Morgan Stanley Finance LLC \$12,223,970 Trigger Absolute Return Step Securities

Linked to a Basket of International Indices due October 31, 2023

Fully and Unconditionally Guaranteed by Morgan Stanley

Principal at Risk Securities

Investment Description

These Trigger Absolute Return Step Securities (the “Securities”) are unsecured and unsubordinated debt securities issued by Morgan Stanley Finance LLC (“MSFL”), fully and unconditionally guaranteed by Morgan Stanley, with returns linked to the performance of a weighted basket of international indices (the “Basket”), consisting of the EURO STOXX 50® Index, the FTSE® 100 Index, the Nikkei 225 Index, the Swiss Market Index, the S&P/ASX 200 Index and the Hang Seng Index, each of which we refer to as an “Underlier” and together as the “Underliers.” If the Basket Return is greater than or equal to the Step Barrier, MSFL will pay the Principal Amount at maturity plus a return equal to the greater of (i) the Step Return of 52.40% and (ii) the Basket Return. If the Final Basket Level is less than the Step Barrier but greater than or equal to the Downside Threshold, MSFL will pay the full Principal Amount at maturity and pay a return equal to the absolute value of the Basket Return (the “Contingent Absolute Return”). However, if the Final Basket Level is less than the Downside Threshold, MSFL will pay significantly less than the full Principal Amount at maturity, if anything, resulting in a loss of principal that is proportionate to the negative Basket Return. These long-dated Securities are for investors who seek an equity basket-based return and who are willing to risk a loss on their principal and forgo current income in exchange for the Step Return and the Contingent Absolute Return features and the contingent repayment of principal, which applies only if the Final Basket Level is not less than the Downside Threshold, each as applicable at maturity. **Investing in the Securities involves significant risks. You will not receive interest or dividend payments during the term of the Securities. You may lose a significant**

portion or all of your Principal Amount. The Contingent Absolute Return, any contingent repayment of principal and the Step Return apply only if you hold the Securities to maturity.

All payments are subject to our credit risk. If we default on our obligations, you could lose some or all of your investment. These Securities are not secured obligations and you will not have any security interest in, or otherwise have any access to, any underlying reference asset or assets.

Features Key Dates

q Enhanced Growth Potential with a Step Return Feature: If the Final Basket Level is greater than or equal to the Step Barrier, MSFL will pay the Principal Amount at maturity plus pay a return equal to the greater of (i) the Step Return of 52.40% and (ii) the Basket Return. If the Final Basket Level is less than the Downside Threshold, investors will be exposed to the negative Basket Return at maturity.

q Contingent Absolute Return at Maturity: If the Final Basket Level is less than the Step Barrier and the Final Basket Level is not less than the Downside Threshold, MSFL will pay the Principal Amount at maturity and pay the Contingent Absolute Return. However, if the Final Basket Level is less than the Downside Threshold, MSFL will pay significantly less than the full Principal Amount, if anything, resulting in a loss of principal that is proportionate to the negative Basket Return. The Contingent Absolute Return and any contingent repayment of principal apply only if you hold the Securities to maturity. Any payment on the Securities, including any repayment of principal, is subject to our creditworthiness.

Trade Date	October 29, 2018
Settlement Date	October 31, 2018
Final Valuation Date*	October 26, 2023
Maturity Date*	October 31, 2023

* Subject to postponement in the event of a Market Disruption Event or for non-Index Business Days. See “Postponement of Final Valuation Date and Maturity Date” under “Additional Terms of the Securities.”

The Securities are significantly riskier than conventional debt INSTRUMENTS. the terms of the securities may not obligate US TO REPAY THE FULL PRINCIPAL AMOUNT OF THE SECURITIES. the Securities CAN have downside MARKET risk SIMILAR TO the UNDERLIERS, WHICH CAN RESULT IN A LOSS OF A SIGNIFICANT PORTION OR ALL OF YOUR INVESTMENT at maturity. This MARKET risk is in addition to the CREDIT risk INHERENT IN PURCHASING OUR DEBT OBLIGATIONS. You should not PURCHASE the Securities if you do not understand or are not comfortable with the significant risks INVOLVED in INVESTING IN the Securities. THE SECURITIES WILL NOT BE LISTED ON ANY SECURITIES EXCHANGE.

YOU SHOULD CAREFULLY CONSIDER THE RISKS DESCRIBED UNDER “KEY RISKS” BEGINNING ON PAGE 5 OF THIS PRICING SUPPLEMENT IN CONNECTION WITH YOUR PURCHASE OF THE SECURITIES. EVENTS RELATING TO ANY OF THOSE RISKS, OR OTHER RISKS AND UNCERTAINTIES, COULD ADVERSELY AFFECT THE MARKET VALUE OF, AND THE RETURN ON, YOUR SECURITIES.

Security Offering

We are offering Trigger Absolute Return Step Securities linked to a Basket of International Indices. The Securities are not subject to a predetermined maximum gain and, accordingly, any return at maturity will be determined by the performance of the Basket. The Securities are offered at a minimum investment of 100 Securities at the Price to Public listed below.

Basket	Basket Weighting	Initial Level	Step Return	Step Barrier	Initial Basket Level	Downside Threshold	CUSIP	ISIN
EURO STOXX 50® Index (Bloomberg ticker: SX5E)	40%	3,154.93						
FTSE® 100 Index (Bloomberg ticker: UKX)	20%	7,026.32						
Nikkei 225 Index (Bloomberg ticker: NKY)	20%	21,149.80	52.40%	100, which is 100% of the Initial Basket Level	100	70, which is 70% of the Initial Basket Level	61768T464	US61768T4647
Swiss Market Index (Bloomberg ticker: SMI)	7.5%	8,759.62						
S&P/ASX 200 Index (Bloomberg ticker: AS51)	7.5%	5,728.155						
Hang Seng Index (Bloomberg ticker: HSI)	5%	24,812.04						

See “Additional Information about Morgan Stanley, MSFL and the Securities” on page 3. The Securities will have the terms set forth in the accompanying prospectus, prospectus supplement and index supplement and this pricing supplement.

Neither the Securities and Exchange Commission nor any other regulatory body has approved or disapproved of these Securities or passed upon the adequacy or accuracy of this pricing supplement or the accompanying prospectus supplement, index supplement and prospectus. Any representation to the contrary is a criminal offense. The Securities are not deposits or savings accounts and are not insured by the Federal Deposit Insurance Corporation or any other governmental agency or instrumentality, nor are they obligations of, or guaranteed by, a bank.

Estimated value on the Trade Date \$9.408 per Security. See “Additional Information about Morgan Stanley, MSFL and the Securities” on page 3.

References to “MSFL” refer to only MSFL, references to “Morgan Stanley” refer to only Morgan Stanley and references to “we,” “our” and “us” refer to MSFL and Morgan Stanley collectively. In this document, the “Securities” refers to the Trigger Absolute Return Step Securities that are offered hereby. Also, references to the accompanying “prospectus,” “prospectus supplement” and “index supplement” mean the prospectus filed by MSFL and Morgan Stanley dated November 16, 2017, the prospectus supplement filed by MSFL and Morgan Stanley dated November 16, 2017 and the index supplement filed by MSFL and Morgan Stanley dated November 16, 2017, respectively.

You should rely only on the information incorporated by reference or provided in this pricing supplement or the accompanying prospectus supplement, index supplement and prospectus. We have not authorized anyone to provide you with different information. We are not making an offer of these securities in any state where the offer is not permitted. You should not assume that the information in this pricing supplement or the accompanying prospectus supplement, index supplement and prospectus is accurate as of any date other than the date on the front of this document.

If the terms discussed in this pricing supplement differ from those discussed in the prospectus supplement, index supplement or prospectus, the terms contained in this pricing supplement will control.

The Issue Price of each Security is \$10. This price includes costs associated with issuing, selling, structuring and hedging the Securities, which are borne by you, and, consequently, the estimated value of the Securities on the Trade Date is less than \$10. We estimate that the value of each Security on the Trade Date is \$9.408.

What goes into the estimated value on the Trade Date?

In valuing the Securities on the Trade Date, we take into account that the Securities comprise both a debt component and a performance-based component linked to the Underliers. The estimated value of the Securities is determined using our own pricing and valuation models, market inputs and assumptions relating to the Underliers, instruments based on the Underliers, volatility and other factors including current and expected interest rates, as well as an interest rate related to our secondary market credit spread, which is the implied interest rate at which our conventional fixed rate debt trades in the secondary market.

What determines the economic terms of the Securities?

In determining the economic terms of the Securities, including the Step Return, the Step Barrier and the Downside Threshold, we use an internal funding rate, which is likely to be lower than our secondary market credit spreads and therefore advantageous to us. If the issuing, selling, structuring and hedging costs borne by you were lower or if the internal funding rate were higher, one or more of the economic terms of the Securities would be more favorable to you.

What is the relationship between the estimated value on the Trade Date and the secondary market price of the Securities?

The price at which MS & Co. purchases the Securities in the secondary market, absent changes in market conditions, including those related to the Underliers, may vary from, and be lower than, the estimated value on the Trade Date, because the secondary market price takes into account our secondary market credit spread as well as the bid-offer spread that MS & Co. would charge in a secondary market transaction of this type and other factors. However, because the costs associated with issuing, selling, structuring and hedging the Securities are not fully deducted upon issuance, for a period of up to 12 months following the Settlement Date, to the extent that MS & Co. may buy or sell the Securities in the secondary market, absent changes in market conditions, including those related to the Underliers, and to our secondary market credit spreads, it would do so based on values higher than the estimated value. We expect that those higher values will also be reflected in your brokerage account statements.

MS & Co. currently intends, but is not obligated, to make a market in the Securities, and, if it once chooses to make a market, may cease doing so at any time.

Investor Suitability

The Securities may be suitable for you if:

- “ You fully understand the risks inherent in an investment in the Securities, including the risk of loss of your entire initial investment.

- “ You can tolerate a loss of all or a substantial portion of your Principal Amount and are willing to make an investment that may have the same downside market risk as a weighted investment in the Underliers included in the Basket.

- “ You are willing to hold the Securities to maturity, as set forth on the cover of this pricing supplement, and accept that there may be little or no secondary market for the Securities.

- “ You understand and accept the risks associated with the Underliers.

- “ You believe the Basket will appreciate over the term of the Securities and you are willing to invest in the Securities based on the Step Return of 52.40%.

- “ You understand and accept that your potential positive return from the Contingent Absolute Return feature is limited by the Downside Threshold.

- “ You can tolerate fluctuations of the price of the Securities prior to maturity that may be similar to or

The Securities may not be suitable for you if:

- “ You do not fully understand the risks inherent in an investment in the Securities, including the risk of loss of your entire initial investment.

- “ You cannot tolerate a loss of all or a substantial portion of your Principal Amount, and you are not willing to make an investment that may have the same downside market risk as a weighted investment in the Underliers included in the Basket.

- “ You require an investment designed to provide a full return of principal at maturity.

- “ You are unable or unwilling to hold the Securities to maturity, as set forth on the cover of this pricing supplement, or you seek an investment for which there will be an active secondary market.

- “ You do not understand and accept the risks associated with the Underliers.

- “ You believe that the level of the Basket will decline during the term of the Securities and is likely to close below the Downside Threshold on the Final Valuation Date.

- “ You are unwilling to invest in the Securities based on the Step Return of 52.40%.

exceed the downside fluctuations in the level of the Basket.

“ You do not seek current income from your investment and are willing to forgo dividends paid on the stocks included in the Underliers.

“ You are willing to assume our credit risk, and understand that if we default on our obligations you may not receive any amounts due to you including any repayment of principal.

“ You do not understand and accept that your potential positive return from the Contingent Absolute Return feature is limited by the Downside Threshold.

“ You prefer the lower risk, and therefore accept the potentially lower returns, of conventional debt securities with comparable maturities issued by us or another issuer with a similar credit rating.

“ You seek current income from your investment or prefer to receive the dividends paid on the stocks included in the Underliers.

“ You are not willing or are unable to assume the credit risk associated with us, for any payment on the Securities, including any repayment of principal.

The investor suitability considerations identified above are not exhaustive. Whether or not the Securities are a suitable investment for you will depend on your individual circumstances, and you should reach an investment decision only after you and your investment, legal, tax, accounting and other advisors have carefully considered the suitability of an investment in the Securities in light of your particular circumstances. You should also review “Key Risks” on page 5 of this pricing supplement and “Risk Factors” beginning on page 7 of the accompanying prospectus for risks related to an investment in the Securities. For additional information about the Underliers, see the information set forth under “The EURO STOXX 50 Index,” “The FTSE100 Index,” “The Nikkei 225 Index,” “The Swiss Market Index,” “The S&P/ASX 200 Index” and “The Hang Seng Index” on pages 15, 17, 19, 21, 23 and 25, respectively.

Final Terms Investment Timeline

Issuer Morgan Stanley Finance LLC

Guarantor Morgan Stanley

Issue Price (per Security) \$10.00 per Security

Principal Amount \$10.00 per Security

Term 5 years

Basket The Securities are linked to a weighted basket of indices, each of which we refer to as an “Underlier,” as follows:

EURO STOXX 50® Index 40%

FTSE® 100 Index 20%

Nikkei 225 Index 20%

Swiss Market Index 7.5%

S&P/ASX 200 Index 7.5%

Hang Seng Index 5%

Downside Threshold 70, which is 70% of the Initial Basket Level.

If the Final Basket Level is greater than or equal to the Step Barrier, MSFL will pay you an amount calculated as follows:

$$\$10 + [\$10 \times (\text{the greater of (i) the Step Return and (ii) the Basket Return})]$$

If the Final Basket Level is less than the Step Barrier and the Final Basket Level is greater than or equal to the Downside Threshold, MSFL will pay you a cash payment of:

Payment at Maturity \$10 + (\$10 x Contingent Absolute Return)
(per Security)

If the Final Basket Level is less than the Downside Threshold, MSFL will pay you an amount calculated as follows:

$$\$10 + (\$10 \times \text{Basket Return})$$

In this case, the Contingent Absolute Return will not apply, and you will lose a significant portion or all of your Principal Amount in an amount proportionate to the negative Basket Return.

Basket Return Final Basket Level – Initial Basket Level

Edgar Filing: MORGAN STANLEY - Form 424B2

	Initial Basket Level
Step Return	52.40%
Contingent Absolute Return	The absolute value of the Basket Return. For example, if the Basket Return is -5.00%, the Contingent Absolute Return will be 5.00%.
Initial Basket Level	100
	On the Final Valuation Date, the Final Basket Level is calculated as:
	$100 \times [1 + (\text{SX5E Return} \times 40\%) +$
Final Basket Level	$(\text{UKX Return} \times 20\%) + (\text{NKY Return} \times 20\%) + (\text{SMI Return} \times 7.5\%) + (\text{AS51 Return} \times 7.5\%) + (\text{HSI Return} \times 5\%)]$
	Each of the returns set forth in the formula above refers to the return of the relevant Underlier, which represents the percentage change from the Initial Level for that Underlier to the Final Level for that Underlier.
Step Barrier	100, which is 100% of the Initial Basket Level
Initial Level	With respect to each Underlier, as set forth on the cover of this pricing supplement.
Final Level	With respect to each Underlier, the Closing Level of such Underlier on the Final Valuation Date.
Final Valuation Date	October 26, 2023, subject to postponement in the event of a Market Disruption Event or for non-Index Business Days.
CUSIP / ISIN	61768T464 / US61768T4647
Calculation Agent	Morgan Stanley & Co. LLC

Trade Date The Initial Levels are observed, the Initial Basket Level is set to 100 and the Step Return is set. The Final Basket Level and Basket Return are determined on the Final Valuation Date.

Maturity Date The Final Basket Level and Basket Return are determined on the Final Valuation Date.

If the Final Basket Level is greater than or equal to the Step Barrier, MSFL will pay you a cash payment per Security equal to:

$\$10 + [\$10 \times (\text{the greater of (i) the Step Return and (ii) the Basket Return})]$

If the Final Basket Level is less than the Step Barrier and greater than or equal to the Downside Threshold on the Final Valuation Date, MSFL will pay you a cash payment per Security equal to:

$\$10 + (10 \times \text{Contingent Absolute Return})$

If the Final Basket Level is less than the Downside Threshold on the Final Valuation Date, MSFL will pay you a cash payment at maturity equal to:

$\$10 + (\$10 \times \text{Basket Return})$

Under these circumstances, the Contingent Absolute Return will not apply, and you will lose a significant portion, and could lose all, of your Principal Amount.

$\$10 + (\$10 \times \text{Basket Return})$

Under these circumstances, the Contingent Absolute Return will not apply, and you will lose a significant portion, and could lose all, of your Principal Amount.

INVESTING IN THE SECURITIES INVOLVES SIGNIFICANT RISKS. YOU MAY LOSE YOUR ENTIRE PRINCIPAL AMOUNT. ANY PAYMENT ON THE SECURITIES IS SUBJECT TO OUR CREDITWORTHINESS. IF WE WERE TO DEFAULT ON OUR PAYMENT OBLIGATIONS, YOU MAY NOT RECEIVE ANY AMOUNTS OWED TO YOU UNDER THE SECURITIES AND YOU COULD LOSE YOUR ENTIRE INVESTMENT.

Key Risks

An investment in the Securities involves significant risks. Some of the risks that apply to the Securities are summarized here, but we urge you to also read the “Risk Factors” section of the accompanying prospectus. You should also consult your investment, legal, tax, accounting and other advisers in connection with your investment in the Securities.

The Securities do not guarantee any return of principal – The terms of the Securities differ from those of ordinary debt securities in that MSFL is not necessarily obligated to repay any of the Principal Amount at maturity. If the Final Basket Level is less than the Downside Threshold (which is 70% of the Initial Basket Level), the Contingent Absolute Return will not apply, you will be exposed to the full negative Basket Return and the payout owed at maturity by MSFL will be an amount in cash that is at least 30% less than the \$10 Principal Amount of each Security, resulting in a loss proportionate to the decrease in the value of the Basket from the Initial Basket Level to the Final Basket Level. There is no minimum payment at maturity on the Securities, and, accordingly, you could lose all of your Principal Amount in the Securities

You may incur a loss on your investment if you sell your Securities prior to maturity – The Downside Threshold is observed on the Final Valuation Date, the Contingent Absolute Return and any contingent repayment of principal apply only at maturity. If you are able to sell your Securities in the secondary market prior to maturity, you may have to sell them at a loss relative to your initial investment even if the level of the Basket would be above the Downside Threshold at that time.

The Step Return applies only if you hold the Securities to maturity – You should be willing to hold your Securities to maturity. If you are able to sell your Securities prior to maturity in the secondary market, the price you receive will likely not reflect the full economic value of the Step Return or the Securities themselves, and the return you realize may be less than the Basket Return even if such return is positive. You can receive the full benefit of the Step Return from MSFL only if you hold your Securities to maturity.

The potential for a positive return if the Underlying depreciates is limited – Any positive return on the Securities if the Underlying depreciates will be limited by the Downside Threshold, because the Contingent Absolute Return feature will apply only if the Final Basket Level is greater than or equal to the Downside Threshold. If the Final Basket Level is less than the Downside Threshold, you will not receive a Contingent Absolute Return and will instead lose a substantial portion or all of your investment

The Securities are subject to our credit risk, and any actual or anticipated changes to our credit ratings or our credit spreads may adversely affect the market value of the Securities – You are dependent on our ability to pay all amounts due on the Securities at maturity, if any, and therefore you are subject to our credit risk. If we default on our obligations under the Securities, your investment would be at risk and you could lose some or all of your investment. As a result, the market value of the Securities prior to maturity will be affected by changes in the market’s view of our creditworthiness. Any actual or anticipated decline in our credit ratings or increase in our credit spreads charged by the market for taking our credit risk is likely to adversely affect the market value of the Securities.

As a finance subsidiary, MSFL has no independent operations and will have no independent assets – As a finance subsidiary, MSFL has no independent operations beyond the issuance and administration of its securities and will have no independent assets available for distributions to holders of MSFL securities if they make claims in respect of such securities in a bankruptcy, resolution or similar proceeding. Accordingly, any recoveries by such holders will be limited to those available under the related guarantee by Morgan Stanley and that guarantee will rank *pari passu* with all other unsecured, unsubordinated obligations of Morgan Stanley. Holders will have recourse only to a single claim against Morgan Stanley and its assets under the guarantee. Holders of securities issued by MSFL should accordingly assume that in any such proceedings they would not have any priority over and should be treated *pari passu* with the claims of other unsecured, unsubordinated creditors of Morgan Stanley, including holders of Morgan Stanley-issued securities.

The Securities do not pay interest – MSFL will not pay any interest with respect to the Securities over the term of the Securities.

The market price of the Securities may be influenced by many unpredictable factors – Several factors, many of which are beyond our control, will influence the value of the Securities in the secondary market and the price at which MS & Co. may be willing to purchase or sell the Securities in the secondary market (if at all), including:

o the value of the Underliers at any time,

o the volatility (frequency and magnitude of changes in value) of each of the Underliers,

o dividend rates on the securities included in the Underliers,

o interest and yield rates in the market,

o geopolitical conditions and economic, financial, political, regulatory or judicial events that affect the Underliers or stock markets generally and which may affect the Final Levels,

o the time remaining until the Securities mature, and

o any actual or anticipated changes in our credit ratings or credit spreads.

Some or all of these factors will influence the terms of the Securities at the time of issuance and the price that you will receive if you are able to sell your Securities prior to maturity, as the Securities are comprised of both a debt component and a performance-based component linked to the Underliers, and these are the types of factors that also generally affect the values of debt securities and derivatives linked to the Underliers. Generally, the longer the time remaining to maturity, the more the market price of the Securities will be affected by the other factors described above. For example, you may have to sell your Securities at a substantial discount from the principal amount of \$10 per Security if the values of the Underliers at the time of sale are at, below or moderately above their Initial Levels, and especially if the level of the Basket would be near or below the Downside Threshold, or if market interest rates rise. You cannot predict the future performance of the Underliers based on their historical performance.

The probability that the Final Basket Level will be less than the Downside Threshold will depend on the volatility of the Basket – “Volatility” refers to the frequency and magnitude of changes in the level of the Basket. Higher expected volatility with respect to the Basket as of the Trade Date generally indicates a greater chance as of that date that the Final Basket Level will be less than the Downside Threshold, which would result in a loss of a significant portion or all of your investment at maturity. However, the Basket’s volatility can change significantly over the term of the Securities. The level of the Basket could fall sharply, resulting in a significant loss of principal. You should be willing to accept the downside market risk of the Basket and the potential loss of a significant portion or all of your investment at maturity.

Changes in the values of one or more of the Underliers may offset changes in the values of the others, and movements in the values of the Underliers may not correlate with each other – At a time when the values of one or more Underliers increase, the values of the other Underliers may not increase as much, or may even decline. Therefore, in calculating the Basket Return, increases in the values of one or more Underliers may be moderated, or wholly offset, by lesser increases or declines in the values of the other Underliers. This will be further impacted by the different weightings of the Underliers in the Basket. Changes in the more heavily weighted Underliers will have a greater impact on the value of the Securities than changes in the lower weighted Underliers. If the Final Basket Level is less than the Downside Threshold, you will receive at maturity an amount that is significantly less than the amount of your original investment in the Securities, and which could be zero.

The amount payable on the Securities is not linked to the levels of the Underliers at any time other than the Final Valuation Date – The Final Basket Level will be based on the Closing Levels of the Underliers on the Final Valuation Date, subject to postponement for non-Index Business Days and certain Market Disruption Events. Even if some or all of the Underliers appreciate prior to the Final Valuation Date but then drop by the Final Valuation Date, the Payment at Maturity may be significantly less than it would have been had the Payment at Maturity been linked to the levels of the Underliers prior to such drop. Although the actual levels of the Underliers on the stated Maturity Date or at other times during the term of the Securities may be higher than their Final Levels, the Payment at Maturity will be based solely on the Closing Levels of the Underliers on the Final Valuation Date as compared to their Initial Levels.

The Securities are subject to risks associated with investments in securities linked to the value of foreign equity securities – The Securities are linked to the value of foreign equity securities. Investments in securities linked to the value of foreign equity securities involve risks associated with the securities markets in those countries,

including risks of volatility in those markets, governmental intervention in those markets and cross-shareholdings in companies in certain countries. Although the equity securities included in the Underliers are traded in foreign currencies, the value of your Securities (as measured in U.S. dollars) will not be adjusted for any exchange rate fluctuations. Also, there is generally less publicly available information about foreign companies than about U.S. companies that are subject to the reporting requirements of the United States Securities and Exchange Commission, and foreign companies are subject to accounting, auditing and financial reporting standards and requirements different from those applicable to U.S. reporting companies. The prices of securities issued in foreign markets may be affected by political, economic, financial and social factors in those countries, or global regions, including changes in government, economic and fiscal policies and currency exchange laws. Local securities markets may trade a small number of securities and may be unable to respond effectively to increases in trading volume, potentially making prompt liquidation of holdings difficult or impossible at times. Moreover, the economies in such countries may differ favorably or unfavorably from the economy in the United States in such respects as growth of gross national product, rate of inflation, capital reinvestment, resources, self-sufficiency and balance of payment positions.

Investing in the Securities is not equivalent to investing in the Underliers or the stocks composing the Underliers – Investing in the Securities is not equivalent to investing in the Underliers or the stocks that constitute the Underliers. Investors in the Securities will not have voting rights or rights to receive dividends or other distributions or any other rights with respect to the stocks that constitute the Underliers. Additionally, the Underliers are not “total return” indices, which, in addition to reflecting the market prices of the stocks that constitute the Underliers, would also reflect dividends paid on such stocks. The return on the Securities will not include such a total return feature.

The rate we are willing to pay for securities of this type, maturity and issuance size is likely to be lower than the rate implied by our secondary market credit spreads and advantageous to us. Both the lower rate and the inclusion of costs associated with issuing, selling, structuring and hedging the Securities in the Issue Price reduce the economic terms of the Securities, cause the estimated value of the Securities to be less than the Issue Price and will adversely affect secondary market prices – Assuming no change in market conditions or any other relevant factors, the prices, if any, at which dealers, including MS & Co., may be willing to purchase the Securities in secondary market transactions will likely be significantly lower than the Issue Price, because secondary market prices will exclude the issuing, selling, structuring and hedging-related costs that are included in the Issue Price and borne by you and because the

secondary market prices will reflect our secondary market credit spreads and the bid-offer spread that any dealer would charge in a secondary market transaction of this type as well as other factors.

The inclusion of the costs of issuing, selling, structuring and hedging the Securities in the Issue Price and the lower rate we are willing to pay as issuer make the economic terms of the Securities less favorable to you than they otherwise would be.

However, because the costs associated with issuing, selling, structuring and hedging the Securities are not fully deducted upon issuance, for a period of up to 12 months following the Settlement Date, to the extent that MS & Co. may buy or sell the Securities in the secondary market, absent changes in market conditions, including those related to the Underliers, and to our secondary market credit spreads, it would do so based on values higher than the estimated value, and we expect that those higher values will also be reflected in your brokerage account statements.

The estimated value of the Securities is determined by reference to our pricing and valuation models, which may differ from those of other dealers and is not a maximum or minimum secondary market price – These pricing and valuation models are proprietary and rely in part on subjective views of certain market inputs and certain assumptions about future events, which may prove to be incorrect. As a result, because there is no market-standard way to value these types of securities, our models may yield a higher estimated value of the Securities than those generated by others, including other dealers in the market, if they attempted to value the Securities. In addition, the estimated value on the Trade Date does not represent a minimum or maximum price at which dealers, including MS & Co., would be willing to purchase your Securities in the secondary market (if any exists) at any time. The value of your Securities at any time after the date of this pricing supplement will vary based on many factors that cannot be predicted with accuracy, including our creditworthiness and changes in market conditions. See also “The market price of the Securities may be influenced by many unpredictable factors” above.

Adjustments to any of the Underliers could adversely affect the value of the Securities – The Underlier publisher for each Underlier is responsible for calculating and maintaining such Underlier. The applicable Underlier publisher may add, delete or substitute the stocks constituting such Underlier or make other methodological changes required by certain corporate events relating to the stocks constituting such Underlier, such as stock dividends, stock splits, spin-offs, rights offerings and extraordinary dividends, that could change the value of the Underlier. The Underlier publisher may discontinue or suspend calculation or publication of any of the Underliers at any time. In these circumstances, the Calculation Agent will have the sole discretion to substitute a Successor Underlier that is comparable to the discontinued Underlier, and is permitted to consider indices that are calculated and published by the Calculation Agent or any of its affiliates. Any of these actions could adversely affect the value of any of the Underliers and, consequently, the value of the Securities.

The Securities will not be listed on any securities exchange and secondary trading may be limited – The Securities will not be listed on any securities exchange. Therefore, there may be little or no secondary market for the Securities. MS & Co. currently intends, but is not obligated, to make a market in the Securities and, if it once chooses

to make a market, may cease doing so at any time. When it does make a market, it will generally do so for transactions of routine secondary market size at prices based on its estimate of the current value of the Securities, taking into account its bid/offer spread, our credit spreads, market volatility, the notional size of the proposed sale, the cost of unwinding any related hedging positions, the time remaining to maturity and the likelihood that it will be able to resell the Securities. Even if there is a secondary market, it may not provide enough liquidity to allow you to trade or sell the Securities easily. Since other broker-dealers may not participate significantly in the secondary market for the Securities, the price at which you may be able to trade your Securities is likely to depend on the price, if any, at which MS & Co. is willing to transact. If, at any time, MS & Co. were to cease making a market in the Securities, it is likely that there would be no secondary market for the Securities. Accordingly, you should be willing to hold your Securities to maturity.

Hedging and trading activity by our affiliates could potentially adversely affect the value of the Securities – One or more of our affiliates and/or third-party dealers have carried out, and will continue to carry out, hedging activities related to the Securities, including trading in the constituent stocks of the Underliers, in futures or options contracts on the Underliers or the constituent stocks of the Underliers, as well as in other instruments related to the Underliers. As a result, these entities may be unwinding or adjusting hedge positions during the term of the Securities, and the hedging strategy may involve greater and more frequent dynamic adjustments to the hedge as the Final Valuation Date approaches. MS & Co. and some of our other affiliates also trade the constituent stocks of the Underliers, in futures or options contracts on the constituent stocks of the Underliers, as well as in other instruments related to the Underliers, on a regular basis as part of their general broker-dealer and other businesses. Any of these hedging or trading activities on or prior to the Trade Date could have increased the Initial Levels of the Underliers, and, therefore, could have increased the levels at or above which the Underliers must close on the Final Valuation Date so that investors do not suffer a significant loss on their initial investment in the Securities. Additionally, such hedging or trading activities during the term of the Securities, including on the Final Valuation Date, could adversely affect the Closing Levels of the Underliers on the Final Valuation Date, and, accordingly, the amount of cash payable at maturity, if any.

Potential conflict of interest – As Calculation Agent, MS & Co. has determined the Initial Levels, the Downside Threshold and the Step Return, will determine the Final Basket Level, the Basket Return and whether any Market Disruption Event has occurred, and will calculate the amount payable at maturity, if any. Moreover, certain determinations made by MS & Co., in its capacity as Calculation Agent, may require it to exercise discretion and make subjective judgments, such as with respect to the occurrence or non-occurrence of Market Disruption Events and the selection of a Successor Underlier or calculation of the Final Basket Level in the event of a discontinuance of an Underlier or a Market Disruption Event. These potentially

subjective determinations may adversely affect the payout to you at maturity, if any. For further information regarding these types of determinations, see “Additional Terms of the Securities—Postponement of Final Valuation Date and Maturity Date,” “—Discontinuance of an Underlier; Alteration of Method of Calculation” and “—Calculation Agent and Calculations” below. In addition, MS & Co. has determined the estimated value of the Securities on the Trade Date.

Potentially inconsistent research, opinions or recommendations by Morgan Stanley, UBS or our or their respective affiliates – Morgan Stanley, UBS and our or their respective affiliates may publish research from time to time on financial markets and other matters that may influence the value of the Securities, or express opinions or provide recommendations that are inconsistent with purchasing or holding the Securities. Any research, opinions or recommendations expressed by Morgan Stanley, UBS or our or their respective affiliates may not be consistent with each other and may be modified from time to time without notice. Investors should make their own independent investigation of the merits of investing in the Securities and the Underliers to which the Securities are linked.

Uncertain Tax Treatment – Please note that the discussions in this pricing supplement concerning the U.S. federal income tax consequences of an investment in the Securities supersede the discussions contained in the accompanying prospectus supplement.

Subject to the discussion under “What Are the Tax Consequences of the Securities” in this pricing supplement, although there is uncertainty regarding the U.S. federal income tax consequences of an investment in the Securities due to the lack of governing authority, in the opinion of our counsel, Davis Polk & Wardwell LLP (“our counsel”), under current law, and based on current market conditions, each Security should be treated as a single financial contract that is an “open transaction” for U.S. federal income tax purposes.

If the Internal Revenue Service (the “IRS”) were successful in asserting an alternative treatment for the Securities, the timing and character of income on the Securities might differ significantly from the tax treatment described herein. For example, under one possible treatment, the IRS could seek to recharacterize the Securities as debt instruments. In that event, U.S. Holders (as defined below) would be required to accrue into income original issue discount on the Securities every year at a “comparable yield” determined at the time of issuance and recognize all income and gain in respect of the Securities as ordinary income. The risk that financial instruments providing for buffers, triggers or similar downside protection features, such as the Securities, would be recharacterized as debt is greater than the risk of recharacterization for comparable financial instruments that do not have such features. We do not plan to request a ruling from the IRS regarding the tax treatment of the Securities, and the IRS or a court may not agree with the tax treatment described in this pricing supplement.

In 2007, the U.S. Treasury Department and the IRS released a notice requesting comments on the U.S. federal income tax treatment of “prepaid forward contracts” and similar instruments. The notice focuses in particular on whether to require holders of these instruments to accrue income over the term of their investment. It also asks for comments on a number of related topics, including the character of income or loss with respect to these instruments; whether short-term instruments should be subject to any such accrual regime; the relevance of factors such as the

exchange-traded status of the instruments and the nature of the underlying property to which the instruments are linked; the degree, if any, to which income (including any mandated accruals) realized by Non-U.S. Holders (as defined below) should be subject to withholding tax; and whether these instruments are or should be subject to the “constructive ownership” rule, which very generally can operate to recharacterize certain long-term capital gain as ordinary income and impose an interest charge. While the notice requests comments on appropriate transition rules and effective dates, any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the Securities, possibly with retroactive effect.

Both U.S. and Non-U.S. Holders should read carefully the discussion under “What Are the Tax Consequences of the Securities” in this pricing supplement and consult their tax advisers regarding all aspects of the U.S. federal tax consequences of an investment in the Securities as well as any tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction.

Scenario Analysis and Examples at Maturity

These examples are based on hypothetical terms. The actual terms are set forth on the cover of this pricing supplement.

The below scenario analysis and examples are provided for illustrative purposes only and are hypothetical. They do not purport to be representative of every possible scenario concerning increases or decreases in the level of the Basket relative to the Initial Basket Level. We cannot predict the Final Basket Level on the Final Valuation Date. You should not take the scenario analysis and these examples as an indication or assurance of the expected performance of the Basket. The numbers appearing in the examples below have been rounded for ease of analysis. The following scenario analysis and examples illustrate the payment at maturity for a \$10.00 security on a hypothetical offering of the Securities, and reflect the Step Return of 52.40% and the following assumptions:

Investment term: 5 years
 Initial Basket Level: 100
 Downside Threshold: 70
 Step Return: 52.40%
 Step Barrier: 100

Example 1— The level of the Basket *increases* to a Final Basket Level of 115. The Final Basket Level is greater than or equal to the Step Barrier but the Basket Return is less than the Step Return of 52.40%:

$$\text{Basket Return} = (115 - 100) / 100 = 15.00\%$$

$$\text{Payment at Maturity} = \$10 + [\$10 \times \text{the greater of (i) 52.40\% and (ii) 15.00\%}] = \$15.24$$

Because the Final Basket Level is greater than or equal to the Step Barrier but the Basket Return is less than the Step Return of 52.40%, the Payment at Maturity is equal to \$15.24 per \$10.00 Principal Amount of Securities, resulting in a total return on the Securities of 52.40%.

Example 2— The level of the Basket *increases* to a Final Basket Level of 175. The Final Basket Level is greater than or equal to the Step Barrier and the Basket Return is greater than the Step Return of 52.40%:

$$\text{Basket Return} = (175 - 100) / 100 = 75.00\%$$

$$\text{Payment at Maturity} = \$10 + [\$10 \times \text{the greater of (i) 52.40\% and (ii) 75.00\%}] = \$17.50$$

Because the Final Basket Level is greater than or equal to the Step Barrier and the Basket Return is greater than the Step Return of 52.40%, the Payment at Maturity is equal to \$17.50 per \$10.00 Principal Amount of Securities, resulting in a total return on the Securities of 75.00%.

Example 3— The level of the Basket *decreases* to a Final Basket Level of 85. The Final Basket Level is less than the Step Barrier but greater than or equal to the Downside Threshold:

$$\text{Basket Return} = (85 - 100) / 100 = -15.00\%$$

$$\text{Payment at Maturity} = \$10 + (\$10 \times \text{Contingent Absolute Return})$$

$$\text{Payment at Maturity} = (\$10 + (\$10 \times 15.00\%))$$

$$= \$11.50$$

Because the Final Basket Level is less than the Step Barrier but greater than or equal to the Downside Threshold on the Final Valuation Date, the Contingent Absolute Return will apply and MSFL will pay you a Payment at Maturity equal to \$11.50 per \$10.00 Principal Amount of Securities, resulting in a 15.00% percent return on the Securities.

Example 4— The level of the Basket *decreases* to a Final Basket Level of 60. The Basket Return is less than the Downside Threshold and expressed as a formula:

$$\text{Basket Return} = (60 - 100) / 100 = -40.00\%$$

$$\text{Payment at Maturity} = \$10 + (\$10 \times -40.00\%) = \$6.00$$

Because the Final Basket Level is less than the Downside Threshold on the Final Valuation Date, the Contingent Absolute Return will not apply and the Securities will be fully exposed to any decline in the level of the Basket as of the Final Valuation Date. Therefore, the Payment at Maturity is equal to \$6.00 per \$10.00 Principal Amount of Securities, resulting in a total loss on the Securities of 40.00%.

If the Final Basket Level is below the Downside Threshold on the Final Valuation Date, the Contingent Absolute Return will not apply, the Securities will be fully exposed to any decline in the Basket, and you will lose more than 30%, and possibly all, of your Principal Amount at maturity.

Scenario Analysis – Hypothetical Payment at Maturity for each \$10.00 Principal Amount of Securities.

Performance of the Underlying*		Performance of the Securities	
Final Basket Level	Basket Return	Payment at Maturity	Return on Securities Purchased at \$10.00 ⁽¹⁾
200	100.00%	\$20.00	100.00%
190	90.00%	\$19.00	90.00%
180	80.00%	\$18.00	80.00%
170	70.00%	\$17.00	70.00%
160	60.00%	\$16.00	60.00%
152.40	52.40%	\$15.24	52.40%
150	50.00%	\$15.24	52.40%
140	40.00%	\$15.24	52.40%
130	30.00%	\$15.24	52.40%
120	20.00%	\$15.24	52.40%
110	10.00%	\$15.24	52.40%
100	0.00%	\$15.24	52.40%
90	-10.00%	\$11.00	10.00%
80	-20.00%	\$12.00	20.00%
70	-30.00%	\$13.00	30.00%
60	-31.00%	\$6.90	-31.00%
50	-40.00%	\$6.00	-40.00%
49	-50.00%	\$5.00	-50.00%
40	-60.00%	\$4.00	-60.00%
30	-70.00%	\$3.00	-70.00%
20	-80.00%	\$2.00	-80.00%
10	-90.00%	\$1.00	-90.00%
0	-100.00%	\$0.00	-100.00%

* The Basket excludes cash dividend payments on stocks included in the Underliers.

(1) The “Return on Securities” is the number, expressed as a percentage, that results from comparing the Payment at Maturity per \$10 Principal Amount Security to the purchase price of \$10 per Security.

What are the tax consequences of the Securities?

Prospective investors should note that the discussion under the section called “United States Federal Taxation” in the accompanying prospectus supplement does not apply to the Securities issued under this pricing supplement and is superseded by the following discussion.

The following summary is a general discussion of the principal U.S. federal income tax consequences and certain estate tax consequences of the ownership and disposition of the Securities. This discussion applies only to investors in the Securities who:

t purchase the Securities in the original offering; and

t hold the Securities as capital assets within the meaning of Section 1221 of the Internal Revenue Code of 1986, as amended (the “Code”).

This discussion does not describe all of the tax consequences that may be relevant to a holder in light of the holder’s particular circumstances or to holders subject to special rules, such as:

t certain financial institutions;

t insurance companies;

t certain dealers and traders in securities or commodities;

t investors holding the Securities as part of a “straddle,” wash sale, conversion transaction, integrated transaction or constructive sale transaction;

t U.S. Holders (as defined below) whose functional currency is not the U.S. dollar;

t partnerships or other entities classified as partnerships for U.S. federal income tax purposes;

t regulated investment companies;

t real estate investment trusts; or

t tax-exempt entities, including “individual retirement accounts” or “Roth IRAs” as defined in Section 408 or 408A of the Code, respectively.

If an entity that is classified as a partnership for U.S. federal income tax purposes holds the Securities, the U.S. federal income tax treatment of a partner will generally depend on the status of the partner and the activities of the partnership. If you are a partnership holding the Securities or a partner in such a partnership, you should consult your tax adviser as to the particular U.S. federal tax consequences of holding and disposing of the Securities to you.

In addition, we will not attempt to ascertain whether any issuer of any shares to which a Security relates (such shares hereafter referred to as “Underlying Shares”) is treated as a “passive foreign investment company” (“PFIC”) within the meaning of Section 1297 of the Code. If any issuer of Underlying Shares were so treated, certain adverse U.S. federal income tax consequences might apply to a U.S. Holder upon the sale, exchange or settlement of the Securities. You should refer to information filed with the Securities and Exchange Commission or other governmental authorities by the issuers of the Underlying Shares and consult your tax adviser regarding the possible consequences to you if any issuer is or becomes a PFIC.

As the law applicable to the U.S. federal income taxation of instruments such as the Securities is technical and complex, the discussion below necessarily represents only a general summary. Moreover, the effect of any applicable state, local or non-U.S. tax laws is not discussed, nor are any alternative minimum tax consequences or consequences resulting from the Medicare tax on investment income.

This discussion is based on the Code, administrative pronouncements, judicial decisions and final, temporary and proposed Treasury regulations, all as of the date of this pricing supplement, changes to any of which subsequent to the date hereof may affect the tax consequences described herein. Persons considering the purchase of the Securities should consult their tax advisers with regard to the application of the U.S. federal income tax laws to their particular situations as well as any tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction.

General

Although there is uncertainty regarding the U.S. federal income tax consequences of an investment in the Securities due to the lack of governing authority, in the opinion of our counsel, under current law, and based on current market conditions, each Security should be treated as a single financial contract that is an “open transaction” for U.S. federal income tax purposes.

Due to the absence of statutory, judicial or administrative authorities that directly address the treatment of the Securities or instruments that are similar to the Securities for U.S. federal income tax purposes, no assurance can be given that the Internal Revenue Service (the “IRS”) or a court will agree with the tax treatment described herein. Accordingly, you should consult your tax adviser regarding all aspects of the U.S. federal tax consequences of an investment in the Securities (including possible alternative treatments of the Securities). Unless otherwise stated, the following discussion is based on the treatment of the Securities as described in the previous paragraph.

Tax Consequences to U.S. Holders

This section applies to you only if you are a U.S. Holder. As used herein, the term “U.S. Holder” means a beneficial owner of a Security that is, for U.S. federal income tax purposes:

t a citizen or individual resident of the United States;

t a corporation, or other entity taxable as a corporation, created or organized in or under the laws of the United States, any state thereof or the District of Columbia; or

t an estate or trust the income of which is subject to U.S. federal income taxation regardless of its source.

Tax Treatment of the Securities

Assuming the treatment of the Securities as set forth above is respected, the following U.S. federal income tax consequences should result.

Tax Treatment Prior to Settlement. A U.S. Holder should not be required to recognize taxable income over the term of the Securities prior to settlement, other than pursuant to a sale or exchange as described below.

Tax Basis. A U.S. Holder’s tax basis in the Securities should equal the amount paid by the U.S. Holder to acquire the Securities.

Sale, Exchange or Settlement of the Securities. Upon a sale, exchange or settlement of the Securities, a U.S. Holder should recognize gain or loss equal to the difference between the amount realized on the sale, exchange or settlement and the U.S. Holder’s tax basis in the Securities sold, exchanged or settled. Subject to the discussion above regarding the possible application of Section 1297 of the Code, any gain or loss recognized upon the sale, exchange or settlement of the Securities should be long-term capital gain or loss if the U.S. Holder has held the Securities for more than one year at such time, and short-term capital gain or loss otherwise.

Possible Alternative Tax Treatments of an Investment in the Securities

Due to the absence of authorities that directly address the proper tax treatment of the Securities, no assurance can be given that the IRS will accept, or that a court will uphold, the treatment described above. In particular, the IRS could seek to analyze the U.S. federal income tax consequences of owning the Securities under Treasury regulations governing contingent payment debt instruments (the “Contingent Debt Regulations”). If the IRS were successful in asserting that the Contingent Debt Regulations applied to the Securities, the timing and character of income thereon would be significantly affected. Among other things, a U.S. Holder would be required to accrue into income original issue discount on the Securities every year at a “comparable yield” determined at the time of their issuance, adjusted upward or downward to reflect the difference, if any, between the actual and the projected amount of the contingent payment on the Securities. Furthermore, any gain realized by a U.S. Holder at maturity or upon a sale, exchange or other disposition of the Securities would generally be treated as ordinary income, and any loss realized would be treated as ordinary loss to the extent of the U.S. Holder’s prior accruals of original issue discount and as capital loss thereafter. The risk that financial instruments providing for buffers, triggers or similar downside protection features, such as the Securities, would be recharacterized as debt is greater than the risk of recharacterization for comparable financial instruments that do not have such features.

Other alternative federal income tax treatments of the Securities are also possible, which, if applied, could significantly affect the timing and character of the income or loss with respect to the Securities. In 2007, the U.S. Treasury Department and the IRS released a notice requesting comments on the U.S. federal income tax treatment of “prepaid forward contracts” and similar instruments. The notice focuses in particular on whether to require holders of these instruments to accrue income over the term of their investment. It also asks for comments on a number of related topics, including the character of income or loss with respect to these instruments; whether short-term instruments should be subject to any such accrual regime; the relevance of factors such as the exchange-traded status of the instruments and the nature of the underlying property to which the instruments are linked; and whether these instruments are or should be subject to the “constructive ownership” rule, which very generally can operate to recharacterize certain long-term capital gain as ordinary income and impose an interest charge. While the notice requests comments on appropriate transition rules and effective dates, any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the Securities, possibly with retroactive effect. U.S. Holders should consult their tax advisers regarding the U.S. federal income tax consequences of an investment in the Securities, including possible alternative treatments and the issues presented by this notice.

Backup Withholding and Information Reporting

Backup withholding may apply in respect of the payment on the Securities at maturity and the payment of proceeds from a sale, exchange or other disposition of the Securities, unless a U.S. Holder provides proof of an applicable exemption or a correct taxpayer identification number and otherwise complies with applicable requirements of the backup withholding rules. The amounts withheld under the backup withholding rules are not an additional tax and may be refunded, or credited against the U.S. Holder’s U.S. federal income tax liability, provided that the required information is timely furnished to the IRS. In addition,

information returns may be filed with the IRS in connection with the payment on the Securities and the payment of proceeds from a sale, exchange or other disposition of the Securities, unless the U.S. Holder provides proof of an applicable exemption from the information reporting rules.

Tax Consequences to Non-U.S. Holders

This section applies to you only if you are a Non-U.S. Holder. As used herein, the term “Non-U.S. Holder” means a beneficial owner of a Security that is, for U.S. federal income tax purposes:

- t an individual who is classified as a nonresident alien;
- t a foreign corporation; or
- t a foreign estate or trust.

The term “Non-U.S. Holder” does not include any of the following holders:

t a holder who is an individual present in the United States for 183 days or more in the taxable year of disposition and who is not otherwise a resident of the United States for U.S. federal income tax purposes;

t certain former citizens or residents of the United States; or

t a holder for whom income or gain in respect of the Securities is effectively connected with the conduct of a trade or business in the United States.

Such holders should consult their tax advisers regarding the U.S. federal income tax consequences of an investment in the Securities.

Tax Treatment upon Sale, Exchange or Settlement of the Securities

Edgar Filing: MORGAN STANLEY - Form 424B2

In general. Assuming the treatment of the Securities as set forth above is respected, and subject to the discussions below concerning backup withholding and the possible application of Section 871(m) of the Code, a Non-U.S. Holder of the Securities generally will not be subject to U.S. federal income or withholding tax in respect of amounts paid to the Non-U.S. Holder.

Subject to the discussions regarding the possible application of Section 871(m) and FATCA, if all or any portion of a Security were recharacterized as a debt instrument, any payment made to a Non-U.S. Holder with respect to the Securities would not be subject to U.S. federal withholding tax, provided that:

t the Non-U.S. Holder does not own, directly or by attribution, ten percent or more of the total combined voting power of all classes of Morgan Stanley stock entitled to vote;

t the Non-U.S. Holder is not a controlled foreign corporation related, directly or indirectly, to Morgan Stanley through stock ownership;

t the Non-U.S. Holder is not a bank receiving interest under Section 881(c)(3)(A) of the Code, and

t the certification requirement described below has been fulfilled with respect to the beneficial owner.

Certification Requirement. The certification requirement referred to in the preceding paragraph will be fulfilled if the beneficial owner of a Security (or a financial institution holding a Security on behalf of the beneficial owner) furnishes to the applicable withholding agent an IRS Form W-8BEN (or other appropriate form) on which the beneficial owner certifies under penalties of perjury that it is not a U.S. person.

In 2007, the U.S. Treasury Department and the IRS released a notice requesting comments on the U.S. federal income tax treatment of “prepaid forward contracts” and similar instruments. Among the issues addressed in the notice is the degree, if any, to which any income with respect to instruments such as the Securities should be subject to U.S. withholding tax. It is possible that any Treasury regulations or other guidance promulgated after consideration of this issue could materially and adversely affect the withholding tax consequences of ownership and disposition of the Securities, possibly on a retroactive basis. Non-U.S. Holders should note that we currently do not intend to withhold on any payment made with respect to the Securities to Non-U.S. Holders (subject to compliance by such holders with the certification requirement described above and to the discussions below regarding Section 871(m) and FATCA). However, in the event of a change of law or any formal or informal guidance by the IRS, the U.S. Treasury Department or Congress, we may decide to withhold on payments made with respect to the Securities to Non-U.S. Holders, and we will not be required to pay any additional amounts with respect to amounts withheld. Accordingly, Non-U.S. Holders should consult their tax advisers regarding all aspects of the U.S. federal income tax consequences of an investment in the Securities, including the possible implications of the notice referred to above.

Section 871(m) Withholding Tax on Dividend Equivalents

Section 871(m) of the Code and Treasury regulations promulgated thereunder (“Section 871(m)”) generally impose a 30% (or a lower applicable treaty rate) withholding tax on dividend equivalents paid or deemed paid to Non-U.S. Holders with respect to certain financial instruments linked to U.S. equities or indices that include U.S. equities (each, an “Underlying Security”). Subject to certain exceptions, Section 871(m) generally applies to securities that substantially replicate the economic performance of one or more Underlying Securities, as determined based on tests set forth in the applicable Treasury regulations (a “Specified Security”). However, pursuant to an IRS notice, Section 871(m) will not apply to securities issued before January 1, 2021 that do not have a delta of one with respect to any Underlying Security. Based on our determination that the Securities do not have a delta of one with respect to any Underlying Security, our counsel is of the opinion that the Securities should not be Specified Securities and, therefore, should not be subject to Section 871(m).

Our determination is not binding on the IRS, and the IRS may disagree with this determination. Section 871(m) is complex and its application may depend on your particular circumstances, including whether you enter into other transactions with respect to an Underlying Security. If Section 871(m) withholding is required, we will not be required to pay any additional amounts with respect to the amounts so withheld. You should consult your tax adviser regarding the potential application of Section 871(m) to the Securities.

U.S. Federal Estate Tax

Individual Non-U.S. Holders and entities the property of which is potentially includible in such an individual’s gross estate for U.S. federal estate tax purposes (for example, a trust funded by such an individual and with respect to which the individual has retained certain interests or powers), should note that, absent an applicable treaty exemption, the Securities may be treated as U.S. situs property subject to U.S. federal estate tax. Prospective investors that are non-U.S. individuals, or are entities of the type described above, should consult their tax advisers regarding the U.S. federal estate tax consequences of an investment in the Securities.

Backup Withholding and Information Reporting

Information returns may be filed with the IRS in connection with the payment on the Securities at maturity as well as in connection with the payment of proceeds from a sale, exchange or other disposition of the Securities. A Non-U.S. Holder may be subject to backup withholding in respect of amounts paid to the Non-U.S. Holder, unless such Non-U.S. Holder complies with certification procedures to establish that it is not a U.S. person for U.S. federal income tax purposes or otherwise establishes an exemption. Compliance with the certification procedures described above under “ Tax Treatment upon Sale, Exchange or Settlement of the Securities – Certification Requirement” will satisfy the certification requirements necessary to avoid backup withholding as well. The amount of any backup withholding from a payment to a Non-U.S. Holder will be allowed as a credit against the Non-U.S. Holder’s U.S. federal income tax liability and may entitle the Non-U.S. Holder to a refund, provided that the required information is

timely furnished to the IRS.

FATCA

Legislation commonly referred to as “FATCA” generally imposes a withholding tax of 30% on payments to certain non-U.S. entities (including financial intermediaries) with respect to certain financial instruments, unless various U.S. information reporting and due diligence requirements have been satisfied. An intergovernmental agreement between the United States and the non-U.S. entity’s jurisdiction may modify these requirements. FATCA generally applies to certain financial instruments that are treated as paying U.S.-source interest or other U.S.-source “fixed or determinable annual or periodical” income. If the Securities were recharacterized as debt instruments, FATCA would apply to any payment of amounts treated as interest and, for dispositions after December 31, 2018, to payments of gross proceeds of the disposition (including upon retirement) of the Securities. If withholding applies to the Securities, we will not be required to pay any additional amounts with respect to amounts withheld. Both U.S. and Non-U.S. Holders should consult their tax advisers regarding the potential application of FATCA to the Securities.

The discussion in the preceding paragraphs under “What Are the Tax Consequences of the Securities,” insofar as it purports to describe provisions of U.S. federal income tax laws or legal conclusions with respect thereto, constitutes the full opinion of Davis Polk & Wardwell LLP regarding the material U.S. federal income tax consequences of an investment in the Securities.

The EURO STOXX 50[®] Index

The EURO STOXX 50[®] Index was created by STOXX Limited, which is owned by Deutsche Börse AG and SIX Group AG. Publication of the EURO STOXX 50[®] Index began on February 26, 1998, based on an initial index value of 1,000 at December 31, 1991. The EURO STOXX 50[®] Index is composed of 50 component stocks of market sector leaders from within the STOXX 600 Supersector Indices, which includes stocks selected from the Eurozone. The component stocks have a high degree of liquidity and represent the largest companies across all market sectors. For additional information about the EURO STOXX 50[®] Index, see the information set forth under “EURO STOXX 50[®] Index” in the accompanying index supplement.

“EURO STOXX 50[®]” and “STOXX[®]” are registered trademarks of STOXX Limited. For more information, see “EURO STOXX 50[®] Index” in the accompanying index supplement.

Historical Information

The following table sets forth the published high and low Closing Levels, as well as the end-of-quarter Closing Levels, of the EURO STOXX 50[®] Index for each quarter in the period from January 1, 2013 through October 29, 2018. The Closing Level of the EURO STOXX 50[®] Index on October 29, 2018 was 3,154.93. We obtained the information in the table below from Bloomberg Financial Markets, without independent verification. The historical Closing Levels of the EURO STOXX 50[®] Index should not be taken as an indication of future performance, and no assurance can be given as to the Closing Level of the EURO STOXX 50[®] Index on the Final Valuation Date.

Quarter Begin	Quarter End	Quarterly High	Quarterly Low	Quarterly Close

The FTSE[®] 100 Index

The FTSE[®] 100 Index, which is calculated, published and disseminated by FTSE Russell, is a free-float-adjusted index which measures the composite price performance of stocks of the largest 100 companies (determined on the basis of market capitalization) traded on the London Stock Exchange. The 100 stocks included in the FTSE[®] 100 Index (the “FTSE Underlying Stocks”) are selected from a reference group of stocks trading on the London Stock Exchange which are in turn selected by excluding certain stocks that have low liquidity based on public float, accuracy and reliability of prices, size and number of trading days. The FTSE Underlying Stocks are selected from this reference group by selecting 100 stocks with the largest market value. For additional information about the FTSE[®] 100 Index, see the information set forth under “FTSE[™] 100 Index” in the accompanying index supplement.

“FTSE[™]” and “Footse[™]” are trademarks of London Stock Exchange Plc and The Financial Times Limited. For more information, see “FTSE[™] 100 Index” in the accompanying index supplement.

Historical Information

The Nikkei 225 Index

The Nikkei 225 Index is a stock index calculated, published and disseminated by Nikkei Inc. (formerly known as Nihon Keizai Shimbun, Inc.), which we refer to as Nikkei, that measures the composite price performance of selected Japanese stocks. The Nikkei 225 Index currently is based on 225 underlying stocks trading on the Tokyo Stock Exchange (the “TSE”) representing a broad cross-section of Japanese industries. Stocks listed in the First Section of the TSE are among the most actively traded stocks on the TSE. All 225 Nikkei Underlying Stocks are stocks listed in the First Section of the TSE. Nikkei rules require that the 75 most liquid issues (one-third of the component count of the Nikkei 225 Index) be included in the Nikkei 225 Index. Nikkei first calculated and published the Nikkei 225 Index in 1970. The 225 companies included in the Nikkei 225 Index are divided into six sector categories: technology, financials, consumer goods, materials, capital goods/others and transportation and utilities. For additional information about the Nikkei 225 Index, see the information set forth under “Nikkei 225 Index” in the accompanying index supplement.

Nikkei, the publisher of the Nikkei 225 Index, has the copyright to the Nikkei 225 Index. All rights to the Nikkei 225 Index are owned by Nikkei. Nikkei has the right to change the contents of the Nikkei 225 Index and to cease compilation and publication of the Nikkei 225 Index. In addition, Nikkei has no relationship to us or the securities; it does not sponsor, endorse, authorize, sell or promote the securities, and has no obligation or liability in connection with the administration, marketing or trading of the securities or with the calculation of the return on your investment. For more information, see “Nikkei 225 Index” in the accompanying index supplement.

Historical Information

The following table sets forth the published high and low Closing Levels, as well as the end-of-quarter Closing Levels, of the Nikkei 225 Index for each quarter in the period from January 1, 2013 through October 29, 2018. The Closing Level of the Nikkei 225 Index on October 29, 2018 was 21,149.80. We obtained the information in the table below from Bloomberg Financial Markets, without independent verification. The historical Closing Levels of the Nikkei 225 Index should not be taken as an indication of future performance, and no assurance can be given as to the Closing Level of the Nikkei 225 Index on the Final Valuation Date.

The Swiss Market Index

The Swiss Market Index (“SMI”) represents approximately 85% of the free-float capitalization of the Swiss equity market. The Swiss Market Index consists of the 20 largest and most liquid equities of the Swiss Performance Index®. The composition of the Swiss Market Index is reviewed annually, and in order to ensure a high degree of continuity in the composition of the Swiss Market Index, the component stocks are subject to a special procedure for adding them to the Swiss Market Index or removing them based on free-float market capitalization and liquidity. For additional information about the Swiss Market Index, see the information set forth under “Swiss Market Index” in the accompanying index supplement.

SMI® is a trademark of SIX Swiss Exchange. For more information, see “Swiss Market Index” in the accompanying index supplement.

Historical Information

The following table sets forth the published high and low Closing Levels, as well as the end-of-quarter Closing Levels, of the Swiss Market Index for each quarter in the period from January 1, 2013 through October 29, 2018. The Closing Level of the Swiss Market Index on October 29, 2018 was 8,759.62. We obtained the information in the table below from Bloomberg Financial Markets, without independent verification. The historical Closing Levels of the Swiss Market Index should not be taken as an indication of future performance, and no assurance can be given as to the Closing Level of the Swiss Market Index on the Final Valuation Date.
