the three and six months ended June 30, 2013 totaled \$4.0 million and \$4.3 million, respectively, compared to \$197 thousand and \$854 thousand, respectively, for the same periods a year earlier. Net charge offs in 2013 included a \$4.0 million charge-off recognized in the second quarter on one commercial mortgage loan. The remaining carrying value of this loan was \$1.0 million at June 30, 2013.

As of June 30, 2013, the allowance for loan losses was \$27.9 million, or 1.17% of total loans, compared to \$30.9 million, or 1.35% of total loans at December 31, 2012. The decline in the ratio of the allowance for loan losses to total loans reflects charge offs and a decrease in specific reserves on impaired loans. The decline in this ratio also reflects a decrease in estimated loss exposure on loans collectively evaluated for impairment, as evidenced by improvement in commercial loan portfolio credit quality indicators. See Note 5 to the Unaudited Consolidated Financial Statements for additional information under the caption "Credit Quality Indicators."

The following table presents additional detail on the Corporation's loan portfolio and associated allowance for loan losses as of the dates indicated.

	June 30, 2013				December 31, 2012			
	Loans	Related Allowance	Allowance / Loans		Loans	Related Allowance	Allowance / Loans	
Impaired loans individually evaluated for impairment	\$37,217	\$2,126	5.71	%	\$35,547	\$2,880	8.10	%
Loans collectively evaluated for impairment	2,347,763	17,487	0.74	%	2,258,456	19,700	0.87	%
Unallocated	—	8,271	—	—	—	8,293	—	—
Total	\$2,384,980	\$27,884	1.17	%	\$2,294,003	\$30,873	1.35	%

Balance at end of period	\$27,884	100 %	\$30,873	100 %

(1) Percentage of loans within the respective category to the total loans outstanding.

Sources of Funds

Our sources of funds include deposits, brokered certificates of deposit, FHLBB borrowings, other borrowings and proceeds from the sales, maturities and payments of loans and investment securities. Washington Trust uses funds to originate and purchase loans, purchase investment securities, conduct operations, expand the branch network and pay dividends to shareholders.

Management's preferred strategy for funding asset growth is to grow low-cost deposits, including demand deposit, NOW and savings accounts. Asset growth in excess of low-cost deposits is typically funded through higher-cost deposits (including certificates of deposit and money market accounts), brokered certificates of deposit, FHLBB borrowings, and securities portfolio cash flow.

Deposits

Washington Trust offers a wide variety of deposit products to consumer and business customers. Deposits provide an important source of funding for the Bank as well as an ongoing stream of fee revenue.

Washington Trust is a participant in the Insured Cash Sweep ("ICS") program, a low-cost reciprocal deposit sweep service, and in the Certificate of Deposit Account Registry Service ("CDARS") program. Washington Trust uses ICS to place customer funds into money market accounts issued by other participating banks and CDARS to place customer funds into certificate of deposit accounts issued by other participating banks. These transactions occur in amounts that are less than FDIC insurance limits to ensure that depositor customers are eligible for full FDIC insurance. We receive reciprocal amounts of deposits from other participating banks who do the same with their customer deposits. ICS and CDARS deposits are considered to be brokered deposits for bank regulatory purposes. We consider these reciprocal deposit balances to be in-market deposits as distinguished from traditional out-of-market brokered deposits.

Total deposits amounted to \$2.30 billion at June 30, 2013, down by a modest by \$8.0 million from the balance at December 31, 2012.

Demand deposits totaled \$358.8 million at June 30, 2013, down by \$21.1 million, or 6%, from the balance at December 31, 2012. NOW account balances increased by \$9.9 million, or 3%, and totaled \$301.1 million at June 30, 2013. In the second quarter of 2013, savings deposits increased by \$18.4 million, or 7%, and amounted to \$293.4 million at June 30, 2013.

Money market accounts (including brokered money market deposits) totaled \$540.0 million at June 30, 2013, up by \$43.6 million, or 9%, from the balance at December 31, 2012. Included in total money market deposits were ICS reciprocal money market deposits totaling \$165.7 million at June 30, 2013, up \$23.0 million from the balance at

December 31, 2012.

Time deposits (including brokered certificates of deposit) amounted to \$811.3 million at June 30, 2013, down by \$58.9 million, or 7%, from the balance at December 31, 2012. The Corporation utilizes out-of-market brokered time deposits as part of its overall funding program along with other sources. Excluding out-of-market brokered certificates of deposits, in-market time deposits totaled \$715.1 million and \$767.6 million, respectively, at June 30, 2013 and December 31, 2012. Included in in-market

time deposits at June 30, 2013 were CDARS reciprocal time deposits of \$159.7 million, down \$7.1 million from the balance at December 31, 2012.

Borrowings

The Corporation utilizes advances from the FHLBB as well as other borrowings as part of its overall funding strategy. FHLBB advances are used to meet short-term liquidity needs, to purchase securities and to purchase loans from other institutions. FHLBB advances amounted to \$373.3 million at June 30, 2013, up by \$12.2 million from the balance at the end of 2012.

In February 2013, the Corporation modified the terms to extend the maturity dates of \$72.5 million of its FHLBB advances with original maturity dates in 2015. The original weighted average interest rate was 3.68% and was revised to 3.09% with maturities ranging from 2017 to 2019. As a result, the Corporation realized interest expense savings of approximately \$178 thousand in the first six months of 2013 and expects an additional interest expense savings of approximately \$218 thousand for the remainder of 2013.

Redemption of Certain Trust Preferred Securities and Related Junior Subordinated Debentures

The Bancorp is the sponsor of the Washington Preferred Capital Trust (“WPCT”), a statutory trust created for the sole purpose of the April 7, 2008 issuance of trust preferred securities, the proceeds of which were invested in junior subordinated debentures of the Bancorp. On June 17, 2013, the Bancorp redeemed in whole at par the outstanding trust preferred securities and related subordinated debentures totaling \$10.0 million in trust preferred securities at an interest rate of three-month LIBOR plus 3.50%. The source of funds used for the redemption was made available from our balance sheet liquidity. The Bancorp also had a related interest rate swap contract designated as a cash flow hedge, which matured at redemption on June 17, 2013. In connection with the redemption, unamortized debit issuance costs of \$244 thousand were expensed and classified as interest expense in June 2013. The Corporation anticipates interest expense savings, as a result of the redemption, of approximately \$182 thousand in the second half of 2013.

Liquidity and Capital Resources

Liquidity Management

Liquidity is the ability of a financial institution to meet maturing liability obligations and customer loan demand. Washington Trust’s primary source of liquidity is deposits, which funded approximately 76% of total average assets in the six months ended June 30, 2013. While the generally preferred funding strategy is to attract and retain low cost deposits, the ability to do so is affected by competitive interest rates and terms in the marketplace. Other sources of funding include discretionary use of purchased liabilities (e.g., FHLBB term advances and other borrowings), cash flows from the Corporation’s securities portfolios and loan repayments. Securities designated as available for sale may also be sold in response to short-term or long-term liquidity needs although management has no intention to do so at this time. For a more detailed discussion on Washington Trust’s detailed liquidity funding policy and contingency funding plan, see additional information in Item 7 under the caption “Liquidity and Capital Resources” of Washington Trust’s Annual Report on Form 10-K for the fiscal year ended December 31, 2012.

Liquidity remained well within target ranges established by the Corporation’s Asset/Liability Committee (“ALCO”) during the six months ended June 30, 2013. Based on its assessment of the liquidity considerations described above, management believes the Corporation’s sources of funding will meet anticipated funding needs.

For the six months ended June 30, 2013, net cash used in financing activities amounted to \$14.4 million, reflecting the use of cash for the redemption of \$10.3 million in junior subordinated debentures in the second quarter of 2013. In addition, FHLBB advances increased by \$12.2 million, while total deposits decreased by \$8.0 million in the first six months of 2013. Net cash used in investing activities totaled \$31.4 million for the six months ended June 30, 2013. The most significant elements of cash flow within investment activities were net outflows related to growth in the loan portfolio, offset by cash received from maturities and principal payments of securities available for sale, primarily mortgage-backed securities. Net cash provided by operating activities amounted to \$36.8 million for the six months

ended June 30, 2013. Net income totaled \$16.4 million in the six months of 2013 and the most significant adjustments to reconcile net income to net cash provided by operating activities pertained to mortgage banking activities. See the Corporation's Consolidated Statements of Cash Flows for further information about sources and uses of cash.

Capital Resources

Total shareholders' equity amounted to \$303.4 million at June 30, 2013, compared to \$295.7 million at December 31, 2012.

The ratio of total equity to total assets amounted to 9.91% at June 30, 2013. This compares to a ratio of 9.62% at December 31, 2012. Book value per share at June 30, 2013 and December 31, 2012 amounted to \$18.40 and \$18.34, respectively.

The Bancorp and the Bank are subject to various regulatory capital requirements. As of June 30, 2013, the Bancorp and the Bank are categorized as “well-capitalized” under the regulatory framework for prompt corrective action. As indicated under the caption “Borrowings” in the “Sources of Funds” section above, the Bancorp redeemed junior subordinated debentures issued to Washington Preferred Capital Trust on June 17, 2013. This transaction reduced the regulatory capital levels of total capital and Tier 1 capital in the Bancorp and the Bank by approximately \$10.0 million.

See Note 9 to the Unaudited Consolidated Financial Statements for additional discussion of capital requirements.

Contractual Obligations and Commitments

The Corporation has entered into numerous contractual obligations and commitments. The following tables summarize our contractual cash obligations and other commitments at June 30, 2013:

(Dollars in thousands)	Payments Due by Period				
	Total	Less Than 1 Year (1)	1-3 Years	4-5 Years	After 5 Years
Contractual Obligations:					
FHLBB advances (2)	\$373,341	\$62,740	\$55,163	\$171,375	\$84,063
Junior subordinated debentures	22,681	—	—	—	22,681
Operating lease obligations	23,158	2,390	3,945	2,900	13,923
Software licensing arrangements	3,613	2,130	1,266	217	—
Other borrowings	199	43	97	59	—
Total contractual obligations	\$422,992	\$67,303	\$60,471	\$174,551	\$120,667

(1) Maturities or contractual obligations are considered by management in the administration of liquidity and are routinely refinanced in the ordinary course of business.

(2) All FHLBB advances are shown in the period corresponding to their scheduled maturity. Some FHLBB advances are callable at earlier dates.

(Dollars in thousands)	Amount of Commitment Expiration – Per Period				
	Total	Less Than 1 Year	1-3 Years	4-5 Years	After 5 Years
Other Commitments:					
Commercial loans	\$225,599	\$153,685	\$29,646	\$17,702	\$24,566
Home equity lines	195,981	—	—	—	195,981
Other loans	29,152	21,875	4,264	3,013	—
Standby letters of credit	1,222	1,222	—	—	—
Forward loan commitments to:					
Originate loans	51,435	51,435	—	—	—
Sell loans	80,598	80,598	—	—	—
Customer related derivative contracts:					
Interest rate swaps with customers	65,334	11,639	24,371	23,826	5,498
Mirror swaps with counterparties	65,334	11,639	24,371	23,826	5,498
Interest rate risk management contract:					
Interest rate swap contracts	22,681	—	22,681	—	—
Total commitments	\$737,336	\$332,093	\$105,333	\$68,367	\$231,543

Off-Balance Sheet Arrangements

For information on financial instruments with off-balance sheet risk and derivative financial instruments see Notes 10 and 17 to the Unaudited Consolidated Financial Statements.

Asset/Liability Management and Interest Rate Risk

Interest rate risk is the primary market risk category associated with the Corporation's operations. The ALCO is responsible for establishing policy guidelines on liquidity and acceptable exposure to interest rate risk. Periodically, the ALCO reports on the status of liquidity and interest rate risk matters to the Bank's Board of Directors. Interest rate risk is the risk of loss to future earnings due to changes in interest rates. The objective of the ALCO is to manage assets and funding sources to produce results that are consistent with Washington Trust's liquidity, capital adequacy, growth, risk and profitability goals.

The ALCO manages the Corporation's interest rate risk using income simulation to measure interest rate risk inherent in the Corporation's on-balance sheet and off-balance sheet financial instruments at a given point in time by showing the effect of interest rate shifts on net interest income over a 12-month horizon, the 13- to 24-month horizon and a 60-month horizon. The simulations assume that the size and general composition of the Corporation's balance sheet remain static over the simulation horizons, with the exception of certain deposit mix shifts from low-cost core savings to higher-cost time deposits in selected interest rate scenarios. Additionally, the simulations take into account the specific repricing, maturity, call options, and prepayment characteristics of differing financial instruments that may vary under different interest rate scenarios. The characteristics of financial instrument classes are reviewed periodically by the ALCO to ensure their accuracy and consistency.

The ALCO reviews simulation results to determine whether the Corporation's exposure to a decline in net interest income remains within established tolerance levels over the simulation horizons and to develop appropriate strategies to manage this exposure. As of June 30, 2013 and December 31, 2012, net interest income simulations indicated that exposure to changing interest rates over the simulation horizons remained within tolerance levels established by the Corporation. The Corporation defines maximum unfavorable net interest income exposure to be a change of no more than 5% in net interest income over the first 12 months, no more than 10% over the second 12 months, and no more than 10% over the full 60-month simulation horizon. All changes are measured in comparison to the projected net interest income that would result from an "unchanged" rate scenario where both interest rates and the composition of the Corporation's balance sheet remain stable for a 60-month period. In addition to measuring the change in net interest income as compared to an unchanged interest rate scenario, the ALCO also measures the trend of both net interest income and net interest margin over a 60-month horizon to ensure the stability and adequacy of this source of earnings in different interest rate scenarios.

The ALCO regularly reviews a wide variety of interest rate shift scenario results to evaluate interest risk exposure, including scenarios showing the effect of steepening or flattening changes in the yield curve of up to 500 basis points as well as parallel changes in interest rates of up to 400 basis points. Because income simulations assume that the Corporation's balance sheet will remain static over the simulation horizon, the results do not reflect adjustments in strategy that the ALCO could implement in response to rate shifts.

The following table sets forth the estimated change in net interest income from an unchanged interest rate scenario over the periods indicated for parallel changes in market interest rates using the Corporation's on- and off-balance sheet financial instruments as of June 30, 2013 and December 31, 2012. Interest rates are assumed to shift by a parallel 100, 200 or 300 basis points upward or 100 basis points downward over a 12-month period, except for core savings deposits, which are assumed to shift by lesser amounts due to their relative historical insensitivity to market interest rate movements. Further, deposits are assumed to have certain minimum rate levels below which they will not fall. It should be noted that the rate scenarios shown do not necessarily reflect the ALCO's view of the "most likely" change in interest rates over the periods indicated.

	June 30, 2013		December 31, 2012	
	Months 1 - 12	Months 13 - 24	Months 1 - 12	Months 13 - 24
100 basis point rate decrease	(1.63)% (6.25)%	(2.33)%	(7.33)%
100 basis point rate increase	1.83	% 3.31%	3.11%	5.86%
200 basis point rate increase	3.74	% 6.96%	6.36%	10.98%

Edgar Filing: WASHINGTON TRUST BANCORP INC - Form 10-Q

300 basis point rate increase	4.49	% 7.32%	8.34%	13.19%
-------------------------------	------	---------	-------	--------

The ALCO estimates that the negative exposure of net interest income to falling rates as compared to an unchanged rate scenario results from a more rapid decline in earning asset yields compared to rates paid on deposits. If market interest rates were to fall from their already low levels and remain lower for a sustained period, certain core savings and time deposit rates could decline more slowly and by a lesser amount than other market rates. Asset yields would likely decline more rapidly than deposit costs as current asset holdings mature or reprice, since cash flow from mortgage-related prepayments and redemption of callable securities would increase as market rates fall.

The positive exposure of net interest income to rising rates as compared to an unchanged rate scenario results from a more rapid projected relative rate of increase in asset yields than funding costs over the near term. For simulation purposes, deposit rate changes are anticipated to lag other market rates in both timing and magnitude. The ALCO's estimate of interest rate risk exposure to rising rate environments, including those involving changes to the shape of the yield curve, incorporates certain assumptions regarding the shift in deposit balances from low-cost core savings categories to higher-cost deposit categories, which has characterized a shift in funding mix during the past rising interest rate cycles. The relative decrease in positive exposure of net interest income to rising rates from December 31, 2012 to June 30, 2013 was largely attributable to changes in balance sheet composition and a steepening of the yield curve.

While the ALCO reviews and updates simulation assumptions and also periodically back-tests the simulation results to ensure that the assumptions are reasonable and current, income simulation may not always prove to be an accurate indicator of interest rate risk or future net interest margin. Over time, the repricing, maturity and prepayment characteristics of financial instruments and the composition of the Corporation's balance sheet may change to a different degree than estimated. Simulation modeling assumes a static balance sheet, with the exception of certain modeled deposit mix shifts from low-cost core savings deposits to higher-cost time deposits in rising rate scenarios as noted above. Due to the current low level of market interest rates, the banking industry has experienced relatively strong growth in low-cost core deposits over the past several years. The ALCO recognizes that a portion of these increased levels of low-cost balances could shift into higher yielding alternatives in the future, particularly if interest rates rise and as confidence in financial markets strengthens, and has modeled increased amounts of deposit shifts out of these low-cost categories into higher-cost alternatives in the rising rate simulation scenarios presented above. Deposit balances may also be subject to possible outflow to non-bank alternatives in a rising rate environment, which may cause interest rate sensitivity to differ from the results as presented. Another significant simulation assumption is the sensitivity of core savings deposits to fluctuations in interest rates. Income simulation results assume that changes in both core savings deposit rates and balances are related to changes in short-term interest rates. The relationship between short-term interest rate changes and core deposit rate and balance changes may differ from the ALCO's estimates used in income simulation. It should be noted that the static balance sheet assumption does not necessarily reflect the Corporation's expectation for future balance sheet growth, which is a function of the business environment and customer behavior. Lastly, mortgage-backed securities and mortgage loans involve a level of risk that unforeseen changes in prepayment speeds may cause related cash flows to vary significantly in differing rate environments. Such changes could affect the level of reinvestment risk associated with cash flow from these instruments, as well as their market value. Changes in prepayment speeds could also increase or decrease the amortization of premium or accretion of discounts related to such instruments, thereby affecting interest income.

The Corporation also monitors the potential change in market value of its available for sale debt securities in changing interest rate environments. The purpose is to determine market value exposure that may not be captured by income simulation, but which might result in changes to the Corporation's capital position. Results are calculated using industry-standard analytical techniques and securities data.

The following table summarizes the potential change in market value of the Corporation's available for sale debt securities as of June 30, 2013 and December 31, 2012 resulting from immediate parallel rate shifts:

(Dollars in thousands)

Security Type	Down 100 Basis Points	Up 200 Basis Points	
U.S. government-sponsored enterprise securities (noncallable)	\$294	(\$576)
States and political subdivisions	1,043	(3,096)
Mortgage-backed securities issued by U.S. government agencies and U.S. government-sponsored enterprises	2,861	(9,141)
Trust preferred debt and other corporate debt securities	77	1,076	

Edgar Filing: WASHINGTON TRUST BANCORP INC - Form 10-Q

Total change in market value as of June 30, 2013	\$4,275	(\$11,737)
Total change in market value as of December 31, 2012	\$4,700	(\$12,824)

ITEM 3. Quantitative and Qualitative Disclosures About Market Risk

Information regarding quantitative and qualitative disclosures about market risk appears under Item 2, “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” under the caption “Asset/Liability Management and Interest Rate Risk.”

ITEM 4. Controls and Procedures

Disclosure Controls and Procedures

As required by Rule 13a-15 under the Securities Exchange Act of 1934, as amended (the “Exchange Act”), the Corporation carried out an evaluation under the supervision and with the participation of the Corporation’s management, including the Corporation’s principal executive officer and principal financial officer, of the Corporation’s disclosure controls and procedures as of the periods ended June 30, 2013. Based upon that evaluation, the principal executive officer and principal financial officer concluded that the Corporation’s disclosure controls and procedures are effective and designed to ensure that information required to be disclosed by the Corporation in the reports it files or submits under the Exchange Act is (i) recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms and (ii) accumulated and communicated to the Corporation’s management including its Chief Executive Officer and Chief Financial Officer as appropriate to allow timely decisions regarding required disclosures. The Corporation will continue to review and document its disclosure controls and procedures and consider such changes in future evaluations of the effectiveness of such controls and procedures, as it deems appropriate.

Internal Control Over Financial Reporting

The Corporation’s management is responsible for establishing and maintaining adequate internal control over financial reporting as such term is defined by the Exchange Act Rule 13a-15(f). The Corporation’s internal control system was designed to provide reasonable assurance to its management and the Board of Directors regarding the preparation and fair presentation of published financial statements. All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. The Corporation’s management assessed the effectiveness of its internal control over financial reporting as of the end of the period covered by this report.

There has been no change in our internal control over financial reporting during the period ended June 30, 2013 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II

Other Information

Item 1. Legal Proceedings

The Corporation is involved in various claims and legal proceedings arising out of the ordinary course of business. Management is of the opinion, based on its review with counsel of the development of such matters to date, that the ultimate disposition of such matters will not materially affect the consolidated financial position or results of operations of the Corporation.

Item 1A. Risk Factors

In addition to the risk factor discussed below and other information set forth in this report, you should carefully consider the factors discussed in Item 1A to Part I of Washington Trust's Annual Report on Form 10-K for the year ended December 31, 2012.

We will become subject to more stringent capital requirements.

The Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act") required the federal banking agencies to establish minimum leverage and risk-based capital requirements for insured banks and their holding companies. The federal banking agencies issued a joint final rule, or the "Final Capital Rule," that implements the Basel III capital standards and establishes the minimum capital levels required under the Dodd-Frank Act. We must comply with the Final Capital Rule by January 1, 2015. The Final Capital Rule establishes a minimum common equity Tier I capital ratio of 6.5% of risk-weighted assets for a "well capitalized" institution and increases the minimum Tier I capital ratio for a "well capitalized" institution from 6% to 8%. Additionally, the Final Capital Rule requires an institution to maintain a 2.5% common equity Tier I capital conservation buffer over the 6.5% minimum risk-based capital requirement to avoid restrictions on the ability to pay dividends, discretionary bonuses, and engage in share repurchases. The Final Capital Rule permanently grandfathered trust preferred securities issued before May 19, 2010, subject to a limit of 25% of Tier I capital. The Final Capital Rule increases the required capital for certain categories of assets, including high volatility construction real estate loans and certain exposures related to securitizations; however, the Final Capital Rule retains the current capital treatment of residential mortgages. Under the Final Capital Rule, we may make a one-time, permanent election to continue to exclude accumulated other comprehensive income from capital. If we do not make this election, unrealized gains and losses will be included in the calculation of our regulatory capital. Implementation of these standards, or any other new regulations, may adversely affect our ability to pay dividends, or require us to reduce business levels or raise capital, including in ways that may adversely affect our results of operations or financial condition.
