During the six months ended April 30, 2009 and 2008 MVC Capital, Inc. paid \$0 and \$350,000 in income taxes, respectively.

Non-cash activity:

During the six months ended April 30, 2009 and 2008, MVC Capital, Inc. recorded payment in kind dividend and interest of \$2,646,785 and \$2,752,945, respectively. This amount was added to the principal balance of the investments and recorded as interest/dividend income.

During the six months ended April 30, 2009 for MVC Capital Inc., was allocated \$10,067 in flow through loss from its equity investment in Octagon Credit Investors, LLC. and this amount decreased the cost of the investment. The fair value was then decreased by the Fund's Valuation Committee. During the six months ended April 30 2008, MVC Capital, Inc. was allocated \$322,771 in flow-through income from its equity investment in Octagon Credit Investors, LLC. Of this amount, \$202,283 was received in cash and the balance of \$120,488 was undistributed and therefore increased the cost of the investment. The fair value was then increased by the Fund's Valuation Committee.

On November 1, 2007, MVC Capital, Inc. re-issued 15,821 shares of treasury stock, in lieu of a \$240,636 cash distribution, in accordance with the Fund's dividend reinvestment plan.

On December 3, 2007, MVC Capital, Inc. converted the Ohio Medical Corporation Convertible Unsecured Subordinated Promissory Note from \$3,405,263.60 of principal and interest to 1,125.700 shares of Ohio Medical Preferred Stock.

On January 9, 2008, MVC Capital, Inc. re-issued 15,930 shares of treasury stock, in lieu of a \$242,455 cash distribution, in accordance with the Fund's dividend reinvestment plan.

MVC Capital, Inc. (the Company)
Notes to Consolidated Financial Statements
April 30, 2009
(Unaudited)

1. Basis of Presentation

The accompanying unaudited interim consolidated financial statements have been prepared in accordance with the instructions to Form 10-Q and do not include all of the information and footnotes required by U.S. generally accepted accounting principles for complete consolidated financial statements. Certain amounts have been reclassified to adjust to current period presentations. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. These statements should be read in conjunction with the financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended October 31, 2008, as filed with the U.S. Securities and Exchange Commission (the SEC) on December 29, 2008.

2. Consolidation

On July 16, 2004, the Company formed a wholly-owned subsidiary, MVC Financial Services, Inc. (MVCFS). MVCFS is incorporated in Delaware and its principal purpose is to provide advisory, administrative and other services to the Company, the Company's portfolio companies and other entities. MVCFS had opening equity of \$1 (100 shares at \$0.01 per share). The Company does not hold MVCFS for investment purposes and does not intend to sell MVCFS. In the consolidation, all intercompany accounts have been eliminated.

3. Investment Classification

As required by the Investment Company Act of 1940, as amended (the 1940 Act), we classify our investments by level of control. As defined in the 1940 Act, Control Investments are investments in those companies that we are deemed to Control. Affiliate Investments are investments in those companies that are Affiliated Companies of us, as defined in the 1940 Act, other than Control Investments. Non-Control/Non-Affiliate Investments are those that are neither Control Investments nor Affiliate Investments. Generally, under that 1940 Act, we are deemed to control a company in which we have invested if we own 25% or more of the voting securities of such company or have greater than 50% representation on its board. We are deemed to be an affiliate of a company in which we have invested if we own 5% or more and less than 25% of the voting securities of such company.

4. Investment Valuation Policy

Our investments are carried at fair value in accordance with the 1940 Act and Statement of Financial Accounting Standards (SFAS) No. 157, *Fair Value Measurements* (SFAS No. 157). In accordance with the 1940 Act, unrestricted minority-owned publicly traded securities for which market quotations are readily available are valued at the closing market quote on the valuation date and majority-owned publicly traded securities and other privately held securities are valued as determined in good faith by the Valuation Committee of our Board of Directors. For restricted securities of companies that are publicly traded, the value is based on the closing market quote on the valuation date minus a discount for the restriction. For unrestricted securities of companies that are publicly traded for which we have a majority-owned interest, the value is generally based on the closing market quote on the valuation date plus a control premium if the Valuation Committee of our Board of Directors determines in good faith that additional value above the closing market quote would be obtainable upon a sale or transfer of our controlling interest. At April 30, 2009, we did not hold restricted or unrestricted securities of publicly traded companies for which we have a majority-owned interest.

Table of Contents

We adopted SFAS No. 157 on November 1, 2008. SFAS No. 157 provides a framework for measuring the fair value of assets and liabilities. SFAS No. 157 also provides guidance regarding a fair value hierarchy, which prioritizes information used to measure fair value and the effect of fair value measurements on earnings and provides for enhanced disclosures determined by the level within the hierarchy of information used in the valuation. SFAS No. 157 applies whenever other standards require (or permit) assets or liabilities to be measured at fair value but does not expand the use of fair value in any new circumstances.

SFAS No. 157 defines fair value in terms of the price that would be received upon the sale of an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The price used to measure the fair value is not adjusted for transaction costs while the cost basis of our investments may include initial transaction costs. Under SFAS No. 157, the fair value measurement also assumes that the transaction to sell an asset occurs in the principal market for the asset or, in the absence of a principal market, the most advantageous market for the asset. The principal market is the market in which the reporting entity would sell or transfer the asset with the greatest volume and level of activity for the asset. In determining the principal market for an asset or liability under SFAS No. 157, it is assumed that the reporting entity has access to the market as of the measurement date. If no market for the asset exists or if the reporting entity does not have access to the principal market, the reporting entity should use a hypothetical market.

In October 2008, the Financial Accounting Standards Board, or the FASB, issued FASB Staff Position (FSP) No. 157-3, *Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active*. FSP No. 157-3 clarifies the application of SFAS No. 157 in a market that is not active. More specifically, FSP No. 157-3 states that significant judgment should be applied to determine if observable data in a dislocated market represents forced liquidations or distressed sales and are not representative of fair value in an orderly transaction. FSP No. 157-3 also provides further guidance that the use of a reporting entity's own assumptions about future cash flows and appropriately risk-adjusted discount rates is acceptable when relevant observable inputs are not available. In addition, FSP No. 157-3 provides guidance on the level of reliance of broker quotes or pricing services when measuring fair value in a non active market stating that less reliance should be placed on a quote that does not reflect actual market transactions and a quote that is not a binding offer. The guidance in FSP No. 157-3 is effective upon issuance for all financial statements that have not been issued and any changes in valuation techniques as a result of applying FSP No. 157-3 are accounted for as a change in accounting estimate. FSP No. 157-3 has not had a material effect on our financial position or results of operations.

In April 2009, the FASB issued FSP 157-4, *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly* (FSP 157-4), which provides guidance on how to determine the fair value of assets under SFAS 157 in the current economic environment and reemphasizes that the objective of a fair value measurement remains an orderly transaction (that is, not a forced liquidation or distressed sale) between market participants at the measurement date under current market conditions. FSP 157-4 states that a transaction price that is associated with a transaction that is not orderly is not determinative of fair value or market-participant risk premiums and companies should place little, if any, weight (compared with other indications of fair value) on transactions that are not orderly when estimating fair value or market risk premiums. FSP 157-4 is effective for periods ending after June 15, 2009. We do not believe that the adoption of FSP 157-4 will have a material effect on our financial position or results of operations.

Valuation Methodology

There is no one methodology to determine fair value and, in fact, for any portfolio security, fair value may be expressed as a range of values, from which the Company derives a single fair value. To determine the fair value of a portfolio security, the Valuation Committee analyzes the portfolio company's financial results and

Table of Contents

projections, publicly traded comparables of companies when available, comparable private transactions when available, precedent transactions in the market when available, as well as other factors. The Company generally requires, where practicable, portfolio companies to provide annual audited and more regular unaudited financial statements, and/or annual projections for the upcoming fiscal year.

The fair value of our portfolio securities is inherently subjective. Because of the inherent uncertainty of fair valuation of portfolio securities that do not have readily ascertainable market values, our determination of fair value may significantly differ from the fair value that would have been used had a ready market existed for the securities. Such values also do not reflect brokers' fees or other selling costs which might become payable on disposition of such investments.

If a security is publicly traded, the fair value is generally equal to market value based on the closing price on the principal exchange on which the security is primarily traded.

For equity securities of portfolio companies, the Valuation Committee estimates the fair value based on the market approach with value then attributed to equity or equity like securities using the enterprise value waterfall (Enterprise Value Waterfall) valuation methodology. Under the Enterprise Value Waterfall valuation methodology, the Valuation Committee estimates the enterprise fair value of the portfolio company and then waterfalls the enterprise value over the portfolio company's securities in order of their preference relative to one another. To assess the enterprise value of the portfolio company, the Valuation Committee weighs some or all of the traditional market valuation methods and factors based on the individual circumstances of the portfolio company in order to estimate the enterprise value. The methodologies for performing assets may be based on, among other things: valuations of comparable public companies, recent sales of private and public comparable companies, discounting the forecasted cash flows of the portfolio company, third party valuations of the portfolio company, consideration of any offers from third parties to buy the company, estimating the value to potential strategic buyers and considering the value of recent investments in the equity securities of the portfolio company. For non-performing assets, the Valuation Committee may estimate the liquidation or collateral value of the portfolio company's assets. The Valuation Committee also takes into account historical and anticipated financial results.

In assessing enterprise value, the Valuation Committee considers the mergers and acquisitions (M&A) market as the principal market in which the Company would sell its investments in portfolio companies under circumstances where the Company has the ability to control or gain control of the board of directors of the portfolio company (Control Companies). This approach is consistent with the principal market that the Company would use for its portfolio companies if the Company has the ability to initiate a sale of the portfolio company as of the measurement date, i.e., if it has the ability to control or gain control of the board of directors of the portfolio company as of the measurement date. In evaluating if the Company can control or gain control of a portfolio company as of the measurement date, the Company takes into account its equity securities on a fully diluted basis as well as other factors.

For non-Control Companies, consistent with SFAS No. 157, the Valuation Committee considers a hypothetical secondary market as the principal market in which it would sell investments in those companies.

For loans and debt securities of non-Control Companies (for which the Valuation Committee has identified the hypothetical secondary market as the principal market), the Valuation Committee determines fair value based on the assumptions that a hypothetical market participant would use to value the security in a current hypothetical sale using a market yield (Market Yield) valuation methodology. In applying the Market Yield valuation methodology, the Valuation Committee determines the fair value based on such factors as third party broker quotes and market participant assumptions including synthetic credit ratings, estimated remaining life, current market yield and interest rate spreads of similar securities as of the measurement date.

Table of Contents

Estimates of average life are generally based on market data of the average life of similar debt securities. However, if the Valuation Committee has information available to it that the debt security is expected to be repaid in the near term, the Valuation Committee would use an estimated life based on the expected repayment date.

The Valuation Committee determines fair value of loan and debt securities of Control Companies based on the estimate of the enterprise value of the portfolio company. To the extent the enterprise value exceeds the remaining principal amount of the loan and all other debt securities of the company, the fair value of such securities is generally estimated to be their cost. However, where the enterprise value is less than the remaining principal amount of the loan and all other debt securities, the Valuation Committee may discount the value of such securities to reflect an impairment. When the Company receives nominal cost warrants or free equity securities (nominal cost equity) with a debt security, the Company typically allocates its cost basis in the investment between debt securities and nominal cost equity at the time of origination. Interest income is recorded on an accrual basis to the extent that such amounts are expected to be collected. Origination, closing and/or closing fees associated with investments in portfolio companies are accreted into income over the respective terms of the applicable loans. Upon the prepayment of a loan or debt security, any prepayment penalties and unamortized loan origination, closing and commitment fees are recorded as income. Prepayment premiums are recorded on loans when received.

For loans, debt securities, and preferred securities with contractual payment-in-kind interest or dividends, which represent contractual interest/dividends accrued and added to the loan balance or liquidation preference that generally becomes due at maturity, the Company will not accrue payment-in-kind interest/dividends if the portfolio company valuation indicates that the payment-in-kind interest is not collectible. However, the Company may accrue payment-in-kind interest if the health of the portfolio company and the underlying securities are not in question. All payment-in-kind interest that has been added to the principal balance or capitalized is subject to ratification by the Valuation Committee.

5. Concentration of Market Risk

Financial instruments that subjected the Company to concentrations of market risk consisted principally of equity investments, subordinated notes, and debt instruments, which represented approximately 98.2% of the Company's total assets at April 30, 2009. As discussed in Note 6, these investments consist of securities in companies with no readily determinable market values and as such are valued in accordance with the Company's fair value policies and procedures. The Company's investment strategy represents a high degree of business and financial risk due to the fact that the investments (other than cash equivalents) are generally illiquid, in small and middle market companies, and include entities with little operating history or entities that possess operations in new or developing industries. These investments, should they become publicly traded, would generally be (i) subject to restrictions on resale, if they were acquired from the issuer in private placement transactions; and (ii) susceptible to market risk.

6. Portfolio Investments

Pursuant to the requirements of the 1940 Act, we value our portfolio securities at their current market values or, if market quotations are not readily available, at their estimates of fair values. Because our portfolio company investments generally do not have readily ascertainable market values, we record these investments at fair value in accordance with Valuation Procedures adopted by our board of directors. As permitted by the SEC, the board of directors has delegated the responsibility of making fair value determinations to the Valuation Committee, subject to the board of directors' supervision and pursuant to our Valuation Procedures.

The levels of fair value inputs used to measure our investments are characterized in accordance with the fair value hierarchy established by SFAS No. 157. Where inputs for an asset or liability fall in more than one level in the fair value hierarchy, the investment is classified in its entirety based on the lowest level input that is

Table of Contents

significant to that investment's fair value measurement. We use judgment and consider factors specific to the investment in determining the significance of an input to a fair value measurement. The three levels of the fair value hierarchy and investments that fall into each of the levels are described below:

Level 1: Level 1 inputs are unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities. We use Level 1 inputs for investments in publicly traded unrestricted securities for which we do not have a controlling interest. Such investments are valued at the closing price on the measurement date. We valued one of our investments using Level 1 inputs as of April 30, 2009.

Level 2: Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. We did not value any of our investments using Level 2 inputs as of April 30, 2009.

Level 3: Level 3 inputs are unobservable and cannot be corroborated by observable market data. We use Level 3 inputs for measuring the fair value of substantially all of our investments. See Note 4 for the investment valuation policies used to determine the fair value of these investments.

The following fair value hierarchy table sets forth our investment portfolio by level as of April 30, 2009 (in thousands):

Table of Contents**For the Six Month Period Ended April 30, 2009**

During the six month period ended April 30, 2009, the Company made three follow-on investments in existing portfolio companies committing capital totaling \$3.9 million. The Company invested \$2.9 million in Harmony Pharmacy & Health Center, Inc. (Harmony Pharmacy) in the form of two demand notes, a \$700,000 demand note on November 4, 2008 and a \$2.2 million demand note on March 3, 2009. The demand notes have an annual interest rate of 10%. The Company also invested approximately \$1.0 million in MVC Partners LLC (MVC Partners) equity interest during the six month period ended April 30, 2009.

At October 31, 2008, the balance of the revolving credit facility provided to Octagon Credit Investors, LLC (Octagon) was \$650,000. Net repayments during the six month period ended April 30, 2009 were \$650,000. There was no amount outstanding as of April 30, 2009.

At October 31, 2008, the balance of the revolving senior credit facility provided to U.S. Gas & Electric, Inc. (U.S. Gas) was approximately \$85,000. During the fiscal year ended October 31, 2008, U.S. Gas entered into a swap agreement which locked in a portion of the senior credit facility with an annual rate of LIBOR plus 6% for a period of two years. This portion of the senior credit facility, in connection to the swap agreement, was approximately \$571,000 at October 31, 2008 and April 30, 2009. The balance of the remaining portion of the senior credit facility at October 31, 2008 was approximately \$4.4 million. Net repayments on this portion of the senior credit facility, which were borrowed at an annual rate of Prime plus 4.5%, were approximately \$4.4 million, resulting in no balance outstanding at April 30, 2009. The portion of the senior credit facility, in connection to the swap agreement, was approximately \$571,000 at April 30, 2009.

During the six month period ended April 30, 2009, the Company received approximately \$53,000 in principal payments on the term loan provided to Storage Canada, LLC (Storage Canada). The balance of the term loan at April 30, 2009 was approximately \$1.2 million.

On December 15, 2008, January 2, 2009, March 6, 2009, April 1, 2009 and April 4, 2009, the Company received principal payments of \$1,609,500, \$37,500, \$52,167, \$37,500 and \$33,667, respectively, on the term loan provided to Innovative Brands, LLC (Innovative Brands). The Company also received a loan amendment fee of approximately \$57,000. The interest rate on the term loan was increased to 14.5%. The balance of the term loan as of April 30, 2009 was approximately \$11.3 million.

On December 31, 2008, the Company received a quarterly principal payment from BP Clothing, LLC (BP) on term loan A of \$146,250. The balance of term loan A as of April 30, 2009 was approximately \$2.0 million.

On December 31, 2008 and March 31, 2009, Total Safety U.S., Inc. (Total Safety) made principal payments of \$2,500 on each date on its first lien loan. The balance of the first lien loan as of April 30, 2009 was \$977,500.

On December 31, 2008 and March 31, 2009, SP Industries, Inc. (SP) made principal payments of \$17,361 and \$19,097, respectively, on its first lien loan. The balance of the first lien loan as of April 30, 2009, was approximately \$961,000.

On December 31, 2008, Henry Company made a principal payment of approximately \$127,000 on its term loan A. The balance of term loan A as of April 30, 2009 was approximately \$1.7 million.

Table of Contents

On March 11, 2009 and April 30, 2009, TerraMark, L.P. (TerraMark) made principal payments of \$300,000 and \$500,000 on its senior secured loan resulting in a balance of \$700,000 as of April 30, 2009. The maturity date was also extended to June 1, 2009.

During the six month period ended April 30, 2009, the Valuation Committee increased the fair value of the Company's investments in U.S. Gas preferred stock by \$6.0 million, SGDA Sanierungsgesellschaft fur Deponien und Altasten mbH (SGDA) preferred equity interest by \$250,000 and common equity interest by approximately \$1.2 million, SIA Tekers Invest (Tekers) common stock by \$725,000, Velocitius B.V. (Velocitius) equity interest by \$500,000, and Dakota Growers Pasta Company, Inc. (Dakota Growers) common stock by approximately \$4.9 million and preferred stock by approximately \$5.1 million. In addition, increases in the cost basis and fair value of the loans to GDC Acquisitions, LLC (GDC), Custom Alloy, SP, Marine Exhibition Corporation (Marine), BP, Summit Research Labs, Inc. (Summit), U.S. Gas, and WBS Carbons Acquisition Corp. (WBS), and the Vitality Foodservice, Inc. (Vitality) and Marine preferred stock were due to the capitalization of payment in kind (PIK) interest/dividends totaling \$2,646,785. The Valuation Committee also increased the fair value of the Ohio Medical Corporation (Ohio Medical) preferred stock by approximately \$2.8 million due to a PIK distribution which was treated as a return of capital. Also, during the six month period ended April 30, 2009, the undistributed allocation of flow through loss from the Company's equity investment in Octagon decreased the cost basis and fair value of this investment by approximately \$10,000. The Valuation Committee also decreased the fair value of the Company's investments in Ohio Medical common stock by \$6.5 million, Vendio Services, Inc. (Vendio) preferred stock by \$1.4 million and common stock by \$2,000, Foliofn, Inc. (Foliofn) preferred stock by \$3.8 million, PreVisor, Inc. (PreVisor) common stock by \$3.1 million, Custom Alloy Corporation (Custom Alloy) preferred stock by \$4.3 million, Timberland Machines & Irrigation, Inc. (Timberland) senior subordinated loan by approximately \$7.3 million and junior revolving line of credit by \$1.0 million, Amersham Corporation (Amersham) second lien notes by \$1.4 million, Turf Products, LLC (Turf) equity interest by \$2.3 million, and BP term loan B by approximately \$181,000, term loan A by approximately \$153,000 and second lien loan by approximately \$948,000, during the six month period ended April 30, 2009. The Valuation Committee also determined not to increase the fair values of the Harmony Pharmacy revolving credit facility, Timberland senior subordinated loan and the Amersham loan for the accrued PIK interest totaling approximately \$544,000. During the six month period ended April 30, 2009, the Company received a return of capital distribution from Turf of approximately \$286,000.

At April 30, 2009, the fair value of all portfolio investments, exclusive of short-term securities, was \$478.1 million with a cost basis of \$444.3 million. Borrowings under Credit Facility II will be secured by cash, short-term and long-term U.S. Treasury securities and other governmental agency securities whose purchase has been approved by BB&T.

The Company enters into contracts with portfolio companies and other parties that contain a variety of indemnifications. The Company's maximum exposure under these arrangements is unknown. However, the Company has not experienced claims or losses pursuant to these contracts and believes the risk of loss related to indemnifications to be remote.

8. Management

Our board of directors, including all of the directors who are not interested persons, as defined under the 1940 Act, of the Company (the Independent Directors), at their in-person meeting held on December 11, 2008, approved the Amended Agreement and recommended it for approval by the stockholders of the Company. On April 14, 2009, stockholders of the Company voted to approve the Amended Agreement. The Amended Agreement is identical, in all material respects, to the Company's prior Investment Advisory and Management Agreement (the Prior Advisory Agreement), except for the following modifications: (i) the Amended Agreement secures Mr. Tokarz's service as the portfolio manager of the Company for an additional two fiscal years; (ii) the Amended Agreement extends the period for which an expense cap would apply for an additional two fiscal years, and increases the expense cap to 3.5% from 3.25%; and (iii) the calculation of the capital gains portion of the incentive fee under the Amended Agreement reflects a revision so that unrealized depreciation on an investment would not reduce the fee to the extent it has already been reduced by the same unrealized depreciation on the same investment in prior fiscal years. The Prior Advisory Agreement had been in effect since November 1, 2006, when management of the Company was externalized.

Under the terms of the Amended Agreement, TTG Advisers determines, consistent with the Company's investment strategy, the composition of the Company's portfolio, the nature and timing of the changes to the Company's portfolio and the manner of implementing such changes. TTG Advisers also identifies and negotiates the structure of the Company's investments (including performing due diligence on prospective portfolio companies), closes and monitors the Company's investments, determines the securities and other assets purchased, retains or sells and oversees the administration, recordkeeping and compliance functions of the Company and/or third parties performing such functions for the Company. TTG Advisers' services under the Amended Agreement are not exclusive, and it may furnish similar services to other entities. Pursuant to the Amended Agreement, the Company is required to pay TTG Advisers a fee for investment advisory and management services consisting of two components—a base management fee and an incentive fee. The base management fee is calculated at 2.0% per annum of the Company's total assets excluding cash, the value of any investment in a Third-Party Vehicle covered by a Separate Agreement (as defined in the Amended Agreement) and the value of any investment by the Company not made in portfolio companies (Non-Eligible Assets) but including assets purchased with borrowed funds that are not Non-Eligible Assets. The incentive fee consists of two parts: (i) one part is based on our pre-incentive fee net operating income; and (ii) the other part is based on the capital gains realized on our portfolio of securities acquired after November 1, 2003. The Amended Agreement provides for an expense cap pursuant to which TTG Advisers will absorb or reimburse operating expenses of the Company, to the extent necessary to limit the Company's expense ratio (the consolidated expenses of the Company, including any amounts payable to TTG Advisers under the base management fee, but excluding the amount of any interest and other direct borrowing costs, taxes, incentive compensation and extraordinary expenses taken as a percentage of the Company's average net assets) to 3.5% in each of the 2009 and 2010 fiscal years. For more information, please see Note 9 of our consolidated financial statements, Incentive Compensation.

Table of Contents**9. Incentive Compensation**

At October 31, 2008, the provision for estimated incentive compensation was \$15,794,295. During the six month period ended April 30, 2009, this provision for incentive compensation was decreased by a net amount of \$489,186 to \$15,305,109. The amount of the provision reflects the Valuation Committee's determination to increase the fair values of five of the Company's portfolio investments (U.S. Gas, Tekers, SGDA, Velocitius, and Dakota Growers) by a total of \$18.7 million. The Valuation Committee also increased the fair value of the Ohio Medical preferred stock by approximately \$2.8 million due to a PIK distribution, which was treated as a return of capital. The net decrease reflects the Valuation Committee's determination to decrease the fair values of seven of the Company's portfolio investments (Timberland, Amersham, Turf, PreVisor, Ohio Medical, Custom Alloy and BP) by a total of \$27.1 million and the Valuation Committee determination not to increase the fair values of the Harmony Pharmacy revolving credit facility, Timberland senior subordinated loan and the Amersham loan for the accrued PIK totaling \$544,000. During the six month period ended April 30, 2009, there was no provision recorded for the net operating income portion of the incentive fee as pre-incentive fee net operating income did not exceed the hurdle rate.

At October 31, 2007, the provision for estimated incentive compensation was \$17,875,496. During the fiscal year ended October 31, 2008, this provision for incentive compensation was decreased by a net amount of \$2,081,201 to \$15,794,295. The amount of the provision reflects the Valuation Committee's determination to increase the fair values of nine of the Company's portfolio investments (U.S. Gas, Vitality, Summit, Tekers, SGDA, Custom Alloy, Velocitius, MVC Automotive and PreVisor) by a total of \$64.8 million. The Valuation Committee also increased the fair value of the Ohio Medical preferred stock by approximately \$4.2 million due to a PIK distribution, which was treated as a return of capital. The net decrease in the provision for incentive compensation during the fiscal year ended October 31, 2008 was a result of the incentive compensation payment to TTG Advisers of approximately \$12.9 million due to the sale of Baltic Motors and BM Auto. Pursuant to the Advisory Agreement, incentive compensation payments will be made to TTG Advisers only upon the occurrence of a realization event (as defined under such agreement). On July 24, 2007, the Company realized a gain of \$66.5 million from the sale of Baltic Motors Corporation (Baltic Motors) and SIA BM Auto (BM Auto). This transaction triggered an incentive compensation payment obligation to TTG Advisers, which payment was not required to be made until the precise amount of the payment obligation was confirmed based on the Company's completed audited financials for the fiscal year 2007. The payment obligation to TTG Advisers from this transaction totaled approximately \$12.9 million (20% of the realized gain from the sale less unrealized depreciation on the portfolio). The net decrease also reflects the Valuation Committee's determination to decrease the fair values of nine of the Company's portfolio investments (Timberland, Octagon, Amersham, Henry Company, Total Safety, Vendio Services, Inc. (Vendio), BP, MVC Partners, and Vestal) by a total of \$12.7 million and the Valuation Committee's determination not to increase the fair values of the Harmony revolving credit facility and the Amersham loan for the accrued PIK interest totaling \$308,000. During the fiscal year ended October 31, 2008, there was no provision recorded for the net operating income portion of the incentive fee as pre-incentive fee net operating income did not exceed the hurdle rate.

10. Tax Matters

To the extent future capital gains are offset by capital loss carryforwards, such gains need not be distributed. As of October 31, 2006, the Company had net unrealized capital losses of \$11,593,572. The gross unrealized capital losses totaled \$51,934,799. The total net realized and capital loss carryforwards and gross unrealized capital losses at October 31, 2006 were \$125,459,506.

On October 31, 2005, the Fund had a net capital loss carryforward of \$78,779,962 of which \$33,469,122 will expire in the year 2010, \$4,220,380 will expire in the year 2011, \$37,794,910 will expire in the year 2012 and \$3,295,550 will expire in the year 2013. To the extent future capital gains are offset by capital loss carryforwards, such gains need not be distributed.

On October 31, 2004, the Fund had a net capital loss carryforward of \$75,484,412 of which \$33,469,122 will expire in the year 2010, \$4,220,380 will expire in the year 2011 and \$37,794,910 will expire in the year 2012. Capital loss carryforwards may be subject to additional limitations as a result of capital share activity. To the extent future capital gains are offset by capital loss carryforwards, such gains will not be distributed.

In June 2006, the Financial Accounting Standards Board issued FASB Interpretation No. (FIN) 48, *Accounting for Uncertainty in Income Taxes*. FIN 48 applies to financial statements for fiscal years beginning after December 15, 2006 as deferred by FSP 48-2. FIN 48 clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with FASB Statement No. 109, *Accounting for Income Taxes*. FIN 48 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This interpretation requires recognition of the impact of a tax position if that position is more likely than not to be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. In addition, FIN 48 provides measurement guidance whereby a tax position that meets the more-likely-than-not recognition threshold is calculated to determine the amount of benefit to recognize in the financial statements. We adopted this Interpretation during fiscal 2008 as required. The effect of adoption of FIN No. 48 has not had a material impact on our consolidated financial statements. If the tax law requires interest and/or penalties to be paid on an underpayment of income taxes, interest and penalties will be classified as income taxes on our financial statements, if applicable.

11. Dividends and Distributions to Shareholders

As a regulated investment company (RIC) under Subchapter M of the Internal Revenue Code of 1986, as amended (the Code), the Company is required to distribute to its shareholders, in a timely manner, at least 90% of its investment company taxable and tax-exempt income each year. If the Company distributes, in a calendar year, at least 98% of its ordinary income for such calendar year and its capital gain net income for the 12-month period ending on October 31 of such calendar year (as well as any portion of the respective 2% balances not distributed in the previous year), it will not be subject to the 4% non-deductible federal excise tax on certain undistributed income of RICs.

Dividends and capital gain distributions, if any, are recorded on the ex-dividend date. Dividends and capital gain distributions are generally declared and paid quarterly according to the Company's policy established on

Table of Contents

July 11, 2005. An additional distribution may be paid by the Company to avoid imposition of federal income tax on any remaining undistributed net investment income and capital gains. Distributions can be made payable by the Company either in the form of a cash distribution or a stock dividend. The amount and character of income and capital gain distributions are determined in accordance with income tax regulations which may differ from U.S. generally accepted accounting principles. These differences are due primarily to differing treatments of income and gain on various investment securities held by the Company, differing treatments of expenses paid by the Company, timing differences and differing characterizations of distributions made by the Company. A key example of the primary differences in expenses paid is the variation in treatment of incentive compensation expense. Permanent book and tax basis differences relating to shareholder distributions will result in reclassifications and may affect the allocation between net operating income, net realized gain (loss) and paid in capital.

For the Quarter Ended January 31, 2009

On December 19, 2008, the Company's board of directors declared a dividend of \$0.12 per share. The dividend was payable on January 9, 2009 to shareholders of record on December 31, 2008. The total distribution amounted to \$2,915,650, including reinvested distributions.

During the quarter ended January 31, 2009, as part of the Company's dividend reinvestment plan for our common stockholders, we purchased 4,833 shares of our common stock at an average price of \$11.00 in the open market in order to satisfy part of the reinvestment portion of our dividends.

For the Quarter Ended April 30, 2009

On April 13, 2009, the Company's board of directors declared a dividend of \$0.12 per share. The dividend was payable on April 30, 2009 to shareholders of record on April 23, 2009. The total distribution amounted to \$2,915,650, including reinvested distributions.

During the quarter ended April 30, 2009, as part of the Company's dividend reinvestment plan for our common stockholders, we purchased 2,704 shares of our common stock at an average price of \$8.74 in the open market in order to satisfy part of the reinvestment portion of our dividends.

OVERVIEW

The Company is an externally managed, non-diversified, closed-end management investment company that has elected to be regulated as a business development company under the 1940 Act. The Company's investment objective is to seek to maximize total return from capital appreciation and/or income.

On November 6, 2003, Mr. Tokarz assumed his positions as Chairman and Portfolio Manager of the Company. He and the Company's investment professionals (who, effective November 1, 2006, provide their services to the Company through the Company's investment adviser, TTG Advisers) are seeking to implement our investment objective (*i.e.*, to maximize total return from capital appreciation and/or income) through making a broad range of private investments in a variety of industries.

The investments can include senior or subordinated loans, convertible debt and convertible preferred securities, common or preferred stock, equity interests, warrants or rights to acquire equity interests, and other private equity transactions. During the year ended October 31, 2008, the Company made four new investments and 11 follow-on

investments in existing portfolio companies, committing capital totaling approximately \$126.3 million pursuant to our current investment objective. During the six month period ended April 30, 2009, the Company made no new investments and three follow-on investments in existing portfolio companies, committing capital totaling \$3.9 million.

Prior to the adoption of our current investment objective, the Company's investment objective had been to achieve long-term capital appreciation from venture capital investments in information technology companies. The Company's investments had thus previously focused on investments in equity and debt securities of information technology companies. As of April 30, 2009, 3.09% of the current fair value of our assets consisted of Legacy Investments. We are, however, seeking to manage these Legacy Investments to try and realize maximum returns. We generally seek to capitalize on opportunities to realize cash returns on these investments when presented with a potential liquidity event, *i.e.*, a sale, public offering, merger or other reorganization.

Our new portfolio investments are made pursuant to our current objective and strategy. We are concentrating our investment efforts on small and middle-market companies that, in our view, provide opportunities to maximize total return from capital appreciation and/or income. Under our investment approach, we are permitted to invest, without limit, in any one portfolio company, subject to any diversification limits required in order for us to continue to qualify as a RIC under Subchapter M of the Code. Due to our asset growth and composition, compliance with the RIC requirements currently restricts our ability to make additional investments that represent more than 5% of our total assets or more than 10% of the outstanding voting securities of the issuer (Non-Diversified Investments).

We participate in the private equity business generally by providing privately negotiated long-term equity and/or debt investment capital to small and middle-market companies. Our financing is generally used to fund growth, buyouts, acquisitions, recapitalizations, note purchases, and/or bridge financings. We generally invest in private companies, though, from time to time, we may invest in public companies that may lack adequate access to public capital.

Table of Contents

We may also seek to achieve our investment objective by establishing a subsidiary or subsidiaries that would serve as a general partner or managing member to a private equity or other investment vehicle(s). In fact, during fiscal year 2006, we established MVC Partners for this purpose. Furthermore, our board of directors has authorized the establishment of a private equity fund (a PE Fund) that would have the ability, among other things, to make Non-Diversified Investments. A subsidiary of the Company would serve as the general partner (or managing member) of the PE Fund. Our board of directors also authorized the subsidiary's retention of TTG Advisers to serve as portfolio manager of the PE Fund. Additionally, we may also acquire a portfolio of existing private equity or debt investments held by financial institutions or other investment funds should such opportunities arise.

OPERATING INCOME

For the Six Month Periods Ended April 30, 2009 and 2008. Total operating income was \$12.3 million for the six month period ended April 30, 2009 and \$17.0 million for the six month period ended April 30, 2008, a decrease of \$4.7 million.

For the Six Month Period Ended April 30, 2009

Total operating income was \$12.3 million for the six month period ended April 30, 2009. The decrease in operating income over the same period last year was primarily due to the repayment of investments that provide the Company with current income, a decrease in the LIBOR rate which impacts our variable rate loans, reserves against non-performing loans, and a decrease in fee income because of fewer new investments closed. The main components of investment income were the interest earned on loans and dividend income from portfolio companies and the receipt of closing and monitoring fees from certain portfolio companies by the Company and MVCFS. The Company earned approximately \$10.9 million in interest and dividend income from investments in portfolio companies. Of the \$10.9 million recorded in interest/dividend income, approximately \$2.6 million was payment in kind interest/dividends. The payment in kind interest/dividends are computed at the contractual rate specified in each investment agreement and added to the principal balance of each investment. The Company's debt investments yielded rates from 1.5% to 17%. Also, the Company earned approximately \$7,100 in interest income on its cash equivalents and short-term investments. The Company received fee income and other income from portfolio companies and other entities totaling approximately \$1.4 million.

For the Six Month Period Ended April 30, 2008

Total operating income was \$17.0 million for the six month period ended April 30, 2008. The increase in operating income over the same period last year was primarily due to the increase in the number of investments that provide the Company with current income. The main components of investment income were the interest earned on loans and dividend income from portfolio companies and the receipt of closing and monitoring fees from certain portfolio companies by the Company and MVCFS. The Company earned approximately \$13.9 million in interest and dividend income from investments in portfolio companies. Of the \$13.9 million recorded in interest/dividend income, approximately \$2.8 million was payment in kind interest/dividends. The payment in kind interest/dividends are computed at the contractual rate specified in each investment agreement and added to the principal balance of each investment. The Company's debt investments yielded rates from 2% to 17%. Also, the Company earned approximately \$670,000 in interest income on its cash equivalents and short-term investments. The Company received fee income and other income from portfolio companies and other entities totaling approximately \$2.1 million and \$323,000, respectively.

OPERATING EXPENSES

Table of Contents

For the Six Month Period Ended April 30, 2009 and 2008. Operating expenses were \$8.0 million for the six month period ended April 30, 2009 and \$13.3 million for the six month period ended April 30, 2008, a decrease of \$5.3 million.

For the Six Month Period Ended April 30, 2009

Operating expenses were \$8.0 million or 3.84% of the Company's average net assets, when annualized, for the six month period ended April 30, 2009. Significant components of operating expenses for the six month period ended April 30, 2009, included the management fee of \$4.9 million and interest expense and other borrowing costs of \$1.8 million.

The \$5.3 million decrease in the Company's operating expenses for the six month period ended April 30, 2009 compared to the six month period ended April 30, 2008, was primarily due to the \$5.9 million decrease in the estimated provision for incentive compensation expense and the approximately \$427,000 decrease in interest and other borrowing costs offset by the increase of approximately \$700,000 in the management fee expense. The Amended Agreement extended the expense cap applicable to the Company for an additional two fiscal years (fiscal years 2009 and 2010) and increased the expense cap from 3.25% to 3.5%. For fiscal year 2008 and for the six month period ended April 30, 2009 annualized, the Company's expense ratio was 2.93% and 3.20%, respectively, (taking into account the same carve outs as those applicable to the expense cap).

Pursuant to the terms of the Advisory Agreement, during the six month period ended April 30, 2009, the provision for incentive compensation was decreased by a net amount of \$489,186 to \$15,305,109. The amount of the provision reflects the Valuation Committee's determination to increase the fair values of five of the Company's portfolio investments (U.S. Gas, Tekers, SGDA, Velocitius, and Dakota Growers) by a total of \$18.7 million. The Valuation Committee also increased the fair value of the Ohio Medical preferred stock by approximately \$2.8 million due to a PIK distribution, which was treated as a return of capital. The net decrease reflects the Valuation Committee's determination to decrease the fair values of seven of the Company's portfolio investments (Timberland, Amersham, Turf, PreVisor, Ohio Medical, Custom Alloy and BP) by a total of \$27.1 million and the Valuation Committee determination not to increase the fair values of the Harmony Pharmacy revolving credit facility, Timberland senior subordinated loan and the Amersham loan for the accrued PIK totaling \$544,000. During the six month period ended April 30, 2009, there was no provision recorded for the net operating income portion of the incentive fee as pre-incentive fee net operating income did not exceed the hurdle rate. Please see Note 9 Incentive Compensation for more information.

For the Six Month Period Ended April 30, 2008

Operating expenses were \$13.3 million or 6.96% of the Company's average net assets, when annualized, for the six month period ended April 30, 2008. Significant components of operating expenses for the six month period ended April 30, 2008, included the management fee of \$4.2 million, the estimated provision for incentive compensation expense of approximately \$5.4 million, and interest expense and other borrowing costs of \$2.3 million. The estimated provision for incentive compensation expense is a non-cash, not yet payable, provisional expense relating to the Advisory Agreement.

The \$2.3 million decrease in the Company's operating expenses for the six month period ended April 30, 2008 compared to the six month period ended April 30, 2007, was primarily due to the \$3.0 million decrease in the provision for estimated incentive compensation and the approximately \$714,000 increase in the management fee expense. The Prior Advisory Agreement provided for an expense cap pursuant to which TTG Advisers would absorb or reimburse operating expenses of the Company to the extent necessary to limit the Company's expense ratio (the consolidated expenses of the Company, including any amounts payable to TTG Advisers under the base management fee, but excluding the amount of any interest and other direct borrowing costs, taxes, incentive compensation and extraordinary expenses taken as a percentage of the Company's average net assets) to 3.25% in each of the 2007 and 2008 fiscal years. For fiscal year 2007, the expense ratio was 3.0% (taking into account the same carve outs as those applicable to the expense cap).

Table of Contents

Pursuant to the terms of the Prior Advisory Agreement, during the six month period ended April 30, 2008, the estimated provision for incentive compensation on the balance sheet, was decreased by a net amount of \$7,505,992 to \$10,369,504. The amount of the provision reflects the Valuation Committee's determination to increase the fair values of eight of the Company's portfolio investments: U.S. Gas, Vitality, Tekers, SGDA, Custom Alloy, MVC Automotive, PreVisor and Velocitus by a total of \$28.1 million. The provision also reflects the Valuation Committee's determination to increase the fair value of the Ohio Medical preferred stock by approximately \$1.6 million due to a PIK distribution which was treated as a return of capital. The net decrease in the provision for incentive compensation during the six month period ended April 30, 2008 was a result of the incentive compensation payment to TTG Advisers of \$12.9 million due to the sale of Baltic Motors and BM Auto (20% of the realized gain from the sale less unrealized depreciation on the portfolio). Pursuant to the Existing Advisory Agreement, incentive compensation payments will be made only upon the occurrence of a realization event (such as the sale of shares of Baltic Motors and BM Auto). Without this reserve for incentive compensation, operating expenses would have been approximately \$7.9 million or 4.05% of average net assets when annualized as compared to 6.88%, which is reported on the Consolidated Per Share Data and Ratios, for the six month period ended April 30, 2008. During the six month period ended April 30, 2008, there was no provision recorded for the net operating income portion of the incentive fee as pre-incentive fee net operating income did not exceed the hurdle rate. Please see Note 9 Incentive Compensation for more information.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Historically the Company has invested in small companies, and its investments in these companies are considered speculative in nature. The Company's investments often include securities that are subject to legal or contractual restrictions on resale that adversely affect the liquidity and marketability of such securities. As a result, the Company is subject to risk of loss which may prevent our shareholders from achieving price appreciation, dividend distributions and return of capital.

Financial instruments that subjected the Company to concentrations of market risk consisted principally of equity investments, subordinated notes, and debt instruments, which represent approximately 98.2% of the Company's total assets at April 30, 2009. As discussed in Note 6 Portfolio Investments, these investments consist of securities in companies with no readily determinable market values and as such are valued in accordance with the Company's fair value policies and procedures. The Company's investment strategy represents a high degree of business and financial risk due to the fact that the investments (other than cash equivalents) are generally illiquid, in small and middle market companies, and include entities with little operating history or entities that possess operations in new or developing industries. These investments, should they become publicly traded, would generally be: (i) subject to restrictions on resale, if they were acquired from the issuer in private placement transactions; and (ii) susceptible to market risk. At this time, the Company's investments in short-term securities are in 90-day Treasury Bills, which are federally guaranteed securities, or other high quality, highly liquid investments. The Company's cash balances, if not large enough to be invested in 90-day Treasury Bills or other high quality, highly liquid investments, are swept into designated money market accounts.

In addition, the following risk factors relate to market risks impacting the Company.

Investing in private companies involves a high degree of risk.

Our investment portfolio generally consists of loans to, and investments in, private companies. Investments in private businesses involve a high degree of business and financial risk, which can result in substantial losses and accordingly should be considered speculative. There is generally very little publicly available information about the companies in which we invest, and we rely significantly on the due diligence of the members of the investment team to obtain information in connection with our investment decisions.

Our investments in portfolio companies are generally illiquid.

We generally acquire our investments directly from the issuer in privately negotiated transactions. Most of the investments in our portfolio (other than cash or cash equivalents) are typically subject to restrictions on resale or otherwise have no established trading market. We may exit our investments when the portfolio company has a liquidity event, such as a sale, recapitalization or initial public offering. The illiquidity of our investments may adversely affect our ability to dispose of equity and debt securities at times when it may be otherwise advantageous for us to liquidate such investments. In addition, if we were forced to immediately liquidate some or all of the investments in the portfolio, the proceeds of such liquidation could be significantly less than the current fair value of such investments.

Substantially all of our portfolio investments are recorded at fair value and, as a result, there is a degree of uncertainty regarding the carrying values of our portfolio investments.

Table of Contents

Pursuant to the requirements of the 1940 Act, because our portfolio company investments do not have readily ascertainable market values, we record these investments at fair value in accordance with our Valuation Procedures adopted by our board of directors. As permitted by the SEC, the board of directors has delegated the responsibility of making fair value determinations to the Valuation Committee, subject to the board of directors' supervision and pursuant to the Valuation Procedures.

At April 30, 2009, approximately 98.17% of our total assets represented portfolio investments recorded at fair value.

There is no single standard for determining fair value in good faith. As a result, determining fair value requires that judgment be applied to the specific facts and circumstances of each portfolio investment while employing a consistently applied valuation process for the types of investments we make. In determining the fair value of a portfolio investment, the Valuation Committee analyzes, among other factors, the portfolio company's financial results and projections and publicly traded comparables when available, which may be dependent on general economic conditions. We specifically value each individual investment and record unrealized depreciation for an investment that we believe has become impaired, including where collection of a loan or realization of an equity security is doubtful. Conversely, we will record unrealized appreciation if we have an indication (based on a significant development) that the underlying portfolio company has appreciated in value and, therefore, our equity security has also appreciated in value, where appropriate. Without a readily ascertainable market value and because of the inherent uncertainty of fair valuation, fair value of our investments may differ significantly from the values that would have been used had a ready market existed for the investments, and the differences could be material.

Pursuant to our Valuation Procedures, our Valuation Committee (which is currently comprised of three Independent Directors) reviews, considers and determines fair valuations on a quarterly basis (or more frequently, if deemed appropriate under the circumstances). Any changes in valuation are recorded in the statements of operations as Net change in unrealized appreciation (depreciation) on investments.

Economic recessions or downturns could impair our portfolio companies and have a material adverse impact on our business, financial condition and results of operations.

Many of the companies in which we have made or will make investments may be susceptible to economic slowdowns or recessions. An economic slowdown may affect the ability of a company to engage in a liquidity event. These conditions could lead to financial losses in our portfolio and a decrease in our revenues, net income and assets. Through the date of this report, conditions in the public debt and equity markets have deteriorated and pricing levels have continued to decline. As a result, depending on market conditions, we could incur substantial realized losses and suffer unrealized losses in future periods, which could have a material adverse impact on our business, financial condition and results of operations. If current market conditions continue, or worsen, it may adversely impact our ability to deploy our investment strategy and achieve our investment objective.

Our overall business of making private equity investments may be affected by current and future market conditions. The absence of an active mezzanine lending or private equity environment may slow the amount of private equity investment activity generally. As a result, the pace of our investment activity may slow, which could impact our ability to achieve our investment objective. In addition, significant changes in the capital markets could have an effect on the valuations of private companies and on the potential for liquidity events involving such companies. This could affect the amount and timing of any gains realized on our investments and thus have a material adverse impact on our financial condition.

Our borrowers may default on their payments, which may have an effect on our financial performance.

Table of Contents

We may make long-term unsecured, subordinated loans, which may involve a higher degree of repayment risk than conventional secured loans. We primarily invest in companies that may have limited financial resources and that may be unable to obtain financing from traditional sources. In addition, numerous factors may adversely affect a portfolio company's ability to repay a loan we make to it, including the failure to meet a business plan, a downturn in its industry or operating results, or negative economic conditions. Deterioration in a borrower's financial condition and prospects may be accompanied by deterioration in any related collateral.

Our investments in mezzanine and other debt securities may involve significant risks.

Our investment strategy contemplates investments in mezzanine and other debt securities of privately held companies. Mezzanine investments typically are structured as subordinated loans (with or without warrants) that carry a fixed rate of interest. We may also make senior secured and other types of loans or debt investments. Our debt investments are typically not rated by any rating agency, but we believe that if such investments were rated, they would be below investment grade quality (rated lower than Baa3 by Moody's or lower than BBB- by Standard & Poor's, commonly referred to as "junk bonds"). Loans of below investment grade quality have predominantly speculative characteristics with respect to the borrower's capacity to pay interest and repay principal. Our debt investments in portfolio companies may thus result in a high level of risk and volatility and/or loss of principal.

We may not realize gains from our equity investments.

When we invest in mezzanine and senior debt securities, we may acquire warrants or other equity securities as well. We may also invest directly in various equity securities. Our goal is ultimately to dispose of such equity interests and realize gains upon our disposition of such interests. However, the equity interests we receive or invest in may not appreciate in value and, in fact, may decline in value. In addition, the equity securities we receive or invest in may be subject to restrictions on resale during periods in which it would be advantageous to resell. Accordingly, we may not be able to realize gains from our equity interests, and any gains that we do realize on the disposition of any equity interests may not be sufficient to offset any other losses we experience.

Our investments in small and middle-market privately-held companies are extremely risky and you could lose your entire investment.

Investments in small and middle-market privately-held companies are subject to a number of significant risks including the following:

Small and middle-market companies may have limited financial resources and may not be able to repay the loans we make to them. Our strategy includes providing financing to companies that typically do not have capital sources readily available to them. While we believe that this provides an attractive opportunity for us to generate profits, this may make it difficult for the borrowers to repay their loans to us upon maturity.

Small and middle-market companies typically have narrower product lines and smaller market shares than large companies. Because our target companies are smaller businesses, they may be more vulnerable to competitors' actions and market conditions, as well as general economic downturns. In addition, smaller companies may face intense competition, including competition from companies with greater financial resources, more extensive development, manufacturing, marketing and other capabilities, and a larger number of qualified managerial and technical personnel.

There is generally little or no publicly available information about these privately-held companies. There is generally little or no publicly available operating and financial information about privately-held

Table of Contents

companies. As a result, we rely on our investment professionals to perform due diligence investigations of these privately-held companies, their operations and their prospects. We may not learn all of the material information we need to know regarding these companies through our investigations.

Small and middle-market companies generally have less predictable operating results. We expect that our portfolio companies may have significant variations in their operating results, may from time to time be parties to litigation, may be engaged in rapidly changing businesses with products subject to a substantial risk of obsolescence, may require substantial additional capital to support their operations, finance expansion or maintain their competitive position, may otherwise have a weak financial position or may be adversely affected by changes in the business cycle. Our portfolio companies may not meet net income, cash flow and other coverage tests typically imposed by their senior lenders.

Small and middle-market businesses are more likely to be dependent on one or two persons. Typically, the success of a small or middle-market company also depends on the management talents and efforts of one or two persons or a small group of persons. The death, disability or resignation of one or more of these persons could have a material adverse impact on our portfolio company and, in turn, on us.

Small and middle-market companies are likely to have greater exposure to economic downturns than larger companies. We expect that our portfolio companies will have fewer resources than larger businesses and an economic downturn may thus more likely have a material adverse effect on them.

Small and middle-market companies may have limited operating histories. We may make debt or equity investments in new companies that meet our investment criteria. Portfolio companies with limited operating histories are exposed to the operating risks that new businesses face and may be particularly susceptible to, among other risks, market downturns, competitive pressures and the departure of key executive officers.

Investments in foreign debt or equity may involve significant risks in addition to the risks inherent in U.S. investments.

Our investment strategy has resulted in some investments in debt or equity of foreign companies (subject to applicable limits prescribed by the 1940 Act). Investing in foreign companies can expose us to additional risks not typically associated with investing in U.S. companies. These risks include exchange rates, changes in exchange control regulations, political and social instability, expropriation, imposition of foreign taxes, less liquid markets and less available information than is generally the case in the United States, higher transaction costs, less government supervision of exchanges, brokers and issuers, less developed bankruptcy laws, difficulty in enforcing contractual obligations, lack of uniform accounting and auditing standards and greater price volatility.

The market for private equity investments can be highly competitive. In some cases, our status as a regulated business development company may hinder our ability to participate in investment opportunities.

We face competition in our investing activities from private equity funds, other business development companies, investment banks, investment affiliates of large industrial, technology, service and financial companies, small business investment companies, wealthy individuals and foreign investors. As a regulated business development company, we are required to disclose quarterly the name and business description of portfolio companies and the value of any portfolio securities. Many of our competitors are not subject to this disclosure requirement. Our obligation to disclose this information could hinder our ability to invest in certain portfolio companies. Additionally, other regulations, current and future, may make us less attractive as a potential investor to a given portfolio company than a private equity fund not subject to the same regulations. Furthermore, some of our competitors have greater resources than we do. Increased competition would make it

Table of Contents

more difficult for us to purchase or originate investments at attractive prices. As a result of this competition, sometimes we may be precluded from making certain investments.

Complying with the RIC requirements may cause us to forego otherwise attractive opportunities.

In order to qualify as a RIC for U.S. federal income tax purposes, we must satisfy tests concerning the sources of our income, the nature and diversification of our assets and the amounts we distribute to our shareholders. We may be unable to pursue investments that would otherwise be advantageous to us in order to satisfy the source of income or asset diversification requirements for qualification as a RIC. In particular, to qualify as a RIC, at least 50% of our assets must be in the form of cash and cash items, Government securities, securities of other RICs, and other securities that represent not more than 5% of our total assets and not more than 10% of the outstanding voting securities of the issuer. We have from time to time held a significant portion of our assets in the form of securities that exceed 5% of our total assets or more than 10% of an outstanding security of an issuer, and compliance with the RIC requirements restricts our ability to make additional investments that represent more than 5% of our total assets or more than 10% of the outstanding voting securities of the issuer. Thus, compliance with the RIC requirements may hinder our ability to take advantage of investment opportunities believed to be attractive.

Regulations governing our operation as a business development company affect our ability to, and the way in which we, raise additional capital.

We are not generally able to issue and sell our common stock at a price below net asset value per share. We may, however, sell our common stock or warrants at a price below the then-current net asset value per share of our common stock if our board of directors determines that such sale is in the best interests of the Company and its stockholders, and our stockholders approve such sale. In any such case, the price at which our securities are to be issued and sold may not be less than a price that, in the determination of our board of directors, closely approximates the market value of such securities (less any distributing commission or discount). If we raise additional funds by issuing more common stock or senior securities convertible into, or exchangeable for, our common stock, then the percentage ownership of our stockholders at that time will decrease, and you might experience dilution.

Our common stock price can be volatile.

The trading price of our common stock may fluctuate substantially. The price of the common stock may be higher or lower than the price you pay for your shares, depending on many factors, some of which are beyond our control and may not be directly related to our operating performance. These factors include the following:

price and volume fluctuations in the overall stock market from time to time;

significant volatility in the market price and trading volume of securities of business development companies or other financial services companies;

volatility resulting from trading in derivative securities related to our common stock including puts, calls, long-term equity participation securities, or LEAPs, or short trading positions;

changes in regulatory policies or tax guidelines with respect to business development companies or RICs;

actual or anticipated changes in our earnings or fluctuations in our operating results or changes in the expectations of securities analysts;

general economic conditions and trends;

loss of a major funding source; or

departures of key personnel of TTG Advisers.

We are subject to market discount risk.

As with any stock, the price of our shares will fluctuate with market conditions and other factors. If shares are sold, the price received may be more or less than the original investment. Whether investors will realize gains or losses upon the sale of our shares will not depend directly upon our NAV, but will depend upon the market price of the shares at the time of sale. Since the market price of our shares will be affected by such factors as the relative demand for and supply of the shares in the market, general market and economic conditions and other factors beyond our control, we cannot predict whether the shares will trade at, below or above our NAV. Although our shares, from time to time, have traded at a premium to our NAV, currently, our shares are trading at a discount to NAV, which discount may fluctuate over time.

Our ability to grow depends on our ability to raise capital.

To fund new investments, we may need to issue periodically equity securities or borrow from financial institutions. Unfavorable economic conditions could increase our funding costs, limit our access to the capital markets or result in a decision by lenders not to extend credit to us. If we fail to obtain capital to fund our investments, it could limit both our ability to grow our business and our profitability. With certain limited exceptions, we are only allowed to borrow amounts such that our asset coverage, as defined in the 1940 Act, equals at least 200% after such borrowing. The amount of leverage that we employ depends on TTG Advisers' and our board of directors' assessment of market and other factors at the time of any proposed borrowing. We cannot assure you that we will be able to maintain our current facilities or obtain other lines of credit at all or on terms acceptable to us.

Changes in interest rates may affect our cost of capital and net operating income and our ability to obtain additional financing.

Because we have borrowed and may continue to borrow money to make investments, our net investment income before net realized and unrealized gains or losses, or net investment income, may be dependent upon the difference between the rate at which we borrow funds and the rate at which we invest these funds. As a result, there can be no assurance that a significant change in market interest rates would not have a material adverse effect on our net investment income. In periods of declining interest rates, we may have difficulty investing our borrowed capital into investments that offer an appropriate return. In periods of sharply rising interest rates, our cost of funds would increase, which could reduce our net investment income. We may use a combination of long-term and short-term borrowings and equity capital to finance our investing activities. We may utilize our short-term credit facilities as a means to bridge to long-term financing. Our long-term fixed-rate investments are financed primarily with equity and long-term fixed-rate debt. We may use interest rate risk management techniques in an effort to limit our exposure to interest rate fluctuations. Such techniques may include various interest rate hedging activities to the extent permitted by the 1940 Act. Additionally, we cannot assure you that financing will be available on acceptable terms, if at all. Recent turmoil in the credit markets has greatly reduced the availability of debt financing. Deterioration in the credit markets, which could delay our ability to sell certain of our loan investments in a timely manner, could also negatively impact our cash flows.

Our ability to use our capital loss carryforwards may be subject to limitations.

Table of Contents

If we experience a shift in the ownership of our common stock (e.g., if a shareholder acquires 5% or more of our outstanding shares of common stock, or if a shareholder who owns 5% or more of our outstanding shares of common stock significantly increases or decreases its investment in the Company), our ability to utilize our capital loss carryforwards to offset future capital gains may be severely limited. Further, in the event that we are deemed to have failed to meet the requirements to qualify as a RIC, our ability to use our capital loss carryforwards could be adversely affected.

The war with Iraq, terrorist attacks, and other acts of violence or war may affect any market for our common stock, impact the businesses in which we invest and harm our operations and our profitability.

The war with Iraq, its aftermath and the continuing occupation of Iraq are likely to have a substantial impact on the U.S. and world economies and securities markets. The nature, scope and duration of the war and occupation cannot be predicted with any certainty. Furthermore, terrorist attacks may harm our results of operations and your investment. We cannot assure you that there will not be further terrorist attacks against the United States or U.S. businesses. Such attacks and armed conflicts in the United States or elsewhere may impact the businesses in which we invest directly or indirectly, by undermining economic conditions in the United States. Losses resulting from terrorist events are generally uninsurable.

Item 4. Controls and Procedures

(a) As of the end of the period covered by this quarterly report on Form 10-Q, the individual who performs the functions of a Principal Executive Officer (the CEO) and the individual who performs the functions of a Principal Financial Officer (the CFO) conducted an evaluation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended). Based upon this evaluation, our CEO and CFO concluded that our disclosure controls and procedures are effective and provide reasonable assurance that information required to be disclosed in our periodic SEC filings is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our CEO and CFO, as appropriate, to allow timely decisions regarding required disclosure.

(b) There have been no changes in our internal controls over financial reporting that occurred during the fiscal quarter ended April 30, 2009, which have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
