(1) We believe that funds from operations is an important supplemental measure of operating performance. We, therefore, disclose funds from operations, although it is a measurement that is not defined by accounting principles generally accepted in the United States. We generally use the National Association of Real Estate Investment Trusts (NAREIT) measure of funds from operations. We define funds from operations as income before extraordinary items adjusted for certain non-cash items, primarily real estate depreciation, less gains/losses on sales of facilities. Our

Edgar Filing: NATIONAL HEALTH INVESTORS INC - Form 8-K

measure may not be comparable to similarly titled measures used by other REITs. Consequently, our funds from operations may not provide a meaningful measure of our performance as compared to that of other REITs. Funds from operations does not represent cash generated from operating activities as defined by accounting principles generally accepted in the United States (funds from operations does not include changes in operating assets and liabilities) and, therefore, should not be considered as an alternative to net income as the primary indicator of operating performance or to cash flow as a measure of liquidity.

<sup>(2)</sup>We have complied with the SEC's interpretation that recurring impairments taken on real property may not be added back to net income in the calculation of FFO. The SEC's position is that recurring impairments on real property are not an appropriate adjustment.
