Note 1 General

The accompanying unaudited consolidated financial statements include the accounts of Webco Industries, Inc. ("Webco" or together with its subsidiary, the "Company") and its wholly owned subsidiary Phillips & Johnston, Inc. ("P&J"), a Chicago based sales organization and value-added processor of tubular products. All significant intercompany accounts and transactions have been eliminated in the accompanying financial statements.

The financial statements include, in the opinion of management, all adjustments (which are of a normal recurring nature) necessary for a fair presentation of financial position at October 31, 2001, and results of operations and cash flows for the three months ended October 31, 2001 and October 31, 2000. Results for the three months ended October 31, 2001 are not necessarily indicative of results that will be realized for the full fiscal year. The year-end balance sheet was derived from the audited consolidated financial statements, but does not include all disclosures required by generally accepted accounting principles. The unaudited consolidated financial statements should be read in conjunction with the audited consolidated financial statements and related notes which can be found in the Company's Form 10-K for the year ended July 31, 2001.

Edgar Filing: WEBCO INDUSTRIES INC - Form 10-Q

In fiscal year 2001, the Company changed its accounting for freight expense to include it as a cost of sale rather than as a reduction of revenue. Net Sales and Cost of Sales for the three months ended October 31, 2000 have each been increased in the amount of \$1,038,000 in the accompanying statements of operations to conform to the new presentation. This reclassification had no effect on gross profit or net loss for the period.

Our independent accountants have performed a review of these interim financial statements in accordance with standards established by the American Institute of Certified Public Accountants. Pursuant to Rule 436 (c) under the Securities Act of 1933 their report of that review should not be considered as part of any registration statements prepared or certified by them within the meaning of Section 7 and 11 of that Act.

Note 2 - Inventories

At October 31, 2001 and July 31, 2001, inventories were as follows (in thousands):

	<u>October 31, 2001</u>	<u>July 31, 2001</u>
Raw materials	\$ 11,758	\$ 11,269
Work-in-process	1,887	1,908
Finished goods	15,297	17,558
Maintenance parts and supplies	<u>2,706</u>	<u>2,616</u>
Total inventories	\$ 31,648 =====	\$ 33,351 =====

6

Note 3 - Contingencies

The Company is a party to various lawsuits and claims arising in the ordinary course of business. Management, after review and consultation with legal counsel, considers that any liability resulting from these matters would not materially affect the results of operations or the financial position of the Company.

Note 4 - Common Stock and Common Stock Equivalents

Presented below is a reconciliation of the differences between actual weighted average shares outstanding and diluted weighted average shares (in thousands, except per share amounts).

Three Months Ended

October 31,

Edgar Filing: WEBCO INDUSTRIES INC - Form 10-Q

Anti-dilutive options outstanding:		
Number of options	678 =====	721 =====
Weighted average exercise price	\$ 5.80 =====	\$ 5.85 =====

Note 5 - Segment Information

The Company applies the provisions of FAS 131 "Disclosures about Segments of an Enterprise and Related Information". The Company has two reportable segments: tubing products and QuikWater, representing the Company's two strategic business units offering different products. The Company internally evaluates its business by facility, however, because of the similar economic characteristics of the tubing operations, including the nature of products, processes and customers, those operations have been aggregated for segment reporting purposes. The tubing products segment manufactures, as well as distributes, tubular products principally made of carbon and stainless steel. QuikWater manufactures a patented direct contact, high efficiency water heater.

7

The Company measures segment profit or loss as earnings before interest and income taxes ("EBIT"). Information on the Company's segments is as follows (Dollars in thousands):

	Tubing		
	<u>Products</u>	<u>QuikWater</u>	<u>Total</u>
	(Dollars in thousands)		
<b>Quarter-ended October 31, 2001:</b>

8

REPORT OF INDEPENDENT ACCOUNTANT

To the Board of Directors and Shareholders of  
Webco Industries, Inc.

We have reviewed the accompanying consolidated balance sheet of Webco Industries, Inc. and subsidiary as of October 31, 2001, and the related consolidated statements of operations for the three-month periods ended October 31, 2001 and 2000 and cash flows for the three-month periods ended October 31, 2001 and 2000. These financial statements are the responsibility of the Company's management.

We conducted our review in accordance with standards established by the American Institute of Certified Public Accountants. A review of interim financial information consists principally of applying analytical procedures to financial data and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the accompanying consolidated interim financial statements for them to be in conformity with accounting principles generally accepted in the United States of America.

We have previously audited in accordance with auditing standards generally accepted in the United States of America, the consolidated balance sheet as of July 31, 2001, and the related consolidated statements of operations, stockholders' equity and cash flows for the year then ended (not presented herein); and in our report dated September 19, 2001, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying consolidated balance sheet information as of July 31, 2001 is fairly stated in all material respects in relation to the balance sheet from which it has been derived.

PricewaterhouseCoopers LLP

Tulsa, Oklahoma  
December 13, 2001

## Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

### General

Webco Industries, Inc., an Oklahoma corporation, was founded in 1969 by F. William Weber, Chairman of the Board and Chief Executive Officer. Webco is a specialty manufacturer of high-quality carbon and stainless steel tubing products designed to industry and customer specifications. Webco's tubing products consist primarily of: heat exchanger tubing, carbon steel boiler tubing, stainless steel tube and pipe, and specialty carbon steel mechanical tubing for use in consumer durable and capital goods. Management believes that Webco is a domestic market leader in the manufacture of welded carbon steel heat exchanger and boiler tubing, and the leading supplier of stainless steel tubing for certain niche applications. The Company's wholly-owned subsidiary, Phillips & Johnston, Inc. ("P&J"), represents several manufacturers who produce various non-competing mechanical and specialty tubular products made from copper, brass, aluminum, stainless and carbon steel, among others. This access to other tubing products allows the Company to better serve its customers by offering a full range of tubing products. Through its QuikWater division, the Company markets a patented direct contact water heater for commercial and industrial applications. The Company has three production facilities in Oklahoma and Pennsylvania and five distribution facilities in Oklahoma, Texas, Illinois and Michigan, serving more than 1,100 customers throughout North America.

Unless the context otherwise requires, the information contained in this report, and the terms "Webco" and the "Company" when used in this report, include Webco Industries, Inc. and its subsidiary, P&J, on a consolidated basis.

### Results of Operations for the Three Months Ended October 31, 2001 Compared with the Three Months Ended October 31, 2000

Manufactured Tubing Product sales for the quarter ended October 31, 2001 were \$36,450,000, an increase of 10.4 percent from the \$33,012,000 for the same quarter last year. The \$3,438,000 increase in net sales is primarily the result of a 14.7 percent increase in the tonnage of tubing sold which was partially offset by a 3.7 percent decline in the average net sales price per ton. The decrease in the average net selling price is due to decreased sales of stainless tubing, which carries a higher sales price per ton, and increased sales of pressure tubing, which carries a lower sales

price per ton. The tonnage of tubing sold improved due to increased carbon pressure tubing sales and the new mill production in Oil City. However, tonnages were depressed in the prior year quarter due to a one-week suspension in production at the Company's Sand Springs, Oklahoma, facility in August 2000 for maintenance projects and an annealing furnace outage and the disruptions to the operations at the Oil City, Pennsylvania plant as a result of the expansion at that location. The furnace outage alone resulted in the loss of 25 percent of the normal production and shipments at the Sand Springs plant.

Gross profit for Manufactured Tubing Products increased to \$4,173,000, or 11.4 percent of net sales

for the first quarter of fiscal 2002 from \$2,187,000 or 6.6 percent of net sales for the same period in fiscal 2001. Margins in fiscal 2002 reflect the increase in shipped tonnage, as explained above, which has been directly impacted by the major expansion project in Oil City being complete. As discussed above, fiscal 2001 margins were negatively impacted by the one-week shut-down at the Sand Springs facility and higher operating expenses at the Oil City facility due to the plant expansion. Margins in the fiscal 2002 first quarter reflect the improved production at the Sand Springs and Oil City plants and slightly lower carbon raw material costs.

10

Other Tubing Products sales are made primarily by Webco's subsidiary, P&J. Sales of these products decreased 18.1 percent to \$3,384,000 for the period ended October 31, 2001 from \$4,132,000 for the period ended October 31, 2000. Gross profit from Other Tubing Products decreased to \$549,000, or 16.2 percent of net sales, for the first quarter of fiscal 2002 from \$790,000, or 19.1 percent of net sales, for the same period in fiscal 2001. The decrease in sales and decline in gross profit percentage is a result of an increase in the tonnage of tubing sold at reduced sales prices for most specialty tubing lines. Pricing pressure has increased throughout the mechanical and specialty stainless tubing markets.

Sales for QuikWater were \$750,000 for the first quarter of fiscal 2002, which is 11.9 percent less than the \$851,000 in sales for the same period in fiscal 2001. Gross profit for QuikWater was \$275,000, or 36.7 percent of net sales, for the first quarter of fiscal 2002 as compared to \$179,000, or 21.0 percent of net sales, for the same period of fiscal 2001. The decrease in sales is a result of sales mix while the gross profit percentage increase is a reflection of the outsourcing arrangement for the manufacturing of the units which began in August 2000 along with other cost savings measures.

Selling, general and administrative expenses were \$3,396,000 for the first quarter of fiscal 2002 compared to \$3,781,000 for the same quarter of fiscal 2001. The decrease in the current quarter is primarily the result of a \$213,000 decrease in information technology expenses and a \$200,000 decrease in administrative labor and overhead expenses realized as a result of implementing cost savings measures during the first and second quarters of fiscal 2001.

Interest expense for the current period was \$924,000 (\$931,000 prior to interest capitalization) as compared to interest expense of \$1,250,000 (\$1,370,000 prior to interest capitalization) for the same quarter last year. The decrease in interest prior to interest capitalization is the result of the average level of debt under the bank Loan and Security Agreement for the three months ended October 31, 2001 being \$46.3 million as compared to \$47.7 million for the same period last year. In addition, the related average interest rate decreased to 7.0 percent in the first quarter of fiscal 2002 from 9.8 percent in the first quarter of fiscal 2001. The Company has historically elected for its term debt and a significant portion of its outstanding revolver to bear interest at a floating rate based on LIBOR. Lower borrowing levels have resulted from improved operating cash flow and the Company's focus on debt reduction and working capital management. LIBOR, much like the prime rate, experienced significant decreases during calendar year 2001, which led to the reduction in the average interest rate.

The recorded income tax provision for the quarter ended October 31, 2001 is based upon the estimated annual combined effective federal and state income tax rates.

11

## Liquidity and Capital Resources

Net cash provided by operations was \$2,029,000 for the three months ended October 31, 2001 versus net cash used in operations of \$1,804,000 for the three month period ended October 31, 2000. Accounts receivable decreased \$1,024,000 during the current period and increased \$998,000 for the same period last year. Better collections in the first quarter of 2001 accounted for the decline in receivables, while both the current and prior year periods experienced stronger sales when compared to the prior years' quarter. Inventories decreased \$1,703,000 for the period ended October 31, 2001 primarily due to declines in finished goods inventories as a result of increased sales. Inventories increased \$1,137,000 for the period ended October 31, 2000 due to increases in stainless steel finished goods. Accounts payable decreased \$3,495,000 during the current period and increased \$183,000 for the same period last year. The current period decline is the result of improved accounts receivable collections and reductions in inventory levels. In addition, accrued liabilities increased by \$646,000 for the period ended October 31, 2001, compared to an increase of \$710,000 during the same period last year.

Net cash used in investing activities for the three months ended October 31, 2001 was \$422,000, which was \$2,350,000 less than the \$2,772,000 used in investing activities during the same period in fiscal 2000. Capital expenditures made during the prior period related to the expansion of the Oil City facility, which was completed in Spring 2001.

The Company's capital requirements have historically been to fund equipment purchases and for general working capital needs resulting from the growth that the Company has experienced. The Company has followed an aggressive capital expenditure plan as part of its growth strategy and to enable it to continue to be a leader in tubular manufacturing technologies. With the major expansion project in Oil City complete, the Company intends to focus on debt reduction and working capital management. Capital spending plans for fiscal 2002 primarily consist of minor projects and normal maintenance spending. The Company currently intends to retain earnings to support this strategy and does not anticipate paying dividends in the foreseeable future.

The Company's senior debt facilities provide for a term loan of \$25 million, a line of credit of \$25 million and a capital expenditure ("CAPEX") facility in the amount of \$5 million to finance equipment at the Oil City, Pennsylvania plant. As of October 31, 2001, the Company had \$21.9 million outstanding on the term loan, \$19.1 million under the revolving line of credit and \$3.2 million outstanding on the CAPEX facility. The maturity date of these debt facilities, as amended, is November 30, 2002. The loans are collateralized by substantially all of the Company's assets. The Company may have borrowings and outstanding letters of credit (\$1,056,000 at October 31, 2001) under the revolving credit facility up to the lesser of \$25 million or an amount determined by a formula based on the amount of eligible inventories and accounts receivable. At October 31, 2001, \$4.8 million was available for borrowing under this line of credit. The CAPEX loan was fully funded up to the \$5 million cap during the second quarter of fiscal 2001. Principal payments on the term loan and CAPEX facility of \$208,000 and \$80,000, respectively, plus interest, are due each month until maturity.

12

The loan agreement for the Company's senior debt facilities matures on November 30, 2002 and the Company is currently in the process of negotiating the long-term extension of its maturity or refinancing in its entirety. If the Company is unable to refinance or extend the agreement prior to the filing of its financial statements contained in its Form 10-Q for its second fiscal quarter ended January 31, 2002, a significant portion of its long-term debt will be classified as a current liability since the maturity date will be within 12 months of the balance sheet date. The debt will not be due on demand or otherwise callable by the lender at that time, and the Company will have until the maturity date to refinance or extend the agreement or pursue other financing sources. The Company believes it will be able to successfully refinance or extend the agreement on a long-term basis, however, there can be no assurances the Company will be successful in its efforts before it must file its second quarter Form 10-Q.

The Company's debt agreement, as amended, contains covenants regarding debt coverage and the ratio of indebtedness to equity. The covenants also limit capital expenditures and dividends and require the Company to maintain a minimum borrowing base availability without considering the \$25 million revolving loan cap. As of October 31, 2001, the Company was in compliance with all such covenants.

The Company has arranged financing with various public agencies related to the Oil City facility, of which, \$2.89 million is outstanding and no additional amounts remain available for borrowing as of October 31, 2001. The agency loans are collateralized by the underlying real estate and/or equipment and the guarantee of the principal stockholder/officer. The notes mature over a 3 to 10 year period and bear interest at rates ranging from 3 to 5 percent.

P&J has a line of credit agreement for \$2,000,000 and a term loan of \$500,000 with its primary lender. As of October 31, 2001, the Company had \$274,000 outstanding on the term loan. The line of credit matures on November 30, 2002, and the term loan matures in April 2004. Both loans are collateralized by P&J's assets. At October 31, 2001, \$2.0 million was available for borrowing under the line of credit.

#### Safe Harbor for Forward Looking Statements:

Certain statements in this Form 10-Q, including statements preceded by, or predicated upon the words "believes", "expects", "appears" or "plans", constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other important factors that could cause the actual results, performance or achievements of the Company, or industry results, to differ materially from any future results, performance or achievements expressed or implied herein. Such risks, uncertainties and factors include, among others: general economic and business conditions, competition from imports, changes in manufacturing technology, monetary policy and banking environment, industry capacity, domestic competition, raw material costs and availability, loss of significant customers and customer and vendor work stoppages, and technical and data processing capabilities of customers and vendors. The reader should refer to Part I, Item 1: "Forward Looking Statements" of the Company's Form 10-K for the year ended July 31, 2001 for additional information regarding this matter.

## PART II OTHER INFORMATION

### Item 1.

#### **Legal Proceedings**

In August 1997, the Company filed an action, Webco Industries, Inc. vs. Thermatool Corporation and Alpha Industries, Inc., relating to certain cut-off equipment sold to the Company and installed on Mill 3, which did not

perform to specifications. The case, filed in the United States District Court for the Northern District of Oklahoma (Case No. 97-CV-708H (W)), sought recoveries for the cost of the equipment and other incidental and consequential damages, including lost profits, suffered by the Company. On May 27, 1999 a jury awarded the Company \$1.1 million on its claims against Thermatool. Prior to the trial, the court had ruled that the Company could not collect lost profits and certain other incidental and consequential damages, and limited the Company's possible recovery to the cost of the equipment and improvements plus interest. The damages awarded by the jury, accordingly, do not include lost profits by the Company. Now that the first trial has been decided in the Company's favor, the Company has appealed the pre-trial order that prevented the Company from recovering lost profits, and has appealed the trial court's denial of attorneys' fees and pre-judgment interest. There can be no assurances that the Company will be successful on appeal or that if successful, lost profits or other damages awarded by the appeals court or in the succeeding trial, if any, will be commensurate with actual lost profits and damages and expenses suffered by the Company. Thermatool has appealed the jury's verdict and there can be no assurances as to what the outcome of that appeal will be.

The Company is also a party to various other lawsuits and claims arising in the ordinary course of business. Management, after review and consultation with legal counsel, believes that any liability resulting from these matters would not materially affect the results of operations or the financial position of the Company. The Company maintains liability insurance against risks arising out of the normal course of business.
