Media Release

Syngenta and DuPont announce crop protection technology exchange

Basel, Switzerland and Wilmington, Delaware, USA, 23 February 2006

Syngenta and DuPont today announced an agreement that will broaden each company \square s crop protection product offer.

- ◆ Syngenta acquires an exclusive worldwide license to develop DuPont

 s new insecticide Rynaxypyr

 in mixtures with its own leading insect control products. Rynaxypyr

 is a chemical of the bisamide class characterized by unique systemic properties and outstanding activity on all major lepidoptera pests. DuPont will continue its commercialization plan for straight Rynaxypyr

 .
- DuPont Crop Protection acquires worldwide rights to Syngenta

 strobilurin fungicide picoxystrobin, sold as Acanto®, including access to companion products used in mixtures. Acanto® is currently marketed in Europe on cereals and will be expanded for use on soybeans in Latin America.

The transactions are subject to certain national regulatory approvals. Financial terms were not disclosed.

John Atkin, Chief Operating Officer, Syngenta Crop Protection, said: [This agreement gives Syngenta access to a novel class of chemistry that will set new standards in lepidoptera control. Combinations of Rynaxypyr[] with our modern insecticides will provide new broad-spectrum solutions in the global insecticide market estimated at around \$7 billion. First launches are targeted for 2009. We shall continue to expand our industry-leading position in fungicides led by Amistar® and its range of combination products.[]

James C. Collins, Vice President and General Manager of DuPont Crop Protection, commented: These agreements further enhance our position in the global fungicide market estimated at around \$ 7 billion. With picoxystrobin, DuPont fills a gap and gains access to major fungicide customers and markets in the EU, Latin America and later in the United States. In insecticides, the agreement we have reached with Syngenta will allow us to expand and accelerate the market potential for our new cutting edge technology.
