SEANERGY MARITIME HOLDINGS CORP. REPORTS FINANCIAL RESULTS FOR THE SECOND QUARTER AND SIX MONTHS ENDED JUNE 30, 2015

September 23, 2015 - Athens, Greece - Seanergy Maritime Holdings Corp. (the "Company") (NASDAQ:SHIP) announced today its financial results for the second quarter and six months ended June 30, 2015.

For the three months ended June 30, 2015, the Company generated net revenues of \$1.8 million. Total Equity as of June 30, 2015 was \$9.4 million.

Stamatis Tsantanis, the Company's Chairman & Chief Executive Officer, stated:

"In the second quarter of 2015, Seanergy restored its revenue-generation capacity through the acquisition of its first vessel, the M/V Leadership, in March 2015. The Time Charter Equivalent ("TCE") rate earned by M/V Leadership during the second quarter of 2015 amounted to \$9,788, which compares very favorably with the average rate of the 4 T/C routes of the Baltic Capesize Index for the same period of \$4,601. Going forward, we expect our TCE rate to strengthen as the dry bulk market gradually recovers.

"As recently announced, we entered into a purchase agreement to acquire a fleet of seven modern dry bulk carriers for approximately \$183 million. The fleet consists of five Capesize and two Supramax vessels with an average age of six years. Seanergy took delivery of the first of these seven bulkers, the 2010 built Capesize M/V Premiership, on September 11, 2015 and we expect the remaining vessels to be delivered by November 30, 2015.

The vessels will be employed in the spot market and the Company will be expanding its revenue-generation capacity upon delivery of each vessel. Following completion of the remaining deliveries, our fleet will reach eight quality vessels with a combined cargo-carrying capacity of approximately 1.1 million DWT. The low capital cost of our fleet, combined with the advantageous terms we have achieved with our lenders, positions Seanergy very favorably in the dry bulk peer group. In addition, we believe our fleet expansion is occurring at an optimal time as dry bulk market fundamentals are expected to gradually improve and Seanergy will be in a leading position to capitalize on this recovery. This acquisition is fully consistent with our business plan and Seanergy will continue to pursue acquisition opportunities that we believe can further enhance value for all our shareholders."

Ownership days are the total number of days in a period during which the vessels in a fleet have been owned.

(1) Ownership days are an indicator of the size of the Company's fleet over a period and affect both the amount of revenues and the amount of expenses that the Company recorded during a period.

Available days are the number of ownership days less the aggregate number of days that vessels are off-hire due to (2) major repairs, dry dockings or special or intermediate surveys. The shipping industry uses available days to measure the number of ownership days in a period during which vessels should be capable of generating revenues.

Operating days are the number of available days in a period less the aggregate number of days that vessels are off-hire for any reason, including off-hire days between successive voyages, as well as other unforeseen circumstances. The shipping industry uses operating days to measure the aggregate number of days in a period (3) during which vessels actually generate revenues. In the three months ended June 30, 2015, the company incurred 11 off-hire days between voyages and zero off-hires due to other unforeseen circumstances. In the six months ended June 30, 2015, the company incurred 15 off-hire days between voyages and zero off-hires due to other unforeseen circumstances.

(4) Fleet utilization is the percentage of time that our vessels were generating revenue, and is determined by dividing operating days by ownership days for the relevant period.

TCE rate is defined as our net revenue less voyage expenses during a period divided by the number of our (5) operating days during the period. Voyage expenses include port charges, bunker (fuel oil and diesel oil) expenses, canal charges and other commissions.
