MVC Capital, Inc. (the Company)
Notes to Consolidated Financial Statements
January 31, 2008
(Unaudited)

1. Basis of Presentation

The accompanying unaudited interim consolidated financial statements have been prepared in accordance with the instructions to Form 10-Q and do not include all of the information and footnotes required by generally accepted accounting principles for complete consolidated financial statements. Certain amounts have been reclassified to adjust to current period presentations. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. These statements should be read in conjunction with the financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended October 31, 2007, as filed with the U.S. Securities and Exchange Commission (the SEC) on December 28, 2007 (File No. 814-00201).

2. Consolidation

On July 16, 2004, the Company formed a wholly-owned subsidiary, MVC Financial Services, Inc. (MVCFS). MVCFS is incorporated in Delaware and its principal purpose is to provide advisory, administrative and other services to the Company, the Company's portfolio companies and other entities. MVCFS had opening equity of \$1 (100 shares at \$0.01 per share). The Company does not hold MVCFS for investment purposes and does not intend to sell MVCFS. In the consolidation, all intercompany accounts have been eliminated.

3. Investment Classification

As required by the Investment Company Act of 1940, as amended (the 1940 Act), we classify our investments by level of control. As defined in the 1940 Act, Control Investments are investments in those companies that we are deemed to Control. Affiliate Investments are investments in those companies that are Affiliated Companies of us, as defined in the 1940 Act, other than Control Investments. Non-Control/Non-Affiliate Investments are those that are neither Control Investments nor Affiliate Investments. Generally, under that 1940 Act, we are deemed to control a company in which we have invested if we own 25% or more of the voting securities of such company or have greater than 50% representation on its board. We are deemed to be an affiliate of a company in which we have invested if we own 5% or more and less than 25% of the voting securities of such company.

4. Concentration of Market Risk

Financial instruments that subjected the Company to concentrations of market risk consisted principally of equity investments, subordinated notes, and debt instruments, which represented approximately 78.68% of the Company's total assets at January 31, 2008. As discussed in Note 5, these investments consist of securities in companies with no readily determinable market values and as such are valued in accordance with the Company's fair value policies and procedures. The Company's investment strategy represents a high degree of business and financial risk due to the fact that the investments (other than cash equivalents) are generally illiquid, in small and middle market companies, and include entities with little operating history or entities that possess operations in new or developing industries. These investments, should they become publicly traded, would generally be (i) subject to restrictions on resale, if they were acquired from the issuer in private placement transactions; and (ii) susceptible to market risk.

Table of Contents

On May 1, 2007, Turf repaid its secured junior revolving note in full, including accrued interest. The total amount received from the payment was approximately \$1.0 million. There were no borrowings outstanding on the revolving note as of October 31, 2007.

Beginning on May 1, 2007, the Company receives monthly principal payments of \$111,111 from SP on term loan B. Total principal payments for the fiscal year ended October 31, 2007 was \$666,666.

On July 7, 2007, the Company extended the maturity date of the Timberland junior revolver to July 7, 2009.

On July 24, 2007, the Company sold the common stock of Baltic Motors and SIA BM Auto (BM Auto). The amount received from the sale of the 60,684 common shares of Baltic Motors was approximately \$62.0 million, net of closing and other transaction costs, working capital adjustments and a reserve established by the Company to satisfy certain post-closing conditions requiring capital and other expenditures. Baltic Motors repaid all debt from the Company in full including all accrued interest. Total amount received from the repayment of the debt was approximately \$10.2 million including all accrued interest. The remaining \$51.8 million, less the \$8.0 million cost basis of Baltic Motors, resulted in \$43.8 million recorded as realized gain. The difference between the \$51.8 million received from the Baltic Motors equity and the carrying value at October 31, 2006 is \$30.6 million and the amount of the increase in net assets attributable to fiscal year 2007. The portion of the capital gain related to the equity investment made on June 24, 2004 (\$40.9 million), will be treated as long-term capital gain and the portion related to the equity investment made on September 28, 2006 (\$2.9 million) will be treated as a short-term capital gain. The amount received from the sale of the 47,300 common shares of BM Auto was approximately \$29.7 million, net of closing and other transaction costs, working capital adjustments and a reserve established by the Company to satisfy certain post-closing conditions requiring capital and other expenditures. The \$29.7 million, less the \$8.0 million cost basis of BM Auto, resulted in \$21.7 million recorded as a long term capital gain. The difference between the \$29.7 million received from the BM Auto equity and the carrying value at October 31, 2006 is \$21.7 million, which is the amount of the increase in net assets attributable to fiscal year 2007.

As mentioned above, a reserve account of approximately \$3.0 million was created for post closing conditions that are required of the seller as a part of the purchase agreement. The cash held in the reserve account was held in Euros. On October 17, 2007, all post-closing conditions from the acquisition were satisfied. Of the \$3.0 million held in reserve, \$1.0 million was not needed to satisfy the post-closing conditions and as a result was added to the Company's gain on the sale. Of the \$1.0 million gain from the reserve account, approximately \$887,000 is attributable to the sale of Baltic Motors and approximately \$148,000 is attributable to the sale to BM Auto. The Company also had a currency gain of approximately \$42,000 from the reserve account. Total gain from the sale of Baltic Motors and BM Auto was \$66.5 million.

On July 27, 2007, U.S. Gas repaid its bridge loan in full, including accrued interest. The total amount received was approximately \$908,000.

On August 1, 2007, Phoenix Coal Corporation (Phoenix Coal) repaid its second lien loan in full including all accrued interest and fees. Total amount received from the repayment was approximately \$8.4 million.

On October 31, 2007, the Company restructured the terms of the Amersham loans. The accrued interest on the loan with an outstanding balance of \$2.7 million at October 31, 2007 was capitalized. The default PIK interest on the loan with a balance of \$3.1 million at October 31, 2007 was forgiven up to seventy five percent. The interest rate on this loan has been reduced to the original rate of 16%.

The Company also receives a fee of 0.50% of the unused portion of the revolving loan facility. There was no amount outstanding on the revolving loan facility as of January 31, 2008.

On October 10, 2006, the Company agreed to guarantee a 375,000 Euro inventory financing facility for BENI, equivalent to approximately \$556,430 at January 31, 2008.

On October 12, 2006, the Company provided a \$12.0 million revolving credit facility to Octagon in replacement of the senior secured credit facility provided on May 7, 2004. This credit facility expires on December 31, 2011. The credit facility bears annual interest at LIBOR plus 4.25%. The Company receives a 0.50% unused facility fee on an annual basis and a 0.25% servicing fee on an annual basis for maintaining the credit facility. At October 31, 2007 the outstanding balance of the revolving credit facility provided to Octagon was \$4.1 million. Net borrowings during the three month period ended January 31, 2008 were \$5.7 million resulting in a balance outstanding of \$9.8 million on that date.

On October 30, 2006, the Company provided Velocitus a \$260,000 revolving line of credit (Line I). Line I expires on October 31, 2009 and bears annual interest at 8%. At October 31, 2007, the balance of the Line I was approximately \$191,000. Net repayments during the three month period ended January 31, 2008 were approximately \$191,000. As of January 31, 2008, there was no amount outstanding on Line I.

On January 9, 2007, the Company extended to Turf a \$1.0 million secured junior revolving note. The note bears annual interest at 12.5% and expires on May 1, 2008. The Company also receives a fee of 0.25% of the unused portion of the note. On December 31, 2007, Turf borrowed \$1.0 million from the secured junior revolving note. There was \$1.0 million outstanding on the revolving note as of January 31, 2008.

At October 31, 2007 and January 31, 2008, the outstanding balance of the revolving credit facility provided was \$4.0 million.

On May 1, 2007, the Company provided Line II to Velocitus. Line II expires on April 30, 2010 and bears annual interest at 8%. At October 31, 2007 and January 31, 2008, there was approximately \$613,000 outstanding.

Table of Contents

On July 19, 2007, the Company agreed to guarantee a 1.4 million Euro mortgage for Tekers, equivalent to approximately \$2.1 million at January 31, 2008.

On July 26, 2007, the Company provided a \$10.0 million revolving credit facility and a \$2.0 million junior revolver to U.S. Gas. The credit facility bears annual interest at LIBOR plus 6% and the revolver bears annual interest at 14%. The Company receives a fee of 0.50% on the unused portion of the credit facility and the revolver. The revolving credit facility and junior revolver expire on July 26, 2010. At October 31, 2007, there was approximately \$85,000 outstanding on the revolving credit facility. Net borrowings during the three month period ended January 31, 2008 were \$2.5 million resulting in a balance outstanding of \$2.6 million at such date. There was no amount outstanding on the junior revolver as of October 31, 2007 and January 31, 2008.

On January 15, 2008, the Company agreed to guarantee a 6.5 million Euro mortgage for MVC Automotive, equivalent to approximately \$9.6 million at January 31, 2008.

On January 16, 2008, the Company agreed to support a 4 million Euro mortgage for a Ford dealership owned and operated by MVC Automotive (equivalent to approximately \$5.9 million at January 31, 2008) through making financing available to the dealership and agreeing under certain circumstances not to reduce its equity stake in MVC Automotive.

Timberland also has a floor plan financing program administered by Transamerica. As is typical in Timberland's industry, under the terms of the dealer financing arrangement, Timberland guarantees the repurchase of product from Transamerica, if a dealer defaults on payment and the underlying assets are repossessed. The Company has agreed to be a limited co-guarantor for up to \$500,000 on this repurchase commitment.

Commitments of the Company:

On February 16, 2005, the Company entered into a sublease (the "Sublease") for a larger space in the building in which the Company's current executive offices are located, which expired on February 28, 2007. Effective November 1, 2006, under the terms of the Investment Advisory and Management Agreement with TTG Advisers (the "Advisory Agreement"), TTG Advisers is responsible for providing office space to the Company and for the costs associated with providing such office space. The Company's offices continue to be located on the second floor of 287 Bowman Avenue.

On April 27, 2006, the Company and MVCFS, as co-borrowers, entered into a new four-year, \$100 million credit facility (the "Credit Facility") with Guggenheim as administrative agent for the lenders. At October 31, 2007, there was \$50.0 million in term debt and \$30.0 million on the Credit Facility outstanding. During the three month period ended January 31, 2008, the Company's net borrowings on the Credit Facility were \$20.0 million. As of January 31, 2008, there was \$50.0 million in term debt and \$50.0 million outstanding on the revolving credit facility. The proceeds from borrowings made under the Credit Facility are used to fund new and existing portfolio investments, pay fees and expenses related to obtaining the financing and for general corporate purposes. The Credit Facility will expire on April 27, 2010, at which time all outstanding amounts under the Credit Facility will be due and payable. Borrowings under the Credit Facility will bear interest, at the Company's option, at a floating rate equal to either (i) the LIBOR rate (for one, two, three or six months), plus a spread of 2.00% per annum, or (ii) the Prime rate in effect from time to time, plus a spread of 1.00% per annum. The Company paid a closing fee, legal and other costs associated with this transaction. These costs will be amortized evenly over the life of the facility. The prepaid expenses on the Balance Sheet include the unamortized portion of these costs. Borrowings under the Credit Facility will be secured, by among other things, cash, cash equivalents, debt investments, accounts receivable, equipment, instruments, general intangibles, the capital stock of MVCFS, and any proceeds from all the aforementioned items, as well as all other property except for equity investments made by the Company.

The Company enters into contracts with portfolio companies and other parties that contain a variety of indemnifications. The Company's maximum exposure under these arrangements is unknown. However, the Company has not experienced claims or losses pursuant to these contracts and believes the risk of loss related to indemnifications to be remote.

On February 28, 2007, the Company completed its public offering of 5,000,000 shares of the Company's common stock at a price of \$16.25 per share. On March 28, 2007, pursuant to the 30-day over-allotment option granted by the Company to the underwriters in connection with the offering, the underwriters purchased an additional 158,500 shares of common stock at the purchase price of \$16.25 per share. The Company raised approximately \$78.4 million in net proceeds after deducting the underwriting discount and commissions and estimated offering expenses. The Company expects to use the net proceeds of the offering to fund additional investments and for general corporate purposes, including the repayment of debt.

8. Management

On November 6, 2003, Michael Tokarz assumed his positions as Chairman, Portfolio Manager and Director of the Company. From November 6, 2003 to October 31, 2006, the Company was internally managed. The Company entered into the Advisory Agreement, effective November 1, 2006, which provides for the Company to be managed externally by TTG Advisers, which is controlled by Mr. Tokarz.

Under the terms of the Advisory Agreement, TTG Advisers determines, consistent with the Company's investment strategy, the composition of the Company's portfolio, the nature and timing of the changes to the Company's portfolio and the manner of implementing such changes. TTG Advisers also identifies, and negotiates the structure of the Company's investments (including performing due diligence on prospective portfolio companies), closes and monitors the Company's investments, determines the securities and other assets purchased, retains or sells and oversees the administration, recordkeeping and compliance functions of the Company and/or third parties performing such functions for the Company. TTG Advisers' services under the Advisory Agreement are not exclusive, and it may furnish similar services to other entities. Pursuant to the Advisory Agreement, the Company is required to pay TTG Advisers a fee for investment advisory and management services consisting of two components—a base management fee and an incentive fee. The base management fee is calculated at 2.0% per annum of the Company's total assets excluding cash and the value of any investment by the Company not made in portfolio companies (Non-Eligible Assets) but including assets purchased with borrowed funds that are not Non-Eligible Assets. The incentive fee consists of two parts: (i) one part is based on our pre-incentive fee net operating income; and (ii) the other part is based on the capital gains realized on our portfolio of securities acquired after November 1, 2003. The Advisory Agreement provides for an expense cap pursuant to which TTG Advisers will absorb or reimburse operating expenses of the Company to the extent necessary to limit the Company's expense ratio (the consolidated expenses of the Company, including any amounts payable to TTG Advisers under the base management fee, but excluding the amount of any interest and other direct borrowing costs, taxes, incentive compensation and extraordinary expenses taken as a percentage of the Company's average net assets) to 3.25% in each of the 2007 and 2008 fiscal years. Please see Note 9 Incentive Compensation for more information.

9. Incentive Compensation

Effective November 1, 2006, Mr. Tokarz's employment agreement with the Company terminated and the obligations under Mr. Tokarz's agreement were superseded by those under the Advisory Agreement entered into with TTG Advisers. Pursuant to the Advisory Agreement, the Company pays an incentive fee to TTG Advisers which is generally: (i) 20% of pre-incentive fee net operating income and (ii) 20% of net realized capital gains less unrealized depreciation (on our portfolio securities acquired after November 1, 2003). TTG Advisers is entitled to an incentive fee with respect to our pre-incentive fee net operating income in each fiscal quarter as follows: no incentive fee in any fiscal quarter in which our pre-incentive fee net operating income does not exceed the hurdle rate of 1.75% of net assets, 100% of our pre-incentive fee net operating income with respect to that portion of such pre-incentive fee net operating income, if any, that exceeds the hurdle rate but is less than 2.1875% of net assets in any fiscal quarter and 20% of the amount of our pre-incentive fee net operating income,

Table of Contents

if any, that exceeds 2.1875% of net assets in any fiscal quarter. Under the Advisory Agreement, the accrual of the provision for incentive compensation for net realized capital gains is consistent with the accrual that was required under the employment agreement with Mr. Tokarz.

Under internal management, Mr. Tokarz was entitled to compensation pursuant to his agreement with the Company, under which the Company was required to pay Mr. Tokarz incentive compensation in an amount equal to the lesser of (a) 20% of the net income of the Company for the fiscal year; or (b) the sum of (i) 20% of the net capital gains realized less unrealized depreciation by the Company in respect of the investments made during his tenure as Portfolio Manager; and (ii) the amount, if any, by which the Company's total expenses for a fiscal year were less than two percent of the Company's net assets (determined as of the last day of the period).

At October 31, 2007, the provision for estimated incentive compensation was \$17,875,496. During the three month period ended January 31, 2008, this provision for incentive compensation was decreased by a net amount of \$3,846,764 to \$14,028,732. The amount of the provision reflects the Valuation Committee's determination to increase the fair values of six of the Company's portfolio investments (U.S. Gas, Vitality, Tekers, SGDA, Custom Alloy and Velocitius) by a total of \$10.3 million. The net decrease in the provision for incentive compensation during the three month period ended January 31, 2008 was a result of the incentive compensation payment to TTG Advisers of \$5.5 million due to the sale of Baltic Motors and BM Auto. Pursuant to the Advisory Agreement, incentive compensation payments will be made to TTG Advisers only upon the occurrence of a realization event (as defined under such agreement). On July 24, 2007, as discussed in Realized Gains and Losses on Portfolio Securities, For the Fiscal Year Ended October 31, 2007, the Company realized a gain of \$66.5 million from the sale of Baltic Motors and BM Auto. This transaction triggered an incentive compensation payment obligation to TTG Advisers, which payment was not required to be made until the precise amount of the payment obligation was confirmed based on the Company's completed audited financials for the fiscal year 2007. The payment obligation to TTG Advisers from this transaction totaled approximately \$12.9 million (20% of the realized gain from the sale less unrealized depreciation on the portfolio). The remaining \$7.4 million incentive compensation payment to TTG Advisers was paid on February 1, 2008. During the quarter ended January 31, 2008, there was no provision recorded for the net operating income portion of the incentive fee as pre-incentive fee net operating income did not exceed the hurdle rate.

10. Tax Matters

On October 31, 2007, the Company had a net capital loss carryforward of \$6,623,425 remaining, of which \$3,327,875 will expire in the year 2012 and \$3,295,550 will expire in the year 2013. To the extent future capital gains are offset by capital loss carryforwards, such gains need not be distributed. As of October 31, 2007, the Company had net unrealized capital losses of \$15,363,252. The gross unrealized capital losses totaled \$50,618,032. The total net realized capital loss carryforwards and gross unrealized capital losses at October 31, 2007 were \$57,241,457.

11. Dividends and Distributions to Shareholders

As a regulated investment company (RIC) under Subchapter M of the Internal Revenue Code of 1986, as amended (the Code), the Company is required to distribute to its shareholders, in a timely manner, at least 90% of its investment company taxable and tax-exempt income each year. If the Company distributes, in a calendar year, at least 98% of its ordinary income for such calendar year and its capital gain net income for the 12-month period ending on October 31 of such calendar year (as well as any portion of the respective 2% balances not distributed in the previous year), it will not be subject to the 4% non-deductible federal excise tax on certain undistributed income of RICs.

Dividends and capital gain distributions, if any, are recorded on the ex-dividend date. Dividends and capital gain distributions are generally declared and paid quarterly according to the Company's policy established on

Table of Contents

July 11, 2005. An additional distribution may be paid by the Company to avoid imposition of federal income tax on any remaining undistributed net investment income and capital gains. Distributions can be made payable by the Company either in the form of a cash distribution or a stock dividend. The amount and character of income and capital gain distributions are determined in accordance with income tax regulations which may differ from accounting principles generally accepted in the United States of America. These differences are due primarily to differing treatments of income and gain on various investment securities held by the Company, timing differences and differing characterizations of distributions made by the Company. Permanent book and tax basis differences relating to shareholder distributions will result in reclassifications and may affect the allocation between net operating income, net realized gain (loss) and paid in capital.

For the Quarter Ended January 31, 2008

On December 20, 2007, the Company's board of directors declared a dividend of \$0.12 per share. The dividend was payable on January 9, 2008 to shareholders of record on December 31, 2007. The ex-dividend date was December 27, 2007. The total distribution amounted to \$2,913,739, including distributions reinvested. In accordance with the Company's dividend reinvestment plan (the Plan), Computershare Ltd., the Plan Agent, re-issued 15,930 shares of common stock from the Company's treasury to shareholders participating in the Plan.

(1) Fiscal Year 2006, the Company was internally managed. During the period, other expenses also included employee compensation and facilities costs.

OVERVIEW

The Company is an externally managed, non-diversified, closed-end management investment company that has elected to be regulated as a business development company under the 1940 Act. The Company's investment objective is to seek to maximize total return from capital appreciation and/or income.

On November 6, 2003, Mr. Tokarz assumed his positions as Chairman and Portfolio Manager of the Company. He and the Company's investment professionals (who, effective November 1, 2006, provide their services to the Company through the Company's investment adviser, TTG Advisers) are seeking to implement our investment objective (*i.e.*, to maximize total return from capital appreciation and/or income) through making a broad range of private investments in a variety of industries.

The investments can include senior or subordinated loans, convertible debt and convertible preferred securities, common or preferred stock, equity interests, warrants or rights to acquire equity interests, and other private equity transactions. During the year ended October 31, 2007, the Company made ten new investments and 16 follow-on investments in existing portfolio companies, committing capital totaling approximately \$167.1 million pursuant to our current investment objective. During the three month period ended January 31, 2008, the Company made two new investments and three additional investments in existing portfolio companies, committing capital totaling approximately \$66.0 million.

Prior to the adoption of our current investment objective, the Company's investment objective had been to achieve long-term capital appreciation from venture capital investments in information technology companies. The Company's investments had thus previously focused on investments in equity and debt securities of information technology companies. As of January 31, 2008, 4.58% of the current fair value of our assets consisted of Legacy Investments. We are, however, seeking to manage these Legacy Investments to try and realize maximum returns. We generally seek to capitalize on opportunities to realize cash returns on these investments when presented with a potential liquidity event, *i.e.*, a sale, public offering, merger or other reorganization.

Our new portfolio investments are made pursuant to our current objective and strategy. We are concentrating our investment efforts on small and middle-market companies that, in our view, provide opportunities to maximize total return from capital appreciation and/or income. Under our investment approach, we are permitted to invest, without limit, in any one portfolio company, subject to any diversification limits required in order for us to continue to qualify as a RIC under Subchapter M of the Code.

We participate in the private equity business generally by providing privately negotiated long-term equity and/or debt investment capital to small and middle-market companies. Our financing is generally used to fund growth, buyouts, acquisitions, recapitalizations, note purchases, and/or bridge financings. We generally invest in private companies, though, from time to time, we may invest in public companies that may lack adequate access to public capital.

Table of Contents

We may also seek to achieve our investment objective by establishing a subsidiary or subsidiaries that would serve as a general partner or managing member to a private equity or other investment vehicle(s). In fact, during fiscal year 2006, we established MVC Partners for this purpose. Additionally, we may also acquire a portfolio of existing private equity or debt investments held by financial institutions or other investment funds should such opportunities arise.

OPERATING INCOME

For the Quarters Ended January 31, 2008 and 2007. Total operating income was \$8.9 million for the quarter ended January 31, 2008 and \$5.4 million for the quarter ended January 31, 2007, an increase of \$3.5 million.

For the Quarter Ended January 31, 2008

Total operating income was \$8.9 million for the quarter ended January 31, 2008. The increase in operating income over the same period last year was primarily due to the increase in the number of investments that provide the Company with current income. The main components of investment income were the interest earned on loans and dividend income from portfolio companies and the receipt of closing and monitoring fees from certain portfolio companies by the Company and MVCFS. The Company earned approximately \$7.0 million in interest and dividend income from investments in portfolio companies. Of the \$7.0 million recorded in interest/dividend income, approximately \$1.4 million was payment in kind interest/dividends. The payment in kind interest/dividends are computed at the contractual rate specified in each investment agreement and added to the principal balance of each investment. The Company's debt investments yielded rates from 5% to 17%. Also, the Company earned approximately \$372,000 in interest income on its cash equivalents and short-term investments. The Company received fee income and other income from portfolio companies and other entities totaling approximately \$1.3 million and \$202,000, respectively.

For the Quarter Ended January 31, 2007

Total operating income was \$5.4 million for the quarter ended January 31, 2007. The \$1.2 million increase in operating income, compared to the quarter ended January 31, 2006, was primarily due to the increase in the number of investments that provide the Company with current income. The main components of investment income were the interest and dividend income earned on loans to portfolio companies and the receipt of closing and monitoring fees from certain portfolio companies by the Company and MVCFS. The Company earned approximately \$4.7 million in interest and dividend income from investments in portfolio companies. Of the \$4.7 million recorded in interest/dividend income, approximately \$763,000 was payment in kind interest/dividends. The payment in kind interest/dividends are computed at the contractual rate specified in each investment agreement and added to the principal balance of each investment. The Company's debt investments yielded rates from 0% to 17%. Also, the Company earned approximately \$75,000 in interest income on its cash equivalents and short-term investments. The Company received fee income and other income from portfolio companies and other entities totaling approximately \$657,000 and \$24,000, respectively.

OPERATING EXPENSES

For Quarters Ended January 31, 2008 and 2007. Operating expenses were \$5.5 million for the quarter ended January 31, 2008 and \$7.0 million for the quarter ended January 31, 2007, a decrease of \$1.5 million.

For the Quarter Ended January 31, 2008

Operating expenses were \$5.5 million or 5.87% of the Company's average net assets, when annualized, for the quarter ended January 31, 2008. Significant components of operating expenses for the quarter ended January 31, 2008, included the management fee of \$2.0 million, the estimated provision for incentive compensation

Table of Contents

expense of approximately \$1.7 million, and interest expense and other borrowing costs of \$1.2 million. The estimated provision for incentive compensation expense is a non-cash, not yet payable, provisional expense relating to the Advisory Agreement.

The \$1.5 million decrease in the Company's operating expenses for the quarter ended January 31, 2008 compared to the quarter ended January 31, 2007, was primarily due to the \$1.9 million decrease in the provision for estimated incentive compensation and the approximately \$400,000 increase in the management fee expense. It should be noted, in this regard, that the Advisory Agreement provides for an expense cap pursuant to which TTG Advisers will absorb or reimburse operating expenses of the Company to the extent necessary to limit the Company's expense ratio (the consolidated expenses of the Company, including any amounts payable to TTG Advisers under the base management fee, but excluding the amount of any interest and other direct borrowing costs, taxes, incentive compensation and extraordinary expenses taken as a percentage of the Company's average net assets) to 3.25% in each of the 2007 and 2008 fiscal years. In fiscal year 2006, when the Company was still internally managed and not subject to the expense cap, the expense ratio was 3.22% (taking into account the same carve outs as those applicable to the expense cap). For fiscal year 2007, the expense ratio was 3.0% (taking into account the same carve outs as those applicable to the expense cap).

Pursuant to the terms of the Advisory Agreement, during the three month period ended January 31, 2008, the incentive compensation provision was decreased by a net amount of \$3,846,764 to \$14,028,732. The amount of the provision reflects the Valuation Committee's determination to increase the fair values of six of the Company's portfolio investments: U.S. Gas, Vitality, Tekers, SGDA, Custom Alloy and Velocitius by a total of \$10.3 million. The net decrease in the provision for incentive compensation during the three month period ended January 31, 2008 was a result of the incentive compensation payment to TTG Advisers of \$5.5 million due to the sale of Baltic Motors and BM Auto. The payment obligation to TTG Advisers from the Baltic Motors and BM Auto transaction totaled approximately \$12.9 million (20% of the realized gain from the sale less unrealized depreciation on the portfolio). The remaining \$7.4 million incentive compensation payment to TTG Advisers was paid on February 1, 2008. Pursuant to the Advisory Agreement, incentive compensation payments will be made only upon the occurrence of a realization event (such as the sale of shares of Baltic Motors and BM Auto). Without this reserve for incentive compensation, operating expenses would have been approximately \$3.9 million or 4.12% of average net assets when annualized as compared to 5.87%, which is reported on the Consolidated Per Share Data and Ratios, for the quarter ended January 31, 2008. During the quarter ended January 31, 2008, there was no provision recorded for the net operating income portion of the incentive fee as pre-incentive fee net operating income did not exceed the hurdle rate. Please see Note 9 Incentive Compensation for more information.

In February 2008, the Company renewed its Directors & Officers/Professional Liability Insurance policies at an annual premium expense of approximately \$362,000, which is amortized over the twelve month life of the policy. The prior policy premium was \$381,000.

For the Quarter Ended January 31, 2007

Operating expenses were \$7.0 million or 11.48% of the Company's average net assets, when annualized, for the three month period ended January 31, 2007. Significant components of operating expenses for the quarter ended January 31, 2007, included estimated provision for incentive compensation expense of approximately \$3.5 million, management fees of \$1.6 million, and interest expense and other borrowing costs of \$1.1 million. Estimated provision for incentive compensation expense is a non-cash, not yet payable, provisional expense relating to the Advisory Agreement.

The \$4.1 million increase in the Company's operating expenses in the three month period ended January 31, 2007 compared to the three month period ended January 31, 2006, was primarily due to the \$2.0 million increase in the provision for estimated incentive compensation, the \$1.1 million increase in the Company's interest expense and other borrowings, and the \$818,877 increase in the management fee expense compared to the facilities and employee compensation and benefits expense incurred when the Company was internally managed. The \$818,877 increase is in part due to the externalization of management to TTG Advisers.

Table of Contents

However, the management fee expense increased by only \$260,000 when compared to the employee compensation and benefits and facilities expense for the quarter ended October 31, 2006. It should be noted, in this regard, that the Advisory Agreement provides for an expense cap pursuant to which TTG Advisers will absorb or reimburse operating expenses of the Company to the extent necessary to limit the Company's expense ratio (the consolidated expenses of the Company, including any amounts payable to TTG Advisers under the base management fee, but excluding the amount of any interest and other direct borrowing costs, taxes, incentive compensation and extraordinary expenses taken as a percentage of the Company's average net assets) to 3.25% in each of the 2007 and 2008 fiscal years. In fiscal year 2006, when the Company was still internally managed and not subject to the expense cap, the expense ratio was 3.22% (taking into account the same carve outs as those applicable to the expense cap).

Pursuant to the terms of the Company's agreement with TTG Advisers, during the three month period ended January 31, 2007, the provision for incentive compensation was increased by \$3,525,967. The increase in the provision for incentive compensation resulted from the determination of the Valuation Committee to increase the fair value of six of the Company's portfolio investments: Baltic Motors, Dakota Growers, Octagon, BM Auto, SGDA, and Vitality which are subject to the Company's agreement with TTG Advisers, by a total of \$17,270,586. This reserve balance of \$10,588,101 will remain unpaid until net capital gains are realized, if ever, by the Company. Pursuant to the Advisory Agreement, only after a realization event may the incentive compensation be paid. Without this reserve for incentive compensation, operating expenses would have been approximately \$3.4 million or 5.66% of average net assets when annualized as compared to 11.48% which is reported on the Consolidated Per Share Data and Ratios, for the three month period ended January 31, 2007. Please see Note 8 Incentive Compensation for more information.

In February 2007, the Company renewed its Directors & Officers/Professional Liability Insurance policies at an expense of approximately \$381,000 which is amortized over the twelve month life of the policy. The prior policy premium was \$459,000.

For the Quarter Ended January 31, 2008

Net realized gains for the quarter ended January 31, 2008 were \$656,418. The significant component of the Company's net realized gains for the quarter ended January 31, 2008 was primarily due to the gain on the sale of Genevac common stock. On January 2, 2008, Genevac repaid its senior subordinated loan in full including all accrued interest. The total amount received was \$11.9 million. The Company, at this time, sold 140 shares of Genevac common stock for \$1.7 million, resulting in a capital gain of \$595,000.

The Company also realized a gain on foreign currency of approximately \$60,000.

For the Quarter Ended January 31, 2007

Net realized gains for the quarter ended January 31, 2007 were \$3,968. The significant component of the Company's net realized gains for the quarter ended January 31, 2007 was a realized gain from the final escrow distribution from Sygate Technologies, Inc. (Sygate).

UNREALIZED APPRECIATION AND DEPRECIATION OF PORTFOLIO SECURITIES

For the Quarters Ended January 31, 2008 and 2007. The Company had a net change in unrealized appreciation on portfolio investments of \$16.8 million for the quarter ended January 31, 2008 and \$20.6 million for the quarter ended January 31, 2007.

Table of Contents***For the Quarter Ended January 31, 2008***

The Company had a net change in unrealized appreciation on portfolio investments of \$16.8 million for the quarter ended January 31, 2008. The change in unrealized appreciation on investment transactions for the quarter ended January 31, 2008 primarily resulted from the Valuation Committee's decision to increase the fair value of the Company's investments in U.S. Gas preferred stock by \$2.2 million, SGDA preferred equity interest by \$125,000, Foliofn preferred stock by \$6.0 million, Tekers common stock by \$100,000, Custom Alloy preferred stock by \$5.0 million, Velocitius equity interest by \$2.7 million, and the Vitality by approximately \$200,000.

For the Quarter Ended January 31, 2007

The Company had a net change in unrealized appreciation on portfolio investments of \$20.6 million for the quarter ended January 31, 2007. The change in unrealized appreciation on investment transactions for the quarter ended January 31, 2007 primarily resulted from the Valuation Committee's decision to increase the fair value of the Company's investments in Baltic Motors common stock by approximately \$9.4 million, Dakota Growers common stock by approximately \$1.9 million, Octagon's membership interest by approximately \$1.2 million, BM Auto common stock by \$4.7 million, SGDA common equity interest by approximately \$121,000, and Vendio preferred stock by \$3.2 million.

Baltic Motors repaid all debt from the Company in full including all accrued interest. Total amount received from the repayment of the debt was approximately \$10.2 million including all accrued interest. The remaining \$51.8 million, less the \$8.0 million cost basis of Baltic Motors, resulted in \$43.8 million recorded as realized gain. The difference between the \$51.8 million received from the Baltic Motors equity and the carrying value at October 31, 2006 is \$30.6 million and the amount of the increase in net assets attributable to fiscal year 2007. The portion of the capital gain related to the equity investment made on June 24, 2004 (\$40.9 million), will be treated as long-term capital gain and the portion related to the equity investment made on September 28, 2006 (\$2.9 million) will be treated as a short-term capital gain. The amount received from the sale of the 47,300 common shares of BM Auto was approximately \$29.7 million, net of closing and other transaction costs, working capital adjustments and a reserve established by the Company to satisfy certain post-closing conditions requiring capital and other expenditures. The \$29.7 million, less the \$8.0 million cost basis of BM Auto, resulted in \$21.7 million recorded as a long term capital gain. The difference between the \$29.7 million received from the BM Auto equity and the carrying value at October 31, 2006 is \$21.7 million, which is the amount of the increase in net assets attributable to fiscal year 2007.

As mentioned above, a reserve account of approximately \$3.0 million was created for post closing conditions that are required of the seller as a part of the purchase agreement. The cash held in the reserve account was held in Euros. On October 17, 2007, all post-closing conditions from the acquisition were satisfied. Of the \$3.0 million held in reserve, \$1.0 million was not needed to satisfy the post-closing conditions and as a result was added to the Company's gain on the sale. Of the \$1.0 million gain from the reserve account, approximately \$887,000 is attributable to the sale of Baltic Motors and approximately \$148,000 is attributable to the sale to BM Auto. The Company also had a currency gain of approximately \$42,000 from the reserve account. Total gain from the sale of Baltic Motors and BM Auto was \$66.5 million.

On May 1, 2007, the Company provided Line II to Velocitus. Line II expires on April 30, 2010 and bears annual interest at 8%. At October 31, 2007 and January 31, 2008, there was approximately \$613,000 outstanding.

On July 19, 2007, the Company agreed to guarantee a 1.4 million Euro mortgage for Tekers, equivalent to approximately \$2.1 million at January 31, 2008.

On July 26, 2007, the Company provided a \$10.0 million revolving credit facility and a \$2.0 million junior revolver to U.S. Gas. The credit facility bears annual interest at LIBOR plus 6% and the revolver bears annual interest at 14%. The Company receives a fee of 0.50% on the unused portion of the credit facility and the revolver. The revolving credit facility and junior revolver expire on July 26, 2010. At October 31, 2007, there was approximately \$85,000 outstanding on the revolving credit facility. Net borrowings during the three month period ended January 31, 2008 were \$2.5 million resulting in a balance outstanding of \$2.6 million at such date. There was no amount outstanding on the junior revolver as of October 31, 2007 and January 31, 2008.

On January 15, 2008, the Company agreed to guarantee a 6.5 million Euro mortgage for MVC Automotive, equivalent to approximately \$9.6 million at January 31, 2008.

On January 16, 2008, the Company agreed to support a 4 million Euro mortgage for a Ford dealership owned and operated by MVC Automotive (equivalent to approximately \$5.9 million at January 31, 2008) through making financing available to the dealership and agreeing under certain circumstances not to reduce its equity stake in MVC Automotive.

Timberland also has a floor plan financing program administered by Transamerica. As is typical in Timberland's industry, under the terms of the dealer financing arrangement, Timberland guarantees the repurchase of product from Transamerica, if a dealer defaults on payment and the underlying assets are repossessed. The Company has agreed to be a limited co-guarantor for up to \$500,000 on this repurchase commitment.

Commitments of the Company:

On February 16, 2005, the Company entered into a sublease (the Sublease) for a larger space in the building in which the Company's current executive offices are located, which expired on February 28, 2007. Effective November 1, 2006, under the terms of the Advisory Agreement, TTG Advisers is responsible for providing office space to the Company and for the costs associated with providing such office space. The Company's offices continue to be located on the second floor of 287 Bowman Avenue.

On April 27, 2006, the Company and MVCFS, as co-borrowers, entered into the Credit Facility with Guggenheim as administrative agent for the lenders. At October 31, 2007, there was \$50.0 million in term debt and \$30.0 million on the Credit Facility outstanding. During the three month period ended January 31, 2008, the Company's net borrowings on the Credit Facility were \$20.0 million. As of January 31, 2008, there was \$50.0 million in term debt and \$50.0 million outstanding on the revolving credit facility. The proceeds from borrowings made under the Credit Facility are used to fund new and existing portfolio investments, pay fees and expenses related to obtaining the financing and for general corporate purposes. The Credit Facility will expire

Table of Contents

on April 27, 2010, at which time all outstanding amounts under the Credit Facility will be due and payable. Borrowings under the Credit Facility will bear interest, at the Company's option, at a floating rate equal to either (i) the LIBOR rate (for one, two, three or six months), plus a spread of 2.00% per annum, or (ii) the Prime rate in effect from time to time, plus a spread of 1.00% per annum. The Company paid a closing fee, legal and other costs associated with this transaction. These costs will be amortized evenly over the life of the facility. The prepaid expenses on the Balance Sheet include the unamortized portion of these costs. Borrowings under the Credit Facility will be secured, by among other things, cash, cash equivalents, debt investments, accounts receivable, equipment, instruments, general intangibles, the capital stock of MVCFS, and any proceeds from all the aforementioned items, as well as all other property except for equity investments made by the Company.

The Company enters into contracts with portfolio companies and other parties that contain a variety of indemnifications. The Company's maximum exposure under these arrangements is unknown. However, the Company has not experienced claims or losses pursuant to these contracts and believes the risk of loss related to indemnifications to be remote.

Subsequent Events

Since January 31, 2008, net repayments on the U.S. Gas revolving credit facility were approximately \$350,000.

Since January 31, 2008, the Company invested an additional \$150,000 in Harmony's demand note.

Since January 31, 2008, net repayments on the Octagon revolving credit facility were \$5.1 million.

On February 1, 2008, the Company repaid \$50.0 million on its Credit Facility.

On February 1, 2008, the Company paid to TTG Advisers the remaining incentive compensation payment of \$7.4 million from the sale of Baltic Motors and BM Auto.

On February 1, 2008, Innovative Brands made a principal payment of \$1.7 million on its term loan.

On February 29, 2008, the Company invested an additional \$7.8 million in Summit in the form of a \$3.0 million second lien loan and \$4.8 million of common stock.

On February 29, 2008, the Company sold 400 shares of WBS at cost for \$1.6 million.

Table of Contents**Item 3. Quantitative and Qualitative Disclosures About Market Risk**

Historically the Company has invested in small companies, and its investments in these companies are considered speculative in nature. The Company's investments often include securities that are subject to legal or contractual restrictions on resale that adversely affect the liquidity and marketability of such securities. As a result, the Company is subject to risk of loss which may prevent our shareholders from achieving price appreciation, dividend distributions and return of capital.

Financial instruments that subjected the Company to concentrations of market risk consisted principally of equity investments, subordinated notes, and debt instruments, which represent approximately 78.68% of the Company's total assets at January 31, 2008. As discussed in Note 5 Portfolio Investments, these investments consist of securities in companies with no readily determinable market values and as such are valued in accordance with the Company's fair value policies and procedures. The Company's investment strategy represents a high degree of business and financial risk due to the fact that the investments (other than cash equivalents) are generally illiquid, in small and middle market companies, and include entities with little operating history or entities that possess operations in new or developing industries. These investments, should they become publicly traded, would generally be: (i) subject to restrictions on resale, if they were acquired from the issuer in private placement transactions; and (ii) susceptible to market risk. At this time, the Company's investments in short-term securities are in 90-day Treasury Bills, which are federally guaranteed securities, or other high quality, highly liquid investments. The Company's cash balances, if not large enough to be invested in 90-day Treasury Bills or other high quality, highly liquid investments, are swept into designated money market accounts.

In addition, the following risk factors relate to market risks impacting the Company.

Investing in private companies involves a high degree of risk.

Our investment portfolio generally consists of loans to, and investments in, private companies. Investments in private businesses involve a high degree of business and financial risk, which can result in substantial losses and accordingly should be considered speculative. There is generally very little publicly available information about the companies in which we invest, and we rely significantly on the due diligence of the members of the investment team to obtain information in connection with our investment decisions.

Our investments in portfolio companies are generally illiquid.

We generally acquire our investments directly from the issuer in privately negotiated transactions. Most of the investments in our portfolio (other than cash or cash equivalents) are typically subject to restrictions on resale or otherwise have no established trading market. We may exit our investments when the portfolio company has a liquidity event, such as a sale, recapitalization or initial public offering. The illiquidity of our investments may adversely affect our ability to dispose of equity and debt securities at times when it may be otherwise advantageous for us to liquidate such investments. In addition, if we were forced to immediately liquidate some or all of the investments in the portfolio, the proceeds of such liquidation could be significantly less than the current fair value of such investments.

Substantially all of our portfolio investments are recorded at fair value and, as a result, there is a degree of uncertainty regarding the carrying values of our portfolio investments.

Pursuant to the requirements of the 1940 Act, because our portfolio company investments do not have readily ascertainable market values, we record these investments at fair value in accordance with our Valuation Procedures adopted by our board of directors. As permitted by the SEC, the board of

Table of Contents

directors has delegated the responsibility of making fair value determinations to the Valuation Committee, subject to the board of directors' supervision and pursuant to the Valuation Procedures.

At January 31, 2008, approximately 78.68% of our total assets represented portfolio investments recorded at fair value.

There is no single standard for determining fair value in good faith. As a result, determining fair value requires that judgment be applied to the specific facts and circumstances of each portfolio investment while employing a consistently applied valuation process for the types of investments we make. In determining the fair value of a portfolio investment, the Valuation Committee analyzes, among other factors, the portfolio company's financial results and projections and publicly traded comparables when available, which may be dependent on general economic conditions. We specifically value each individual investment and record unrealized depreciation for an investment that we believe has become impaired, including where collection of a loan or realization of an equity security is doubtful. Conversely, we will record unrealized appreciation if we have an indication (based on a significant development) that the underlying portfolio company has appreciated in value and, therefore, our equity security has also appreciated in value, where appropriate. Without a readily ascertainable market value and because of the inherent uncertainty of fair valuation, fair value of our investments may differ significantly from the values that would have been used had a ready market existed for the investments, and the differences could be material.

Pursuant to our Valuation Procedures, our Valuation Committee (which is currently comprised of three Independent Directors) reviews, considers and determines fair valuations on a quarterly basis (or more frequently, if deemed appropriate under the circumstances). Any changes in valuation are recorded in the statements of operations as Net change in unrealized (depreciation) appreciation on investments.

Economic recessions or downturns could impair our portfolio companies and harm our operating results.

Many of the companies in which we have made or will make investments may be susceptible to economic slowdowns or recessions. An economic slowdown may affect the ability of a company to engage in a liquidity event. These conditions could lead to financial losses in our portfolio and a decrease in our revenues, net income and assets.

Our overall business of making private equity investments may be affected by current and future market conditions. The absence of an active mezzanine lending or private equity environment may slow the amount of private equity investment activity generally. As a result, the pace of our investment activity may slow, which could impact our ability to achieve our investment objective. In addition, significant changes in the capital markets could have an effect on the valuations of private companies and on the potential for liquidity events involving such companies. This could affect the amount and timing of any gains realized on our investments.

Our borrowers may default on their payments, which may have an effect on our financial performance.

We may make long-term unsecured, subordinated loans, which may involve a higher degree of repayment risk than conventional secured loans. We primarily invest in companies that may have limited financial resources and that may be unable to obtain financing from traditional sources. In addition, numerous factors may adversely affect a portfolio company's ability to repay a loan we make to it, including the failure to meet a business plan, a downturn in its industry or operating results, or negative economic conditions. Deterioration in a borrower's financial condition and prospects may be accompanied by deterioration in any related collateral.

Our investments in mezzanine and other debt securities may involve significant risks.

Our investment strategy contemplates investments in mezzanine and other debt securities of privately held companies. Mezzanine investments typically are structured as subordinated loans (with or without warrants) that carry a fixed rate of interest. We may also make senior secured and other types of loans or debt investments.

Table of Contents

Our debt investments are typically not rated by any rating agency, but we believe that if such investments were rated, they would be below investment grade quality (rated lower than Baa3 by Moody's or lower than BBB- by Standard & Poor's, commonly referred to as junk bonds). Loans of below investment grade quality have predominantly speculative characteristics with respect to the borrower's capacity to pay interest and repay principal. Our debt investments in portfolio companies may thus result in a high level of risk and volatility and/or loss of principal.

We may not realize gains from our equity investments.

When we invest in mezzanine and senior debt securities, we may acquire warrants or other equity securities as well. We may also invest directly in various equity securities. Our goal is ultimately to dispose of such equity interests and realize gains upon our disposition of such interests. However, the equity interests we receive or invest in may not appreciate in value and, in fact, may decline in value. In addition, the equity securities we receive or invest in may be subject to restrictions on resale during periods in which it would be advantageous to resell. Accordingly, we may not be able to realize gains from our equity interests, and any gains that we do realize on the disposition of any equity interests may not be sufficient to offset any other losses we experience.

Our investments in small and middle-market privately-held companies are extremely risky and you could lose your entire investment.

Investments in small and middle-market privately-held companies are subject to a number of significant risks including the following:

Small and middle-market companies may have limited financial resources and may not be able to repay the loans we make to them. Our strategy includes providing financing to companies that typically do not have capital sources readily available to them. While we believe that this provides an attractive opportunity for us to generate profits, this may make it difficult for the borrowers to repay their loans to us upon maturity.

Small and middle-market companies typically have narrower product lines and smaller market shares than large companies. Because our target companies are smaller businesses, they may be more vulnerable to competitors' actions and market conditions, as well as general economic downturns. In addition, smaller companies may face intense competition, including competition from companies with greater financial resources, more extensive development, manufacturing, marketing and other capabilities, and a larger number of qualified managerial and technical personnel.

There is generally little or no publicly available information about these privately-held companies. There is generally little or no publicly available operating and financial information about privately-held companies. As a result, we rely on our investment professionals to perform due diligence investigations of these privately-held companies, their operations and their prospects. We may not learn all of the material information we need to know regarding these companies through our investigations.

Small and middle-market companies generally have less predictable operating results. We expect that our portfolio companies may have significant variations in their operating results, may from time to time be parties to litigation, may be engaged in rapidly changing businesses with products subject to a substantial risk of obsolescence, may require substantial additional capital to support their operations, finance expansion or maintain their competitive position, may otherwise have a weak financial position or may be adversely affected by changes in the business cycle. Our portfolio companies may not meet net income, cash flow and other coverage tests typically imposed by their senior lenders.

Table of Contents

Small and middle-market businesses are more likely to be dependent on one or two persons. Typically, the success of a small or middle-market company also depends on the management talents and efforts of one or two persons or a small group of persons. The death, disability or resignation of one or more of these persons could have a material adverse impact on our portfolio company and, in turn, on us.

Small and middle-market companies are likely to have greater exposure to economic downturns than larger companies. We expect that our portfolio companies will have fewer resources than larger businesses and an economic downturn may thus more likely have a material adverse effect on them.

Small and middle-market companies may have limited operating histories. We may make debt or equity investments in new companies that meet our investment criteria. Portfolio companies with limited operating histories are exposed to the operating risks that new businesses face and may be particularly susceptible to, among other risks, market downturns, competitive pressures and the departure of key executive officers.

Investments in foreign debt or equity may involve significant risks in addition to the risks inherent in U.S. investments.

Our investment strategy has resulted in some investments in debt or equity of foreign companies (subject to applicable limits prescribed by the 1940 Act). Investing in foreign companies can expose us to additional risks not typically associated with investing in U.S. companies. These risks include exchange rates, changes in exchange control regulations, political and social instability, expropriation, imposition of foreign taxes, less liquid markets and less available information than is generally the case in the United States, higher transaction costs, less government supervision of exchanges, brokers and issuers, less developed bankruptcy laws, difficulty in enforcing contractual obligations, lack of uniform accounting and auditing standards and greater price volatility.

The market for private equity investments can be highly competitive. In some cases, our status as a regulated business development company may hinder our ability to participate in investment opportunities.

We face competition in our investing activities from private equity funds, other business development companies, investment banks, investment affiliates of large industrial, technology, service and financial companies, small business investment companies, wealthy individuals and foreign investors. As a regulated business development company, we are required to disclose quarterly the name and business description of portfolio companies and the value of any portfolio securities. Many of our competitors are not subject to this disclosure requirement. Our obligation to disclose this information could hinder our ability to invest in certain portfolio companies. Additionally, other regulations, current and future, may make us less attractive as a potential investor to a given portfolio company than a private equity fund not subject to the same regulations. Furthermore, some of our competitors have greater resources than we do. Increased competition would make it more difficult for us to purchase or originate investments at attractive prices. As a result of this competition, sometimes we may be precluded from making certain investments.

Complying with the RIC requirements may cause us to forego otherwise attractive opportunities.

In order to qualify as a RIC for U.S. federal income tax purposes, we must satisfy tests concerning the sources of our income, the nature and diversification of our assets and the amounts we distribute to our shareholders. We may be unable to pursue investments that would otherwise be advantageous to us in order to satisfy the source of income or asset diversification requirements for qualification as a RIC. In particular, to qualify as a RIC, at least 50% of our assets must be in the form of cash and cash items, Government securities, securities of other RICs, and other securities that represent not more than 5% of our total assets and not more than 10% of the outstanding voting securities of the issuer. We have from time to time held a significant portion

Table of Contents

of our assets in the form of securities that exceed 5% of our total assets or more than 10% of an outstanding security of an issuer, and compliance with the RIC requirements may adversely affect our ability to make additional investments that represent more than 5% of our total assets or more than 10% of the outstanding voting securities of the issuer. Thus, compliance with the RIC requirements may hinder our ability to take advantage of investment opportunities believed to be attractive.

Regulations governing our operation as a business development company affect our ability to, and the way in which we, raise additional capital.

We are not generally able to issue and sell our common stock at a price below net asset value per share. We may, however, sell our common stock or warrants at a price below the then-current net asset value per share of our common stock if our board of directors determines that such sale is in the best interests of the Company and its stockholders, and our stockholders approve such sale. In any such case, the price at which our securities are to be issued and sold may not be less than a price that, in the determination of our board of directors, closely approximates the market value of such securities (less any distributing commission or discount). If we raise additional funds by issuing more common stock or senior securities convertible into, or exchangeable for, our common stock, then the percentage ownership of our stockholders at that time will decrease, and you might experience dilution.

Our common stock price can be volatile.

The trading price of our common stock may fluctuate substantially. The price of the common stock may be higher or lower than the price you pay for your shares, depending on many factors, some of which are beyond our control and may not be directly related to our operating performance. These factors include the following:

price and volume fluctuations in the overall stock market from time to time;

significant volatility in the market price and trading volume of securities of business development companies or other financial services companies;

volatility resulting from trading in derivative securities related to our common stock including puts, calls, long-term equity participation securities, or LEAPs, or short trading positions;

changes in regulatory policies or tax guidelines with respect to business development companies or RICs;

actual or anticipated changes in our earnings or fluctuations in our operating results or changes in the expectations of securities analysts;

general economic conditions and trends;

loss of a major funding source; or

departures of key personnel of TTG Advisers.

We are subject to market discount risk.

As with any stock, the price of our shares will fluctuate with market conditions and other factors. If shares are sold, the price received may be more or less than the original investment. Whether investors will realize gains or losses upon the sale of our shares will not depend directly upon our NAV, but will depend upon the market price of the shares at the time of sale. Since the market price of our shares will be affected by such factors as the relative demand for and supply of the shares in the market, general market and economic

Table of Contents

conditions and other factors beyond our control, we cannot predict whether the shares will trade at, below or above our NAV. Although our shares have recently traded at a premium to our NAV, historically, our shares, as well as those of other closed-end investment companies, have frequently traded at a discount to their NAV, which discount often fluctuates over time.

Our ability to grow depends on our ability to raise capital.

To fund new investments, we may need to issue periodically equity securities or borrow from financial institutions. Unfavorable economic conditions could increase our funding costs, limit our access to the capital markets or result in a decision by lenders not to extend credit to us. If we fail to obtain capital to fund our investments, it could limit both our ability to grow our business and our profitability. With certain limited exceptions, we are only allowed to borrow amounts such that our asset coverage, as defined in the 1940 Act, equals at least 200% after such borrowing. The amount of leverage that we employ depends on TTG Advisers' and our board of directors' assessment of market and other factors at the time of any proposed borrowing. We cannot assure you that we will be able to maintain our current facilities or obtain other lines of credit at all or on terms acceptable to us.

Changes in interest rates may affect our cost of capital and net operating income and our ability to obtain additional financing.

Because we have borrowed and may continue to borrow money to make investments, our net investment income before net realized and unrealized gains or losses, or net investment income, may be dependent upon the difference between the rate at which we borrow funds and the rate at which we invest these funds. As a result, there can be no assurance that a significant change in market interest rates would not have a material adverse effect on our net investment income. In periods of declining interest rates, we may have difficulty investing our borrowed capital into investments that offer an appropriate return. In periods of sharply rising interest rates, our cost of funds would increase, which could reduce our net investment income. We may use a combination of long-term and short-term borrowings and equity capital to finance our investing activities. We may utilize our short-term credit facilities as a means to bridge to long-term financing. Our long-term fixed-rate investments are financed primarily with equity and long-term fixed-rate debt. We may use interest rate risk management techniques in an effort to limit our exposure to interest rate fluctuations. Such techniques may include various interest rate hedging activities to the extent permitted by the 1940 Act. Additionally, we cannot assure you that financing will be available on acceptable terms, if at all. Recent turmoil in the credit markets has greatly reduced the availability of debt financing. Deterioration in the credit markets, which could delay our ability to sell certain of our loan investments in a timely manner, could also negatively impact our cash flows.

Our ability to use our capital loss carryforwards may be subject to limitations.

If we experience a shift in the ownership of our common stock (e.g., if a shareholder acquires 5% or more of our outstanding shares of common stock, or if a shareholder who owns 5% or more of our outstanding shares of common stock significantly increases or decreases its investment in the Company), our ability to utilize our capital loss carryforwards to offset future capital gains may be severely limited. Further, in the event that we are deemed to have failed to meet the requirements to qualify as a RIC, our ability to use our capital loss carryforwards could be adversely affected.

The war with Iraq, terrorist attacks, and other acts of violence or war may affect any market for our common stock, impact the businesses in which we invest and harm our operations and our profitability.

The war with Iraq, its aftermath and the continuing occupation of Iraq are likely to have a substantial impact on the U.S. and world economies and securities markets. The nature, scope and duration of the war and occupation cannot be predicted with any certainty. Furthermore, terrorist attacks may harm our results of

Table of Contents

operations and your investment. We cannot assure you that there will not be further terrorist attacks against the United States or U.S. businesses. Such attacks and armed conflicts in the United States or elsewhere may impact the businesses in which we invest directly or indirectly, by undermining economic conditions in the United States. Losses resulting from terrorist events are generally uninsurable.

Item 4. Controls and Procedures

(a) As of the end of the period covered by this quarterly report on Form 10-Q, the individual who performs the functions of a Principal Executive Officer (the CEO) and the individual who performs the functions of a Principal Financial Officer (the CFO) conducted an evaluation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended). Based upon this evaluation, our CEO and CFO concluded that our disclosure controls and procedures are effective and provide reasonable assurance that information required to be disclosed in our periodic SEC filings is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our CEO and CFO, as appropriate, to allow timely decisions regarding required disclosure.

(b) There have been no changes in our internal control over financial reporting that occurred during the fiscal quarter ended January 31, 2008, which have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
